In June 2024, BlackRock announced that it had entered into a definitive agreement to acquire Preqin, a leading independent provider of private markets data, for £2.55 billion (or approximately $3.2 billion based on the GBP/USD foreign exchange rate at December 31, 2024) in cash. The Company believes bringing together Preqin's data and research tools with the complementary workflows of Aladdin and eFront in a unified platform will create a preeminent private markets technology and data provider. The Preqin Transaction is anticipated to close in the first quarter of 2025, subject to customary closing conditions.

In December 2024, BlackRock announced that it had entered into a definitive agreement to acquire 100% of the business and assets of HPS Investment Partners ("HPS"), a leading global credit investment manager with 100% of the consideration paid in BlackRock equity (the "HPS Transaction"). The equity will generally be delivered in units of a wholly-owned subsidiary of BlackRock ("SubCo Units") which will be exchangeable on a one-for-one basis (subject to certain adjustments) into BlackRock common stock (accordingly, the value of each unit delivered will be based on the price of a share of BlackRock's common stock and the specific terms of the SubCo Units). Approximately 9.2 million SubCo Units and RSUs will be paid at closing. Approximately 2.9 million SubCo Units, will be paid in approximately five years, subject to the satisfaction of certain post-closing conditions. In addition, there is potential for additional consideration to be earned of up to 1.6 million SubCo Units that is based on financial performance milestones measured and paid in approximately five years. Of the total deal consideration, up to 0.7 million units will be used to fund an equity retention pool for HPS employees. In aggregate, inclusive of all SubCo Units paid at closing, eligible to be paid in approximately five years, and potentially earned through achievement of financial performance milestones as well as BlackRock RSUs to be issued in the transaction, the maximum amount of common stock issuable upon exchange of such SubCo Units would be approximately 13.7 million shares. The Company expects the addition of HPS will create an integrated private credit platform to provide both public and private income solutions for clients across their whole portfolios. The HPS Transaction is anticipated to close in mid-2025 subject to regulatory approvals and customary closing conditions.

On January 29, 2025, the Company announced that the Board of Directors approved BlackRock's quarterly dividend of $5.21 per share to be paid on March 24, 2025 to stockholders of record at the close of business on March 7, 2025.

The Company conducted a review for additional subsequent events and determined that no subsequent events had occurred that would require accrual or additional disclosures.

Exhibit 3.1

RESTATED CERTIFICATE OF INCORPORATION

OF

BLACKROCK, INC.

November 20, 2024

BlackRock, Inc., a corporation organized and existing under the laws of the State of Delaware (the "Corporation"), does hereby certify as follows:

1. The name of the Corporation is BlackRock, Inc. The Corporation was originally incorporated under the name "New Banana, Inc." and the original Certificate of Incorporation of the Corporation was filed with the Secretary of State of the State of Delaware on January 8, 2024 and subsequently amended via the filing of a Certificate of Amendment to the Certificate of Incorporation of the Corporation with the Secretary of State of the State of Delaware on January 24, 2024 pursuant to which the Corporation changed its name to BlackRock Funding, Inc. (collectively, the "Original Certificate of Incorporation").

2. The Original Certificate of Incorporation was amended and restated on October 1, 2024 and subsequently amended via the filing of a Certificate of Amendment on October 1, 2024, pursuant to which the Corporation changed its name from BlackRock Funding, Inc. to BlackRock, Inc. (collectively, the "Amended and Restated Certificate of Incorporation").

3. This Restated Certificate of Incorporation was adopted in accordance with Section 245 of the General Corporation Law of the State of Delaware on November 20, 2024. This Restated Certificate of Incorporation only restates and integrates and does not further amend the provisions of the Amended and Restated Certificate of Incorporation, as heretofore amended or supplemented, and there is no discrepancy between the provisions of the Amended and Restated Certificate of Incorporation, as heretofore amended or supplemented, and the provisions of this Restated Certificate of Incorporation.

4. The text of the Amended and Restated Certificate of Incorporation of the Corporation, as heretofore amended or supplemented, is hereby integrated and restated in its entirety as follows:

FIRST: The name of the corporation is BlackRock, Inc. (hereinafter the "Corporation").

SECOND: The registered office of the Corporation within the State of Delaware shall be at 251 Little Falls Drive, City of Wilmington, County of New Castle, State of Delaware 19808, and the name of the registered agent of the Corporation at such address shall be Corporation Service Company.

THIRD: The purpose of the Corporation is to engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of the State of Delaware (the "DGCL").

FOURTH: A. Authorized Shares. The Corporation shall be authorized to issue 1,000,000,000 shares of stock, of which (i) 500,000,000 shares shall be shares of Common Stock, par value $0.01 per share (the "Common Stock") and (ii) 500,000,000 shares shall be shares of Preferred Stock, par value $0.01 per share (the "Preferred Stock").

B. Preferred Stock. The Preferred Stock may be issued from time to time in one or more classes or series. The Board of Directors is hereby authorized to provide for the issuance of shares of Preferred Stock in one or more classes or series and, by filing a certificate pursuant to the DGCL (hereinafter referred to as a "Preferred Stock Designation"), to establish from time to time the number of shares to be included in each such class or series, and to fix the designations, voting powers (if any), privileges, preferences and relative, participating, optional or other special rights of the shares of each such class or series and the qualifications, limitations and restrictions thereon. The authority of the Board of Directors with respect to each class or series shall include, but not be limited to, determination of the following:

(1) the designation of the class or series, which may be by distinguishing number, letter or title;

(2) the number of shares of the class or series, which number the Board of Directors may thereafter (except where otherwise provided in the Preferred Stock Designation) increase or decrease (but not below the number of shares thereof then outstanding) in the manner permitted by law;

(3) the rate of any dividends (or method of determining the dividends) payable to the holders of the shares of such class or series, any conditions upon which such dividends shall be paid, the form of payment thereof (whether cash, securities of the Corporation, securities of another person or other assets) and the date or dates or the method for determining the date or dates upon which such dividends shall be payable;

(4) whether dividends, if any, shall be cumulative or noncumulative and, in the case of shares of any class or series having cumulative dividend rights, the date or dates or method of determining the date or dates from which dividends on the shares of such class or series shall cumulate;

(5) if the shares of such class or series may be redeemed by the Corporation, the price or prices (or method of determining such price or prices) at which, the form of payment of such price or prices (which may be cash, property or rights, including securities of the Corporation or of another corporation or other entity) for which, the period or periods within which and the other terms and conditions upon which the shares of such class or series may be redeemed, in whole or in part, at the option of the Corporation or at the option of the holder or holders thereof or upon the happening of a specified event or events, if any, including the obligation, if any, of the Corporation to purchase or redeem shares of such class or series pursuant to a sinking fund or otherwise;

(6) the amount payable out of the assets of the Corporation to the holders of shares of the class or series in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Corporation;

(7) provisions, if any, for the conversion or exchange of the shares of such class or series, at any time or times, at the option of the holder or holder thereof or at the option of the Corporation or upon the happening of a specified event or events, into shares of any other class or classes or any other series of the same class of capital stock of the Corporation or into any other security of the Corporation, or into the stock or other securities of any other corporation or other entity, and the price or

prices or rate or rates of conversion or exchange and any adjustments applicable thereto, and all other terms and conditions upon which each conversion or exchange may be made;

(8) restrictions on the issuance of shares of the same class or series or of any other class or series of capital stock of the Corporation, if any; and

(9) the voting rights and powers, if any, of the holders of shares of the class or series.

C. Common Stock. No stockholder shall be entitled to exercise any right of cumulative voting.

FIFTH: A. Stockholder Meetings.

(1) Meetings of stockholders may be held within or without the State of Delaware, as the Bylaws may provide. An annual meeting of the stockholders of the Corporation for the election of directors and for the transaction of such other business as may come before the meeting shall be held at such time and place as shall be determined in accordance with the Bylaws. Elections of directors need not be by written ballot unless otherwise provided in the Bylaws.

(2) Except as otherwise required by law and subject to the rights of the holders of any class or series of stock having a preference over the Common Stock as to dividends or distributions upon liquidation, special meetings of stockholders of the Corporation of any class or series for any purpose or purposes may be called only by:

(a) the Chairman of the Board of Directors;

(b) the President of the Corporation;

(c) a majority of the Board of Directors;

(d) any committee of the Board of Directors the powers and authority of which include the power and authority to call such meetings; or

(e) the Chairman of the Board of Directors, the President or the Corporate Secretary of the Corporation upon a written request of one or more record holders of shares of stock of the Corporation representing ownership of not less than 15 percent of the voting power of all outstanding shares of stock in the Corporation, which request complies with the procedures for calling a special meeting of stockholders as set forth in the Bylaws, as may be amended from time to time.

B. Action by Written Consent. Any action required or permitted to be taken at any annual or special meeting of the stockholders may be effected by written consent of such stockholders pursuant to Section 228 of the DGCL if such action has been approved in advance by the requisite vote of the Board of Directors.

SIXTH: A. Powers of the Board of Directors. The business and affairs of the Corporation shall be managed by or under the direction of the Board of Directors, which shall be constituted as provided in this Article and as provided by law.

B. Number of Directors. Subject to the rights of holders of Preferred Stock, the number of directors shall be fixed from time to time by resolution adopted by the affirmative vote of a majority of the entire Board of Directors then in office.

C. Election and Term. The directors of the Corporation shall be elected annually for terms expiring at the next annual meeting of stockholders and until such directors' successors shall have been elected and qualified. Any vacancies created in the Board of Directors through and increase in the number of directors or otherwise may be filled in accordance with the Bylaws of the Corporation and the applicable laws of the State of Delaware.

D. Removal of Directors. Except as may be provided in a resolution or resolutions providing for any class or series of Preferred Stock with respect to any directors elected by the holders of such class or series, any director, or the entire Board of Directors, may be removed, with or without cause, by the holders of a majority of the votes of capital stock then entitled to vote in the election of directors at a meeting of stockholders called for that purpose.

E. Meetings of the Board of Directors. Meetings of the Board of Directors may be held within or without the State of Delaware, as the Bylaws may provide.

F. Quorum; Required Vote. Except as otherwise provided by law:

(1) at all meetings of the Board of Directors, a majority of the entire Board of Directors shall constitute a quorum for the transaction of business, and

(2) the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the Board of Directors.

SEVENTH: A. Liability. A director of the Corporation shall, to the maximum extent permitted by the laws of the State of Delaware, as now or hereafter in effect, have no personal liability to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director.

B. Indemnification.

(1) The Corporation shall indemnify its directors and officers to the fullest extent authorized or permitted by law, as now or hereafter in effect and such right to indemnification shall continue as to a person who has ceased to be a director or officer of the Corporation and shall inure to the benefit of his or her heirs, executors and personal and legal representatives; *provided*, *however*, that, except for proceedings to enforce rights to indemnification, the Corporation shall not be obligated to indemnify any director or officer (or his or her heirs, executors or personal or legal representatives) in connection with a proceeding (or part thereof) initiated by such person unless such proceeding (or part thereof) was authorized or consented to by the Board of Directors. The right to indemnification conferred by this Article Seventh shall include the right to be paid by the Corporation the expenses incurred in defending or otherwise participating in any proceeding in advance of its final disposition.

(2) The Corporation may, to the extent authorized from time to time by the Board of Directors, provide rights to indemnification and to the advancement of expenses to employees and agents of the Corporation similar to those conferred in this Article Seventh to directors and officers of the Corporation.

(3) The rights to indemnification and to the advance of expenses conferred in this Article Seventh shall not be exclusive of any other right which any person may have or hereafter

acquire under this Certificate of Incorporation, the Bylaws of the Corporation, any statute, agreement, vote of stockholders or disinterested directors or otherwise.

C. Modification.

(1) Any repeal or modification of this Article Seventh by the stockholders of the Corporation shall not adversely affect any exclusion of liability, rights to indemnification and to the advancement of expenses or other protection of a director, officer, employee or agent of the Corporation existing at the time of such repeal or modification with respect to any acts or omissions occurring prior to such repeal or modification.

(2) Any repeal or modification of the laws of the State of Delaware, as are now or hereafter in effect, shall not adversely affect any rights to indemnification and to the advancement of expenses or other protection of a director, officer, employee or agent of the Corporation existing at the time of such repeal or modification with respect to any acts or omissions occurring prior to such repeal or modification.

EIGHTH: The Corporation shall be subject to Section 203 of the DGCL.

NINTH: The books of the Corporation may be kept (subject to any provision contained in the DGCL or other applicable statutes) outside the State of Delaware at such place or places as may be designated from time to time by the Board of Directors or in the Bylaws of the Corporation.

TENTH: Whenever a compromise or arrangement is proposed between the Corporation and its creditors or any class of them and/or between the Corporation and its stockholders or any class of them, any court of equitable jurisdiction within the State of Delaware may, in a summary way, on the application of the Corporation or of any creditor or stockholder thereof or on the application of any receiver or receivers appointed for the Corporation under the provisions of Section 291 of the DGCL or on the application of trustees in dissolution or of any receiver or receivers appointed for the Corporation under the provisions of Section 279 of the DGCL, order a meeting of the creditors or class of creditors, and/or of the stockholders or class of stockholders of the Corporation, as the case maybe, to be summoned in such manner as said court directs. If a majority in number representing three-fourths in value of the creditors or class of creditors, and/or of the stockholders or class of stockholders of the Corporation, as the case may be, agree to any compromise or arrangement and to any reorganization of the Corporation as a consequence of such compromise or arrangement, the said compromise or arrangement and the said reorganization shall, if sanctioned by the court to which the said application has been made, be binding on all the creditors or class of creditors, and/or on all the stockholders or class of stockholders, of the Corporation, as the case may be, and also on the Corporation.

ELEVENTH: Bylaw Amendments. The Bylaws of the Corporation may be adopted, consistent with law and the provisions of this Certificate of Incorporation (including any Preferred Stock Designation), and once adopted, any Bylaw may be altered or repealed by: (1) the affirmative vote of at least a majority of the members of the Board of Directors then in office, or (2) the affirmative vote of at least a majority of the voting power of the Voting Stock.

TWELFTH: General Right to Amend Certificate of Incorporation.

(1) The Corporation hereby reserves the right at any time and from time to time to amend, alter, change or repeal any provision contained in this Certificate of Incorporation, and to add thereto any other provision authorized by the laws of the state of Delaware at the time in force, and except as may otherwise be explicitly provided by any provision of this Certificate of Incorporation, all

rights, preferences and privileges of whatsoever nature conferred upon stockholders, directors or officers of the Corporation or any other person whomsoever by and pursuant to this Certificate of Incorporation in its present form, or as hereafter amended, are granted subject to the right reserved in this paragraph (1).

(2) Subject to the rights of the holders of Preferred Stock, the provisions of this Certificate of Incorporation may only be altered, amended or repealed, and any inconsistent provision adopted, with such action (if any) of the Board of Directors as is provided by law, and in addition to any other vote of stockholders (if any) required by law, and notwithstanding that a lower vote (or a no vote) of stockholders otherwise would be required, by the approval of at least a majority of the voting power of all Voting Stock.

THIRTEENTH: The Corporation shall have perpetual existence.

FOURTEENTH: For purposes of this Certificate of Incorporation, the following definitions shall apply:

(1) "Capital Stock" means any and all shares (however designated, whether voting or non-voting) of capital stock issued by the Corporation.

(2) each reference to a "person" shall be deemed to include not only a natural person, but also a corporation, partnership, joint venture, association or legal entity of any kind; each reference to a "natural person" (or to a "record holder" of shares, if a natural person) shall be deemed to include, in his, her or its representative capacity, a guardian, committee, executor, administrator or other legal representative of such natural person or record holder.

(3) "Voting Stock" shall mean the then outstanding shares of Capital Stock of the Corporation entitled to vote generally on the election of directors and shall exclude any class or series of capital stock of the Corporation only entitled to vote in the event of dividend arrearages or any default under any provision of such series thereon, whether or not at the time of determination there are any such dividend arrearages or defaults.

IN WITNESS WHEREOF, BlackRock, Inc. has caused this Restated Certificate of Incorporation to be executed by a duly authorized officer of the Corporation on this 20th day of November, 2024.

BLACKROCK, INC.

Exhibit 4.20

DESCRIPTION OF THE REGISTRANT'S SECURITIES REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934

As of December 31, 2024, our common stock is the only class of securities that we have registered under Section 12 of the Securities Exchange Act, as amended.

The description of our common stock below does not purport to be complete and is qualified in its entirety by reference to our restated certificate of incorporation, as restated on November 20, 2024 (as amended and restated, the "Restated Certificate of Incorporation") and our Amended and Restated Bylaws, as in effect since October 1, 2024 (the "Amended and Restated Bylaws"), each of which is incorporated herein by reference as an exhibit to the Annual Report on Form 10-K filed with the Securities and Exchange Commission, of which this Exhibit 4.20 is a part. When used in this exhibit, the terms "BlackRock," "we," "our" and "us" refer solely to BlackRock, Inc. (formerly known as "BlackRock Funding, Inc") and not to its subsidiaries. We urge you to read our Restated Certificate of Incorporation, our Amended and Restated Bylaws and the applicable provision of the Delaware General Corporation Law.

DESCRIPTION OF COMMON STOCK

Authorized Shares of Capital Stock

Our Restated Certificate of Incorporation provides that we are authorized to issue one billion shares of capital stock, consisting of 500,000,000 shares of common stock, par value $0.01 per share, and 500,000,000 shares of preferred stock, par value $0.01 per share.

As of December 31, 2024, we had 154,947,813 shares of common stock issued and outstanding and no shares of preferred stock issued and outstanding.

Voting Rights

The holders of common stock are entitled to one vote for each share on all matters submitted to a vote of stockholders.

Dividends and Liquidation Rights

Subject to the preferential rights of any outstanding series of preferred stock created by our board of directors from time to time, the holders of common stock are entitled to such dividends as may be declared from time to time by our board of directors from funds available therefor, and, upon liquidation, holders of common stock are entitled to share pro rata in any distribution of our assets after payment, or providing for the payment of, our liabilities.

Miscellaneous

The outstanding shares of our common stock, are fully paid and nonassessable. Our common stock has no preemptive or conversion rights and there are no redemption or sinking fund provisions applicable thereto.

Listing

Our common stock is listed on the New York Stock Exchange under the ticker symbol "BLK."

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Investor Services, 480 Washington Boulevard, Jersey City, New Jersey 07310-1900, telephone (800) 903-8567.

Anti-Takeover Considerations

The Delaware General Corporation Law, our Restated Certificate of Incorporation and our Amended and Restated Bylaws contain provisions which could serve to discourage or to make more difficult a change in control of us without the support of our board of directors or without meeting various other conditions.

Extraordinary Corporate Transactions

Delaware law provides that the holders of a majority of the shares entitled to vote must approve any fundamental corporate transactions such as mergers, sales of all or substantially all of a corporation's assets, dissolutions, etc.

State Takeover Legislation

Section 203 of the Delaware General Corporation Law, in general, prohibits a business combination between a corporation and an interested stockholder within three years of the time such stockholder became an interested stockholder, unless (a) prior to such time, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder, (b) upon consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, exclusive of shares owned by directors who are also officers and by certain employee stock plans or (c) at or subsequent to such time, the business combination is approved by the board of directors and authorized by the affirmative vote at a stockholders' meeting, and not by written consent, of at least 66 2/3% of the outstanding voting stock which is not owned by the interested stockholder. The restrictions of Section 203 of the Delaware General Corporation Law do not apply to certain business combinations or to corporations that have elected, in the manner provided therein, not to be subject to Section 203 of the Delaware General Corporation Law or, with certain exceptions, which do not have a class of voting stock that is listed on a national securities exchange or held of record by more than 2,000 stockholders. We have elected to be governed by Section 203 of the Delaware General Corporation Law.

Rights of Dissenting Stockholders

Delaware law does not afford appraisal rights in a merger transaction to holders of shares that are either listed on a national securities exchange or held of record by more than 2,000 stockholders, *provided* that such shares are converted into stock of the surviving corporation or another corporation, which corporation in either case must also be listed on a national securities exchange or held of record by more than 2,000 stockholders. In addition, Delaware law denies appraisal rights to stockholders of the surviving corporation in a merger if the surviving corporation's stockholders were not required to approve the merger.

Stockholder Action

Delaware law provides that, unless otherwise stated in our Restated Certificate of Incorporation, any action which may be taken at an annual meeting or special meeting of stockholders may be taken without a meeting, if a consent in writing is signed by the holders of the outstanding stock having the minimum number of votes necessary to authorize the action at a meeting of stockholders. Our Restated Certificate of Incorporation provides that stockholders may take action by written consent if such action has been approved in advance by the majority vote of our board of directors.

Meetings of Stockholders

Our Restated Certificate of Incorporation provides that special meetings of the stockholders may be called at any time by the chairman of the board of directors, the president, a majority of the board of directors, any committee of the board of directors that has the power to call such meetings, or the chairman of the board of directors, the president or the corporate secretary upon a written request of one or more record holders of shares of our stock representing ownership of not less than 15 percent of the voting power of all outstanding shares of our stock, which request complies with the procedures for calling a special meeting of stockholders as set forth in our Amended and Restated Bylaws, as they may be further amended from time to time.

Cumulative Voting

Delaware law permits stockholders to cumulate their votes and either cast them for one candidate or distribute them among two or more candidates in the election of directors only if expressly authorized in a corporation's certificate of incorporation. Our Restated Certificate of Incorporation does not authorize cumulative voting.

Removal of Directors

Delaware law provides that, except in the case of a classified board of directors or where cumulative voting applies, a director, or the entire board of directors, of a corporation may be removed, with or without cause, by the affirmative vote of a majority of the shares of the corporation entitled to vote at an election of directors.

Our Restated Certificate of Incorporation provides that any or all of the directors may be removed, with or without cause, by the holders of a majority of the votes of capital stock then entitled to vote in the election of directors at a meeting of stockholders called for that purpose.

Vacancies

Delaware law provides that vacancies and newly created directorships resulting from a resignation or any increase in the authorized number of directors elected by all of the stockholders having the right to vote as a single class may be filled by a majority of the directors then in office, unless the governing documents of a corporation provide otherwise.

Our Amended and Restated Bylaws provide that newly created directorships resulting from an increase in the number of directors and vacancies occurring in the board of directors for any reason, may be filled by vote of a majority of the directors then in office, although less than a quorum, or by a sole remaining director or by the stockholders if the vacancy resulted from the action of stockholders.

No Preemptive Rights

Holders of common stock do not have any preemptive rights to subscribe for any additional shares of capital stock or other obligations convertible into or exercisable for shares of capital stock that we may issue in the future.

Board Term

Our directors are elected annually for terms of one year.

Exhibit 10.33

BlackRock

September 30, 2024

Dear Mr. Adebayo O. Ogunlesi,

Welcome! On behalf of BlackRock, we are excited about the prospect of having you as part of the BlackRock team. We look forward to all we can achieve as we bring our teams together to serve clients.

As you are aware, BlackRock, Inc. ("**BlackRock**") and Global Infrastructure Management, LLC ("**GIP**"), together with certain other parties, have entered into the Transaction Agreement, dated as of January 12, 2024 (the "**Transaction Agreement**") and the Governance Agreement, dated as of the date hereof (the "**Governance Agreement**"). If anything contained in this letter is found to conflict with or otherwise be inconsistent with any provision of the Governance Agreement, the provisions of the Governance Agreement shall control any such conflict or inconsistency.

We are providing this letter to briefly describe the compensation and benefits that you will receive or will be eligible for, as applicable, following the close of the transaction contemplated by the Transaction Agreement (the "**Closing**", with the date of such Closing, the "**Closing Date**"), and to provide other important information relative to your employment with BlackRock. Please note that your employment with BlackRock is subject to and contingent upon the Closing occurring and this letter will be void if the Closing fails to occur for any reason.

This confirms that upon the Closing, (a) your title will be "Senior Managing Director, Chairman and Chief Executive Officer" of Global Infrastructure Partners, a part of BlackRock, reporting to Laurence D. Fink, BlackRock's Chairman and Chief Executive Officer, and (b) you will become a member of BlackRock's Global Executive Committee. Following the Closing, you will continue to be employed on a full-time basis by your current employing entity, which will become part of the BlackRock group of companies. You will also become a member of the GIP Office of the Chairman (as defined in the Governance Agreement) and your day-to-day executive duties, responsibilities and authorities will be determined in accordance with the governance and operating principles set forth in the Governance Agreement. You will continue to be based in New York.

Section 1. Compensation and Benefits.

(a) Base Compensation. Your base salary will be at an annualized rate of $250,000, payable semi-monthly and in accordance with BlackRock's standard payroll practices. Beginning on January 1, 2026 (or such earlier date as may be mutually agreed upon by the GIP Office of the Chairman and BlackRock), your annualized base salary may be changed to harmonize such amount with BlackRock's compensation standards and align your compensation with similarly-situated BlackRock employees, but shall not affect any compensation payable in respect of any period prior to January 1, 2026 that is paid following such date. All compensation and benefits paid to you by BlackRock shall be subject to reduction, as may be applicable, to reflect all required tax withholdings and other payroll deductions.

(b) Bonus Compensation and Total Compensation.

(i) 2024 Annual Bonus. In recognition of your performance in the 2024 calendar year, you will be eligible for an annual discretionary cash bonus, payable in a manner consistent with GIP pre-Closing practice, targeted at no less than $3,750,000.

(ii) 2025 Annual Bonus. In recognition of your performance in the 2025 calendar year, you will be eligible for an annual discretionary cash bonus, payable in a manner consistent with GIP pre-Closing practice.

(iii) Total Compensation (after 2025). Annual discretionary bonuses reflect the financial performance of BlackRock, the performance of your business unit and your individual performance for the relevant performance year, in each case, as determined by the Management Development & Compensation Committee of the Board of Directors of BlackRock (the "**MDCC**"). The amount and form of annual discretionary bonus compensation is not guaranteed. A bonus awarded to you in one year does not mean that any bonus will be awarded to you in a subsequent year.

Notwithstanding any provision to the contrary above, starting on January 1, 2026 (or such earlier date as may be mutually agreed upon by the GIP Office of the Chairman and BlackRock), the form of delivery of your total compensation (inclusive of base salary, annual bonus and other incentive compensation but excluding any distributions in respect of (A) carried interest, performance fees, or similar entitlements and (B) any commitments made to investment vehicles or accounts sponsored or managed by the Company Business (as defined in the Governance Agreement) (such amounts under the foregoing clauses (A) and (B), together, the "**PRE**")) in respect of 2026 and subsequent calendar years may be changed to harmonize with BlackRock's total compensation approach for similarly-situated individuals, which provides that compensation may be delivered in a mix of cash and deferred equity under the terms of BlackRock's standard guidelines applicable to similarly-situated BlackRock employees (consistent with the terms of the Governance Agreement).

BlackRock has a strong pay for performance culture. The firm maintains a "total compensation" philosophy and strives to create a competitive total package consisting of base salary, annual bonus, and long-term awards that is intended to align individual performance with the financial success of the firm.

To be eligible to receive any bonus award discussed above, you must be employed with BlackRock, not have given notice of resignation or been informed that your employment has been terminated, in each case, through the date of payment, which is generally no later than February 1st of the year following the performance year.

(c) Employee Benefits. For the period commencing on the Closing Date through December 31, 2025 (or such earlier date as may be mutually agreed upon by the GIP Office of the Chairman and BlackRock) (such period, the "**GIP Benefit Period**"), you will continue to participate or be eligible to participate in all legacy GIP employee health, welfare, voluntary insurance, retirement savings and other benefit plans that were provided to you by the Company Group (as defined in the Transaction Agreement) immediately prior to the Closing Date subject to the terms and conditions of the applicable plan as may be in effect during the GIP Benefit Period or accrued during the GIP Benefit Period (excluding retention, transaction or change in control payments, deferred compensation, severance, retiree health and welfare benefits, defined benefit pension benefits, PRE, profits interests and allocations related thereto, and profit sharing). During the GIP Benefit Period, you will be eligible for leave and paid time off in accordance with GIP policy as in effect immediately prior to the Closing Date.

Effective as of January 1, 2026 (or such earlier date as may be mutually agreed upon by the GIP Office of the Chairman and BlackRock) and subsequent calendar years, you will be eligible to participate in BlackRock's employee benefit plans and programs, as in effect from time to time. You will be given full credit for all periods of service you had with the Company Group on or before the Closing Date to the extent it was recognized as service by the applicable member of the Company Group for purposes of vesting, eligibility to participate and level of benefits under BlackRock's employee benefits plans and programs in which you are eligible to participate following the Closing Date for service accrued or deemed accrued on or prior to the Closing Date with the Company Group (or any predecessor thereto) to the same extent that such credit was recognized by the Company Group under an analogous employee benefit plan or program of the Company Group immediately prior to the Closing, except to the extent that such credit would result in any duplication of benefits for the same period of service.

In addition, and notwithstanding anything to the contrary in this letter, for so long as you remain an employee of BlackRock (even after the GIP Benefit Period), you shall retain your benefits with respect to (i) the use of private and first-class air travel for business purposes (including personally owned private aircraft); (ii) your participation in the enhanced medical benefits under ArmadaCare at your level of participation as of the Closing Date throughout your BlackRock employment; and (iii) lifetime retiree medical benefits provided by GIP to retired founders, subject to the continuity of your coverage under GIP's and BlackRock's medical benefits plans, and your not being eligible for medical coverage with another employer; in each case of the foregoing clauses (i)-(iii) (collectively, the "**Protected Benefits**"), in a manner consistent with GIP's past practice prior to the Closing Date.

For the avoidance of doubt, you will not be eligible to receive any awards pursuant to the Retention Plan (as defined in the Transaction Agreement).

Except as expressly provided above with respect to the Protected Benefits, nothing in this letter should be construed as a guarantee of any particular level of benefits or of your participation in any benefit plan. Subject to the specific terms of this letter, the Transaction Agreement, and the Governance Agreement, BlackRock and GIP reserve the right to amend, modify or terminate any or all benefits and compensation plans and programs at any time.

(d) PRE. During your employment with GIP prior to the Closing, you have participated in allocations and distributions with respect to PRE. Your current allocations and distributions with respect to such PRE in Existing Funds (as defined in the Governance Agreement) will remain fully intact and shall be governed by the associated award letters, compensation statements, Organizational Documents (as defined in the Governance Agreement), the Governance Agreement and the Transaction Agreement, as applicable (and nothing in this letter is intended to create any additional rights or entitlements in PRE beyond those contained in such documentation). You will remain responsible for the co- investment requirement associated with such grants of PRE consistent with past practices.

Section 2. Pre-Employment Requirements; Conditions of Employment Continuation.

Your employment and continuation of employment with BlackRock upon the Closing is contingent upon your (i) signing and returning of this letter, (ii) successful completion of BlackRock's standard background checks, (iii) your provision to BlackRock of appropriate documentation authorizing you to work in the United States, and (iv) your completion of BlackRock's Initial Political Contributions Disclosure form, if applicable, and the absence of restrictions on your employment due to prior political contributions.

(a) Business Protection Agreement (Restrictive Covenants). In connection with the Transaction Agreement, you have entered into that certain Business Protection Agreement, dated as of January 12, 2024, by and among you, GIP and New Banana, Inc. (the "**BPA"**), setting forth certain restrictive covenants and other agreements among the parties thereto. This letter shall only become effective upon the Closing if the BPA becomes effective upon the Closing without repudiation by you. Notwithstanding the foregoing, nothing herein shall be construed to limit any of your rights or entitlements to consideration pursuant to the Transaction Agreement and such rights and entitlements to consideration shall not be contingent on your employment with BlackRock or any of its affiliates.

(b) Screening Process. BlackRock's background screening process consists of the following: (i) a background check (which dependent upon job location or employing entity may include processing of fingerprints for purposes of a criminal records check); and (ii) your provision to BlackRock of appropriate documentation authorizing you to work in the United States.

(c) BlackRock Policies. There are a number of BlackRock policies relating to Compliance and other areas that will also require your attention. Information on these policies will be made available to you either before or shortly after the Closing Date.

(d) Confidentiality and Employment Policy. You will be required to sign a confidentiality and solicitation agreement (the "**Confidentiality and Employment Policy**") as a condition of employment upon the Closing, a copy of which is enclosed with this letter.

(e) Notice Period. Notwithstanding your "at-will" status, written notice of the intention to leave BlackRock is required of any Employee as detailed in the Confidentiality and Employment Policy. For clarity, the notice period required for Senior Managing Directors is 90 days.

(f) Outside Activities. BlackRock maintains an Outside Activity Policy, which describes certain outside activities for which employees must seek prior approval. A copy of the policy is provided separately for your review. The Outside Activity Policy is subject to change at any time in the sole discretion of BlackRock. Upon your commencement of employment, you will be required to complete a form (which will be provided to you) disclosing any activities covered by the policy or confirming that there are none. While BlackRock encourages its employees to be involved in activities outside of the workplace, activities covered by the policy must be approved by BlackRock's Legal & Compliance Department or the Outside Activity Review Committee and any current activities in which you are engaged will be reviewed in the same manner as applicable to new and current BlackRock employees.

Section 3. Acknowledgments and Representations.

(a) You hereby acknowledge and agree that (i) you are not permitted to make any unauthorized use of documents or other information in your employment with BlackRock which could properly be considered or construed to be confidential or proprietary information of another individual or company (for clarity, this excludes the Company Group); (ii) you may not bring any confidential documents or other form of tangible information onto the premises of BlackRock relating to your prior employer(s)' business, (for clarity, this excludes the Company Group); and (iii) you are not subject to any contractual or other restriction or obligation that would prohibit you from becoming employed by BlackRock or performing your duties and responsibilities with BlackRock.

Notwithstanding the foregoing, this clause shall not be construed to restrict you from retaining and using in connection with your BlackRock employment information pertaining to the business being acquired pursuant to the terms of the Transaction Agreement.

(b) Entire Agreement. This letter, together with the Confidentiality and Employment Policy and the Governance Agreement, reflects the complete agreement between you and BlackRock regarding the terms of your employment with BlackRock and supersedes any other statements or agreements regarding your employment with BlackRock on or before the date of your signing of this letter between you and BlackRock and any of its affiliates (including, without limitation, following the Closing, GIP, and including any employment agreement or arrangement or other restrictive covenant between you and GIP which, as of the Closing, shall become null and void). Notwithstanding the foregoing, this letter does not supersede the BPA or any other restrictive covenant agreement or arrangement to which you are a party or bound, including but not limited to those set forth in any Protective Covenants Agreement or Organizational Documents, or any amendment thereto. This letter may not be modified, except by a writing signed by an authorized representative of BlackRock and you.

(c) Employment Status. At all times during your employment with BlackRock, you will be considered an employee at-will. This means that both you and BlackRock have the right, subject to Section 2(e) hereof, to terminate your employment at any time, with or without cause.

Please signify your acceptance of the terms and conditions of this letter by signing and dating where indicated below and returning the executed letter.

If you have any questions, please contact a member of the GIP HR team at Human.Resources@global-infra.com, who will refer matters to BlackRock HR as appropriate.

We are excited about the future and look forward to the Closing and welcoming you to the team. Together, we will build on the work you have already accomplished to create a world leading infrastructure private markets investment platform. We look forward to all that we will achieve together.

Sincerely,

/s/ Martin Small

ANNEX A

**Excerpt of Certain Provisions from the
Amended and Restated Agreement of Exempted Limited Partnership
of Global Infrastructure GP V, L.P.**

Certain information has been excluded from this Annex A because it is both not material and it is the type that the Registrant treats as private or confidential.

"**Additional Partners**" means any Person that becomes a Limited Partner following the execution and delivery of a counterpart of this Agreement at the discretion of the General Partner.

"**Administrative Expenses**" means the Partnership's share of "Offering and Organizational Expenses" (as such term is defined in the relevant Fund Agreement) of a Fund.

"**Affiliate**" means, with respect to any Person, any Person that directly or indirectly through one or more intermediaries, controls, is controlled by or is under common control with such Person, and the term "Affiliated" shall have a correlative meaning. The term "control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"**Agreement**" means this Amended and Restated Agreement of Exempted Limited Partnership, as amended from time to time.

"**Available Capital Commitment**" means, with respect to any Partner at any time, such Partner's Capital Commitment, reduced by the sum of all of such Partner's prior Capital Contributions, and increased by distributions or other amounts which would reduce the Partnership's "Funded Commitment" (as such term is defined in the relevant Fund Agreement), and subject to adjustment as provided in this Agreement.

"**Award Letter**" means the letter allocating Tranche Points to a Limited Partner to which this Annex A is attached.

"**Capital Account**" means a capital account established for each Partner on the books and records of the Partnership.

"**Capital Commitment**" means the commitment of each Limited Partner to make Capital Contributions in the amounts set forth on the books and records of the Partnership, as adjusted from time to time pursuant to the terms of this Agreement.

"**Capital Contribution**" means, with respect to any Partner, the capital contributed by such Partner to the Partnership pursuant to this Agreement, unless such capital is not treated as a Capital Contribution by the express terms of this Agreement.

“**Capital Interest**” means the portion of a Partner’s Interest other than any portion of such Interest attributable to Points and Carry Proceeds, including the portion of a Partner’s Interest relating to Special Profits Distributions.

“**Carry Proceeds**” means, with respect to Proceeds received by the Partnership from a Fund with respect to any Fund Investment, Proceeds representing distributions on account of the Fund Agreement for the Primary Fund or similar provisions in any other Fund Agreement, excluding any such amounts received by the Partnership on account of the Capital Contribution of the Partnership or the general partner of any Fund with respect to such Fund Investment. “Carry Proceeds” also means, with respect to any Fund Investment, any amount contributed by the Partners pursuant to Section 6.04 hereof with respect to such Fund Investment at the time of the disposition of such Fund Investment or at the time of a Fund Clawback, which contributed amount is available for distribution to the Partners.

“**Cause**” means, as to any GIM Limited Partner (or a GIM Limited Partner’s Designated Individual), that such Person:

(a) has been convicted or pleaded guilty or no contest to an act constituting a felony under the laws of the United States or any state or political subdivision thereof, a crime of moral turpitude or any crime involving the Partnership or its Affiliates;

(b) has violated any laws, rules or regulations applicable to the private equity industry when such violation is materially injurious to the business, reputation, character or standing of the Partnership or any of its Affiliates, after notice and, if capable of cure, a thirty (30) day-opportunity to cure;

(c) commits an act or acts constituting (i) a breach of fiduciary duty, Gross Negligence or willful misconduct or actual fraud or (ii) which constitutes a material breach of any such Person’s material obligations under this Agreement (including, without limitation, breach of the Restrictive Covenants), the governing documents of any Partnership Affiliate to which such Person is a party, or such Person’s Services Agreement, in each case which conduct is detrimental to the business, reputation, character or standing of GIM, after notice and, if capable of cure, a thirty (30) day-opportunity to cure;

(d) engages in insubordination or willful failure to perform his duties under his Services Agreement, after notice and, if capable of cure, a thirty (30) day-opportunity to cure; or

(e) defaults, directly or indirectly, under any Fund Agreement with respect to his direct or indirect obligation to fund his Capital Commitments and other payments to the Fund or defaults under this Agreement with respect to his obligations to make payments thereunder; *provided* that it shall not be a default hereunder, if in certain hardship circumstances, the General Partner has waived the requirements under this clause (e) as determined by the General Partner in its sole discretion and where remaining Limited Partners have agreed to fund any shortfall,

provided, *further* that, with regard to any GIM Limited Partner who is a Designated Portfolio Company Employee, then the foregoing definition will be deemed to include and incorporate a reference to the GIP Portfolio Company that employs them wherever the "Partnership" is referenced.

"**Clawback Contribution**" has the meaning set forth in Section 6.04(a).

"**Clawback Pool**" has the meaning set forth in Section 6.04(d).

"**Competitive Business**" has the meaning set forth in Section 3.15.

"**Continuing GIM Employee**" means, at any time, any Person who at such time is a director, officer or employee of GIM or that is a Designated Portfolio Company Employee or Designated Professional.

"**Designated Individual**" means, with respect to any Related Vehicle, the Continuing GIM Employee designated as such by the General Partner at the time of admission of the Related Vehicle as a Limited Partner, which designation shall be made by and shall reflect the individual who formed the trust, partnership, limited partnership, limited liability company or other similar entity.

"**Designated Portfolio Company Employee**" means any individual who is a director, officer or employee of a GIP Portfolio Company and who is not a Partner-Level Service Provider nor an officer or employee (but who may previously have been an officer or employee) of GIM, in each case as such individual is so designated by the General Partner to be a "Designated Portfolio Company Employee" entitled to participate in this Partnership as a Limited Partner.

"**Designated Professional"** means (*a*) any individual who is seconded by GIM, or (*b*) any individual who has previously been an officer or employee of GIM (but is not presently a Partner-Level Service Provider nor an officer or employee of GIM), in each case as such individual is so designated by the General Partner to be a "Designated Professional" entitled to participation in this Partnership as a Limited Partner.

"**Disability**" means, with respect to any GIM Limited Partner (or a Limited Partner's Designated Individual), a termination of such Limited Partner's (or such Designated Individual's) employment as a consequence of being deemed disabled under his Services Agreement or the long-term employee benefit plans of GIM (or of a GIP Portfolio Company with regard to a Designated Portfolio Company Employee) applicable to such Limited Partner (or such Designated Individual).

"**Distributable Share**" means, as to any Partner with respect to any Fund Investment at any time, the percentage of the total Carry Proceeds distributable to all Partners pursuant to Section 6.02(b)(i) that would be distributable to such Partner pursuant to such Section if Carry Proceeds were received by the Partnership with respect to such Fund Investment.

"**Fair Value**" means the value of any property held by the Partnership.

"**Former GIM Employees**" has the meaning set forth in Section 3.15(c).

"**Founding Limited Partner**" means each of Jonathan D. Bram, Matthew C. Harris, Michael McGhee, Adebayo O. Ogunlesi, Rajaram Rao and William Woodburn, to the extent that they are GIM Limited Partners, including any Related Vehicles of the foregoing.

"**Fund**" means (*a*) the Primary Fund; (*b*) Global Infrastructure Partners V-B Feeder Fund, L.P., a Cayman Islands exempted limited partnership; (*c*) Global Infrastructure Partners V-C, L.P., a Cayman Islands exempted limited partnership; (*d*) Global Infrastructure Partners V-C Intermediate, L.P., a Cayman Islands exempted limited partnership; (*e*) Global Infrastructure Partners V-C2 Intermediate, L.P., a Luxembourg special limited partnership; (*f*) Global Infrastructure Partners V Friends & Family Fund, L.P., a Delaware limited partnership; and (*g*) any other entity for which the Partnership may serve as a general partner or (as applicable) managing member or from which the Partnership may be entitled to receive direct or indirect distributions of carried interest from time to time.

"**Fund Agreement**" means any agreement of limited partnership (or similar constituent document) of any Fund, as the same may be amended and/or restated from time to time.

"**Fund Clawback**" has the meaning set forth in Section 6.04(a).

"**Fund Expenses**" means the Partnership's share of "Partnership Expenses" (as such term is defined in the relevant Fund Agreement) of a Fund. For the avoidance of doubt, Fund Expenses shall not include any Administrative Expenses.

"**Fund Investment**" means a "Portfolio Investment" (as such term is defined in the relevant Fund Agreement) of a Fund.

"**General Partner**" means Global Infrastructure Investors V, LLC, a Delaware limited liability company and any successor general partner of the Partnership appointed in accordance with its terms.

"**GIM**" means Global Infrastructure Management, LLC, a Delaware limited liability company, its successors, assigns and/or Affiliates, in each case, as the context so requires.

"**GIM Employees**" has the meaning set forth in Section 3.15(c).

"**GIM Limited Partner**" means each Limited Partner who is, or whose Designated Individual is, an employee or partner of GIM or who is a Designated Portfolio Company Employee or a Designated Professional.

"**GIM Related Person**" means GIM and all other Persons that directly or indirectly control, are controlled by or are under common control with GIM.

"**GIP Funds**" means each of the Funds and any other investment vehicle managed or advised by GIM.

"**GIP Portfolio Company**" means a "Portfolio Company" of a GIP Fund (as such term is defined in the applicable Fund Agreement).

"**Gross Negligence**" has the meaning given under, and shall be interpreted in accordance with, the laws of the State of Delaware, and "**Grossly Negligent**" shall be construed accordingly.

"**Incentive Capital Contribution**" has the meaning set forth in the Fund Agreement for the Primary Fund (or any other applicable Fund Agreement).

"**Interest**" means the partnership interest of a Partner in the Partnership at any particular time, including the right of such Partner to any and all benefits to which such Partner may be entitled to under this Agreement, together with the obligations of such Partner to comply with all the terms and provisions of this Agreement with respect to which such Partner is required to comply.

"**Investment Percentage**" of any Partner means, with respect to any Fund Investment, the percentage derived by (*a*) dividing the sum of such Partner's Capital Contributions in respect of such Fund Investment by the aggregate of such sums for all Partners (except as otherwise provided herein) in respect of such Fund Investment and (*b*) multiplying such quotient by 100.

"**Limited Partner**" means, at any time, any Person who is at such time a limited partner of the Partnership and shown as such on the books and records of the Partnership, in such Person's capacity as a limited partner of the Partnership.

"**Memorandum Account**" means a memorandum account established for each Partner on the books and records of the Partnership.

"**Non-Competition Period**" means, with respect to a GIM Limited Partner: (*a*) the period during which such GIM Limited Partner is a Continuing GIM Employee *plus* the following 12 months; or (*b*) such other period agreed to by the General Partner and such GIM Limited Partner.

"**Participating Partner**" means, with respect to any Fund Investment, any Partner who has made a Capital Contribution in respect of such Fund Investment.

"**Partner**" means the General Partner or any Limited Partner and "**Partners**" means, collectively, the General Partner and the Limited Partners.

"**Partner-Level Service Provider**" means a person who has been granted the title of "Partner" by GIM.

"**Partnership**" means Global Infrastructure GP V, L.P., a Cayman Islands exempted limited partnership.

"**Person**" means any individual, partnership, corporation, limited liability company, trust or other entity.

"**Points**" means the points allocated to Partners pursuant to Section 4.03. For the avoidance of doubt, all Tranche Points are Points.

"**Point Share**" means, as to any Partner with respect to any Fund Investment at any time, the amount (expressed as a percentage) of such Partner's Points at such time with respect to such

Fund Investment (as adjusted as provided in Section 4.03, if applicable) divided by 100. For the avoidance of doubt, the sum of the Point Shares of all Partners shall at all times equal 100%.

"**Primary Fund**" means Global Infrastructure Partners V-A/B, L.P., a Delaware limited partnership.

"**Prime Rate**" means, the prime rate announced, from time to time, by Citibank N.A. or if not so announced, the rate of interest publicly announced from time to time by any money center bank as its prime rate in effect at its principal office, as identified in writing by the General Partner to the Limited Partners.

"**Proceeds**" means, with respect to any Fund Investment, (*a*) the sum of the cash and noncash proceeds received by the Partnership from any sale or distribution of a Fund Investment, exchange of a Fund Investment, receipt of any dividends, interest or other distributions in connection with a Fund Investment, less (*b*) any expenses incurred by the Partnership in connection with such receipt. The value of any noncash Proceeds shall be the Fair Value thereof, as determined in good faith by the General Partner in its discretion.

"**Related Partner**" means (*a*) with respect to a Limited Partner who is an individual, any Related Vehicle with respect to which such Limited Partner has been designated a Designated Individual and (*b*) with respect to a Limited Partner that is a Related Vehicle, such Limited Partner's Designated Individual and any other Related Vehicle of such Limited Partner's Designated Individual.

"**Related Vehicle**" means any trust, partnership, limited partnership, limited liability company or other similar entity that is (*a*) formed by an individual who is or was a Continuing GIM Employee at the time of such entity's admission as a Limited Partner and is, in the determination of the General Partner, for the benefit of such individual and/or his family members and (*b*) designated by the General Partner as a Related Vehicle.

"**Release Condition**" means the condition that is satisfied at any date and as to any amount of Carry Proceeds that have been retained by the Partnership pursuant to Section 6.02(b)(iii), if: (*a*) such release would not breach the Fund Agreements or any Side Letters with Fund investors; and (*b*) the General Partner determines in its sole discretion that such amounts may be released.

"**Repurchase Period**" for any Limited Partner means the period from the date of the Limited Partner's ceasing to be a Continuing GIM Employee until the later of (*a*) December 31 of the year following the year in which the Limited Partner's employment is terminated and (*b*) the last day of the eighteenth (18th) calendar month following the month in which the Limited Partner's employment is terminated.

"**Repurchase Value**" means, with respect to the Capital Interest of any Limited Partner at any time, an amount determined by the General Partner equal to the lesser of (*a*) the implied cost of such Interest based on the cost of the Fund Investments attributable to such Interest as originally recorded on the books of the relevant Fund plus interest equal to the Prime Rate compounded annually and (*b*) the Fair Value of such Interest at such time, as determined by the General Partner in its reasonable discretion, which amount will be based on the Fair Value of the Fund Investments attributable to such Interest as carried on the books of the relevant Fund at such time.

"**Restrictive Covenants**" has the meaning set forth in Section 3.15(f).

"**Retirement**" means, with respect to a Founding Limited Partner, the retirement of such Founding Limited Partner at such time that the sum of (*a*) such Person's years of employment with GIM or its Affiliates (including as a member of GIM UK) and (*b*) such Person's age equals at least sixty (60) years.

"**Return Proceeds**" means, with respect to Proceeds received by the Partnership from a Fund with respect to any Fund Investment, all such Proceeds other than Carry Proceeds. For the avoidance of doubt, Return Proceeds include any Special Profits Distributions.

"**Services Agreement**" means:

> with respect to any GIM Limited Partner (or GIM Limited Partner's Designated Individual), (*i*) the employment agreement or equivalent between GIM (or its Affiliate) and such GIM Limited Partner (or such GIM Limited Partner's Designated Individual) and (*ii*) any Side Letter between GIM and such GIM Limited Partner (or such GIM Limited Partner's Designated Individual);
>
> with respect to a GIM Limited Partner (or GIM Limited Partner's Designated Individual) who is also a Designated Portfolio Company Employee, the employment agreement (or any other agreement relating to the performance of services) between such Designated Portfolio Company Employee and the applicable GIP Portfolio Company; and
>
> with respect to a GIM Limited Partner (or GIM Limited Partner's Designated Individual) who is also a Designated Professional, the agreement with respect to such Designated Professional between (i) GIM and such Designated Professional or the Person that employs or is associated with such Designated Professional or (*ii*) the Designated Professional and the Person that employs such Designated Professional.

"**Services Nonrenewal Notice**" means the notice from a GIM Limited Partner to GIM indicating his or her decision to not renew such GIM Limited Partner's Services Agreement.

"**Side Letter**" means a side letter or similar agreement entered into by and between the General Partner (on its own behalf or on behalf of the Partnership, and without the approval of any Limited Partner or other Person) and one or more Limited Partners, which has the effect of establishing rights under, or altering or supplementing the terms hereof or of any subscription agreement with respect to such individual Limited Partner.

"**Special Profits Distributions**" means distributions in respect of any profits interest in any Fund (and not, for the avoidance of doubt, distributions attributable to the Partnership's capital contributions to such Fund) that are received by the Partnership from the Fund pursuant to the Fund Agreement for the Primary Fund (or the equivalent section of any other Fund Agreement) and that were apportioned to the Partnership based on its Partner Interest for a Fund Investment or other investment (including distributions received from the Fund pursuant to the Fund Agreement for the Primary Fund (or any equivalent section of any other Fund Agreement)). For purposes of this definition, "Partner Interest" has the meaning set forth in the Fund Agreement for the Primary Fund (or any other applicable Fund Agreement).

“**Special Profits Percentage**” has the meaning set forth in Section 4.05.

“**Successor Fund**” has the meaning set forth in the Fund Agreement of the Primary Fund.

“**Tax Amount**” means, with respect to the income associated with any distribution of Proceeds hereunder to a Partner, the portion thereof which the General Partner determines in its reasonable discretion to be necessary to enable the Partners to discharge their U.S. federal, state and local (and, as the General Partner shall determine, non-U.S.) income tax liabilities attributable to such distribution. The amounts distributable shall be determined by the General Partner based on such assumptions as the General Partner determines to be appropriate.

“**Terminated Partner**” means any GIM Limited Partner (and, if applicable, such GIM Limited Partner’s Related Vehicle) who is who is not (*a*) providing services to the Partnership or a GIP Portfolio Company, (*b*) a GIM Related Person or (*c*) a Continuing GIM Employee.

“**Termination Event**” means, with respect to (*a*) any GIM Limited Partner, such Limited Partner’s ceasing to be a Continuing GIM Employee, and (*b*) any Limited Partner that is a Related Vehicle, such Related Vehicle’s Designated Individual’s ceasing to be a Continuing GIM Employee.

“**Tranche Allocation Date**” means as to any Tranche Points, the date of the first closing of the Fund and each subsequent date specified by the General Partner as the allocation date for such Tranche Points.

“**Tranche Period**” means each of the successive periods beginning on the date of the first closing of the Fund and ending the day immediately preceding the next Tranche Allocation Date.

“**Tranche Points**” means, as to any Limited Partner at any time and with respect to any Tranche Period, the number of Points allocated by the General Partner to such Limited Partner with respect to such Tranche Period under Section 4.03, which number shall be set forth from time to time on the books and records of the Partnership.

Section 3.15 *Restrictive Covenants*.

(a) Non-Competition. Each GIM Limited Partner agrees that during the Non-Competition Period (as defined below), (*i*) such Limited Partner shall not engage in any other business (whether as an employee, consultant, director, partner, member, shareholder or otherwise) that invests or operates primarily in the infrastructure area (each a “**Competitive Business**”) and (*ii*) such Limited Partner shall not knowingly adversely affect or interfere with the ability of GIM to manage a Fund (or any other GIP Fund). Notwithstanding anything in this Section 3.15 to the contrary, (*A*) direct ownership of less than five percent of the outstanding common stock of a publicly traded corporation; (*B*) participation as a passive investor in investment partnerships; (*C*) other personal investments specifically approved in writing by the General Partner; and (*D*) participation in a Successor Fund shall not constitute engaging in a Competitive Business.

(b) Non-Solicitation of Investors. During the Non-Competition Period (including any period after notice of termination has been given and prior to the date of termination), each GIM Limited Partner shall not, on behalf of any entity that competes with a Fund, solicit or otherwise receive funding from any prospective investor or client with whom GIM previously had material contact, or any investor or limited partner of GIM or a Fund (including any former investor of a Fund and any person that becomes an investor or limited partner of a Fund) or any other person who has a material business relationship with GIM or a Fund.

(c) Non-Solicitation of Employees. During the Non-Competition Period, each GIM Limited Partner shall not, without the Partnership's prior written consent, directly or indirectly, (*i*) solicit or induce, or cause others to solicit or induce, any employees or members of GIM or GIP Portfolio Companies ("**GIM Employees**") to leave or in any way modify their relationship with GIM or GIP Portfolio Companies, (*ii*) hire, or cause others to hire, any GIM Employees or any employee, member or independent contractor who has left the employment or other service of GIM or GIP Portfolio Companies within the one-year period which follows the termination of such employee's or member's or independent contractor's employment or other service with GIM or GIP Portfolio Companies ("**Former GIM Employees**", who shall not include any persons whose employment or other service with GIM was terminated for unrelated reasons and who were only approached after such termination), (*iii*) encourage or assist in the (*A*) hiring process of any GIM Employees or Former GIM Employees on behalf of any third party or (*B*) modification of any such employee's or member's relationship with GIM or GIP Portfolio Companies or (*iv*) cause others to participate, encourage or assist in the hiring process of any GIM Employee or Former GIM Employee.

(d) Non-Disparagement; Non-Interference. Each GIM Limited Partner shall not, and shall not cause or induce others to: (*i*) make any false, defamatory or disparaging statements about GIM its directors, employees and officers, a GIP Fund or a GIP Portfolio Company; or (*ii*) cause, induce or encourage any actual or prospective client, investor or limited partner of GIM or a GIP Fund or GIP Portfolio Company (including any former investor of a GIP Fund and any person that becomes an investor or limited partner of a GIP Fund) or any other person who has a material business relationship with GIM or a GIP Fund or GIP Portfolio Company, to terminate or modify any such actual or prospective relationship. This Section 3.15(d) shall apply to each Limited Partner while they are a Limited Partner and after they have ceased to be a Limited Partner, and shall survive the termination of this Agreement.

Section 4.03 *Allocation of Points*.

(a) For each Fund Investment there shall be established a pool of 100 Points which shall be allocated by the General Partner to Limited Partners as provided in this Section 4.03. Points not allocated under this Section 4.03 shall be allocated in the sole discretion of the General Partner.

(i) The General Partner shall allocate Tranche Points for each Tranche Period to each Limited Partner (OMITTED) as of each Tranche Allocation Date. Tranche Points may be allocated by way of an Award Letter. Except as provided elsewhere in this Agreement, a Limited Partner will be allocated Points in respect of each Fund Investment made during a Tranche Period equal to such Limited Partner's Tranche Points for such Tranche Period.

(ii) OMITTED.

(iii) The General Partner may allocate Points to Additional Partners as provided for in Section 5.12.

If a Fund Investment is committed to be made during one Tranche Period but the Fund Investment closes in another Tranche Period, the General Partner shall deem such Fund Investment to have been made in the Tranche Period in effect on the earlier to occur of (*A*) the date on which a binding agreement has been entered into with respect to such Fund Investment and (*B*) the date on which information about the Fund Investment has been disseminated to the Limited Partners for purposes of allocating Points to such Fund Investment pursuant to this Section 4.03. The Points allocated to any Limited Partner may be reduced, including pursuant to Section 4.04, and such Points shall revert to the General Partner, which shall reallocate such Points in its sole discretion.

Section 4.04 *Termination of Services*.

(a) The Points allocated to a GIM Limited Partner will be subject to reduction upon a Termination Event with respect to such Limited Partner as follows:

Date of Termination Event	Reduction
Prior to July 1 of the first calendar year next succeeding the applicable Tranche Allocation Date	100%
On or after July 1 of the first calendar year next succeeding the applicable Tranche Allocation Date, through and including June 30 of the second calendar year following the applicable Tranche Allocation Date	80%
On or after July 1 of the second calendar year following the applicable Tranche Allocation Date, through and including June 30 of the third calendar year following the applicable Tranche Allocation Date	60%
On or after July 1 of the third calendar year following the applicable Tranche Allocation Date, through and including June 30 of the fourth calendar year following the applicable Tranche Allocation Date	40%
On or after July 1 of the fourth calendar year following the applicable Tranche Allocation Date, through and including June 30 of the fifth calendar year following the applicable Tranche Allocation Date	20%

For the avoidance of doubt, such reductions shall not affect distributions made to a GIM Limited Partner before a Termination Event occurs with respect to such GIM Limited Partner.

(b) Notwithstanding the foregoing provisions of this Section 4.04:

(i) Cause. Upon a Termination Event with respect to a GIM Limited Partner for Cause (*A*) all of such GIM Limited Partner's vested and unvested Points shall be reduced to zero and (for the avoidance of doubt) such GIM Limited Partner shall not have the right to participate in any Carry Proceeds realized from any Fund Investments made after the date of such Termination Event and (*B*) the General Partner shall have the right exercisable by it or by one or more other Limited Partners designated by the General Partner in its discretion, at any time during the Repurchase Period, to repurchase the Capital Interest of such GIM Limited Partner at the Repurchase Value at the time of repurchase. The General Partner shall reallocate all Points forfeited pursuant to this 4.04(b)(i) in its sole discretion.

(ii) Death or Disability. Upon a Termination Event with respect to a GIM Limited Partner by reason of the death or Disability of such GIM Limited Partner, (*A*) all of such GIM Limited Partner's unvested Points will become fully vested, (*B*) the General Partner shall have no repurchase rights in respect of any portion (Points or Capital Interest) of the GIM Limited Partner's Interest and (*C*) such Limited Partner shall not have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Termination Event; *provided* that such GIM Limited Partner shall have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Termination Event (*1*) that is the subject of a binding agreement entered into by the relevant Fund prior to the date of such Termination Event or (*2*) about which the relevant Fund has disseminated information to its limited partners prior to the date of such Termination Event.

(iii) Voluntary Resignation. Upon a voluntary Termination Event with respect to a GIM Limited Partner for any reason, other than, with respect to a Founding Limited Partner, such Founding Limited Partner's Retirement, including but not limited to such GIM Limited Partner's decision not to renew his Services Agreement, (*A*) such GIM Limited Partner's unvested Points will be reduced to zero, (*B*) such GIM Limited Partner shall not have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Termination Event and (C) the General Partner shall have no repurchase rights in respect of any portion (Points or Capital Interest) of the GIM Limited Partner's Interests; *provided* that such GIM Limited Partner shall have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Termination Event (*1*) that is the subject of a binding agreement entered into by the relevant Fund prior to the date of such Termination Event or (*3*) about which the relevant Fund has disseminated information to its limited partners prior to the date of such Services Nonrenewal Notice or notice of a voluntary Termination Event. The General Partner shall reallocate all Points forfeited pursuant to this Section 4.04(b)(iii) in its sole discretion.

(iv) Retirement. Upon the Retirement of a Founding Limited Partner, then upon the effectiveness of such Retirement (*A*) 50% of the unvested Points of such Founding Limited Partner (or such greater percentage as the General Partner determines in its discretion) will become fully vested, (*B*) the remainder of the unvested Points of such

Founding Limited Partner will continue to vest as determined by the General Partner in its discretion, (*C*) the General Partner shall have no repurchase rights in respect of any portion (Points or Capital Interest) of such Founding Limited Partner's Interest and (*D*) such Founding Limited Partner shall not have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Retirement; *provided* that such Founding Limited Partner shall have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such Retirement (*1*) that is the subject of a binding agreement entered into by the relevant Fund prior to the date of such Retirement or (*2*) about which the relevant Fund has disseminated information to its limited partners prior to the date of such Retirement.

(v) Termination without Cause. Upon an involuntary Termination Event with respect to a GIM Limited Partner other than pursuant to Section 4.04(b)(i) or 4.04(b)(ii), including the decision of GIM not to renew such GIM Limited Partner's Services Agreement, then upon the effectiveness of such involuntary Termination Event (*A*) 50% of the unvested Points of such GIM Limited Partner (or such greater percentage as the General Partner determines in its discretion) will become fully vested, (*B*) the remainder of the unvested Points of such GIM Limited Partner will continue to vest as determined by the General Partner in its discretion, (*C*) the General Partner shall have no repurchase rights in respect of any portion (Points or Capital Interest) of such GIM Limited Partner's Interest and (*D*) such GIM Limited Partner shall not have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such involuntary Termination Event; *provided* that such GIM Limited Partner shall have the right to participate in any Carry Proceeds realized from any Fund Investment made after the date of such involuntary Termination Event (*1*) that is the subject of a binding agreement entered into by the relevant Fund prior to the date of such involuntary Termination Event or (*2*) about which the relevant Fund has disseminated information to its limited partners prior to the date of such involuntary Termination Event.

(vi) Competition Event. If a GIM Limited Partner breaches Sections 3.15(a), (b), (c) or (d) within 12 months of, or the confidentiality provisions of this Agreement at any time after, in each case, the Termination Event relating to such GIM Limited Partner, then all of such GIM Limited Partner's vested and unvested Points shall be reduced to zero. The General Partner shall reallocate all Points forfeited pursuant to this Section 4.04(b)(vi) in its sole discretion.

(c) Notwithstanding the other provisions of this Section 4.04, the General Partner may, in its sole discretion, reduce the Point reduction described in Section 4.04 or otherwise upon the occurrence of a Termination Event.

Section 4.05 *Special Profits Percentage*. For each Tranche Period and for each Limited Partner there shall be established a "Special Profits Percentage", which shall be determined by the General Partner, and which shall apply to each Fund Investment that closes in such Tranche Period. The sum of the Special Profits Percentages for each Tranche Period shall be 100%. A Partner's Special Profits Percentage may be decreased to in connection with the default by any Limited Partner or the admission of an Additional Partner. The books and records of the Partnership shall be revised to reflect the foregoing. Notwithstanding the foregoing, the General Partner may its sole discretion:

(a) require any Partner to make loans or capital contributions (which shall not reduce such Partner's Available Capital Commitment) to the Partnership or an Affiliate thereof in proportion to its share of the Incentive Capital Contributions (determined based on the Partners' Special Profits Percentages for each Fund Investment) and make any appropriate adjustments in connection therewith; or

(b) reduce the amount distributable to each Partner that is a Terminated Partner in proportion to its share of the Incentive Capital Contributions (determined based on the Partners' Special Profits Percentages for each Fund Investment), in which case the Partnership's use of any such undistributed amounts shall be determined by the General Partner.

Section 6.01 *Distributions Generally*. Distributions shall be made in accordance with this Article 6. Except as expressly set forth below, all calculations with respect to distributions shall be made on a Fund Investment by Fund Investment and Participating Partner by Participating Partner basis.

Section 6.02 *Dispositions of Fund Investments*.

(a) Return Proceeds.

(i) The Return Proceeds (other than Special Profits Distributions) realized on any date from any Fund Investment shall, subject to the provisions of Section 6.05, be distributed to the Participating Partners *pro rata* in accordance with each Participating Partner's Investment Percentage, if any, with respect to the Fund Investment giving rise to such Return Proceeds.

(ii) Special Profits Distributions realized on any date from any Fund Investment shall, subject to the provisions of Section 6.05, be distributed to the Participating Partners *pro rata* in accordance with each Participating Partner's Special Profits Percentage, if any, with respect to the Fund Investment giving rise to such Special Profits Distributions.

(b) Carry Proceeds.

(i) The amount distributed to each Participating Partner in respect of receipts by the Partnership representing Carry Proceeds from any Fund Investment shall reflect the General Partner's good-faith determination of an equitable allocation of Fund Expenses and Administrative Expenses across all Fund Investments and Tranche Periods. Any Carry Proceeds shall be distributed to the Partners *pro rata* in accordance with the positive balances of their Memorandum Accounts immediately prior to such distribution; *provided* that in no event shall any Partner receive a distribution of Carry Proceeds pursuant to this Section 6.02(b)(i) that results in a negative balance in such Partner's Memorandum Account.

(ii) For the avoidance of doubt, the amount of Carry Proceeds to be distributed to any Limited Partner pursuant to this Section 6.02(b) shall not be affected by any reduction of Points after the realization by the Partnership of such Carry Proceeds. Each Participating Partner's Point Share of any Carry Proceeds realized on any date by the Partnership shall be distributed by the Partnership to such Participating Partner in the manner hereinafter set forth, subject to Sections 6.04 and 6.05.

(iii) Amounts representing Carry Proceeds to be distributed to any Limited Partner pursuant to this Section 6.02(b) at any time shall be distributed (*A*) in the case of any Founding Limited Partner who is no longer a Continuing GIM Employee because of Retirement at such time, (*1*) with respect to Carry Proceeds consisting of cash, 80% in cash and 20% shall be retained by the Partnership and distributed upon satisfaction of the Release Condition and (*2*) with respect to Carry Proceeds consisting of securities or other property, 80% in the form of such securities or other property and 20% shall be retained by the Partnership and the Partnership shall in turn distribute to such Partner an interest in such retained securities or other property upon satisfaction of the Release Condition, and (*B*) in the case of (*y*) any Limited Partners or their Designated Individuals (other than any Founding Limited Partners) who are no longer Continuing GIM Employees because of any Termination Event or (*x*) any Founding Limited Partner who is no longer a Continuing GIM Employee because of any Termination Event other than Retirement, and except to the extent the General Partner determines in its sole discretion to distribute a greater percentage of cash or securities, (*1*) with respect to Carry Proceeds consisting of cash, 50% in cash and 50% shall be retained by the Partnership and distributed upon satisfaction of the Release Condition and (*2*) with respect to Carry Proceeds consisting of securities or other property, 50% in the form of such securities or other property and 50% shall be retained by the Partnership and the Partnership shall in turn distribute to such Partner an interest in such retained securities or other property upon satisfaction of the Release Condition.

(iv) With respect to any securities or other property retained by the Partnership in respect of any Limited Partner in connection with any in-kind distribution, such Limited Partner may at any time request the Partnership to sell all or any portion of such securities or other property. In such event, the Partnership shall use its reasonable best efforts to sell such securities or other property for cash and the amount retained by the Partnership for subsequent distribution pursuant to Section 6.02(b)(iii) shall be increased by an aggregate amount equal to the amount of the net cash proceeds from such sale, *provided*, in each case, that to the extent permitted by law, any taxable gain or loss recognized by the Partnership upon the disposition of such securities shall be allocated equitably pursuant to the tax allocation provisions of this Agreement among those Limited Partners with respect to which such cash was retained as a result of such sale or exchange among those Limited Partners who requested the sale.

(v) Any amounts retained by the Partnership pursuant to Section 6.02(b)(iii) may be, in the sole discretion of the General Partner, (A) invested in short-term investments pending application to the repayment of amounts retained by the Partnership pursuant to Section 6.02(b)(iii), (B) held in a segregated account with a perfected security interest in favor of the Fund or released to the Limited Partner pursuant to Section 6.05(c), or (C) subject to such other conditions or requirements as the General Partner may determine.

Section 6.04 *Clawback.*

(a) The Partners shall be required to make a contribution to the Partnership in the manner hereinafter set forth (a "**Clawback Contribution**") at such time as (*i*) the Partnership is required to make a contribution to a Fund pursuant to any clawback or similar provision in any Fund Agreement, (a "**Fund Clawback**") or (*ii*), if determined necessary or advisable by the General Partner.

(b) Contributions by the Partners on account of any Clawback Contribution will be made from the Clawback Pool at the direction of the General Partner *pro rata* in accordance with the negative balances of the Partners' Memorandum Accounts immediately prior to such contribution.

(c) If, at any time, the Partnership makes a contribution to a Fund pursuant to a Fund Clawback and, in the reasonable discretion of the General Partner such contribution is attributable to a particular Fund Investment, then each Partner's Memorandum Account shall be debited by such Partner's *pro rata* share of the contribution, based on such Partner's original Distributable Share (as adjusted for a subsequent reallocation of Points among Partners but without giving effect to reductions pursuant to Section 4.04) with respect to such Fund Investment. If, in the reasonable discretion of the General Partner, such contribution is not attributable to a particular Fund Investment, the General Partner shall determine in good faith the amount, if any, by which each Partner's Memorandum Account shall be debited.

(d) Contributions by a Limited Partner on account of a Clawback Contribution initially shall be made from any or all of the following sources, at the General Partner's discretion, (collectively, the "**Clawback Pool**"): (*i*) by reduction of any amount retained by the Partnership pursuant to Section 6.02(b)(iii); (*ii*) by reduction of such Limited Partner's interest in any securities or other property retained by the Partnership in respect of such Limited Partner in connection with any in kind distribution (it being understood that the Partnership shall use its reasonable best efforts to sell such securities or other property for cash and shall reduce such Limited Partner's Clawback Contribution by an amount equal to the amount of the net cash proceeds from such sale); and (*iii*) by deduction from any future distributions on account of Carry Proceeds and Return Proceeds (but excluding distributions that are a return of a Capital Contribution) from the Partnership to such Limited Partner.

It is understood that Clawback Contributions shall be made from time to time from the above sources as and to the extent such sources become available to satisfy the obligation to make such Clawback Contributions.

(e) Notwithstanding anything in this Section 6.04 to the contrary, to the extent the Clawback Pool is insufficient to satisfy Clawback Contributions, each Partner shall return distributions to the Partnership in satisfaction of the remainder of such Clawback Contributions *pro rata* in accordance with the negative balances of the Partners' Memorandum Accounts immediately prior to such return of distributions *provided, however*, that a Partner shall not be required to return more to the Partnership pursuant to this Section 6.04(f) than the excess of (*i*) the aggregate distributions to such Partner, as the case may be, pursuant to Section 6.02(b) over (*ii*) the aggregate distributions that were made, or that could have been made, to such Partner pursuant to Section 6.03(a). The Partners shall execute a separate guarantee of their obligations under this Section 6.04(f) as contemplated by the Fund Agreement before receiving any Carry Proceeds under this Agreement. Any payments made by a Partner to a Fund pursuant to such guarantee in respect of a Fund Clawback shall be deemed to be returns of distributions to the Partnership pursuant to this Section 6.04(f).

(f) The General Partner shall maintain records of (*i*) each Limited Partner's required Clawback Contributions, (*ii*) the outstanding amounts retained pursuant to Section 6.02(b)(iii) and owing to such Limited Partner, (*iii*) such Limited Partner's interest in any securities or other property retained by the Partnership in connection with any in-kind distribution and (*iv*) any amounts that may be deducted from future distributions by the Partnership to such Limited Partner on account of any Clawback Contribution, which records shall be made available to such Limited Partner upon the reasonable request of such Limited Partner.

(g) Clawback Contributions by a Limited Partner shall not be deemed Capital Contributions and shall not affect the obligations of a Partner to make Capital Contributions hereunder, and the obligation on the part of each Partner to make such Clawback Contributions shall be in addition to any liability such Partner may otherwise have under this Agreement.

Section 6.05 *Other General Principles of Distributions*.

(a) Distributions of Cash. Subject to Sections 6.04 and distributions upon dissolutions of the Partnership and the remaining provisions of this Section 6.05, distributions shall be made promptly after the receipt of cash or noncash proceeds by the Partnership.

(b) Distributions in Kind. Any securities or other property constituting all or any portion of a Fund Investment may be distributed in kind to the Partnership at such time and in such amounts as the General Partner shall in its discretion determine, and any such distribution shall be made to the Participating Partners in respect of such Fund Investment in accordance with the amounts that would have been distributed in respect thereof had such property been disposed of by the Partnership immediately prior to such distribution. In any distribution of property in kind, the General Partner shall not, subject to the provisions of Sections 6.04, 6.05(c) and 6.05(e), discriminate among the Limited Partners but shall in any such distribution, (*i*) distribute to the applicable Limited Partners property of the same type and (*ii*) if cash and property in kind are to be distributed simultaneously in respect of any Fund Investment, distribute cash and property in kind in the same proportion to each such Partner. For purposes of allocations to Capital Accounts, property to be distributed in kind shall be valued at the Fair Value thereof by the General Partner in its discretion on a date as near as reasonably practicable to the date of such distribution.

(c) Withholding of Certain Amounts. Notwithstanding anything else contained in this Agreement, the General Partner may, in its discretion, withhold from any distribution to any Limited Partner pursuant to this Agreement, any amounts due from such Partner to the Partnership or the General Partner pursuant to this Agreement to the extent not otherwise paid. In addition, if the General Partner shall have determined in good faith, that there will likely be a requirement for a Clawback Contribution, then the General Partner may withhold all or any portion of distributions of Carry Proceeds to any Limited Partner under this Agreement as determined by the General Partner; *provided* that the General Partner shall in any such distribution distribute an amount in cash to each Limited Partner at least equal to the Tax Amount with respect to such distributions and *provided*, *further*, that the General Partner, in its sole discretion, may permit any Limited Partner to substitute such amount withheld with a letter of credit issued by a financial institution that has a long-term credit rating (and maintains a long-term credit rating) of BBB+ by S&P, Baa1 by Moody's or higher. If any amount withheld in accordance with the immediately preceding sentence is cash, such amount shall be added from time to time to the amounts retained and owing to such Limited Partner pursuant to Section 6.02(b)(iii), and, if any amount withheld in accordance with the immediately preceding sentence is securities or other property, such amount shall increase such Limited Partner's interest in such securities or other property retained by the Partnership.

(d) Amounts Held in Reserve. In addition to the rights set forth in Section 6.05(b) and Section 6.05(c), the General Partner shall have the right, in its reasonable discretion, to withhold amounts otherwise distributable by the Partnership to the Partners in order to maintain the Partnership in a sound financial and cash position and to make such provision as the General Partner in its reasonable discretion deems necessary or advisable for any and all liabilities and obligations, contingent or otherwise, of the Partnership (including, but not limited to, any obligation to repay any loan owed by the Partnership to any Fund pursuant to section 8.3(d) of the Fund Agreement of the Primary Fund or the equivalent section of any other Fund Agreement, in which case the General Partner shall make appropriate adjustments to distributions pursuant to this Agreement to reflect such repayment) or if, following such distribution, the aggregate of the balances on any Partner's Capital Account would be less than zero.

(e) Equal Treatment. Subject to the Related Partners provisions of this Agreement, nothing in this Agreement shall obligate the General Partner to treat all Limited Partners alike, and the exercise of any power or discretion by the General Partner in the case of any one such Limited Partner shall not create any obligation on the part of the General Partner to take any similar action in the case of any other such Limited Partner, it being understood that any power or discretion conferred upon the General Partner shall be treated as having been so conferred upon the General Partner as to each such Limited Partner separately.

(f) Fund Agreement. Subject to Section 6.02(a) and Section 6.04(d), Return Proceeds realized from any Fund Investment shall be distributed to the Participating Partners to the extent a corresponding distribution was made to limited partners of the Primary Fund pursuant to the Fund Agreement for the Primary Fund (or to partners of any other Fund pursuant to similar provisions of such other Fund Agreement).

Exhibit 19.1

BlackRock

Global Insider Trading Policy

Objective and Scope

This policy governs trading in the securities of BlackRock, Inc. by directors and officers of BlackRock, Inc. (the "directors and officers") and by employees[1] (collectively with the directors and officers, "Covered Persons") of BlackRock, Inc. and its wholly-owned subsidiaries (collectively, "BlackRock") and the handling of material, nonpublic information ("MNPI", as further defined below) under applicable securities laws in the U.S. or the equivalent in the other jurisdictions in which BlackRock operates. Covered Persons play a critical role in maintaining the integrity of BlackRock's reputation and must handle MNPI and proprietary or confidential information properly. BlackRock has adopted a number of policies that deal with the handling of MNPI, including but not limited to a Code of Business Conduct and Ethics that obligates Covered Persons to maintain the confidentiality of information entrusted to them, a policy that establishes controls on the use and sharing of MNPI, and confidentiality and employment policies that obligate Covered Persons to hold information relating to the business of BlackRock in strict confidence.

Applicable laws and regulations prohibit any behaviors that lead to market abuse. Covered Persons are prohibited by law from buying or selling BlackRock securities or any other company's securities (including, but not limited to, common stock, options to purchase common stock, preferred stock, debt, convertible debentures, and warrants, as well as derivative securities, such as exchange-traded put or call options or swaps) while in possession of MNPI with respect to those securities or companies, whether for their own account, a family[2] member's account, organization or firm account, or for a client's account. In addition, if a Covered Person has MNPI, they are prohibited from "tipping" or disclosing such information to others or donating shares with the expectation of receiving a tax benefit.

BlackRock employees may acquire MNPI through BlackRock's customers, suppliers, affiliates, and companies in which BlackRock, its products, funds, or accounts, may invest. In certain circumstances, it may be necessary to establish an information barrier in order to wall off the employee in possession of MNPI.

Policy / Document Requirements and Statements

1. Material, Nonpublic Information

- **Material Information:** Information is "material" if there is a substantial likelihood that a reasonable person would consider the information important when making an investment decision or the information, if made public, would likely affect the market price of a company's securities. Information may be material to transactions in the securities of more than one company. For example, in some circumstances, the same information may be material to transactions in securities of the company from which the information originated as well as suppliers, customers, or competitors of that company.
  Material information concerning BlackRock (including information relating to its subsidiaries or affiliates) or other such companies may include the following:
  - Sales and earnings results or estimates (or changes thereto, if previously published);
  - Changes in product offerings;
  - Significant additions or losses of client accounts;
  - Proposed mergers, acquisitions, divestitures, or joint ventures;

1 For purposes of this policy, the term "employee" includes all contingent workers and individual services providers, unless their agreement with BlackRock contains express conditions to the contrary.

2 Family members include Family Relationships as further described in the Global Relationships at Work Policy.

- Stock repurchase plans and stock splits;
- Securities offerings;
- Litigation and investigations;
- Changes in control or extraordinary management developments;
- Extraordinary borrowings or other liquidity problems;
- Cybersecurity risks or incidents; and
- Other similar items.

- **Nonpublic Information:** Information is considered to be "nonpublic" unless it has been disclosed to the public adequately. Examples of adequate disclosure include public filings with securities regulatory authorities, the issuance of press releases, and may also include meetings that are generally open to members of the press and the public. By contrast, information would likely not be considered public if it is available only to BlackRock employees, or if it is available to a select group of analysts, brokers, and/or investors.

2. Restriction on Tipping

Covered Persons are prohibited from disclosing MNPI to another person even if such person does not purchase or sell securities on the basis of such information, or pass on the information to another person (also known as "tipping").

Covered Persons may not disclose MNPI to:

- Any person outside of the firm (not employed by BlackRock), unless any such disclosure is made in accordance with BlackRock's policies regarding the protection, and authorized external disclosure, of information; or
- Any BlackRock employee unless such employee needs to know the information for a valid business reason. MNPI may not be shared with anyone in a different information barrier group without obtaining prior approval from Legal & Compliance.

3. Trading in BlackRock Securities

- **No Trading When in Possession of MNPI:** No Covered Person may purchase or sell BlackRock securities when in possession of MNPI regarding BlackRock, even if the transaction has been pre-approved and the trading window is open.
- **Pre-Clearance Required:** All transactions in BlackRock's securities by a Covered Person must be pre-cleared by Legal & Compliance and the transaction must be within the prescribed trading window. This includes purchases, sales, stock option exercises, estate planning transactions and gifts.
  - Employees, including officers, must submit a pre-clearance request in the Personal Trading Assistant and receive an approval before undertaking any transactions permitted under this policy.
  - Pre-clearance approvals, whether for market orders[3] or limit orders[4], are valid **only** on the day the approval is received. The order must be executed on the same day by the closing time of the market on which the security is traded.
  - Employees can request exemption from the pre-clearance requirement for trades in a spousal account in which the employee has no investment discretion. Spousal accounts require disclosure, regardless of pre-clearance exemption status, and are subject to periodic monitoring. Employees may be required to supply a quarterly statement for such accounts. When such requests are made, employees must provide the statements to the Legal & Compliance within 30 days of the request.
  - **Pre-Clearance Not Required**: Pre-clearance approval is not required to transact in the following:
    - Purchases of common stock under an Employee Stock Purchase Plan, vesting of Restricted Share Units, or acquisitions of common stock in connection with director compensation (however, sales of the same must be pre-cleared);

[3] Buy or sell transactions placed at current market price.

[4] Buy or sell transactions placed at a pre-determined price (detailed within the pre-clearance request).

        - 529 Plans, Direct Stock Purchase Plans, and any securities purchased pursuant to a dividend reinvestment plan;
        - Securities acquired by an exercise of rights to the holders of a class of securities (however, sales of the same must be pre-cleared);
        - Stock dividend, stock split, or similar corporate distribution;
        - Conversion of employee stock options (however, sales of the same must be pre-cleared); and
        - Transfer of securities with no change in beneficial ownership (e.g., transfer from one account in your name to another account in your name).
    - **Trading Plan Exception:** Sales of BlackRock securities may be effected for Covered Persons without seeking pre-clearance, regardless of their awareness of MNPI and outside of the prescribed trading windows (see below) solely if the transaction is made under a pre-arranged written trading plan that is:
        - In compliance with the requirements of Rule 10b5-1(c) under the Securities Exchange Act of 1934, as amended;
        - Pre-approved by Legal & Compliance prior to adoption and execution; and
        - Entered into (or amended) when the Covered Person is not in possession of MNPI and is adopted (or amended) during a prescribed trading window period.
- **Trading Windows:** If not in possession of MNPI, Covered Persons are only permitted to transfer (resulting in change to beneficial ownership), gift, or trade (purchase, sell, or exercise employee stock options) BlackRock securities (upon pre-clearance approval) during trading windows as determined and announced by Legal & Compliance. The opening and closing dates of each trading window are announced by email to all Covered Persons by Legal & Compliance. Typically, the trading window opens at the beginning of the second full day of trading following the public release of BlackRock's quarterly financial information and closes at the end of the second trading day of the last month of the quarter in which such quarterly financial information was released. The trading window may be opened and closed by Legal & Compliance at other times.
- **Prohibition on Hedging and Pledging BlackRock Securities:** A Covered Person may not:
    - Enter into any transactions that have the effect of hedging the economic risks and rewards of BlackRock securities held by such Covered Person, other than pursuant to a contractual right negotiated in connection with a merger or acquisition.
    - Hold BlackRock securities in margin accounts or pledge BlackRock securities as collateral for a loan.
- **Restrictions on Trading in BlackRock Securities:** In addition, employees may not:
    - Trade in options or warrants on BlackRock securities;
    - Engage in day trading of BlackRock securities;
    - Engage in any short selling of BlackRock securities;
    - Purchase any single-stock futures contracts on BlackRock securities; and
    - Trade in BlackRock securities in managed accounts.
- **BlackRock's Trading in Its Own Securities:** It is BlackRock's policy to comply with applicable securities laws concerning trading in BlackRock securities on BlackRock's behalf.

4. Post-Termination Transactions

Although the pre-clearance procedures specified in this policy will cease to apply to a Covered Person upon the conclusion of their service with BlackRock, the Covered Person will remain subject to applicable securities laws pertaining to trading while in possession of MNPI.

5. Other Trading Restrictions

This policy should be read in conjunction with other BlackRock policies, including the Global Personal Trading Policy which contains other restrictions on trading the securities of other companies for BlackRock employees.

6. Other Barriers

BlackRock implements information barriers for a variety of reasons in addition to the prevention of insider trading. Barriers established for another explicit purpose, such as avoidance of potential coordinated trading, will be outlined in those specific policies and/or procedures.

7. Consequences of Violations

The penalties for insider trading violations are severe and could include significant fines and imprisonment. In addition, an employee's failure to comply with this Policy may subject the employee to disciplinary action, including dismissal for cause, whether or not the employee's failure to comply results in a violation of applicable law.

8. Questions

Please contact Legal & Compliance in your respective region with questions regarding this policy.

Exhibit 22.1

Subsidiary Guarantor and Issuer of Guaranteed Securities

BlackRock Finance, Inc.(formerly known as BlackRock, Inc.), a Delaware corporation (“Old BlackRock”), is a direct wholly-owned subsidiary of BlackRock, Inc. (formerly known as BlackRock Funding, Inc.), a Delaware corporation (“New BlackRock”). Old BlackRock is a guarantor of New BlackRock’s registered debt securities. Old BlackRock is also an issuer of registered debt securities, which are guaranteed by New BlackRock. As of December 31, 2024, the registered debt securities were as follows:

New BlackRock registered debt securities guaranteed by Old BlackRock:

Name of Issuer	State of Formation of Issuer	Description of Registered Debt Securities
BlackRock, Inc.	Delaware	4.700% Notes due 2029
BlackRock, Inc.	Delaware	5.000% Notes due 2034
BlackRock, Inc.	Delaware	5.250% Notes due 2054
BlackRock, Inc.	Delaware	4.600% Notes due 2027
BlackRock, Inc.	Delaware	4.900% Notes due 2035
BlackRock, Inc.	Delaware	5.350% Notes due 2055

Old BlackRock registered debt securities guaranteed by New BlackRock:

Name of Issuer	State of Formation of Issuer	Description of Registered Debt Securities
BlackRock Finance, Inc.	Delaware	1.250% Notes due 2025
BlackRock Finance, Inc.	Delaware	3.200% Notes due 2027
BlackRock Finance, Inc.	Delaware	3.250% Notes due 2029
BlackRock Finance, Inc.	Delaware	2.400% Notes due 2030
BlackRock Finance, Inc.	Delaware	1.900% Notes due 2031
BlackRock Finance, Inc.	Delaware	2.10% Notes due 2032
BlackRock Finance, Inc.	Delaware	4.750% Notes due 2033

CEO CERTIFICATION

I, Laurence D. Fink, certify that:

1. I have reviewed this Annual Report on Form 10-K, for the fiscal year ended December 31, 2024 of BlackRock, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)), for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Exhibit 32.1

Certification of CEO and CFO Pursuant to
18 U.S.C. Section 1350,
as Adopted Pursuant to
Section 906 of the Sarbanes-Oxley Act of 2002

In connection with the Annual Report on Form 10-K of BlackRock, Inc. (the “Company”) for the annual period ending December 31, 2024 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), Laurence D. Fink, as Chief Executive Officer of the Company, and Martin S. Small, as Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

(Address of principal executive offices)	**(Zip Code)**

(512) 516-8177
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock	TSLA	The Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes x No o

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes o No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 ("Exchange Act") during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer	x	Accelerated filer	o
Non-accelerated filer	o	Smaller reporting company	o
Emerging growth company	o		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. o

Indicate by check mark whether the Registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. x

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. o

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant’s executive officers during the relevant recovery period pursuant to §240.10D-1(b). o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

The aggregate market value of voting stock held by non-affiliates of the registrant, as of June 30, 2023, the last day of the registrant’s most recently completed second fiscal quarter, was $722.52 billion (based on the closing price for shares of the registrant’s Common Stock as reported by the NASDAQ Global Select Market on June 30, 2023). Shares of Common Stock held by each executive officer and director have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of January 22, 2024, there were 3,184,790,415 shares of the registrant’s common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant’s Proxy Statement for the 2024 Annual Meeting of Stockholders are incorporated herein by reference in Part III of this Annual Report on Form 10-K to the extent stated herein. Such proxy statement will be filed with the Securities and Exchange Commission within 120 days of the registrant’s fiscal year ended December 31, 2023.

TESLA, INC.

ANNUAL REPORT ON FORM 10-K FOR THE YEAR ENDED DECEMBER 31, 2023

INDEX

Forward-Looking Statements

The discussions in this Annual Report on Form 10-K contain forward-looking statements reflecting our current expectations that involve risks and uncertainties. These forward-looking statements include, but are not limited to, statements concerning supply chain constraints, our strategy, competition, future operations and production capacity, future financial position, future revenues, projected costs, profitability, expected cost reductions, capital adequacy, expectations regarding demand and acceptance for our technologies, growth opportunities and trends in the markets in which we operate, prospects and plans and objectives of management. The words "anticipates," "believes," "could," "estimates," "expects," "intends," "may," "plans," "projects," "will," "would" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements that we make. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those in the forward-looking statements, including, without limitation, the risks set forth in Part I, Item 1A, "Risk Factors" of the Annual Report on Form 10-K for the fiscal year ended December 31, 2023 and that are otherwise described or updated from time to time in our other filings with the Securities and Exchange Commission (the "SEC"). The discussion of such risks is not an indication that any such risks have occurred at the time of this filing. We do not assume any obligation to update any forward-looking statements.

PART I

ITEM 1. BUSINESS

Overview

We design, develop, manufacture, sell and lease high-performance fully electric vehicles and energy generation and storage systems, and offer services related to our products. We generally sell our products directly to customers, and continue to grow our customer-facing infrastructure through a global network of vehicle showrooms and service centers, Mobile Service, body shops, Supercharger stations and Destination Chargers to accelerate the widespread adoption of our products. We emphasize performance, attractive styling and the safety of our users and workforce in the design and manufacture of our products and are continuing to develop full self-driving technology for improved safety. We also strive to lower the cost of ownership for our customers through continuous efforts to reduce manufacturing costs and by offering financial and other services tailored to our products.

Our mission is to accelerate the world's transition to sustainable energy. We believe that this mission, along with our engineering expertise, vertically integrated business model and focus on user experience differentiate us from other companies.

Segment Information

We operate as two reportable segments: (i) automotive and (ii) energy generation and storage.

The automotive segment includes the design, development, manufacturing, sales and leasing of high-performance fully electric vehicles as well as sales of automotive regulatory credits. Additionally, the automotive segment also includes services and other, which includes sales of used vehicles, non-warranty after-sales vehicle services, body shop and parts, paid Supercharging, vehicle insurance revenue and retail merchandise. The energy generation and storage segment includes the design, manufacture, installation, sales and leasing of solar energy generation and energy storage products and related services and sales of solar energy systems incentives.

Our Products and Services

Automotive

We currently manufacture five different consumer vehicles – the Model 3, Y, S, X and Cybertruck. Model 3 is a four-door mid-size sedan that we designed for manufacturability with a base price for mass-market appeal. Model Y is a compact sport utility vehicle ("SUV") built on the Model 3 platform with seating for up to seven adults. Model S is a four-door full-size sedan and Model X is a mid-size SUV with seating for up to seven adults. Model S and Model X feature the highest performance characteristics and longest ranges that we offer in a sedan and SUV, respectively. In November 2023, we entered the consumer pickup truck market with first deliveries of the Cybertruck, a full-size electric pickup truck with a stainless steel exterior that has the utility and strength of a truck while featuring the speed of a sports car.

In 2022, we also began early production and deliveries of a commercial electric vehicle, the Tesla Semi. We have planned electric vehicles to address additional vehicle markets, and to continue leveraging developments in our proprietary Full Self-Driving ("FSD") Capability features, battery cell and other technologies.

Energy Generation and Storage

Energy Storage Products

Powerwall and Megapack are our lithium-ion battery energy storage products. Powerwall, which we sell directly to customers, as well as through channel partners, is designed to store energy at a home or small commercial facility. Megapack is an energy storage solution for commercial, industrial, utility and energy generation customers, multiple of which may be grouped together to form larger installations of gigawatt hours ("GWh") or greater capacity.

We also continue to develop software capabilities for remotely controlling and dispatching our energy storage systems across a wide range of markets and applications, including through our real-time energy control and optimization platforms.

Solar Energy Offerings

We sell retrofit solar energy systems to customers and channel partners and also make them available through power purchase agreement ("PPA") arrangements. We purchase most of the components for our retrofit solar energy systems from multiple sources to ensure competitive pricing and adequate supply. We also design and manufacture certain components for our solar energy products.

We sell our Solar Roof, which combines premium glass roof tiles with energy generation, directly to customers, as well as through channel customers. We continue to improve our installation capability and efficiency, including through collaboration with real estate developers and builders on new homes.

Technology

Automotive

Battery and Powertrain

Our core vehicle technology competencies include powertrain engineering and manufacturing and our ability to design vehicles that utilize the unique advantages of an electric powertrain. We have designed our proprietary powertrain systems to be adaptable, efficient, reliable and cost-effective while withstanding the rigors of an automotive environment. We offer dual motor powertrain vehicles, which use two electric motors to maximize traction and performance in an all-wheel drive configuration, as well as vehicle powertrain technology featuring three electric motors for further increased performance in certain versions of Model S and Model X, Cybertruck and the Tesla Semi.

We maintain extensive testing and R&D capabilities for battery cells, packs and systems, and have built an expansive body of knowledge on lithium-ion cell chemistry types and performance characteristics. In order to enable a greater supply of cells for our products with higher energy density at lower costs, we have developed a new proprietary lithium-ion battery cell and improved manufacturing processes.

Vehicle Control and Infotainment Software

The performance and safety systems of our vehicles and their battery packs utilize sophisticated control software. Control systems in our vehicles optimize performance, customize vehicle behavior, manage charging and control all infotainment functions. We develop almost all of this software, including most of the user interfaces, internally and update our vehicles' software regularly through over-the-air updates.

Self-Driving Development and Artificial Intelligence

We have expertise in developing technologies, systems and software to enable self-driving vehicles using primarily vision-based technologies. Our FSD Computer runs our neural networks in our vehicles, and we are also developing additional computer hardware to better enable the massive amounts of field data captured by our vehicles to continually train and improve these neural networks for real-world performance.

Currently, we offer in our vehicles certain advanced driver assist systems under our Autopilot and FSD Capability options. Although at present the driver is ultimately responsible for controlling the vehicle, our systems provide safety and convenience functionality that relieves drivers of the most tedious and potentially dangerous aspects of road travel much like the system that airplane pilots use, when conditions permit. As with other vehicle systems, we improve these functions in our vehicles over time through over-the-air updates.

We intend to establish in the future an autonomous Tesla ride-hailing network, which we expect would also allow us to access a new customer base even as modes of transportation evolve.

We are also applying our artificial intelligence learnings from self-driving technology to the field of robotics, such as through Optimus, a robotic humanoid in development, which is controlled by the same AI system.

Energy Generation and Storage

Energy Storage Products

We leverage many of the component-level technologies from our vehicles in our energy storage products. By taking a modular approach to the design of battery systems, we can optimize manufacturing capacity of our energy storage products. Additionally, our expertise in power electronics enables our battery systems to interconnect with electricity grids while providing fast-acting systems for power injection and absorption. We have also developed software to remotely control and dispatch our energy storage systems.

Solar Energy Systems

We have engineered Solar Roof over numerous iterations to combine aesthetic appeal and durability with power generation. The efficiency of our solar energy products is aided by our own solar inverter, which incorporates our power electronics technologies. We designed both products to integrate with Powerwall.

Design and Engineering

Automotive

We have established significant in-house capabilities in the design and test engineering of electric vehicles and their components and systems. Our team has significant experience in computer-aided design as well as durability, strength and crash test simulations, which reduces the product development time of new models. We have also achieved complex engineering feats in stamping, casting and thermal systems, and developed a method to integrate batteries directly with vehicle body structures without separate battery packs to optimize manufacturability, weight, range and cost characteristics.

We are also expanding our manufacturing operations globally while taking action to localize our vehicle designs and production for particular markets, including country-specific market demands and factory optimizations for local workforces. As we increase our capabilities, particularly in the areas of automation, die-making and line-building, we are also making strides in the simulations modeling these capabilities prior to construction.

Energy Generation and Storage

Our expertise in electrical, mechanical, civil and software engineering allows us to design, engineer, manufacture and install energy generating and storage products and components, including at the residential through utility scale. For example, the modular design of our Megapack utility-scale battery line is intended to significantly reduce the amount of assembly required in the field. We also customize solutions including our energy storage products, solar energy systems and/or Solar Roof for customers to meet their specific needs.

Sales and Marketing

Historically, we have been able to achieve sales without traditional advertising and at relatively low marketing costs. We continue to monitor our public narrative and brand, and tailor our marketing efforts accordingly, including through investments in customer education and advertising as necessary.

Automotive

Direct Sales

Our vehicle sales channels currently include our website and an international network of company-owned stores. In some jurisdictions, we also have galleries to educate and inform customers about our products, but such locations do not transact in the sale of vehicles. We believe this infrastructure enables us to better control costs of inventory, manage warranty service and pricing, educate consumers about electric vehicles, make our vehicles more affordable, maintain and strengthen the Tesla brand and obtain rapid customer feedback.

We reevaluate our sales strategy both globally and at a location-by-location level from time to time to optimize our sales channels. However, sales of vehicles in the automobile industry tend to be cyclical in many markets, which may expose us to volatility from time to time.

Used Vehicle Sales

Our used vehicle business supports new vehicle sales by integrating the trade-in of a customer’s existing Tesla or non-Tesla vehicle with the sale of a new or used Tesla vehicle. The Tesla and non-Tesla vehicles we acquire as trade-ins are subsequently remarketed, either directly by us or through third parties. We also remarket used Tesla vehicles acquired from other sources including lease returns.

Public Charging

We have a growing global network of Tesla Superchargers, which are our industrial-grade, high-speed vehicle chargers. Where possible, we co-locate Superchargers with our solar and energy storage systems to reduce costs and promote renewable power. Supercharger stations are typically placed along well-traveled routes and in and around dense city centers to allow vehicle owners the ability to enjoy quick, reliable charging along an extensive network with convenient stops. Use of the Supercharger network either requires payment of a fee or is free under certain sales programs. In November 2021, we began to offer Supercharger access to non-Tesla vehicles in certain locations in support of our mission to accelerate the world’s transition to sustainable energy, and in November 2022, we opened up our previously proprietary charging connector as the North American Charging Standard (NACS). This enables all electric vehicles and charging stations to interoperate — which makes charging easier and more efficient for everyone and advances our mission to accelerate the world’s transition to sustainable energy. Following this, a number of major automotive companies announced their adoption of NACS, with their access to the Supercharger network beginning in phases in 2024 and their production of NACS vehicles beginning no later than 2025. We also engaged SAE International to govern NACS as an industry standard, now named J3400. We continue to monitor and increase our network of Tesla Superchargers in anticipation of future demand.

We also work with a wide variety of hospitality, retail and public destinations, as well as businesses with commuting employees, to offer additional charging options for our customers, as well as single-family homeowners and multi-family residential entities, to deploy home charging solutions.

In-App Upgrades

As our vehicles are capable of being updated remotely over-the-air, our customers may purchase additional paid options and features through the Tesla app or through the in-vehicle user interface. We expect that this functionality will also allow us to offer certain options and features on a subscription basis in the future.

Energy Generation and Storage

We market and sell our solar and energy storage products to residential, commercial and industrial customers and utilities through a variety of channels, including through our website, stores and galleries, as well as through our network of channel partners, and in the case of some commercial customers, through PPA transactions. We emphasize simplicity, standardization and accessibility to make it easy and cost-effective for customers to adopt clean energy, while reducing our customer acquisition costs.

Service and Warranty

Automotive

Service

We provide service for our electric vehicles at our company-owned service locations and through Tesla Mobile Service technicians who perform work remotely at customers’ homes or other locations. Servicing the vehicles ourselves allows us to identify problems and implement solutions and improvements faster than traditional automobile manufacturers and their dealer networks. The connectivity of our vehicles also allows us to diagnose and remedy many problems remotely and proactively.

Vehicle Limited Warranties and Extended Service Plans

We provide a manufacturer’s limited warranty on all new and used Tesla vehicles we sell directly to consumers, which may include limited warranties on certain components, specific types of damage or battery capacity retention. We also currently offer optional extended service plans that provide coverage beyond the new vehicle limited warranties for certain models in specified regions.

Energy Generation and Storage

We provide service and repairs to our energy product customers, including under warranty where applicable. We generally provide manufacturer's limited warranties with our energy storage products and offer certain extended limited warranties that are available at the time of purchase of the system. If we install a system, we also provide certain limited warranties on our installation workmanship.

For retrofit solar energy systems, we provide separate limited warranties for workmanship and against roof leaks, and for Solar Roof, we also provide limited warranties for defects and weatherization. For components not manufactured by us, we generally pass-through the applicable manufacturers' warranties.

As part of our solar energy system and energy storage contracts, we may provide the customer with performance guarantees that commit that the underlying system will meet or exceed the minimum energy generation or performance requirements specified in the contract.

Financial Services

Automotive

Purchase Financing and Leases

We offer leasing and/or loan financing arrangements for our vehicles in certain jurisdictions in North America, Europe and Asia ourselves and through various financial institutions. Under certain of such programs, we have provided resale value guarantees or buyback guarantees that may obligate us to cover a resale loss up to a certain limit or repurchase the subject vehicles at pre-determined values.

Insurance

In 2021, we launched our insurance product using real-time driving behavior in select states, which offers rates that are often better than other alternatives and promotes safer driving. Our insurance products are currently available in 12 states and we plan to expand the markets in which we offer insurance products, as part of our ongoing effort to decrease the total cost of ownership for our customers.

Energy Generation and Storage

We offer certain financing options to our solar customers, which enable the customer to purchase and own a solar energy system, Solar Roof or integrated solar and Powerwall system. Our solar PPAs, offered primarily to commercial customers, charge a fee per kilowatt-hour based on the amount of electricity produced by our solar energy systems.

Manufacturing

We currently have manufacturing facilities in the U.S. in Northern California, in Buffalo, New York, Gigafactory New York; in Austin, Texas, Gigafactory Texas and near Reno, Nevada, Gigafactory Nevada. At these facilities, we manufacture and assemble, among other things, vehicles, certain vehicle parts and components, such as our battery packs and battery cells, energy storage components and solar products and components.

Internationally, we also have manufacturing facilities in China (Gigafactory Shanghai) and Germany (Gigafactory Berlin-Brandenburg), which allows us to increase the affordability of our vehicles for customers in local markets by reducing transportation and manufacturing costs and eliminating the impact of unfavorable tariffs. In March 2023, we announced the location of our next Gigafactory in Monterrey, Mexico. Generally, we continue to expand production capacity at our existing facilities. We also intend to further increase cost-competitiveness in our significant markets by strategically adding local manufacturing.

Supply Chain

Our products use thousands of parts that are sourced from hundreds of suppliers across the world. We have developed close relationships with vendors of key parts such as battery cells, electronics and complex vehicle assemblies. Certain components purchased from these suppliers are shared or are similar across many product lines, allowing us to take advantage of pricing efficiencies from economies of scale.

As is the case for some automotive companies, some of our procured components and systems are sourced from single suppliers. Where multiple sources are available for certain key components, we work to qualify multiple suppliers for them where it is sensible to do so in order to minimize potential production risks due to disruptions in their supply. We also mitigate risk by maintaining safety stock for key parts and assemblies and die banks for components with lengthy procurement lead times.

Our products use various raw materials including aluminum, steel, cobalt, lithium, nickel and copper. Pricing for these materials is governed by market conditions and may fluctuate due to various factors outside of our control, such as supply and demand and market speculation. We strive to execute long-term supply contracts for such materials at competitive pricing when feasible, and we currently believe that we have adequate access to raw materials supplies to meet the needs of our operations.

Governmental Programs, Incentives and Regulations

Globally, the ownership of our products by our customers is impacted by various government credits, incentives, and policies. Our business and products are also subject to numerous governmental regulations that vary among jurisdictions.

The operation of our business is also impacted by various government programs, incentives, and other arrangements. See Note 2, *Summary of Significant Accounting Policies*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K for further details.

Programs and Incentives

Inflation Reduction Act

On August 16, 2022, the Inflation Reduction Act of 2022 (“IRA”) was enacted into law and is effective for taxable years beginning after December 31, 2022, and remains subject to future guidance releases. The IRA includes multiple incentives to promote clean energy, electric vehicles, battery and energy storage manufacture or purchase, including through providing tax credits to consumers. For example, qualifying Tesla customers may receive up to $7,500 in federal tax credits for the purchase of qualified electric vehicles in the U.S. through 2032.

Automotive Regulatory Credits

We earn tradable credits in the operation of our business under various regulations related to zero-emission vehicles (“ZEVs”), greenhouse gas, fuel economy and clean fuel. We sell these credits to other regulated entities who can use the credits to comply with emission standards and other regulatory requirements. Sales of these credits are recognized within automotive regulatory credits revenue in our consolidated statements of operations included elsewhere in this Annual Report on Form 10-K.

Energy Storage System Incentives and Policies

While the regulatory regime for energy storage projects is still under development, there are various policies, incentives and financial mechanisms at the federal, state and local levels that support the adoption of energy storage.

For example, energy storage systems that are charged using solar energy may be eligible for the solar energy-related U.S. federal tax credits described below. The Federal Energy Regulatory Commission (“FERC”) has also taken steps to enable the participation of energy storage in wholesale energy markets. In addition, California and a number of other states have adopted procurement targets for energy storage, and behind-the-meter energy storage systems qualify for funding under the California Self Generation Incentive Program. Our customers primarily benefit directly under these programs. In certain instances our customers may transfer such credits to us as contract consideration. In such transactions, they are included as a component of energy generation and storage revenues in our consolidated statements of operations included elsewhere in this Annual Report on Form 10-K.

Pursuant to the IRA, under Sections 48, 48E and 25D of the Internal Revenue Code (”IRC”), standalone energy storage technology is eligible for a tax credit between 6% and 50% of qualified expenditures, regardless of the source of energy, which may be claimed by our customers for storage systems they purchase or by us for arrangements where we own the systems. These tax credits are primarily for the benefit of our customers and are currently scheduled to phase-out starting in 2032 or later.

Solar Energy System Incentives and Policies

U.S. federal, state and local governments have established various policies, incentives and financial mechanisms to reduce the cost of solar energy and to accelerate the adoption of solar energy. These incentives include tax credits, cash grants, tax abatements and rebates.

In particular, pursuant to the IRA, Sections 48, 48E and 25D of the IRC provides a tax credit between 6% and 70% of qualified commercial or residential expenditures for solar energy systems, which may be claimed by our customers for systems they purchase, or by us for arrangements where we own the systems for properties that meet statutory requirements. These tax credits are primarily for the direct benefit of our customers and are currently scheduled to phase-out starting in 2032 or later.

Regulations

Vehicle Safety and Testing

In the U.S., our vehicles are subject to regulation by the National Highway Traffic Safety Administration (“NHTSA”), including all applicable Federal Motor Vehicle Safety Standards (“FMVSS”) and the NHTSA bumper standard. Numerous FMVSS apply to our vehicles, such as crash-worthiness and occupant protection requirements. Our current vehicles fully comply and we expect that our vehicles in the future will fully comply with all applicable FMVSS with limited or no exemptions, however, FMVSS are subject to change from time to time. As a manufacturer, we must self-certify that our vehicles meet all applicable FMVSS and the NHTSA bumper standard, or otherwise are exempt, before the vehicles may be imported or sold in the U.S.

We are also required to comply with other federal laws administered by NHTSA, including the Corporate Average Fuel Economy standards, Theft Prevention Act requirements, labeling requirements and other information provided to customers in writing, Early Warning Reporting requirements regarding warranty claims, field reports, death and injury reports and foreign recalls, a Standing General Order requiring reports regarding crashes involving vehicles equipped with advanced driver assistance systems, and additional requirements for cooperating with compliance and safety investigations and recall reporting. The U.S. Automobile Information and Disclosure Act also requires manufacturers of motor vehicles to disclose certain information regarding the manufacturer’s suggested retail price, optional equipment and pricing. In addition, federal law requires inclusion of fuel economy ratings, as determined by the U.S. Department of Transportation and the Environmental Protection Agency (the “EPA”), and New Car Assessment Program ratings as determined by NHTSA, if available.

Our vehicles sold outside of the U.S. are subject to similar foreign compliance, safety, environmental and other regulations. Many of those regulations are different from those applicable in the U.S. and may require redesign and/or retesting. Some of those regulations impact or prevent the rollout of new vehicle features.

Self-Driving Vehicles

Generally, laws pertaining to self-driving vehicles are evolving globally, and in some cases may create restrictions on features or vehicle designs that we develop. While there are currently no federal U.S. regulations pertaining specifically to self-driving vehicles or self-driving equipment, NHTSA has published recommended guidelines on self-driving vehicles, apart from the FMVSS and manufacturer reporting obligations, and retains the authority to investigate and/or take action on the safety or compliance of any vehicle, equipment or features operating on public roads. Certain U.S. states also have legal restrictions on the operation, registration or licensure of self-driving vehicles, and many other states are considering them. This regulatory patchwork increases the legal complexity with respect to self-driving vehicles in the U.S.

In markets that follow the regulations of the United Nations Economic Commission for Europe (“ECE markets”), some requirements restrict the design of advanced driver-assistance or self-driving features, which can compromise or prevent their use entirely. Other applicable laws, both current and proposed, may hinder the path and timeline to introducing self-driving vehicles for sale and use in the markets where they apply.

Other key markets, including China, continue to consider self-driving regulation. Any implemented regulations may differ materially from the U.S. and ECE markets, which may further increase the legal complexity of self-driving vehicles and limit or prevent certain features.

Automobile Manufacturer and Dealer Regulation

In the U.S., state laws regulate the manufacture, distribution, sale and service of automobiles, and generally require motor vehicle manufacturers and dealers to be licensed in order to sell vehicles directly to residents. Certain states have asserted that the laws in such states do not permit automobile manufacturers to be licensed as dealers or to act in the capacity of a dealer, or that they otherwise restrict a manufacturer's ability to deliver or perform warranty repairs on vehicles. To sell vehicles to residents of states where we are not licensed as a dealer, we generally conduct the sale out of the state. In certain such states, we have opened "galleries" that serve an educational purpose and where sales may not occur.

Some automobile dealer trade associations have both challenged the legality of our operations in court and used administrative and legislative processes to attempt to prohibit or limit our ability to operate existing stores or expand to new locations. Certain dealer associations have also actively lobbied state licensing agencies and legislators to interpret existing laws or enact new laws in ways not favorable to our ownership and operation of our own retail and service locations. We expect such challenges to continue, and we intend to actively fight any such efforts.

Battery Safety and Testing

Our battery packs are subject to various U.S. and international regulations that govern transport of "dangerous goods," defined to include lithium-ion batteries, which may present a risk in transportation. We conduct testing to demonstrate our compliance with such regulations.

We use lithium-ion cells in our high voltage battery packs in our vehicles and energy storage products. The use, storage and disposal of our battery packs are regulated under existing laws and are the subject of ongoing regulatory changes that may add additional requirements in the future. We have agreements with third party battery recycling companies to recycle our battery packs, and we are also piloting our own recycling technology.

Solar Energy—General

We are subject to certain state and federal regulations applicable to solar and battery storage providers and sellers of electricity. To operate our systems, we enter into standard interconnection agreements with applicable utilities. Sales of electricity and non-sale equipment leases by third parties, such as our leases and PPAs, have faced regulatory challenges in some states and jurisdictions.

Solar Energy—Net Metering

Most states in the U.S. make net energy metering, or net metering, available to solar customers. Net metering typically allows solar customers to interconnect their solar energy systems to the utility grid and offset their utility electricity purchases by receiving a bill credit for excess energy generated by their solar energy system that is exported to the grid. In certain jurisdictions, regulators or utilities have reduced or eliminated the benefit available under net metering or have proposed to do so.

Competition

Automotive

The worldwide automotive market is highly competitive and we expect it will become even more competitive in the future as a significant and growing number of established and new automobile manufacturers, as well as other companies, have entered, or are reported to have plans to enter the electric vehicle market.

We believe that our vehicles compete in the market based on both their traditional segment classification as well as their propulsion technology. For example, Cybertruck competes with other pickup trucks, Model S and Model X compete primarily with premium sedans and premium SUVs and Model 3 and Model Y compete with small to medium-sized sedans and compact SUVs, which are extremely competitive markets. Competing products typically include internal combustion vehicles from more established automobile manufacturers; however, many established and new automobile manufacturers have entered or have announced plans to enter the market for electric and other alternative fuel vehicles. Overall, we believe these announcements and vehicle introductions, including the introduction of electric vehicles into rental car company fleets, promote the development of the electric vehicle market by highlighting the attractiveness of electric vehicles relative to the internal combustion vehicle. Many major automobile manufacturers have electric vehicles available today in major markets including the U.S., China and Europe, and other current and prospective automobile manufacturers are also developing electric vehicles. In addition, several manufacturers offer hybrid vehicles, including plug-in versions.

We believe that there is also increasing competition for our vehicle offerings as a platform for delivering self-driving technologies, charging solutions and other features and services, and we expect to compete in this developing market through continued progress on our Autopilot, FSD and neural network capabilities, Supercharger network and our infotainment offerings.

Energy Generation and Storage

Energy Storage Systems

The market for energy storage products is also highly competitive, and both established and emerging companies have introduced products that are similar to our product portfolio or that are alternatives to the elements of our systems. We compete with these companies based on price, energy density and efficiency. We believe that the specifications and features of our products, our strong brand and the modular, scalable nature of our energy storage products give us a competitive advantage in our markets.

Solar Energy Systems

The primary competitors to our solar energy business are the traditional local utility companies that supply energy to our potential customers. We compete with these traditional utility companies primarily based on price and the ease by which customers can switch to electricity generated by our solar energy systems. We also compete with solar energy companies that provide products and services similar to ours. Many solar energy companies only install solar energy systems, while others only provide financing for these installations. We believe we have a significant expansion opportunity with our offerings and that the regulatory environment is increasingly conducive to the adoption of renewable energy systems.

Intellectual Property

We place a strong emphasis on our innovative approach and proprietary designs which bring intrinsic value and uniqueness to our product portfolio. As part of our business, we seek to protect the underlying intellectual property rights of these innovations and designs such as with respect to patents, trademarks, copyrights, trade secrets, confidential information and other measures, including through employee and third-party nondisclosure agreements and other contractual arrangements. For example, we place a high priority on obtaining patents to provide the broadest and strongest possible protection to enable our freedom to operate our innovations and designs across all of our products and technologies as well as to protect and defend our product portfolio. We have also adopted a patent policy in which we irrevocably pledged that we will not initiate a lawsuit against any party for infringing our patents through activity relating to electric vehicles or related equipment for so long as such party is acting in good faith. We made this pledge in order to encourage the advancement of a common, rapidly-evolving platform for electric vehicles, thereby benefiting ourselves, other companies making electric vehicles and the world.

Environmental, Social and Governance (ESG) and Human Capital Resources

ESG

The very purpose of Tesla's existence is to accelerate the world's transition to sustainable energy. We believe the world cannot reduce carbon emissions without addressing both energy generation and consumption, and we are designing and manufacturing a complete energy and transportation ecosystem to achieve this goal. As we expand, we are building each new factory to be more efficient and sustainably designed than the previous one, including with respect to per-unit waste reduction and resource consumption, including water and energy usage. We are focused on further enhancing sustainability of operations outside of our direct control, including reducing the carbon footprint of our supply chain.

We are committed to sourcing only responsibly produced materials, and our suppliers are required to provide evidence of management systems that ensure social, environmental and sustainability best practices in their own operations, as well as to demonstrate a commitment to responsible sourcing into their supply chains. We have a zero-tolerance policy when it comes to child or forced labor and human trafficking by our suppliers and we look to the Organization for Economic Co-operation and Development Due Diligence Guidelines to inform our process and use feedback from our internal and external stakeholders to find ways to continually improve. We are also driving safety in our own factories by focusing on worker engagement. Our incidents per vehicle continue to drop even as our production volumes increase. We also strive to be an employer of choice by offering compelling, impactful jobs with best in-industry benefits.

We believe that sound corporate governance is critical to helping us achieve our goals, including with respect to ESG. We continue to evolve a governance framework that exercises appropriate oversight of responsibilities at all levels throughout the company and manages its affairs consistent with high principles of business ethics. Our ESG Sustainability Council is made up of leaders from across our company, and regularly presents to our Board of Directors, which oversees our ESG impacts, initiatives and priorities.

Human Capital Resources

A competitive edge for Tesla is its ability to attract and retain high quality employees. During the past year, Tesla made substantial investments in its workforce, further strengthening its standing as one of the most desirable and innovative companies to work for. As of December 31, 2023, our employee headcount worldwide was 140,473.

We have created an environment that fosters growth opportunities, and as of this report, nearly two-thirds (65%) of our managers were promoted from an internal, non-manager position, and 43% of our management employees have been with Tesla for more than five years. Tesla's growth of 35% over the past two years has offered internal career development to our employees as well as the ability to make a meaningful contribution to a sustainable future.

We are able to retain our employees, in part, not only because employees can enjoy ownership in Tesla through stock (of which 89% have been given the opportunity to), but because we also provide them with excellent health benefits such as free counseling, paid parental leave, paid time off and zero-premium medical plan options that are made available on the first day of employment.

We recognize the positive impact that leaders can have on their teams and offer fundamental skills training and continuous development to all leaders through various programs globally.

We don't stop there. Tesla has several other programs strategically designed to increase paths for greater career opportunity such as:

- **Technician Trainee (Service)** – The Tesla Technician Trainee Program provides on-the-job automotive maintenance training at Tesla, resulting in an industry certification. Targeted at individuals with limited experience, whether in industry or vocational schools, the program prepares trainees for employment as technicians. In 2023, we hired over 1,900 Technician Trainees across the U.S., Germany and China.

- **START (Manufacturing and Service)** – Tesla START is an intensive training program that complements the Technician Trainee program and equips individuals with the skills needed for a successful technician role at Tesla. We have partnered with colleges and technical academies to launch Tesla START in the U.S., United Kingdom and Germany. In 2023, we hired over 350 trainees for manufacturing and service roles through this program, providing an opportunity to transition into full-time employment.

- **Internships** – Annually, Tesla hires over 6,000 university and college students from around the world. We recruit from diverse student organizations and campuses, seeking top talent passionate about our mission. Our interns engage in meaningful work from day one, and we often offer them full-time positions post-internship.

- **Military Fellowship and Transition Programs –** The Military Fellowship and Transition Programs are designed to offer exiting military service members in the U.S. and Europe with career guidance on transitioning into the civil workforce. We partner with the career transition services of European Defence Ministries across five countries, as well as the U.S. Chamber of Commerce's Hire our Heroes. These programs aim to convert high-performing individuals to full-time roles and create a veteran talent pipeline.

- **Apprenticeships** – Tesla Apprenticeships are offered globally, providing academic and on-the-job training to prepare specialists in skilled trades. Apprentices will complete between one to four years of on-the-job training. Apprentice programs have seen skilled trade hires across the U.S., Australia, Hong Kong, Korea and Germany.

- **Manufacturing Development Program** – Tesla's manufacturing pathway program is designed to provide graduating high school seniors with the financial resources, coursework and experience they need to start a successful manufacturing career at Tesla. We hired 373 graduates through this program in 2023, and our goal in 2024 is grow this program to over 600 students annually across our Fremont Factory, Gigafactory Nevada, Gigafactory Texas and Gigafactory New York.

- **Engineering Development Program** – Launched in January 2024, this program targets recent college and university graduates for specialized engineering fields. In collaboration with Austin Community College, the program educates early-career engineers in controls engineering, enhancing their knowledge of high-demand technologies for U.S. manufacturing.

We will continue to expand the opportunities for our employees to add skills and develop professionally with a new Employee Educational Assistance Program launching in the U.S. in the spring of 2024 to help employees pursue select certificates or degrees. With virtual, self-paced education options available, employees can pursue a new path or expand their knowledge while continuing to grow their career.

At Tesla, our employees show up passionate about making a difference in the world and for each other. We remain unwavering in our demand that our factories, offices, stores and service centers are places where our employees feel respected and appreciated. Our policies are designed to promote fairness and respect for everyone. We hire, evaluate and promote employees based on their skills and performance. Everyone is expected to be trustworthy, demonstrate excellence in their performance and collaborate with others. With this in mind, we will not tolerate certain behaviors. These include harassment, retaliation, violence, intimidation and discrimination of any kind on the basis of race, color, religion, national origin, gender, sexual orientation, gender identity, gender expression, age, disability or veteran status.

Anti-harassment training is conducted on day one of new hire orientation for all employees and reoccurring for leaders. In addition, we run various leadership development programs throughout the year aimed at enhancing leaders' skills, and in particular, helping them to understand how to appropriately respond to and address employee concerns.

Employees are encouraged to speak up both in regard to misconduct and safety concerns and can do so by contacting the integrity line, submitting concerns through our Take Charge process, or notifying their Human Resource Partner or any member of management. Concerns are reviewed in accordance with established protocols by investigators with expertise, who also review for trends and outcomes for remediation and appropriate controls. Responding to questions timely is key so Human Resource Partners for each functional area are visible throughout facilities and are actively involved in driving culture and engagement alongside business leaders.

Available Information

We file or furnish periodic reports and amendments thereto, including our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, proxy statements and other information with the SEC. In addition, the SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically. Our website is located at www.tesla.com, and our reports, amendments thereto, proxy statements and other information are also made available, free of charge, on our investor relations website at ir.tesla.com as soon as reasonably practicable after we electronically file or furnish such information with the SEC. The information posted on our website is not incorporated by reference into this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below together with the other information set forth in this report, which could materially affect our business, financial condition and future results. The risks described below are not the only risks facing our company. Risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and operating results.

Risks Related to Our Ability to Grow Our Business

We may experience delays in launching and ramping the production of our products and features, or we may be unable to control our manufacturing costs.

We have previously experienced and may in the future experience launch and production ramp delays for new products and features. For example, we encountered unanticipated supplier issues that led to delays during the initial ramp of our first Model X and experienced challenges with a supplier and with ramping full automation for certain of our initial Model 3 manufacturing processes. In addition, we may introduce in the future new or unique manufacturing processes and design features for our products. As we expand our vehicle offerings and global footprint, there is no guarantee that we will be able to successfully and timely introduce and scale such processes or features.

In particular, our future business depends in large part on increasing the production of mass-market vehicles. In order to be successful, we will need to implement, maintain and ramp efficient and cost-effective manufacturing capabilities, processes and supply chains and achieve the design tolerances, high quality and output rates we have planned at our manufacturing facilities in California, Nevada, Texas, China, Germany and any future sites such as Mexico. We will also need to hire, train and compensate skilled employees to operate these facilities. Bottlenecks and other unexpected challenges such as those we experienced in the past may arise during our production ramps, and we must address them promptly while continuing to improve manufacturing processes and reducing costs. If we are not successful in achieving these goals, we could face delays in establishing and/or sustaining our product ramps or be unable to meet our related cost and profitability targets.

We have experienced, and may also experience similar future delays in launching and/or ramping production of our energy storage products and Solar Roof; new product versions or variants; new vehicles; and future features and services based on artificial intelligence. Likewise, we may encounter delays with the design, construction and regulatory or other approvals necessary to build and bring online future manufacturing facilities and products.

Any delay or other complication in ramping the production of our current products or the development, manufacture, launch and production ramp of our future products, features and services, or in doing so cost-effectively and with high quality, may harm our brand, business, prospects, financial condition and operating results.

Our suppliers may fail to deliver components according to schedules, prices, quality and volumes that are acceptable to us, or we may be unable to manage these components effectively.

Our products contain thousands of parts purchased globally from hundreds of suppliers, including single-source direct suppliers, which exposes us to multiple potential sources of component shortages. Unexpected changes in business conditions, materials pricing, including inflation of raw material costs, labor issues, wars, trade policies, natural disasters, health epidemics such as the global COVID-19 pandemic, trade and shipping disruptions, port congestions, cyberattacks and other factors beyond our or our suppliers' control could also affect these suppliers' ability to deliver components to us or to remain solvent and operational. For example, a global shortage of semiconductors beginning in early 2021 has caused challenges in the manufacturing industry and impacted our supply chain and production. Additionally, if our suppliers do not accurately forecast and effectively allocate production or if they are not willing to allocate sufficient production to us, or face other challenges such as insolvency, it may reduce our access to components and require us to search for new suppliers. The unavailability of any component or supplier could result in production delays, idle manufacturing facilities, product design changes and loss of access to important technology and tools for producing and supporting our products, as well as impact our capacity expansion and our ability to fulfill our obligations under customer contracts. Moreover, significant increases in our production or product design changes by us have required and may in the future require us to procure additional components in a short amount of time. We have faced in the past, and may face suppliers who are unwilling or unable to sustainably meet our timelines or our cost, quality and volume needs, which may increase our costs or require us to replace them with other sources. Finally, as we construct new manufacturing facilities and add production lines to existing facilities, we may experience issues in correspondingly increasing the level of localized procurement at those facilities. While we believe that we will be able to secure additional or alternate sources or develop our own replacements for most of our components, there is no assurance that we will be able to do so quickly or at all. Additionally, we may be unsuccessful in our continuous efforts to negotiate with existing suppliers to obtain cost reductions and avoid unfavorable changes to terms, source less expensive suppliers for certain parts and redesign certain parts to make them less expensive to produce, especially in the case of increases in materials pricing. Any of these occurrences may harm our business, prospects, financial condition and operating results.

As the scale of our vehicle production increases, we will also need to accurately forecast, purchase, warehouse and transport components at high volumes to our manufacturing facilities and servicing locations internationally. If we are unable to accurately match the timing and quantities of component purchases to our actual needs or successfully implement automation, inventory management and other systems to accommodate the increased complexity in our supply chain and parts management, we may incur unexpected production disruption, storage, transportation and write-off costs, which may harm our business and operating results.

We may be unable to meet our projected construction timelines, costs and production ramps at new factories, or we may experience difficulties in generating and maintaining demand for products manufactured there.

Our ability to increase production of our vehicles on a sustained basis, make them affordable globally by accessing local supply chains and workforces and streamline delivery logistics is dependent on the construction and ramp of our current and future factories. The construction of and commencement and ramp of production at these factories are subject to a number of uncertainties inherent in all new manufacturing operations, including ongoing compliance with regulatory requirements, procurement and maintenance of construction, environmental and operational licenses and approvals for additional expansion, supply chain constraints, hiring, training and retention of qualified employees and the pace of bringing production equipment and processes online with the capability to manufacture high-quality units at scale. Moreover, we will have to establish and ramp production of our proprietary battery cells and packs at our new factories, and we additionally intend to incorporate sequential design and manufacturing changes into vehicles manufactured at each new factory. If we experience any issues or delays in meeting our projected timelines, costs, capital efficiency and production capacity for our new factories, expanding and managing teams to implement iterative design and production changes there, maintaining and complying with the terms of any debt financing that we obtain to fund them or generating and maintaining demand for the vehicles we manufacture there, our business, prospects, operating results and financial condition may be harmed.

We may be unable to grow our global product sales, delivery and installation capabilities and our servicing and vehicle charging networks, or we may be unable to accurately project and effectively manage our growth.

Our success will depend on our ability to continue to expand our sales capabilities. We are targeting a global mass demographic with a broad range of potential customers, in which we have relatively limited experience projecting demand and pricing our products. We currently produce numerous international variants at a limited number of factories, and if our specific demand expectations for these variants prove inaccurate, we may not be able to timely generate deliveries matched to the vehicles that we produce in the same timeframe or that are commensurate with the size of our operations in a given region. Likewise, as we develop and grow our energy products and services worldwide, our success will depend on our ability to correctly forecast demand in various markets.

Because we do not have independent dealer networks, we are responsible for delivering all of our vehicles to our customers. As our production volumes continue to grow, we have faced in the past, and may face challenges with deliveries at increasing volumes, particularly in international markets requiring significant transit times. We have also deployed a number of delivery models, such as deliveries to customers' homes and workplaces and touchless deliveries, but there is no guarantee that such models will be scalable or be accepted globally. Likewise, as we ramp our energy products, we are working to substantially increase our production and installation capabilities. If we experience production delays or inaccurately forecast demand, our business, financial condition and operating results may be harmed.

Moreover, because of our unique expertise with our vehicles, we recommend that our vehicles be serviced by us or by certain authorized professionals. If we experience delays in adding servicing capacity or servicing our vehicles efficiently, or experience unforeseen issues with the reliability of our vehicles, particularly higher-volume additions to our fleet such as Model 3 and Model Y, it could overburden our servicing capabilities and parts inventory. Similarly, the increasing number of Tesla vehicles also requires us to continue to rapidly increase the number of our Supercharger stations and connectors throughout the world.

There is no assurance that we will be able to ramp our business to meet our sales, delivery, installation, servicing and vehicle charging targets globally, that our projections on which such targets are based will prove accurate or that the pace of growth or coverage of our customer infrastructure network will meet customer expectations. These plans require significant cash investments and management resources and there is no guarantee that they will generate additional sales or installations of our products, or that we will be able to avoid cost overruns or be able to hire additional personnel to support them. As we expand, we will also need to ensure our compliance with regulatory requirements in various jurisdictions applicable to the sale, installation and servicing of our products, the sale or dispatch of electricity related to our energy products and the operation of Superchargers. If we fail to manage our growth effectively, it may harm our brand, business, prospects, financial condition and operating results.

We will need to maintain and significantly grow our access to battery cells, including through the development and manufacture of our own cells, and control our related costs.

We are dependent on the continued supply of lithium-ion battery cells for our vehicles and energy storage products, and we will require substantially more cells to grow our business according to our plans. Currently, we rely on suppliers such as Panasonic and Contemporary Amperex Technology Co. Limited (CATL) for these cells. We have to date fully qualified only a very limited number of such suppliers and have limited flexibility in changing suppliers. Any disruption in the supply of battery cells from our suppliers could limit production of our vehicles and energy storage products. In the long term, we intend to supplement cells from our suppliers with cells manufactured by us, which we believe will be more efficient, manufacturable at greater volumes and more cost-effective than currently available cells. However, our efforts to develop and manufacture such battery cells have required, and may continue to require, significant investments, and there can be no assurance that we will be able to achieve these targets in the timeframes that we have planned or at all. If we are unable to do so, we may have to curtail our planned vehicle and energy storage product production or procure additional cells from suppliers at potentially greater costs, either of which may harm our business and operating results.

In addition, the cost and mass production of battery cells, whether manufactured by our suppliers or by us, depends in part upon the prices and availability of raw materials such as lithium, nickel, cobalt and/or other metals. The prices for these materials fluctuate and their available supply may be unstable, depending on market conditions and global demand for these materials. For example, as a result of increased global production of electric vehicles and energy storage products, suppliers of these raw materials may be unable to meet our volume needs. Additionally, our suppliers may not be willing or able to reliably meet our timelines or our cost and quality needs, which may require us to replace them with other sources. Any reduced availability of these materials may impact our access to cells and our growth, and any increases in their prices may reduce our profitability if we cannot recoup such costs through increased prices. Moreover, our inability to meet demand and any product price increases may harm our brand, growth, prospects and operating results.

Our future growth and success are dependent upon consumers' demand for electric vehicles and specifically our vehicles in an automotive industry that is generally competitive, cyclical and volatile.

Though we continue to see increased interest and adoption of electric vehicles, if the market for electric vehicles in general and Tesla vehicles in particular does not develop as we expect, develops more slowly than we expect, or if demand for our vehicles decreases in our markets or our vehicles compete with each other, our business, prospects, financial condition and operating results may be harmed.

In addition, electric vehicles still constitute a small percentage of overall vehicle sales. As a result, the market for our vehicles could be negatively affected by numerous factors, such as:

- perceptions about electric vehicle features, quality, safety, performance and cost;
- perceptions about the limited range over which electric vehicles may be driven on a single battery charge, and access to charging facilities;
- competition, including from other types of alternative fuel vehicles, plug-in hybrid electric vehicles and high fuel-economy internal combustion engine vehicles;
- volatility in the cost of oil, gasoline and energy;
- government regulations and economic incentives and conditions; and
- concerns about our future viability.

The target demographics for our vehicles are highly competitive. Sales of vehicles in the automotive industry tend to be cyclical in many markets, which may expose us to further volatility. We also cannot predict the duration or direction of current global trends or their sustained impact on consumer demand. Ultimately, we continue to monitor macroeconomic conditions to remain flexible and to optimize and evolve our business as appropriate, and attempt to accurately project demand and infrastructure requirements globally and deploy our production, workforce and other resources accordingly. Rising interest rates may lead to consumers to increasingly pull back spending, including on our products, which may harm our demand, business and operating results. If we experience unfavorable global market conditions, or if we cannot or do not maintain operations at a scope that is commensurate with such conditions or are later required to or choose to suspend such operations again, our business, prospects, financial condition and operating results may be harmed.

We face strong competition for our products and services from a growing list of established and new competitors.

The worldwide automotive market is highly competitive today and we expect it will become even more so in the future. A significant and growing number of established and new automobile manufacturers, as well as other companies, have entered, or are reported to have plans to enter, the market for electric and other alternative fuel vehicles, including hybrid, plug-in hybrid and fully electric vehicles, as well as the market for self-driving technology and other vehicle applications and software platforms. In some cases, our competitors offer or will offer electric vehicles in important markets such as China and Europe, and/or have announced an intention to produce electric vehicles exclusively at some point in the future. In addition, certain government and economic incentives which provide benefits to manufacturers who assemble domestically or have local suppliers, may provide a greater benefit to our competitors, which could negatively impact our profitability. Many of our competitors have significantly more or better-established resources than we do to devote to the design, development, manufacturing, distribution, promotion, sale and support of their products. Increased competition could result in our lower vehicle unit sales, price reductions, revenue shortfalls, loss of customers and loss of market share, which may harm our business, financial condition and operating results.

We also face competition in our energy generation and storage business from other manufacturers, developers, installers and service providers of competing energy technologies, as well as from large utilities. Decreases in the retail or wholesale prices of electricity from utilities or other renewable energy sources could make our products less attractive to customers and lead to an increased rate of customer defaults.

Risks Related to Our Operations

We may experience issues with lithium-ion cells or other components manufactured at our Gigafactories, which may harm the production and profitability of our vehicle and energy storage products.

Our plan to grow the volume and profitability of our vehicles and energy storage products depends on significant lithium-ion battery cell production, including by our partner Panasonic at Gigafactory Nevada. We also produce several vehicle components at our Gigafactories, such as battery modules and packs and drive units, and manufacture energy storage products. If we are unable to or otherwise do not maintain and grow our respective operations, or if we are unable to do so cost-effectively or hire and retain highly-skilled personnel there, our ability to manufacture our products profitably would be limited, which may harm our business and operating results.

Finally, the high volumes of lithium-ion cells and battery modules and packs manufactured by us and by our suppliers are stored and recycled at our various facilities. Any mishandling of these products may cause disruption to the operation of such facilities. While we have implemented safety procedures related to the handling of the cells, there can be no assurance that a safety issue or fire related to the cells would not disrupt our operations. Any such disruptions or issues may harm our brand and business.

We face risks associated with maintaining and expanding our international operations, including unfavorable and uncertain regulatory, political, economic, tax and labor conditions.

We are subject to legal and regulatory requirements, political uncertainty and social, environmental and economic conditions in numerous jurisdictions, including markets in which we generate significant sales, over which we have little control and which are inherently unpredictable. Our operations in such jurisdictions, particularly as a company based in the U.S., create risks relating to conforming our products to regulatory and safety requirements and charging and other electric infrastructures; organizing local operating entities; establishing, staffing and managing foreign business locations; attracting local customers; navigating foreign government taxes, regulations and permit requirements; enforceability of our contractual rights; trade restrictions, customs regulations, tariffs and price or exchange controls; and preferences in foreign nations for domestically manufactured products. For example, we monitor tax legislation changes on a global basis, including changes arising as a result of the Organization for Economic Cooperation and Development’s multi-jurisdictional plan of action to address base erosion and profit shifting. Such conditions may increase our costs, impact our ability to sell our products and require significant management attention, and may harm our business if we are unable to manage them effectively.

Our business may suffer if our products or features contain defects, fail to perform as expected or take longer than expected to become fully functional.

If our products contain design or manufacturing defects, whether relating to our software or hardware, that cause them not to perform as designed or intended or that require repair, or certain features of our vehicles such as new Autopilot or FSD Capability features take longer than expected to become enabled, are legally restricted or become subject to onerous regulation, our ability to develop, market and sell our products and services may be harmed, and we may experience delivery delays, product recalls, allegations of product liability, breach of warranty and related consumer protection claims and significant warranty and other expenses. While we are continuously working to develop and improve our products’ capability and performance, there is no guarantee that any incremental changes in the specific software or equipment we deploy in our vehicles over time will not result in initial functional disparities from prior iterations or will perform as forecast in the timeframe we anticipate, or at all. Although we attempt to remedy any issues we observe in our products as effectively and rapidly as possible, such efforts may not be timely, may hamper production or may not completely satisfy our customers. We have performed, and continue to perform, extensive internal testing on our products and features, though, like the rest of the industry, we currently have a limited frame of reference by which to evaluate certain aspects of their long-term quality, reliability, durability and performance characteristics, including exposure to or consequence of external attacks. While we attempt to identify and address or remedy defects we identify pre-production and sale, there may be latent defects that we may be unable to detect or control for in our products, and thereby address, prior to their sale to or installation for customers.

We may be required to defend or insure against product liability claims.

The automobile industry generally experiences significant product liability claims, and as such we face the risk of such claims in the event our vehicles do not perform or are claimed to not have performed as expected. As is true for other automakers, our vehicles have been involved and we expect in the future will be involved in accidents resulting in death or personal injury, and such accidents where Autopilot, Enhanced Autopilot or FSD Capability features are engaged are the subject of significant public attention, especially in light of NHTSA’s Standing General Order requiring reports regarding crashes involving vehicles with advanced driver assistance systems. We have experienced, and we expect to continue to face, claims and regulatory scrutiny arising from or related to misuse or claimed failures or alleged misrepresentations of such new technologies that we are pioneering. In addition, the battery packs that we produce make use of lithium-ion cells. On rare occasions, lithium-ion cells can rapidly release the energy they contain by venting smoke and flames in a manner that can ignite nearby materials as well as other lithium-ion cells. While we have designed our battery packs to passively contain any single cell’s release of energy without spreading to neighboring cells, there can be no assurance that a field or testing failure of our vehicles or other battery packs that we produce will not occur, in particular due to a high-speed crash. Likewise, as our solar energy systems and energy storage products generate and store electricity, they have the potential to fail or cause injury to people or property. Any product liability claim may subject us to lawsuits and substantial monetary damages, product recalls or redesign efforts, and even a meritless claim may require us to defend it, all of which may generate negative publicity and be expensive and time-consuming. In most jurisdictions, we generally self-insure against the risk of product liability claims for vehicle exposure, meaning that any product liability claims will likely have to be paid from company funds and not by insurance.

We will need to maintain public credibility and confidence in our long-term business prospects in order to succeed.

In order to maintain and grow our business, we must maintain credibility and confidence among customers, suppliers, analysts, investors, ratings agencies and other parties in our long-term financial viability and business prospects. Maintaining such confidence may be challenging due to our limited operating history relative to established competitors; customer unfamiliarity with our products; any delays we may experience in scaling manufacturing, delivery and service operations to meet demand; competition and uncertainty regarding the future of electric vehicles or our other products and services; our quarterly production and sales performance compared with market expectations; and other factors including those over which we have no control. In particular, Tesla’s products, business, results of operations, and statements and actions of Tesla and its management are subject to significant amounts of commentary by a range of third parties. Such attention can include criticism, which may be exaggerated or unfounded, such as speculation regarding the sufficiency or stability of our management team. Any such negative perceptions, whether caused by us or not, may harm our business and make it more difficult to raise additional funds if needed.

We may be unable to effectively grow, or manage the compliance, residual value, financing and credit risks related to, our various financing programs.

We offer financing arrangements for our vehicles in North America, Europe and Asia primarily ourselves and through various financial institutions. We also currently offer vehicle financing arrangements directly through our local subsidiaries in certain markets. Depending on the country, such arrangements are available for specified models and may include operating leases directly with us under which we typically receive only a very small portion of the total vehicle purchase price at the time of lease, followed by a stream of payments over the term of the lease. We have also offered various arrangements for customers of our solar energy systems whereby they pay us a fixed payment to lease or finance the purchase of such systems or purchase electricity generated by them. If we do not successfully monitor and comply with applicable national, state and/or local financial regulations and consumer protection laws governing these transactions, we may become subject to enforcement actions or penalties.

The profitability of any directly-leased vehicles returned to us at the end of their leases depends on our ability to accurately project our vehicles’ residual values at the outset of the leases, and such values may fluctuate prior to the end of their terms depending on various factors such as supply and demand of our used vehicles, economic cycles and the pricing of new vehicles. We have made in the past and may make in the future certain adjustments to our prices from time to time in the ordinary course of business, which may impact the residual values of our vehicles and reduce the profitability of our vehicle leasing program. The funding and growth of this program also rely on our ability to secure adequate financing and/or business partners. If we are unable to adequately fund our leasing program through internal funds, partners or other financing sources, and compelling alternative financing programs are not available for our customers who may expect or need such options, we may be unable to grow our vehicle deliveries. Furthermore, if our vehicle leasing business grows substantially, our business may suffer if we cannot effectively manage the resulting greater levels of residual risk.

Similarly, we have provided resale value guarantees to vehicle customers and partners for certain financing programs, under which such counterparties may sell their vehicles back to us at certain points in time at pre-determined amounts. However, actual resale values are subject to fluctuations over the term of the financing arrangements, such as from the vehicle pricing changes discussed above. If the actual resale values of any vehicles resold or returned to us pursuant to these programs are materially lower than the pre-determined amounts we have offered, our financial condition and operating results may be harmed.

Finally, our vehicle and solar energy system financing programs and our energy storage sales programs also expose us to customer credit risk. In the event of a widespread economic downturn or other catastrophic event, our customers may be unable or unwilling to satisfy their payment obligations to us on a timely basis or at all. If a significant number of our customers default, we may incur substantial credit losses and/or impairment charges with respect to the underlying assets.

We must manage ongoing obligations under our agreement with the Research Foundation for the State University of New York relating to our Gigafactory New York.

We are party to an operating lease and a research and development agreement through the State University of New York (the “SUNY Foundation”). These agreements provide for the construction and use of our Gigafactory New York, which we have primarily used for the development and production of our Solar Roof and other solar products and components, energy storage components and Supercharger components, and for other lessor-approved functions. Under this agreement, we are obligated to, among other things, meet employment targets as well as specified minimum numbers of personnel in the State of New York and in Buffalo, New York and spend or incur $5.00 billion in combined capital, operational expenses, costs of goods sold and other costs in the State of New York during a period that was initially 10 years beginning April 30, 2018. As of December 31, 2023, we are currently in excess of such targets relating to investments and personnel in the State of New York and Buffalo. While we expect to have and grow significant operations at Gigafactory New York and the surrounding Buffalo area, any failure by us in any year over the course of the term of the agreement to meet all applicable future obligations may result in our obligation to pay a “program payment” of $41 million to the SUNY Foundation for such year, the termination of our lease at Gigafactory New York which may require us to pay additional penalties, and/or the need to adjust certain of our operations. Any of the foregoing events may harm our business, financial condition and operating results.

If we are unable to attract, hire and retain key employees and qualified personnel, our ability to compete may be harmed.

The loss of the services of any of our key employees or any significant portion of our workforce could disrupt our operations or delay the development, introduction and ramp of our products and services. In particular, we are highly dependent on the services of Elon Musk, Technoking of Tesla and our Chief Executive Officer. None of our key employees is bound by an employment agreement for any specific term and we may not be able to successfully attract and retain senior leadership necessary to grow our business. Our future success also depends upon our ability to attract, hire and retain a large number of engineering, manufacturing, marketing, sales and delivery, service, installation, technology and support personnel, especially to support our planned high-volume product sales, market and geographical expansion and technological innovations. If we are not successful in managing these risks, our business, financial condition and operating results may be harmed.

Employees may leave Tesla or choose other employers over Tesla due to various factors, such as a very competitive labor market for talented individuals with automotive or technology experience, or any negative publicity related to us. In regions where we have or will have operations, particularly significant engineering and manufacturing centers, there is strong competition for individuals with skillsets needed for our business, including specialized knowledge of electric vehicles, engineering and electrical and building construction expertise. We also compete with both mature and prosperous companies that have far greater financial resources than we do and start-ups and emerging companies that promise short-term growth opportunities.

Finally, our compensation philosophy for all of our personnel reflects our startup origins, with an emphasis on equity-based awards and benefits in order to closely align their incentives with the long-term interests of our stockholders. We periodically seek and obtain approval from our stockholders for future increases to the number of awards available under our equity incentive and employee stock purchase plans. If we are unable to obtain the requisite stockholder approvals for such future increases, we may have to expend additional cash to compensate our employees and our ability to retain and hire qualified personnel may be harmed.

We are highly dependent on the services of Elon Musk, Technoking of Tesla and our Chief Executive Officer.

We are highly dependent on the services of Elon Musk, Technoking of Tesla and our Chief Executive Officer. Although Mr. Musk spends significant time with Tesla and is highly active in our management, he does not devote his full time and attention to Tesla. Mr. Musk also currently serves as Chief Executive Officer and Chief Technical Officer of Space Exploration Technologies Corp., a developer and manufacturer of space launch vehicles, Chairman and Chief Technical Officer of X Corp., a social media company, and is involved in other emerging technology ventures.

Our information technology systems or data, or those of our service providers or customers or users could be subject to cyber-attacks or other security incidents, which could result in data breaches, intellectual property theft, claims, litigation, regulatory investigations, significant liability, reputational damage and other adverse consequences.

We continue to expand our information technology systems as our operations grow, such as product data management, procurement, inventory management, production planning and execution, sales, service and logistics, dealer management, financial, tax and regulatory compliance systems. This includes the implementation of new internally developed systems and the deployment of such systems in the U.S. and abroad. While, we maintain information technology measures designed to protect us against intellectual property theft, data breaches, sabotage and other external or internal cyber-attacks or misappropriation, our systems and those of our service providers are potentially vulnerable to malware, ransomware, viruses, denial-of-service attacks, phishing attacks, social engineering, computer hacking, unauthorized access, exploitation of bugs, defects and vulnerabilities, breakdowns, damage, interruptions, system malfunctions, power outages, terrorism, acts of vandalism, security breaches, security incidents, inadvertent or intentional actions by employees or other third parties, and other cyber-attacks.

To the extent any security incident results in unauthorized access or damage to or acquisition, use, corruption, loss, destruction, alteration or dissemination of our data, including intellectual property and personal information, or our products or vehicles, or for it to be believed or reported that any of these occurred, it could disrupt our business, harm our reputation, compel us to comply with applicable data breach notification laws, subject us to time consuming, distracting and expensive litigation, regulatory investigation and oversight, mandatory corrective action, require us to verify the correctness of database contents, or otherwise subject us to liability under laws, regulations and contractual obligations, including those that protect the privacy and security of personal information. This could result in increased costs to us and result in significant legal and financial exposure and/or reputational harm.

We also rely on service providers, and similar incidents relating to their information technology systems could also have a material adverse effect on our business. There have been and may continue to be significant supply chain attacks. Our service providers, including our workforce management software provider, have been subject to ransomware and other security incidents, and we cannot guarantee that our or our service providers' systems have not been breached or that they do not contain exploitable defects, bugs, or vulnerabilities that could result in a security incident, or other disruption to, our or our service providers' systems. Our ability to monitor our service providers' security measures is limited, and, in any event, malicious third parties may be able to circumvent those security measures.

Further, the implementation, maintenance, segregation and improvement of these systems require significant management time, support and cost, and there are inherent risks associated with developing, improving and expanding our core systems as well as implementing new systems and updating current systems, including disruptions to the related areas of business operation. These risks may affect our ability to manage our data and inventory, procure parts or supplies or manufacture, sell, deliver and service products, adequately protect our intellectual property or achieve and maintain compliance with, or realize available benefits under, tax laws and other applicable regulations.

Moreover, if we do not successfully implement, maintain or expand these systems as planned, our operations may be disrupted, our ability to accurately and/or timely report our financial results could be impaired and deficiencies may arise in our internal control over financial reporting, which may impact our ability to certify our financial results. Moreover, our proprietary information, including intellectual property and personal information, could be compromised or misappropriated and our reputation may be adversely affected. If these systems or their functionality do not operate as we expect them to, we may be required to expend significant resources to make corrections or find alternative sources for performing these functions.

Any unauthorized control or manipulation of our products' systems could result in loss of confidence in us and our products.

Our products contain complex information technology systems. For example, our vehicles and energy storage products are designed with built-in data connectivity to accept and install periodic remote updates from us to improve or update their functionality. While we have implemented security measures intended to prevent unauthorized access to our information technology networks, our products and their systems, malicious entities have reportedly attempted, and may attempt in the future, to gain unauthorized access to modify, alter and use such networks, products and systems to gain control of, or to change, our products' functionality, user interface and performance characteristics or to gain access to data stored in or generated by our products. We encourage reporting of potential vulnerabilities in the security of our products through our security vulnerability reporting policy, and we aim to remedy any reported and verified vulnerability. However, there can be no assurance that any vulnerabilities will not be exploited before they can be identified, or that our remediation efforts are or will be successful.

Any unauthorized access to or control of our products or their systems or any loss of data could result in legal claims or government investigations. In addition, regardless of their veracity, reports of unauthorized access to our products, their systems or data, as well as other factors that may result in the perception that our products, their systems or data are capable of being hacked, may harm our brand, prospects and operating results. We have been the subject of such reports in the past.

Our business may be adversely affected by any disruptions caused by union activities.

It is not uncommon for employees of certain trades at companies such as ours to belong to a union, which can result in higher employee costs and increased risk of work stoppages. Moreover, regulations in some jurisdictions outside of the U.S. mandate employee participation in industrial collective bargaining agreements and work councils with certain consultation rights with respect to the relevant companies' operations. Although we work diligently to provide the best possible work environment for our employees, they may still decide to join or seek recognition to form a labor union, or we may be required to become a union signatory. From time to time, labor unions have engaged in campaigns to organize certain of our operations, as part of which such unions have filed unfair labor practice charges against us with the National Labor Relations Board (the "NLRB"), and they may do so in the future. Any unfavorable ultimate outcome for Tesla may have a negative impact on the perception of Tesla's treatment of our employees. Furthermore, we are directly or indirectly dependent upon companies with unionized work forces, such as suppliers and trucking and freight companies. Any work stoppages or strikes organized by such unions could delay the manufacture and sale of our products and may harm our business and operating results.

We may choose to or be compelled to undertake product recalls or take other similar actions.

As a manufacturing company, we must manage the risk of product recalls with respect to our products. Recalls for our vehicles have resulted from various hardware and software-related safety concerns or non-compliance determinations. In addition to recalls initiated by us for various causes, testing of or investigations into our products by government regulators or industry groups may compel us to initiate product recalls or may result in negative public perceptions about the safety of our products, even if we disagree with the defect determination or have data that contradicts it. In the future, we may voluntarily or involuntarily initiate recalls if any of our products are determined by us or a regulator to contain a safety defect or be noncompliant with applicable laws and regulations, such as U.S. Federal Motor Vehicle Safety Standards. Such recalls, whether voluntary or involuntary or caused by systems or components engineered or manufactured by us or our suppliers, could result in significant expense, supply chain complications and service burdens, and may harm our brand, business, prospects, financial condition and operating results.

Our current and future warranty reserves may be insufficient to cover future warranty claims.

We provide a manufacturer's warranty on all new and used Tesla vehicles we sell directly to customers. We also provide certain warranties with respect to the energy generation and storage systems we sell, including on their installation and maintenance. For components not manufactured by us, we generally pass through to our customers the applicable manufacturers' warranties, but may retain some warranty responsibilities for some or all of the life of such components. As part of our energy generation and storage system contracts, we may provide the customer with performance guarantees that guarantee that the underlying system will meet or exceed the minimum energy generation or other energy performance requirements specified in the contract. Under these performance guarantees, we generally bear the risk of electricity production or other performance shortfalls, including in some cases shortfalls caused by failures in components from third party manufacturers. These risks are exacerbated in the event such manufacturers cease operations or fail to honor their warranties.

If our warranty reserves are inadequate to cover future warranty claims on our products, our financial condition and operating results may be harmed. Warranty reserves include our management’s best estimates of the projected costs to repair or to replace items under warranty, which are based on actual claims incurred to date and an estimate of the nature, frequency and costs of future claims. Such estimates are inherently uncertain and changes to our historical or projected experience, especially with respect to products that we have introduced relatively recently and/or that we expect to produce at significantly greater volumes than our past products, may cause material changes to our warranty reserves in the future.

Our insurance coverage strategy may not be adequate to protect us from all business risks.

We may be subject, in the ordinary course of business, to losses resulting from products liability, accidents, acts of God and other claims against us, for which we may have no insurance coverage. As a general matter, we do not maintain as much insurance coverage as many other companies do, and in some cases, we do not maintain any at all. Additionally, the policies that we do have may include significant deductibles or self-insured retentions, policy limitations and exclusions, and we cannot be certain that our insurance coverage will be sufficient to cover all future losses or claims against us. A loss that is uninsured or which exceeds policy limits may require us to pay substantial amounts, which may harm our financial condition and operating results.

Our debt agreements contain covenant restrictions that may limit our ability to operate our business.

The terms of certain of our debt facilities contain, and any of our other future debt agreements may contain, covenant restrictions that may limit our ability to operate our business, including restrictions on our and/or our subsidiaries’ ability to, among other things, incur additional debt or create liens. In addition, under certain circumstances we are required to maintain a certain amount of liquidity. As a result of these covenants, our ability to respond to changes in business and economic conditions and engage in beneficial transactions, including to obtain additional financing as needed, may be restricted. Furthermore, our failure to comply with our debt covenants could result in a default under our debt agreements, which could permit the holders to accelerate our obligation to repay the debt. If any of our debt is accelerated, we may not have sufficient funds available to repay it.

Additional funds may not be available to us when we need or want them.

Our business and our future plans for expansion are capital-intensive, and the specific timing of cash inflows and outflows may fluctuate substantially from period to period. We may need or want to raise additional funds through the issuance of equity, equity-related or debt securities or through obtaining credit from financial institutions to fund, together with our principal sources of liquidity, the costs of developing and manufacturing our current or future products, to pay any significant unplanned or accelerated expenses or for new significant strategic investments, or to refinance our significant consolidated indebtedness, even if not required to do so by the terms of such indebtedness. We cannot be certain that additional funds will be available to us on favorable terms when required, or at all. If we cannot raise additional funds when we need them, our financial condition, results of operations, business and prospects could be materially and adversely affected.

We may be negatively impacted by any early obsolescence of our manufacturing equipment.

We depreciate the cost of our manufacturing equipment over their expected useful lives. However, product cycles or manufacturing technology may change periodically, and we may decide to update our products or manufacturing processes more quickly than expected. Moreover, improvements in engineering and manufacturing expertise and efficiency may result in our ability to manufacture our products using less of our currently installed equipment. Alternatively, as we ramp and mature the production of our products to higher levels, we may discontinue the use of already installed equipment in favor of different or additional equipment. The useful life of any equipment that would be retired early as a result would be shortened, causing the depreciation on such equipment to be accelerated, and our results of operations may be harmed.

There is no guarantee that we will have sufficient cash flow from our business to pay our indebtedness or that we will not incur additional indebtedness.

As of December 31, 2023, we and our subsidiaries had outstanding $4.68 billion in aggregate principal amount of indebtedness (see Note 11, *Debt*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K). Our consolidated indebtedness may increase our vulnerability to any generally adverse economic and industry conditions. We and our subsidiaries may, subject to the limitations in the terms of our existing and future indebtedness, incur additional debt, secure existing or future debt or recapitalize our debt.

Our ability to make scheduled payments of the principal and interest on our indebtedness when due, to make payments upon conversion or repurchase demands with respect to our convertible senior notes or to refinance our indebtedness as we may need or desire, depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not continue to generate cash flow from operations in the future sufficient to satisfy our obligations under our existing indebtedness and any future indebtedness we may incur, and to make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as reducing or delaying investments or capital expenditures, selling assets, refinancing or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance existing or future indebtedness will depend on the capital markets and our financial condition at such time. In addition, our ability to make payments may be limited by law, by regulatory authority or by agreements governing our future indebtedness. We may not be able to engage in these activities on desirable terms or at all, which may result in a default on our existing or future indebtedness and harm our financial condition and operating results.

We are exposed to fluctuations in currency exchange rates.

We transact business globally in multiple currencies and have foreign currency risks related to our revenue, costs of revenue, operating expenses and localized subsidiary debt denominated in currencies other than the U.S. dollar. To the extent we have significant revenues denominated in such foreign currencies, any strengthening of the U.S. dollar would tend to reduce our revenues as measured in U.S. dollars, as we have historically experienced, and are currently experiencing. In addition, a portion of our costs and expenses have been, and we anticipate will continue to be, denominated in foreign currencies. If we do not have fully offsetting revenues in these currencies and if the value of the U.S. dollar depreciates significantly against these currencies, our costs as measured in U.S. dollars as a percent of our revenues will correspondingly increase and our margins will suffer. As a result, our operating results may be harmed.

We may not be able to adequately protect or defend ourselves against intellectual property infringement claims, which may be time-consuming and expensive, or affect the freedom to operate our business.

Our competitors or other third parties may hold or obtain patents, copyrights, trademarks or other proprietary rights that could prevent, limit or interfere with our ability to make, use, develop, sell or market our products and services, which could make it more difficult for us to operate our business. From time to time, the holders of such intellectual property rights may assert their rights and urge us to take licenses and/or may bring suits alleging infringement or misappropriation of such rights, which could result in substantial costs, negative publicity and management attention, regardless of merit.

In addition, the effective protection for our brands, technologies, and proprietary information may be limited or unavailable in certain countries, making it difficult to protect our intellectual property from misappropriation or infringement. Although we make reasonable efforts to maintain the confidentiality of our proprietary information, we cannot guarantee that these actions will deter or prevent misappropriation of our intellectual property. The theft or unauthorized use or publication of our trade secrets and confidential information could affect our competitive position.

While we endeavor to obtain and protect the intellectual property rights that we expect will allow us to retain or advance our strategic initiatives in these circumstances, there can be no assurance that we will be able to adequately identify and protect the portions of intellectual property that are strategic to our business, or mitigate the risk of potential suits or other legal demands by third parties. Accordingly, we may consider the entering into licensing agreements with respect to such rights, although no assurance can be given that such licenses can be obtained on acceptable terms or that litigation will not occur, and such licenses and associated litigation could significantly increase our operating expenses. Further, if we are determined to have or believe there is a high likelihood that we have infringed upon a third party’s intellectual property rights, we may be required to cease making, selling or incorporating certain components or intellectual property into the goods and services we offer, to pay substantial damages and/or license royalties, to redesign our products and services and/or to establish and maintain alternative branding for our products and services. In the event that we are required to take one or more such actions, our brand, business, financial condition and operating results may be harmed.

Increased scrutiny and changing expectations from stakeholders with respect to the Company’s ESG practices may result in additional costs or risks.

Companies across many industries are facing increasing scrutiny related to their environmental, social and governance (ESG) practices. Investor advocacy groups, certain institutional investors, investment funds and other influential investors are also increasingly focused on ESG practices and in recent years have placed increasing importance on the non-financial impacts of their investments. While our mission is to accelerate the world’s transition to sustainable energy, if our ESG practices do not meet investor or other industry stakeholder expectations, which continue to evolve, we may incur additional costs and our brand, ability to attract and retain qualified employees and business may be harmed.

Our operations could be adversely affected by events outside of our control, such as natural disasters, wars or health epidemics.

We may be impacted by natural disasters, wars, health epidemics, weather conditions, the long-term effects of climate change, power outages or other events outside of our control. For example, our Fremont Factory and Gigafactory Nevada are located in seismically active regions in Northern California and Nevada, and our Gigafactory Shanghai is located in a flood-prone area. Moreover, the area in which our Gigafactory Texas is located experienced severe winter storms in the first quarter of 2021 that had a widespread impact on utilities and transportation. If major disasters such as earthquakes, floods or other climate-related events occur, or our information system or communication breaks down or operates improperly, our headquarters and production facilities may be seriously damaged, or we may have to stop or delay production and shipment of our products. In addition, the global COVID-19 pandemic has impacted economic markets, manufacturing operations, supply chains, employment and consumer behavior in nearly every geographic region and industry across the world, and we have been, and may in the future be, adversely affected as a result. Also, the broader consequences in the current conflict between Russia and Ukraine, which may include further embargoes, regional instability and geopolitical shifts; airspace bans relating to certain routes, or strategic decisions to alter certain routes; and potential retaliatory action by the Russian government against companies, and the extent of the conflict on our business and operating results cannot be predicted. We may incur expenses or delays relating to such events outside of our control, which could have a material adverse impact on our business, operating results and financial condition.

Risks Related to Government Laws and Regulations

Demand for our products and services may be impacted by the status of government and economic incentives supporting the development and adoption of such products.

Government and economic incentives that support the development and adoption of electric vehicles in the U.S. and abroad, including certain tax exemptions, tax credits and rebates, may be reduced, eliminated, amended or exhausted from time to time. For example, previously available incentives favoring electric vehicles in certain areas have expired or were cancelled or temporarily unavailable, and in some cases were not eventually replaced or reinstituted, which may have negatively impacted sales. In addition, certain government and economic incentives may also be implemented or amended to provide benefits to manufacturers who assemble domestically, have local suppliers or have other characteristics that may not apply to Tesla. Such developments could negatively impact demand for our vehicles, and we and our customers may have to adjust to them, including through pricing modifications.

In addition, certain governmental rebates, tax credits and other financial incentives that are currently available with respect to our solar and energy storage product businesses allow us to lower our costs and encourage customers to buy our products and investors to invest in our solar financing funds. However, these incentives may expire when the allocated funding is exhausted, reduced or terminated as renewable energy adoption rates increase, sometimes without warning. Likewise, in jurisdictions where net metering is currently available, our customers receive bill credits from utilities for energy that their solar energy systems generate and export to the grid in excess of the electric load they use. The benefit available under net metering has been or has been proposed to be reduced, altered or eliminated in several jurisdictions, and has also been contested and may continue to be contested before the Federal Energy Regulatory Commission. Any reductions or terminations of such incentives may harm our business, prospects, financial condition and operating results by making our products less competitive for customers, increasing our cost of capital and adversely impacting our ability to attract investment partners and to form new financing funds for our solar and energy storage assets.

Finally, we and our fund investors claim these U.S. federal tax credits and certain state incentives in amounts based on independently appraised fair market values of our solar and energy storage systems. Some governmental authorities have audited such values and in certain cases have determined that these values should be lower, and they may do so again in the future. Such determinations may result in adverse tax consequences and/or our obligation to make indemnification or other payments to our funds or fund investors.

We are subject to evolving laws and regulations that could impose substantial costs, legal prohibitions or unfavorable changes upon our operations or products.

As we grow our manufacturing operations in additional regions, we are or will be subject to complex environmental, manufacturing, health and safety laws and regulations at numerous jurisdictional levels in the U.S., China, Germany and other locations abroad, including laws relating to the use, handling, storage, recycling, disposal and/or human exposure to hazardous materials, product material inputs and post-consumer products and with respect to constructing, expanding and maintaining our facilities. New, or changes in, environmental and climate change laws, regulations or rules could also lead to increased costs of compliance, including remediations of any discovered issues, and changes to our operations, which may be significant, and any failures to comply could result in significant expenses, delays or fines. In addition, as we have increased our employee headcount and operations, we are and may continue to be subject to increased scrutiny, including litigation and government investigations, that we will need to defend against. If we are unable to successfully defend ourselves in such litigation or government investigations, it may harm our brand, ability to attract and retain qualified employees, business and financial condition. We are also subject to laws and regulations applicable to the supply, manufacture, import, sale, service and performance of our products both domestically and abroad. For example, in countries outside of the U.S., we are required to meet standards relating to vehicle safety, fuel economy and emissions that are often materially different from equivalent requirements in the U.S., thus resulting in additional investment into the vehicles and systems to ensure regulatory compliance in all countries. This process may include official review and certification of our vehicles by foreign regulatory agencies prior to market entry, as well as compliance with foreign reporting and recall management systems requirements.

In particular, we offer in our vehicles in certain markets Autopilot and FSD Capability features that today assist drivers with certain tedious and potentially dangerous aspects of road travel, but which currently require drivers to remain fully engaged in the driving operation. We are continuing to develop our Autopilot and FSD Capability technology. There are a variety of international, federal and state regulations that may apply to, and may adversely affect, the design and performance, sale, marketing, registration and operation of Autopilot and FSD Capability, and future capability, including full self-driving vehicles that may not be operated by a human driver. This includes many existing vehicle standards that were not originally intended to apply to vehicles that may not be operated by a human driver. Such regulations continue to rapidly change, which increases the likelihood of a patchwork of complex or conflicting regulations, or may delay, restrict or prohibit the availability of certain functionalities and vehicle designs, which could adversely affect our business.

Finally, as a manufacturer, installer and service provider with respect to solar generation and energy storage systems, a supplier of electricity generated and stored by certain of the solar energy and energy storage systems we install for customers, and a provider of grid services through virtual power plant models, we are impacted by federal, state and local regulations and policies concerning the import or export of components, electricity pricing, the interconnection of electricity generation and storage equipment with the electrical grid and the sale of electricity generated by third party-owned systems. If regulations and policies are introduced that adversely impact the import or export of components, or the interconnection, maintenance or use of our solar and energy storage systems, they could deter potential customers from purchasing our solar and energy storage products and services, threaten the economics of our existing contracts and cause us to cease solar and energy storage system sales and services in the relevant jurisdictions, which may harm our business, financial condition and operating results.

Any failure by us to comply with a variety of U.S. and international privacy and consumer protection laws may harm us.

Any failure by us or our vendors or other business partners to comply with our public privacy notice or with federal, state or international privacy, data protection or security laws or regulations relating to the processing, collection, use, retention, security and transfer of personally identifiable information could result in regulatory or litigation-related actions against us, legal liability, fines, damages, ongoing audit requirements and other significant costs. Substantial expenses and operational changes may be required in connection with maintaining compliance with such laws, and even an unsuccessful challenge by customers or regulatory authorities of our activities could result in adverse publicity and could require a costly response from and defense by us. In addition, certain privacy laws are still subject to a high degree of uncertainty as to their interpretation, application and impact, and may require extensive system and operational changes, be difficult to implement, increase our operating costs, adversely impact the cost or attractiveness of the products or services we offer, or result in adverse publicity and harm our reputation. For example, the General Data Protection Regulation applies to the processing of personal information collected from individuals located in the European Union requiring certain data protection measures when handling, with a significant risk of fines for noncompliance. Similarly, our North American operations are subject to complex and changing federal and US state-specific data privacy laws and regulations, such as the California Consumer Privacy Act which imposes certain legal obligations on our use and processing of personal information related to California residents. Finally, additional privacy and cybersecurity laws have come into effect in China.

These laws continue to develop and may be inconsistent from jurisdiction to jurisdiction. Complying with emerging and changing requirements may cause us to incur substantial costs and make enhancements to relevant data practices. Noncompliance could result in significant penalties or legal liability.

In addition to the risks related to general privacy regulation, we may also be subject to specific vehicle manufacturer obligations relating to cybersecurity, data privacy and data localization requirements which place additional risks to our international operations. Risks and penalties could include ongoing audit requirements, data protection authority investigations, legal proceedings by international governmental entities or others resulting in mandated disclosure of sensitive data or other commercially unfavorable terms. Notwithstanding our efforts to protect the security and integrity of our customers' personal information, we may be required to expend significant resources to comply with data breach requirements if, for example, third parties improperly obtain and use the personal information of our customers or we otherwise experience a data loss with respect to the personal information we process and handle. A major breach of our network security and systems may occur despite defensive measures, and may result in fines, penalties and damages and harm our brand, prospects and operating results.

We could be subject to liability, penalties and other restrictive sanctions and adverse consequences arising out of certain governmental investigations and proceedings.

We are cooperating with certain government investigations as discussed in Note 15, *Commitments and Contingencies*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K. To our knowledge, no government agency in any such ongoing investigation has concluded that any wrongdoing occurred. However, we cannot predict the outcome or impact of any such ongoing matters, and there exists the possibility that we could be subject to liability, penalties and other restrictive sanctions and adverse consequences if the SEC, the U.S. Department of Justice or any other government agency were to pursue legal action in the future. Moreover, we expect to incur costs in responding to related requests for information and subpoenas, and if instituted, in defending against any governmental proceedings.

We may face regulatory challenges to or limitations on our ability to sell vehicles directly.

While we intend to continue to leverage our most effective sales strategies, including sales through our website, we may not be able to sell our vehicles through our own stores in certain states in the U.S. with laws that may be interpreted to impose limitations on this direct-to-consumer sales model. It has also been asserted that the laws in some states limit our ability to obtain dealer licenses from state motor vehicle regulators, and such assertions persist. In certain locations, decisions by regulators permitting us to sell vehicles have been, and may be, challenged by dealer associations and others as to whether such decisions comply with applicable state motor vehicle industry laws. We have prevailed in many of these lawsuits and such results have reinforced our continuing belief that state franchise laws were not intended to apply to a manufacturer that does not have franchise dealers anywhere in the world. In some states, there have also been regulatory and legislative efforts by dealer associations to propose laws that, if enacted, would prevent us from obtaining dealer licenses in their states given our current sales model. A few states have passed legislation that clarifies our ability to operate, but at the same time limits the number of dealer licenses we can obtain or stores that we can operate. The application of state laws applicable to our operations continues to be difficult to predict.

Internationally, there may be laws in jurisdictions we have not yet entered or laws we are unaware of in jurisdictions we have entered that may restrict our sales or other business practices. Even for those jurisdictions we have analyzed, the laws in this area can be complex, difficult to interpret and may change over time. Continued regulatory limitations and other obstacles interfering with our ability to sell vehicles directly to consumers may harm our financial condition and operating results.

Risks Related to the Ownership of Our Common Stock

The trading price of our common stock is likely to continue to be volatile.

The trading price of our common stock has been highly volatile and could continue to be subject to wide fluctuations in response to various factors, some of which are beyond our control. Our common stock has experienced over the last 52 weeks an intra-day trading high of $299.29 per share and a low of $152.37 per share. The stock market in general, and the market for technology companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. In particular, a large proportion of our common stock has been historically and may in the future be traded by short sellers which may put pressure on the supply and demand for our common stock, further influencing volatility in its market price. Public perception of our company or management and other factors outside of our control may additionally impact the stock price of companies like us that garner a disproportionate degree of public attention, regardless of actual operating performance. In addition, in the past, following periods of volatility in the overall market or the market price of our shares, securities class action litigation has been filed against us. While we defend such actions vigorously, any judgment against us or any future stockholder litigation could result in substantial costs and a diversion of our management's attention and resources.

Our financial results may vary significantly from period to period due to fluctuations in our operating costs and other factors.

We expect our period-to-period financial results to vary based on our operating costs, which we anticipate will fluctuate as the pace at which we continue to design, develop and manufacture new products and increase production capacity by expanding our current manufacturing facilities and adding future facilities, may not be consistent or linear between periods. Additionally, our revenues from period to period may fluctuate as we introduce existing products to new markets for the first time and as we develop and introduce new products. As a result of these factors, we believe that quarter-to-quarter comparisons of our financial results, especially in the short term, are not necessarily meaningful and that these comparisons cannot be relied upon as indicators of future performance. Moreover, our financial results may not meet expectations of equity research analysts, ratings agencies or investors, who may be focused only on short-term quarterly financial results. If any of this occurs, the trading price of our stock could fall substantially, either suddenly or over time.

We may fail to meet our publicly announced guidance or other expectations about our business, which could cause our stock price to decline.

We provide from time to time guidance regarding our expected financial and business performance. Correctly identifying key factors affecting business conditions and predicting future events is inherently an uncertain process, and our guidance may not ultimately be accurate and has in the past been inaccurate in certain respects, such as the timing of new product manufacturing ramps. Our guidance is based on certain assumptions such as those relating to anticipated production and sales volumes (which generally are not linear throughout a given period), average sales prices, supplier and commodity costs and planned cost reductions. If our guidance varies from actual results, such as due to our assumptions not being met or the impact on our financial performance that could occur as a result of various risks and uncertainties, the market value of our common stock could decline significantly.

If Elon Musk were forced to sell shares of our common stock, either that he has pledged to secure certain personal loan obligations, or in satisfaction of other obligations, such sales could cause our stock price to decline.

Certain banking institutions have made extensions of credit to Elon Musk, our Chief Executive Officer, a portion of which was used to purchase shares of common stock in certain of our public offerings and private placements at the same prices offered to third-party participants in such offerings and placements. We are not a party to these loans, which are partially secured by pledges of a portion of the Tesla common stock currently owned by Mr. Musk. If the price of our common stock were to decline substantially, Mr. Musk may be forced by one or more of the banking institutions to sell shares of Tesla common stock to satisfy his loan obligations if he could not do so through other means. Any such sales could cause the price of our common stock to decline further. Further, Mr. Musk from time to time may commit to investing in significant business or other ventures, and as a result, be required to sell shares of our common stock in satisfaction of such commitments.

Anti-takeover provisions contained in our governing documents, applicable laws and our convertible senior notes could impair a takeover attempt.

Our certificate of incorporation and bylaws afford certain rights and powers to our board of directors that may facilitate the delay or prevention of an acquisition that it deems undesirable. We are also subject to Section 203 of the Delaware General Corporation Law and other provisions of Delaware law that limit the ability of stockholders in certain situations to effect certain business combinations. In addition, the terms of our convertible senior notes may require us to repurchase such notes in the event of a fundamental change, including a takeover of our company. Any of the foregoing provisions and terms that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

Cybersecurity Risk Management and Strategy

We recognize the importance of assessing, identifying, and managing material risks associated with cybersecurity threats, as such term is defined in Item 106(a) of Regulation S-K. These risks include, among other things: operational risks, intellectual property theft, fraud, extortion, harm to employees or customers and violation of data privacy or security laws.

Identifying and assessing cybersecurity risk is integrated into our overall risk management systems and processes. Cybersecurity risks related to our business, technical operations, privacy and compliance issues are identified and addressed through a multi-faceted approach including third party assessments, internal IT Audit, IT security, governance, risk and compliance reviews. To defend, detect and respond to cybersecurity incidents, we, among other things: conduct proactive privacy and cybersecurity reviews of systems and applications, audit applicable data policies, perform penetration testing using external third-party tools and techniques to test security controls, operate a bug bounty program to encourage proactive vulnerability reporting, conduct employee training, monitor emerging laws and regulations related to data protection and information security (including our consumer products) and implement appropriate changes.

We have implemented incident response and breach management processes which have four overarching and interconnected stages: 1) preparation for a cybersecurity incident, 2) detection and analysis of a security incident, 3) containment, eradication and recovery, and 4) post-incident analysis. Such incident responses are overseen by leaders from our Information Security, Product Security, Compliance and Legal teams regarding matters of cybersecurity.

Security events and data incidents are evaluated, ranked by severity and prioritized for response and remediation. Incidents are evaluated to determine materiality as well as operational and business impact, and reviewed for privacy impact.

We also conduct tabletop exercises to simulate responses to cybersecurity incidents. Our team of cybersecurity professionals then collaborate with technical and business stakeholders across our business units to further analyze the risk to the company, and form detection, mitigation and remediation strategies.

As part of the above processes, we regularly engage external auditors and consultants to assess our internal cybersecurity programs and compliance with applicable practices and standards. As of 2023, our Information Security Management System has been certified to conform to the requirements of ISO/IEC 27001:2013.

Our risk management program also assesses third party risks, and we perform third-party risk management to identify and mitigate risks from third parties such as vendors, suppliers, and other business partners associated with our use of third-party service providers. Cybersecurity risks are evaluated when determining the selection and oversight of applicable third-party service providers and potential fourth-party risks when handling and/or processing our employee, business or customer data. In addition to new vendor onboarding, we perform risk management during third-party cybersecurity compromise incidents to identify and mitigate risks to us from third-party incidents.

We describe whether and how risks from identified cybersecurity threats, including as a result of any previous cybersecurity incidents, have materially affected or are reasonably likely to materially affect us, including our business strategy, results of operations, or financial condition, under the heading “Our information technology systems or data, or those of our service providers or customers or users could be subject to cyber-attacks or other security incidents, which could result in data breaches, intellectual property theft, claims, litigation, regulatory investigations, significant liability, reputational damage and other adverse consequences” included as part of our risk factor disclosures at Item 1A of this Annual Report on Form 10-K.

Cybersecurity Governance

Cybersecurity is an important part of our risk management processes and an area of focus for our Board and management. Our Audit Committee is responsible for the oversight of risks from cybersecurity threats. Members of the Audit Committee receive updates on a quarterly basis from senior management, including leaders from our Information Security, Product Security, Compliance and Legal teams regarding matters of cybersecurity. This includes existing and new cybersecurity risks, status on how management is addressing and/or mitigating those risks, cybersecurity and data privacy incidents (if any) and status on key information security initiatives. Our Board members also engage in ad hoc conversations with management on cybersecurity-related news events and discuss any updates to our cybersecurity risk management and strategy programs.

Our cybersecurity risk management and strategy processes are overseen by leaders from our Information Security, Product Security, Compliance and Legal teams. Such individuals have an average of over 15 years of prior work experience in various roles involving information technology, including security, auditing, compliance, systems and programming. These individuals are informed about, and monitor the prevention, mitigation, detection and remediation of cybersecurity incidents through their management of, and participation in, the cybersecurity risk management and strategy processes described above, including the operation of our incident response plan, and report to the Audit Committee on any appropriate items.

ITEM 2. PROPERTIES

We are headquartered in Austin, Texas. Our principal facilities include a large number of properties in North America, Europe and Asia utilized for manufacturing and assembly, warehousing, engineering, retail and service locations, Supercharger sites and administrative and sales offices. Our facilities are used to support both of our reporting segments, and are suitable and adequate for the conduct of our business. We generally lease such facilities with the primary exception of some manufacturing facilities. The following table sets forth the location of our primary owned and leased manufacturing facilities.

Primary Manufacturing Facilities	Location	Owned or Leased
Gigafactory Texas	Austin, Texas	Owned
Fremont Factory	Fremont, California	Owned
Gigafactory Nevada	Sparks, Nevada	Owned
Gigafactory Berlin-Brandenburg	Grunheide, Germany	Owned
Gigafactory Shanghai	Shanghai, China	*
Gigafactory New York	Buffalo, New York	Leased
Megafactory	Lathrop, California	Leased

* We own the building and the land use rights with an initial term of 50 years. The land use rights are treated as operating lease right-of-use assets.

ITEM 3. LEGAL PROCEEDINGS

For a description of our material pending legal proceedings, please see Note 15, *Commitments and Contingencies*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

In addition, each of the matters below is being disclosed pursuant to Item 103 of Regulation S-K because it relates to environmental regulations and aggregate civil penalties that we currently believe could potentially exceed $1 million. We believe that any proceeding that is material to our business or financial condition is likely to have potential penalties far in excess of such amount.

District attorneys in certain California counties conducted an investigation into Tesla’s waste segregation practices pursuant to Cal. Health & Saf. Code § 25100 et seq. and Cal. Civil Code § 1798.80. Tesla has implemented various remedial measures, including conducting training and audits, and enhancements to its site waste management programs, and settlement discussions are ongoing. While the outcome of this matter cannot be determined at this time, it is not currently expected to have a material adverse impact on our business.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock has traded on The NASDAQ Global Select Market under the symbol "TSLA" since it began trading on June 29, 2010. Our initial public offering was priced at approximately $1.13 per share on June 28, 2010 as adjusted to give effect to the three-for-one stock split effected in the form of a stock dividend in August 2022 (the "2022 Stock Split") and the five-for-one stock split effected in the form of a stock dividend in August 2020 (the "2020 Stock Split").

Holders

As of January 22, 2024, there were 9,300 holders of record of our common stock. A substantially greater number of holders of our common stock are "street name" or beneficial holders, whose shares are held by banks, brokers and other financial institutions.

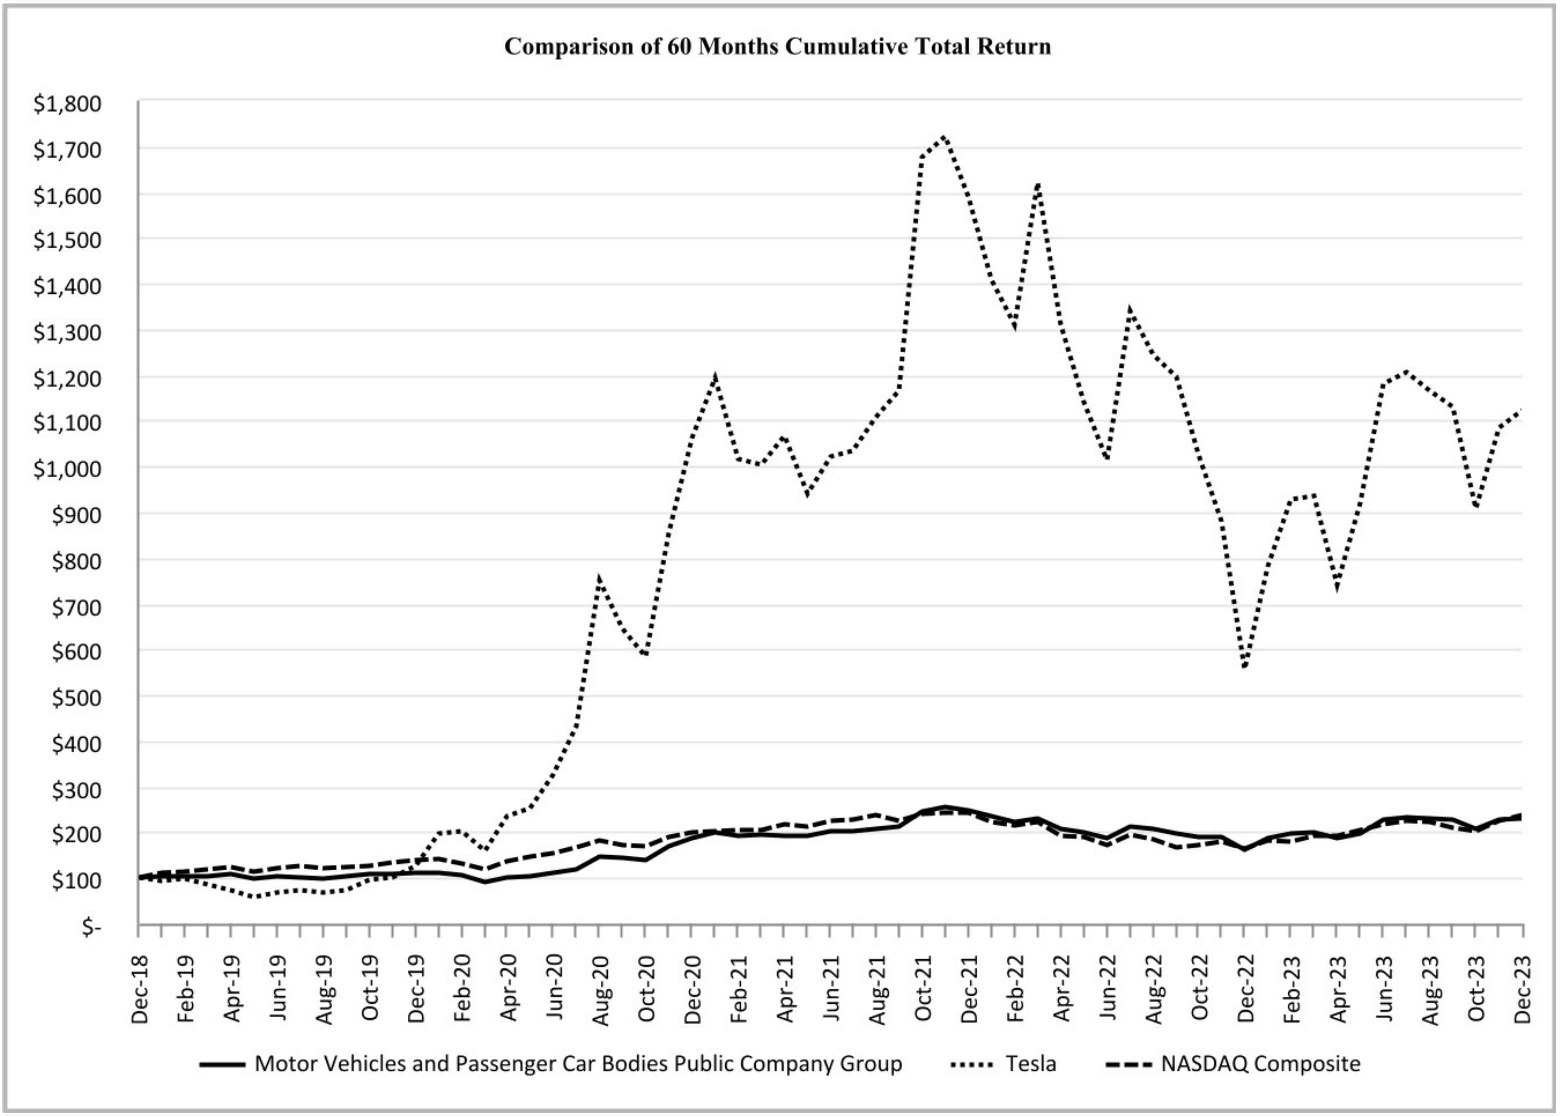
Dividend Policy

We have never declared or paid cash dividends on our common stock. We currently do not anticipate paying any cash dividends in the foreseeable future. Any future determination to declare cash dividends will be made at the discretion of our board of directors, subject to applicable laws, and will depend on our financial condition, results of operations, capital requirements, general business conditions and other factors that our board of directors may deem relevant.

Stock Performance Graph

This performance graph shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference into any filing of Tesla, Inc. under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

The following graph shows a comparison, from January 1, 2019 through December 31, 2023, of the cumulative total return on our common stock, The NASDAQ Composite Index and a group of all public companies sharing the same SIC code as us, which is SIC code 3711, "Motor Vehicles and Passenger Car Bodies" (Motor Vehicles and Passenger Car Bodies Public Company Group). Such returns are based on historical results and are not intended to suggest future performance. Data for The NASDAQ Composite Index and the Motor Vehicles and Passenger Car Bodies Public Company Group assumes an investment of $100 on January 1, 2019 and reinvestment of dividends. We have never declared or paid cash dividends on our common stock nor do we anticipate paying any such cash dividends in the foreseeable future.



Unregistered Sales of Equity Securities and Use of Proceeds

None.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the consolidated financial statements and the related notes included elsewhere in this Annual Report on Form 10-K. For further discussion of our products and services, technology and competitive strengths, refer to Item 1- Business. For discussion related to changes in financial condition and the results of operations for fiscal year 2022-related items, refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for fiscal year 2022, which was filed with the Securities and Exchange Commission on January 31, 2023.

Overview and 2023 Highlights

Our mission is to accelerate the world's transition to sustainable energy. We design, develop, manufacture, lease and sell high-performance fully electric vehicles, solar energy generation systems and energy storage products. We also offer maintenance, installation, operation, charging, insurance, financial and other services related to our products. Additionally, we are increasingly focused on products and services based on artificial intelligence, robotics and automation.

In 2023, we produced 1,845,985 consumer vehicles and delivered 1,808,581 consumer vehicles. We are currently focused on increasing vehicle production, capacity and delivery capabilities, reducing costs, improving and developing our vehicles and battery technologies, vertically integrating and localizing our supply chain, improving and further deploying our FSD capabilities, increasing the affordability and efficiency of our vehicles, bringing new products to market and expanding our global infrastructure, including our service and charging infrastructure.

In 2023, we deployed 14.72 GWh of energy storage products and 223 megawatts of solar energy systems. We are currently focused on ramping production of energy storage products, improving our Solar Roof installation capability and efficiency, and increasing market share of retrofit solar energy systems.

In 2023, we recognized total revenues of $96.77 billion, representing an increase of $15.31 billion, compared to the prior year. We continue to ramp production, build new manufacturing capacity and expand our operations to enable increased deliveries and deployments of our products, and invest in research and development to accelerate our AI, software and fleet-based profits for further revenue growth.

In 2023, our net income attributable to common stockholders was $15.00 billion, representing a favorable change of $2.44 billion, compared to the prior year. This included a one-time non-cash tax benefit of $5.93 billion for the release of valuation allowance on certain deferred tax assets. We continue to focus on further cost reductions and operational efficiencies while maximizing delivery volumes.

We ended 2023 with $29.09 billion in cash and cash equivalents and investments, representing an increase of $6.91 billion from the end of 2022. Our cash flows provided by operating activities in 2023 and 2022 were $13.26 billion and $14.72 billion, respectively, representing a decrease of $1.47 billion. Capital expenditures amounted to $8.90 billion in 2023, compared to $7.16 billion in 2022, representing an increase of $1.74 billion. Sustained growth has allowed our business to generally fund itself, and we will continue investing in a number of capital-intensive projects and research and development in upcoming periods.

Management Opportunities, Challenges and Uncertainties and 2024 Outlook

Automotive—Production

The following is a summary of the status of production of each of our announced vehicle models in production and under development, as of the date of this Annual Report on Form 10-K:

Production Location	Vehicle Model(s)	Production Status
Fremont Factory	Model S / Model X	Active
	Model 3 / Model Y	Active
Gigafactory Shanghai	Model 3 / Model Y	Active
Gigafactory Berlin-Brandenburg	Model Y	Active
Gigafactory Texas	Model Y	Active
	Cybertruck	Active
Gigafactory Nevada	Tesla Semi	Pilot production
Various	Next Generation Platform	In development
TBD	Tesla Roadster	In development

We are focused on growing our manufacturing capacity, which includes capacity for manufacturing new vehicle models such as our Cybertruck and next generation platform, and ramping all of our production vehicles to their installed production capacities as well as increasing production rate and efficiency at our current factories. The next phase of production growth will depend on the continued ramp at our factories and the introduction of our next generation platform, as well as our ability to add to our available sources of battery cell supply by manufacturing our own cells that we are developing to have high-volume output, lower capital and production costs and longer range. Our goals are to improve vehicle performance, decrease production costs and increase affordability and customer awareness.

These plans are subject to uncertainties inherent in establishing and ramping manufacturing operations, which may be exacerbated by new product and manufacturing technologies we introduce, the number of concurrent international projects, any industry-wide component constraints, labor shortages and any future impact from events outside of our control. For example, during the third quarter of 2023, we experienced a sequential decline in production volumes due to pre-planned shutdowns for upgrades at various factories. Moreover, we have set ambitious technological targets with our plans for battery cells as well as for iterative manufacturing and design improvements for our vehicles with each new factory.

Automotive—Demand, Sales, Deliveries and Infrastructure

Our cost reduction efforts, cost innovation strategies, and additional localized procurement and manufacturing are key to our vehicles' affordability and have allowed us to competitively price our vehicles. We will also continue to generate demand and brand awareness by improving our vehicles' performance and functionality, including through products based on artificial intelligence such as Autopilot, FSD Capability, and other software features and delivering new vehicles, such as our Cybertruck. Moreover, we expect to continue to benefit from ongoing electrification of the automotive sector and increasing environmental regulations and initiatives.

However, we operate in a cyclical industry that is sensitive to political and regulatory uncertainty, including with respect to trade and the environment, all of which can be compounded by inflationary pressures, rising energy prices, interest rate fluctuations and the liquidity of enterprise customers. For example, inflationary pressures have increased across the markets in which we operate. In an effort to curb this trend, central banks in developed countries raised interest rates rapidly and substantially, impacting the affordability of vehicle lease and finance arrangements. Further, sales of vehicles in the automotive industry also tend to be cyclical in many markets, which may expose us to increased volatility as we expand and adjust our operations. Moreover, as additional competitors enter the marketplace and help bring the world closer to sustainable transportation, we will have to adjust and continue to execute well to maintain our momentum. Additionally, our suppliers' liquidity and allocation plans may be affected by current challenges in the North American automotive industry, which could reduce our access to components or result in unfavorable changes to cost. These macroeconomic and industry trends have had, and will likely continue to have, an impact on the pricing of, and order rate for our vehicles, and in turn our operating margin. Changes in government and economic incentives in relation to electric vehicles may also impact our sales. We will continue to adjust accordingly to such developments, and we believe our ongoing cost reduction, including improved production innovation and efficiency at our newest factories and lower logistics costs, and focus on operating leverage will continue to benefit us in relation to our competitors, while our new products will help enable future growth.

As our production increases, we must work constantly to similarly increase vehicle delivery capability so that it does not become a bottleneck on our total deliveries. We are also committed to reducing the percentage of vehicles delivered in the third month of each quarter, which will help to reduce the cost per vehicle. As we expand our manufacturing operations globally, we will also have to continue to increase and staff our delivery, servicing and charging infrastructure accordingly, maintain our vehicle reliability and optimize our Supercharger locations to ensure cost effectiveness and customer satisfaction. In particular, as other automotive manufacturers have announced their adoption of the North American Charging Standard (“NACS”) and agreements with us to utilize our Superchargers, we must correspondingly expand our network in order to ensure adequate availability to meet customer demands. We also remain focused on continued enhancements of the capability and efficiency of our servicing operations.

Energy Generation and Storage Demand, Production and Deployment

The long-term success of this business is dependent upon increasing margins through greater volumes. We continue to increase the production of our energy storage products to meet high levels of demand, including the construction of a new Megafactory in Shanghai and the ongoing ramp at our Megafactory in Lathrop, California. For Megapack, energy storage deployments can vary meaningfully quarter to quarter depending on the timing of specific project milestones. We remain committed to growing our retrofit solar energy business by offering a low-cost and simplified online ordering experience. In addition, we continue to seek to improve our installation capabilities and price efficiencies for Solar Roof. As these product lines grow, we will have to maintain adequate battery cell supply for our energy storage products and ensure the availability of qualified personnel, particularly skilled electricians, to support the ramp of Solar Roof.

Cash Flow and Capital Expenditure Trends

Our capital expenditures are typically difficult to project beyond the short-term given the number and breadth of our core projects at any given time, and may further be impacted by uncertainties in future global market conditions. We are simultaneously ramping new products, building or ramping manufacturing facilities on three continents, piloting the development and manufacture of new battery cell technologies, expanding our Supercharger network and investing in autonomy and other artificial intelligence enabled training and products, and the pace of our capital spend may vary depending on overall priority among projects, the pace at which we meet milestones, production adjustments to and among our various products, increased capital efficiencies and the addition of new projects. Owing and subject to the foregoing as well as the pipeline of announced projects under development, all other continuing infrastructure growth and varying levels of inflation, we currently expect our capital expenditures to exceed $10.00 billion in 2024 and be between $8.00 to $10.00 billion in each of the following two fiscal years.

Our business has been consistently generating cash flow from operations in excess of our level of capital spend, and with better working capital management resulting in shorter days sales outstanding than days payable outstanding, our sales growth is also generally facilitating positive cash generation. We have and will continue to utilize such cash flows, among other things, to do more vertical integration, expand our product roadmap and provide financing options to our customers. At the same time, we are likely to see heightened levels of capital expenditures during certain periods depending on the specific pace of our capital-intensive projects and other potential variables such as rising material prices and increases in supply chain and labor expenses resulting from changes in global trade conditions and labor availability. Overall, we expect our ability to be self-funding to continue as long as macroeconomic factors support current trends in our sales.

Critical Accounting Policies and Estimates

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the U.S. (“GAAP”). The preparation of the consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures. We base our estimates on historical experience, as appropriate, and on various other assumptions that we believe to be reasonable under the circumstances. Changes in the accounting estimates are reasonably likely to occur from period to period. Accordingly, actual results could differ significantly from the estimates made by our management. We evaluate our estimates and assumptions on an ongoing basis. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows may be affected.

The estimates used for, but not limited to, determining significant economic incentive for resale value guarantee arrangements, sales return reserves, the collectability of accounts and financing receivables, inventory valuation, warranties, fair value of long-lived assets, goodwill, fair value of financial instruments, fair value and residual value of operating lease vehicles and solar energy systems subject to leases could be impacted. We have assessed the impact and are not aware of any specific events or circumstances that required an update to our estimates and assumptions or materially affected the carrying value of our assets or liabilities as of the date of issuance of this Annual Report on Form 10-K. These estimates may change as new events occur and additional information is obtained. Actual results could differ materially from these estimates under different assumptions or conditions.

Revenue Recognition

Automotive Sales

Automotive sales revenue includes revenues related to cash and financing deliveries of new vehicles, and specific other features and services that meet the definition of a performance obligation under Accounting Standards Codification ("ASC") 606, *Revenue from Contracts with Customers* ("ASC 606"), including access to our FSD Capability features and their ongoing maintenance, internet connectivity, free Supercharging programs and over-the-air software updates. We recognize revenue on automotive sales upon delivery to the customer, which is when the control of a vehicle transfers. Payments are typically received at the point control transfers or in accordance with payment terms customary to the business, except sales we finance for which payments are collected over the contractual loan term. We also recognize a sales return reserve based on historical experience plus consideration for expected future market values, when we offer resale value guarantees or similar buyback terms. Other features and services such as access to our internet connectivity, unlimited free Supercharging and over-the-air software updates are provisioned upon control transfer of a vehicle and recognized over time on a straight-line basis as we have a stand-ready obligation to deliver such services to the customer. Other limited free Supercharging incentives are recognized based on actual usage or expiration, whichever is earlier. We recognize revenue related to these other features and services over the performance period, which is generally the expected ownership life of the vehicle. Revenue related to FSD Capability features is recognized when functionality is delivered to the customer and their ongoing maintenance is recognized over time. For our obligations related to automotive sales, we estimate standalone selling price by considering costs used to develop and deliver the service, third-party pricing of similar options and other information that may be available.

Inventory Valuation

Inventories are stated at the lower of cost or net realizable value. Cost is computed using standard cost for vehicles and energy products, which approximates actual cost on a first-in, first-out basis. We record inventory write-downs for excess or obsolete inventories based upon assumptions about current and future demand forecasts. If our inventory on-hand is in excess of our future demand forecast, the excess amounts are written-off.

We also review our inventory to determine whether its carrying value exceeds the net amount realizable upon the ultimate sale of the inventory. This requires us to determine the estimated selling price of our vehicles less the estimated cost to convert the inventory on-hand into a finished product. Once inventory is written-down, a new, lower cost basis for that inventory is established and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Should our estimates of future selling prices or production costs change, additional and potentially material write-downs may be required. A small change in our estimates may result in a material charge to our reported financial results.

Warranties

We provide a manufacturer's warranty on all new and used vehicles and a warranty on the installation and components of the energy generation and storage systems we sell for periods typically between 10 to 25 years. We accrue a warranty reserve for the products sold by us, which includes our best estimate of the projected costs to repair or replace items under warranties and recalls if identified. These estimates are based on actual claims incurred to date and an estimate of the nature, frequency and costs of future claims. These estimates are inherently uncertain and changes to our historical or projected warranty experience may cause material changes to the warranty reserve in the future. The warranty reserve does not include projected warranty costs associated with our vehicles subject to operating lease accounting and our solar energy systems under lease contracts or PPAs, as the costs to repair these warranty claims are expensed as incurred. The portion of the warranty reserve expected to be incurred within the next 12 months is included within Accrued liabilities and other, while the remaining balance is included within Other long-term liabilities on the consolidated balance sheets. For liabilities that we are entitled to receive indemnification from our suppliers, we record receivables for the contractually obligated amounts on the consolidated balance sheets as a component of Prepaid expenses and other current assets for the current portion and as Other non-current assets for the long-term portion. Warranty expense is recorded as a component of Cost of revenues in the consolidated statements of operations. Due to the magnitude of our automotive business, our accrued warranty balance is primarily related to our automotive segment.

Stock-Based Compensation

We use the fair value method of accounting for our stock options and restricted stock units ("RSUs") granted to employees and for our employee stock purchase plan (the "ESPP") to measure the cost of employee services received in exchange for the stock-based awards. The fair value of stock option awards with only service and/or performance conditions is estimated on the grant or offering date using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model requires inputs such as the risk-free interest rate, expected term and expected volatility. These inputs are subjective and generally require significant judgment. The fair value of RSUs is measured on the grant date based on the closing fair market value of our common stock. The resulting cost is recognized over the period during which an employee is required to provide service in exchange for the awards, usually the vesting period, which is generally four years for stock options and RSUs and six months for the ESPP. Stock-based compensation expense is recognized on a straight-line basis, net of actual forfeitures in the period.

For performance-based awards, stock-based compensation expense is recognized over the expected performance achievement period of individual performance milestones when the achievement of each individual performance milestone becomes probable.

As we accumulate additional employee stock-based awards data over time and as we incorporate market data related to our common stock, we may calculate significantly different volatilities and expected lives, which could materially impact the valuation of our stock-based awards and the stock-based compensation expense that we will recognize in future periods. Stock-based compensation expense is recorded in Cost of revenues, Research and development expense and Selling, general and administrative expense in the consolidated statements of operations.

Income Taxes

We are subject to income taxes in the U.S. and in many foreign jurisdictions. Significant judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets that are not more likely than not to be realized. We monitor the realizability of our deferred tax assets taking into account all relevant factors at each reporting period. In completing our assessment of realizability of our deferred tax assets, we consider our history of income (loss) measured at pre-tax income (loss) adjusted for permanent book-tax differences on a jurisdictional basis, volatility in actual earnings, excess tax benefits related to stock-based compensation in recent prior years, and impacts of the timing of reversal of existing temporary differences. We also rely on our assessment of the Company's projected future results of business operations, including uncertainty in future operating results relative to historical results, volatility in the market price of our common stock and its performance over time, variable macroeconomic conditions impacting our ability to forecast future taxable income, and changes in business that may affect the existence and magnitude of future taxable income. Our valuation allowance assessment is based on our best estimate of future results considering all available information.

Furthermore, significant judgment is required in evaluating our tax positions. In the ordinary course of business, there are many transactions and calculations for which the ultimate tax settlement is uncertain. As a result, we recognize the effect of this uncertainty on our tax attributes or taxes payable based on our estimates of the eventual outcome. These effects are recognized when, despite our belief that our tax return positions are supportable, we believe that it is more likely than not that some of those positions may not be fully sustained upon review by tax authorities. We are required to file income tax returns in the U.S. and various foreign jurisdictions, which requires us to interpret the applicable tax laws and regulations in effect in such jurisdictions. Such returns are subject to audit by the various federal, state and foreign taxing authorities, who may disagree with respect to our tax positions. We believe that our consideration is adequate for all open audit years based on our assessment of many factors, including past experience and interpretations of tax law. We review and update our estimates in light of changing facts and circumstances, such as the closing of a tax audit, the lapse of a statute of limitations or a change in estimate. To the extent that the final tax outcome of these matters differs from our expectations, such differences may impact income tax expense in the period in which such determination is made.

Results of Operations

Revenues

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Automotive sales	$ 78,509	$ 67,210	$ 44,125	$ 11,299	17 %	$ 23,085	52 %
Automotive regulatory credits	1,790	1,776	1,465	14	1 %	311	21 %
Automotive leasing	2,120	2,476	1,642	(356)	(14)%	834	51 %
Total automotive revenues	82,419	71,462	47,232	10,957	15 %	24,230	51 %
Services and other	8,319	6,091	3,802	2,228	37 %	2,289	60 %
Total automotive & services and other segment revenue	90,738	77,553	51,034	13,185	17 %	26,519	52 %
Energy generation and storage segment revenue	6,035	3,909	2,789	2,126	54 %	1,120	40 %
Total revenues	$ 96,773	$ 81,462	$ 53,823	$ 15,311	19 %	$ 27,639	51 %

Automotive & Services and Other Segment

Automotive sales revenue includes revenues related to cash and financing deliveries of new Model S, Model X, Semi, Model 3, Model Y, and Cybertruck vehicles, including access to our FSD Capability features and their ongoing maintenance, internet connectivity, free Supercharging programs and over-the-air software updates. These deliveries are vehicles that are not subject to lease accounting.

Automotive regulatory credits includes sales of regulatory credits to other automotive manufacturers. Our revenue from automotive regulatory credits is directly related to our new vehicle production, sales and pricing negotiated with our customers. We monetize them proactively as new vehicles are sold based on standing arrangements with buyers of such credits, typically as close as possible to the production and delivery of the vehicle or changes in regulation impacting the credits.

Automotive leasing revenue includes the amortization of revenue for vehicles under direct operating lease agreements. Additionally, automotive leasing revenue includes direct sales-type leasing programs where we recognize all revenue associated with the sales-type lease upon delivery to the customer.

Services and other revenue consists of sales of used vehicles, non-warranty after-sales vehicle services, body shop and parts, paid Supercharging, vehicle insurance revenue and retail merchandise.

2023 compared to 2022

Automotive sales revenue increased $11.30 billion, or 17%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022, primarily due to an increase of 473,382 combined Model 3 and Model Y cash deliveries from production ramping of Model Y globally. The increase was partially offset by a lower average selling price on our vehicles driven by overall price reductions year over year, sales mix, and a negative impact from the United States dollar strengthening against other foreign currencies in the year ended December 31, 2023 compared to the prior year.

Automotive regulatory credits revenue increased $14 million, or 1%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022.

Automotive leasing revenue decreased $356 million, or 14%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The decrease was primarily due to a decrease in direct sales-type leasing revenue driven by lower deliveries year over year, partially offset by an increase from our growing direct operating lease portfolio.

Services and other revenue increased $2.23 billion, or 37%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The increase was primarily due to higher used vehicle revenue driven by increases in volume, body shop and part sales revenue, non-warranty maintenance services revenue, paid Supercharging revenue and insurance services revenue, all of which are primarily attributable to our growing fleet. The increases were partially offset by a decrease in the average selling price of used vehicles.

Energy Generation and Storage Segment

Energy generation and storage revenue includes sales and leasing of solar energy generation and energy storage products, financing of solar energy generation products, services related to such products and sales of solar energy systems incentives.

2023 compared to 2022

Energy generation and storage revenue increased $2.13 billion, or 54%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The increase was primarily due to an increase in deployments of Megapack.

Cost of Revenues and Gross Margin

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Cost of revenues							
Automotive sales	$ 65,121	$ 49,599	$ 32,415	$ 15,522	31 %	$ 17,184	53 %
Automotive leasing	1,268	1,509	978	(241)	(16)%	531	54 %
Total automotive cost of revenues	66,389	51,108	33,393	15,281	30 %	17,715	53 %
Services and other	7,830	5,880	3,906	1,950	33 %	1,974	51 %
Total automotive & services and other segment cost of revenues	74,219	56,988	37,299	17,231	30 %	19,689	53 %
Energy generation and storage segment	4,894	3,621	2,918	1,273	35 %	703	24 %
Total cost of revenues	$ 79,113	$ 60,609	$ 40,217	$ 18,504	31 %	$ 20,392	51 %
Gross profit total automotive	$ 16,030	$ 20,354	$ 13,839				
Gross margin total automotive	19.4 %	28.5 %	29.3 %				
Gross profit total automotive & services and other segment	$ 16,519	$ 20,565	$ 13,735				
Gross margin total automotive & services and other segment	18.2 %	26.5 %	26.9 %				
Gross profit energy generation and storage segment	$ 1,141	$ 288	$ (129)				
Gross margin energy generation and storage segment	18.9 %	7.4 %	(4.6)%				
Total gross profit	$ 17,660	$ 20,853	$ 13,606				
Total gross margin	18.2 %	25.6 %	25.3 %				

Automotive & Services and Other Segment

Cost of automotive sales revenue includes direct and indirect materials, labor costs, manufacturing overhead, including depreciation costs of tooling and machinery, shipping and logistic costs, vehicle connectivity costs, FSD ongoing maintenance costs, allocations of electricity and infrastructure costs related to our Supercharger network and reserves for estimated warranty expenses. Cost of automotive sales revenues also includes adjustments to warranty expense and charges to write down the carrying value of our inventory when it exceeds its estimated net realizable value and to provide for obsolete and on-hand inventory in excess of forecasted demand. Additionally, cost of automotive sales revenue benefits from manufacturing credits earned.

Cost of automotive leasing revenue includes the depreciation of operating lease vehicles, cost of goods sold associated with direct sales-type leases and warranty expense related to leased vehicles.

Costs of services and other revenue includes cost of used vehicles including refurbishment costs, costs associated with providing non-warranty after-sales services, costs associated with our body shops and part sales, costs of paid Supercharging, costs to provide vehicle insurance and costs for retail merchandise.

2023 compared to 2022

Cost of automotive sales revenue increased $15.52 billion, or 31%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. Cost of automotive sales revenue increased in line with the change in deliveries year over year, as discussed above. The increase was partially offset by a decrease in the average combined cost per unit of our vehicles primarily due to sales mix, lower inbound freight, a decrease in material costs and lower manufacturing costs from better fixed cost absorption. Our costs of revenue were also positively impacted by the United States dollar strengthening against our foreign currencies as compared to the prior periods and by the IRA manufacturing credits earned during the current year.

Cost of automotive leasing revenue decreased $241 million, or 16%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The decrease was primarily due to a decrease in direct sales-type leasing cost of revenue driven by lower deliveries year over year.

Cost of services and other revenue increased $1.95 billion, or 33%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The increase was generally in line with the changes in services and other revenue as discussed above.

Gross margin for total automotive decreased from 28.5% to 19.4% in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The decrease was primarily due to a lower average selling price on our vehicles partially offset by the favorable change in our average combined cost per unit of our vehicles and IRA manufacturing credits earned as discussed above.

Gross margin for total automotive & services and other segment decreased from 26.5% to 18.2% in the year ended December 31, 2023 as compared to the year ended December 31, 2022, primarily due to the automotive gross margin decrease discussed above.

Energy Generation and Storage Segment

Cost of energy generation and storage revenue includes direct and indirect material and labor costs, warehouse rent, freight, warranty expense, other overhead costs and amortization of certain acquired intangible assets. Cost of energy generation and storage revenue also includes charges to write down the carrying value of our inventory when it exceeds its estimated net realizable value and to provide for obsolete and on-hand inventory in excess of forecasted demand. Additionally, cost of energy generation and storage revenue benefits from manufacturing credits earned. In agreements for solar energy systems and PPAs where we are the lessor, the cost of revenue is primarily comprised of depreciation of the cost of leased solar energy systems, maintenance costs associated with those systems and amortization of any initial direct costs.

2023 compared to 2022

Cost of energy generation and storage revenue increased $1.27 billion, or 35%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022, in line with the increase in Megapack deployments year over year, as discussed above. This increase was partially offset by an improvement in production ramping that drove down the average cost per MWh of Megapack as well as IRA manufacturing credits earned during the current year.

Gross margin for energy generation and storage increased from 7.4% to 18.9% in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The increase was driven by an improvement in our Megapack gross margin from lower average cost per MWh and a higher proportion of Megapack, which operated at a higher gross margin, within the segment as compared to the prior year periods. Additionally, there was a margin benefit from IRA manufacturing credits earned.

Research and Development Expense

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Research and development	$ 3,969	$ 3,075	$ 2,593	$ 894	29 %	$ 482	19 %
As a percentage of revenues	4 %	4 %	5 %				

Research and development ("R&D") expenses consist primarily of personnel costs for our teams in engineering and research, manufacturing engineering and manufacturing test organizations, prototyping expense, contract and professional services and amortized equipment expense.

R&D expenses increased $894 million, or 29%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The overall increase was primarily driven by additional costs in the current year related to the pre-production phase for Cybertruck, AI and other programs.

R&D expenses as a percentage of revenue stayed consistent at 4% in the year ended December 31, 2023 as compared to the year ended December 31, 2022. Our R&D expenses have increased proportionately with total revenues as we continue to expand our product roadmap and technologies.

Selling, General and Administrative Expense

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Selling, general and administrative	$ 4,800	$ 3,946	$ 4,517	$ 854	22 %	$ (571)	(13)%
As a percentage of revenues	5 %	5 %	8 %				

Selling, general and administrative ("SG&A") expenses generally consist of personnel and facilities costs related to our stores, marketing, sales, executive, finance, human resources, information technology and legal organizations, as well as fees for professional and contract services and litigation settlements.

SG&A expenses increased $854 million, or 22%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. This was driven by a $447 million increase in employee and labor costs primarily from increased headcount, including professional services and a $363 million increase in facilities related expenses.

Restructuring and Other

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Restructuring and other	$ —	$ 176	$ (27)	$ (176)	(100)%	$ 203	Not meaningful

During the year ended December 31, 2022, we recorded an impairment loss of $204 million as well as realized gains of $64 million in connection with converting our holdings of digital assets into fiat currency. We also recorded other expenses of $36 million during the second quarter of the year ended December 31, 2022, related to employee terminations.

Interest Income

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Interest income	$ 1,066	$ 297	$ 56	$ 769	259 %	$ 241	430 %

Interest income increased $769 million, or 259%, in the year ended December 31, 2023 as compared to the year ended December 31, 2022. This increase was primarily due to higher interest earned on our cash and cash equivalents and short-term investments in the year ended December 31, 2023 as compared to the prior year due to rising interest rates and our increasing portfolio balance.

Other Income (Expense), Net

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
Other income (expense), net	$ 172	$ (43)	$ 135	$ 215	Not meaningful	$ (178)	Not meaningful

Other income (expense), net, consists primarily of foreign exchange gains and losses related to our foreign currency-denominated monetary assets and liabilities. We expect our foreign exchange gains and losses will vary depending upon movements in the underlying exchange rates.

Other income, net, changed favorably by $215 million in the year ended December 31, 2023 as compared to the year ended December 31, 2022. The favorable change was primarily due to fluctuations in foreign currency exchange rates on our intercompany balances.

(Benefit from) Provision for Income Taxes

	Year Ended December 31,			2023 vs. 2022 Change		2022 vs. 2021 Change	
(Dollars in millions)	2023	2022	2021	$	%	$	%
(Benefit from) provision for income taxes	$ (5,001)	$ 1,132	$ 699	$ (6,133)	Not meaningful	$ 433	62 %
Effective tax rate	(50)%	8 %	11 %				

We monitor the realizability of our deferred tax assets taking into account all relevant factors at each reporting period. As of December 31, 2023, based on the relevant weight of positive and negative evidence, including the amount of our taxable income in recent years which is objective and verifiable, and consideration of our expected future taxable earnings, we concluded that it is more likely than not that our U.S. federal and certain state deferred tax assets are realizable. As such, we released $6.54 billion of our valuation allowance associated with the U.S. federal and state deferred tax assets, with the exception of our California deferred tax assets. Approximately $5.93 billion of the total valuation allowance release was related to deferred tax assets to be realized in the future years and the remainder benefited us during the year ended December 31, 2023. We continue to maintain a full valuation allowance against our California deferred tax assets as of December 31, 2023, because we concluded they are not more likely than not to be realized as we expect our California deferred tax assets generation in future years to exceed our ability to use these deferred tax assets.

Our (benefit from) provision for income taxes changed by $6.13 billion in the year ended December 31, 2023 as compared to the year ended December 31, 2022, primarily due to the release of $6.54 billion of our valuation allowance associated with the U.S. federal and certain state deferred tax assets.

Our effective tax rate changed from an expense of 8% to a benefit of 50% in the year ended December 31, 2023 as compared to the year ended December 31, 2022, primarily due to the release of the valuation allowance regarding our U.S. federal and certain state deferred tax assets.

See Note 14, *Income Taxes*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K for further details.

Liquidity and Capital Resources

We expect to continue to generate net positive operating cash flow as we have done in the last five fiscal years. The cash we generate from our core operations enables us to fund ongoing operations and production, our research and development projects for new products and technologies including our proprietary battery cells, additional manufacturing ramps at existing manufacturing facilities, the construction of future factories, and the continued expansion of our retail and service locations, body shops, Mobile Service fleet, Supercharger, including to support NACS, energy product installation capabilities and autonomy and other artificial intelligence enabled products.

In addition, because a large portion of our future expenditures will be to fund our growth, we expect that if needed we will be able to adjust our capital and operating expenditures by operating segment. For example, if our near-term manufacturing operations decrease in scale or ramp more slowly than expected, including due to global economic or business conditions, we may choose to correspondingly slow the pace of our capital expenditures. Finally, we continually evaluate our cash needs and may decide it is best to raise additional capital or seek alternative financing sources to fund the rapid growth of our business, including through drawdowns on existing or new debt facilities or financing funds. Conversely, we may also from time to time determine that it is in our best interests to voluntarily repay certain indebtedness early.

Accordingly, we believe that our current sources of funds will provide us with adequate liquidity during the 12-month period following December 31, 2023, as well as in the long-term.

See the sections below for more details regarding the material requirements for cash in our business and our sources of liquidity to meet such needs.

Material Cash Requirements

From time to time in the ordinary course of business, we enter into agreements with vendors for the purchase of components and raw materials to be used in the manufacture of our products. However, due to contractual terms, variability in the precise growth curves of our development and production ramps, and opportunities to renegotiate pricing, we generally do not have binding and enforceable purchase orders under such contracts beyond the short-term, and the timing and magnitude of purchase orders beyond such period is difficult to accurately project.

As discussed in and subject to the considerations referenced in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations—Management Opportunities, Challenges and Uncertainties and 2023 Outlook—Cash Flow and Capital Expenditure Trends in this Annual Report on Form 10-K, we currently expect our capital expenditures to support our projects globally to exceed $10.00 billion in 2024 and be between $8.00 to $10.00 billion in each of the following two fiscal years. In connection with our operations at Gigafactory New York, we have an agreement to spend or incur $5.00 billion in combined capital, operational expenses, costs of goods sold and other costs in the State of New York through December 31, 2029 (pursuant to a deferral of our required timelines to meet such obligations that was granted in April 2021, and which was memorialized in an amendment to our agreement with the SUNY Foundation in August 2021). For details regarding these obligations, refer to Note 15, *Commitments and Contingencies*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

As of December 31, 2023, we and our subsidiaries had outstanding $4.68 billion in aggregate principal amount of indebtedness, of which $1.98 billion is scheduled to become due in the succeeding 12 months. As of December 31, 2023, our total minimum lease payments was $5.96 billion, of which $1.31 billion is due in the succeeding 12 months. For details regarding our indebtedness and lease obligations, refer to Note 11, *Debt*, and Note 12, *Leases*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

Sources and Conditions of Liquidity

Our sources to fund our material cash requirements are predominantly from our deliveries and servicing of new and used vehicles, sales and installations of our energy storage products and solar energy systems, proceeds from debt facilities and proceeds from equity offerings, when applicable.

As of December 31, 2023, we had $16.40 billion and $12.70 billion of cash and cash equivalents and short-term investments, respectively. Balances held in foreign currencies had a U.S. dollar equivalent of $4.43 billion and consisted primarily of Chinese yuan and euros. We had $5.03 billion of unused committed credit amounts as of December 31, 2023. For details regarding our indebtedness, refer to Note 11, *Debt*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

We continue adapting our strategy to meet our liquidity and risk objectives, such as investing in U.S. government securities and other investments, to do more vertical integration, expand our product roadmap and provide financing options to our customers.

Summary of Cash Flows

(Dollars in millions)	Year Ended December 31, 2023	2022	2021
Net cash provided by operating activities	$ 13,256	$ 14,724	$ 11,497
Net cash used in investing activities	$ (15,584)	$ (11,973)	$ (7,868)
Net cash provided by (used in) financing activities	$ 2,589	$ (3,527)	$ (5,203)

Cash Flows from Operating Activities

Our cash flows from operating activities are significantly affected by our cash investments to support the growth of our business in areas such as research and development and selling, general and administrative and working capital. Our operating cash inflows include cash from vehicle sales and related servicing, customer lease and financing payments, customer deposits, cash from sales of regulatory credits and energy generation and storage products, and interest income on our cash and investments portfolio. These cash inflows are offset by our payments to suppliers for production materials and parts used in our manufacturing process, operating expenses, operating lease payments and interest payments on our financings.

Net cash provided by operating activities decreased by $1.47 billion to $13.26 billion during the year ended December 31, 2023 from $14.72 billion during the year ended December 31, 2022. This decrease was primarily due to the decrease in net income excluding non-cash expenses, gains and losses of $2.93 billion, partially offset by favorable changes in net operating assets and liabilities of $1.46 billion.

Cash Flows from Investing Activities

Cash flows from investing activities and their variability across each period related primarily to capital expenditures, which were $8.90 billion for the year ended December 31, 2023 and $7.16 billion for the year ended December 31, 2022, mainly for global factory expansion and machinery and equipment as we expand our product roadmap. We also purchased $6.62 billion and $5.81 billion of investments, net of proceeds from maturities and sales, for the year ended December 31, 2023 and 2022, respectively. Additionally, proceeds from sales of digital assets was $936 million in the year ended December 31, 2022.

Cash Flows from Financing Activities

Net cash from financing activities changed by $6.12 billion to $2.59 billion net cash provided by financing activities during the year ended December 31, 2023 from $3.53 billion net cash used in financing activities during the year ended December 31, 2022. The change was primarily due to a $3.93 billion increase in proceeds from issuances of debt and a $2.01 billion decrease in repayments of debt. See Note 11, *Debt*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K for further details regarding our debt obligations.

Recent Accounting Pronouncements

See Note 2, *Summary of Significant Accounting Policies*, to the consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Risk

We transact business globally in multiple currencies and hence have foreign currency risks related to our revenue, costs of revenue and operating expenses denominated in currencies other than the U.S. dollar (primarily the Chinese yuan and euro in relation to our current year operations). In general, we are a net receiver of currencies other than the U.S. dollar for our foreign subsidiaries. Accordingly, changes in exchange rates affect our operating results as expressed in U.S. dollars as we do not typically hedge foreign currency risk.

We have also experienced, and will continue to experience, fluctuations in our net income as a result of gains (losses) on the settlement and the re-measurement of monetary assets and liabilities denominated in currencies that are not the local currency (primarily consisting of our intercompany and cash and cash equivalents balances).

We considered the historical trends in foreign currency exchange rates and determined that it is reasonably possible that adverse changes in foreign currency exchange rates of 10% for all currencies could be experienced in the near-term. These changes were applied to our total monetary assets and liabilities denominated in currencies other than our local currencies at the balance sheet date to compute the impact these changes would have had on our net income before income taxes. These changes would have resulted in a gain or loss of $1.01 billion at December 31, 2023 and $473 million at December 31, 2022, assuming no foreign currency hedging.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Index to Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Tesla, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Tesla, Inc. and its subsidiaries (the "Company") as of December 31, 2023 and 2022, and the related consolidated statements of operations, of comprehensive income, of redeemable noncontrolling interests and equity and of cash flows for each of the three years in the period ended December 31, 2023, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Changes in Accounting Principles

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for convertible debt in 2021.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Automotive Warranty Reserve

As described in Note 2 to the consolidated financial statements, total accrued warranty, which primarily relates to the automotive segment, was $5,152 million as of December 31, 2023. The Company provides a manufacturer’s warranty on all new and used Tesla vehicles. A warranty reserve is accrued for these products sold, which includes management’s best estimate of the projected costs to repair or replace items under warranty and recalls if identified. These estimates are based on actual claims incurred to date and an estimate of the nature, frequency and costs of future claims.

The principal considerations for our determination that performing procedures relating to the automotive warranty reserve is a critical audit matter are the significant judgment by management in determining the automotive warranty reserve for certain Tesla vehicle models; this in turn led to significant auditor judgment, subjectivity, and effort in performing procedures to evaluate management’s significant assumptions related to the nature, frequency and costs of future claims for certain Tesla vehicle models, and the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management’s estimate of the automotive warranty reserve for certain Tesla vehicle models, including controls over management’s significant assumptions related to the nature, frequency and costs of future claims as well as the completeness and accuracy of actual claims incurred to date. These procedures also included, among others, performing one of the following: (i) testing management’s process for determining the automotive warranty reserve for certain Tesla vehicle models or (ii) developing an independent estimate of the automotive warranty reserve for certain Tesla vehicle models and comparing the independent estimate to management’s estimate to evaluate the reasonableness of the estimate. Testing management’s process involved evaluating the reasonableness of significant assumptions related to the nature and frequency of future claims and the related costs to repair or replace items under warranty. Evaluating the assumptions related to the nature and frequency of future claims and the related costs to repair or replace items under warranty involved evaluating whether the assumptions used were reasonable by performing a lookback analysis comparing prior period forecasted claims to actual claims incurred. Developing the independent estimate involved testing the completeness and accuracy of historical vehicle claims processed and testing that such claims were appropriately used by management in the estimation of future claims. Professionals with specialized skill and knowledge were used to assist in developing an independent estimate of the automotive warranty reserve for certain Tesla vehicle models and in evaluating the appropriateness of certain aspects of management’s significant assumptions related to the nature and frequency of future claims.

Proceeds from investments by noncontrolling interests in subsidiaries	—	—	2
Distributions paid to noncontrolling interests in subsidiaries	(144)	(157)	(161)
Payments for buy-outs of noncontrolling interests in subsidiaries	(54)	(45)	(10)
Net cash provided by (used in) financing activities	2,589	(3,527)	(5,203)
Effect of exchange rate changes on cash and cash equivalents and restricted cash	4	(444)	(183)
Net increase (decrease) in cash and cash equivalents and restricted cash	265	(1,220)	(1,757)
Cash and cash equivalents and restricted cash, beginning of period	16,924	18,144	19,901
Cash and cash equivalents and restricted cash, end of period	$ 17,189	$ 16,924	$ 18,144
Supplemental Non-Cash Investing and Financing Activities			
Acquisitions of property and equipment included in liabilities	$ 2,272	$ 2,148	$ 2,251
Supplemental Disclosures			
Cash paid during the period for interest, net of amounts capitalized	$ 126	$ 152	$ 266
Cash paid during the period for income taxes, net of refunds	$ 1,119	$ 1,203	$ 561

The accompanying notes are an integral part of these consolidated financial statements.

Note 1 – Overview

Tesla, Inc. (“Tesla”, the “Company”, “we”, “us” or “our”) was incorporated in the State of Delaware on July 1, 2003. We design, develop, manufacture, sell and lease high-performance fully electric vehicles and energy generation and storage systems, and offer services related to our products. Our Chief Executive Officer, as the chief operating decision maker (“CODM”), organizes our company, manages resource allocations and measures performance among two operating and reportable segments: (i) automotive and (ii) energy generation and storage.

Note 2 – Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with GAAP and reflect our accounts and operations and those of our subsidiaries in which we have a controlling financial interest. In accordance with the provisions of ASC 810, *Consolidation* (“ASC 810”), we consolidate any variable interest entity (“VIE”) of which we are the primary beneficiary. We have formed VIEs with financing fund investors in the ordinary course of business in order to facilitate the funding and monetization of certain attributes associated with solar energy systems and leases under our direct vehicle leasing programs. The typical condition for a controlling financial interest ownership is holding a majority of the voting interests of an entity; however, a controlling financial interest may also exist in entities, such as VIEs, through arrangements that do not involve controlling voting interests. ASC 810 requires a variable interest holder to consolidate a VIE if that party has the power to direct the activities of the VIE that most significantly impact the VIE’s economic performance and the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. We do not consolidate a VIE in which we have a majority ownership interest when we are not considered the primary beneficiary. We have determined that we are the primary beneficiary of all the VIEs (see Note 16*, Variable Interest Entity Arrangements*). We evaluate our relationships with all the VIEs on an ongoing basis to ensure that we continue to be the primary beneficiary. All intercompany transactions and balances have been eliminated upon consolidation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures in the accompanying notes. The estimates used for, but not limited to, determining significant economic incentive for resale value guarantee arrangements, sales return reserves, income taxes, the collectability of accounts and finance receivables, inventory valuation, warranties, fair value of long-lived assets, goodwill, fair value of financial instruments, fair value and residual value of operating lease vehicles and solar energy systems subject to leases could be impacted. We have assessed the impact and are not aware of any specific events or circumstances that required an update to our estimates and assumptions or materially affected the carrying value of our assets or liabilities as of the date of issuance of this Annual Report on Form 10-K. These estimates may change as new events occur and additional information is obtained. Actual results could differ materially from these estimates under different assumptions or conditions.

Reclassifications

Certain prior period balances have been reclassified to conform to the current period presentation in the consolidated financial statements and the accompanying notes.

Revenue Recognition

Revenue by source

The following table disaggregates our revenue by major source (in millions):

	Year Ended December 31,		
	2023	2022	2021
Automotive sales	$ 78,509	$ 67,210	$ 44,125
Automotive regulatory credits	1,790	1,776	1,465
Energy generation and storage sales	5,515	3,376	2,279
Services and other	8,319	6,091	3,802
Total revenues from sales and services	94,133	78,453	51,671
Automotive leasing	2,120	2,476	1,642
Energy generation and storage leasing	520	533	510
Total revenues	$ 96,773	$ 81,462	$ 53,823

Automotive Segment

Automotive Sales

Automotive sales revenue includes revenues related to cash and financing deliveries of new vehicles, and specific other features and services that meet the definition of a performance obligation under ASC 606, including access to our FSD Capability features and their ongoing maintenance, internet connectivity, free Supercharging programs and over-the-air software updates. We recognize revenue on automotive sales upon delivery to the customer, which is when the control of a vehicle transfers. Payments are typically received at the point control transfers or in accordance with payment terms customary to the business, except sales we finance for which payments are collected over the contractual loan term. We also recognize a sales return reserve based on historical experience plus consideration for expected future market values, when we offer resale value guarantees or similar buyback terms. Other features and services such as access to our internet connectivity, unlimited free Supercharging and over-the-air software updates are provisioned upon control transfer of a vehicle and recognized over time on a straight-line basis as we have a stand-ready obligation to deliver such services to the customer. Other limited free Supercharging incentives are recognized based on actual usage or expiration, whichever is earlier. We recognize revenue related to these other features and services over the performance period, which is generally the expected ownership life of the vehicle. Revenue related to FSD Capability features is recognized when functionality is delivered to the customer and their ongoing maintenance is recognized over time. For our obligations related to automotive sales, we estimate standalone selling price by considering costs used to develop and deliver the service, third-party pricing of similar options and other information that may be available.

Any fees that are paid or payable by us to a customer’s lender when we arrange the financing are recognized as an offset against automotive sales revenue. Costs to obtain a contract mainly relate to commissions paid to our sales personnel for the sale of vehicles. As our contract costs related to automotive sales are typically fulfilled within one year, the costs to obtain a contract are expensed as incurred. Amounts billed to customers related to shipping and handling are classified as automotive sales revenue, and we have elected to recognize the cost for freight and shipping when control over vehicles, parts or accessories have transferred to the customer as an expense in cost of automotive sales revenue. Our policy is to exclude taxes collected from a customer from the transaction price of automotive contracts.

We offer resale value guarantees to our commercial banking partners in connection with certain vehicle leasing programs. Under these programs, we originate the lease with our end customer and immediately transfer the lease and the underlying vehicle to our commercial banking partner, with the transaction being accounted for as a sale under ASC 606. We receive upfront payment for the vehicle, do not bear casualty and credit risks during the lease term, and we provide a guarantee capped to a limit if they are unable to sell the vehicle at or above the vehicle's contract residual value at the end of the lease term. We estimate a guarantee liability in accordance with ASC 460, *Guarantees* and record it within other liabilities on our consolidated balance sheet. On a quarterly basis, we assess the estimated market value of vehicles sold under this program to determine whether there have been changes to the amount of expected resale value guarantee payments. As we accumulate more data related to the resale values of our vehicles or as market conditions change, there may be material changes to their estimated values. The total guarantee liability on vehicles sold under this program was immaterial as of December 31, 2023.

Deferred revenue related to the access to our FSD Capability features and their ongoing maintenance, internet connectivity, free Supercharging programs and over-the-air software updates primarily on automotive sales consisted of the following (in millions):

	Year Ended December 31,	
	2023	**2022**
Deferred revenue— beginning of period	$ 2,913	$ 2,382
Additions	1,201	1,178
Net changes in liability for pre-existing contracts	17	(67)
Revenue recognized	(595)	(580)
Deferred revenue— end of period	$ 3,536	$ 2,913

Deferred revenue is equivalent to the total transaction price allocated to the performance obligations that are unsatisfied, or partially unsatisfied, as of the balance sheet date. Revenue recognized from the deferred revenue balance as of December 31, 2022 was $469 million for the year ended December 31, 2023. We had recognized revenue of $472 million from the deferred revenue balance as of December 31, 2021, for the year ended December 31, 2022, primarily related to the general FSD Capability feature release in North America in the fourth quarter of 2022. Of the total deferred revenue balance as of December 31, 2023, we expect to recognize $926 million of revenue in the next 12 months. The remaining balance will be recognized at the time of transfer of control of the product or over the performance period as discussed above in Automotive Sales.

We have been providing loans for financing our automotive deliveries in volume since fiscal year 2022. As of December 31, 2023 and 2022, we have recorded net financing receivables on the consolidated balance sheets, of which $242 million and $128 million, respectively, is recorded within Accounts receivable, net, for the current portion and $1.04 billion and $665 million, respectively, is recorded within Other non-current assets for the long-term portion.

Automotive Regulatory Credits

We earn tradable credits in the operation of our automotive business under various regulations related to ZEVs, greenhouse gas, fuel economy and clean fuel. We sell these credits to other regulated entities who can use the credits to comply with emission standards and other regulatory requirements.

Payments for automotive regulatory credits are typically received at the point control transfers to the customer, or in accordance with payment terms customary to the business. We recognize revenue on the sale of automotive regulatory credits, which have negligible incremental costs associated with them, at the time control of the regulatory credits is transferred to the purchasing party. Deferred revenue related to sales of automotive regulatory credits was immaterial as of December 31, 2023 and 2022. Revenue recognized from the deferred revenue balance as of December 31, 2022 and 2021 was immaterial for the years ended December 31, 2023 and 2022. During the year ended December 31, 2022, we had also recognized $288 million in revenue due to changes in regulation which entitled us to additional consideration for credits sold previously.

Automotive Leasing Revenue

Direct Vehicle Operating Leasing Program

We have outstanding leases under our direct vehicle operating leasing programs in the U.S., Canada and in certain countries in Europe. Qualifying customers are permitted to lease a vehicle directly from Tesla for up to 48 months. At the end of the lease term, customers are generally required to return the vehicles to us. We account for these leasing transactions as operating leases. We record leasing revenues to automotive leasing revenue on a straight-line basis over the contractual term, and we record the depreciation of these vehicles to cost of automotive leasing revenue. For the years ended December 31, 2023, 2022 and 2021, we recognized $1.86 billion, $1.75 billion and $1.25 billion of direct vehicle leasing revenue, respectively. As of December 31, 2023 and 2022, we had deferred $458 million and $407 million, respectively, of lease-related upfront payments, which will be recognized on a straight-line basis over the contractual terms of the individual leases.

Our policy is to exclude taxes collected from a customer from the transaction price of automotive contracts.

Direct Sales-Type Leasing Program

We have outstanding direct leases and vehicles financed by us under loan arrangements accounted for as sales-type leases under ASC 842, *Leases* ("ASC 842"), in certain countries in Asia and Europe. Depending on the specific program, customers may or may not have a right to return the vehicle to us during or at the end of the lease term. If the customer does not have a right to return, the customer will take title to the vehicle at the end of the lease term after making all contractual payments. Under the programs for which there is a right to return, the purchase option is reasonably certain to be exercised by the lessee and we therefore expect the customer to take title to the vehicle at the end of the lease term after making all contractual payments. Our arrangements under these programs can have terms for up to 72 months. We recognize all revenue and costs associated with the sales-type lease as automotive leasing revenue and automotive leasing cost of revenue, respectively, upon delivery of the vehicle to the customer. Interest income based on the implicit rate in the lease is recorded to automotive leasing revenue over time as customers are invoiced on a monthly basis. For the years ended December 31, 2023, 2022 and 2021, we recognized $215 million, $683 million and $369 million, respectively, of sales-type leasing revenue and $164 million, $427 million and $234 million, respectively, of sales-type leasing cost of revenue.

Services and Other Revenue

Services and other revenue consists of sales of used vehicles, non-warranty after-sales vehicle services, body shop and parts, paid Supercharging, vehicle insurance revenue and retail merchandise.

Revenues related to repair, maintenance and vehicle insurance services are recognized over time as services are provided and extended service plans are recognized over the performance period of the service contract as the obligation represents a stand-ready obligation to the customer. We sell used vehicles, services, service plans, vehicle components and merchandise separately and thus use standalone selling prices as the basis for revenue allocation to the extent that these items are sold in transactions with other performance obligations. Payment for used vehicles, services, vehicle components, and merchandise are typically received at the point when control transfers to the customer or in accordance with payment terms customary to the business. Payments received for prepaid plans are refundable upon customer cancellation of the related contracts and are included within Customer deposits on the consolidated balance sheets. We record in Deferred revenue any non-refundable prepayment amounts that are collected from customers and unearned insurance premiums, which is recognized as revenue ratably over the respective customer contract term. Deferred revenue excluding unearned insurance premiums was immaterial as of December 31, 2023 and 2022.

Energy Generation and Storage Segment

<u>Energy Generation and Storage Sales</u>

Energy generation and storage sales revenue consists of the sale of solar energy systems and energy storage systems to residential, small commercial, large commercial and utility grade customers. Sales of solar energy systems to residential and small scale commercial customers consist of the engineering, design and installation of the system. Residential and small scale commercial customers pay the full purchase price of the solar energy system upfront. Revenue for the design and installation obligation is recognized when control transfers, which is when we install a solar energy system and the system passes inspection by the utility or the authority having jurisdiction. Sales of energy storage systems to residential and small scale commercial customers consist of the installation of the energy storage system and revenue is recognized when control transfers, which is when the product has been delivered or, if we are performing installation, when installed and commissioned. Payment for such storage systems is made upon invoice or in accordance with payment terms customary to the business.

For large commercial and utility grade energy storage system sales which consist of the engineering, design and installation of the system, customers make milestone payments that are consistent with contract-specific phases of a project. Revenue from such contracts is recognized over time using the percentage of completion method based on cost incurred as a percentage of total estimated contract costs for energy storage system sales.

In instances where there are multiple performance obligations in a single contract, we allocate the consideration to the various obligations in the contract based on the relative standalone selling price method. Standalone selling prices are estimated based on estimated costs plus margin or by using market data for comparable products. Costs to obtain a contract relate mainly to commissions paid to our sales personnel related to the sale of energy storage systems. As our contract costs related to energy storage system sales are typically fulfilled within one year, the costs to obtain a contract are expensed as incurred.

As part of our energy storage system contracts, we may provide the customer with performance guarantees that warrant that the underlying system will meet or exceed the minimum energy performance requirements specified in the contract. If an energy storage system does not meet the performance guarantee requirements, we may be required to pay liquidated damages. Other forms of variable consideration related to our large commercial and utility grade energy storage system contracts include variable customer payments that will be made based on our energy market participation activities. Such guarantees and variable customer payments represent a form of variable consideration and are estimated at contract inception at their most likely amount and updated at the end of each reporting period as additional performance data becomes available. Such estimates are included in the transaction price only to the extent that it is probable a significant reversal of revenue will not occur.

We record as deferred revenue any non-refundable amounts that are collected from customers related to fees charged for prepayments, which is recognized as revenue ratably over the respective customer contract term. As of December 31, 2023 and 2022, deferred revenue related to such customer payments amounted to $1.60 billion and $863 million, respectively, mainly due to contractual payment terms. Revenue recognized from the deferred revenue balance as of December 31, 2022 and 2021 was $571 million and $171 million for the years ended December 31, 2023 and 2022, respectively. We have elected the practical expedient to omit disclosure of the amount of the transaction price allocated to remaining performance obligations for energy generation and storage sales with an original expected contract length of one year or less and the amount that we have the right to invoice when that amount corresponds directly with the value of the performance to date. As of December 31, 2023, total transaction price allocated to performance obligations that were unsatisfied or partially unsatisfied for contracts with an original expected length of more than one year was $3.43 billion. Of this amount, we expect to recognize $1.05 billion in the next 12 months and the rest over the remaining performance obligation period.

We have been providing loans for financing our energy generation products in volume since fiscal year 2022. As of December 31, 2023 and 2022, we have recorded net financing receivables on the consolidated balance sheets, of which $31 million and $24 million, respectively, is recorded within Accounts receivable, net, for the current portion and $578 million and $387 million, respectively, is recorded within Other non-current assets for the long-term portion.

Energy Generation and Storage Leasing

For revenue arrangements where we are the lessor under operating lease agreements for energy generation and storage products, we record lease revenue from minimum lease payments, including upfront rebates and incentives earned from such systems, on a straight-line basis over the life of the lease term, assuming all other revenue recognition criteria have been met. The difference between the payments received and the revenue recognized is recorded as deferred revenue or deferred asset on the consolidated balance sheet.

For solar energy systems where customers purchase electricity from us under PPAs prior to January 1, 2019, we have determined that these agreements should be accounted for as operating leases pursuant to ASC 840, *Leases*. Revenue is recognized based on the amount of electricity delivered at rates specified under the contracts, assuming all other revenue recognition criteria are met.

We record as deferred revenue any amounts that are collected from customers, including lease prepayments, in excess of revenue recognized, which is recognized as revenue ratably over the respective customer contract term. As of December 31, 2023 and 2022, deferred revenue related to such customer payments amounted to $181 million and $191 million, respectively. Deferred revenue also includes the portion of rebates and incentives received from utility companies and various local and state government agencies, which is recognized as revenue over the lease term. As of December 31, 2023 and 2022, deferred revenue from rebates and incentives was immaterial.

We capitalize initial direct costs from the execution of agreements for solar energy systems and PPAs, which include the referral fees and sales commissions, as an element of solar energy systems, net, and subsequently amortize these costs over the term of the related agreements.

Cost of Revenues

Automotive Segment

Automotive Sales

Cost of automotive sales revenue includes direct and indirect materials, labor costs, manufacturing overhead, including depreciation costs of tooling and machinery, shipping and logistic costs, vehicle connectivity costs, FSD Capability ongoing maintenance costs, allocations of electricity and infrastructure costs related to our Supercharger network and reserves for estimated warranty expenses. Cost of automotive sales revenues also includes adjustments to warranty expense and charges to write down the carrying value of our inventory when it exceeds its estimated net realizable value and to provide for obsolete and on-hand inventory in excess of forecasted demand. Additionally, cost of automotive sales revenue benefits from manufacturing credits earned.

Automotive Leasing

Cost of automotive leasing revenue includes the depreciation of operating lease vehicles, cost of goods sold associated with direct sales-type leases and warranty expense related to leased vehicles.

Services and Other

Costs of services and other revenue includes cost of used vehicles including refurbishment costs, costs associated with providing non-warranty after-sales services, costs associated with our body shops and part sales, costs of paid Supercharging, costs to provide vehicle insurance and costs for retail merchandise.

Energy Generation and Storage Segment

Energy Generation and Storage

Cost of energy generation and storage revenue includes direct and indirect material and labor costs, overhead costs, freight, warranty expense, and amortization of certain acquired intangible assets. Cost of energy generation and storage revenue also includes charges to write down the carrying value of our inventory when it exceeds its estimated net realizable value and to provide for obsolete and on-hand inventory in excess of forecasted demand. Additionally, cost of energy generation and storage revenue benefits from manufacturing credits earned. In agreements for solar energy systems and PPAs where we are the lessor, the cost of revenue is primarily comprised of depreciation of the cost of leased solar energy systems, maintenance costs associated with those systems and amortization of any initial direct costs.

Research and Development Costs

Research and development costs are expensed as incurred.

Income Taxes

We are subject to income taxes in the U.S. and in many foreign jurisdictions. Income taxes are computed using the asset and liability method, under which deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

We monitor the realizability of our deferred tax assets taking into account all relevant factors at each reporting period. Significant judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets that are not more likely than not to be realized. In completing our assessment of realizability of our deferred tax assets, we consider our history of income (loss) measured at pre-tax income (loss) adjusted for permanent book-tax differences on a jurisdictional basis, volatility in actual earnings, excess tax benefits related to stock-based compensation in recent prior years, and impacts of the timing of reversal of existing temporary differences. We also rely on our assessment of the Company’s projected future results of business operations, including uncertainty in future operating results relative to historical results, volatility in the market price of our common stock and its performance over time, variable macroeconomic conditions impacting our ability to forecast future taxable income, and changes in business that may affect the existence and magnitude of future taxable income. Our valuation allowance assessment is based on our best estimate of future results considering all available information.

We record liabilities related to uncertain tax positions when, despite our belief that our tax return positions are supportable, we believe that it is more likely than not that those positions may not be fully sustained upon review by tax authorities. Accrued interest and penalties related to unrecognized tax benefits are classified as income tax expense.

The Tax Cuts and Jobs Act subjects a U.S. shareholder to tax on global intangible low-taxed income (“GILTI”) earned by certain foreign subsidiaries. Under GAAP, we can make an accounting policy election to either treat taxes due on the GILTI inclusion as a current period expense or factor such amounts into our measurement of deferred taxes. We elected the deferred method, under which we recorded the corresponding deferred tax assets and liabilities in our consolidated balance sheets.

Comprehensive Income

Comprehensive income is comprised of net income and other comprehensive income (loss). Other comprehensive income (loss) consists of foreign currency translation adjustments and unrealized net gains and losses on investments that have been excluded from the determination of net income.

Stock-Based Compensation

We use the fair value method of accounting for our stock options and RSUs granted to employees and for our ESPP to measure the cost of employee services received in exchange for the stock-based awards. The fair value of stock option awards with only service and/or performance conditions is estimated on the grant or offering date using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model requires inputs such as the risk-free interest rate, expected term and expected volatility. These inputs are subjective and generally require significant judgment. The fair value of RSUs is measured on the grant date based on the closing fair market value of our common stock. The resulting cost is recognized over the period during which an employee is required to provide service in exchange for the awards, usually the vesting period, which is generally four years for stock options and RSUs and six months for the ESPP. Stock-based compensation expense is recognized on a straight-line basis, net of actual forfeitures in the period.

For performance-based awards, stock-based compensation expense is recognized over the expected performance achievement period of individual performance milestones when the achievement of each individual performance milestone becomes probable.

As we accumulate additional employee stock-based awards data over time and as we incorporate market data related to our common stock, we may calculate significantly different volatilities and expected lives, which could materially impact the valuation of our stock-based awards and the stock-based compensation expense that we will recognize in future periods. Stock-based compensation expense is recorded in Cost of revenues, Research and development expense and Selling, general and administrative expense in the consolidated statements of operations.

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests and redeemable noncontrolling interests represent third-party interests in the net assets under certain funding arrangements, or funds, that we have entered into to finance the costs of solar energy systems and vehicles under operating leases. We have determined that the contractual provisions of the funds represent substantive profit-sharing arrangements. We have further determined that the methodology for calculating the noncontrolling interest and redeemable noncontrolling interest balances that reflects the substantive profit-sharing arrangements is a balance sheet approach using the hypothetical liquidation at book value ("HLBV") method. We, therefore, determine the amount of the noncontrolling interests and redeemable noncontrolling interests in the net assets of the funds at each balance sheet date using the HLBV method, which is presented on the consolidated balance sheet as noncontrolling interests in subsidiaries and redeemable noncontrolling interests in subsidiaries. Under the HLBV method, the amounts reported as noncontrolling interests and redeemable noncontrolling interests in the consolidated balance sheet represent the amounts the third parties would hypothetically receive at each balance sheet date under the liquidation provisions of the funds, assuming the net assets of the funds were liquidated at their recorded amounts determined in accordance with GAAP and with tax laws effective at the balance sheet date and distributed to the third parties. The third parties' interests in the results of operations of the funds are determined as the difference in the noncontrolling interest and redeemable noncontrolling interest balances in the consolidated balance sheets between the start and end of each reporting period, after taking into account any capital transactions between the funds and the third parties. However, the redeemable noncontrolling interest balance is at least equal to the redemption amount. The redeemable noncontrolling interest balance is presented as temporary equity in the mezzanine section of the consolidated balance sheet since these third parties have the right to redeem their interests in the funds for cash or other assets. For certain funds, there have been significant fluctuations in net (loss) income attributable to noncontrolling interests and redeemable noncontrolling interests in subsidiaries due to changes in the liquidation provisions as time-based milestones have been reached.

Net Income per Share of Common Stock Attributable to Common Stockholders

Basic net income per share of common stock attributable to common stockholders is calculated by dividing net income attributable to common stockholders by the weighted-average shares of common stock outstanding for the period. Potentially dilutive shares, which are based on the weighted-average shares of common stock underlying outstanding stock-based awards, warrants and convertible senior notes using the treasury stock method or the if-converted method, as applicable, are included when calculating diluted net income per share of common stock attributable to common stockholders when their effect is dilutive.

Furthermore, in connection with the offerings of our convertible senior notes, we entered into convertible note hedges and warrants (see Note 11, *Debt*). However, our convertible note hedges are not included when calculating potentially dilutive shares since their effect is always anti-dilutive. The strike price on the warrants were below our average share price during the period and were included in the tables below. Warrants are included in the weighted-average shares used in computing basic net income per share of common stock in the period(s) they are settled.

The following table presents the reconciliation of net income attributable to common stockholders to net income used in computing basic and diluted net income per share of common stock (in millions):

	Year Ended December 31,		
	2023	**2022**	**2021**
Net income attributable to common stockholders	$ 14,997	$ 12,556	$ 5,519
Less: Buy-out of noncontrolling interest	(2)	(27)	(5)
Net income used in computing basic net income per share of common stock	14,999	12,583	5,524
Less: Dilutive convertible debt	—	(1)	(9)
Net income used in computing diluted net income per share of common stock	$ 14,999	$ 12,584	$ 5,533

The following table presents the reconciliation of basic to diluted weighted average shares used in computing net income per share of common stock attributable to common stockholders (in millions):

	Year Ended December 31,		
	2023	2022	2021
Weighted average shares used in computing net income per share of common stock, basic	3,174	3,130	2,959
Add:			
Stock-based awards	298	310	292
Convertible senior notes	2	3	29
Warrants	11	32	106
Weighted average shares used in computing net income per share of common stock, diluted	3,485	3,475	3,386

The following table presents the potentially dilutive shares that were excluded from the computation of diluted net income per share of common stock attributable to common stockholders, because their effect was anti-dilutive (in millions):

	Year Ended December 31,		
	2023	2022	2021
Stock-based awards	12	4	1

Business Combinations

We account for business acquisitions under ASC 805, *Business Combinations*. The total purchase consideration for an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities assumed at the acquisition date. Costs that are directly attributable to the acquisition are expensed as incurred. Identifiable assets (including intangible assets), liabilities assumed (including contingent liabilities) and noncontrolling interests in an acquisition are measured initially at their fair values at the acquisition date. We recognize goodwill if the fair value of the total purchase consideration and any noncontrolling interests is in excess of the net fair value of the identifiable assets acquired and the liabilities assumed. We recognize a bargain purchase gain within Other income (expense), net, in the consolidated statement of operations if the net fair value of the identifiable assets acquired and the liabilities assumed is in excess of the fair value of the total purchase consideration and any noncontrolling interests. We include the results of operations of the acquired business in the consolidated financial statements beginning on the acquisition date.

Cash and Cash Equivalents

All highly liquid investments with an original maturity of three months or less at the date of purchase are considered cash equivalents. Our cash equivalents are primarily comprised of U.S. government securities, money market funds and commercial paper.

Restricted Cash

We maintain certain cash balances restricted as to withdrawal or use. Our restricted cash is comprised primarily of cash held to service certain payments under various secured debt facilities. In addition, restricted cash includes cash held as collateral for sales to lease partners with a resale value guarantee, letters of credit, real estate leases and deposits held for our insurance services. We record restricted cash as other assets in the consolidated balance sheets and determine current or non-current classification based on the expected duration of the restriction.

Our total cash and cash equivalents and restricted cash, as presented in the consolidated statements of cash flows, was as follows (in millions):

	December 31, 2023	December 31, 2022	December 31, 2021
Cash and cash equivalents	$ 16,398	$ 16,253	$ 17,576
Restricted cash included in prepaid expenses and other current assets	543	294	345
Restricted cash included in other non-current assets	248	377	223
Total as presented in the consolidated statements of cash flows	$ 17,189	$ 16,924	$ 18,144

Investments

Investments may be comprised of a combination of marketable securities, including U.S. government securities, corporate debt securities, commercial paper, time deposits, and certain certificates of deposit, which are all designated as available-for-sale and reported at estimated fair value, with unrealized gains and losses recorded in accumulated other comprehensive income which is included within stockholders’ equity. Available-for-sale marketable securities with maturities greater than three months at the date of purchase are included in short-term investments in our consolidated balance sheets. Interest, dividends, amortization and accretion of purchase premiums and discounts on these investments are included within Interest income in our consolidated statements of operations.

The cost of available-for-sale investments sold is based on the specific identification method. Realized gains and losses on the sale of available-for-sale investments are recorded in Other income (expense), net.

We regularly review all of our investments for declines in fair value. The review includes but is not limited to (i) the consideration of the cause of the decline, (ii) any currently recorded expected credit losses and (iii) the creditworthiness of the respective security issuers. The amortized cost basis of our investments approximates its fair value.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable primarily include amounts related to receivables from financial institutions and leasing companies offering various financing products to our customers, sales of energy generation and storage products, sales of regulatory credits to other automotive manufacturers and government rebates already passed through to customers. We provide an allowance against accounts receivable for the amount we expect to be uncollectible. We write-off accounts receivable against the allowance when they are deemed uncollectible.

Depending on the day of the week on which the end of a fiscal quarter falls, our accounts receivable balance may fluctuate as we are waiting for certain customer payments to clear through our banking institutions and receipts of payments from our financing partners, which can take up to approximately two weeks based on the contractual payment terms with such partners. Our accounts receivable balances associated with our sales of regulatory credits are dependent on contractual payment terms. Additionally, government rebates can take up to a year or more to be collected depending on the customary processing timelines of the specific jurisdictions issuing them. These various factors may have a significant impact on our accounts receivable balance from period to period. As of December 31, 2023 and 2022, we had $207 million and $753 million, respectively, of long-term government rebates receivable in Other non-current assets in our consolidated balance sheets.

Financing Receivables

We provide financing options to our customers for our automotive and energy products. Financing receivables are carried at amortized cost, net of allowance for loan losses. Provisions for loan losses are charged to operations in amounts sufficient to maintain the allowance for loan losses at levels considered adequate to cover expected credit losses on the financing receivables. In determining expected credit losses, we consider our historical level of credit losses, current economic trends, and reasonable and supportable forecasts that affect the collectability of the future cash flows.

When originating consumer receivables, we review the credit application, the proposed contract terms, credit bureau information (e.g., FICO score) and other information. Our evaluation emphasizes the applicant’s ability to pay and creditworthiness focusing on payment, affordability, and applicant credit history as key considerations. Generally, all customers in this portfolio have strong creditworthiness at loan origination.

After origination, we review the credit quality of retail financing based on customer payment activity and aging analysis. For all financing receivables, we define “past due” as any payment, including principal and interest, which is at least 31 days past the contractual due date. As of December 31, 2023 and 2022, the vast majority of our financing receivables were at current status with only an immaterial balance being past due. As of December 31, 2023, the majority of our financing receivables, excluding MyPower notes receivable, were originated in 2023 and 2022, and as of December 31, 2022, the majority of our financing receivables, excluding MyPower notes receivable, were originated in 2022.

We have customer notes receivable under the legacy MyPower loan program, which provided residential customers with the option to finance the purchase of a solar energy system through a 30-year loan and were all originated prior to year 2018. The outstanding balances, net of any allowance for expected credit losses, are presented on the consolidated balance sheets as a component of Prepaid expenses and other current assets for the current portion and as Other non-current assets for the long-term portion. As of December 31, 2023 and 2022, the total outstanding balance of MyPower customer notes receivable, net of allowance for expected credit losses, was $266 million and $280 million, respectively, of which $5 million and $7 million were due in the next 12 months as of December 31, 2023 and 2022, respectively. As of December 31, 2023 and 2022, the allowance for expected credit losses was $36 million and $37 million, respectively.

Concentration of Risk

Credit Risk

Financial instruments that potentially subject us to a concentration of credit risk consist of cash, cash equivalents, investments, restricted cash, accounts receivable and other finance receivables. Our cash and investments balances are primarily on deposit at high credit quality financial institutions or invested in money market funds. These deposits are typically in excess of insured limits. As of December 31, 2023 and 2022, no entity represented 10% or more of our total receivables balance.

Supply Risk

We are dependent on our suppliers, including single source suppliers, and the inability of these suppliers to deliver necessary components of our products in a timely manner at prices, quality levels and volumes acceptable to us, or our inability to efficiently manage these components from these suppliers, could have a material adverse effect on our business, prospects, financial condition and operating results.

Inventory Valuation

Inventories are stated at the lower of cost or net realizable value. Cost is computed using standard cost for vehicles and energy products, which approximates actual cost on a first-in, first-out basis. We record inventory write-downs for excess or obsolete inventories based upon assumptions about current and future demand forecasts. If our inventory on-hand is in excess of our future demand forecast, the excess amounts are written-off.

We also review our inventory to determine whether its carrying value exceeds the net amount realizable upon the ultimate sale of the inventory. This requires us to determine the estimated selling price of our vehicles less the estimated cost to convert the inventory on-hand into a finished product. Once inventory is written-down, a new, lower cost basis for that inventory is established and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Should our estimates of future selling prices or production costs change, additional and potentially material write-downs may be required. A small change in our estimates may result in a material charge to our reported financial results.

Operating Lease Vehicles

Vehicles that are leased as part of our direct vehicle leasing program are classified as operating lease vehicles at cost less accumulated depreciation. We generally depreciate their cost, less residual value, using the straight-line-method to cost of automotive leasing revenue over the contractual period. The gross cost of operating lease vehicles as of December 31, 2023 and 2022 was $7.36 billion and $6.08 billion, respectively. Operating lease vehicles on the consolidated balance sheets are presented net of accumulated depreciation of $1.38 billion and $1.04 billion as of December 31, 2023 and 2022, respectively.

Digital Assets, Net

We currently account for all digital assets held as indefinite-lived intangible assets in accordance with ASC 350, *Intangibles—Goodwill and Other*. We have ownership of and control over our digital assets and we may use third-party custodial services to secure it. The digital assets are initially recorded at cost and are subsequently remeasured on the consolidated balance sheet at cost, net of any impairment losses incurred since acquisition.

We determine the fair value of our digital assets on a nonrecurring basis in accordance with ASC 820, *Fair Value Measurement* ("ASC 820"), based on quoted prices on the active exchange(s) that we have determined is the principal market for such assets (Level I inputs). We perform an analysis each quarter to identify whether events or changes in circumstances, principally decreases in the quoted prices on active exchanges, indicate that it is more likely than not that our digital assets are impaired. In determining if an impairment has occurred, we consider the lowest market price of one unit of digital asset quoted on the active exchange since acquiring the digital asset. When the then current carrying value of a digital asset exceeds the fair value determined each quarter, an impairment loss has occurred with respect to those digital assets in the amount equal to the difference between their carrying values and the prices determined.

Impairment losses are recognized within Restructuring and other in the consolidated statements of operations in the period in which the impairment is identified. Gains are not recorded until realized upon sale(s), at which point they are presented net of any impairment losses for the same digital assets held within Restructuring and other. In determining the gain to be recognized upon sale, we calculate the difference between the sales price and carrying value of the digital assets sold immediately prior to sale.

See Note 3, *Digital Assets, Net*, for further information regarding digital assets.

Solar Energy Systems, Net

We are the lessor of solar energy systems. Solar energy systems are stated at cost less accumulated depreciation.

Depreciation and amortization is calculated using the straight-line method over the estimated useful lives of the respective assets, as follows:

Solar energy systems in service	30 to 35 years
Initial direct costs related to customer solar energy system lease acquisition costs	Lease term (up to 25 years)

Solar energy systems pending interconnection will be depreciated as solar energy systems in service when they have been interconnected and placed in-service. Solar energy systems under construction represents systems that are under installation, which will be depreciated as solar energy systems in service when they are completed, interconnected and placed in service. Initial direct costs related to customer solar energy system agreement acquisition costs are capitalized and amortized over the term of the related customer agreements.

Property, Plant and Equipment, Net

Property, plant and equipment, net, including leasehold improvements, are recognized at cost less accumulated depreciation. Depreciation is generally computed using the straight-line method over the estimated useful lives of the respective assets, as follows:

Machinery, equipment, vehicles and office furniture	3 to 15 years
Tooling	4 to 7 years
Building and building improvements	15 to 30 years
Computer equipment and software	3 to 10 years

Leasehold improvements are depreciated on a straight-line basis over the shorter of their estimated useful lives or the terms of the related leases.

Upon the retirement or sale of our property, plant and equipment, the cost and associated accumulated depreciation are removed from the consolidated balance sheet, and the resulting gain or loss is reflected on the consolidated statement of operations. Maintenance and repair expenditures are expensed as incurred while major improvements that increase the functionality, output or expected life of an asset are capitalized and depreciated ratably over the identified useful life.

Interest expense on outstanding debt is capitalized during the period of significant capital asset construction. Capitalized interest on construction in progress is included within Property, plant and equipment, net and is amortized over the life of the related assets.

Long-Lived Assets Including Acquired Intangible Assets

We review our property, plant and equipment, solar energy systems, long-term prepayments and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. We measure recoverability by comparing the carrying amount to the future undiscounted cash flows that the asset is expected to generate. If the asset is not recoverable, its carrying amount would be adjusted down to its fair value. For the years ended December 31, 2023, 2022 and 2021, we have recognized no material impairments of our long-lived assets.

Intangible assets with definite lives are amortized on a straight-line basis over their estimated useful lives, which range from seven to thirty years.

Goodwill

We assess goodwill for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that it might be impaired, by comparing its carrying value to the reporting unit's fair value. For the years ended December 31, 2023, 2022, and 2021, we did not recognize any impairment of goodwill.

Capitalization of Software Costs

We capitalize costs incurred in the development of internal use software, during the application development stage to Property, plant and equipment, net on the consolidated balance sheets. Costs related to preliminary project activities and post-implementation activities are expensed as incurred. Such costs are amortized on a straight-line basis over their estimated useful life of three to five years.

Software development costs incurred in development of software to be sold, leased, or otherwise marketed, incurred subsequent to the establishment of technological feasibility and prior to the general availability of the software are capitalized when they are expected to become significant. Such costs are amortized over the estimated useful life of the applicable software once it is made generally available to our customers.

We evaluate the useful lives of these assets on an annual basis, and we test for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets. For the years ended December 31, 2023, 2022, and 2021, we have recognized no impairments of capitalized software costs.

Foreign Currency

We determine the functional and reporting currency of each of our international subsidiaries and their operating divisions based on the primary currency in which they operate. In cases where the functional currency is not the U.S. dollar, we recognize a cumulative translation adjustment created by the different rates we apply to current period income or loss and the balance sheet. For each subsidiary, we apply the monthly average functional exchange rate to its monthly income or loss and the month-end functional currency rate to translate the balance sheet.

Foreign currency transaction gains and losses are a result of the effect of exchange rate changes on transactions denominated in currencies other than the functional currency of the respective subsidiary. Transaction gains and losses are recognized in Other income (expense), net, in the consolidated statements of operations. For the years ended December 31, 2023, 2022 and 2021, we recorded a net foreign currency transaction gain of $122 million, loss of $89 million and gain of $97 million, respectively.

Warranties

We provide a manufacturer's warranty on all new and used vehicles and a warranty on the installation and components of the energy generation and storage systems we sell for periods typically between 10 to 25 years. We accrue a warranty reserve for the products sold by us, which includes our best estimate of the projected costs to repair or replace items under warranties and recalls if identified. These estimates are based on actual claims incurred to date and an estimate of the nature, frequency and costs of future claims. These estimates are inherently uncertain and changes to our historical or projected warranty experience may cause material changes to the warranty reserve in the future. The warranty reserve does not include projected warranty costs associated with our vehicles subject to operating lease accounting and our solar energy systems under lease contracts or PPAs, as the costs to repair these warranty claims are expensed as incurred. The portion of the warranty reserve expected to be incurred within the next 12 months is included within Accrued liabilities and other, while the remaining balance is included within Other long-term liabilities on the consolidated balance sheets. For liabilities that we are entitled to receive indemnification from our suppliers, we record receivables for the contractually obligated amounts on the consolidated balance sheets as a component of Prepaid expenses and other current assets for the current portion and as Other non-current assets for the long-term portion. Warranty expense is recorded as a component of Cost of revenues in the consolidated statements of operations. Due to the magnitude of our automotive business, our accrued warranty balance is primarily related to our automotive segment. Accrued warranty activity consisted of the following (in millions):

	Year Ended December 31,		
	2023	**2022**	**2021**
Accrued warranty—beginning of period	$ 3,505	$ 2,101	$ 1,468
Warranty costs incurred	(1,225)	(803)	(525)
Net changes in liability for pre-existing warranties, including expirations and foreign exchange impact	539	522	102
Provision for warranty	2,333	1,685	1,056
Accrued warranty—end of period	$ 5,152	$ 3,505	$ 2,101

Customer Deposits

Customer deposits primarily consist of refundable cash payments from customers at the time they place an order or reservation for a vehicle or an energy product and any additional payments up to the point of delivery or the completion of installation. Customer deposits also include prepayments on contracts that can be cancelled without significant penalties, such as vehicle maintenance plans. Customer deposits are included in Accrued liabilities and other on the consolidated balance sheets until refunded, forfeited or applied towards the customer's purchase balance.

Government Assistance Programs and Incentives

Globally, the operation of our business is impacted by various government programs, incentives, and other arrangements. Government incentives are recorded in our consolidated financial statements in accordance with their purpose as a reduction of expense, or an offset to the related capital asset. The benefit is generally recorded when all conditions attached to the incentive have been met or are expected to be met and there is reasonable assurance of their receipt.

The IRA Incentives

On August 16, 2022, the IRA was enacted into law and is effective for taxable years beginning after December 31, 2022. The IRA includes multiple incentives to promote clean energy, electric vehicles, battery and energy storage manufacture or purchase, in addition to a new corporate alternative minimum tax of 15% on adjusted financial statement income of corporations with profits greater than $1 billion. Some of these measures are expected to materially affect our consolidated financial statements. For the year ended December 31, 2023, the impact from our IRA incentive was primarily a reduction of our material costs in our consolidated statement of operations. We will continue to evaluate the effects of the IRA as more guidance is issued and the relevant implications to our consolidated financial statements.

Gigafactory New York—New York State Investment and Lease

We have a lease through the Research Foundation for the SUNY Foundation with respect to Gigafactory New York. Under the lease and a related research and development agreement, we are continuing to designate further buildouts at the facility. We are required to comply with certain covenants, including hiring and cumulative investment targets. Under the terms of the arrangement, the SUNY Foundation paid for a majority of the construction costs related to the manufacturing facility and the acquisition and commissioning of certain manufacturing equipment; and we are responsible for any construction or equipment costs in excess of such amount (refer to Note 15, *Commitments and Contingencies*). This incentive reduces the related lease costs of the facility within the Energy generation and storage cost of revenues and operating expense line items in our consolidated statements of operations.

Gigafactory Shanghai—Land Use Rights and Economic Benefits

We have an agreement with the local government of Shanghai for land use rights at Gigafactory Shanghai. Under the terms of the arrangement, we are required to meet a cumulative capital expenditure target and an annual tax revenue target starting at the end of 2023. In addition, the Shanghai government has granted to our Gigafactory Shanghai subsidiary certain incentives to be used in connection with eligible capital investments at Gigafactory Shanghai (refer to Note 15, *Commitments and Contingencies*). For the year ended December 31, 2022, we received grant funding of $76 million. These incentives offset the related costs of our facilities and are recorded as a reduction of the cost of the capital investment within the Property, plant and equipment, net line item in our consolidated balance sheets. The incentive therefore reduces the depreciation expense over the useful lives of the related equipment.

Nevada Tax Incentives

In connection with the construction of Gigafactory Nevada, we entered into agreements with the State of Nevada and Storey County in Nevada that provide abatements for specified taxes, discounts to the base tariff energy rates and transferable tax credits of up to $195 million in consideration of capital investment and hiring targets that were met at Gigafactory Nevada.

Gigafactory Texas Tax Incentives

In connection with the construction of Gigafactory Texas, we entered into a 20-year agreement with Travis County in Texas pursuant to which we would receive grant funding equal to 70-80% of property taxes paid by us to Travis County and a separate 10-year agreement with the Del Valle Independent School District in Texas pursuant to which a portion of the taxable value of our property would be capped at a specified amount, in each case subject to our meeting certain minimum economic development metrics through our construction and operations at Gigafactory Texas. This incentive is recorded as a reduction of the related expenses within the Cost of automotive revenues and operating expense line items of our consolidated statements of operations. As of December 31, 2023, the grant funding related to property taxes paid were immaterial.

Defined Contribution Plan

We have a 401(k) savings plan in the U.S. that is intended to qualify as a deferred salary arrangement under Section 401(k) of the Internal Revenue Code and a number of savings plans internationally. Under the 401(k) savings plan, participating employees may elect to contribute up to 90% of their eligible compensation, subject to certain limitations. Beginning in January 2022, we began to match 50% of each employee’s contributions up to a maximum of 6% (capped at $3,000) of the employee’s eligible compensation, vested upon one year of service. During the years ended December 31, 2023 and 2022, we recognized $99 million and $91 million, respectively, of expenses related to employer contributions for the 401(k) savings plan.

Recent Accounting Pronouncements

Recently issued accounting pronouncements not yet adopted

In November 2023, the Financial Accounting Standards Board ("FASB") issued ASU No. 2023-07, Improvements to Reportable Segment Disclosures (Topic 280). This ASU updates reportable segment disclosure requirements by requiring disclosures of significant reportable segment expenses that are regularly provided to the Chief Operating Decision Maker ("CODM") and included within each reported measure of a segment's profit or loss. This ASU also requires disclosure of the title and position of the individual identified as the CODM and an explanation of how the CODM uses the reported measures of a segment's profit or loss in assessing segment performance and deciding how to allocate resources. The ASU is effective for annual periods beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. Adoption of the ASU should be applied retrospectively to all prior periods presented in the financial statements. Early adoption is also permitted. This ASU will likely result in us including the additional required disclosures when adopted. We are currently evaluating the provisions of this ASU and expect to adopt them for the year ending December 31, 2024.

In December 2023, the FASB issued ASU No. 2023-08, Accounting for and Disclosure of Crypto Assets (Subtopic 350-60). This ASU requires certain crypto assets to be measured at fair value separately in the balance sheet and income statement each reporting period. This ASU also enhances the other intangible asset disclosure requirements by requiring the name, cost basis, fair value, and number of units for each significant crypto holding. The ASU is effective for annual periods beginning after December 15, 2024, including interim periods within those fiscal years. Adoption of the ASU requires a cumulative-effect adjustment to the opening balance of retained earnings as of the beginning of the annual reporting period in which an entity adopts the amendments. Early adoption is also permitted, including adoption in an interim period. However, if the ASU is early adopted in an interim period, an entity must adopt the ASU as of the beginning of the fiscal year that includes the interim period. This ASU will result in gains and losses recorded in the consolidated financial statements of operations and additional disclosures when adopted. We are currently evaluating the adoption of this ASU and it will affect the carrying value of our crypto assets held and the gains and losses relating thereto, once adopted.

In December 2023, the FASB issued ASU No. 2023-09, Improvements to Income Tax Disclosures (Topic 740). The ASU requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as additional information on income taxes paid. The ASU is effective on a prospective basis for annual periods beginning after December 15, 2024. Early adoption is also permitted for annual financial statements that have not yet been issued or made available for issuance. This ASU will result in the required additional disclosures being included in our consolidated financial statements, once adopted.

Recently adopted accounting pronouncements

In October 2021, the FASB issued ASU No. 2021-08, Accounting for Contract Assets and Contract Liabilities from Contracts with Customers (Topic 805). This ASU requires an acquirer in a business combination to recognize and measure contract assets and contract liabilities (deferred revenue) from acquired contracts using the revenue recognition guidance in Topic 606. At the acquisition date, the acquirer applies the revenue model as if it had originated the acquired contracts. The ASU is effective for annual periods beginning after December 15, 2022, including interim periods within those fiscal years. We adopted this ASU prospectively on January 1, 2023. This ASU has not and is currently not expected to have a material impact on our consolidated financial statements.

In March 2022, the FASB issued ASU 2022-02, Troubled Debt Restructurings and Vintage Disclosures. This ASU eliminates the accounting guidance for troubled debt restructurings by creditors that have adopted ASU 2016-13, Measurement of Credit Losses on Financial Instruments, which we adopted on January 1, 2020. This ASU also enhances the disclosure requirements for certain loan refinancing and restructurings by creditors when a borrower is experiencing financial difficulty. In addition, the ASU amends the guidance on vintage disclosures to require entities to disclose current period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of ASC 326-20. The ASU is effective for annual periods beginning after December 15, 2022, including interim periods within those fiscal years. We adopted the ASU prospectively on January 1, 2023. This ASU has not and is currently not expected to have a material impact on our consolidated financial statements.

ASU 2020-06

In August 2020, the FASB issued ASU 2020-06, Accounting for Convertible Instruments and Contracts in an Entity's Own Equity. The ASU simplifies the accounting for convertible instruments by removing certain separation models in ASC 470-20, Debt—Debt with Conversion and Other Options, for convertible instruments. The ASU updates the guidance on certain embedded conversion features that are not required to be accounted for as derivatives under Topic 815, Derivatives and Hedging, or that do not result in substantial premiums accounted for as paid-in capital, such that those features are no longer required to be separated from the host contract. The convertible debt instruments will be accounted for as a single liability measured at amortized cost. This will also result in the interest expense recognized for convertible debt instruments to be typically closer to the coupon interest rate when applying the guidance in Topic 835, Interest. Further, the ASU made amendments to the EPS guidance in Topic 260 for convertible debt instruments, the most significant impact of which is requiring the use of the if-converted method for diluted EPS calculation, and no longer allowing the net share settlement method. The ASU also made revisions to Topic 815-40, which provides guidance on how an entity must determine whether a contract qualifies for a scope exception from derivative accounting. The amendments to Topic 815-40 change the scope of contracts that are recognized as assets or liabilities.

On January 1, 2021, we adopted the ASU using the modified retrospective method. We recognized a favorable $211 million cumulative effect of initially applying the ASU as an adjustment to the January 1, 2021 opening balance of accumulated deficit. Due to the recombination of the equity conversion component of our convertible debt remaining outstanding, additional paid in capital was reduced by $474 million and convertible senior notes (mezzanine equity) was reduced by $51 million. The removal of the remaining debt discounts recorded for this previous separation had the effect of increasing our net debt balance by $269 million and we reduced property, plant and equipment by $45 million related to previously capitalized interest. The prior period consolidated financial statements have not been retrospectively adjusted and continue to be reported under the accounting standards in effect for those periods.

Note 3 – Digital Assets, Net

During the years ended December 31, 2023 and 2022, we purchased and/or received immaterial amounts of digital assets. During the year ended December 31, 2023, we recorded an immaterial amount of impairment losses on digital assets. During the year ended December 31, 2022, we recorded $204 million of impairment losses on digital assets and realized gains of $64 million in connection with converting our holdings of digital assets into fiat currency. The gains are presented net of impairment losses in Restructuring and other in the consolidated statements of operations. As of December 31, 2023 and 2022, the carrying value of our digital assets held reflects cumulative impairment of $204 million.

Note 4 – Goodwill and Intangible Assets

Goodwill increased $59 million within the automotive segment from $194 million as of December 31, 2022 to $253 million as of December 31, 2023 primarily from a business combination, net of the impact of a divestiture. There were no accumulated impairment losses as of December 31, 2023 and 2022.

The net carrying value of our intangible assets decreased from $215 million as of December 31, 2022 to $178 million as of December 31, 2023 mainly from amortization.

Note 5 – Fair Value of Financial Instruments

ASC 820, *Fair Value Measurements* ("ASC 820") states that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. The three-tiered fair value hierarchy, which prioritizes which inputs should be used in measuring fair value, is comprised of: (Level I) observable inputs such as quoted prices in active markets; (Level II) inputs other than quoted prices in active markets that are observable either directly or indirectly and (Level III) unobservable inputs for which there is little or no market data. The fair value hierarchy requires the use of observable market data when available in determining fair value. Our assets and liabilities that were measured at fair value on a recurring basis were as follows (in millions):

	December 31, 2023				December 31, 2022			
	Fair Value	Level I	Level II	Level III	Fair Value	Level I	Level II	Level III
Money market funds	$ 109	$ 109	$ —	$ —	$ 2,188	$ 2,188	$ —	$ —
U.S. government securities	5,136	—	5,136	—	894	—	894	—
Corporate debt securities	480	—	480	—	885	—	885	—
Certificates of deposit and time deposits	6,996	—	6,996	—	4,253	—	4,253	—
Commercial paper	470	—	470	—	—	—	—	—
Total	$ 13,191	$ 109	$ 13,082	$ —	$ 8,220	$ 2,188	$ 6,032	$ —

All of our money market funds were classified within Level I of the fair value hierarchy because they were valued using quoted prices in active markets. Our U.S. government securities, certificates of deposit, commercial paper, time deposits and corporate debt securities are classified within Level II of the fair value hierarchy and the market approach was used to determine fair value of these investments.

Our cash, cash equivalents and investments classified by security type as of December 31, 2023 and 2022 consisted of the following (in millions):

	December 31, 2023					
	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cash and Cash Equivalents	Short-Term Investments
Cash	$ 15,903	$ —	$ —	$ 15,903	$ 15,903	$ —
Money market funds	109	—	—	109	109	—
U.S. government securities	5,136	1	(1)	5,136	277	4,859
Corporate debt securities	485	1	(6)	480	—	480
Certificates of deposit and time deposits	6,995	1	—	6,996	—	6,996
Commercial paper	470	—	—	470	109	361
Total cash, cash equivalents and short-term investments	$ 29,098	$ 3	$ (7)	$ 29,094	$ 16,398	$ 12,696

	December 31, 2022					
	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cash and Cash Equivalents	Short-Term Investments
Cash	$ 13,965	$ —	$ —	$ 13,965	$ 13,965	$ —
Money market funds	2,188	—	—	2,188	2,188	—
U.S. government securities	897	—	(3)	894	—	894
Corporate debt securities	907	—	(22)	885	—	885
Certificates of deposit and time deposits	4,252	1	—	4,253	100	4,153
Total cash, cash equivalents and short-term investments	$ 22,209	$ 1	$ (25)	$ 22,185	$ 16,253	$ 5,932

We record gross realized gains, losses and credit losses as a component of Other income (expense), net in the consolidated statements of operations. For the years ended December 31, 2023 and 2022, we did not recognize any material gross realized gains, losses or credit losses. The ending allowance balances for credit losses were immaterial as of December 31, 2023 and 2022. We have determined that the gross unrealized losses on our investments as of December 31, 2023 and 2022 were temporary in nature.

The following table summarizes the fair value of our investments by stated contractual maturities as of December 31, 2023 (in millions):

Due in 1 year or less	$ 12,374
Due in 1 year through 5 years	297
Due in 5 years through 10 years	25
Total	$ 12,696

Disclosure of Fair Values

Our financial instruments that are not re-measured at fair value include accounts receivable, financing receivables, other receivables, digital assets, accounts payable, accrued liabilities, customer deposits and debt. The carrying values of these financial instruments materially approximate their fair values, other than our 2.00% Convertible Senior Notes due in 2024 ("2024 Notes") and digital assets.

We estimate the fair value of the 2024 Notes using commonly accepted valuation methodologies and market-based risk measurements that are indirectly observable, such as credit risk (Level II). In addition, we estimate the fair values of our digital assets based on quoted prices in active markets (Level I). The following table presents the estimated fair values and the carrying values (in millions):

	December 31, 2023		December 31, 2022	
	Carrying Value	**Fair Value**	**Carrying Value**	**Fair Value**
2024 Notes	$ 37	$ 443	$ 37	$ 223
Digital assets, net	$ 184	$ 487	$ 184	$ 191

Note 6 – Inventory

Our inventory consisted of the following (in millions):

	December 31, 2023	**December 31, 2022**
Raw materials	$ 5,390	$ 6,137
Work in process	2,016	2,385
Finished goods (1)	5,049	3,475
Service parts	1,171	842
Total	$ 13,626	$ 12,839

(1) Finished goods inventory includes products in transit to fulfill customer orders, new vehicles available for sale, used vehicles and energy products available for sale.

We write-down inventory for any excess or obsolete inventories or when we believe that the net realizable value of inventories is less than the carrying value. During the years ended December 31, 2023, 2022 and 2021 we recorded write-downs of $233 million, $144 million and $106 million, respectively, in Cost of revenues in the consolidated statements of operations.

Note 7 – Solar Energy Systems, Net

Our solar energy systems, net, consisted of the following (in millions):

	December 31, 2023	December 31, 2022
Solar energy systems in service	$ 6,755	$ 6,785
Initial direct costs related to customer solar energy system lease acquisition costs	104	104
	6,859	6,889
Less: accumulated depreciation and amortization (1)	(1,643)	(1,418)
	5,216	5,471
Solar energy systems under construction	1	2
Solar energy systems pending interconnection	12	16
Solar energy systems, net (2)	$ 5,229	$ 5,489

(1) Depreciation and amortization expense during the years ended December 31, 2023, 2022 and 2021 was $235 million, $235 million and $236 million, respectively.

(2) As of December 31, 2023 and 2022, there were $740 million and $802 million, respectively, of gross solar energy systems under lease pass-through fund arrangements with accumulated depreciation of $157 million and $148 million, respectively.

Note 8 – Property, Plant and Equipment, Net

Our property, plant and equipment, net, consisted of the following (in millions):

	December 31, 2023	December 31, 2022
Machinery, equipment, vehicles and office furniture	$ 16,372	$ 13,558
Tooling	3,147	2,579
Leasehold improvements	3,168	2,366
Land and buildings	9,505	7,751
Computer equipment, hardware and software	3,799	2,072
Construction in progress	5,791	4,263
	41,782	32,589
Less: Accumulated depreciation	(12,057)	(9,041)
Total	$ 29,725	$ 23,548

Construction in progress is primarily comprised of ongoing construction and expansion of our facilities, and equipment and tooling related to the manufacturing of our products. Completed assets are transferred to their respective asset classes and depreciation begins when an asset is ready for its intended use.

Depreciation expense during the years ended December 31, 2023, 2022 and 2021 was $3.33 billion, $2.42 billion and $1.91 billion, respectively.

Panasonic has partnered with us on Gigafactory Nevada with investments in the production equipment that it uses to manufacture and supply us with battery cells. Under our arrangement with Panasonic, we plan to purchase the full output from their production equipment at negotiated prices. As the terms of the arrangement convey a finance lease under ASC 842, we account for their production equipment as leased assets when production commences. We account for each lease and any non-lease components associated with that lease as a single lease component for all asset classes, except production equipment classes embedded in supply agreements. This results in us recording the cost of their production equipment within Property, plant and equipment, net, on the consolidated balance sheets with a corresponding liability recorded to debt and finance leases. Depreciation on Panasonic production equipment is computed using the units-of-production method whereby capitalized costs are amortized over the total estimated productive life of the respective assets. As of December 31, 2023 and 2022, we had cumulatively capitalized gross costs of $2.02 billion and $2.01 billion, respectively, on the consolidated balance sheets in relation to the production equipment under our Panasonic arrangement.

Note 9 – Accrued Liabilities and Other

Our accrued liabilities and other current liabilities consisted of the following (in millions):

	December 31, 2023	December 31, 2022
Accrued purchases (1)	$ 2,721	$ 2,747
Accrued warranty reserve, current portion	1,546	1,025
Payroll and related costs	1,325	1,026
Taxes payable (2)	1,204	1,235
Customer deposits	876	1,063
Operating lease liabilities, current portion	672	485
Sales return reserve, current portion	219	270
Other current liabilities	517	354
Total	$ 9,080	$ 8,205

(1) Accrued purchases primarily reflects receipts of goods and services for which we had not yet been invoiced. As we are invoiced for these goods and services, this balance will reduce and accounts payable will increase.

(2) Taxes payable includes value added tax, income tax, sales tax, property tax and use tax payables.

Note 10 – Other Long-Term Liabilities

Our other long-term liabilities consisted of the following (in millions):

	December 31, 2023	December 31, 2022
Operating lease liabilities	$ 3,671	$ 2,164
Accrued warranty reserve	3,606	2,480
Other non-current liabilities	876	686
Total other long-term liabilities	$ 8,153	$ 5,330

Note 11 – Debt

The following is a summary of our debt and finance leases as of December 31, 2023 (in millions):

	Net Carrying Value		Unpaid Principal Balance	Unused Committed Amount (1)	Contractual Interest Rates	Contractual Maturity Date
	Current	Long-Term				
Recourse debt:						
2024 Notes	$ 37	$ —	$ 37	$ —	2.00 %	May 2024
RCF Credit Agreement	—	—	—	5,000	Not applicable	January 2028
Solar Bonds	—	7	7	—	4.70-5.75%	March 2025 - January 2031
Other	—	—	—	28	Not applicable	December 2026
Total recourse debt	37	7	44	5,028		
Non-recourse debt:						
Automotive Asset-backed Notes	1,906	2,337	4,259	—	0.60-6.57%	July 2024-May 2031
Solar Asset-backed Notes	4	8	13	—	4.80 %	December 2026
Cash Equity Debt	28	330	367	—	5.25-5.81%	July 2033-January 2035
Total non-recourse debt	1,938	2,675	4,639	—		
Total debt	1,975	2,682	$ 4,683	$ 5,028		
Finance leases	398	175				
Total debt and finance leases	$ 2,373	$ 2,857				

The following is a summary of our debt and finance leases as of December 31, 2022 (in millions):

	Net Carrying Value		Unpaid Principal Balance	Unused Committed Amount (2)	Contractual Interest Rates	Contractual Maturity Date
	Current	Long-Term				
Recourse debt:						
2024 Notes	$ —	$ 37	$ 37	$ —	2.00 %	May 2024
Credit Agreement	—	—	—	2,266	Not applicable	July 2023
Solar Bonds	—	7	7	—	4.70-5.75%	March 2025 - January 2031
Total recourse debt	—	44	44	2,266		
Non-recourse debt:						
Automotive Asset-backed Notes	984	613	1,603	—	0.36-4.64%	December 2023-September 2025
Solar Asset-backed Notes	4	13	17	—	4.80 %	December 2026
Cash Equity Debt	28	359	397	—	5.25-5.81%	July 2033-January 2035
Automotive Lease-backed Credit Facilities	—	—	—	151	Not applicable	September 2024
Total non-recourse debt	1,016	985	2,017	151		
Total debt	1,016	1,029	$ 2,061	$ 2,417		
Finance leases	486	568				
Total debt and finance leases	$ 1,502	$ 1,597				

(1) There are no restrictions on draw-down or use for general corporate purposes with respect to any available committed funds under our RCF Credit Agreement, except certain specified conditions prior to draw-down. Refer to the section below for the terms of the facility.

(2) There were no restrictions on draw-down or use for general corporate purposes with respect to any available committed funds under our credit facilities, except certain specified conditions prior to draw-down, including pledging to our lenders sufficient amounts of qualified receivables, inventories, leased vehicles and our interests in those leases or various other assets as described below.

Recourse debt refers to debt that is recourse to our general assets. Non-recourse debt refers to debt that is recourse to only assets of our subsidiaries. The differences between the unpaid principal balances and the net carrying values are due to debt discounts or deferred issuance costs. As of December 31, 2023, we were in material compliance with all financial debt covenants.

2024 Notes

The closing price of our common stock continued to exceed 130% of the applicable conversion price of our 2024 Notes on at least 20 of the last 30 consecutive trading days of each quarter in 2023, causing the 2024 Notes to be convertible by their holders in the subsequent quarter. As of December 31, 2023, the if-converted value of the notes exceeds the outstanding principal amount by $406 million. Upon conversion, the 2024 Notes will be settled in cash, shares of our common stock or a combination thereof, at our election.

Credit Agreement

In June 2015, we entered into a senior asset-based revolving credit agreement (as amended from time to time, the “Credit Agreement”) with a syndicate of banks. Borrowed funds bear interest, at our option, at an annual rate of (a) 1% plus LIBOR or (b) the highest of (i) the federal funds rate plus 0.50%, (ii) the lenders’ “prime rate” or (iii) 1% plus LIBOR. The fee for undrawn amounts is 0.25% per annum. The Credit Agreement is secured by certain of our accounts receivable, inventory and equipment. Availability under the Credit Agreement is based on the value of such assets, as reduced by certain reserves.

In January 2023, we entered into a 5-year senior unsecured revolving credit facility (the “RCF Credit Agreement”) with a syndicate of banks to replace the existing Credit Agreement, which was terminated. The RCF Credit Agreement contains two optional one-year extensions and has a total commitment of up to $5.00 billion, which could be increased up to $7.00 billion under certain circumstances. The underlying borrowings may be used for general corporate purposes. Borrowed funds accrue interest at a variable rate equal to: (i) for dollar-denominated loans, at our election, (a) Term SOFR (the forward-looking secured overnight financing rate) plus 0.10%, or (b) an alternate base rate; (ii) for loans denominated in pounds sterling, SONIA (the sterling overnight index average reference rate); or (iii) for loans denominated in euros, an adjusted EURIBOR (euro interbank offered rate); in each case, plus an applicable margin. The applicable margin will be based on the rating assigned to our senior, unsecured long-term indebtedness (the “Credit Rating”) from time to time. The fee for undrawn amounts is variable based on the Credit Rating and is currently 0.125% per annum.

Automotive Asset-backed Notes

From time to time, we transfer receivables and/or beneficial interests related to certain vehicles (either leased or financed) into special purpose entities ("SPEs") and issue Automotive Asset-backed Notes, backed by these automotive assets to investors. The SPEs are consolidated in the financial statements. The cash flows generated by these automotive assets are used to service the principal and interest payments on the Automotive Asset-backed Notes and satisfy the SPEs' expenses, and any remaining cash is distributed to the owners of the SPEs. We recognize revenue earned from the associated customer lease or financing contracts in accordance with our revenue recognition policy. The SPEs' assets and cash flows are not available to our other creditors, and the creditors of the SPEs, including the Automotive Asset-backed Note holders, have no recourse to our other assets.

In 2023, we transferred beneficial interests related to certain leased vehicles and financing receivables into SPEs and issued $3.93 billion in aggregate principal amount of Automotive Asset-backed Notes, with terms similar to our other previously issued Automotive Asset-backed Notes. The proceeds from the issuance, net of debt issuance costs, were $3.92 billion.

Cash Equity Debt

In connection with the cash equity financing deals closed in 2016, our subsidiaries issued $502 million in aggregate principal amount of debt that bears interest at fixed rates. This debt is secured by, among other things, our interests in certain financing funds and is non-recourse to our other assets.

Automotive Lease-backed Credit Facilities

In the third quarter of 2023, we terminated our Automotive Lease-backed Credit Facilities and the previously committed funds are no longer available for future borrowings.

Pledged Assets

As of December 31, 2023 and 2022, we had pledged or restricted $4.64 billion and $2.02 billion of our assets (consisting principally of operating lease vehicles, financing receivables, restricted cash, and equity interests in certain SPEs) as collateral for our outstanding debt.

Schedule of Principal Maturities of Debt

The future scheduled principal maturities of debt as of December 31, 2023 were as follows (in millions):

	Recourse debt	Non-recourse debt	Total
2024	$ 37	$ 1,941	$ 1,978
2025	4	1,663	1,667
2026	—	494	494
2027	—	276	276
2028	—	44	44
Thereafter	3	221	224
Total	$ 44	$ 4,639	$ 4,683

Note 12 – Leases

We have entered into various operating and finance lease agreements for certain of our offices, manufacturing and warehouse facilities, retail and service locations, data centers, equipment, vehicles, and solar energy systems, worldwide. We determine if an arrangement is a lease, or contains a lease, at inception and record the leases in our financial statements upon lease commencement, which is the date when the underlying asset is made available for use by the lessor.

We have lease agreements with lease and non-lease components, and have elected to utilize the practical expedient to account for lease and non-lease components together as a single combined lease component, from both a lessee and lessor perspective with the exception of direct sales-type leases and production equipment classes embedded in supply agreements. From a lessor perspective, the timing and pattern of transfer are the same for the non-lease components and associated lease component and, the lease component, if accounted for separately, would be classified as an operating lease.

We have elected not to present short-term leases on the consolidated balance sheet as these leases have a lease term of 12 months or less at lease inception and do not contain purchase options or renewal terms that we are reasonably certain to exercise. All other lease assets and lease liabilities are recognized based on the present value of lease payments over the lease term at commencement date. Because most of our leases do not provide an implicit rate of return, we used our incremental borrowing rate based on the information available at lease commencement date in determining the present value of lease payments.

Our leases, where we are the lessee, often include options to extend the lease term for up to 10 years. Some of our leases also include options to terminate the lease prior to the end of the agreed upon lease term. For purposes of calculating lease liabilities, lease terms include options to extend or terminate the lease when it is reasonably certain that we will exercise such options.

Lease expense for operating leases is recognized on a straight-line basis over the lease term as cost of revenues or operating expenses depending on the nature of the leased asset. Certain operating leases provide for annual increases to lease payments based on an index or rate. We calculate the present value of future lease payments based on the index or rate at the lease commencement date for new leases. Differences between the calculated lease payment and actual payment are expensed as incurred. Amortization of finance lease assets is recognized over the lease term as cost of revenues or operating expenses depending on the nature of the leased asset. Interest expense on finance lease liabilities is recognized over the lease term within Interest expense in the consolidated statements of operations.

The balances for the operating and finance leases where we are the lessee are presented as follows (in millions) within our consolidated balance sheets:

	December 31, 2023	December 31, 2022
Operating leases:		
Operating lease right-of-use assets	$ 4,180	$ 2,563
Accrued liabilities and other	$ 672	$ 485
Other long-term liabilities	3,671	2,164
Total operating lease liabilities	$ 4,343	$ 2,649
Finance leases:		
Solar energy systems, net	$ 23	$ 25
Property, plant and equipment, net	601	1,094
Total finance lease assets	$ 624	$ 1,119
Current portion of long-term debt and finance leases	$ 398	$ 486
Long-term debt and finance leases, net of current portion	175	568
Total finance lease liabilities	$ 573	$ 1,054

The components of lease expense are as follows (in millions) within our consolidated statements of operations:

	Year Ended December 31,		
	2023	2022	2021
Operating lease expense:			
Operating lease expense (1)	$ 1,153	$ 798	$ 627
Finance lease expense:			
Amortization of leased assets	$ 506	$ 493	$ 415
Interest on lease liabilities	45	72	89
Total finance lease expense	$ 551	$ 565	$ 504
Total lease expense	$ 1,704	$ 1,363	$ 1,131

(1) Includes short-term leases and variable lease costs, which are immaterial.

Other information related to leases where we are the lessee is as follows:

	December 31, 2023	December 31, 2022
Weighted-average remaining lease term:		
Operating leases	7.4 years	6.4 years
Finance leases	2.3 years	3.1 years
Weighted-average discount rate:		
Operating leases	5.6 %	5.3 %
Finance leases	5.5 %	5.7 %

Supplemental cash flow information related to leases where we are the lessee is as follows (in millions):

	Year Ended December 31,		
	2023	2022	2021
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash outflows from operating leases	$ 1,084	$ 754	$ 616
Operating cash outflows from finance leases (interest payments)	$ 47	$ 75	$ 89
Leased assets obtained in exchange for finance lease liabilities	$ 10	$ 58	$ 486
Leased assets obtained in exchange for operating lease liabilities	$ 2,170	$ 1,059	$ 818

As of December 31, 2023, the maturities of our operating and finance lease liabilities (excluding short-term leases) are as follows (in millions):

	Operating Leases	Finance Leases
2024	$ 892	$ 418
2025	831	81
2026	706	57
2027	603	38
2028	508	2
Thereafter	1,820	4
Total minimum lease payments	5,360	600
Less: Interest	1,017	27
Present value of lease obligations	4,343	573
Less: Current portion	672	398
Long-term portion of lease obligations	$ 3,671	$ 175

As of December 31, 2023, we have excluded from the table above additional operating leases that have not yet commenced with aggregate rent payments of $1.53 billion. These operating leases will commence between fiscal year 2024 and 2025 with lease terms of 2 years to 20 years.

Operating Lease and Sales-type Lease Receivables

We are the lessor of certain vehicle and solar energy system arrangements as described in Note 2, *Summary of Significant Accounting Policies*. As of December 31, 2023, maturities of our operating lease and sales-type lease receivables from customers for each of the next five years and thereafter were as follows (in millions):

	Operating Leases	Sales-type Leases
2024	$ 1,405	$ 227
2025	960	214
2026	461	210
2027	227	102
2028	197	25
Thereafter	1,492	2
Gross lease receivables	$ 4,742	$ 780

The above table does not include vehicle sales to customers or leasing partners with a resale value guarantee as the cash payments were received upfront. For our solar PPA arrangements, customers are charged solely based on actual power produced by the installed solar energy system at a predefined rate per kilowatt-hour of power produced. The future payments from such arrangements are not included in the above table as they are a function of the power generated by the related solar energy systems in the future.

Net Investment in Sales-type Leases

Net investment in sales-type leases, which is the sum of the present value of the future contractual lease payments, is presented on the consolidated balance sheets as a component of Prepaid expenses and other current assets for the current portion and as Other non-current assets for the long-term portion. Lease receivables relating to sales-type leases are presented on the consolidated balance sheets as follows (in millions):

	December 31, 2023	December 31, 2022
Gross lease receivables	$ 780	$ 837
Unearned interest income	(78)	(95)
Allowance for expected credit losses	(6)	(4)
Net investment in sales-type leases	$ 696	$ 738
Reported as:		
Prepaid expenses and other current assets	$ 189	$ 164
Other non-current assets	507	574
Net investment in sales-type leases	$ 696	$ 738

Lease Pass-Through Financing Obligation

As of December 31, 2023, we have five transactions referred to as “lease pass-through fund arrangements.” Under these arrangements, our wholly owned subsidiaries finance the cost of solar energy systems with investors through arrangements contractually structured as master leases for an initial term ranging between 10 and 25 years. These solar energy systems are subject to lease or PPAs with customers with an initial term not exceeding 25 years.

Under a lease pass-through fund arrangement, the investor makes a large upfront payment to the lessor, which is one of our subsidiaries, and in some cases, subsequent periodic payments. As of December 31, 2023, the future minimum master lease payments to be received from investors, for each of the next five years and thereafter, were as follows (in millions):

2024	$ 18
2025	27
2026	28
2027	29
2028	29
Thereafter	337
Total	$ 468

Note 13 – Equity Incentive Plans

In June 2019, we adopted the 2019 Equity Incentive Plan (the “2019 Plan”). The 2019 Plan provides for the grant of stock options, restricted stock, RSUs, stock appreciation rights, performance units and performance shares to our employees, directors and consultants. Stock options granted under the 2019 Plan may be either incentive stock options or nonstatutory stock options. Incentive stock options may only be granted to our employees. Nonstatutory stock options may be granted to our employees, directors and consultants. Generally, our stock options and RSUs vest over four years and our stock options are exercisable over a maximum period of 10 years from their grant dates. Vesting typically terminates when the employment or consulting relationship ends.

As of December 31, 2023, 131.1 million shares were reserved and available for issuance under the 2019 Plan.

The following table summarizes our stock option and RSU activity for the year ended December 31, 2023:

	Stock Options				RSUs	
	Number of Options (in thousands)	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (years)	Aggregate Intrinsic Value (in billions)	Number of RSUs (in thousands)	Weighted-Average Grant Date Fair Value
Beginning of period	343,564	$ 30.65			21,333	$ 162.32
Granted	9,521	$ 226.50			11,743	$ 228.33
Exercised or released	(7,626)	$ 43.07			(11,085)	$ 116.47
Cancelled	(1,438)	$ 194.23			(2,903)	$ 192.22
End of period	344,021	$ 35.11	4.31	$ 73.57	19,088	$ 225.01
Vested and expected to vest, December 31, 2023	340,884	$ 33.38	4.27	$ 73.45	18,446	$ 225.76
Exercisable and vested, December 31, 2023	329,124	$ 27.07	4.11	$ 72.90		

The weighted-average grant date fair value of RSUs granted in the years ended December 31, 2023, 2022 and 2021 was $228.33, $239.85 and $261.33, respectively. The aggregate release date fair value of RSUs in the years ended December 31, 2023, 2022 and 2021 was $2.50 billion, $4.32 billion and $5.70 billion, respectively.

The aggregate intrinsic value of options exercised in the years ended December 31, 2023, 2022, and 2021 was $1.33 billion, $1.90 billion and $26.88 billion, respectively. During the year ended December 31, 2021, our CEO exercised all of the remaining vested options from the 2012 CEO Performance Award, which amounted to an intrinsic value of $23.45 billion.

ESPP

Our employees are eligible to purchase our common stock through payroll deductions of up to 15% of their eligible compensation, subject to any plan limitations. The purchase price would be 85% of the lower of the fair market value on the first and last trading days of each six-month offering period. During the years ended December 31, 2023, 2022 and 2021, under the ESPP we issued 2.1 million, 1.4 million and 1.5 million shares, respectively. As of December 31, 2023, there were 97.8 million shares available for issuance under the ESPP.

Fair Value Assumptions

We use the fair value method in recognizing stock-based compensation expense. Under the fair value method, we estimate the fair value of each stock option award with service or service and performance conditions and the ESPP on the grant date generally using the Black-Scholes option pricing model. The weighted-average assumptions used in the Black-Scholes model for stock options are as follows:

	Year Ended December 31,		
	2023	2022	2021
Risk-free interest rate	3.90 %	3.11 %	0.66 %
Expected term (in years)	4.5	4.1	4.3
Expected volatility	63 %	63 %	59 %
Dividend yield	0.0 %	0.0 %	0.0 %
Grant date fair value per share	$ 121.62	$ 114.51	$ 128.02

The fair value of RSUs with service or service and performance conditions is measured on the grant date based on the closing fair market value of our common stock. The risk-free interest rate is based on the U.S. Treasury yield for zero-coupon U.S. Treasury notes with maturities approximating each grant's expected life. We use our historical data in estimating the expected term of our employee grants. The expected volatility is based on the average of the implied volatility of publicly traded options for our common stock and the historical volatility of our common stock.

2018 CEO Performance Award

In March 2018, our stockholders approved the Board of Directors' grant of 304.0 million stock option awards, as adjusted to give effect to the 2020 Stock Split and the 2022 Stock Split, to our CEO (the "2018 CEO Performance Award"). The 2018 CEO Performance Award consisted of 12 vesting tranches with a vesting schedule based entirely on the attainment of both operational milestones (performance conditions) and market conditions, assuming continued employment either as the CEO or as both Executive Chairman and Chief Product Officer and service through each vesting date. Each of the 12 vesting tranches of the 2018 CEO Performance Award vested upon certification by the Board of Directors that both (i) the market capitalization milestone for such tranche, which began at $100.0 billion for the first tranche and increases by increments of $50.0 billion thereafter (based on both a six calendar month trailing average and a 30 calendar day trailing average, counting only trading days), had been achieved, and (ii) any one of the following eight operational milestones focused on total revenue or any one of the eight operational milestones focused on Adjusted EBITDA had been achieved for the four consecutive fiscal quarters on an annualized basis and subsequently reported by us in our consolidated financial statements filed with our Forms 10-Q and/or 10-K. Adjusted EBITDA was defined as net income (loss) attributable to common stockholders before interest expense, provision (benefit) for income taxes, depreciation and amortization and stock-based compensation. Upon vesting and exercise, including the payment of the exercise price of $23.34 per share as adjusted to give effect to the 2020 Stock Split and the 2022 Stock Split, our CEO must hold shares that he acquires for five years post-exercise, other than a cashless exercise where shares are simultaneously sold to pay for the exercise price and any required tax withholding.

The achievement status of the operational milestones as of December 31, 2023 is provided below.

Total Annualized Revenue			Annualized Adjusted EBITDA		
Milestone (in billions)		Achievement Status	Milestone (in billions)		Achievement Status
$	20.0	Achieved	$	1.5	Achieved
$	35.0	Achieved	$	3.0	Achieved
$	55.0	Achieved	$	4.5	Achieved
$	75.0	Achieved	$	6.0	Achieved
$	100.0	-	$	8.0	Achieved
$	125.0	-	$	10.0	Achieved
$	150.0	-	$	12.0	Achieved
$	175.0	-	$	14.0	Achieved

Stock-based compensation under the 2018 CEO Performance Award represented a non-cash expense and was recorded as a Selling, general, and administrative operating expense in our consolidated statements of operations. In each quarter since the grant of the 2018 CEO Performance Award, we had recognized expense, generally on a pro-rated basis, for only the number of tranches (up to the maximum of 12 tranches) that corresponded to the number of operational milestones that had been achieved or had been determined probable of being achieved in the future, in accordance with the following principles.

On the grant date, a Monte Carlo simulation was used to determine for each tranche (i) a fixed amount of expense for such tranche and (ii) the future time when the market capitalization milestone for such tranche was expected to be achieved, or its "expected market capitalization milestone achievement time." Separately, based on a subjective assessment of our future financial performance each quarter, we determined whether it was probable that we would achieve each operational milestone that had not previously been achieved or deemed probable of achievement and if so, the future time when we expected to achieve that operational milestone, or its "expected operational milestone achievement time."

As of December 31, 2022, all remaining unrecognized stock-based compensation expense under the 2018 CEO Performance Award had been recognized. For the years ended December 31, 2022 and 2021, we recorded stock-based compensation expense of $66 million and $910 million, respectively, related to the 2018 CEO Performance Award.

Other Performance-Based Grants

From time to time, the Compensation Committee of our Board of Directors grants certain employees performance-based RSUs and stock options.

As of December 31, 2023, we had unrecognized stock-based compensation expense of $655 million under these grants to purchase or receive an aggregate 5.3 million shares of our common stock. For awards probable of achievement, we estimate the unrecognized stock-based compensation expense of $110 million will be recognized over a weighted-average period of 4.0 years.

For the years ended December 31, 2023 and 2022, we recorded $57 million and $159 million, respectively, of stock-based compensation expense related to these grants, net of forfeitures.

Summary Stock-Based Compensation Information

The following table summarizes our stock-based compensation expense by line item in the consolidated statements of operations (in millions):

	Year Ended December 31,		
	2023	2022	2021
Cost of revenues	$ 741	$ 594	$ 421
Research and development	689	536	448
Selling, general and administrative	382	430	1,252
Total	$ 1,812	$ 1,560	$ 2,121

Our income tax benefits recognized from stock-based compensation arrangements were immaterial while we were under full valuation allowances on our U.S. deferred tax assets during the years ended December 31, 2022 and 2021. With the release of the valuation allowance associated with our federal and certain state deferred tax assets in 2023, income tax benefits recognized from stock-based compensation expense were $326 million during the year ended December 31, 2023. During the years ended December 31, 2023, 2022 and 2021, stock-based compensation expense capitalized to our consolidated balance sheets was $199 million, $245 million and $182 million, respectively. As of December 31, 2023, we had $4.82 billion of total unrecognized stock-based compensation expense related to non-performance awards, which will be recognized over a weighted-average period of 2.8 years.

Note 14 – Income Taxes

Our income before (benefit from) provision for income taxes for the years ended December 31, 2023, 2022 and 2021 was as follows (in millions):

	Year Ended December 31,		
	2023	2022	2021
Domestic	$ 3,196	$ 5,524	$ (130)
Noncontrolling interest and redeemable noncontrolling interest	(23)	31	125
Foreign	6,800	8,164	6,348
Income before income taxes	$ 9,973	$ 13,719	$ 6,343

A (benefit from) provision for income taxes of $(5.00) billion, $1.13 billion and $699 million has been recognized for the years ended December 31, 2023, 2022 and 2021, respectively. The components of the (benefit from) provision for income taxes for the years ended December 31, 2023, 2022 and 2021 consisted of the following (in millions):

	Year Ended December 31,		
	2023	**2022**	**2021**
Current:			
Federal	$ 48	$ —	$ —
State	57	62	9
Foreign	1,243	1,266	839
Total current	1,348	1,328	848
Deferred:			
Federal	(5,246)	26	—
State	(653)	1	—
Foreign	(450)	(223)	(149)
Total deferred	(6,349)	(196)	(149)
Total (Benefit from) provision for income taxes	$ (5,001)	$ 1,132	$ 699

The reconciliation of taxes at the federal statutory rate to our (benefit from) provision for income taxes for the years ended December 31, 2023, 2022 and 2021 was as follows (in millions):

	Year Ended December 31,		
	2023	**2022**	**2021**
Tax at statutory federal rate	$ 2,094	$ 2,881	$ 1,332
State tax, net of federal benefit	(372)	51	6
Nondeductible executive compensation	23	14	201
Excess tax benefits related to stock-based compensation	(288)	(745)	(7,123)
Nontaxable manufacturing credit	(101)	—	—
Foreign income rate differential	(816)	(923)	(668)
U.S. tax credits	(593)	(276)	(328)
GILTI inclusion	670	1,279	1,008
Unrecognized tax benefits	183	252	28
Change in valuation allowance	(5,962)	(1,532)	6,165
Other	161	131	78
(Benefit from) provision for income taxes	$ (5,001)	$ 1,132	$ 699

We monitor the realizability of our deferred tax assets taking into account all relevant factors at each reporting period. As of December 31, 2023, based on the relevant weight of positive and negative evidence, including the amount of our taxable income in recent years which is objective and verifiable, and consideration of our expected future taxable earnings, we concluded that it is more likely than not that our U.S. federal and certain state deferred tax assets are realizable. As such, we released $6.54 billion of our valuation allowance associated with the U.S. federal and state deferred tax assets, with the exception of our California deferred tax assets. We continue to maintain a full valuation allowance against our California deferred tax assets as of December 31, 2023, because we concluded they are not more likely than not to be realized as we expect our California deferred tax assets generation in future years to exceed our ability to use these deferred tax assets.

Deferred tax assets (liabilities) as of December 31, 2023 and 2022 consisted of the following (in millions):

	December 31, 2023	December 31, 2022
Deferred tax assets:		
Net operating loss carry-forwards	$ 2,826	$ 4,486
Research and development credits	1,358	1,184
Other tax credits and attributes	827	217
Deferred revenue	1,035	751
Inventory and warranty reserves	1,258	819
Stock-based compensation	230	185
Operating lease right-of-use liabilities	930	554
Capitalized research and development costs	1,344	693
Deferred GILTI tax assets	760	466
Accruals and others	206	178
Total deferred tax assets	10,774	9,533
Valuation allowance	(892)	(7,349)
Deferred tax assets, net of valuation allowance	9,882	2,184
Deferred tax liabilities:		
Depreciation and amortization	(2,122)	(1,178)
Investment in certain financing funds	(133)	(238)
Operating lease right-of-use assets	(859)	(506)
Other	(116)	(15)
Total deferred tax liabilities	(3,230)	(1,937)
Deferred tax assets (liabilities), net of valuation allowance	$ 6,652	$ 247

As of December 31, 2023, we maintained valuation allowances of $892 million for deferred tax assets that are not more likely than not to be realized, which primarily included deferred tax assets in the state of California and certain foreign operating losses. The valuation allowance on our net deferred tax assets decreased by $6.46 billion and $1.73 billion during the years ended December 31, 2023 and 2022, respectively, and increased by $6.14 billion during the year ended December 31, 2021. The valuation allowance decrease during the year ended December 31, 2023 was primarily due to the release of our valuation allowance with respect to our U.S. federal and certain state deferred tax assets. The changes in valuation allowances during the years ended December 31, 2022 and 2021 were primarily due to changes in our U.S. deferred tax assets and liabilities in the respective year. Among our deferred tax assets in foreign jurisdictions, we recorded a valuation allowance on certain foreign net operating losses that are not more likely than not to be realized. The remainder of our foreign deferred tax assets are more likely than not to be realized given the expectation of future earnings in these jurisdictions.

As of December 31, 2023, we had $10.31 billion of federal and $10.36 billion of state net operating loss carry-forwards available to offset future taxable income, some of which, if not utilized, will begin to expire in 2024 for federal and state purposes. Federal and state laws can impose substantial restrictions on the utilization of net operating loss and tax credit carry-forwards in the event of an "ownership change," as defined in Section 382 of the Internal Revenue Code. We have determined that no significant limitation would be placed on the utilization of our net operating loss and tax credit carry-forwards due to prior ownership changes or expirations.

As of December 31, 2023, we had federal research and development tax credits of $1.10 billion, federal renewable energy tax credits of $605 million, and state research and development tax credits of $923 million. Most of our state research and development tax credits were in the state of California. If not utilized, some of the federal tax credits may expire in various amounts beginning in 2036. However, California research and development tax credits can be carried forward indefinitely.

The local government of Shanghai granted a beneficial corporate income tax rate of 15% to certain eligible enterprises, compared to the 25% statutory corporate income tax rate in China. Our Gigafactory Shanghai subsidiary was granted this beneficial income tax rate of 15% for 2019 through 2023. Starting in 2024, Gigafactory Shanghai is subject to 25% statutory corporate income tax rate in China.

As of December 31, 2023, we intend to indefinitely reinvest our foreign earnings and cash unless such repatriation results in no or minimal tax costs. We have recorded the taxes associated with the foreign earnings we intend to repatriate in the future. For the earnings we intend to indefinitely reinvest, no deferred tax liabilities for foreign withholding or other taxes have been recorded. The estimated amount of such unrecognized withholding tax liability associated with the indefinitely reinvested earnings is approximately $245 million.

Uncertain Tax Positions

The changes to our gross unrecognized tax benefits were as follows (in millions):

December 31, 2020	$	380
Increases in balances related to prior year tax positions		117
Decreases in balances related to prior year tax positions		(90)
Increases in balances related to current year tax positions		124
December 31, 2021		531
Increases in balances related to prior year tax positions		136
Decreases in balances related to prior year tax positions		(12)
Increases in balances related to current year tax positions		222
Decreases in balances related to expiration of the statute of limitations		(7)
December 31, 2022		870
Increases in balances related to prior year tax positions		59
Decreases related to settlement with tax authorities		(6)
Increases in balances related to current year tax positions		255
Decreases in balances related to expiration of the statute of limitations		(4)
December 31, 2023	$	1,174

We include interest and penalties related to unrecognized tax benefits in income tax expense. We recognized net interest and penalties related to unrecognized tax benefits in provision for income taxes line of our consolidated statements of operations of $17 million, $27 million and $4 million for the years ended December 31, 2023, 2022 and 2021, respectively. As of December 31, 2023, and 2022, we have accrued $47 million and $31 million, respectively, related to interest and penalties on our unrecognized tax benefits. Unrecognized tax benefits of $901 million, if recognized, would affect our effective tax rate.

We file income tax returns in the U.S. and various state and foreign jurisdictions. We are currently under examination by the Internal Revenue Service ("IRS") for the years 2015 to 2018. Additional tax years within the periods 2004 to 2014 and 2019 to 2022 remain subject to examination for federal income tax purposes. All net operating losses and tax credits generated to date are subject to adjustment for U.S. federal and state income tax purposes. Our returns for 2004 and subsequent tax years remain subject to examination in U.S. state and foreign jurisdictions.

Given the uncertainty in timing and outcome of our tax examinations, an estimate of the range of the reasonably possible change in gross unrecognized tax benefits within twelve months cannot be made at this time.

Note 15 – Commitments and Contingencies

Operating Lease Arrangement in Buffalo, New York

We have an operating lease arrangement through the Research Foundation for the SUNY Foundation with respect to Gigafactory New York. Under the lease and a related research and development agreement, we are continuing to further develop the facility.

Under this agreement, we are obligated to, among other things, meet employment targets as well as specified minimum numbers of personnel in the State of New York and in Buffalo, New York and spend or incur $5.00 billion in combined capital, operational expenses, costs of goods sold and other costs in the State of New York during the 10-year period beginning April 30, 2018. On an annual basis during the initial lease term, as measured on each anniversary of such date, if we fail to meet these specified investment and job creation requirements, then we would be obligated to pay a $41 million "program payment" to the SUNY Foundation for each year that we fail to meet these requirements. Furthermore, if the arrangement is terminated due to a material breach by us, then additional amounts may become payable by us.

In 2021, an amendment was executed to extend our overall agreement to spend or incur $5.00 billion in combined capital, operational expenses, costs of goods sold and other costs in the State of New York through December 31, 2029. On February 1, 2022, we reported to the State of New York that we had met and exceeded our annual requirements for jobs and investment in Buffalo and New York State. As of December 31, 2023, we have met and expect to meet the requirements under this arrangement based on our current and anticipated level of operations. However, if our expectations as to the costs and timelines of our investment and operations at Buffalo prove incorrect, we may incur additional expenses or be required to make substantial payments to the SUNY Foundation.

Operating Lease Arrangement in Shanghai, China

We have an operating lease arrangement for an initial term of 50 years with the local government of Shanghai for land use rights where we have been constructing Gigafactory Shanghai. Under the terms of the arrangement, we are required to spend RMB 14.08 billion in capital expenditures by the end of 2023, which has been achieved in 2023, and to generate RMB 2.23 billion of annual tax revenues starting at the end of 2023. As of December 31, 2023, we have met and expect to meet the tax revenue requirements based on our current level of spend and sales.

Legal Proceedings

Litigation Relating to 2018 CEO Performance Award

On June 4, 2018, a purported Tesla stockholder filed a putative class and derivative action in the Delaware Court of Chancery against Elon Musk and the members of Tesla's board of directors as then constituted, alleging corporate waste, unjust enrichment and that such board members breached their fiduciary duties by approving the stock-based compensation plan awarded to Elon Musk in 2018. Trial was held November 14-18, 2022. Post-trial briefing and argument are now complete.

Litigation Related to Directors' Compensation

On June 17, 2020, a purported Tesla stockholder filed a derivative action in the Delaware Court of Chancery, purportedly on behalf of Tesla, against certain of Tesla's current and former directors regarding compensation awards granted to Tesla's directors, other than Elon Musk, between 2017 and 2020. The suit asserts claims for breach of fiduciary duty and unjust enrichment and seeks declaratory and injunctive relief, unspecified damages and other relief. Defendants filed their answer on September 17, 2020.

On July 14, 2023, the parties filed a Stipulation and Agreement of Compromise and Settlement, which does not involve an admission of any wrongdoing by any party. If the settlement is approved by the Court, this action will be fully settled and dismissed with prejudice. Pursuant to the terms of the agreement, Tesla provided notice of the proposed settlement to stockholders of record as of July 14, 2023. The Court held a hearing regarding the settlement on October 13, 2023, after which it took the settlement and plaintiff counsels' fee request under advisement. The settlement is not expected to have an adverse impact on our results of operations, cash flows or financial position.

Litigation Relating to Potential Going Private Transaction

Between August 10, 2018 and September 6, 2018, nine purported stockholder class actions were filed against Tesla and Elon Musk in connection with Mr. Musk's August 7, 2018 Twitter post that he was considering taking Tesla private. On January 16, 2019, Plaintiffs filed their consolidated complaint in the United States District Court for the Northern District of California and added as defendants the members of Tesla's board of directors. The consolidated complaint asserts claims for violations of the federal securities laws and seeks unspecified damages and other relief. The parties stipulated to certification of a class of stockholders, which the court granted on November 25, 2020. Trial started on January 17, 2023, and on February 3, 2023, a jury rendered a verdict in favor of the defendants on all counts. After trial, plaintiffs filed a motion for judgment as a matter of law and a motion for new trial, which the Court denied and judgement was entered in favor of defendants on July 11, 2023. On July 14, 2023, plaintiffs filed a notice of appeal.

Between October 17, 2018 and March 8, 2021, seven derivative lawsuits were filed in the Delaware Court of Chancery, purportedly on behalf of Tesla, against Mr. Musk and the members of Tesla's board of directors, as constituted at relevant times, in relation to statements made and actions connected to a potential going private transaction, with certain of the lawsuits challenging additional Twitter posts by Mr. Musk, among other things. Five of those actions were consolidated, and all seven actions have been stayed pending resolution of the appeal in the above-referenced consolidated purported stockholder class action. In addition to these cases, two derivative lawsuits were filed on October 25, 2018 and February 11, 2019 in the U.S. District Court for the District of Delaware, purportedly on behalf of Tesla, against Mr. Musk and the members of the Tesla board of directors as then constituted. Those cases have also been consolidated and stayed pending resolution of the appeal in the above-referenced consolidated purported stockholder class action.

On October 21, 2022, a lawsuit was filed in the Delaware Court of Chancery by a purported shareholder of Tesla alleging, among other things, that board members breached their fiduciary duties in connection with their oversight of the Company's 2018 settlement with the SEC, as amended. Among other things, the plaintiff seeks reforms to the Company's corporate governance and internal procedures, unspecified damages, and attorneys' fees. The parties reached an agreement to stay the case until March 5, 2024.

On November 15, 2021, JPMorgan Chase Bank ("JP Morgan") filed a lawsuit against Tesla in the Southern District of New York alleging breach of a stock warrant agreement that was entered into as part of a convertible notes offering in 2014. In 2018, JP Morgan informed Tesla that it had adjusted the strike price based upon Mr. Musk's August 7, 2018 Twitter post that he was considering taking Tesla private. Tesla disputed JP Morgan's adjustment as a violation of the parties' agreement. In 2021, Tesla delivered shares to JP Morgan per the agreement, which they duly accepted. JP Morgan now alleges that it is owed approximately $162 million as the value of additional shares that it claims should have been delivered as a result of the adjustment to the strike price in 2018. On January 24, 2022, Tesla filed multiple counterclaims as part of its answer to the underlying lawsuit, asserting among other points that JP Morgan should have terminated the stock warrant agreement in 2018 rather than make an adjustment to the strike price that it should have known would lead to a commercially unreasonable result. Tesla believes that the adjustments made by JP Morgan were neither proper nor commercially reasonable, as required under the stock warrant agreements. JP Morgan filed a motion for judgment on the pleadings, which Tesla opposed, and that motion is currently pending before the Court.

Litigation and Investigations Relating to Alleged Discrimination and Harassment

On October 4, 2021, in a case captioned Diaz v. Tesla, a jury in the Northern District of California returned a verdict against Tesla on claims by a former contingent worker that he was subjected to race discrimination while assigned to work at Tesla's Fremont Factory from 2015-2016. A retrial was held starting on March 27, 2023, after which a jury returned a verdict of $3,175,000. As a result, the damages awarded against Tesla were reduced from an initial $136.9 million (October 4, 2021) down to $15 million (April 13, 2022), and then further down to $3.175 million (April 3, 2023). On November 2, 2023, the plaintiff filed a notice of appeal, and on November 16, 2023, Tesla filed a notice of cross appeal.

On February 9, 2022, shortly after the first Diaz jury verdict, the California Civil Rights Department ("CRD," formerly "DFEH") filed a civil complaint against Tesla in Alameda County, California Superior Court, alleging systemic race discrimination, hostile work environment and pay equity claims, among others. CRD's amended complaint seeks monetary damages and injunctive relief. On September 22, 2022, Tesla filed a cross complaint against CRD, alleging that it violated the Administrative Procedures Act by failing to follow statutory pre-requisites prior to filing suit and that cross complaint was subject to a sustained demurrer, which Tesla later amended and refiled. The case is currently in discovery.

Additionally, on June 1, 2022 the Equal Employment Opportunity Commission ("EEOC") issued a cause finding against Tesla that closely parallels the CRD's allegations. On September 28, 2023, the EEOC filed a civil complaint against Tesla in the United States District Court for the Northern District of California asserting claims for race harassment and retaliation and seeking, among other things, monetary and injunctive relief. On December 18, 2023, Tesla filed a motion to stay the case. Separately, on December 26, 2023, Tesla filed a motion to dismiss the case.

On June 16, 2022, two Tesla stockholders filed separate derivative actions in the U.S. District Court for the Western District of Texas, purportedly on behalf of Tesla, against certain of Tesla's current and former directors. Both suits assert claims for breach of fiduciary duty, unjust enrichment, and violation of the federal securities laws in connection with alleged race and gender discrimination and sexual harassment. Among other things, plaintiffs seek declaratory and injunctive relief, unspecified damages payable to Tesla, and attorneys' fees. On July 22, 2022, the Court consolidated the two cases and on September 6, 2022, plaintiffs filed a consolidated complaint. On November 7, 2022, the defendants filed a motion to dismiss the case and on September 15, 2023, the Court dismissed the action but granted plaintiffs leave to file an amended complaint. On November 2, 2023, plaintiff filed an amended complaint purportedly on behalf of Tesla, against Elon Musk. On December 19, 2023, the defendants moved to dismiss the amended complaint.

Other Litigation Related to Our Products and Services

We are also subject to various lawsuits that seek monetary and other injunctive relief. These lawsuits include proposed class actions and other consumer claims that allege, among other things, purported defects and misrepresentations related to our products and services. For example, on September 14, 2022, a proposed class action was filed against Tesla, Inc. and related entities in the U.S. District Court for the Northern District of California, alleging various claims about the Company’s driver assistance technology systems under state and federal law. This case was later consolidated with several other proposed class actions, and a Consolidated Amended Complaint was filed on October 28, 2022, which seeks damages and other relief on behalf of all persons who purchased or leased from Tesla between January 1, 2016 to the present. On October 5, 2022 a proposed class action complaint was filed in the U.S. District Court for the Eastern District of New York asserting similar state and federal law claims against the same defendants. On September 30, 2023, the Court dismissed this action with leave to amend the complaint. On November 20, 2023, the plaintiff moved to amend the complaint, which Tesla opposed. On March 22, 2023, the plaintiffs in the Northern District of California consolidated action filed a motion for a preliminary injunction to order Tesla to (1) cease using the term “Full Self-Driving Capability” (FSD Capability), (2) cease the sale and activation of FSD Capability and deactivate FSD Capability on Tesla vehicles, and (3) provide certain notices to consumers about proposed court-findings about the accuracy of the use of the terms Autopilot and FSD Capability. Tesla opposed the motion. On September 30, 2023, the Court denied the request for a preliminary injunction, compelled four of five plaintiffs to arbitration, and dismissed the claims of the fifth plaintiff with leave to amend the complaint. On October 31, 2023, the remaining plaintiff in the Northern District of California action filed an amended complaint, which Tesla has moved to dismiss. On October 2, 2023, a similar proposed class action was filed in San Diego County Superior Court in California. Tesla subsequently removed the San Diego County case to federal court and on January 8, 2024, the federal court granted Tesla’s motion to transfer the case to the U.S. District Court for the Northern District of California.

On February 27, 2023, a proposed class action was filed in the U.S. District Court for the Northern District of California against Tesla, Inc., Elon Musk and certain current and former Company executives. The complaint alleges that the defendants made material misrepresentations and omissions about the Company’s Autopilot and FSD Capability technologies and seeks money damages and other relief on behalf of persons who purchased Tesla stock between February 19, 2019 and February 17, 2023. An amended complaint was filed on September 5, 2023, naming only Tesla, Inc. and Elon Musk as defendants. On November 6, 2023, Tesla moved to dismiss the amended complaint.

On March 14, 2023, a proposed class action was filed against Tesla, Inc. in the U.S. District Court for the Northern District of California. Several similar complaints have also been filed in the same court and these cases have now all been consolidated. These complaints allege that Tesla violates federal antitrust and warranty laws through its repair, service, and maintenance practices and seeks, among other relief, damages for persons who paid Tesla for repairs services or Tesla compatible replacement parts from March 2019 to March 2023. On July 17, 2023, these plaintiffs filed a consolidated amended complaint. On September 27, 2023, the court granted Tesla’s motion to compel arbitration as to three of the plaintiffs, and on November 17, 2023, the court granted Tesla’s motion to dismiss without prejudice. The plaintiffs filed a Consolidated Second Amended Complaint on December 12, 2023, which Tesla has moved to dismiss. Plaintiffs have also appealed the court’s arbitration order. Trial is currently set for July 7, 2025.

The Company intends to vigorously defend itself in these matters; however, we cannot predict the outcome or impact. We are unable to reasonably estimate the possible loss or range of loss, if any, associated with these claims, unless noted.

Certain Investigations and Other Matters

We regularly receive requests for information, including subpoenas, from regulators and governmental authorities such as the National Highway Traffic Safety Administration, the National Transportation Safety Board, the Securities and Exchange Commission (“SEC”), the Department of Justice (“DOJ”), and various local, state, federal, and international agencies. The ongoing requests for information include topics such as operations, technology (e.g., vehicle functionality, Autopilot and FSD Capability), compliance, finance, data privacy, and other matters related to Tesla’s business, its personnel, and related parties. We routinely cooperate with such formal and informal requests for information, investigations, and other inquiries. To our knowledge no government agency in any ongoing investigation has concluded that any wrongdoing occurred. We cannot predict the outcome or impact of any ongoing matters. Should the government decide to pursue an enforcement action, there exists the possibility of a material adverse impact on our business, results of operation, prospects, cash flows, financial position or brand.

We are also subject to various other legal proceedings, risks and claims that arise from the normal course of business activities. For example, during the second quarter of 2023, a foreign news outlet reported that it obtained certain misappropriated data including, purportedly non-public Tesla business and personal information. Tesla has made notifications to potentially affected individuals (current and former employees) and regulatory authorities and we are working with certain law enforcement and other authorities. On August 5, 2023, a putative class action was filed in the United States District Court for the Northern District of California, purportedly on behalf of all U.S. individuals impacted by the data incident, followed by several additional lawsuits, that each assert claims under various state laws and seeks monetary damages and other relief. If an unfavorable ruling or development were to occur in these or other possible legal proceedings, risks and claims, there exists the possibility of a material adverse impact on our business, results of operations, prospects, cash flows, financial position or brand.

Letters of Credit

As of December 31, 2023, we had $525 million of unused letters of credit outstanding.

Note 16 – Variable Interest Entity Arrangements

We have entered into various arrangements with investors to facilitate the funding and monetization of our solar energy systems and vehicles. In particular, our wholly owned subsidiaries and fund investors have formed and contributed cash and assets into various financing funds and entered into related agreements. We have determined that the funds are VIEs and we are the primary beneficiary of these VIEs by reference to the power and benefits criterion under ASC 810. We have considered the provisions within the agreements, which grant us the power to manage and make decisions that affect the operation of these VIEs, including determining the solar energy systems and the associated customer contracts to be sold or contributed to these VIEs, redeploying solar energy systems and managing customer receivables. We consider that the rights granted to the fund investors under the agreements are more protective in nature rather than participating.

As the primary beneficiary of these VIEs, we consolidate in the financial statements the financial position, results of operations and cash flows of these VIEs, and all intercompany balances and transactions between us and these VIEs are eliminated in the consolidated financial statements. Cash distributions of income and other receipts by a fund, net of agreed upon expenses, estimated expenses, tax benefits and detriments of income and loss and tax credits, are allocated to the fund investor and our subsidiary as specified in the agreements.

Generally, our subsidiary has the option to acquire the fund investor’s interest in the fund for an amount based on the market value of the fund or the formula specified in the agreements.

Upon the sale or liquidation of a fund, distributions would occur in the order and priority specified in the agreements.

Pursuant to management services, maintenance and warranty arrangements, we have been contracted to provide services to the funds, such as operations and maintenance support, accounting, lease servicing and performance reporting. In some instances, we have guaranteed payments to the fund investors as specified in the agreements. A fund’s creditors have no recourse to our general credit or to that of other funds. Certain assets of the funds have been pledged as collateral for their obligations.

The aggregate carrying values of the VIEs' assets and liabilities, after elimination of any intercompany transactions and balances, in the consolidated balance sheets were as follows (in millions):

	December 31, 2023	December 31, 2022
Assets		
Current assets		
Cash and cash equivalents	$ 66	$ 68
Accounts receivable, net	13	22
Prepaid expenses and other current assets	361	274
Total current assets	440	364
Solar energy systems, net	3,278	4,060
Other non-current assets	369	404
Total assets	$ 4,087	$ 4,828
Liabilities		
Current liabilities		
Accrued liabilities and other	$ 67	$ 69
Deferred revenue	6	10
Current portion of debt and finance leases	1,564	1,013
Total current liabilities	1,637	1,092
Deferred revenue, net of current portion	99	149
Debt and finance leases, net of current portion	2,041	971
Other long-term liabilities	—	3
Total liabilities	$ 3,777	$ 2,215

Note 17 – Related Party Transactions

In relation to our CEO's exercise of stock options and sale of common stock from the 2012 CEO Performance Award, Tesla withheld the appropriate amount of taxes. However, given the significant amounts involved, our CEO entered into an indemnification agreement with us in November 2021 for additional taxes owed, if any.

Tesla periodically does business with certain entities with which its CEO and directors are affiliated, such as SpaceX and X Corp., in accordance with our Related Person Transactions Policy. Such transactions have not had to date, and are not currently expected to have, a material impact on our consolidated financial statements.

Note 18 – Segment Reporting and Information about Geographic Areas

We have two operating and reportable segments: (i) automotive and (ii) energy generation and storage. The automotive segment includes the design, development, manufacturing, sales and leasing of electric vehicles as well as sales of automotive regulatory credits. Additionally, the automotive segment is also comprised of services and other, which includes sales of used vehicles, non-warranty after-sales vehicle services, body shop and parts, paid Supercharging, vehicle insurance revenue and retail merchandise. The energy generation and storage segment includes the design, manufacture, installation, sales and leasing of solar energy generation and energy storage products and related services and sales of solar energy systems incentives. Our CODM does not evaluate operating segments using asset or liability information. The following table presents revenues and gross profit by reportable segment (in millions):

	Year Ended December 31,		
	2023	2022	2021
Automotive segment			
Revenues	$ 90,738	$ 77,553	$ 51,034
Gross profit	$ 16,519	$ 20,565	$ 13,735
Energy generation and storage segment			
Revenues	$ 6,035	$ 3,909	$ 2,789
Gross profit	$ 1,141	$ 288	$ (129)

The following table presents revenues by geographic area based on the sales location of our products (in millions):

	Year Ended December 31,		
	2023	2022	2021
United States	$ 45,235	$ 40,553	$ 23,973
China	21,745	18,145	13,844
Other international	29,793	22,764	16,006
Total	$ 96,773	$ 81,462	$ 53,823

The following table presents long-lived assets by geographic area (in millions):

	December 31, 2023	December 31, 2022
United States	$ 26,629	$ 21,667
Germany	4,258	3,547
China	2,820	2,978
Other international	1,247	845
Total	$ 34,954	$ 29,037

The following table presents inventory by reportable segment (in millions):

	December 31, 2023	December 31, 2022
Automotive	$ 11,139	$ 10,996
Energy generation and storage	2,487	1,843
Total	$ 13,626	$ 12,839

Note 19 – Restructuring and Other

During the years ended December 31, 2022 and 2021, we recorded $204 million and $101 million, respectively, of impairment losses on digital assets. During the years ended December 31, 2022 and 2021 we also realized gains of $64 million and $128 million, respectively, in connection with converting our holdings of digital assets into fiat currency. We also recorded other expenses of $36 million during the second quarter of the year ended December 31, 2022, related to employee terminations.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). In designing and evaluating the disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that our management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that, as of December 31, 2023, our disclosure controls and procedures were designed at a reasonable assurance level and were effective to provide reasonable assurance that the information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, our Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Our management concluded that our internal control over financial reporting was effective as of December 31, 2023.

Our independent registered public accounting firm, PricewaterhouseCoopers LLP, has audited the effectiveness of our internal control over financial reporting as of December 31, 2023, as stated in their report which is included herein.

Limitations on the Effectiveness of Controls

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended December 31, 2023, which has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None of the Company’s directors or officers adopted, modified or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement during the Company’s fiscal quarter ended December 31, 2023, as such terms are defined under Item 408(a) of Regulation S-K, except as follows:

On October 23, 2023, Robyn Denholm, one of our directors, adopted a Rule 10b5-1 trading arrangement for the potential sale of up to 281,116 shares of our common stock, subject to certain conditions. The trading arrangement covers stock options that expire in August 2024. The arrangement's expiration date is August 16, 2024.

On November 13, 2023, Andrew Baglino, Senior Vice President, Powertrain and Energy Engineering, adopted a Rule 10b5-1 trading arrangement for the potential sale of up to 115,500 shares of our common stock, subject to certain conditions. The arrangement's expiration date is December 31, 2024.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this Item 10 of Form 10-K will be included in our 2024 Proxy Statement to be filed with the Securities and Exchange Commission in connection with the solicitation of proxies for our 2024 Annual Meeting of Stockholders and is incorporated herein by reference. The 2024 Proxy Statement will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item 11 of Form 10-K will be included in our 2024 Proxy Statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item 12 of Form 10-K will be included in our 2024 Proxy Statement and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information required by this Item 13 of Form 10-K will be included in our 2024 Proxy Statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this Item 14 of Form 10-K will be included in our 2024 Proxy Statement and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

1. Financial statements (see *Index to Consolidated Financial Statements* in Part II, Item 8 of this report)
2. All financial statement schedules have been omitted since the required information was not applicable or was not present in amounts sufficient to require submission of the schedules, or because the information required is included in the consolidated financial statements or the accompanying notes
3. The exhibits listed in the following *Index to Exhibits* are filed or incorporated by reference as part of this report

CERTIFICATIONS

I, Elon Musk, certify that:

1. I have reviewed this Annual Report on Form 10-K of Tesla, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s Board of Directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Exhibit 97

Tesla, Inc.

CLAWBACK POLICY

The Compensation Committee (the "Committee") of the Board of Directors (the "Board") of Tesla, Inc. (the "Company") believes that it is appropriate for the Company to adopt this Clawback Policy (this "Policy") to be applied to the certain executive officers of the Company and adopts this Policy to be effective as of the Effective Date.

1. Definitions

For purposes of this Policy, the following definitions shall apply:

a) "Company Group" means the Company and each of its Subsidiaries, as applicable.

b) "Covered Compensation" means any Incentive-Based Compensation Received by a person who served as an Executive Officer at any time during the performance period for such Incentive-Based Compensation and that was Received (i) on or after October 2, 2023 and (ii) after the person became an Executive Officer.

c) "Effective Date" means November 15, 2023.

d) "Erroneously Awarded Compensation" means the amount of Covered Compensation Received by a person during the fiscal period when the applicable Financial Reporting Measure relating to such Covered Compensation was attained that exceeds the amount of Covered Compensation that otherwise would have been Received by such person had such amount been determined based on the applicable Restatement, computed without regard to any taxes paid (i.e., on a pre-tax basis). For Covered Compensation based on stock price or total shareholder return, where the amount of Erroneously Awarded Compensation is not subject to mathematical recalculation directly from the information in a Restatement, the Committee will determine the amount of such Covered Compensation that constitutes Erroneously Awarded Compensation, if any, based on a reasonable estimate of the effect of the Restatement on the stock price or total shareholder return upon which the Covered Compensation was granted, vested or paid and the Committee shall maintain documentation of such determination and provide such documentation to Nasdaq.

e) "Exchange Act" means the U.S. Securities Exchange Act of 1934, as amended.

f) "Executive Officer" means each "executive officer" of the Company (as defined in Rule 10D-1(d) under the Exchange Act), which shall be deemed to include any individuals identified by the Company as executive officers pursuant to Item 401(b) of Regulation S-K under the Exchange Act. Both current and former Executive Officers are subject to the Policy in accordance with its terms.

g) "Financial Reporting Measure" means (i) any measure that is determined and presented in accordance with the accounting principles used in preparing the Company's financial statements, and any measures derived wholly or in part from such measures and may consist of GAAP or non-GAAP financial measures (as defined under Regulation G of the Exchange Act and Item 10 of Regulation S-K under the Exchange Act), (ii) stock price or (iii) total shareholder return. Financial Reporting Measures may or may not be filed with the SEC and may be presented outside the Company's financial statements, such as in Managements' Discussion and Analysis of Financial Conditions and Result of Operations or in the performance graph required under Item 201(e) of Regulation S-K under the Exchange Act.

h) "Incentive-Based Compensation" means any compensation that is granted, earned or vested based wholly or in part upon the attainment of a Financial Reporting Measure.

i) "Lookback Period" means the three completed fiscal years (plus any transition period of less than nine months that is within or immediately following the three completed fiscal years and that results from a change in the Company's fiscal year) immediately preceding the date on which the Company is required to prepare a Restatement for a given reporting period, with such date being the earlier of: (i) the date the Board, a committee of the Board, or the officer or officers of the Company authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the Company is required to prepare a Restatement, or (ii) the date a court, regulator or other legally authorized body directs the Company to prepare a Restatement. Recovery of any Erroneously Awarded Compensation under the Policy is not dependent on if or when the Restatement is actually filed.

j) "Nasdaq" means the Nasdaq Stock Market.

k) "Received": Incentive-Based Compensation is deemed "Received" in the Company's fiscal period during which the Financial Reporting Measure specified in or otherwise relating to the Incentive-Based Compensation award is attained, even if the grant, certification of achievement, vesting or payment of the Incentive-Based Compensation occurs after the end of that period.

l) "Restatement" means an accounting restatement required due to the material noncompliance by the Company with any financial reporting requirement under the securities laws, including (i) to correct an error in previously issued financial statements that is material to the previously issued financial statements (commonly referred to as a "Big R" restatement) or (ii) to correct an error in previously issued financial statements that is not material to the previously issued financial statements but that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period (commonly referred to as a "little r" restatement). Changes to the Company's financial statements that do not represent error corrections under the then-current relevant accounting standards will not constitute Restatements.

m) "SEC" means the U.S. Securities and Exchange Commission.

n) "Subsidiary" means any domestic or foreign corporation, partnership, association, joint stock company, joint venture, trust or unincorporated organization "affiliated" with the Company, that is, directly or indirectly, through one or more intermediaries, "controlling", "controlled by" or "under common control with", the Company. "Control" for this purpose means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of such person, whether through the ownership of voting securities, contract or otherwise.

2. Recoupment of Erroneously Awarded Compensation

In the event of a Restatement, any Erroneously Awarded Compensation Received during the Lookback Period that (a) is then-outstanding but has not yet been paid shall be automatically and immediately forfeited or (b) has been paid to any person shall be subject to reasonably prompt repayment to the Company Group in accordance with Section 3 of this Policy. The Committee must pursue (and shall not have the discretion to waive) the forfeiture and/or repayment of such Erroneously Awarded Compensation in accordance with Section 3 of this Policy, except as provided below. Recovery of any Erroneously Awarded Compensation under the Policy is not dependent on fraud or misconduct by any person in connection with the Restatement.

Notwithstanding the foregoing, the Committee (or, if the Committee is not a committee of the Board responsible for the Company's executive compensation decisions and composed entirely of independent directors, a majority of the independent directors serving on the Board) may determine not to pursue the forfeiture and/or recovery of Erroneously Awarded Compensation from any person if the Committee determines that such forfeiture and/or recovery would be impracticable due to any of the following circumstances: (i) the direct expense paid to a third party (for example, reasonable legal expenses and consulting fees) to assist in enforcing the Policy would exceed the amount to be recovered (following reasonable attempts by the Company Group to recover such Erroneously Awarded Compensation, the documentation of such attempts, and the provision of such documentation to the Nasdaq) or (ii) recovery would likely cause any otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of Company Group, to fail to meet the requirements of 26 U.S.C.
401(a)(13) or 26 U.S.C. 411(a) and regulations thereunder.

3. Means of Repayment

In the event that the Committee determines that any person shall repay any Erroneously Awarded Compensation, the Committee shall provide written notice to such person by email or certified mail to the physical address on file with the Company Group for such person, and the person shall satisfy such repayment in a manner and on such terms as required by the Committee, and the Company Group shall be entitled to set off the repayment amount against any amount owed to the person by the Company Group, to require the forfeiture of any award granted by the Company Group to the person, or to take any and all necessary actions to reasonably promptly recoup the repayment amount from the person, in each case, to the fullest extent permitted under applicable law, including without limitation, Section 409A of the U.S.

Internal Revenue Code and the regulations and guidance thereunder. If the Committee does not specify a repayment timing in the written notice described above, the applicable person shall be required to repay the Erroneously Awarded Compensation to the Company Group by wire, cash or cashier's check no later than thirty (30) days after receipt of such notice.

4. No Indemnification

No person shall be indemnified, insured or reimbursed by the Company Group in respect of any loss of compensation by such person in accordance with this Policy, nor shall any person receive any advancement of expenses for disputes related to any loss of compensation by such person in accordance with this Policy, and no person shall be paid or reimbursed by the Company Group for any premiums paid by such person for any third-party insurance policy covering potential recovery obligations under this Policy.

5. Miscellaneous

This Policy generally will be administered and interpreted by the Committee, provided that the Board may, from time to time, exercise discretion to administer and interpret this Policy, in which case, all references herein to "Committee" shall be deemed to refer to the Board. Any determination by the Committee with respect to this Policy shall be final, conclusive and binding on all interested parties. Any discretionary determinations of the Committee under this Policy, if any, need not be uniform with respect to all persons, and may be made selectively amongst persons, whether or not such persons are similarly situated.

This Policy is intended to satisfy the requirements of Section 954 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, as it may be amended from time to time, Rule 10D- 1 under the Exchange Act, and any related rules or regulations promulgated by the SEC or the Nasdaq, including any additional or new requirements that become effective after the Effective Date which upon effectiveness shall be deemed to automatically amend this Policy to the extent necessary to comply with such additional or new requirements.

The provisions in this Policy are intended to be applied to the fullest extent of the law. To the extent that any provision of this Policy is found to be unenforceable or invalid under any applicable law, such provision will be applied to the maximum extent permitted and shall automatically be deemed amended in a manner consistent with its objectives to the extent necessary to conform to applicable law. The invalidity or unenforceability of any provision of this Policy shall not affect the validity or enforceability of any other provision of this Policy. Recoupment of Erroneously Awarded Compensation under this Policy is not dependent upon the Company Group satisfying any conditions in this Policy, including any requirements to provide applicable documentation to the Nasdaq.

The rights of the Company Group under this Policy to seek forfeiture or reimbursement are in addition to, and not in lieu of, any rights of recoupment, or remedies or rights other than recoupment, that may be available to the Company Group pursuant to the terms of any law, government regulation or stock exchange listing requirement or any other policy, code of conduct, employee handbook, employment agreement, equity award agreement, or other plan or agreement of the Company Group.

6. Amendment and Termination

To the extent permitted by, and in a manner consistent with applicable law, including SEC and Nasdaq rules, the Committee may terminate, suspend or amend this Policy at any time in its discretion.

7. Successors

This Policy shall be binding and enforceable against all persons and their respective beneficiaries, heirs, executors, administrators or other legal representatives with respect to any Covered Compensation granted, vested or paid to or administered by such persons or entities.

8. Agreement to Arbitrate; Governing Law; Venue

This Policy and all rights and obligations hereunder will be governed by and interpreted in accordance with Texas law. Any dispute arising from or relating to this Policy shall be subject to binding arbitration in accordance with the then-current Streamlined Arbitration Rules of the Judicial Arbitration and Mediation Services ("JAMS"). The existence, content and result of the arbitration shall be held in confidence by the parties, their representatives, any other participants and the arbitrator. The arbitration will be conducted by a single arbitrator selected by agreement of the parties or, failing such agreement, appointed in accordance with the JAMS rules. The arbitration shall be conducted in English and in Austin, Texas. Each party will bear its own expenses in the arbitration and will share equally the costs of the arbitration; *provided*, however, that the arbitrator may, in its discretion, award reasonable costs and fees to the prevailing party. Judgment upon the award rendered in the arbitration may be entered in any court of competent jurisdiction. If any dispute in arbitration under this Policy is substantially the same or involves common issues of law or fact, either party shall be entitled to require that any such dispute be consolidated with the relevant arbitration pursuant hereto, and the other party shall permit, and co-operate in, such consolidation.

Tesla, Inc.

CLAWBACK POLICY

ACKNOWLEDGMENT, CONSENT AND AGREEMENT

I acknowledge that I have received and reviewed a copy of the Tesla, Inc. Clawback Policy (as may be amended from time to time, the "Policy") and I have been given an opportunity to ask questions about the Policy and review it with my counsel. I knowingly, voluntarily and irrevocably consent to and agree to be bound by and subject to the Policy's terms and conditions, including that I will return any Erroneously Awarded Compensation that is required to be repaid in accordance with the Policy. I further acknowledge, understand and agree that (i) the compensation that I receive, have received or may become entitled to receive from the Company Group is subject to the Policy, and the Policy may affect such compensation and (ii) I have no right to indemnification, insurance payments or other reimbursement by or from the Company Group for any compensation that is subject to recoupment and/or forfeiture under the Policy.

Capitalized terms used but not defined herein have the meanings set forth in the Policy.

PART I

Cautionary Statement Regarding Forward-Looking Statements

This Annual Report on Form 10-K and other reports, statements and information that Walmart Inc. (which individually or together with its subsidiaries, as the context otherwise requires, is referred to as "we," "Walmart" or the "Company") has filed with or furnished to the Securities and Exchange Commission ("SEC") or may file with or furnish to the SEC in the future, and prior or future public announcements and presentations that we or our management have made or may make, include or may include, or incorporate or may incorporate by reference, statements that may be deemed to be "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that are intended to enjoy the protection of the safe harbor for forward-looking statements provided by the Exchange Act as well as protections afforded by other federal securities laws.

Nature of Forward-Looking Statements

Such forward-looking statements are not statements of historical facts, but instead express our estimates or expectations for our consolidated, or one of our segment's, economic performance or results of operations for future periods or as of future dates or events or developments that may occur in the future or discuss our plans, objectives or goals. These forward-looking statements may relate to:

- macroeconomic, geopolitical, and business conditions, trends and events around the world and in the markets in which we operate, including inflation or deflation, generally, and in certain product categories, the impact of supply chain challenges, and recessionary pressures;
- the growth of our business or change in our competitive position in the future, or in or over particular periods, both generally, and with respect to particular markets, segments or lines of business, including, but not limited to, advertising, fulfillment, healthcare and financial services;
- the amount, number, growth, increase, reduction or decrease in or over certain periods, of or in certain financial items or measures or operating measures, including our earnings per share, net sales, growth rates, comparable store and club sales, our eCommerce sales, liabilities, expenses of certain categories, expense leverage, operating income, returns, capital and operating investments or expenditures of particular types and new store and club openings, inventory levels and associated costs, product mix and demand for certain merchandise, consumer confidence, disposable income, credit availability, spending levels, shopping patterns and debt levels;
- our increasing investments in eCommerce, technology, automation, supply chain, new stores and clubs as well as remodels and other omni-channel customer initiatives, such as same day pickup and delivery;
- investments and capital expenditures we will make and how certain of those investments and capital expenditures are expected to be financed;
- our workforce strategy, including the availability of necessary personnel to staff our stores, clubs and other facilities and the potential impact of changes to the costs of labor;
- volatility in currency exchange rates affecting our consolidated, or one or more of our segments' results of operations;
- the Company continuing to provide returns to shareholders through share repurchases and dividends, the use of share repurchase authorization over a certain period or the source of funding of a certain portion of our share repurchases;
- our sources of liquidity, including our cash, continuing to be adequate or sufficient to fund our operations, finance our global investment and expansion activities, pay dividends and fund share repurchases;
- cash flows from operations, our current cash position and access to capital markets or credit will continue to be sufficient to meet our anticipated operating cash needs;
- the reclassification of amounts related to our derivatives;
- our effective tax rate for certain periods and the realization of certain net deferred tax assets and the effects of resolutions of tax-related matters;

- the adoption or creation of new, and modification of existing, governmental policies, programs, initiatives and actions in the markets in which we operate and elsewhere and actions with respect to such policies, programs and initiatives (including, but not limited to, changes in the enforcement priorities of regulatory authorities);
- the effect of adverse decisions in, or settlement of, litigation or other proceedings or investigations to which we are subject;
- the effect on our results of operations or financial position of our adoption of certain new, or amendments to existing, accounting standards; or
- our commitments, intentions, plans or goals related to environmental, social, and governance ("ESG") priorities, including, but not limited to, the sustainability of our environment and supply chains, the promotion of economic opportunity or other societal initiatives.

Our forward-looking statements may also include statements of our strategies, plans and objectives for our operations, including areas of future focus in our operations, and the assumptions underlying any of the forward-looking statements we make. The forward-looking statements we make can typically be identified by the use therein of words and phrases such as "aim," "anticipate," "believe," "continue," "could be," "could increase," "could occur," "could result," "estimate," "expansion," "expect," "expectation," "expected to be," "focus," "forecast," "goal," "grow," "guidance," "intend," "invest," "is expected," "may continue," "may fluctuate," "may grow," "may impact," "may result," "objective," "plan," "priority," "project," "should," "strategy," "to be," "we'll," "we will," "will add," "will allow," "will be," "will benefit," "will change," "will come in at," "will continue," "will decrease," "will grow," "will have," "will impact," "will include," "will increase," "will open," "will remain," "will result," "will stay," "will strengthen," "would be," "would decrease" and "would increase," variations of such words or phrases, other phrases commencing with the word "will" or similar words and phrases denoting anticipated or expected occurrences or results.

The forward-looking statements that we make or that are made by others on our behalf are based on our knowledge of our business and our operating environment and assumptions that we believe to be or will believe to be reasonable when such forward-looking statements were or are made. As a consequence of the factors described above, the other risks, uncertainties and factors we disclose below and in the other reports as mentioned above, other risks not known to us at this time, changes in facts, assumptions not being realized or other circumstances, our actual results may differ materially from those discussed in or implied or contemplated by our forward-looking statements. Consequently, this cautionary statement qualifies all forward-looking statements we make or that are made on our behalf, including those made herein and incorporated by reference herein. We cannot assure you that the results or developments expected or anticipated by us will be realized or, even if substantially realized, that those results or developments will result in the expected consequences for us or affect us, our business, our operations or our operating results in the manner or to the extent we expect. We caution readers not to place undue reliance on such forward-looking statements, which speak only as of their dates. We undertake no obligation to revise or update any of the forward-looking statements to reflect subsequent events or circumstances except to the extent required by applicable law.

ITEM 1. BUSINESS

General

Walmart Inc. ("Walmart," the "Company" or "we") is a people-led, technology-powered omni-channel retailer dedicated to helping people around the world save money and live better – anytime and anywhere – by providing the opportunity to shop in both retail stores and through eCommerce, and to access our other service offerings. Through innovation, we strive to continuously improve a customer-centric experience that seamlessly integrates our eCommerce and retail stores in an omni-channel offering that saves time for our customers. Each week, we serve approximately 255 million customers who visit more than 10,500 stores and numerous eCommerce websites in 19 countries.

Our strategy is to make every day easier for busy families, operate with discipline, sharpen our culture and become more digital, and make trust a competitive advantage. Making life easier for busy families includes our commitment to price leadership, which has been and will remain a cornerstone of our business, as well as increasing convenience to save our customers time. By leading on price, we earn the trust of our customers every day by providing a broad assortment of quality merchandise and services at everyday low prices ("EDLP"). EDLP is our pricing philosophy under which we price items at a low price every day so our customers trust that our prices will not change under frequent promotional activity. Everyday low cost ("EDLC") is our commitment to control expenses so our cost savings can be passed along to our customers.

Our operations comprise three reportable segments: Walmart U.S., Walmart International and Sam's Club. Our fiscal year ends on January 31 for our United States ("U.S.") and Canadian operations. We consolidate all other operations generally using a one-month lag and on a calendar year basis. Our discussion is as of, and for the fiscal years ended, January 31, 2024 ("fiscal 2024"), January 31, 2023 ("fiscal 2023") and January 31, 2022 ("fiscal 2022"). During fiscal 2024, we generated total revenues of $648.1 billion, which was comprised primarily of net sales of $642.6 billion.

We maintain our principal offices in Bentonville, Arkansas. Our common stock trades on the New York Stock Exchange under the symbol "WMT."

The Development of Our Company

The businesses conducted by our founders began in 1945 when Sam M. Walton opened a franchise Ben Franklin variety store in Newport, Arkansas. In 1946, his brother, James L. Walton, opened a similar store in Versailles, Missouri. Until 1962, our founders' business was devoted entirely to the operation of variety stores, at which time we began to open discount stores. We completed our initial public offering in 1970. In 1983, we opened our first Sam's Club, and in 1988, we opened our first supercenter. In 1998, we opened our first Walmart Neighborhood Market. In 1991, we began our first international initiative when we entered into a joint venture in Mexico and, as of January 31, 2024, our Walmart International segment conducted business in 18 countries.

In 2000, we began our first eCommerce initiative by creating both walmart.com and samsclub.com. Since then, our eCommerce presence has continued to grow. In 2007, leveraging our physical stores, walmart.com launched its Site-to-Store service, enabling customers to make a purchase online and pick up merchandise in stores. To date, we now have over 8,000 pickup and over 7,800 delivery locations globally. In recent years, we expanded our eCommerce and digital presence through acquisitions with our majority stakes in Flipkart and PhonePe in India. We continue to heavily invest in omni-channel and eCommerce innovation, which enables us to leverage technology, talent and expertise, and expand our assortment and service offerings.

We are enhancing our omni-channel capabilities through a combination of stores, eCommerce websites and service offerings, as well as our supply chain, combined with approximately 2.1 million associates as of January 31, 2024, to better serve our customers. Together, these elements produce a global retail ecosystem that we believe allows customers to view Walmart as their primary retail destination. In the U.S., our Walmart+ membership incorporates several service offerings which provide enhanced omni-channel shopping experiences and benefits for members. As we execute on our strategy globally, our business is expanding through offerings such as advertising, marketplace and fulfillment services, healthcare and financial services. These offerings represent mutually reinforcing pieces of our omni-channel model centered on our customers around the world who are increasingly seeking convenience.

Information About Our Segments

We are engaged in global operations of retail, wholesale and other units, as well as eCommerce, located throughout the U.S., Africa, Canada, Central America, Chile, China, India and Mexico. We also previously operated in the United Kingdom and Japan prior to the sale of those operations in the first quarter of fiscal 2022. Refer to Note 12 to our Consolidated Financial Statements for information on these divestitures. Our operations are conducted in three reportable segments: Walmart U.S., Walmart International and Sam's Club, which are further described below. Each segment contributes to the Company's operating results differently. However, each has generally maintained a consistent contribution rate to the Company's net sales in recent years other than minor changes to the contribution rate for the Walmart International segment due to the exit of certain markets and fluctuations in currency exchange rates. Additional information on our operating segments and geographic information is contained in Note 13 to our Consolidated Financial Statements.

Walmart U.S. Segment

Walmart U.S. is our largest segment and operates in the U.S., including in all 50 states, Washington D.C. and Puerto Rico. Walmart U.S. is a mass merchandiser of consumer products, operating under the "Walmart" and "Walmart Neighborhood Market" brands, including walmart.com. Walmart U.S. had net sales of $441.8 billion for fiscal 2024, representing 69% of our fiscal 2024 consolidated net sales, and had net sales of $420.6 billion and $393.2 billion for fiscal 2023 and 2022, respectively. Of our three segments, Walmart U.S. has historically had the highest gross profit as a percentage of net sales ("gross profit rate"). In addition, Walmart U.S. has historically contributed the greatest amount to the Company's net sales and operating income.

Omni-channel. Walmart U.S. provides an omni-channel experience to customers, integrating retail stores and eCommerce, through services such as pickup and delivery, in-home delivery, ship-from-store and digital pharmacy fulfillment options. As of January 31, 2024, the vast majority of our stores have pickup locations and more than 4,300 locations offer same-day delivery. Our Walmart+ membership offering provides enhanced omni-channel shopping benefits including unlimited free shipping on eligible items with no order minimum, unlimited delivery from store, fuel discounts, mobile Scan & Go and access to additional member benefits. We define eCommerce sales as sales initiated by customers digitally and fulfilled by a number of methods including our dedicated eCommerce fulfillment centers and leveraging our stores, as well as certain other business offerings that are part of our ecosystem, such as our Walmart Connect advertising business. The following table provides the approximate size of our retail stores as of January 31, 2024:

	Minimum Square Feet	Maximum Square Feet	Average Square Feet
Supercenters (general merchandise and grocery)	69,000	260,000	178,000
Discount stores (general merchandise and limited grocery)	30,000	206,000	105,000
Neighborhood markets[1] (grocery)	28,000	65,000	42,000

(1) Excludes other small formats.

Merchandise. Walmart U.S. does business primarily in three strategic merchandise units, listed below:

- Grocery consists of a full line of grocery items, including dry grocery, snacks, dairy, meat, produce, deli & bakery, frozen foods, alcoholic and nonalcoholic beverages, as well as consumables such as health and beauty aids, pet supplies, household chemicals, paper goods and baby products;
- General merchandise includes:
  - Entertainment (e.g., electronics, toys, seasonal merchandise, wireless, video games, movies, music and books);
  - Hardlines (e.g., automotive, hardware and paint, sporting goods, outdoor living and stationery);
  - Fashion (e.g., apparel for adults and children, as well as shoes, jewelry and accessories); and
  - Home (e.g., housewares and small appliances, bed & bath, furniture and home organization, home furnishings, home decor, fabrics and crafts).
- Health and wellness includes pharmacy, over-the-counter drugs and other medical products, optical services and other clinical services.

Other categories in the Walmart U.S. business include fuel and various service offerings such as in-house advertising via Walmart Connect, supply chain and fulfillment capabilities to online marketplace sellers via Walmart Fulfillment Services, initiatives such as business-to-business last mile delivery services via Walmart GoLocal, and a suite of data products for merchants and suppliers via Walmart Luminate. Additional service offerings include financial services and related products (including through our digital channels, stores and our fintech venture, ONE), such as money orders, prepaid access, money transfers, check cashing, bill payment and certain types of installment lending.

Brand name merchandise represents a significant portion of the merchandise sold in Walmart U.S. We also market lines of merchandise under our private brands, including brands such as: "Allswell," "Athletic Works," "Equate," "Free Assembly," "Freshness Guaranteed," "George," "Great Value," "Holiday Time," "Hyper Tough," "Mainstays," "Marketside," "No Boundaries," "onn.," "Ozark Trail," "Parent's Choice," "Sam's Choice," "Scoop," "Spring Valley," "Time and Tru," "Way to Celebrate" and "Wonder Nation." The Company also markets lines of merchandise under licensed brands, some of which include: "Avia," "Better Homes & Gardens," "Love & Sports," "Sofia Jeans by Sofia Vergara," and "The Pioneer Woman."

Periodically, revisions are made to the categorization of the components comprising our strategic merchandise units. When revisions are made, the previous periods' presentation is adjusted to maintain comparability.

Operations. Walmart U.S. is available to customers through supercenters, discount stores and neighborhood markets, as well as online or through the mobile application 24 hours a day. Consistent with its strategy, Walmart U.S. continues to develop technology tools and services to better serve customers and help stores operate more efficiently, such as pickup and delivery, Walmart+, ship-from-store and other initiatives which provide convenient and seamless omni-channel shopping experiences.

Seasonal Aspects of Operations. Walmart U.S.'s business is seasonal to a certain extent due to calendar events and national and religious holidays, as well as different weather patterns. Historically, its highest sales volume has occurred in the fiscal quarter ending January 31.

Competition. Walmart U.S. competes with brick and mortar, eCommerce and omni-channel retailers operating discount, department, retail and wholesale grocers, drug, dollar, variety and specialty stores, supermarkets, hypermarkets and supercenter-type stores, social commerce platforms, as well as companies that offer services in digital advertising, fulfillment and delivery services, health and wellness and financial services. Each of these landscapes is highly competitive and rapidly evolving, and new business models and the entry of new, well-funded competitors continue to intensify this competition. Some of our competitors have longer histories in these lines of business, more customers and greater brand recognition. They may be able to obtain more favorable terms from suppliers and business partners and to devote greater resources to the development of these businesses. In addition, for eCommerce and other internet-based businesses, newer or smaller businesses may be better able to innovate and compete with us.

Our ability to develop and operate units at the right locations and to deliver a customer-centric omni-channel experience largely determines our competitive position within the retail industry. We compete in a variety of ways, including the prices at which we sell our merchandise, merchandise and selection availability, services offered to customers, the quality of the products and services we offer, location, store hours, in-store amenities, the shopping convenience and overall shopping experience we offer, the attractiveness and ease of use of our digital platforms, cost and speed of and options for delivery to customers of merchandise purchased through our digital platforms or through our omni-channel integration of our physical and digital operations. We employ many strategies and programs designed to meet competitive pressures within our industry. These strategies include the following:

- EDLP: our pricing philosophy under which we price items at everyday low prices so our customers trust that our prices will not change under frequent promotional activity;
- EDLC: everyday low cost is our commitment to control expenses so our cost savings can be passed along to our customers;
- Omni-channel offerings such as pickup and delivery and our Walmart+ membership offering, all of which enhance convenience and seek to serve customers in the ways they want to be served; and
- Expanding our ecosystem and the products and services we offer in areas such as digital advertising, fulfillment services, health and wellness, and financial services to provide our customers a broader set of offerings to meet expanding needs.

Distribution. We continue to invest in supply chain automation and utilize a total of 162 distribution facilities which are located strategically throughout the U.S. For fiscal 2024, the majority of Walmart U.S.'s purchases of store merchandise were shipped through these facilities, while most of the remaining store merchandise we purchased was shipped directly from suppliers. General merchandise and dry grocery merchandise is transported primarily through the segment's private truck fleet; however, we contract with common carriers to transport the majority of our perishable grocery merchandise. We ship merchandise purchased by customers on our eCommerce platforms by a number of methods from multiple locations including from our 30 dedicated eCommerce fulfillment centers, as well as leveraging our ability to ship or deliver directly from more than 4,300 stores, some of which include market fulfillment centers, which are positioned inside or attached to our stores to fill online orders more efficiently.

Walmart International Segment

Walmart International is our second largest segment and operates in 18 countries outside of the U.S. Walmart International operates through our wholly-owned subsidiaries in Canada, Chile, China, and Africa (which includes Botswana, Lesotho, Malawi, Mozambique, Namibia, South Africa, Eswatini, and Zambia), and our majority-owned subsidiaries in India, as well as Mexico and Central America (which includes Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua). Walmart International previously operated in the United Kingdom and Japan prior to the sale of those operations in the first quarter of fiscal 2022. Refer to Note 12 to our Consolidated Financial Statements for discussion of recent divestitures.

Walmart International includes numerous formats divided into two major categories: retail and wholesale. These categories consist of many formats, including: supercenters, supermarkets, hypermarkets, warehouse clubs (including Sam's Clubs) and cash & carry, as well as eCommerce through websites and mobile applications, including walmart.com.mx, walmart.ca, flipkart.com, PhonePe and other sites. Walmart International had net sales of $114.6 billion for fiscal 2024, representing 18% of our fiscal 2024 consolidated net sales, and had net sales of $101.0 billion for both fiscal 2023 and 2022. The gross profit rate is slightly lower than that of Walmart U.S. primarily because of its format and channel mix.

Walmart International's strategy is to create strong local businesses powered by Walmart, which means being locally relevant and customer-focused in each of the markets it operates. We are being deliberate about where and how we choose to operate and continue to re-shape the portfolio to best enable long-term, sustainable and profitable growth. As such, we have taken certain strategic actions to strengthen our Walmart International portfolio for the long-term, which include the following highlights over the last three years:

- Divested of Asda Group Limited ("Asda"), our retail operations in the U.K., in February 2021.
- Divested of a majority stake in Seiyu, our retail operations in Japan, in March 2021.
- Bought out the noncontrolling interest shareholders of our Massmart subsidiary in November 2022 and exited operations in certain countries in Africa.
- Increased our ownership in PhonePe, our digital payments platform in India, as part of the separation from Flipkart in December 2022.

Omni-channel. Walmart International provides an omni-channel experience to customers, integrating retail stores and eCommerce, such as through pickup and delivery services in most of our markets and our marketplaces such as Flipkart in India. Our financial services offerings continue to grow with our digital payment platform at PhonePe in India. We continue to expand our marketplace offerings, which also unlock fulfillment and advertising services.

Generally, retail units' selling areas range in size from 1,400 square feet to 186,000 square feet. Our wholesale stores' selling areas generally range in size from 25,000 square feet to 158,000 square feet. As of January 31, 2024, Walmart International had over 2,800 pickup and over 2,900 delivery locations.

Merchandise. The merchandising strategy for Walmart International is similar to that of our operations in the U.S. in terms of the breadth and scope of merchandise offered for sale. While brand name merchandise accounts for a majority of our sales, we have both leveraged U.S. private brands and developed market specific private brands to serve our customers with high quality, low priced items. Along with the private brands we market globally, such as "Equate," "George," "Great Value," "Holiday Time," "Mainstays," "Marketside" and "Parent's Choice," our international markets have developed market specific brands including "Aurrera" and "Lider." In addition, we have developed and continue to grow our relationships with regional and local suppliers in each market to ensure reliable sources of quality merchandise that is equal to national brands at low prices.

Consistent with its strategy, Walmart International continues to build mutually reinforcing businesses in areas such as advertising, marketplace and fulfillment services, healthcare and financial services. Our businesses in Mexico and Canada, for example, offer prepaid cards and money transfers, and our PhonePe business in India continues to grow, providing a platform that offers mobile and bill payment, person-to-person (P2P) payment, investment and insurance solutions, financial services and advertising. In Mexico, we also offer a value-based internet and telephone service allowing customers to enjoy digital connectivity. Combined, these offerings did not represent a significant portion of annual segment revenues.

Operations. The hours of operation for operating units in Walmart International vary by country and by individual markets within countries, depending upon local and national ordinances governing hours of operation. Customers can also access online and mobile applications 24 hours a day. Consistent with its strategy, Walmart International continues to develop technology tools and services to better serve customers and help its various formats operate more efficiently, as well as to provide convenient and seamless omni-channel shopping experiences.

Seasonal Aspects of Operations. Walmart International's business is seasonal to a certain extent. Historically, its highest sales volume has occurred in the fourth quarter of our fiscal year. The seasonality of the business varies by country due to different national and religious holidays, festivals and customs, as well as different weather patterns.

Competition. Walmart International competes with brick and mortar, eCommerce and omni-channel retailers who operate department, drug, discount, variety and specialty stores, supermarkets, hypermarkets and supercenter-type stores, wholesale clubs, home-improvement stores, specialty electronics stores, cash & carry operations and convenience stores, and direct to consumer offerings, as well as companies that offer services in digital advertising, fulfillment services, health and wellness and financial services. Our ability to develop and operate units at the right locations and to deliver a customer-centric omni-channel experience largely determines our competitive position within the retail industry. We believe price leadership is a critical part of our business model and we continue to progress our markets towards an EDLP approach. Additionally, our ability to operate food departments effectively has a significant impact on our competitive position in many of the markets where we operate. Each of these landscapes is highly competitive and rapidly evolving, and new business models and the entry of new or well-funded competitors continue to intensify this competition. Some of our competitors have longer histories in these lines of business, more customers and greater brand recognition and therefore they may be able to obtain more favorable terms from suppliers and business partners and to devote greater resources to the development of these businesses. In addition, for eCommerce and other internet-based businesses, newer or smaller businesses may be better able to innovate and compete with us.

Distribution. We utilize a total of 176 distribution facilities located in Canada, Central America, Chile, China, India, Mexico and Africa. Through these facilities, we process and distribute both imported and domestic products to the operating units of the Walmart International segment. During fiscal 2024, the majority of Walmart International's purchases passed through these distribution facilities. Suppliers ship the remainder of Walmart International's purchases directly to our stores in the various markets in which we operate. Across the segment, we have efficient networks connecting physical stores and distribution and fulfillment centers, which facilitate the movement of goods to where our customers live. We ship merchandise purchased by customers on our eCommerce platforms by a number of methods from multiple locations, such as in India where we utilize a combination of more than 3,500 eCommerce fulfillment centers, sort centers and last-mile delivery facilities, as well as our physical retail stores.

Sam's Club Segment

Sam's Club operates in 44 states in the U.S. and in Puerto Rico. Sam's Club is a membership-only warehouse club that also operates samsclub.com. Sam's Club had net sales of $86.2 billion for fiscal 2024, representing 13% of our consolidated fiscal 2024 net sales, and had net sales of $84.3 billion and $73.6 billion for fiscal 2023 and 2022, respectively. As a membership-only warehouse club, membership income is a significant component of the segment's operating income. Sam's Club operates with a lower gross profit rate and lower operating expenses as a percentage of net sales than our other segments.

Membership. The following two options are available to members:

	Plus Membership	Club Membership
Annual Membership Fee	$110	$50
Number of Add-on Memberships ($45 each)	Up to 16	Up to 8

All memberships include a spouse/household card at no additional cost. Plus Members are also eligible for free curbside pickup and free shipping on the majority of merchandise, with no minimum order size, and receive discounts on prescriptions and glasses. Beginning in fiscal 2023, Sam's Club launched a single loyalty rewards currency called Sam's Cash which merges and replaces existing Cash Rewards for Plus members and Cash Back for Sam's Club Mastercard holders. Members may redeem Sam's Cash on purchases in the club and online, to pay for membership fees or for cash in clubs. Sam's Cash does not expire and is available for monthly redemption.

Omni-channel. Sam's Club provides an omni-channel experience to members, integrating warehouse clubs and eCommerce through such services as Curbside Pickup, mobile Scan & Go, ship-from-club, and delivery-from-club. Members have access to a broad assortment of merchandise and services, including those not found in our clubs, online at samsclub.com and through our mobile commerce applications. The warehouse facility sizes generally range between 32,000 and 168,000 square feet, with an average size of approximately 134,000 square feet.

Merchandise. Sam's Club offers merchandise in the following five merchandise categories:

- Grocery and consumables includes dairy, meat, bakery, deli, produce, dry, chilled or frozen packaged foods, alcoholic and nonalcoholic beverages, floral, snack foods, candy, other grocery items, health and beauty aids, paper goods, laundry and home care, baby care, pet supplies and other consumable items;
- Fuel, tobacco and other categories;
- Home and apparel includes home improvement, outdoor living, gardening, furniture, apparel, jewelry, tools and power equipment, housewares, toys, seasonal items, mattresses and tire and battery centers;
- Health and wellness includes pharmacy, optical and hearing services and over-the-counter drugs; and

- Technology, office and entertainment includes consumer electronics and accessories, software, video games, office supplies, appliances and third-party gift cards.

Within the categories above, the Member's Mark private label brand continues to expand its assortment and deliver member value.

Operations. Sam's Club is available to members through warehouse club locations, as well as online or through the mobile application 24 hours a day. Club locations offer Plus Members the ability to shop before regular operating hours. Consistent with its strategy, Sam's Club continues to develop technology tools to drive a great member experience. Curbside Pickup is available at clubs to help provide fast, easy and contact-free shopping for members. Sam's Club also offers Scan & Go, a mobile checkout and payment solution, which allows members to bypass the checkout line.

Seasonal Aspects of Operations. Sam's Club's business is seasonal to a certain extent due to calendar events and national and religious holidays, as well as different weather patterns. Historically, its highest sales volume has occurred in the fiscal quarter ending January 31.

Competition. Sam's Club competes with other membership-only warehouse clubs, the largest of which is Costco, as well as with discount retailers, retail and wholesale grocers, general merchandise wholesalers and distributors, gasoline stations as well as omni-channel and eCommerce retailers and catalog businesses. At Sam's Club, we provide value at members-only prices, a quality merchandise assortment, and bulk sizing to serve both our Plus and Club members. Our eCommerce website and mobile commerce applications have increasingly become important factors in our ability to compete.

Distribution. We utilize 30 dedicated distribution facilities located strategically throughout the U.S., as well as some of the Walmart U.S. segment's distribution facilities which service the Sam's Club segment for certain items. During fiscal 2024, the majority of Sam's Club's non-fuel club purchases were shipped from these facilities, while the remainder of our purchases were shipped directly to Sam's Club locations by suppliers. Sam's Club ships merchandise purchased on samsclub.com and through its mobile commerce applications by a number of methods including shipments made directly from clubs, 15 dedicated eCommerce fulfillment centers and other distribution centers.

Sam's Club uses a combination of our private truck fleet, as well as common carriers, to transport perishable and non-perishable merchandise from distribution facilities to clubs.

Intellectual Property

We regard our trademarks, service marks, copyrights, patents, domain names, trade dress, trade secrets, proprietary technologies and similar intellectual property as important to our success, and with respect to our associates, customers and others, we rely on trademark, copyright, and patent laws, trade-secret protection, and confidentiality and/or license agreements to protect our proprietary rights. We have registered, or applied for the registration of, a number of U.S. and international domain names, trademarks, service marks and copyrights. Additionally, we have filed U.S. and international patent applications covering certain of our proprietary technology. We have licensed in the past, and expect that we may license in the future, certain of our proprietary rights to third parties.

Suppliers and Supply Chain

As a retailer and warehouse club operator, we utilize a global supply chain that includes both U.S. and international suppliers from whom we purchase the merchandise that we sell in our stores, clubs and online. In many instances, we purchase merchandise from producers located near the stores and clubs in which such merchandise will be sold, particularly products in the "fresh" category. Consistent with applicable laws, we offer our suppliers the opportunity to efficiently sell significant quantities of their products to us. These relationships enable us to obtain pricing that reflects the volume, certainty and cost-effectiveness these arrangements provide to such suppliers, which in turn enables us to provide low prices to our customers. Our suppliers are subject to standards of conduct, including requirements that they comply with local labor laws, local worker safety laws and other applicable laws. Our ability to acquire from our suppliers the assortment and volume of products we wish to offer to our customers, to receive those products within the required time through our supply chain and to distribute those products to our stores and clubs, determines, along with other supply chain logistics matters (such as containers or port access for example), in part, our in-stock levels in our stores and clubs and the attractiveness of our merchandise assortment we offer to our customers and members.

Government Regulation

As a company with global operations, we are subject to the laws of the United States and multiple foreign jurisdictions in which we operate and the rules and regulations of various governing bodies, which may differ among jurisdictions. For additional information, see the risk factors herein in "Item 1A. Risk Factors" under the sub-caption "Legal, Tax, Regulatory, Compliance, Reputational and Other Risks."

Environmental, Social and Governance ("ESG") Priorities

Our ESG strategy is centered on the concept of creating shared value: we believe we maximize long-term value and create competitive advantage for the Company by serving our stakeholders, including our customers, associates, shareholders, suppliers, business partners and communities. We believe that addressing such societal needs builds the value of our business, including by enhancing customer and associate trust, creating new business opportunities, managing cost and risk, building capabilities for future advantage and strengthening the underlying systems on which Walmart and our stakeholders rely.

We prioritize the ESG issues that offer the greatest potential for Walmart to create shared value: issues that rank high in relevance to our business and stakeholders and which Walmart is positioned to make a positive impact. Our current ESG priorities are categorized into four broad themes: opportunity, sustainability, community and ethics and integrity.

- **Opportunity**. Retail can be a powerful engine for inclusive economic opportunity. We aim to advance belonging, diversity, equity and inclusion, and create opportunity for Walmart associates (as further described in the Human Capital Management section below), our suppliers and workers in supply chains, and the communities in which we operate. Doing so helps us fulfill our customer mission, strengthens our business and helps people build a better life for themselves and their families.
- **Sustainability**. Walmart's sustainability efforts focus on our ability to create and preserve long-term value for both people and planet. With respect to people, our sustainability efforts include sourcing responsibly, helping prevent forced labor, empowering women, creating inclusive economic opportunity and selling safer, healthier products. With respect to the planet, our efforts aim to enhance the sustainability of product supply chains by reducing emissions, protecting and restoring nature and reducing waste. To help address the effects of climate change, Walmart has set science-based targets for emissions reduction, including our goal to achieve zero emissions in our operations by 2040—without offsets—and to reduce, avoid or sequester one billion metric tons of emissions in our value chain by 2030 under our Project Gigaton initiative.
- **Community**. Walmart aims to serve and strengthen communities by operating our business in a way that meets the needs of our customer and community stakeholder groups, including by providing safer, healthier and more affordable food and other products, disaster support, associate volunteerism, local grant programs and community cohesion initiatives.
- **Ethics and Integrity**. At every level of our Company, we work to create a culture that inspires trust among our associates, with our customers and in the communities we serve.

We periodically publish information on our ESG priorities, strategies and progress on our corporate website and may update those disclosures from time to time. Nothing on our website, including our ESG reporting, documents or sections thereof, shall be deemed incorporated by reference into this Annual Report on Form 10-K or incorporated by reference into any of our other filings with the SEC.

Human Capital Management

Our associates – powered by technology – play a critical role in delivering on our purpose to help people save money and live better. Our business is focused on serving people and this is delivered by our approximately 2.1 million associates around the world with approximately 1.6 million associates in the U.S. and approximately 0.5 million associates internationally. In the U.S., approximately 92% of our associates are hourly and approximately 69% of our associates are full-time.

We believe our people make the difference, and we are focused on investing in the growth and well-being of our associates, investing in digital experiences to improve their quality of work and creating a culture of belonging. An important part of our focus is to provide opportunities for associates to grow and learn. For some, we are a foundational entry point to develop critical skills that are relevant for a variety of careers. We are focused on developing, rewarding and retaining associates in an ever-changing environment. Our people ultimately make Walmart a better place to work and a better place to shop. Our workforce strategy includes the following strategic priorities: belonging, well-being, growth and digital.

Belonging - *Focus on creating a workplace where all associates feel seen, supported and connected through a culture of belonging.* We publish our diversity representation twice yearly and hold ourselves accountable to providing recurring belonging, diversity, equity and inclusion updates to senior leadership – including our President and CEO – and members of the Board of Directors. Of the approximately 2.1 million associates employed worldwide, 52% identify as women. In the U.S., 51% of the approximately 1.6 million associates identify as people of color.

Our Belonging programs aim to create equitable opportunities for everyone, regardless of background, so that every eligible and qualified individual can thrive and perform. We regularly review our processes around fair-pay practices and are committed to creating a performance culture where associates are rewarded based on meaningful factors such as qualifications, experience, performance and the work they do.

To build a company where associates feel seen, supported and connected, we gather and respond to associate feedback in a variety of ways, including in-person dialogue; real-time digital insights such as pulse surveys; formal surveys like our associate engagement survey; and always-on confidential channels, including our Open Door process and ethics channels.

Well-being - *Prioritize the emotional, physical and financial well-being of associates.* We invest in our associates by offering competitive wages, as well as a broad range of benefits to meet the diverse needs of our global associate population and their eligible dependents. In the U.S., this includes company-paid benefits such as 401(k) match, family building support, maternity leave, fertility benefits, a paid parental leave program to all full-time associates, paid time off, Associate Stock Purchase Plan match, life insurance, behavioral and mental health services, a Walmart discount card or Sam's Club membership and predictable scheduling that helps associates plan for life outside of work and know what to expect in their paychecks.

Additional information about how we invest in our associates' well-being, including wage structure and pay, can be found in our Human Capital brief in our most recent ESG reporting, which is available on our corporate website. Nothing on our website, including our ESG reporting documents, or sections thereof, shall be deemed incorporated by reference into this Annual Report on Form 10-K or incorporated by reference into any of our other filings with the SEC. Certain information relating to retirement-related benefits we provide to our associates is included in Note 11 to our Consolidated Financial Statements.

Growth - *Provide ongoing growth, development and learning opportunities for associates and continue to attract talent with new skills.* We are invested in the growth of our associates – in support of our business and their success – by offering good jobs that lead to great careers and better lives.

Approximately 75% of our U.S. salaried store, club and supply chain management started their careers in hourly positions. Our focus on providing a path of opportunity for our associates through robust training, competitive wages and benefits and career advancement creates a strong associate value proposition and strengthens our workforce. In the U.S., we seek to enable these pathways through programs like Walmart Academy and Live Better U (LBU). Walmart Academy offers training for on-the-job retail skills, leadership and well-being, serving our associates through a combination of digital and in-person offerings. Additionally, our LBU program provides access to educational opportunities for our part-time and full-time frontline eligible associates in the U.S. through high school diplomas, short-form certificates and credentials or college degrees.

Digital - *Drive a digital transformation that improves the associate experience and powers the business*. To deliver a seamless customer and associate experience, we continue to invest in consumer-grade digital tools designed to improve associate productivity and efficiency, engagement and performance, allowing associates to spend more time generating new ideas, developing strategy and building relationships. This capability has been expanded to certain international markets.

Technology is also used to improve associate experience, including an app developed to capture real-time associate feedback. Walmart also supports associates on the U.S. Medical Plan with free virtual visits for medical doctor urgent care and mental health care with psychiatrists and psychologists.

Information About Our Executive Officers

The following chart names the executive officers of the Company as of the date of the filing of this Annual Report on Form 10-K with the SEC, each of whom is elected by, and serves at the pleasure of, the Board of Directors. The business experience shown for each officer has been his or her principal occupation for at least the past five years, unless otherwise noted.

Name	Business Experience	Current Position Held Since	Age
Daniel J. Bartlett	Executive Vice President, Corporate Affairs, effective June 2013. From November 2007 to June 2013, he served as the Chief Executive Officer and President of U.S. Operations at Hill & Knowlton, Inc., a public relations company.	2013	52
Rachel Brand	Executive Vice President, Global Governance, Chief Legal Officer and Corporate Secretary, effective April 2018. From May 2017 to February 2018, she served as Associate Attorney General in the United States Department of Justice.	2018	50
David M. Chojnowski	Senior Vice President and Controller effective January 2017. From October 2014 to January 2017, he served as Vice President and Controller, Walmart U.S.	2017	54
John Furner	Executive Vice President, President and Chief Executive Officer, Walmart U.S. effective November 2019. From February 2017 until November 2019, he served as President and Chief Executive Officer, Sam's Club.	2019	49
Suresh Kumar	Executive Vice President, Global Chief Technology Officer and Chief Development Officer effective July 2019. From February 2018 until June 2019, Mr. Kumar was Vice President and General Manager at Google LLC.	2019	59
Kathryn McLay	Executive Vice President, President and Chief Executive Officer, Walmart International, effective August 2023. From 2019 to 2023, she served as Executive Vice President, President and Chief Executive Officer, Sam's Club. From February 2019 to November 2019, she served as Executive Vice President, Walmart U.S. Neighborhood Markets. From December 2015 until February 2019, she served as Senior Vice President, U.S. Supply Chain.	2023	50
C. Douglas McMillon	President and Chief Executive Officer, effective February 2014. From February 2009 to January 2014, he served as Executive Vice President, President and Chief Executive Officer, Walmart International.	2014	57
Donna Morris	Executive Vice President, Global People, and Chief People Officer, effective February 2020. From April 2002 to January 2020, she worked at Adobe Inc. in various roles, including most recently, Chief Human Resources Officer and Executive Vice President, Employee Experience.	2020	56
Christopher Nicholas	Executive Vice President, President and Chief Executive Officer, Sam's Club effective September 2023. From October 2021 to September 2023, he served as Executive Vice President, Chief Operating Officer, Walmart U.S. From February 2021 until October 2021, he served as Executive Vice President, Chief Financial Officer Walmart U.S. From January 2020 until February 2021, he served as Executive Vice President, Chief Financial Officer Walmart International. He joined the Company in August 2018 as Senior Vice President and Deputy Chief Financial Officer, Walmart International.	2023	47
John David Rainey	Executive Vice President and Chief Financial Officer, effective June 2022. From September 2015 to June 2022, he served as Chief Financial Officer and Executive Vice President, Global Customer Operations for PayPal Holdings, Inc.	2022	53

Our Website and Availability of SEC Reports and Other Information

Our corporate website is located at www.stock.walmart.com. We file with, or furnish to, the SEC Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, amendments to those reports, proxy statements and annual reports to shareholders, and, from time to time, other documents. The reports and other documents filed with, or furnished to, the SEC are available to investors on or through our corporate website free of charge as soon as reasonably practicable after we electronically file them with or furnish them to the SEC. The SEC maintains a website that contains reports, proxy and information statements and other information regarding issuers, such as the Company, that file electronically with the SEC. The address of that website is www.sec.gov. Our SEC filings, our Reporting Protocols for Senior Financial Officers and our Code of Conduct can be found on our website at www.stock.walmart.com. These documents are available in print to any shareholder who requests a copy by writing or calling our Investor Relations Department, which is located at our principal offices.

A description of any substantive amendment or waiver of Walmart's Reporting Protocols for Senior Financial Officers or our Code of Conduct for our chief executive officer, our chief financial officer and our controller, who is our principal accounting officer, will be disclosed on our website at www.stock.walmart.com under the Corporate Governance section. Any such description will be located on our website for a period of 12 months following the amendment or waiver.

ITEM 1A. RISK FACTORS

The risks described below could, in ways we may or may not be able to accurately predict, materially and adversely affect our business, results of operations, financial position and liquidity. Our business operations could also be affected by additional factors that apply to all companies operating in the U.S. and globally. The following risk factors do not identify all risks that we may face.

Strategic Risks

Failure to successfully execute our omni-channel strategy and the cost of our investments in eCommerce and technology may materially adversely affect our market position, net sales and financial performance.

The retail business continues to rapidly evolve and consumers increasingly embrace digital shopping. As a result, the portion of total consumer expenditures with retailers and wholesale clubs occurring through digital platforms is increasing and the pace of this increase could continue to accelerate.

Our strategy, which includes investments in eCommerce, technology, including the use of artificial intelligence technology, talent, supply chain automation, acquisitions, joint ventures, store remodels and other customer initiatives may not adequately or effectively allow us to continue to grow our eCommerce business, increase comparable sales, maintain or grow our overall market position or otherwise offset the impact on the growth of our business of a moderated pace of new store and club openings and sustain the current pace of remodels. The success of this strategy will depend in large measure on our ability to continue building and delivering a seamless omni-channel shopping experience and interconnected ecosystem for our customers that deepens and maintains our relationships with our customers across our various businesses and partnerships and reinforces our overall enterprise strategy. The success of this strategy is further subject to the related risks discussed in this Item 1A. With the interconnected components of this enterprise strategy and an increasing allocation of capital expenditures focused on these initiatives, changes in customer or member perceptions about our reputation or our failure to successfully execute on individual components of this strategy may adversely affect our market position, net sales and financial performance, which could also result in impairment charges to intangible assets or other long-lived assets. In addition, a greater concentration of eCommerce sales, including increasing online grocery sales, could result in a reduction in the amount of traffic in our stores and clubs, which would, in turn, reduce the opportunities for cross-store or cross-club sales of merchandise that such traffic creates and could reduce our sales within our stores and clubs and materially adversely affect our financial performance.

Furthermore, the cost of certain investments in eCommerce, technology, talent and automation, including any operating losses incurred for those initiatives, will adversely impact our financial performance in the short-term and failure to realize the benefits of these investments may adversely impact our financial performance over the longer term.

If we do not timely identify or effectively respond to consumer trends or preferences, it could negatively affect our relationship with our customers, demand for the products and services we sell, our market share and the growth of our business.

It is difficult to predict consistently and successfully the products and services our customers will demand and changes in their shopping patterns, tastes and preferences. The success of our business depends in part on how accurately we predict consumer demand, availability of merchandise, the related impact on the demand for existing products and services and the competitive environment. Our business is dependent on our ability to make critical decisions and predictions with respect to merchandise categories that quickly respond to changing consumer spending patterns, tastes and preferences, any incorrect calculations by us may result in lower sales, spoilage and inventory markdowns, which could adversely impact our results of operations. Our ability to predict and adapt to changing tastes and preferences depends on many factors, including obtaining accurate and relevant data on customer preferences, emphasizing relevant merchandise categories, effectively managing our inventory levels, and implementing competitive and effective pricing and promotion strategies. Price transparency, assortment of products, customer experience, convenience, ease and the speed and cost of shipping are of primary importance to customers and continue to increase in importance, particularly as a result of digital tools and social media available to consumers and the choices available to consumers for purchasing products. We must continue to preserve our reputation, which is impacted based on public perceptions. It may be difficult to address negative publicity across media channels, regardless of whether it is accurate. Negative incidents involving us, our workforce (including the loss of merchandise as a result of shrink or theft) or others with whom we do business could quickly erode trust and confidence in our business and could result in consumer boycotts, workforce unrest and government investigations. Negative reputational incidents or negative perceptions of us could adversely impact our business and results of operations, including through lower sales, the termination of business relationships and associate retention and recruiting efforts. Moreover, failure to adequately predict customer demand and consumer spending patterns or otherwise optimize and operate our distribution and fulfillment centers could result in excess or insufficient inventory, service interruptions and increased costs, any of which could significantly harm our business. As we continue to add new fulfillment centers, our fulfillment and technology networks become increasingly complex and operating them becomes more challenging. There can be no assurance that we will be able to operate our networks effectively.

We face strong competition from other retailers, wholesale club operators, omni-channel retailers and other businesses which could materially adversely affect our financial performance.

Each of our segments competes for customers, employees, digital prominence, products and services and in other important aspects of its business with many other local, regional, national and global physical, eCommerce and omni-channel retailers, social commerce platforms, wholesale club operators and retail intermediaries, as well as companies that offer services in digital advertising, fulfillment and delivery services, health and wellness and financial services. The omni-channel retail landscape is highly competitive and rapidly evolving, and the entry of new, well-funded competitors may increase competitive pressures. In addition, for eCommerce and other internet-based businesses, newer or smaller businesses may be better able to innovate and compete with us.

We compete in a variety of ways, including the prices at which we sell our merchandise, merchandise selection and availability, services offered to customers, location, store hours, in-store amenities, the shopping convenience and overall shopping experience we offer, the attractiveness and ease of use of our digital platforms, cost and speed of and options for delivery to customers of merchandise purchased through our digital platforms or through our omni-channel integration of our physical and digital operations.

A failure to respond effectively to competitive pressures and changes in the retail and other markets in which we operate, omni-channel innovations and omni-channel ecosystems developed by our competitors or delays or failure in execution of our strategy could materially adversely affect our financial performance. See "Item 1. Business" above for additional discussion of the competitive situation of each of our reportable segments.

Certain segments of the retail industry are undergoing consolidation or substantially reducing operations, whether due to bankruptcy, consolidation or other factors. Such consolidation, or other business combinations or alliances, competitive omni-channel ecosystems or reductions in operations may result in competitors with greatly improved financial resources, improved access to merchandise, greater market penetration and other improvements in their competitive positions. Such business combinations or alliances could allow these companies to provide a wider variety of products and services at competitive prices, which could adversely affect our financial performance.

General or macro-economic factors, both domestically and internationally, may materially adversely affect our financial performance.

General economic conditions and other economic factors, globally or in one or more of the markets we serve, may adversely affect our financial performance. Higher interest rates, higher prices of petroleum products, including crude oil, natural gas, gasoline and diesel fuel, higher costs for electricity and other energy, weakness in the housing market, inflation, deflation, increased costs of essential services, such as medical care and utilities, higher levels of unemployment, decreases in consumer disposable income, unavailability of consumer credit, higher consumer debt levels, changes in consumer spending and shopping patterns, fluctuations in currency exchange rates, higher tax rates, imposition of new taxes or other changes in tax laws, changes in healthcare laws, other regulatory changes, the imposition of tariffs or other measures that create barriers to or increase the costs associated with international trade, overall economic slowdown or recession and other economic factors in the U.S., or in any of the other markets in which we operate, could adversely affect consumer demand for the products and services we sell in the U.S. or such other markets, change the mix of products we sell to one with a lower average gross margin, cause a slowdown in discretionary purchases of goods, adversely affect our net sales, growth rates, operating income and result in slower inventory turnover and greater markdowns of inventory, or otherwise materially adversely affect our operations and operating results and could result in impairment charges to intangible assets, goodwill or other long-lived assets.

In addition, the economic factors listed above, any other economic factors or circumstances resulting in higher transportation, labor, insurance or healthcare costs or commodity prices, including energy prices, and other economic factors in the U.S. and other countries in which we operate can increase our cost of sales and operating, selling, general and administrative expenses and otherwise materially adversely affect our operations and operating results.

The economic factors that affect our operations may also adversely affect the operations of our suppliers, which can result in an increase in the cost to us of the goods we sell to our customers or, in more extreme cases, in certain suppliers not producing goods in the volume typically available to us for sale, or adversely impact product margins due to higher labor and material costs of our suppliers that we are unable, or choose not, to pass on to our customers.

The performance of strategic alliances and other business relationships to support the expansion of our business could materially adversely affect our financial performance.

We may enter into strategic alliances and other business relationships in the countries in which we have existing operations or in other markets to expand our business. These arrangements (such as ONE, our fintech venture, and our healthcare initiative with UnitedHealth Group) may not generate the level of sales or profitability we anticipate when entering into the arrangement or may otherwise adversely impact our business and competitive position relative to the results we could have achieved in the absence of such alliance. In addition, any investment we make in connection with a strategic alliance, business relationship or in certain of our divested markets, could materially adversely affect our financial performance.

Operational Risks

Global or regional health pandemics or epidemics, such as COVID-19, could negatively impact our business, financial position and results of operations.

The emergence, severity, magnitude and duration of global or regional pandemics, epidemics or other health crises are uncertain and difficult to predict. A pandemic, such as COVID-19, or other epidemic or contagious disease outbreak could impact our business operations, demand for our products and services, in-stock positions, costs of doing business, access to inventory, supply chain operations, the extent and duration of measures to try to contain the spread of a virus or other disease (such as travel bans and restrictions, quarantines, shelter-in-place orders, limitations on large gatherings, business and government shutdowns and other restrictions on retailers), our ability to predict future performance, exposure to litigation and our financial performance, among other things. In the event of any global or regional health crisis, customer demand for certain products may fluctuate, customer behaviors may change and consumer disposable income could be negatively impacted, which may challenge our ability to anticipate and/or adjust inventory levels to meet that demand. Other factors and uncertainties may include, but are not limited to: the severity and duration of pandemics, epidemics or other health crises, including disease outbreaks in areas in which we and our suppliers operate; increased operational costs; evolving macroeconomic factors, including general economic uncertainty, unemployment rates and recessionary pressures; unknown consequences on our business performance and initiatives stemming from the substantial investment of time, capital and other resources to a pandemic or other health crisis response; the effectiveness and extent of administration of vaccinations and medical treatments; the pace of recovery when any such pandemic or other health crisis subsides; and the long-term impact of a pandemic or other health crisis on our business, including consumer behaviors. These risks and their impacts are difficult to predict and could otherwise disrupt and adversely affect our operations and our financial performance.

To the extent that a future pandemic or epidemic occurs, such events may also heighten other risks described in this section, including but not limited to those related to consumer behavior and expectations, competition, our reputation, implementation of strategic initiatives, cybersecurity threats, payment-related risks, technology systems disruption, supply chain disruptions, labor availability and cost, litigation and regulatory requirements.

Natural disasters, climate change, geopolitical events, catastrophic and other events could materially adversely affect our financial performance.

The occurrence of one or more natural disasters, such as hurricanes, tropical storms, floods, fires, earthquakes, tsunamis, cyclones, typhoons; weather conditions such as major or extended winter storms, droughts and tornadoes, whether as a result of climate change or otherwise; geopolitical tensions or events; and catastrophic and other events, such as war, civil unrest (including theft, looting or vandalism), terrorist attacks or other acts of violence, including active shooter situations (such as those that have occurred in our U.S. stores), or the loss of merchandise as a result of shrink or theft in countries in which we operate, in which our suppliers are located or regions goods are transported from or through, or in other areas of the world (such as in Ukraine and Israel where wars currently exist, and armed hostilities in the Red Sea and surrounding areas through which ocean carrier vessels travel to the Suez Canal) could adversely affect our operations and financial performance.

Such events could result in physical damage to, or the complete loss of, one or more of our properties, the closure of one or more stores, clubs and distribution or fulfillment centers, limitations on store or club operating hours, the lack of an adequate work force in a market, the inability of customers and associates to reach or have transportation to our stores and clubs affected by such events, the evacuation of the populace from areas in which our stores, clubs and distribution and fulfillment centers are located, the unavailability of our digital platforms to our customers, changes in the purchasing patterns of consumers (including the frequency of visits by consumers to physical retail locations, whether as a result of limitations on large gatherings, travel and movement limitations or otherwise), such as Hurricane Otis that impacted our stores and operations around Acapulco, Mexico in fiscal 2024, although not material to our consolidated financial performance. Moreover, these disasters and events can negatively impact consumers' disposable income, the temporary or long-term disruption in the supply of products from some suppliers, the disruption in the transport of goods from overseas, the disruption or delay in the delivery of goods to our distribution and fulfillment centers or stores within a country in which we are operating, the reduction in the availability of products in our stores, increases in the costs of procuring products as a result of either reduced availability or economic sanctions, increased transportation costs (whether due to fuel prices, fuel supply or otherwise), the disruption (whether directly or indirectly) of critical infrastructure systems, banking systems, utility services or energy availability to our stores, clubs and our facilities and the disruption in our communications with our stores, clubs and our other facilities.

Furthermore, the long-term impacts of climate change, whether involving physical risks (such as extreme weather conditions, drought or rising sea levels) or transition risks (such as regulatory or technology changes) are expected to be widespread and unpredictable. Certain impacts of physical risk may include: temperature changes that increase the heating and cooling costs at stores, clubs and distribution or fulfillment centers; extreme weather patterns that affect the production or sourcing of certain commodities; flooding and extreme storms that damage or destroy our buildings and inventory; and heat and extreme weather events that cause long-term disruption or threats to the habitability of the communities in which we operate. Relative to transition risk, certain impacts may include: changes in energy and commodity prices driven by climate-related weather events; prolonged climate-related events affecting macroeconomic conditions with related effects on consumer spending and confidence; stakeholder perception of our engagement in climate-related policies; and new regulatory requirements resulting in higher compliance risk and operational costs.

We bear the risk of losses incurred as a result of physical damage to, or destruction of, any stores, clubs and distribution or fulfillment centers; theft, loss or spoilage of inventory; and business interruption caused by such events. These events and their impacts could otherwise disrupt and adversely affect our operations and could materially adversely affect our financial performance. Moreover, our operations in the U.S. comprise a significant portion of our financial and operational performance. Therefore, any of the above matters that uniquely impact or are specifically concentrated in the U.S. could materially adversely affect our financial and operational performance.

Risks associated with our suppliers could materially adversely affect our financial performance.

The products we sell are sourced from a wide variety of domestic and international suppliers. Global sourcing of many of the products we sell is an important factor in our financial performance. We expect our suppliers to comply with applicable laws, including labor, safety, anti-corruption and environmental laws, and to otherwise meet our required supplier standards of conduct. Our ability to find qualified suppliers who uphold our standards, and to access products in a timely and efficient manner and in the large volumes we may demand, is a significant challenge, especially with respect to suppliers located and goods sourced outside the U.S.

Political and economic instability, as well as other impactful events and circumstances (such as pandemic recovery related challenges, including supply chain disruption and production, labor shortages and increases in labor costs) in the countries in which our suppliers and their manufacturers are located or regions goods are transported from or through, the financial instability of suppliers, suppliers not having the financial ability or capacity to fulfill their indemnification obligations to us if called upon, thereby exposing us to the full cost of risks and claims, suppliers' failure to meet our terms and conditions or our supplier standards (including our responsible sourcing standards), labor problems experienced by our suppliers and their manufacturers, the availability of raw materials to suppliers, merchandise safety and quality issues, disruption or delay in the transportation of merchandise from the suppliers and manufacturers to our stores, clubs and other facilities, including as a result of labor slowdowns at any port at which a material amount of merchandise we purchase enters into the markets in which we operate, currency exchange rates, transport availability and cost, transport security, inflation and other factors relating to the suppliers and the countries in which they are located are beyond our control.

In addition, U.S. and international trade policies, tariffs and other restrictions on the exportation and importation of goods, trade sanctions imposed between certain countries and entities, the limitation on the exportation or importation of certain types of goods or of goods containing certain materials from other countries and other factors relating to foreign trade are beyond our control. These and other factors affecting our suppliers and our access to products could adversely affect our operations and financial performance.

If the quality or safety of products we sell in stores or online fails to meet our customers' expectations or regulatory standards, we could lose customers, incur liability for any injuries caused by a product we sell or otherwise experience a material impact to our brand, reputation and financial performance.

Our customers count on us to provide them with quality products at an affordable price. Occasionally, the quality of products that we source from our suppliers fails to meet customer expectations. In many cases, these products are subject to regulatory action or recall. For general merchandise, this could be because the product fails to meet safety standards. For food products, it could be because the product is a source of foodborne illness. For health and wellness products, it could be because the product does not produce the expected result for the customer or harms the customer. Any of these factors could cause customers to avoid purchasing certain products from us, or to choose to buy products from a different retailer, even if the quality issue is outside of our control. Any lost confidence on the part of our customers would be difficult and costly to reestablish. When a product we sell does not meet quality or safety standards, there is an increased risk of liability for harm the product may cause our customers. While we rely on our suppliers to meet our safety and quality expectations, and to indemnify us if their products do not, certain suppliers may not have the financial capacity or ability to fulfill their indemnification obligations. In that case, we are exposed to the full cost of liability claims. Any issue regarding the quality or safety of products we sell, regardless of the cause, could adversely affect our brand, reputation and financial performance.

If the quality or safety of products offered for sale on our third-party marketplace fails to meet our customers' expectations or regulatory standards, we could be held directly liable, lose customers, become subject to regulatory enforcement or otherwise experience reputational harm.

Some of the products customers buy from our website are sold by third parties, which we refer to as marketplace transactions. While that transaction ultimately occurs between the third-party seller and the customer, some regulators and courts have taken a view that the retailer is responsible for marketplace transactions that occur on a retailer's digital platform. Unsettled law on whether a retailer is responsible for intellectual property or product liability claims related to marketplace transactions creates additional risk. Any unfavorable changes or legal interpretations could further expose us to liability. In addition, poor quality or safety of third-party products offered for sale on our platforms could erode customer trust, leading to loss of sales, reduction in transactions and deterioration of our competitive position. In addition, we may face reputational, financial and other risks, including liability, for third-party products offered for sale on our platform that are controversial, counterfeit, pirated or stolen or that infringe the intellectual property rights of others. We may not be able to collect sufficient damages for these types of breaches from third-party sellers. Furthermore, a regulator may view us as having responsibility for regulatory compliance of the third-party products offered for sale on our platform. Although we have marketplace compliance controls in place and impose contractual terms on sellers to prohibit sales of non-compliant products, we may not be able prevent sellers from offering prohibited items for sale, enforce such terms, or fully protect against regulatory risk. Any of these events could have a material adverse impact on our business and results of operations and impede the execution of our eCommerce growth and enterprise strategy.

We rely extensively on information and financial systems to process transactions, summarize results and manage our business. Disruptions in our systems could harm our ability to conduct our operations.

Given the number of individual transactions we have each year, it is crucial that we maintain uninterrupted operation of our business-critical information systems. Our information systems are subject to damage or interruption from power outages, computer and telecommunications failures, computer viruses, worms, other malicious computer programs, denial-of-service attacks, security incidents and breaches from a variety of threat actors, including both cybercriminals and nation state-sponsored actors, catastrophic events such as fires, major or extended winter storms, tornadoes, earthquakes and hurricanes, usage errors by our associates or contractors, civil or political unrest or armed hostilities. The availability of our information systems and the integrity of data are essential to our business operations, including the processing of transactions, management of our associates, facilities, logistics, inventories, physical stores and clubs and our online operations. Our information systems are not fully redundant and our disaster recovery planning cannot account for all eventualities. If our systems are damaged, breached, attacked, interrupted or otherwise cease to function properly, we may have to make a significant investment to repair or replace them, and may experience loss or corruption of data as well as suffer interruptions in our business operations in the interim. Any interruption to the availability of our information systems or corruption of our data may have a material adverse effect on our business or results of operations. In addition, the cost of securing our systems against failure or attack is considerable, and increases in these costs, particularly in the wake of a breach or failure, could be significant.

In addition, we frequently update our information technology hardware, software, processes and systems. The risk of system disruption is increased when significant system changes are undertaken. If we fail to timely or successfully integrate and update our information systems and processes, we may fail to realize the cost savings or operational benefits anticipated to be derived from these initiatives. For example, during the first quarter of the fiscal year ended January 31, 2024, we initiated an upgrade to our existing financial system, including our general ledger and other applications. If we are unable to implement this upgrade as planned, the effectiveness of our internal control over financial reporting could be adversely affected; our ability to assess those controls adequately could be delayed; and our reputation, business, results of operations, financial condition and cash flows could be negatively impacted.

If the technology-based systems that give our customers the ability to shop with us online and enable us to deliver products and services do not function effectively, our operating results, as well as our ability to grow our omni-channel business globally, could be materially adversely affected.

Increasingly, customers are using computers, tablets and smart phones to shop with us and with our competitors and to do comparison shopping. We use social media, online advertising and email to interact with our customers and as a means to enhance their shopping experience. As a part of our omni-channel sales strategy, we offer various pickup, delivery and shipping programs including options where many products available for purchase online can be picked up by the customer or member at a local Walmart store or Sam's Club, which provides additional customer traffic at such stores and clubs. Omni-channel retailing is a rapidly evolving part of the retail industry and of our operations around the world, and we continue to make investments in supply chain automation to support our omni-channel strategy. We must anticipate and meet our customers' changing expectations while adjusting for technology investments and developments in our competitors' operations through focusing on the building and delivery of a seamless shopping experience across all channels by each operating segment. Moreover, some of the various technology systems and services on which we rely are provided and managed by third-party service providers. To the extent either our or such other third-party systems and services do not perform or function as anticipated, whether because of an inherent flaw in the technology, a faulty implementation or a cybersecurity incident, such failure can significantly interfere with our ability to meet our customers' changing expectations. Any disruption or failure on our part to provide attractive, user-friendly and secure digital platforms that offer a wide assortment of merchandise and services at competitive prices and with low cost and rapid delivery options and that continually meet the changing expectations of online shoppers and developments in online and digital platform merchandising and related technology in a cost-efficient manner could place us at a competitive disadvantage, result in the loss of eCommerce and other sales, harm our reputation with customers, have a material adverse impact on the growth of our eCommerce business globally and have a material adverse impact on our business and results of operations.

Any failure to maintain the privacy or security of the information relating to our company, customers, members, associates, business partners and vendors, whether as a result of cyberattacks on our information systems or otherwise, could damage our reputation, result in litigation or other legal actions against us, result in fines, penalties, and liability, cause us to incur substantial additional costs and materially adversely affect our business and operating results.

Like most retailers, we process in our information systems personal information and/or payment information about our customers and members, and we also process information concerning our associates and vendors. In addition, our health and wellness business operations, the Walmart Health locations, and third-party service providers who handle information on our behalf, store and maintain personal health information. Some of this information is stored digitally in connection with the digital platforms and technologies that we use to conduct and facilitate our various businesses. We utilize third-party service providers for a variety of reasons, including, without limitation, for digital storage technology, compute capacity, content delivery to customers and members, back-office support and other functions. Such providers may have access to information we hold about our customers, members, associates, business partners or vendors. In addition, our eCommerce operations depend upon the secure transmission of confidential information over public networks, including information permitting cashless payments.

Cyber threats are rapidly evolving and those threats and the means for disrupting or obtaining access to information systems or information stored in digital and other storage media are becoming increasingly sophisticated and frequent, and in some cases, they may lead to successful attacks. Unauthorized activities directed against information systems and devices, whether our own or those of our third-party service providers and vendors, have resulted in cybersecurity incidents, including malware, ransomware, denial of service attacks or phishing incidents. We expect that our information systems and those of our third-party service providers, vendors and suppliers will continue to experience such attempted attacks in the future, which could include disruptions to our supply chain system. Cyberattacks and threat actors can be sponsored by particular nation-states, or be the work of sophisticated criminal organizations, insiders (including our associates or contractors) or third parties, each with a wide-range of motives and expertise. We and the businesses with which we interact have experienced and continue to experience incidents and threats to data and information systems. These incidents and threats have included and are likely to continue to include both random and targeted cyberattacks, computer viruses, phishing incidents, worms, bot attacks, ransomware or other destructive or disruptive software and attempts to misappropriate customer information, including credit card and payment information, and cause system failures and disruptions. The increased use of remote work infrastructure in recent years has also increased the possible attack surfaces to be exploited. Our logging capabilities, or the logging capabilities of third parties, are also not always complete or sufficiently detailed, affecting our ability to fully investigate and understand the scope of security events. As noted above, some of our information systems and those of our third-party service providers have experienced cybersecurity incidents or breaches and, although to date they have not had a material adverse effect on our operating results, there can be no assurance of a similar result in the future.

Our digital platforms, which are increasingly important to our business and continue to grow in complexity and scope, and the systems on which they run, including those applications and systems used in legacy operations and acquired eCommerce, technology or other businesses, are regularly subject to cyberattacks. Those attacks involve attempts to impede the operations of our system or gain unauthorized access to our eCommerce websites (including marketplace platforms) or mobile commerce applications to obtain and misuse customers' or members' information including personal information and/or payment information and related risks discussed in this Item 1A. Such attacks, if successful, may result in potential data misuse and/or loss and may create denials of service or otherwise disable, degrade or sabotage the information systems that enable or support one or more of our digital platforms or otherwise significantly disrupt our customers' and members' shopping experience, our supply chain integrity and continuity and our ability to efficiently operate our business. If we are unable to maintain the security of the information systems that enable or support our digital platforms and keep them operating within acceptable parameters, we could suffer loss of sales, reductions in transactions, reputational damage and deterioration of our competitive position and incur liability for any damage to customers, members or others whose personal or confidential information is unlawfully obtained and misused, any of which events could have a material adverse impact on our business and results of operations and impede the execution of our strategy for the growth of our business.

Associate error or malfeasance, faulty password management, social engineering or other vulnerabilities and irregularities may also result in a defeat of our security measures or those of our third-party service providers and a compromise or breach of our or their information systems. Moreover, the hardware, software or applications that comprise our information system and networked environment may have vulnerabilities or defects of design, coding, manufacture or operations that could be intentionally exploited or inadvertently used in a manner that could compromise information security. Given the age, size and complexity of these information systems and our networked environment, patches for certain vulnerabilities may not exist and, even where patches or other risk-mitigating activities are available, the deployment of patches or execution of risk-mitigating actions may not occur before an underlying vulnerability is exploited by threat actors or inadvertently results in the compromise of our information systems or data.

Any compromise of our information systems or of those of businesses with which we interact, which results in regulated data or confidential information being accessed, obtained, damaged, disclosed, destroyed, modified, lost or used by unauthorized persons could harm our reputation and expose us to regulatory actions (including, with respect to health information, liability under the Health Insurance Portability and Accountability Act of 1996, or "HIPAA"), customer attrition, remediation expenses and claims from customers, members, associates, vendors, financial institutions, payment card networks and other persons, any of which could materially and adversely affect our business operations, financial position and results of operations.

Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems or data change frequently and may not immediately produce signs of a compromise, we may be unable to anticipate these techniques or to implement adequate preventative measures, or detect the activities of a threat actor. Even if we detect a cybersecurity incident, the nature and extent of that cybersecurity incident may not be immediately clear. Based on the sophistication of the threat actors and the size and complexity of our information systems and networked environment, among other factors, an investigation into a cybersecurity incident could take a significant amount of time to complete. We may not understand or appreciate that what is detected and treated as multiple individual cybersecurity incidents or events may be associated with the coordinated actions of a single threat actor. In addition, while our investigation of a cybersecurity incident is ongoing, we may not know the full extent of the harm caused by a threat actor, and such harm may spread both internally and to certain customers, vendors, or other third parties. These factors may inhibit our ability to provide rapid, complete and reliable information about the cybersecurity incident to customers, counterparties and regulators, as well as the public. It may also not be clear how best to contain and remediate any harm caused by the cybersecurity incident, and certain errors or actions could be repeated or compounded before they are discovered and remediated. Any or all of these factors could further increase the costs and consequences of a cybersecurity incident on our business operations, financial position and results of operations.

To the extent that any cyberattack, ransomware or incursion in our or one of our third-party service provider's information systems results in the loss, damage, misappropriation or other compromise of information, we may be materially adversely affected by claims from customers, members, financial institutions, regulatory authorities, payment card networks and others.

Our compliance programs, information technology and enterprise risk management efforts cannot eliminate all systemic risk. Disruptions in our systems caused by associate error or malfeasance, security incidents, breaches or cyberattacks – including attacks on those parties we do business with (such as strategic partners, suppliers, banks or utility companies) – could harm our ability to conduct our operations, which may have a material effect on us, may result in losses that could have a material adverse effect on our financial position or results of operations, or may have a cascading effect that adversely impacts our partners, third-party service providers, customers, members, financial services firms and other third parties that we interact with on a regular basis.

Our reputation with our customers and members is important to the success of our enterprise strategy, which combines traditional retail, membership models, marketplaces, financial services, healthcare, and other customer and business services into a series of interconnected assets to make it seamless for customers to interact with us. Security-related events could be widely publicized and could materially adversely affect our reputation with our customers, members, associates, vendors and shareholders, could harm our competitive position particularly with respect to our eCommerce operations, and could result in a material reduction in our net sales in our eCommerce operations, as well as in our stores thereby materially adversely affecting our operations, net sales, growth rates, operating income, results of operations, financial position, cash flows and liquidity. Such events could also result in the release to the public of confidential information about our operations and financial position and performance and could result in litigation or other legal actions against us or the imposition of penalties, fines, fees or liabilities, which may not be covered by our insurance policies. Moreover, a security compromise or operationally impactful malware event, such as ransomware, could require us to devote significant management resources to address the problems created by the issue and to expend significant additional resources to upgrade further the security measures we employ to guard personal and confidential information against cyberattacks and other attempts to access or otherwise compromise such information and could result in a disruption of our operations, particularly our digital operations.

We accept payments using a variety of methods, including cash, checks, credit and debit cards, electronic benefits transfer (EBT) cards, mobile payments and our private label credit cards and gift cards, and we may offer new payment options over time, which may have information security risk implications. As a retailer accepting debit and credit cards for payment, we are subject to various industry data protection standards and protocols, such as payment network security operating guidelines and the Payment Card Industry Data Security Standard. We cannot be certain that the security measures we or our third-party suppliers maintain are able to detect, prevent or contain cyberattacks, cyberterrorism, security incidents, breaches or other compromises from malware, ransomware or other threats that are known or may be developed in the future. In certain circumstances, our contracts with payment card processors and payment card networks (such as Visa, Mastercard, American Express and Discover) generally require us to adhere to payment card network rules which could make us liable to payment card issuers and others if information in connection with payment cards and payment card transactions that we process is compromised, which liabilities could be substantial.

Additionally, through various financial service partners and our ONE fintech venture, we offer various services such as money transfers, digital payment platforms, bill payment, money orders, check cashing, prepaid access, co-branded credits cards, installment lending and earned wage access. These products and services require us to comply with legal and regulatory requirements, including those related to privacy, information security, anti-money laundering and sanctions regimes and consumer protection, under both U.S. state and federal laws and regulations, as well as those of certain other countries. Failure to comply with these laws and regulations could result in fines, sanctions, penalties and harm to our reputation.

We also have compliance obligations associated with privacy laws enacted to protect and regulate the collection, use, retention, disclosure and transfer of personal information, which include liability for security and privacy breaches. Among other obligations, breaches may trigger obligations under U.S. federal and state laws and those in certain other countries to notify affected individuals, government agencies and the media. Consequently, cybersecurity incidents that result in a data breach could subject us to fines, sanctions and other legal liability and harm our reputation.

Changes in third-party reimbursements and contracts, type or scope of offerings of our health and wellness business or the Walmart Health business could adversely affect our overall results of operations, cash flows and liquidity.

We have retail pharmacy operations in our Walmart U.S. and Sam's Club segments across the U.S. and in various of our international markets such as Canada and Mexico. We also provide management services to Walmart Health centers that offer medical, dental, behavioral health and other health services in a number of states, as well as a national telehealth service provider. In addition, our 10-year collaboration with UnitedHealth Group includes agreements for Walmart Health to provide value-based care to patients in certain areas of the U.S., among other initiatives.

A large majority of our retail pharmacy net sales are generated by filling prescriptions for which we receive payment through established contractual relationships with third-party payers and payment administrators, such as private insurers, governmental agencies and pharmacy benefit managers ("PBMs"). Our retail pharmacy operations are subject to numerous risks, including: reductions in the third-party reimbursement rates for drugs; changes in our payer mix (i.e., shifts in the relative distribution of our pharmacy customers across drug insurance plans and programs toward plans and programs with less favorable reimbursement terms); changes in third-party payer drug formularies (i.e., the schedule of prescription drugs approved for reimbursement or which otherwise receive preferential coverage treatment); growth in, and our participation in or exclusion from, pharmacy payer network arrangements, including exclusive and preferred pharmacy network arrangements operated by PBMs and/or any insurance plan or program; increases in the prices we pay for brand name and generic prescription drugs we sell; increases in the administrative burdens associated with seeking third-party reimbursement; changes in the frequency with which new brand name pharmaceuticals become available to consumers; introduction of lower cost generic drugs as substitutes for existing brand name drugs for which there was no prior generic drug competition; changes in drug mix (i.e., the relative distribution of drugs customers purchase at our pharmacies between brands and generics); changes in the health insurance market generally; changes in the scope of or the elimination of Medicare Part D or Medicaid drug programs; increased competition from other retail pharmacy operations including competitors offering online retail pharmacy options and/or home delivery options; further consolidation and strategic alliances among third-party payers, PBMs or purchasers of drugs; overall economic conditions and the ability of our pharmacy customers to pay for drugs prescribed for them to the extent the costs are not reimbursed by a third-party; failure to meet any performance or incentive thresholds to which our level of third-party reimbursement may be subject; changes in laws or regulations or the practices of third-party payers and PBMs related to the use of third-party financial assistance to assist our pharmacy customers with paying for drugs prescribed for them; and any additional changes in the state or federal regulatory environment for the retail pharmacy industry and the pharmaceutical industry, including as a result of health reform efforts, and other changes to or novel interpretations of existing state or federal laws, rules and regulations that affect our retail pharmacy business.

If the supply of certain pharmaceuticals provided by one or more of our vendors were to be disrupted for any reason, our pharmacy operations could be severely affected until at least such time as we could obtain a new supplier for such pharmaceuticals. Any such disruption could cause reputational damage and result in a significant number of our pharmacy customers transferring their prescriptions to other pharmacies.

Walmart Health clinical operations are also subject to numerous risks, including but not limited to: reductions in the third-party reimbursement rates for services; changes in our payer mix; changes in the health insurance market generally; our inability to retain and negotiate favorable contracts with private third-party payers, including managed care plans; competition for patients from other healthcare providers, including those that offer telehealth services; changes to healthcare provider utilization practices and treatment methodologies; trends toward value-based purchasing and price transparency; overall economic conditions and the ability of patients to pay for services; staffing challenges, including retention of a sufficient number and quality of healthcare professionals; compliance with the complex and extensive laws and regulations governing the healthcare industry; changes in laws and regulations, including as a result of health reform efforts; and healthcare technology initiatives, including those related to patient data and interoperability; and public health conditions.

One or a combination of the factors above may adversely affect the volumes of brand name and generic pharmaceuticals we sell, our cost of sales associated with our retail pharmacy operations, and the net sales and gross margin of those operations or result in the loss of cross-store or cross-club selling opportunities. In addition, these and other factors may adversely affect the type, volume and mix of services we provide, the reimbursement we receive for health and wellness services rendered, and the scope and pace of expansion of Walmart Health and related offerings. Any of these developments could, in turn, adversely affect our overall net sales, other results of operations, cash flows and liquidity.

Our failure to attract and retain qualified associates, increases in wage and benefit costs, changes in laws and other labor issues could materially adversely affect our financial performance.

Our ability to continue to conduct and expand our operations depends on our ability to attract and retain a large and growing number of qualified associates globally. Our ability to meet our labor needs, including our ability to find qualified personnel to fill positions that become vacant at our existing stores, clubs, distribution and fulfillment centers and corporate offices, while controlling our associate wage and related labor costs, is generally subject to numerous external factors, including the availability of a sufficient number of qualified persons in the work force of the markets in which we operate, unemployment levels within those markets, prevailing wage rates, changing demographics, health and other insurance costs and adoption of new or revised employment and labor laws and regulations. Additionally, our ability to successfully execute organizational changes, including our enterprise strategy and management transitions within our senior leadership, and to effectively motivate and retain associates are critical to our business success. We compete for talent with other retail and non-retail businesses, including, for example, technology, health and wellness and fintech businesses, and invest significant resources in training and motivating our associates. Increased competition among potential employers at all levels, including senior management and executive levels, could result in increased associate costs or make it more difficult to recruit and retain associates. If we are unable to locate, attract or retain qualified personnel, or manage leadership transition successfully, the quality of service we provide to our customers may decrease and our financial performance may be adversely affected.

In addition, if our costs of labor or related costs increase for other reasons or if new, revised or novel interpretations of existing labor laws, rules or regulations or healthcare laws, including those related to worker classification, are adopted or implemented that further increase our labor costs, our financial performance could be materially adversely affected.

Financial Risks

Failure to meet market expectations for our financial performance could adversely affect the market price and volatility of our stock.

We believe that the price of our stock generally reflects high market expectations for our future operating results. Any failure to meet or delay in meeting these expectations, including our consolidated net sales, consolidated operating income, growth rates, eCommerce growth rates, advertising and other higher-margin initiatives (which is expected to help drive our operating income growth at a rate faster than net sales over the long term), capital expenditures, comparable store and club sales growth rates or earnings and adjusted earnings per share could cause the market price of our stock to decline, as could changes in our dividend or stock repurchase programs or policies, changes in our effective tax rates, changes in our financial estimates and recommendations by securities analysts or, failure of our performance to compare favorably to that of other retailers may have a negative effect on the price of our stock.

Fluctuations in foreign exchange rates may materially adversely affect our financial performance and our reported results of operations.

Our operations in countries other than the U.S. are conducted primarily in the local currencies of those countries. Our Consolidated Financial Statements are denominated in U.S. dollars, and to prepare those financial statements we must translate the amounts of the assets, liabilities, net sales, other revenues and expenses of our operations outside of the U.S. from local currencies into U.S. dollars using exchange rates for the current period. In recent years, fluctuations in currency exchange rates that were unfavorable have had adverse effects on our reported results of operations.

As a result of such translations, fluctuations in currency exchange rates from period-to-period that are unfavorable to us may also result in our Consolidated Financial Statements reflecting significant adverse period-over-period changes in our financial performance or reflecting a period-over-period improvement in our financial performance that is not as robust as it would be without such fluctuations in the currency exchange rates. Such unfavorable currency exchange rate fluctuations will adversely affect the reported performance of our Walmart International operating segment and have a corresponding adverse effect on our reported consolidated results of operations.

We may pay for products we purchase for sale in our stores, clubs and eCommerce platforms around the world with a currency other than the local currency of the country in which the goods will be sold. When we must acquire the currency to pay for such products and the exchange rates for the payment currency fluctuate in a manner unfavorable to us, our cost of sales may increase and we may be unable or unwilling to change the prices at which we sell those goods to address that increase in our costs, with a corresponding adverse effect on our gross profit. Consequently, unfavorable fluctuations in currency exchange rates have adversely affected, and may continue to adversely affect, our results of operations.

Legal, Tax, Regulatory, Compliance, Reputational and Other Risks

Our international operations subject us to legislative, judicial, accounting, legal, regulatory, tax, political and economic risks and conditions specific to the countries or regions in which we operate, which could materially adversely affect our business or financial performance.

In addition to our U.S. operations, we operate retail and eCommerce businesses in Africa, Canada, Central America, Chile, China, India and Mexico.

During fiscal 2024, our Walmart International operations generated approximately 18% of our consolidated net sales. Walmart International's operations in various countries also source goods and services from other countries. Our future operating results in these countries could be negatively affected by a variety of factors, most of which are beyond our control. These factors include political conditions, including political instability, local and global economic conditions, legal and regulatory constraints, such as regulation of product and service offerings including regulatory restrictions (such as foreign ownership restrictions) on eCommerce and retail operations in international markets, such as India, restrictive governmental actions (such as trade protection measures or nationalization), antitrust and competition law regulatory matters (such as those underway in Canada, Mexico and India (relating to our Flipkart subsidiary)), local product safety and environmental laws, tax regulations, local labor laws, anti-money laundering laws and regulations, trade policies, foreign exchange or currency regulations, laws and regulations regarding consumer and data protection, and other matters in any of the countries or regions in which we operate, now or in the future.

Changing our operations in accordance with new or changed restrictions on international trade or newly imposed sanctions can be expensive, time-consuming and disruptive to our operations, and such restrictions can be announced with little or no advance notice and we may not be able to effectively mitigate all adverse impacts from such measures. In addition, tensions between nation-state governments and conflicts of laws may lead to challenges for our operations. If disputes and conflicts further escalate in the future, actions by governments in response could be significantly more severe and restrictive and could adversely affect our business or financial performance and our reputation. Political uncertainty surrounding trade and other international disputes could also have a negative effect on consumer confidence and spending, which could also adversely affect our business or financial performance and our reputation. The economies of some of the countries in which we have operations have in the past suffered from high rates of inflation and currency devaluations, which, if they recur, could adversely affect our financial performance. Other factors which may impact our international operations include foreign trade, monetary and fiscal policies of the U.S. and of other countries, laws, regulations and other activities of foreign governments, agencies and similar organizations, and risks associated with having numerous facilities located in countries that have historically been less stable than the U.S. Additional risks inherent in our international operations generally include, among others, the costs and difficulties of managing international operations, adverse tax consequences and greater difficulty in enforcing intellectual property rights in countries other than the U.S. The various risks inherent in doing business in the U.S. generally also exist when doing business outside of the U.S., and may be exaggerated by the difficulty of doing business in numerous sovereign jurisdictions due to differences in culture, geopolitical tensions or events, laws and regulations.

In foreign countries in which we have operations, a risk exists that our associates, contractors or agents could, in contravention of our policies, engage in business practices prohibited by U.S. laws and regulations applicable to us, such as the Foreign Corrupt Practices Act or U.S. sanctions laws and regulations or the laws and regulations of other countries. We maintain global policies which appropriately regulate such business practices and have in place global compliance programs designed to ensure compliance with these laws and regulations. Nevertheless, we remain subject to the risk that one or more of our associates, contractors or agents, including those based in or from countries where practices that violate such U.S. laws and regulations or the laws and regulations of other countries may be customary, will engage in business practices that are appropriately regulated by our policies, circumvent our compliance programs and, by doing so, violate such laws and regulations. Any such violations, even if prohibited by our internal policies, could subject us to fines and penalties and adversely affect our business or financial performance and our reputation.

Changes in tax and trade laws, regulations and interpretations could materially adversely affect our financial performance.

In fiscal 2024, our Walmart U.S. and Sam's Club operating segments generated approximately 82% of our consolidated net sales. Significant changes in tax and trade policies, including tariffs and government regulations affecting trade between the U.S. and other countries where we source many of the products we sell in our stores and clubs could have an adverse effect on our business and financial performance. A significant portion of the general merchandise we sell in our U.S. stores and clubs is manufactured in other countries. Any such actions including the imposition of further tariffs on imports could increase the cost to us of such merchandise (whether imported directly or indirectly) and cause increases in the prices at which we sell such merchandise to our customers, which could materially adversely affect the financial performance of our U.S. and international operations as well as our business.

We are subject to income taxes, other taxes and tax collection and reporting obligations in both the U.S. and the foreign jurisdictions in which we currently operate or have historically operated. The determination of our worldwide provision for income taxes and current and deferred tax assets and liabilities requires judgment and estimation. Our taxes could be materially adversely affected by earnings being lower than anticipated in jurisdictions that have lower statutory tax rates and higher than anticipated in jurisdictions that have higher statutory tax rates, by changes in the valuation of our deferred tax assets and liabilities, or by changes in worldwide tax laws, tax rates, regulations or accounting principles and the interpretations of those rules. In addition, we also may not have sufficient notice to enable us to build systems and adopt processes to properly comply with new reporting or collection obligations by the effective date of those obligations.

We are also exposed to future tax legislation, as well as the issuance of future regulations and changes in administrative interpretations of existing tax laws, and changes in transfer pricing arrangements with our subsidiaries, any of which can impact our or our subsidiaries current and future years' tax provision. The effect of such changes in tax law, changes in administrative interpretations of existing tax laws or changes in transfer pricing arrangements could also have a material effect on our business, financial position and results of operations. In the U.S., the Tax Cuts and Jobs Act of 2017 (the "Tax Act") significantly changed federal income tax laws that affect U.S. corporations. As further guidance is issued by the U.S. Treasury Department, the Internal Revenue Service, and other standard-setting bodies, any resulting changes in our estimates will be treated in accordance with the relevant accounting guidance. Compliance with the Tax Act and any other new tax rules, regulations, guidance and interpretations, including collecting information not regularly produced by us or unexpected changes in our estimates, may require us to incur additional costs and could affect our results of operations.

In addition, legislatures and taxing authorities in many jurisdictions in which we operate may enact changes to or seek to enforce novel interpretations of their tax rules. These changes could include modifications that have temporary effect and more permanent changes. For example, the Organization for Economic Cooperation and Development (the "OECD"), the European Union and other countries (including countries in which we operate) have committed to enacting substantial changes to numerous long-standing tax principles impacting how large multinational enterprises are taxed. In particular, the OECD's Pillar Two initiative introduces a 15% global minimum tax applied on a country-by-country basis, which became effective in many jurisdictions in which we operate starting January 1, 2024. The impact of these potential new rules as well as any other changes in domestic and international tax rules and regulations could have a material effect on our effective tax rate.

Furthermore, we are subject to regular review and audit by both domestic and foreign tax authorities as well as subject to the prospective and retrospective effects of changing tax regulations, legislation and interpretations. Although we believe our tax estimates are reasonable, the ultimate tax outcome may materially differ from the tax amounts recorded in our Consolidated Financial Statements and may materially affect our income tax provision, net income or cash flows in the period or periods for which such determination and settlement is made.

Changes in and/or failure to comply with other laws, regulations and interpretations of such laws and regulations specific to the businesses and jurisdictions in which we operate could materially adversely affect our reputation, market position or our business and financial performance.

We operate in complex regulated environments in the U.S. and in other countries in which we operate and could be materially adversely affected by changes to existing legal requirements including the related interpretations and enforcement practices, new legal requirements and/or any failure to comply with applicable regulations. In addition, the degree of regulatory, political, and media scrutiny we face increases the likelihood that our efforts to adhere our practices and procedures to comply with these laws and legal requirements may be subject to frequent or increasing challenges.

Our health and wellness operations in the U.S. and the operations of the Walmart Health locations are subject to numerous federal, state and local laws and regulations including, but not limited to, those related to: licensing, reimbursement arrangements and other requirements and restrictions; registration and regulation of pharmacies; dispensing and sale of controlled substances and products containing pseudoephedrine; governmental (including Medicare and Medicaid) and commercial reimbursement; data privacy and security and the sharing and interoperability of data, including obligations and restrictions related to health information (such as those imposed under HIPAA); billing and coding for healthcare services and properly handling overpayments; debt collection; necessity and adequacy of healthcare services; relationships with referral sources and referral recipients and other fraud and abuse issues, such as those addressed by anti-kickback and false claims laws and patient inducement regulations; qualification of healthcare practitioners; quality and standards of medical services and equipment; and the practice of the professions of pharmacy, medical, dental and behavioral healthcare services, including limitations on the corporate practice of medicine in certain states.

Health-related legislation at the federal and state level may have an adverse effect on our business or require us to modify certain aspects of our operations. For example, in the U.S., the Drug Enforcement Administration ("DEA") and various other regulatory authorities regulate the purchase, distribution, maintenance and dispensing of pharmaceuticals and controlled substances. We are required to hold valid DEA and state-level licenses, meet various security and operating standards and comply with the federal and various state-controlled substance acts and related regulations governing the sale, dispensing, disposal and holding of controlled substances. The DEA, the U.S. Food and Drug Administration and state regulatory authorities have broad enforcement powers, including the ability to seize or recall products and impose significant criminal, civil and administrative sanctions for violations of these laws and regulations. In addition, there has been recent heightened governmental and public scrutiny of pharmaceutical product pricing, which has resulted in federal and state legislation and regulations, executive orders and other initiatives and proposals designed to increase transparency in pharmaceutical product pricing and reform government program reimbursement methodologies (for example, the Inflation Reduction Act, which includes, among other matters, policies designed to impact drug prices and reduce drug spending by the federal government). Other health reform efforts at the federal and state levels may also impact our business or require us to modify certain aspects of our operations. We may not be able to predict the nature or success of reform initiatives, and the resulting uncertainties may have an adverse effect on our business.

We are also governed by foreign, national and state laws and regulations of general applicability, including laws and regulations related to competition and antitrust matters; protection of the environment and health and safety matters, including exposure to, and the management and disposal of, hazardous substances; food and drug safety, including drug supply chain security requirements; trade, consumer protection, and safety, including the availability, sale, price label accuracy, advertisement and promotion of products we sell and the financial services we offer (including through our digital channels, stores and clubs, as well as our ONE fintech venture); anti-money laundering prohibitions; consumer financial protection laws; economic, trade and other sanctions matters; licensure, certification and enrollment with government programs; data privacy and cybersecurity and the sharing and interoperability of data; working conditions, workplace health and safety, equal employment opportunity, worker classification, employee benefit and other labor and employment matters; and health and wellness related regulations for our pharmacy operations outside of the U.S. In addition, certain financial services we offer or make available are subject to U.S. and international legal and regulatory requirements, including those intended to help detect and prevent money laundering, fraud and other illicit activity, as well as consumer financial protections and sanctions laws. Failure to meet these requirements could affect the profitability of our business activities; limit our ability to pursue business opportunities or conduct business in certain jurisdictions; require changes to business practices or governance or alter our relationships with our customers, partners and other third parties, including our ability to continue certain relationships in Mexico, India or other international jurisdictions; result in increased costs related to regulatory oversight and compliance, litigation-related settlements, judgments or expenses, restitution to customers or the imposition of fines or monetary penalties. Increased U.S. regulation of non-bank financial institutions may also result in additional requirements and scrutiny of certain financial services we offer.

Increasing governmental and societal attention to ESG matters, including expanding mandatory and voluntary reporting diligence, and disclosure topics such as climate change, sustainability (including with respect to our supply chain), natural resources, waste reduction, energy, human capital and risk oversight could expand the nature, scope and complexity of matters that we are required to control, assess and report.

Data privacy and protection laws or customer expectations relating to the collection, use, retention, disclosure, transfer and processing of personal information continue to undergo a rapid transformation in the U.S. and in non-U.S. jurisdictions. Recently enacted state laws, such as the California Consumer Privacy Act ("CCPA"), in a number of states that have become effective, or will soon be effective, have created a substantially more complex regulatory regime associated with data-handling practices. Moreover, other laws and regulations related to data-handling and privacy that apply to our business, such as the Illinois Biometric Information Privacy Act, the European Union's General Data Protection Regulation ("GDPR"), the United Kingdom's General Data Protection Regulation (which implements the GDPR into U.K. law), China's Personal Information Protection Act ("PIPL"), and similar legislation in Quebec Canada further increases the compliance obligations of our business. Certain of these laws have required us to modify our data processing practices and policies and to incur substantial costs and expenses to comply, which we anticipate will continue in the future. These and other privacy and cybersecurity laws may carry significant potential damages and civil penalties for noncompliance. For example, in the case of non-compliance with a material provision of the GDPR (such as non-adherence to the core principles of processing personal data), regulators have the authority to levy a fine in an amount that is up to the greater of €20 million or 4% of global annual turnover (i.e., revenue) in the prior year. These administrative fines are discretionary and based, in each case, on a multi-factored approach. Further, PIPL took effect in China in November 2021. PIPL raises the protection requirements for processing personal information and requires government approval to either allow the access of personal information in China by someone outside of China or conduct personal data transfers outside of China. Fines for PIPL violations range from approximately RMB 50 million to up to 5% of the infringing company's previous year's revenues generated from within China. We have made changes, and we may in the future make additional adjustments to our business practices, to comply with the personal information protection laws and regulations in China as they evolve. Residents in jurisdictions with comprehensive privacy laws have rights to access, correct and require deletion of their personal information, opt out of certain personal information sharing and receive detailed information about how their personal information is used and may have a private right of action for data breaches. Furthermore, our marketing and customer engagement activities are subject to communications privacy laws such as the Telephone Consumer Protection Act. We may be subjected to penalties and other consequences for noncompliance, including changing some portions of our business. Even an unsuccessful challenge by customer or regulatory authorities of our activities could result in adverse publicity, impact our reputation and could require a costly response from and defense by us.

The impact of new laws, regulations and policies and the related interpretations, as well as changes in enforcement practices or regulatory scrutiny as to existing laws and regulations (including, but not limited to, in the U.S., shifting enforcement priorities for existing antitrust, competition and pricing laws, as well as proposed new rules and regulations) generally cannot be predicted, and changes in applicable laws, regulations and policies and the related interpretations and enforcement practices of existing laws and regulations may require extensive system and operational changes, be difficult to implement, increase our operating costs, require significant capital expenditures, or adversely impact the cost or attractiveness of the products or services we offer, or result in adverse publicity and harm our reputation. If we fail to predict or respond adequately to changes, including by implementing strategic and operational initiatives, or do not respond as effectively as our competitors, our business, operations and financial performance may be adversely affected.

In addition, we may face audits or investigations by one or more government agencies relating to our compliance with applicable laws and regulations. The regulatory, political and media scrutiny we face, which may continue, amplifies these risks. To the extent a regulator or court disagrees with our interpretation of these laws and determines that our practices are not in compliance with applicable laws and regulations, we could be subject to civil and criminal penalties that could adversely affect the continued operation of our businesses, including: suspension of payments from government programs; loss of required licenses and certifications; loss of authorizations to participate in or exclusion from government programs, including the Medicare and Medicaid programs in the U.S.; termination from contractual relationships, including those with our drug suppliers and third-party payers; and significant fines or monetary damages. Failure to comply with applicable legal or regulatory requirements in the U.S. or in any of the countries in which we operate could result in significant legal and financial exposure, damage to our reputation and have a material adverse effect on our business operations, financial position and results of operations.

We are subject to risks related to litigation and other legal proceedings that may materially adversely affect our results of operations, financial position and liquidity.

We operate in a highly regulated and litigious environment. We are involved in legal proceedings, including litigation, arbitration and other claims, and investigations, inspections, audits, claims, inquiries and similar actions by pharmacy, healthcare, tax, environmental and other governmental authorities. We may also have indemnification obligations for legal commitments of certain businesses we have divested. Legal proceedings, in general, and securities, derivative action and class action and multi-district litigation, in particular, can be expensive and disruptive. Some of these suits may purport or may be determined to be class actions and/or involve parties seeking large and/or indeterminate amounts, including punitive or exemplary damages, and may remain unresolved for several years. For example, we are currently a defendant in a number of cases containing class or collective-action allegations, or both, in which the plaintiffs have brought claims under federal and state wage and hour laws, as well as a number of cases containing class-action allegations in which the plaintiffs have brought claims under federal and state consumer laws.

We have been responding to subpoenas, information requests and investigations from governmental entities related to nationwide controlled substance dispensing and distribution practices involving opioids. We are also a defendant in numerous litigation proceedings related to opioids, including the consolidated multidistrict litigation entitled In re National Prescription Opiate Litigation (MDL No. 2804) currently pending in the U.S. District Court for the Northern District of Ohio and a lawsuit filed against us by the United States Department of Justice in the District of Delaware in 2020. Similar cases that name us also have been filed in state courts by state, local and tribal governments, healthcare providers and other plaintiffs. Plaintiffs in these cases are seeking compensatory and punitive damages, as well as injunctive relief including abatement. We have entered into a settlement framework to resolve certain of these matters and accrued a liability for approximately $3.3 billion, almost all of which was paid in fiscal 2024. We cannot predict the ultimate number of opioids-related claims that may be filed or their outcomes and cannot reasonably estimate any loss or range of loss that may arise from opioids-related matters.

In addition, in July 2021, the Directorate of Enforcement in India issued a show cause notice to Flipkart and other parties requesting the recipients show cause as to why further proceedings under India's Foreign Direct Investment rules and regulations should not be initiated against them based on alleged violations that related to a period prior to our acquisition of a majority stake in Flipkart in 2018. Also, in October 2023, the main Mexican operating subsidiary of Wal-Mart de México was notified of the initiation of a quasi-judicial administrative process against it for alleged relative monopolistic practices in connection with the supply and wholesale distribution of certain consumer goods, retail marketing practices of such consumer goods and related services. Because this process is at an early stage, we cannot provide any assurance as to the scope and outcome of this matter, and cannot reasonably estimate any loss or range of loss that may arise from this matter.

We can provide no assurance as to the scope or outcome of any proceeding that might result from the notice, the amount of proceeds we may receive in indemnification, and can provide no assurance as to whether there will be a material adverse effect to our business or Consolidated Financial Statements. We are also a defendant in litigation with the Federal Trade Commission regarding our money transfer agent services and is also cooperating with and responding to subpoenas issued by the U.S. Attorney's Office for the Middle District of Pennsylvania on behalf of the U.S. Department of Justice regarding our consumer fraud prevention program and anti-money laundering compliance related to our money transfer services, where we are an agent. We are unable to predict the outcome of the litigation or investigations or any other related actions by governmental entities regarding these matters and can provide no assurance as to the scope and outcome of these matters and whether our business, financial position, results of operations or cash flows will not be materially adversely affected. We discuss in more detail these cases and other litigation to which we are party below under the caption "Item 3. Legal Proceedings" and in Note 10 in the "Notes to our Consolidated Financial Statements," which are part of this Annual Report on Form 10-K.

Our amended and restated bylaws designate the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our shareholders, which could increase the costs for our shareholders to bring claims, discourage our shareholders from bringing claims, or limit our shareholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, associates or shareholders in such capacity.

Our bylaws provide that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will, to the fullest extent permitted by law, be the sole and exclusive forum for claims, including derivative claims that are based upon a violation of a duty by a current or former director, officer, associate or shareholder in such capacity or as to which the Delaware General Corporation Law confers jurisdiction upon the Court of Chancery. The exclusive forum provision may increase the costs for a shareholder to bring a claim or limit a shareholder's ability to bring a claim in a judicial forum that the shareholder finds favorable for disputes with us or our directors, officers, associates or shareholders in such capacity, which may discourage such lawsuits against us and such persons. Alternatively, if a court were to find these provisions of our bylaws inapplicable to, or unenforceable in respect of, the claims as to which they are intended to apply, then we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business, financial position or results of operations. While the exclusive forum provision applies to state and federal law claims, our shareholders will not be deemed to have waived our compliance with, and the exclusive forum provision will not preclude or contract the scope of exclusive federal or concurrent jurisdiction for actions brought under, the federal securities laws, including the Exchange Act, as amended, or the Securities Act of 1933, as amended, and the rules and regulations promulgated thereunder.

Our reputation may be adversely affected if we are not able to satisfy varied stakeholder expectations with respect to our ESG goals.

We strive to deliver shared value through our business and our diverse stakeholders expect us to make significant progress in certain ESG priority issue areas. Stakeholder expectations regarding ESG matters continue to evolve and are not uniform. We have established, and may continue to establish, various goals and initiatives on these matters, including with respect to climate change initiatives. We cannot guarantee that we will achieve these goals and initiatives. Any failure, or perceived failure, by us to achieve these goals and initiatives or to otherwise meet evolving and varied stakeholder expectations could adversely affect our reputation. We periodically publish information about our ESG priorities, strategies and progress on our corporate website and update our ESG reporting from time to time. Achievement of these aspirations and goals is subject to risks and uncertainties, many of which are outside of our control, and it is possible that we may fail, or be perceived to have failed, in the achievement of our ESG goals or that certain of our customers, associates, shareholders, investors, suppliers, business partners, government agencies and non-governmental organizations might not be satisfied with our goals or our efforts toward achieving those goals. Certain challenges we face in the achievement of our ESG objectives are also captured within our ESG reporting, which is not incorporated by reference into and does not form any part of this Annual Report on Form 10-K. A failure or perceived failure to meet our goals could adversely affect public perception of our business, associate morale or customer or shareholder support.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

Walmart seeks to build and maintain the trust of customers, associates, shareholders and other stakeholders with respect to our use of technology and data. Our digital trust commitments, in line with our Company's values of service, excellence, integrity and respect for the individual, provide a foundation for our approach to cybersecurity.

The Board of Directors, committees of the Board of Directors and management coordinate risk oversight and management responsibilities, and cybersecurity represents an important component of our overall approach to enterprise risk management. In general, we seek to address cybersecurity risks through a cross-functional approach focused on protecting business operations and preserving the confidentiality, integrity and availability of information by identifying, preventing and mitigating cybersecurity threats and effectively responding to cybersecurity incidents when they occur.

Board of Directors' oversight of risks from cybersecurity threats

Our Board of Directors, which has primary responsibility for overseeing risk management, has delegated risk management oversight responsibility for information systems, information security, data privacy and cybersecurity to the Audit Committee. Several of our Board members, including certain members of our Audit Committee, have backgrounds or professional experience in risk management, digital platforms, information technology or cybersecurity.

The Audit Committee receives periodic updates from our Chief Information Security Officer ("CISO"), Chief Technology Officer ("CTO") and other members of management on risks related to information systems, information security, data privacy and cybersecurity. Specific topics may include updates to our company's approach to cybersecurity risk management; recent developments; key initiatives; the threat landscape; trends; and the results of certain assessments and testing. The Board of Directors receives regular reports from the Audit Committee chair on these and other risk-related matters as deemed necessary. Our CISO or other members of management provide information to the Audit Committee pursuant to risk-based escalation protocols for cybersecurity incidents that exceed established reporting thresholds.

Management's role in assessing and managing material risks from cybersecurity threats

Our CISO leads Walmart's Information Security organization and has responsibility for overseeing our Company's cybersecurity program. To operationalize our program, we deploy multidisciplinary teams, including cybersecurity personnel and professionals, to address cybersecurity threats and respond to cybersecurity incidents, including for those non-wholly owned subsidiaries whose systems have not been fully integrated into Walmart's networks. Through ongoing engagement with these teams and certain third-party service providers, our CISO monitors the prevention, detection, mitigation and remediation of cybersecurity threats and incidents and reports cybersecurity incidents that reach established thresholds to senior management and the Audit Committee, which are also analyzed for external reporting requirements.

Our CISO has been a Walmart associate for over 30 years, has served in various roles in information technology and information security at Walmart for almost 20 years, and has received industry-recognized information security certifications. Our CTO, to whom the CISO reports, has served as Walmart's CTO since 2019 and prior to that had experience managing technology and other risks at several other large public companies.

Risk Management and Strategy

Our cybersecurity program is informed by various industry frameworks including the National Institute of Standards and Technology Cybersecurity Framework for Improving Critical Infrastructure Cybersecurity (NIST-CSF Version 1.1), which are reflected in our related policies, standards, processes and practices. We may implement changes to our cybersecurity program when deemed necessary based on updates to industry standards among other things. We have multiple layers of security designed to detect and block cybersecurity events, as well as dedicated teams of cybersecurity personnel and professionals, which assist our CISO in helping to assess, identify, monitor, detect and manage cybersecurity risks, threats, vulnerabilities and incidents. We collaborate with public and private entities and industry groups and engage third-party service providers to expand the capabilities and capacity of our cybersecurity program when deemed necessary. Certain key components of our cybersecurity program include the following:

Protecting our technology and information systems: When we implement significant changes to our technologies or information systems, we conduct risk-based security and privacy impact assessments and deploy technical safeguards that are designed to reasonably protect our technology and information systems from cybersecurity threats. We actively monitor and proactively research potential cybersecurity threats to our technologies and information systems. We use what we learn to evolve our security controls over time to mitigate risks posed by such threats.

Incident response and recovery planning: We maintain incident response and recovery plans that address our response to cybersecurity incidents, including incidents that we become aware of at third parties that support our operations. These plans guide how we evaluate and assign incident severity levels and reporting thresholds; escalate and engage incident response teams; and manage and mitigate the related risks.

Third-party risk management: We maintain a risk-based approach to identifying and managing cybersecurity threats presented to Walmart by third-party systems that support our operations, as well as third-party users of our data and systems, including vendors, service providers and subcontractors.

Training and awareness: We provide recurring information security training (which includes cybersecurity training) to our associates and certain third parties based on access, risk, roles, policies, standards and behaviors.

Assessments and testing: We engage in periodic assessment and testing of our policies, standards, processes and practices that are designed to address cybersecurity threats. These efforts include tabletop exercises, threat modeling, vulnerability testing and other exercises focused on evaluating the effectiveness of our cybersecurity measures and planning. We regularly engage third parties to assist with our assessments and testing. Where appropriate we adjust our cybersecurity policies, standards, processes and practices accordingly based on internal and external assessment and testing results.

Certain of Walmart's systems and those of our third-party service providers have experienced cybersecurity incidents and threats. Based on the information available as of the date of this Annual Report on Form 10-K, we are not aware of any risks from cybersecurity threats, including as a result of any cybersecurity incidents, which have materially affected us or are reasonably likely to materially affect us, including our business strategy, results of operations, or financial condition. Despite our security measures, however, there can be no assurance that we, or the third parties with which we interact, will not experience a cybersecurity incident in the future that will materially affect us. Additional information about cybersecurity risks we face is discussed in "Item 1A. Risk Factors," which should be read in conjunction with the information above.

ITEM 2. PROPERTIES

As of January 31, 2024[1], retail unit counts for Walmart U.S., Sam's Club and International are summarized as follows:

	Total	Square feet[2]
Walmart U.S.		
Supercenters	3,560	632,771
Discount Stores	360	37,816
Neighborhood Markets and other small formats	695	28,414
Walmart U.S. Total	4,615	699,001
Sam's Club	599	80,199
Domestic Total	5,214	779,200
International		
Retail	5,075	236,180
Wholesale	327	37,685
International Total	5,402	273,865
Total Company	10,616	1,053,065

(1) Walmart International unit counts, with the exception of Canada, are as of December 31, 2023, to correspond with the balance sheet date of the related geographic market. Canada unit counts are as of January 31, 2024.
(2) Square feet reported in thousands.

Owned and Leased Properties

The following table provides further details of our retail units and distribution facilities, including return facilities and dedicated eCommerce fulfillment centers, as of January 31, 2024[1]:

	Owned	Leased[2]	Total
Retail Units			
Walmart U.S. retail units	4,041	574	4,615
Sam's Club retail units	512	87	599
International retail units	1,469	3,933	5,402
Total retail units	6,022	4,594	10,616
Distribution Facilities			
Walmart U.S. distribution facilities	112	50	162
Sam's Club distribution facilities	10	20	30
International distribution facilities	22	154	176
Total distribution facilities	144	224	368

(1) Walmart International properties, with the exception of Canada, are as of December 31, 2023, to correspond with the balance sheet date of the related geographic market. Canada unit counts are as of January 31, 2024.
(2) Also includes U.S. and international distribution facilities which are third-party owned and operated.

We own office facilities in Bentonville, Arkansas, that serve as our principal office and own and lease office facilities throughout the U.S. and internationally for operations as well as for field and market management. The land on which our stores are located is either owned or leased by the Company. We use independent contractors to construct our buildings. All store leases provide for annual rentals, some of which escalate during the original lease or provide for additional rent based on sales volume. Substantially all of the Company's store and club leases have renewal options, some of which include rent escalation clauses. For further information on our distribution centers, see the caption "Distribution" provided for each of our segments under "Item 1. Business."

ITEM 3. LEGAL PROCEEDINGS

I. SUPPLEMENTAL INFORMATION: The Company is involved in legal proceedings arising in the normal course of its business, including litigation, arbitration and other claims, and investigations, inspections, subpoenas, audits, claims, inquiries and similar actions by governmental authorities. We discuss certain legal proceedings in Note 10 to our Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data," which is captioned "Contingencies," under the sub-caption "Legal Proceedings." We refer you to that discussion for important information concerning those legal proceedings, including the basis for such actions and, where known, the relief sought. We provide the following additional information concerning those legal proceedings, including the name of the lawsuit, the court in which the lawsuit is pending, and the date on which the petition commencing the lawsuit was filed.

Prescription Opiate Litigation: *In re National Prescription Opiate Litigation* (MDL No. 2804) (the "MDL"). The MDL is pending in the U.S. District Court for the Northern District of Ohio and includes over 340 cases as of March 4, 2024. The liability phase of a single, two-county trial in one of the MDL cases against a number of parties, including the Company, regarding opioid dispensing claims resulted in a jury verdict on November 23, 2021, finding in favor of the plaintiffs as to the liability of all defendants, including the Company. The abatement phase of the single, two-county trial resulted in a judgment on August 17, 2022, that ordered all three defendants, including the Company, to pay an aggregate amount of approximately $0.7 billion over fifteen years, on a joint and several liability basis, and granted the plaintiffs injunctive relief. The Company has filed an appeal with the Sixth Circuit Court of Appeals. The monetary aspect of the judgment is stayed pending appeal, and the injunctive portion of the judgment went into effect on February 20, 2023. On September 11, 2023, the Sixth Circuit Court of Appeals issued an order certifying certain questions in the appeal for review by the Supreme Court of Ohio. On November 29, 2023, the Supreme Court of Ohio accepted the request for certification, and the matter remains pending with that court. On October 25, 2023, the MDL designated four cases brought by third-party payers as bellwether cases to proceed through discovery. Additional bellwethers of cases brought by hospitals and other healthcare providers may be designated in the future. In addition, there are over 50 other cases pending in state and federal courts throughout the country against the Company as of March 4, 2024, as well as other cases in Canada against Wal-Mart Canada Corp. and certain other subsidiaries of the Company. The case citations and currently scheduled trial dates, where applicable, are listed on Exhibit 99.1 to this Annual Report on Form 10-K.

Opioid Settlement Framework: On November 15, 2022, the Company announced that it had agreed to a Settlement Framework to resolve substantially all opioids-related lawsuits filed against the Company by states, political subdivisions, and Native American tribes (other than the single, two-county trial on appeal to the Sixth Circuit Court of Appeals as described above), as described in more detail in Note 10 to the Consolidated Financial Statements. The Company now has settlement agreements with all 50 states, including four states that previously settled with the Company, as well as the District of Columbia, Puerto Rico and three other U.S. territories, that are intended to resolve substantially all opioids-related lawsuits brought by state and local governments against the Company. As described in more detail in Note 10 to the Consolidated Financial Statements, the Settlement Framework became effective on September 6, 2023, and as of January 31, 2024 substantially all of the original approximately $3.3 billion accrued liability for the Settlement Framework and other settlements have been paid.

DOJ Opioid Civil Litigation: A civil complaint pending in the U.S. District Court for the District of Delaware has been filed by the U.S. Department of Justice (the "DOJ") against the Company, in which the DOJ alleges violations of the Controlled Substances Act related to nationwide distribution and dispensing of opioids. U.S. v. Walmart Inc., et al., USDC, Dist. of DE, 12/22/20. The Company filed a motion to dismiss the DOJ complaint on February 22, 2021. After the parties had fully briefed the Company's motion to dismiss, the DOJ filed an amended complaint on October 7, 2022. On November 7, 2022, the Company filed a partial motion to dismiss the amended complaint. The Court held a hearing on the partial motion to dismiss on January 18, 2024, and ordered the DOJ to file an amended complaint. The DOJ filed that amended complaint on February 1, 2024, and Walmart filed a partial motion to dismiss that complaint on February 6, 2024. On March 11, 2024, the Court granted in-part Walmart's motion by dismissing the entirety of the DOJ's claims related to distribution and dismissing the DOJ's claims arising under one of the DOJ's two dispensing liability theories. The DOJ's claims arising under its other dispensing liability theory remain pending.

Opioids Related Securities Class Actions and Derivative Litigation: Three derivative complaints and two securities class actions drawing heavily on the allegations of the DOJ complaint have been filed in Delaware naming the Company and various current and former directors and certain current and former officers as defendants. The plaintiffs in the derivative suits (in which the Company is a nominal defendant) allege, among other things, that the defendants breached their fiduciary duties in connection with oversight of opioids dispensing and distribution and that the defendants violated Section 14(a) of the Exchange Act, and are liable for contribution under Section 10(b) of the Exchange Act in connection with the Company's disclosures about opioids. Two of the derivative suits have been filed in the U.S. District Court in Delaware and those suits have been stayed pending further developments in other opioids litigation matters. The other derivative suit has been filed in the Delaware Court of Chancery. The defendants in the derivative suit pending in the Delaware Court of Chancery moved to dismiss and/or to stay that case on December 21, 2021; the plaintiffs responded by filing an amended complaint on February 22, 2022. On April 20, 2022, the defendants moved to dismiss and/or stay proceedings on the amended complaint. In two orders issued on April 12 and 26, 2023, the Court of Chancery granted the defendants' motion to dismiss with respect to claims involving the Company's distribution practices and denied the remainder of the motion, including the Company's request to stay the litigation. On May 5, 2023, the Company's Board of Directors appointed an independent Special Litigation Committee (the "SLC") to investigate the allegations regarding certain current and former officers and directors named in the various proceedings regarding oversight with respect to opioids. The Board has authorized the SLC to retain independent legal counsel and such other advisors as the SLC deems appropriate in carrying out its duties. The derivative matter pending in the Delaware Court of Chancery is stayed until the SLC completes its investigation.

The securities class actions, alleging violations of Sections 10(b) and 20(a) of the Exchange Act regarding the Company's disclosures with respect to opioids, purport to be filed on behalf of a class of investors who acquired Walmart stock from March 30, 2016, through December 22, 2020. On May 11, 2021, the U.S. District Court in Delaware consolidated the class actions and appointed a lead plaintiff and lead counsel. The defendants moved to dismiss the consolidated securities class action on October 8, 2021. On October 14, 2022, plaintiffs filed an amended complaint, which revised the applicable putative class of investors to those who acquired Walmart stock from March 31, 2017, through December 22, 2020. On November 16, 2022, the Company moved to dismiss the amended complaint. That motion remains pending.

Derivative Lawsuits: *Abt v. Alvarez et al.*, USDC, Dist. of DE, 2/9/21; *Nguyen v. McMillon et al.,* USDC, Dist. of DE, 4/16/21: *Ontario Provincial Council of Carpenters' Pension Trust Fund et al. v. Walton et al.,* DE Court of Chancery, 9/27/21.

Securities Class Actions: *Stanton v. Walmart Inc. et al.*, USDC, Dist. of DE, 1/20/21 and *Martin v. Walmart Inc. et al.,* USDC, Dist. of DE, 3/5/21, consolidated into *In re Walmart Inc. Securities Litigation*, USDC, Dist. of DE, 5/11/21.

ASDA Equal Value Claims: Ms S Brierley & Others v. ASDA Stores Ltd (2406372/2008 & Others – Manchester Employment Tribunal); Abbas & Others v Asda Stores limited (KB-2022-003243); and Abusubih & Others v Asda Stores limited (KB-2022-003240).

Money Transfer Agent Services Litigation: Federal Trade Commission v. Walmart Inc. (CV-3372), USDC, N. Dist. Of Ill, 6/28/22.

Mexico Antitrust Matter: Comisión Federal de Competencia Económica of México, Investigative Authority v. Nueva Wal-Mart de México, S.de R.L. de C.V. (Docket IO-002-2020, consolidated with Docket DE-026-2020), Mexico, 10/6/23.

II. CERTAIN OTHER MATTERS:

Foreign Direct Investment Matters: In July 2021, the Directorate of Enforcement in India issued a show cause notice to Flipkart Private Limited and one of its subsidiaries ("Flipkart"), and to unrelated companies and individuals, including certain current and former shareholders and directors of Flipkart. The notice requests the recipients to show cause as to why further proceedings under India's Foreign Direct Investment rules and regulations (the "Rules") should not be initiated against them based on alleged violations during the period from 2009 to 2015, prior to the Company's acquisition of a majority stake in Flipkart in 2018. The notice is an initial stage of proceedings under the Rules which could, depending upon the conclusions at the end of the initial stage, lead to a hearing to consider the merits of the allegations described in the notice. If a hearing is initiated and if it is determined that violations of the Rules occurred, the regulatory authority has the authority to impose monetary and/or non-monetary relief. Flipkart has begun the process of responding to the notice and, if the matter progresses to a consideration of the merits of the allegations described in the notice is initiated, Flipkart intends to defend against the allegations vigorously. Due to the fact that this process is in an early stage, the Company is unable to predict whether the notice will lead to a hearing on the merits or, if it does, the final outcome of the resulting proceedings. While the Company does not currently believe that this matter will have a material adverse effect on its business, financial condition, results of operations or cash flows, the Company can provide no assurance as to the scope or outcome of any proceeding that might result from the notice, the amount of the proceeds the Company may receive in indemnification from individuals and entities that sold shares to the Company under the 2018 agreement pursuant to which the Company acquired its majority stake in Flipkart, and can provide no assurance as to whether there will be a material adverse effect to its business or its Consolidated Financial Statements.

III. ENVIRONMENTAL MATTERS: Item 103 of SEC Regulation S-K requires disclosure of certain environmental matters when a governmental authority is a party to the proceedings and such proceedings involve potential monetary sanctions that the Company reasonably believes will exceed an applied threshold not to exceed $1 million.

In December 2021, the Office of the Attorney General of the State of California filed suit against the Company, bringing enforcement claims regarding Walmart's management of waste consumer products at its California facilities that are alleged to be hazardous. The suit was filed in Superior Court of Alameda County, California, Case No. 21CV004367, People v. Walmart Inc. Trial is currently set for September 30, 2024. The Company believes it has strong defenses and is vigorously defending this litigation matter. While the Company cannot predict the ultimate outcome of this matter, the potential for penalties or settlement costs could exceed $1 million. Although the Company does not believe that this matter will have a material adverse effect on its business, financial position, results of operations or cash flows, the Company can provide no assurance as to the scope and outcome of this matter and no assurance as to whether there will be a material adverse effect to its business or its Consolidated Financial Statements.

In October 2023, the Company received a Finding of Violation from the U.S. Environmental Protection Agency (the "EPA") alleging violations of the Clean Air Act in connection with the Company's refrigeration leak detection and repair program at certain of its facilities. The Company is evaluating the findings and cooperating with the EPA in its investigation. The EPA may seek to impose monetary and non-monetary penalties for the alleged violations of the Clean Air Act. Due to the fact that this process is in an early stage, the Company is unable to predict the final outcome of this matter. Although the Company does not believe this matter will have a material adverse effect on its business, financial position, results of operations or cash flows, the Company can provide no assurance as to the scope or outcome of this matter and no assurance as to whether there will be a material adverse effect to its business or its Consolidated Financial Statements.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market for Common Stock

The principal market on which Walmart's common stock is listed for trading is the New York Stock Exchange. The common stock trades under the symbol "WMT."

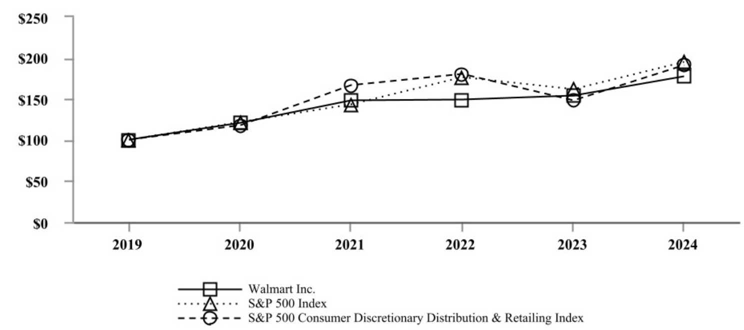
Holders of Record of Common Stock

As of March 13, 2024, there were 200,344 holders of record of Walmart's common stock, although there is a much larger number of beneficial owners.

Stock Performance Chart

This graph compares the cumulative total shareholder return on Walmart's common stock during the five fiscal years ended through fiscal 2024 to the cumulative total returns on the S&P 500 Consumer Discretionary Distribution & Retailing Index (formerly named the S&P 500 Retailing Index) and the S&P 500 Index. The comparison assumes $100 was invested on February 1, 2019 in shares of our common stock and in each of the indices shown and assumes that all of the dividends were reinvested.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*
Among Walmart Inc., the S&P 500 Index
and S&P 500 Consumer Discretionary Distribution & Retailing Index
(Fiscal Years Ended January 31)



*Assumes $100 Invested on February 1, 2019
Assumes Dividends Reinvested
Fiscal Year ended January 31, 2024

	Fiscal Years Ended January 31,					
	2019	2020	2021	2022	2023	2024
Walmart Inc.	$ 100.00	$ 120.27	$ 148.41	$ 148.47	$ 153.58	$ 177.30
S&P 500 Index	100.00	121.68	142.67	175.90	161.45	195.06
S&P 500 Consumer Discretionary Distribution & Retailing Index	100.00	117.54	166.19	180.56	147.66	190.67

Issuer Repurchases of Equity Securities

From time to time, the Company repurchases shares of our common stock under share repurchase programs authorized by the Company's Board of Directors. All repurchases made during fiscal 2024 were made under the current $20.0 billion share repurchase program approved in November 2022, which has no expiration date or other restrictions limiting the period over which the Company can make repurchases. As of January 31, 2024, authorization for $16.5 billion of share repurchases remained under the share repurchase program. Any repurchased shares are constructively retired and returned to an unissued status.

Share repurchase activity under our share repurchase programs, on a trade date basis, for each month in the quarter ended January 31, 2024, was as follows:

Fiscal Period	Total Number of Shares Repurchased[1]	Average Price Paid per Share (in dollars)[1]	Total Number of Shares Repurchased as Part of Publicly Announced Plans or Programs[1]	Approximate Dollar Value of Shares that May Yet Be Repurchased Under the Plans or Programs[2] (in billions)
November 1-30, 2023	5,340,951	$ 51.99	5,340,951	$ 17.8
December 1-31, 2023	13,913,403	51.41	13,913,403	17.1
January 1-31, 2024	10,211,025	53.62	10,211,025	16.5
Total	29,465,379		29,465,379	

[1] Share and per share information in this table has been adjusted to reflect the 3-for-1 common stock split effected on February 23, 2024. Refer to Note 1.
[2] Represents the approximate dollar value of shares that could have been repurchased under the current plan at the end of the month.

ITEM 6. RESERVED

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

This discussion, which presents our results for the fiscal years ended January 31, 2024 ("fiscal 2024"), January 31, 2023 ("fiscal 2023") and January 31, 2022 ("fiscal 2022"), should be read in conjunction with our Consolidated Financial Statements and the accompanying notes. We intend for this discussion to provide the reader with information that will assist in understanding our financial statements, the changes in certain key items in those financial statements from period to period and the primary factors that accounted for those changes. We also discuss certain performance metrics that management uses to assess the Company's performance. Additionally, the discussion provides information about the financial results of each of the three segments to provide a better understanding of how each of those segments and its results of operations affect the financial position and results of operations of the Company as a whole.

Throughout this Item 7, we discuss segment operating income, comparable store and club sales and other measures. Management measures the results of the Company's segments using each segment's operating income, including certain corporate overhead allocations, as well as other measures. From time to time, we revise the measurement of each segment's operating income and other measures as determined by the information regularly reviewed by our chief operating decision maker.

Management also measures the results of comparable store and club sales, or comparable sales, a metric that indicates the performance of our existing stores and clubs by measuring the change in sales for such stores and clubs, for a particular period from the corresponding period in the previous year. Walmart's definition of comparable sales includes sales from stores and clubs open for the previous 12 months, including remodels, relocations, expansions and conversions, as well as eCommerce sales. We measure the eCommerce sales impact by including all sales initiated digitally, including omni-channel transactions which are fulfilled through our stores and clubs as well as certain other business offerings that are part of our ecosystem, such as our Walmart Connect advertising business. Sales at a store that has changed in format are excluded from comparable sales when the conversion of that store is accompanied by a relocation or expansion that results in a change in the store's retail square feet of more than five percent. Sales related to divested businesses are excluded from comparable sales, and sales related to acquisitions are excluded until such acquisitions have been owned for 12 months. Comparable sales are also referred to as "same-store" sales by others within the retail industry. The method of calculating comparable sales varies across the retail industry. As a result, our calculation of comparable sales is not necessarily comparable to similarly titled measures reported by other companies.

In discussing our operating results, the term currency exchange rates refers to the currency exchange rates we use to convert the operating results for countries where the functional currency is not the U.S. dollar into U.S. dollars. We calculate the effect of changes in currency exchange rates as the difference between current period activity translated using the current period's currency exchange rates and the comparable prior year period's currency exchange rates. Additionally, no currency exchange rate fluctuations are calculated for non-USD acquisitions until owned for 12 months. Throughout our discussion, we refer to the results of this calculation as the impact of currency exchange rate fluctuations. Volatility in currency exchange rates may impact the results, including net sales and operating income, of the Company and the Walmart International segment in the future.

On February 23, 2024, the Company effected a 3-for-1 forward split of its common stock and a proportionate increase in the number of authorized shares. All share and per share information, including share based compensation, throughout this Annual Report on Form 10-K has been retroactively adjusted to reflect the stock split.

We have taken certain strategic actions across our segments, including an increased emphasis on investments in automation and supply chain as well as diversifying our earnings streams through category and business mix. Additionally, in the Walmart International segment, we have taken strategic actions to reshape our portfolio including the following highlights over the last three years:

- In February 2021, we completed the sale of Asda for net consideration of $9.6 billion. Refer to Note 12.
- In March 2021, we completed the sale of Seiyu for net consideration of $1.2 billion. Refer to Note 12.
- In November 2022, we completed the buyout of the noncontrolling interest shareholders of our Massmart subsidiary (Refer to Note 3) and in December 2022, we exited operations in certain countries in Africa.
- In December 2022, we increased our ownership in PhonePe as part of the separation from our majority-owned Flipkart subsidiary. Refer to Note 3.

We operate in a highly competitive omni-channel retail industry in all of the markets we serve. We face strong sales competition from other discount, department, drug, dollar, variety and specialty stores, warehouse clubs and supermarkets, as well as eCommerce, health and wellness, financial services, advertising and data service businesses. Many of these competitors are national, regional or international chains or have a national or international omni-channel or eCommerce presence. We compete with a number of companies for attracting and retaining quality associates. We, along with other retail companies, are influenced by a number of factors including, but not limited to: catastrophic events, weather and other risks related to climate change, global health epidemics and pandemics, competitive pressures, consumer disposable income, consumer debt levels and buying patterns, consumer credit availability, disruptions in supply chain, inventory management, cost and availability of goods, currency exchange rate fluctuations, customer preferences, inflation, deflation, fuel and energy prices, general economic conditions, insurance costs, interest rates, labor availability and costs, tax rates, the imposition of tariffs, cybersecurity attacks and unemployment. Further information on the factors that can affect our operating results and on certain risks to our Company and an investment in its securities can be found herein under "Item 1A. Risk Factors."

We are committed to helping customers save money and live better through everyday low prices, supported by everyday low costs. Merchandise costs for fiscal 2024 continued to be impacted by inflation, however at a lower rate than we experienced in fiscal 2023. The impact to our net sales and gross profit margin is influenced in part by our pricing and merchandising strategies in response to cost increases. Those pricing strategies include but are not limited to: absorbing cost increases instead of passing those cost increases on to our customers and members; reducing prices in certain merchandise categories; focusing on opening price points for certain food categories; and when necessary, passing cost increases on to our customers and members. Merchandising strategies include, but are not limited to: working with our suppliers to reduce product costs and share in absorbing cost increases; focusing on private label brands and smaller pack sizes; earlier-than-usual purchasing and in greater volumes or moderating purchasing in certain categories; and securing ocean carrier and container capacity. These strategies have and may continue to impact gross profit as a percentage of net sales.

We expect continued uncertainty in our business and the global economy due to inflationary trends; swings in macroeconomic conditions and their effect on consumer confidence; volatility in employment trends; supply chain pressures; and ongoing uncertainties related to global health epidemics or pandemics, any of which may impact our results. For a detailed discussion on results of operations by reportable segment, refer to "Results of Operations" below.

Company Performance Metrics

We are committed to helping customers save money and live better through everyday low prices, supported by everyday low costs. At times, we adjust our business strategies to maintain and strengthen our competitive positions in the countries in which we operate. We define our financial priorities as follows:

- Growth - serve customers through a seamless omni-channel experience;
- Margin - improve our operating income margin through productivity initiatives as well as category and business mix; and
- Returns - improve our Return on Investment ("ROI") through margin improvement and disciplined capital spend.

Growth

Our objective of prioritizing growth means we will focus on serving customers and members however they want to shop through our omni-channel business model. This includes increasing comparable store and club sales through increasing membership at Sam's Club and through Walmart+, accelerating eCommerce sales growth and expansion of omni-channel initiatives that complement our strategy.

Comparable sales is a metric that indicates the performance of our existing stores and clubs by measuring the change in sales for such stores and clubs, including eCommerce sales, for a particular period over the corresponding period in the previous year. The retail industry generally reports comparable sales using the retail calendar (also known as the 4-5-4 calendar). To be consistent with the retail industry, we provide comparable sales using the retail calendar in our quarterly earnings releases. However, when we discuss our comparable sales below, we are referring to our calendar comparable sales calculated using our fiscal calendar, which may result in differences when compared to comparable sales using the retail calendar. We focus on comparable sales in the U.S. as we believe it is a meaningful metric within the context of the U.S. retail market where there is a single currency, one inflationary market and generally consistent store and club formats from year to year.

Calendar comparable sales, as well as the impact of fuel, for fiscal 2024 and 2023, were as follows:

	Fiscal Years Ended January 31,			
	2024	2023	2024	2023
	With Fuel		Fuel Impact	
Walmart U.S.	5.5%	7.0%	(0.1)%	0.4%
Sam's Club	2.3%	14.6%	(2.6)%	4.2%
Total U.S.	4.9%	8.2%	(0.6)%	1.0%

Comparable sales in the U.S., including fuel, increased 4.9% and 8.2% in fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. Walmart U.S. comparable sales increased 5.5% and 7.0% in fiscal 2024 and 2023, respectively. For fiscal 2024, comparable sales growth was driven by growth in transactions combined with growth in average ticket, including strong sales in grocery and health and wellness. For fiscal 2023, comparable sales growth was driven by growth in average ticket, including strong food sales and higher inflation impacts in certain merchandise categories, as well as growth in transactions. Walmart U.S. eCommerce sales positively contributed approximately 2.6% and 0.7% to comparable sales for fiscal 2024 and 2023, respectively, which was primarily driven by store pickup and delivery.

Comparable sales at Sam's Club increased 2.3% and 14.6% in fiscal 2024 and 2023, respectively. For fiscal 2024, Sam's Club comparable sales benefited from growth in transactions and average ticket, including strong sales in grocery and health and wellness. Sam's Club comparable sales for fiscal 2023 benefited from growth in transactions and average ticket and included higher inflation impacts in certain merchandise categories. Sam's Club eCommerce sales positively contributed approximately 1.7% and 0.8% to comparable sales for fiscal 2024 and 2023, respectively.

Margin

Our objective of prioritizing margin focuses on growth with a focus on incremental margin accretion through a combination of productivity improvements as well as category and business mix. We invest in technology and process improvements to increase productivity, manage inventory and reduce costs and we operate with discipline by managing expenses and optimizing the efficiency of how we work. Additionally, we focus on our mix of businesses, including the expansion of connected value streams with higher margins, such as advertising and membership income. Our objective is to achieve operating income leverage, which we define as growing operating income at a faster rate than net sales.

	Fiscal Years Ended January 31,	
(Amounts in millions, except unit counts)	**2024**	**2023**
Net sales	$ 642,637	$ 605,881
Percentage change from comparable period	6.1 %	6.7 %
Gross profit as a percentage of net sales	23.7 %	23.5 %
Operating, selling, general and administrative expenses as a percentage of net sales	20.4 %	21.0 %
Operating income	$ 27,012	$ 20,428
Operating income as a percentage of net sales	4.2 %	3.4 %

Gross profit as a percentage of net sales ("gross profit rate") increased 27 and decreased 98 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024, the increase was primarily driven by the Walmart U.S. segment, due to managing prices aligned to our competitive historic price gaps and lapping higher markdowns incurred in the prior year, partially offset by product mix shifts into lower margin categories. For fiscal 2023, the decrease was primarily due to markdowns and merchandise mix in the U.S., higher supply chain costs and inflation related LIFO charges in the Sam's Club segment.

For fiscal 2024, operating expenses as a percentage of net sales decreased 60 basis points when compared to the previous fiscal year. Operating expenses as a percentage of net sales were positively impacted by lapping charges of $3.3 billion related to opioid-related legal settlements and $0.8 billion related to the reorganization and restructuring of certain businesses in the Walmart International segment in the prior year.

For fiscal 2023, operating expenses as a percentage of net sales increased 23 basis points when compared to the previous fiscal year. Operating expenses as a percentage of net sales were negatively impacted by the charges related to opioid-related legal settlements and the reorganization and restructuring of certain businesses in the Walmart International segment discussed above. These charges were partially offset by growth in net sales and lower incremental COVID-19 costs.

Operating income as a percentage of net sales increased 83 basis points and decreased 120 basis points for fiscal 2024 and 2023, respectively, due to the factors described above.

Returns

As we execute our financial framework, we believe our return on capital will improve over time. We measure return on capital with our return on assets, return on investment and free cash flow metrics. We also provide returns in the form of share repurchases and dividends, which are discussed in the Liquidity and Capital Resources section.

Return on Assets and Return on Investment

We include Return on Assets ("ROA"), the most directly comparable measure based on our financial statements presented in accordance with generally accepted accounting principles in the U.S. ("GAAP"), and Return on Investment ("ROI") as metrics to assess returns on assets. While ROI is considered a non-GAAP financial measure, management believes ROI is a meaningful metric to share with investors because it helps investors assess how effectively Walmart is deploying its assets. Trends in ROI can fluctuate over time as management balances long-term strategic initiatives with possible short-term impacts. ROA was 6.6% and 4.6% for fiscal 2024 and 2023, respectively. The increase in ROA was primarily due to the increase in consolidated net income, which was driven by higher operating income. ROI was 15.0% and 12.7% for fiscal 2024 and 2023, respectively. The increase in ROI was the result of an increase in operating income, primarily due to lapping charges associated with opioid-related legal settlements as well as reorganization and restructuring expenses, all recorded in fiscal 2023, as well as improvements in business performance, partially offset by an increase in average invested capital, primarily due to higher purchases of property and equipment.

We define ROI as adjusted operating income (operating income plus interest income, depreciation and amortization, and rent expense) for the trailing twelve months divided by average invested capital during that period. We consider average invested capital to be the average of our beginning and ending total assets, plus average accumulated depreciation and average amortization, less average accounts payable and average accrued liabilities for that period.

Our calculation of ROI is considered a non-GAAP financial measure because we calculate ROI using financial measures that exclude and include amounts that are included and excluded in the most directly comparable GAAP financial measure. For example, we exclude the impact of depreciation and amortization from our reported operating income in calculating the numerator of our calculation of ROI. As mentioned above, we consider ROA to be the financial measure computed in accordance with GAAP most directly comparable to our calculation of ROI. ROI differs from ROA (which is consolidated net income for the period divided by average total assets for the period) because ROI: adjusts operating income to exclude certain expense items and adds interest income; and adjusts total assets for the impact of accumulated depreciation and amortization, accounts payable and accrued liabilities to arrive at total invested capital. Because of the adjustments mentioned above, we believe ROI more accurately measures how we are deploying our key assets and is more meaningful to investors than ROA. Although ROI is a standard financial measure, numerous methods exist for calculating a company's ROI. As a result, the method used by management to calculate our ROI may differ from the methods used by other companies to calculate their ROI.

The calculation of ROA and ROI, along with a reconciliation of ROI to the calculation of ROA, the most comparable GAAP financial measure, is as follows:

	Fiscal Years Ended January 31,	
(Amounts in millions)	**2024**	**2023**
CALCULATION OF RETURN ON ASSETS		
Numerator		
Consolidated net income	$ 16,270	$ 11,292
Denominator		
Average total assets[(1)]	$ 247,798	$ 244,029
Return on assets (ROA)	6.6 %	4.6 %
CALCULATION OF RETURN ON INVESTMENT		
Numerator		
Operating income	$ 27,012	$ 20,428
+ Interest income	546	254
+ Depreciation and amortization	11,853	10,945
+ Rent	2,277	2,306
ROI operating income	$ 41,688	$ 33,933
Denominator		
Average total assets[(1)]	$ 247,798	$ 244,029
+ Average accumulated depreciation and amortization[(1)]	114,944	106,249
- Average accounts payable[(1)]	55,277	54,502
- Average accrued liabilities[(1)]	29,943	28,593
Average invested capital	$ 277,522	$ 267,183
Return on investment (ROI)	15.0 %	12.7 %

[(1)] The average is based on the addition of the account balance at the end of the current period to the account balance at the end of the prior period and dividing by 2.

	As of January 31,		
	2024	**2023**	**2022**
Certain Balance Sheet Data			
Total assets	$ 252,399	$ 243,197	$ 244,860
Accumulated depreciation and amortization	119,602	110,286	102,211
Accounts payable	56,812	53,742	55,261
Accrued liabilities	28,759	31,126	26,060

Strategic Capital Allocation

Our strategy includes allocating the majority of our capital to higher-return areas focused on automation such as eCommerce, supply chain and store and club investments. The following table provides additional detail regarding our capital expenditures:

(Amounts in millions)	Fiscal Years Ended January 31,	
Allocation of Capital Expenditures	**2024**	**2023**
Supply chain, customer-facing initiatives and technology	$ 11,828	$ 9,209
Store and club remodels	5,792	4,990
New stores and clubs, including expansions and relocations	75	33
Total U.S.	$ 17,695	$ 14,232
Walmart International	2,911	2,625
Total capital expenditures	$ 20,606	$ 16,857

Free Cash Flow

Free cash flow is considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for use in evaluating the Company's financial performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity. See "Liquidity and Capital Resources" for discussions of GAAP metrics including net cash provided by operating activities, net cash used in investing activities and net cash used in financing activities.

We define free cash flow as net cash provided by operating activities in a period minus payments for property and equipment made in that period. We had net cash provided by operating activities of $35.7 billion, $28.8 billion and $24.2 billion for fiscal 2024, 2023 and 2022, respectively. We generated free cash flow of $15.1 billion, $12.0 billion and $11.1 billion for fiscal 2024, 2023 and 2022, respectively. The increase in net cash provided by operating activities in fiscal 2024 is primarily due to higher cash provided by operating income, as well as timing of certain payments and strategic inventory management as part of working capital initiatives, partially offset by payment of the remaining accrued opioid legal charges. Free cash flow for fiscal 2024 increased when compared to fiscal 2023 due to the increase in operating cash flows described above, partially offset by an increase of $3.7 billion in capital expenditures to support our investment strategy. Net cash provided by operating activities for fiscal 2023 increased when compared to fiscal 2022 primarily due to moderated levels of inventory purchases, partially offset by a decline in operating income and the timing of certain payments. Free cash flow for fiscal 2023 increased when compared to fiscal 2022 due to the increase in net cash provided by operating activities described above, partially offset by an increase of $3.8 billion in capital expenditures to support our investment strategy.

Walmart's definition of free cash flow is limited in that it does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our Consolidated Statements of Cash Flows.

Although other companies report their free cash flow, numerous methods may exist for calculating a company's free cash flow. As a result, the method used by management to calculate our free cash flow may differ from the methods used by other companies to calculate their free cash flow.

The following table sets forth a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow, as well as information regarding net cash used in investing activities and net cash used in financing activities.

	Fiscal Years Ended January 31,		
(Amounts in millions)	**2024**	**2023**	**2022**
Net cash provided by operating activities	$ 35,726	$ 28,841	$ 24,181
Payments for property and equipment	(20,606)	(16,857)	(13,106)
Free cash flow	$ 15,120	$ 11,984	$ 11,075
Net cash used in investing activities[1]	$ (21,287)	$ (17,722)	$ (6,015)
Net cash used in financing activities	(13,414)	(17,039)	(22,828)

[1] "Net cash used in investing activities" includes payments for property and equipment, which is also included in our computation of free cash flow.

Results of Operations

Consolidated Results of Operations

(Amounts in millions, except unit counts)	Fiscal Years Ended January 31, 2024	2023	2022
Total revenues	$ 648,125	$ 611,289	$ 572,754
Percentage change from comparable period	6.0 %	6.7 %	2.4 %
Net sales	$ 642,637	$ 605,881	$ 567,762
Percentage change from comparable period	6.1 %	6.7 %	2.3 %
Total U.S. calendar comparable sales increase	4.9 %	8.2 %	7.7 %
Gross profit rate	23.7 %	23.5 %	24.4 %
Operating income	$ 27,012	$ 20,428	$ 25,942
Operating income as a percentage of net sales	4.2 %	3.4 %	4.6 %
Loss on extinguishment of debt	$ —	$ —	$ 2,410
Other (gains) and losses	$ 3,027	$ 1,538	$ 3,000
Consolidated net income	$ 16,270	$ 11,292	$ 13,940
Unit counts at period end[(1)]	10,616	10,623	10,593
Retail square feet at period end[(1)]	1,053	1,056	1,060

(1) Unit counts and associated retail square feet are presented for stores and clubs generally open as of period end, and reflects the removal of stores in the U.K. and Japan subsequent to closing the divestitures in fiscal 2022. Permanently closed locations are not included in these metrics.

Our total revenues, which includes net sales and membership and other income, increased $36.8 billion or 6.0% and $38.5 billion or 6.7% for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. These increases in revenues were primarily due to increases in net sales, which increased $36.8 billion or 6.1% and $38.1 billion or 6.7% for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024, the increase was primarily due to positive comparable sales for the Walmart U.S. and Sam's Club segments, which were driven by growth in transactions, combined with growth in average ticket, including strong sales in grocery and health and wellness, along with positive comparable sales across our international markets. Net sales were positively impacted by $3.0 billion of fluctuations in currency exchange rates during fiscal 2024. For fiscal 2023, the increase was primarily due to strong positive comparable sales for the Walmart U.S. and Sam's Club segments which was driven by growth in average ticket, including strong food sales and higher inflation impacts in certain merchandise categories, as well as growth in transactions, along with positive comparable sales in all of our international markets. Additionally, net sales were negatively impacted by a decrease of $5.0 billion related to the divestiture of our operations in the U.K. and Japan, which closed in the first quarter of fiscal 2022 and $3.7 billion of fluctuations in currency exchange rates during fiscal 2023.

Our gross profit rate increased 27 basis points and decreased 98 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024, the increase was primarily driven by the Walmart U.S. segment, due to managing prices aligned to our competitive historic price gaps and lapping higher markdowns incurred in the prior year, partially offset by product mix shifts into lower margin categories. For fiscal 2023, the decrease was primarily due to markdowns and merchandise mix in the U.S., higher supply chain costs and inflation related LIFO charges in the Sam's Club segment.

For fiscal 2024, operating expenses as a percentage of net sales decreased 60 basis points when compared to the previous fiscal year. Operating expenses as a percentage of net sales were positively impacted by lapping charges of $3.3 billion related to opioid-related legal settlements and $0.8 billion related to the reorganization and restructuring of certain businesses in the Walmart International segment in the prior year. For fiscal 2023, operating expenses as a percentage of net sales increased 23 basis points when compared to the previous fiscal year. Operating expenses as a percentage of net sales were negatively impacted by the charges related to opioid-related legal settlements and the reorganization and restructuring of certain businesses in the Walmart International segment discussed above. These charges were partially offset by growth in net sales and lower incremental COVID-19 costs.

Loss on extinguishment of debt was $2.4 billion in fiscal 2022 due to the early retirement of certain higher rate long-term debt to reduce interest expense in future periods. There were no such early retirements of debt in fiscal 2024 and fiscal 2023.

Other gains and losses consist of certain non-operating items, such as the change in the fair value of our investments and gains or losses on business dispositions, which by their nature can fluctuate from period to period. Other gains and losses consisted of a net loss of $3.0 billion and $1.5 billion for fiscal 2024 and 2023, respectively. The net loss in fiscal 2024 primarily consists of net losses associated with the fair value changes of our equity and other investments. The net loss in fiscal 2023 primarily consists of: net losses associated with the fair value changes of our equity and other investments; a gain of $0.4 billion recognized on the sale of our remaining equity method investment in Brazil; and a $0.2 billion dividend from one of our investments.

Our effective income tax rate was 25.5%, 33.6%, and 25.4% for fiscal 2024, 2023 and 2022, respectively. The higher effective tax rate in fiscal 2023 as compared to both fiscal 2024 and fiscal 2022 is primarily due to the tax impact of the business reorganization resulting in the full separation of PhonePe from Flipkart in fiscal 2023. Our effective income tax rate may also fluctuate as a result of various factors, including changes in our assessment of unrecognized tax benefits, valuation allowances, changes in tax law, outcomes of administrative audits, the impact of discrete items and the mix and size of earnings among our U.S. operations and international operations, which are subject to statutory rates that are generally higher than the U.S. statutory rate. The reconciliation from the U.S. statutory rate to the effective income tax rates for fiscal 2024, 2023 and 2022 is presented in Note 9.

As a result of the factors discussed above, we reported $16.3 billion and $11.3 billion of consolidated net income for fiscal 2024 and 2023, respectively, which represents an increase of $5.0 billion and a decrease of $2.6 billion for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. Diluted net income per common share attributable to Walmart ("EPS") was $1.91, $1.42 and $1.62 for fiscal 2024, 2023 and 2022, respectively.

Walmart U.S. Segment

	Fiscal Years Ended January 31,		
(Amounts in millions, except unit counts)	2024	2023	2022
Net sales	$ 441,817	$ 420,553	$ 393,247
Percentage change from comparable period	5.1 %	6.9 %	6.3 %
Calendar comparable sales increase	5.5 %	7.0 %	6.4 %
Operating income	$ 22,154	$ 20,620	$ 21,587
Operating income as a percentage of net sales	5.0 %	4.9 %	5.5 %
Unit counts at period end	4,615	4,717	4,742
Retail square feet at period end	699	702	703

Net sales for the Walmart U.S. segment increased $21.3 billion or 5.1% and $27.3 billion or 6.9% for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. The increases in net sales were primarily due to increases in comparable sales of 5.5% and 7.0% for fiscal 2024 and 2023, respectively. Comparable sales in fiscal 2024 were driven by growth in transactions combined with growth in average ticket, including strong sales in grocery and health and wellness. Comparable sales in fiscal 2023 were driven by growth in average ticket, including strong food sales and higher inflation impacts in certain merchandise categories, as well as growth in transactions. Walmart U.S. eCommerce sales positively contributed approximately 2.6% and 0.7% to comparable sales for fiscal 2024 and 2023, respectively, which was primarily driven by store pickup and delivery.

Gross profit rate increased 20 basis points for fiscal 2024 and decreased 85 basis points for fiscal 2023, when compared to the respective previous fiscal year. The increase in fiscal 2024 gross profit rate was primarily due to managing prices aligned to our competitive historic price gaps and lapping higher net markdowns incurred in the prior year, partially offset by product mix shifts into lower margin categories. The decrease in fiscal 2023 gross profit rate was primarily due to net markdowns and product mix shifts into lower margin categories and increased supply chain costs, partially offset by price management impacts driven by cost inflation.

Operating expenses as a percentage of segment net sales increased 9 basis points for fiscal 2024 when compared to the previous fiscal year primarily driven by higher variable pay relative to last year as a result of exceeding our planned performance. For fiscal 2023, operating expenses as a percentage of segment net sales decreased 25 basis points primarily driven by strong sales growth and lower incremental COVID-19 related costs, partially offset by increased wage costs.

As a result of the factors discussed above, segment operating income increased $1.5 billion and decreased $1.0 billion for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year.

Walmart International Segment

(Amounts in millions, except unit counts)	Fiscal Years Ended January 31, 2024	2023	2022
Net sales	$ 114,641	$ 100,983	$ 100,959
Percentage change from comparable period	13.5 %	— %	(16.8)%
Operating income	$ 4,909	$ 2,965	$ 3,758
Operating income as a percentage of net sales	4.3 %	2.9 %	3.7 %
Unit counts at period end	5,402	5,306	5,251
Retail square feet at period end	274	273	277

Net sales for the Walmart International segment increased $13.7 billion or 13.5% for fiscal 2024 and were flat for 2023, when compared to the previous fiscal year. For fiscal 2024, the increase was primarily due to positive comparable sales across our international markets and positive fluctuations in currency exchange rates of $3.0 billion during fiscal 2024. For fiscal 2023, net sales benefited from positive comparable sales across all of our international markets, offset by the impacts of a decrease of $5.0 billion related to the divestiture of our operations in the U.K. and Japan, which closed in the first quarter of fiscal 2022, as well as $3.7 billion of fluctuations in currency exchange rates during fiscal 2023.

Gross profit rate increased 20 basis points and decreased 50 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024, the increase was primarily driven by supply chain efficiencies partially offset by ongoing format and channel shifts. For fiscal 2023, the decrease was primarily driven by continued growth in lower margin formats and channels in China and category mix shifts into lower margin categories.

Operating expenses as a percentage of segment net sales decreased 152 basis points and increased 41 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. The decrease in operating expenses as a percentage of segment net sales for fiscal 2024 was primarily due to the lapping of business reorganization and restructuring charges incurred related to Flipkart and Massmart in fiscal 2023 and an increase in sales in the current year. The increase in operating expenses as a percentage of segment net sales for fiscal 2023, was primarily due to incurring these business reorganization and restructuring charges.

As a result of the factors discussed above, segment operating income increased $1.9 billion and decreased $0.8 billion for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year.

Sam's Club Segment

(Amounts in millions, except unit counts)	Fiscal Years Ended January 31, 2024	2023	2022
Including Fuel			
Net sales	$ 86,179	$ 84,345	$ 73,556
Percentage change from comparable period	2.2 %	14.7 %	15.1 %
Calendar comparable sales increase	2.3 %	14.6 %	15.0 %
Operating income	$ 2,192	$ 1,964	$ 2,259
Operating income as a percentage of net sales	2.5 %	2.3 %	3.1 %
Unit counts at period end	599	600	600
Retail square feet at period end	80	80	80
Excluding Fuel [(1)]			
Net sales	$ 75,057	$ 71,665	$ 64,860
Percentage change from comparable period	4.7 %	10.5 %	9.6 %
Operating income	$ 1,659	$ 1,352	$ 1,923
Operating income as a percentage of net sales	2.2 %	1.9 %	3.0 %

(1) We believe the "Excluding Fuel" information is useful to investors because it permits investors to understand the effect of the Sam's Club segment's fuel sales on its results of operations, which are impacted by the volatility of fuel prices. Volatility in fuel prices may continue to impact the operating results of the Sam's Club segment in the future. Management uses such information to better measure underlying operating results in the segment.

Net sales for the Sam's Club segment increased $1.8 billion or 2.2% and $10.8 billion or 14.7% for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. The increases in net sales were primarily due to increases in comparable sales, including fuel, of 2.3% and 14.6% for fiscal 2024 and 2023, respectively. Comparable sales benefited from growth in transactions and average ticket, including strong sales in grocery and health and wellness. Additionally, fiscal 2024 growth was partially offset by lower fuel sales due to deflation in this category. Sam's Club eCommerce sales positively contributed approximately 1.7% and 0.8% to comparable sales for fiscal 2024 and 2023, respectively, which was primarily driven by curbside pickup and ship to home.

Gross profit rate increased 55 basis points and decreased 155 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024, the increase in gross profit rate was primarily due to the lapping of elevated markdowns in the prior year, partially offset by product mix shifts into lower margin categories. For fiscal 2023, the decrease in gross profit rate was primarily due to inventory markdowns, elevated supply chain and eCommerce fulfillment costs and inflation related LIFO charges.

Membership and other income increased 7.5% and 7.0% for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. For fiscal 2024 and 2023, the increases were primarily due to growth in membership base and Plus penetration. Fiscal 2024 was also positively impacted by higher Plus renewals, as well as the expiration of a promotional offering offsetting membership fee increases during the fourth quarter of fiscal 2024.

Operating expenses as a percentage of segment net sales increased 46 basis points and decreased 97 basis points for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year. Fiscal 2024 operating expenses as a percentage of net sales increased primarily due to lower fuel sales and elevated technology spend. Fiscal 2023 operating expenses as a percentage of net sales decreased primarily due to higher sales.

As a result of the factors discussed above, segment operating income increased $0.2 billion and decreased $0.3 billion for fiscal 2024 and 2023, respectively, when compared to the previous fiscal year.

Liquidity and Capital Resources

Liquidity

The strength and stability of our operations have historically supplied us with a significant source of liquidity. Our cash flows provided by operating activities, supplemented with our long-term debt and short-term borrowings, have been sufficient to fund our operations while allowing us to invest in activities that support the long-term growth of our operations. Generally, some or all of the remaining available cash flow has been used to fund dividends on our common stock and share repurchases. We believe our sources of liquidity will continue to be sufficient to fund operations, finance our global investment activities, pay dividends and fund our share repurchases for at least the next 12 months and for the foreseeable future.

Net Cash Provided by Operating Activities

	Fiscal Years Ended January 31,		
(Amounts in millions)	**2024**	**2023**	**2022**
Net cash provided by operating activities	$ 35,726	$ 28,841	$ 24,181

Net cash provided by operating activities was $35.7 billion, $28.8 billion and $24.2 billion for fiscal 2024, 2023 and 2022, respectively. The increase in net cash provided by operating activities in fiscal 2024 is primarily due to higher cash provided by operating income, as well as timing of certain payments and strategic inventory management as part of working capital initiatives, partially offset by payment of the remaining accrued opioid legal charges. The increase in net cash provided by operating activities for fiscal 2023, when compared to the previous fiscal year, was primarily due to moderated levels of inventory purchases, partially offset by a decline in operating income and the timing of certain payments.

Cash Equivalents and Working Capital Deficit

Cash and cash equivalents were $9.9 billion and $8.6 billion as of January 31, 2024 and 2023, respectively. Our working capital deficit, defined as total current assets less total current liabilities, was $15.5 billion and $16.5 billion as of January 31, 2024 and 2023, respectively. The decrease in our working capital deficit is primarily driven by a decrease in accrued liabilities primarily due to the payment of the remaining accrued opioid legal charges and an increase in cash, partially offset by an increase in accounts payable and a decrease in inventories as part of working capital initiatives. We generally operate with a working capital deficit due to our efficient use of cash in funding operations, consistent access to the capital markets and returns provided to our shareholders in the form of payments of cash dividends and share repurchases.

We use intercompany financing arrangements in an effort to ensure cash can be made available in the country in which it is needed with the minimum cost possible. Additionally, from time-to-time, we repatriate earnings and related cash from jurisdictions outside of the U.S. Under current law, repatriations of foreign earnings will generally be free of U.S. federal tax, but may incur other taxes such as withholding or state taxes. We do not expect current local laws, or other existing limitations on anticipated future repatriations of cash amounts held outside the U.S. to have a material effect on our overall liquidity, financial position or results of operations.

As of January 31, 2024 and 2023, cash and cash equivalents of $3.5 billion and $2.9 billion, respectively, may not be freely transferable to the U.S. due to local laws or other restrictions or are subject to the approval of the noncontrolling interest shareholders.

Net Cash Used in Investing Activities

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Net cash used in investing activities	$ (21,287)	$ (17,722)	$ (6,015)

Net cash used in investing activities was $21.3 billion, $17.7 billion and $6.0 billion for fiscal 2024, 2023 and 2022, respectively, and generally consisted of capital expenditures. Net cash used in investing activities increased $3.6 billion for fiscal 2024 when compared to the previous fiscal year primarily due to increased payments for property and equipment. Net cash used in investing activities increased $11.7 billion for fiscal 2023 when compared to the previous fiscal year, primarily due to the result of lapping the net proceeds received from the divestitures of our operations in the U.K. and Japan and an increase in capital expenditures to support our investment strategy.

Capital expenditures

Refer to the "Strategic Capital Allocation" section in our Company Performance Metrics for capital expenditure detail for fiscal 2024 and 2023. For the fiscal year ending January 31, 2025 ("fiscal 2025"), we project capital expenditures will be approximately $20 billion to $24 billion, with a focus on technology, supply chain, and customer-facing initiatives.

Net Cash Used in Financing Activities

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Net cash used in financing activities	$ (13,414)	$ (17,039)	$ (22,828)

Net cash from financing activities generally consists of debt transactions, dividends paid, repurchases of Company stock and transactions with noncontrolling interest shareholders. Fiscal 2024 net cash used in financing activities decreased $3.6 billion when compared to the previous fiscal year. The decrease is primarily due to fewer repurchases of Company stock, partially offset by the purchase of certain noncontrolling interests. Fiscal 2023 net cash used in financing activities decreased $5.8 billion when compared to the previous fiscal year. The decrease was primarily due to repayments of long-term debt and related payment of premiums for the early extinguishment of certain notes in the prior fiscal year, partially offset by the equity funding from the sale of subsidiary stock in the prior fiscal year.

*Purchase and Sale of Subsidiary Stoc*k

During fiscal 2024, we paid $3.5 billion to acquire shares from certain Flipkart noncontrolling interest holders and settle the liability to former noncontrolling interest holders of PhonePe. Additionally, we received $0.7 billion related to new rounds of equity funding for the Company's majority owned PhonePe subsidiary.

During fiscal 2023, we completed a $0.4 billion buyout of the noncontrolling interest shareholders of our Massmart subsidiary and completed a $0.4 billion acquisition of Alert Innovation, bringing our ownership to approximately 100% of both Massmart and Alert Innovation.

During fiscal 2022, we received $3.2 billion primarily related to a new equity funding for our majority-owned Flipkart subsidiary.

Short-term Borrowings

We generally utilize the liquidity provided by short-term borrowings to provide funding for our operations, dividend payments, share repurchases, capital expenditures and other cash requirements. The following table includes additional information related to the our short-term borrowings for fiscal 2024, 2023 and 2022:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Maximum amount outstanding at any month-end	$ 9,942	$ 11,432	$ 716
Average daily short-term borrowings	4,295	7,250	626
Annual weighted-average interest rate	5.1 %	2.4 %	3.7 %

Short-term borrowings as of January 31, 2024 and 2023 were $0.9 billion and $0.4 billion, respectively, with weighted-average interest rates of 7.7% and 6.6%, respectively. We also have $15.0 billion of various undrawn committed lines of credit in the U.S. as of January 31, 2024 that provide additional liquidity, if needed. Additionally, we maintain access to various credit facilities outside of the U.S. to further support our Walmart International segment operations, as needed.

As of January 31, 2024, we have $2.1 billion of syndicated and fronted letters of credit available, of which $1.7 billion was drawn and represents an unrecorded current obligation.

Long-term Debt

The following table provides the changes in our long-term debt for fiscal 2024:

(Amounts in millions)	Long-term debt due within one year	Long-term debt	Total
Balances as of February 1, 2023	$ 4,191	$ 34,649	$ 38,840
Proceeds from issuance of long-term debt	—	4,967	4,967
Repayments of long-term debt	(4,213)	(4)	(4,217)
Reclassifications of long-term debt	3,486	(3,486)	—
Currency and other adjustments	(17)	6	(11)
Balances as of January 31, 2024	$ 3,447	$ 36,132	$ 39,579

Our total outstanding long-term debt increased $0.7 billion during fiscal 2024, primarily due to the issuance of new long-term debt in April 2023, partially offset by the maturities of certain long-term debt. Refer to Note 6 to our Consolidated Financial Statements for details on the issuances of long-term debt.

Estimated contractual interest payments associated with our long-term debt amount to $20.2 billion, with approximately $1.8 billion expected to be paid in fiscal 2025. Estimated interest payments are based on our principal amounts and expected maturities of all debt outstanding as of January 31, 2024, and assumes interest rates remain at current levels for our variable rate instruments.

Dividends

Our total dividend payments were $6.1 billion, $6.1 billion and $6.2 billion for fiscal 2024, 2023 and 2022, respectively. Effective February 20, 2024, the Company approved the fiscal 2025 annual dividend of $0.83 per share, an increase over the fiscal 2024 annual dividend of $0.76 per share. For fiscal 2025, the annual dividend will be paid in four quarterly installments of $0.2075 per share, according to the following record and payable dates:

Record Date	Payable Date
March 15, 2024	April 1, 2024
May 10, 2024	May 28, 2024
August 16, 2024	September 3, 2024
December 13, 2024	January 6, 2025

Company Share Repurchase Program

From time to time, the Company repurchases shares of its common stock under share repurchase programs authorized by the Company's Board of Directors. All repurchases made during fiscal 2024 were made under the current $20.0 billion share repurchase program approved in November 2022, which has no expiration date or other restrictions limiting the period over which the Company can make repurchases. As of January 31, 2024, authorization for $16.5 billion of share repurchases remained under the share repurchase program. Any repurchased shares are constructively retired and returned to an unissued status.

We regularly review share repurchase activity and consider several factors in determining when to execute share repurchases, including, among other things, current cash needs, capacity for leverage, cost of borrowings, our results of operations and the market price of our common stock. We anticipate that a majority of the ongoing share repurchase program will be funded through the Company's free cash flow.

The following table provides, on a settlement date basis, the number of shares repurchased, average price paid per share and total amount paid for share repurchases for fiscal 2024, 2023 and 2022:

	Fiscal Years Ended January 31,		
(Amounts in millions, except per share data)	2024	2023	2022
Total number of shares repurchased	54.6	221.8	209.1
Average price paid per share	$ 50.87	$ 44.72	$ 46.82
Total amount paid for share repurchases	$ 2,779	$ 9,920	$ 9,787

Material Cash Requirements

Material cash requirements from operating activities primarily consist of inventory purchases, employee related costs, taxes, interest and other general operating expenses, which we expect to be primarily satisfied by our cash from operations. Other material cash requirements from known contractual and other obligations include short-term borrowings, long-term debt and related interest payments, leases and purchase obligations. See Note 6 and Note 7 to our Consolidated Financial Statements for information regarding outstanding short-term borrowings and long-term debt, and leases, respectively.

As of January 31, 2024, the Company has $34.3 billion of unrecorded purchase obligations outstanding, of which $14.6 billion is due within one year. Purchase obligations include legally binding contracts, such as firm commitments for inventory and utility purchases, as well as commitments to make capital expenditures, software acquisition and license commitments and legally binding service contracts. Contractual obligations for the purchase of goods or services are defined as agreements that are enforceable and legally binding and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Contracts that specify the Company will purchase all or a portion of its requirements of a specific product or service from a supplier, but do not include a fixed or minimum quantity, are excluded from the obligations quantified above. Accordingly, purchase orders for inventory are also excluded as purchase orders represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current inventory needs and are fulfilled by our suppliers within short time periods. We also enter into contracts for outsourced services; however, the obligations under these contracts are not significant and the contracts generally contain clauses allowing for cancellation without significant penalty. Timing of payments and actual amounts paid may be different depending on the timing of receipt of goods or services or changes to agreed-upon amounts for some obligations.

Capital Resources

We believe our cash flows from operations, current cash position, short-term borrowings and access to capital markets will continue to be sufficient to meet our anticipated cash requirements and contractual obligations, which includes funding seasonal buildups in merchandise inventories and funding our capital expenditures, acquisitions, dividend payments and share repurchases.

We have strong commercial paper and long-term debt ratings that have enabled and should continue to enable us to refinance our debt as it becomes due at favorable rates in capital markets. As of January 31, 2024, the ratings assigned to our commercial paper and rated series of our outstanding long-term debt were as follows:

Rating agency	Commercial paper	Long-term debt
Standard & Poor's	A-1+	AA
Moody's Investors Service	P-1	Aa2
Fitch Ratings	F1+	AA

Credit rating agencies review their ratings periodically and, therefore, the credit ratings assigned to us by each agency may be subject to revision at any time. Accordingly, we are not able to predict whether our current credit ratings will remain consistent over time. Factors that could affect our credit ratings include changes in our operating performance, the general economic environment, conditions in the retail industry, our financial position, including our total debt and capitalization, and changes in our business strategy. Any downgrade of our credit ratings by a credit rating agency could increase our future borrowing costs or impair our ability to access capital and credit markets on terms commercially acceptable to us. In addition, any downgrade of our current short-term credit ratings could impair our ability to access the commercial paper markets with the same flexibility that we have experienced historically, potentially requiring us to rely more heavily on more expensive types of debt financing. The credit rating agency ratings are not recommendations to buy, sell or hold our commercial paper or debt securities. Each rating may be subject to revision or withdrawal at any time by the assigning rating organization and should be evaluated independently of any other rating. Moreover, each credit rating is specific to the security to which it applies.

Other Matters

In Note 10 to our Consolidated Financial Statements, which is captioned "Contingencies" and appears in Part II of this Annual Report on Form 10-K under the caption "Item 8. Financial Statements and Supplementary Data," we discuss, under the sub-captions "*Settlement Framework Regarding Multidistrict and State or Local Opioid Related Litigation*," and "*Other Opioid Related Litigation*" the Prescription Opiate Litigation, the Settlement Framework, and other matters, including certain risks arising therefrom. In that Note 10, we also discuss under the sub-caption "*Asda Equal Value Claims"* the Company's indemnification obligation for the Asda Equal Value Claims matter, under the sub-caption "*Money Transfer Agent Services Matters,*" a United States Federal Trade Commission complaint related to money transfers and the Company's anti-fraud program and a government investigation by the U.S. Attorney's Office for the Middle District of Pennsylvania into the Company's consumer fraud prevention and anti-money laundering compliance related to the Company's money transfer agent services as well as under the sub-caption "*Mexico Antitrust Matter*," we disclose the main Mexican operating subsidiary of Wal-Mart de México was notified of the initiation of a quasi-judicial administrative process against it for alleged relative monopolistic practices in connection with the supply and wholesale distribution of certain consumer goods, retail marketing practices of such consumer goods and related services. We discuss various legal proceedings related to the Federal and State Prescription Opiate Litigation, the Settlement Framework, DOJ Opioid Civil Litigation and Opioids Related Securities Class Actions and Derivative Litigation in Part I of this Annual Report on Form 10-K under the caption "Item 3. Legal Proceedings," under the sub-caption "I. Supplemental Information." We also discuss the Foreign Direct Investment Matters in Part I of this Annual Report on Form 10-K under the caption "Item 3. Legal Proceedings," under the sub-caption "II. Certain Other Matters." We also discuss an environmental matter with the State of California in Part I of this Annual Report on Form 10-K under the caption "Item 3. Legal Proceedings," under the sub-caption "III. Environmental Matters." The foregoing matters and other matters described elsewhere in this Annual Report on Form 10-K represent contingent liabilities of the Company that may or may not result in the incurrence of a material liability by the Company upon their final resolution.

Summary of Critical Accounting Estimates

Management strives to report our financial results in a clear and understandable manner, although in some cases accounting and disclosure rules are complex and require us to use technical terminology. In preparing the Company's Consolidated Financial Statements, we follow accounting principles generally accepted in the U.S. These principles require us to make certain estimates and apply judgments that affect our financial position and results of operations as reflected in our financial statements. These judgments and estimates are based on past events and expectations of future outcomes. Actual results may differ from our estimates.

Management continually reviews our accounting policies including how they are applied and how they are reported and disclosed in our financial statements. Following is a summary of our critical accounting estimates and how they are applied in preparation of the financial statements.

Contingencies

We are involved in a number of legal proceedings and certain regulatory matters. We record a liability when it is probable that a loss has been incurred and the amount is reasonably estimable. We also perform an assessment of the materiality of loss contingencies where a loss is either reasonably possible or it is reasonably possible that a loss could be incurred in excess of amounts accrued. If a loss or an additional loss has at least a reasonable possibility of occurring and the impact on the financial statements would be material, we provide disclosure of the loss contingency in the footnotes to our financial statements. We review all contingencies at least quarterly to determine whether the likelihood of loss has changed and to assess whether a reasonable estimate of the loss or the range of the loss can be made. Although we are not able to predict the outcome or reasonably estimate a range of possible losses in certain matters described in Note 10 to our Consolidated Financial Statements and have not recorded an associated accrual related to these matters, an adverse judgment or negotiated resolution in any of these matters could have a material adverse effect on our business, reputation, financial position, results of operations or cash flows.

Uncertain Tax Positions

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Our tax returns are routinely audited and settlements of issues raised in these audits sometimes affect our tax provisions. The benefits of uncertain tax positions are recorded in our financial statements only after determining a more likely than not probability that the uncertain tax positions will withstand challenge, if any, from taxing authorities. When facts and circumstances change, we reassess these probabilities and record any changes in the financial statements as appropriate. We account for uncertain tax positions by determining the minimum recognition threshold that a tax position is required to meet before being recognized in the financial statements. Accordingly, the determination of our uncertain tax positions requires judgment, the use of estimates in certain cases and the interpretation and application of complex tax laws.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

In addition to the risks inherent in our operations, we are exposed to certain market risks, including changes in interest rates, currency exchange rates and the fair values of certain equity and equity method investments measured on a recurring basis.

The analysis presented below for each of our market risk sensitive instruments is based on a hypothetical scenario used to calibrate potential risk and does not represent our view of future market changes. The effect of a change in a particular assumption is calculated without adjusting any other assumption. In reality, however, a change in one factor could cause a change in another, which may magnify or negate other sensitivities.

Interest Rate Risk

We are exposed to changes in interest rates as a result of our short-term borrowings and long-term debt. We hedge a portion of our interest rate risk by managing the mix of fixed and variable rate debt and by entering into interest rate swaps. For fiscal 2024, the net fair value of our interest rate swaps increased $35 million primarily due to fluctuations in market interest rates.

The table below provides information about our financial instruments that are sensitive to changes in interest rates. For long-term debt, the table represents the principal cash flows and related weighted-average interest rates by expected maturity dates. For interest rate swaps, the table represents the contractual cash flows and weighted-average interest rates by the contractual maturity date, unless otherwise noted. The notional amounts are used to calculate contractual cash flows to be exchanged under the contracts. The weighted-average variable rates are based upon prevailing market rates as of January 31, 2024.

	Expected Maturity Date						
(Amounts in millions)	**Fiscal 2025**	**Fiscal 2026**	**Fiscal 2027**	**Fiscal 2028**	**Fiscal 2029**	**Thereafter**	**Total**
Liabilities							
Short-term borrowings:							
Variable rate	$ 878	$ —	$ —	$ —	$ —	$ —	$ 878
Weighted-average interest rate	7.7 %	— %	— %	— %	— %	— %	7.7 %
Long-term debt[(1)]:							
Fixed rate	$ 3,447	$ 2,600	$ 3,483	$ 1,760	$ 3,458	$ 24,831	$ 39,579
Weighted-average interest rate	3.0 %	3.8 %	2.5 %	3.6 %	3.0 %	4.5 %	3.9 %
Interest rate derivatives							
Interest rate swaps:							
Fixed to variable	$ 1,500	$ —	$ —	$ —	$ 1,250	$ 3,521	$ 6,271
Weighted-average pay rate	6.7 %	— %	— %	— %	5.7 %	6.9 %	6.6 %
Weighted-average receive rate	3.3 %	— %	— %	— %	1.5 %	2.9 %	2.7 %

(1) Includes deferred loan costs, discounts, fair value hedges, foreign-held debt and secured debt.

As of January 31, 2024, our variable rate borrowings, including the effect of our commercial paper and interest rate swaps, represented 18% of our total short-term and long-term debt. Based on January 31, 2024 debt levels, a 100 basis point change in prevailing market rates would cause our annual interest costs to change by approximately $0.1 billion.

Foreign Currency Risk

We are exposed to fluctuations in currency exchange rates as a result of our investments and operations in countries other than the U.S., as well as our foreign-currency-denominated long-term debt. For fiscal 2024, movements in currency exchange rates and the related impact on the translation of the balance sheets resulted in the $0.3 billion net gain in the currency translation and other category of accumulated other comprehensive loss.

We hedge a portion of our foreign currency risk by entering into currency swaps. The aggregate fair value of these swaps was in a liability position of $1.3 billion and $1.4 billion as of January 31, 2024 and January 31, 2023, respectively. The change in the fair value of these swaps was due to fluctuations in currency exchange rates, primarily due to the strengthening of certain currencies relative to the U.S. dollar in fiscal 2024. The hypothetical result of a uniform 10% weakening in the value of the U.S. dollar relative to other currencies underlying these swaps would have resulted in a change in the value of the swaps of $0.7 billion. A hypothetical 10% change in interest rates underlying these swaps from the market rates in effect as of January 31, 2024 would have resulted in a change in the value of the swaps of $0.1 billion.

In certain countries, we also enter into immaterial foreign currency forward contracts to hedge the purchase and payment of purchase commitments denominated in non-functional currencies.

Investment Risk

We are exposed to investment risk primarily related to changes in the fair value of certain equity investments, including certain immaterial equity method investments where we have elected the fair value option, measured on a recurring basis. The amounts of gains and losses included in earnings from fair value changes for these investments are recorded within other gains and losses and resulted in a net loss of $3.8 billion in fiscal 2024 primarily due to net decreases in the underlying stock prices of these investments. As of January 31, 2024, the fair value of our equity investments, including certain equity method investments, measured on a recurring basis was $7.2 billion. As of January 31, 2024, a hypothetical 10% change in the stock price of such investments would have changed the fair value of such investments by approximately $0.7 billion.

<u>ITEM 8.</u> **<u>FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA</u>**

Consolidated Financial Statements of Walmart Inc.
For the Fiscal Year Ended January 31, 2024

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Walmart Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Walmart Inc. (the Company) as of January 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended January 31, 2024, and the related notes (collectively referred to as the "Consolidated Financial Statements"). In our opinion, the Consolidated Financial Statements present fairly, in all material respects, the financial position of the Company at January 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended January 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of January 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 15, 2024 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the Consolidated Financial Statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the account or disclosures to which it relates.

	Contingencies
Description of the Matter	As described in Note 10 to the Consolidated Financial Statements, at January 31, 2024, the Company is involved in a number of legal proceedings and certain regulatory matters. The Company records a liability for those legal proceedings and regulatory matters when management determines it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company also discloses when it is reasonably possible that a material loss may be incurred. In assessing the probability of occurrence and whether an estimate of loss can be reasonably estimated for a particular legal proceeding, management exercises judgment on matters relevant to each proceeding. Auditing management's accounting for, and disclosure of, loss contingencies was complex and highly judgmental as it involved our assessment of the significant judgments made by management when assessing the probability of loss for contingencies or when determining whether an estimate of the loss or range of loss could be made.

How We Addressed the Matter in Our Audit	We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the identification and evaluation of contingencies. For example, we tested controls over the Company's assessment of the likelihood of loss and the Company's determinations regarding the measurement of loss. To test the Company's assessment of the probability of loss or determination of an estimate of loss, or range of loss, among other procedures, we read the minutes of the meetings of the board of directors and committees of the board of directors, reviewed documents provided to the Company by certain outside legal counsel, read letters received directly by us from internal and outside legal counsel, evaluated the current status of contingencies based on discussions with internal and outside legal counsel, and obtained representations from management. We also assessed the adequacy of the related disclosures.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Walmart Inc.

Opinion on Internal Control Over Financial Reporting

We have audited Walmart Inc.'s internal control over financial reporting as of January 31, 2024, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Walmart Inc. (the Company) maintained, in all material respects, effective internal control over financial reporting as of January 31, 2024, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of January 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended January 31, 2024, and the related notes and our report dated March 15, 2024 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Walmart Inc.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

General

Walmart Inc. ("Walmart" or the "Company") is a people-led, technology-powered omni-channel retailer dedicated to helping people around the world save money and live better – anytime and anywhere – by providing the opportunity to shop in both retail stores and through eCommerce. Through innovation, the Company is striving to continuously improve a customer-centric experience that seamlessly integrates eCommerce and retail stores in an omni-channel offering that saves time for its customers.

The Company's operations comprise three reportable segments: Walmart U.S., Walmart International and Sam's Club.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Walmart and its subsidiaries as of and for the fiscal years ended January 31, 2024 ("fiscal 2024"), January 31, 2023 ("fiscal 2023") and January 31, 2022 ("fiscal 2022"). Intercompany accounts and transactions have been eliminated in consolidation. The Company consolidates variable interest entities where it has been determined that the Company is the primary beneficiary of those entities' operations. Investments in common stock or in-substance common stock for which the Company exercises significant influence but does not have control are accounted for under the equity method. These variable interest entities and equity method investments are immaterial to the Company's Consolidated Financial Statements.

The Company's Consolidated Financial Statements are based on a fiscal year ending on January 31 for the United States ("U.S.") and Canadian operations. The Company consolidates all other operations generally using a one-month lag and based on a calendar year. There were no significant intervening events during the month of January 2024 related to the operations consolidated using a lag that materially affected the Consolidated Financial Statements.

Use of Estimates

The Consolidated Financial Statements have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP"). Those principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities. Management's estimates and assumptions also affect the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Common Stock Split

On February 23, 2024, the Company effected a 3-for-1 forward split of its common stock and a proportionate increase in the number of authorized shares. All share and per share information, including share based compensation, throughout this Annual Report on Form 10-K has been retroactively adjusted to reflect the stock split. The shares of common stock retain a par value of $0.10 per share. Accordingly, an amount equal to the par value of the increased shares resulting from the stock split was reclassified from capital in excess of par value to common stock.

Cash and Cash Equivalents

The Company considers investments with a maturity when purchased of three months or less to be cash equivalents. All credit card, debit card and electronic transfer transactions that process in less than seven days are classified as cash and cash equivalents. The amounts due from banks for these transactions classified as cash and cash equivalents totaled $2.1 billion and $2.0 billion as of January 31, 2024 and 2023, respectively.

The Company's cash balances are held in various locations around the world. Of the Company's $9.9 billion and $8.6 billion in cash and cash equivalents as of January 31, 2024 and January 31, 2023, approximately 60% and 62% were held outside of the U.S., respectively. Cash and cash equivalents held outside of the U.S. are generally utilized to support liquidity needs in the Company's non-U.S. operations.

The Company uses intercompany financing arrangements in an effort to ensure cash can be made available in the country in which it is needed with the minimum cost possible.

As of January 31, 2024 and 2023, cash and cash equivalents of approximately $3.5 billion and $2.9 billion, respectively, may not be freely transferable to the U.S. due to local laws, other restrictions or are subject to the approval of the noncontrolling interest shareholders.

Receivables

Receivables are stated at their carrying values, net of a reserve for doubtful accounts, and are primarily due from the following: customers, which includes pharmacy insurance companies as well as advertisers, and banks for customer credit, debit cards and electronic transfer transactions that take in excess of seven days to process; suppliers for marketing or incentive programs; governments for income taxes; and real estate transactions. Net receivables from transactions with customers were $3.7 billion as of January 31, 2024 and January 31, 2023.

Inventories

The Company utilizes various inventory methods to account for and value its inventories depending upon the nature of the store formats and businesses in each of its segments, resulting in inventories that are recorded at the lower of cost or market or net realizable value, as appropriate.

- Walmart U.S. Segment - Inventories are primarily accounted for under the retail inventory method of accounting ("RIM") to determine inventory cost, using the last-in, first-out ("LIFO") valuation method. RIM generally results in inventory being valued at the lower of cost or market as permanent markdowns are immediately recorded as a reduction of the retail value of inventory.
- Walmart International Segment – Depending on the store format in each market, inventories are generally accounted for using either the RIM or weighted-average cost method, using the first-in, first-out valuation method.
- Sam's Club Segment - The majority of this segment's inventory is accounted for and valued using the weighted-average cost LIFO method.

For those segments that utilize the LIFO method, the Company records an adjustment each quarter, if necessary, for the projected annual effect of inflation or deflation. These estimates are adjusted to actual results determined at year end for inflation or deflation and inventory levels.

Property and Equipment

Property and equipment are initially recorded at cost. Gains or losses on disposition are recognized as earned or incurred. Costs of major improvements are capitalized, while costs of normal repairs and maintenance are expensed as incurred. The following table summarizes the Company's property and equipment balances and includes the estimated useful lives that are generally used to depreciate the assets on a straight-line basis:

(Dollars in millions)	**Estimated Useful Lives (in Years)**	**As of January 31, 2024**	**2023**
Land	N/A	$ 19,562	$ 19,317
Buildings and improvements	3 - 40	111,767	104,554
Fixtures and equipment	2 - 30	72,161	65,235
Transportation equipment	3 - 15	2,979	2,462
Construction in progress	N/A	13,390	10,802
Property and equipment		219,859	202,370
Accumulated depreciation		(109,049)	(101,610)
Property and equipment, net		$ 110,810	$ 100,760

Leasehold improvements are depreciated or amortized over the shorter of the estimated useful life of the asset or the remaining expected lease term. Total depreciation and amortization expense for property and equipment, property under finance leases and intangible assets for fiscal 2024, 2023 and 2022 was $11.9 billion, $10.9 billion and $10.7 billion, respectively.

Leases

For any new or modified lease, the Company, at the inception of the contract, determines whether a contract is or contains a lease. The Company records right-of-use ("ROU") assets and lease obligations for its finance and operating leases, which are initially recognized based on the discounted future lease payments over the term of the lease. If the rate implicit in the Company's leases is not readily determinable, the Company's applicable incremental borrowing rate is used in calculating the present value of the sum of the lease payments.

Lease term is defined as the non-cancelable period of the lease plus any options to extend or terminate the lease when it is reasonably certain that the Company will exercise the option. The Company has elected not to recognize ROU asset and lease obligations for its short-term leases, which are defined as leases with an initial term of 12 months or less.

For a majority of all classes of underlying assets, the Company has elected to not separate lease from non-lease components. For leases in which the lease and non-lease components have been combined, the variable lease expense includes expenses such as common area maintenance, utilities and repairs and maintenance.

Impairment of Long-Lived Assets

Management reviews long-lived assets for indicators of impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The evaluation is performed at the lowest level of identifiable cash flows, which is at the individual store or club level. Undiscounted cash flows expected to be generated by the related assets are estimated over the assets' useful lives based on updated projections. If the evaluation indicates that the carrying amount of the assets may not be recoverable, any potential impairment is measured based upon the fair value of the related asset or asset group as determined by an appropriate market appraisal or other valuation technique.

Goodwill and Other Acquired Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations and is allocated to the appropriate reporting unit when acquired. Other acquired intangible assets are stated at the fair value acquired as determined by a valuation technique commensurate with the intended use of the related asset. Goodwill and indefinite-lived intangible assets are not amortized; rather, they are evaluated for impairment annually and whenever events or changes in circumstances indicate that the value of the asset may be impaired. Definite-lived intangible assets are considered long-lived assets and are amortized on a straight-line basis over the periods that expected economic benefits will be provided.

Goodwill is typically assigned to the reporting unit which consolidates the acquisition. Components within the same reportable segment are aggregated and deemed a single reporting unit if the components have similar economic characteristics. As of January 31, 2024, the Company's reporting units consisted of Walmart U.S., Walmart International and Sam's Club. Goodwill and other indefinite-lived acquired intangible assets are evaluated for impairment using either a qualitative or quantitative approach for each of the Company's reporting units. Generally, a qualitative assessment is first performed to determine whether a quantitative goodwill impairment test is necessary. If management determines, after performing an assessment based on the qualitative factors, that the fair value of the reporting unit is more likely than not less than the carrying amount, or that a fair value of the reporting unit substantially in excess of the carrying amount cannot be assured, then a quantitative goodwill impairment test would be required. The quantitative test for goodwill impairment is performed by determining the fair value of the related reporting units. Fair value is measured based on the discounted cash flow method and relative market-based approaches. Management has performed its evaluation and determined the fair value of each reporting unit is significantly greater than the carrying amount and, accordingly, the Company has not recorded any impairment charges related to goodwill during fiscal 2024, fiscal 2023 or fiscal 2022.

The following table reflects goodwill activity, by reportable segment, for fiscal 2024 and 2023:

(Amounts in millions)	Walmart U.S.	Walmart International	Sam's Club	Total
Balances as of February 1, 2022	$ 2,941	$ 25,752	$ 321	$ 29,014
Changes in currency translation and other	—	(1,475)	—	(1,475)
Acquisitions	433	202	—	635
Balances as of January 31, 2023	3,374	24,479	321	28,174
Changes in currency translation and other	(10)	(58)	—	(68)
Acquisitions	—	7	—	7
Balances as of January 31, 2024	$ 3,364	$ 24,428	$ 321	$ 28,113

Intangible assets are recorded in other long-term assets in the Company's Consolidated Balance Sheets. As of January 31, 2024 and 2023, the Company had $4.1 billion and $4.3 billion, respectively, in indefinite-lived intangible assets which primarily consists of acquired trade names. There were no significant impairment charges related to intangible assets for fiscal 2024, 2023 or 2022.

Fair Value Measurement

The Company records and discloses certain financial and non-financial assets and liabilities at fair value. The fair value of an asset is the price at which the asset could be sold in an orderly transaction between unrelated, knowledgeable and willing parties able to engage in the transaction. The fair value of a liability is the amount that would be paid to transfer the liability to a new obligor in a transaction between such parties, not the amount that would be paid to settle the liability with the creditor. Refer to Note 8 for more information.

Investments

Investments in equity securities are recorded in other long-term assets in the Consolidated Balance Sheets. Changes in the fair value of certain equity securities, as well as certain immaterial equity method investments where the Company has elected the fair value option, are measured on a recurring basis and recognized within other gains and losses in the Consolidated Statements of Income. These fair value changes, along with certain other immaterial investment activity, resulted in net losses of $3.8 billion, $1.7 billion and $2.4 billion for fiscal 2024, 2023 and 2022, respectively, primarily due to net changes in the underlying stock prices of those investments. Refer to Note 8 for details. Equity investments without readily determinable fair values are carried at cost and adjusted for any observable price changes or impairments within other gains and losses in the Consolidated Statements of Income.

Investments in debt securities classified as trading are reported at fair value and adjustments in fair value are recorded within other gains and losses in the Consolidated Statements of Income. As of January 31, 2024 and January 31, 2023, the Company had $1.2 billion and $0.5 billion, respectively, in debt securities classified as trading.

Indemnification Liabilities

The Company has provided certain indemnifications in connection with its divestitures and has recorded indemnification liabilities equal to the estimated fair value of the obligations upon inception. As of January 31, 2024 and January 31, 2023, the Company had $0.7 billion and $0.6 billion, respectively, of certain legal indemnification liabilities recorded within deferred income taxes and other in the Consolidated Balance Sheets. The maximum of potential future payments under these indemnities was $3.2 billion, based on exchange rates as of January 31, 2024.

Supplier Financing Program Obligations

In September 2022, the FASB issued *ASU 2022-04, Liabilities - Supplier Finance Programs (Subtopic 405-50): Disclosure of Supplier Finance Program Obligations*, which enhances the transparency about the use of supplier finance programs for investors and other allocators of capital. The Company adopted this ASU as of February 1, 2023, other than the roll-forward disclosure requirement, which the Company will adopt in fiscal 2025.

The Company has supplier financing programs with financial institutions, in which the Company agrees to pay the financial institution the stated amount of confirmed invoices on the invoice due date for participating suppliers. Participation in these programs is optional and solely up to the supplier, who negotiates the terms of the arrangement directly with the financial institution and may allow early payment. Supplier participation in these programs has no bearing on the Company's amounts due. The payment terms that the Company has with participating suppliers under these programs generally range between 30 and 90 days. The Company does not have an economic interest in a supplier's participation in the program or a direct financial relationship with the financial institution funding the program. The Company is responsible for ensuring that participating financial institutions are paid according to the terms negotiated with the supplier, regardless of whether the supplier elects to receive early payment from the financial institution. The outstanding payment obligations to financial institutions under these programs were $5.3 billion and $5.2 billion, as of January 31, 2024 and January 31, 2023, respectively. These obligations are generally classified as accounts payable within the Consolidated Balance Sheets. The activity related to these programs is classified as an operating activity within the Consolidated Statements of Cash Flows.

Self Insurance Reserves

The Company self-insures a number of risks, including, but not limited to, workers' compensation, general liability, auto liability, product liability and certain employee-related healthcare benefits. Standard actuarial procedures and data analysis are used to estimate the liabilities associated with these risks on an undiscounted basis. The recorded liabilities reflect the ultimate cost for claims incurred but not paid and any estimable administrative run-out expenses related to the processing of these outstanding claim payments. On a regular basis, the liabilities are evaluated for appropriateness with claims reserve valuations. To limit exposure to some risks, the Company maintains insurance coverage with varying limits and retentions, including stop-loss insurance coverage for workers' compensation, general liability and auto liability.

Derivatives

The Company uses derivatives for hedging purposes to manage its exposure to changes in interest and currency exchange rates, as well as to maintain an appropriate mix of fixed- and variable-rate debt. Use of derivatives in hedging programs subjects the Company to certain risks, such as market and credit risks. The Company may be exposed to credit-related losses in the event of nonperformance by its counterparties to derivatives. Credit risk is monitored through established approval procedures, including setting concentration limits by counterparty, reviewing credit ratings and requiring collateral from the counterparty. The Company enters into derivatives with counterparties rated generally "A-" or better by nationally recognized credit rating agencies. The Company is subject to master netting arrangements which provides set-off and close-out netting of exposures with counterparties, but the Company does not offset derivative assets and liabilities in its Consolidated Balance Sheets. The Company's collateral arrangements require the counterparty in a net liability position in excess of pre-determined thresholds, after considering the effects of netting arrangements, to pledge cash collateral. Cash collateral received from counterparties and cash collateral provided to counterparties under these arrangements was not significant as of January 31, 2024 and 2023.

In order to qualify for hedge accounting, at the inception of the hedging relationship, the Company formally documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge. If a derivative is recorded using hedge accounting, depending on the nature of the hedge, derivative gains and losses are recorded through the same financial statement line item in earnings or are recognized in accumulated other comprehensive loss until the hedged item is recognized in earnings. Derivatives that do not meet the criteria for hedge accounting, or contracts for which the Company has not elected hedge accounting, are recorded at fair value with unrealized gains or losses reported in earnings. Derivatives with an unrealized gain are recorded in the Company's Consolidated Balance Sheets as either current or non-current assets, based on maturity date, and derivatives with an unrealized loss are recorded as either current or non-current liabilities, based on maturity date. Refer to Note 8 for the presentation of the Company's derivative assets and liabilities.

Fair Value Hedges

The Company is a party to receive fixed-rate, pay variable-rate interest rate swaps that the Company uses to hedge the fair value of fixed-rate debt. All interest rate swaps designated as fair value hedges of the related long-term debt meet the shortcut method requirements under U.S. GAAP. Accordingly, changes in the fair values of these interest rate swaps are considered to exactly offset changes in the fair value of the underlying long-term debt. These derivatives will mature on dates ranging from April 2024 to September 2031.

Cash Flow Hedges

The Company is a party to receive fixed-rate, pay fixed-rate cross currency interest rate swaps used to hedge the currency exposure associated with the forecasted payments of principal and interest of certain non-U.S. denominated debt. The Company records changes in the fair value of these swaps in accumulated other comprehensive loss which is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. These derivatives will mature on dates ranging from July 2024 to January 2039.

Net Investment Hedges

Prior to the divestiture of the Company's operations in the United Kingdom and Japan as discussed in Note 12, the Company was a party to receive fixed-rate, pay fixed-rate cross currency interest rate swaps used to hedge the currency exposure associated with net investments of these foreign operations. Changes in fair value attributable to the hedged risk were recorded in accumulated other comprehensive loss. The Company also previously designated certain foreign currency denominated long-term debt as a hedge of currency exposure associated with the net investment of these divested operations and recorded foreign currency gain or loss associated with designated long-term debt in accumulated other comprehensive loss. Upon closing of the sale of the Company's operations in the U.K. and Japan during the first quarter of fiscal 2022, these amounts were released from accumulated other comprehensive loss as discussed in Note 4.

Income Taxes

Income taxes are accounted for under the balance sheet method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases ("temporary differences"). Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rate is recognized in income in the period that includes the enactment date.

Deferred tax assets are evaluated for future realization and reduced by a valuation allowance to the extent that a portion is not more likely than not to be realized. Many factors are considered when assessing whether it is more likely than not that the deferred tax assets will be realized, including recent cumulative earnings, expectations of future taxable income, carryforward periods, and other relevant quantitative and qualitative factors. The recoverability of the deferred tax assets is evaluated by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income rely on estimates.

In determining the provision for income taxes, an annual effective income tax rate is used based on annual income, permanent differences between book and tax income, and statutory income tax rates. Discrete events such as audit settlements or changes in tax laws are recognized in the period in which they occur.

The Company records a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return. The Company records interest and penalties related to unrecognized tax benefits in interest expense and operating, selling, general and administrative expenses, respectively, in the Company's Consolidated Statements of Income. Refer to Note 9 for additional income tax disclosures.

Redeemable Noncontrolling Interest

Noncontrolling interests that are redeemable outside the Company's control at fixed or determinable prices and dates are presented as temporary equity in the Consolidated Balance Sheets. Redeemable noncontrolling interests are recorded at the greater of the redemption fair value or the carrying value of the noncontrolling interest and adjusted each reporting period for income, loss and any distributions made. Remeasurements to the redemption value of the redeemable noncontrolling interest are recognized in capital in excess of par. As of January 31, 2024, the Company has a redeemable noncontrolling interest related to an acquisition in the Walmart U.S. segment as the minority interest owner holds a put option which may require the Company to purchase its interest beginning in December 2027, with annual options thereafter.

Revenue Recognition

Net Sales

The Company recognizes sales revenue, net of sales taxes and estimated sales returns, at the time it sells merchandise or services to the customer. eCommerce sales include shipping revenue and are recorded upon delivery to the customer. Estimated sales returns are calculated based on expected returns.

Membership Fee Revenue

The Company recognizes membership fee revenue over the term of the membership, which is typically 12 months. Membership fee revenue was $3.1 billion for fiscal 2024, $2.6 billion for fiscal 2023 and $2.2 billion for fiscal 2022. Membership fee revenue is included in membership and other income in the Company's Consolidated Statements of Income. Deferred membership fee revenue is included in accrued liabilities in the Company's Consolidated Balance Sheets.

Gift Cards

Customer purchases of gift cards are not recognized as sales until the card is redeemed and the customer purchases merchandise using the gift card. Gift cards in the U.S. and some countries do not carry an expiration date; therefore, customers and members can redeem their gift cards for merchandise and services indefinitely. Gift cards in some countries where the Company does business have expiration dates. While gift cards are generally redeemed within 12 months, a certain number of gift cards, both with and without expiration dates, will not be fully redeemed. Management estimates unredeemed balances and recognizes revenue for these amounts in membership and other income in the Company's Consolidated Statements of Income over the expected redemption period.

Financial, Advertising and Other Services

The Company recognizes revenue from service transactions at the time the service is performed. Generally, revenue from services is classified as a component of net sales in the Company's Consolidated Statements of Income.

Cost of Sales

Cost of sales includes actual product cost, the cost of transportation to the Company's distribution facilities, stores and clubs from suppliers, the cost of transportation from the Company's distribution facilities to the stores, clubs and customers and the cost of warehousing for the Sam's Club segment and import distribution centers. Cost of sales is reduced by supplier payments that are not a reimbursement of specific, incremental and identifiable costs.

Payments from Suppliers

The Company receives consideration from suppliers for various programs, primarily volume incentives, warehouse allowances and reimbursements for specific programs such as markdowns, margin protection, certain advertising arrangements and supplier-specific fixtures. Payments from suppliers are accounted for as a reduction of cost of sales and recognized in the Company's Consolidated Statements of Income when the related inventory is sold, except in certain limited situations when the payment is a reimbursement of specific, incremental and identifiable costs.

Operating, Selling, General and Administrative Expenses

Operating, selling, general and administrative expenses include all operating costs of the Company, except cost of sales, as described above. As a result, the majority of the cost of warehousing and occupancy for the Walmart U.S. and Walmart International segments' distribution facilities is included in operating, selling, general and administrative expenses. Because the Company only includes a portion of the cost of its Walmart U.S. and Walmart International segments' distribution facilities in cost of sales, its gross profit and gross profit as a percentage of net sales may not be comparable to those of other retailers that may include all costs related to their distribution facilities in cost of sales and in the calculation of gross profit.

Advertising Costs

Advertising costs are expensed as incurred, and consist primarily of digital, television and print advertisements that are recorded in operating, selling, general and administrative expenses in the Company's Consolidated Statements of Income. Advertising costs were $4.4 billion, $4.1 billion and $3.9 billion for fiscal 2024, 2023 and 2022, respectively.

Currency Translation

The assets and liabilities of all international subsidiaries are translated from the respective local currency to the U.S. dollar using exchange rates at the balance sheet date. Related translation adjustments are recorded as a component of accumulated other comprehensive loss. The Company's Consolidated Statements of Income of all international subsidiaries are translated from the respective local currencies to the U.S. dollar using average exchange rates for the period covered by the income statements.

Recent Accounting Pronouncements

In November 2023, the FASB issued ASU 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures*, which updates reportable segment disclosure requirements primarily through enhanced disclosures about significant segment expenses. The amendments are effective for fiscal years beginning after December 15, 2023, and for interim periods within fiscal years beginning after December 15, 2024. Early adoption is permitted. The amendments should be applied retrospectively to all prior periods presented in the financial statements. Management is currently evaluating this ASU to determine its impact on the Company's disclosures.

In December 2023, the FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*, which expands the requirements for income tax disclosures in order to provide greater transparency. The amendments are effective for fiscal years beginning after December 15, 2024. Early adoption is permitted. The amendments should be applied prospectively. Management is currently evaluating this ASU to determine its impact on the Company's disclosures.

Note 2. Net Income Per Common Share

Basic net income per common share attributable to Walmart is based on the weighted-average common shares outstanding during the relevant period. Diluted net income per common share attributable to Walmart is based on the weighted-average common shares outstanding during the relevant period adjusted for the dilutive effect of share-based awards. The Company did not have significant share-based awards outstanding that were antidilutive and not included in the calculation of diluted net income per common share attributable to Walmart for fiscal 2024, 2023 and 2022.

The following table provides a reconciliation of the numerators and denominators used to determine basic and diluted net income per common share attributable to Walmart:

	Fiscal Years Ended January 31,		
(Amounts in millions, except per share data)	**2024**	**2023**	**2022**
Numerator			
Consolidated net income	$ 16,270	$ 11,292	$ 13,940
Consolidated net (income) loss attributable to noncontrolling interest	(759)	388	(267)
Consolidated net income attributable to Walmart	$ 15,511	$ 11,680	$ 13,673
Denominator			
Weighted-average common shares outstanding, basic	8,077	8,171	8,376
Dilutive impact of stock options and other share-based awards	31	31	39
Weighted-average common shares outstanding, diluted	8,108	8,202	8,415
Net income per common share attributable to Walmart			
Basic	$ 1.92	$ 1.43	$ 1.63
Diluted	1.91	1.42	1.62

Note 3. Shareholders' Equity

The total authorized shares of $0.10 par value common stock is 33.0 billion, of which 8.1 billion were issued and outstanding as of January 31, 2024 and 2023. The total authorized shares of $0.10 par value preferred stock is 0.1 billion; none of which were issued or outstanding for any period presented.

Purchases and Sales of Subsidiary Stock

During fiscal 2024, the Company paid $3.5 billion to acquire shares from certain Flipkart noncontrolling interest holders and settle the liability to former noncontrolling interest holders of PhonePe. The Company's ownership of Flipkart increased from approximately 75% as of January 31, 2023 to approximately 85% as of January 31, 2024.

Also during fiscal 2024, the Company received $0.7 billion related to new rounds of equity funding for the Company's majority owned PhonePe subsidiary, which decreased the Company's ownership from approximately 89% as of January 31, 2023 to approximately 84% as of January 31, 2024.

During fiscal 2023, the Company completed a $0.4 billion buyout of the noncontrolling interest shareholders of the Company's Massmart subsidiary. This transaction increased the Company's ownership in Massmart from approximately 53% to 100%. Additionally, the Company completed a $0.4 billion acquisition of Alert Innovation, which was previously consolidated as a variable interest entity, and resulted in the Company becoming a 100% owner.

Also during fiscal 2023, the Company increased its ownership in PhonePe from approximately 76% to approximately 89% as part of the separation from the Company's majority-owned Flipkart subsidiary. In consideration for the transaction, the Company initially recorded a liability to noncontrolling interest holders of $0.9 billion within accrued liabilities in the Company's Consolidated Balance Sheet as of January 31, 2023, which was paid during fiscal 2024.

During fiscal 2022, the Company received $3.2 billion primarily related to a new equity funding for the Company's majority-owned Flipkart subsidiary, which reduced the Company's ownership from approximately 83% as of January 31, 2021 to approximately 75% as of January 31, 2022.

Share-Based Compensation

The Company has awarded share-based compensation to associates and nonemployee directors of the Company. The compensation expense recognized for all stock incentive plans, including expense associated with plans of the Company's consolidated subsidiaries granted in the subsidiaries' respective stock, was $2.1 billion, $1.6 billion and $1.2 billion for fiscal 2024, 2023 and 2022, respectively. Share-based compensation expense is generally included in operating, selling, general and administrative expenses in the Company's Consolidated Statements of Income. The total income tax benefit recognized for share-based compensation was $0.5 billion, $0.4 billion and $0.3 billion for fiscal 2024, 2023 and 2022, respectively. The following table summarizes the Company's share-based compensation expense by award type for all plans:

	Fiscal Years Ended January 31,		
(Amounts in millions)	**2024**	**2023**	**2022**
Restricted stock units	$ 1,258	$ 927	$ 659
Restricted stock and performance-based restricted stock units	609	444	321
Other	226	207	183
Share-based compensation expense	$ 2,093	$ 1,578	$ 1,163

The Walmart Inc. Stock Incentive Plan of 2015 (the "Plan"), as subsequently amended and restated, was established to grant stock options, restricted (non-vested) stock, restricted stock units, performance share units and other equity compensation awards for which 780 million shares of Walmart common stock issued or to be issued under the Plan have been registered under the Securities Act of 1933. The Company believes that such awards serve to align the interests of its associates with those of its shareholders.

The Plan's award types are summarized as follows:

- *Restricted Stock Units.* Restricted stock units provide rights to Company stock after a specified service period. Beginning in fiscal 2023, restricted stock units generally vest at a rate of approximately 8% each quarter over a three year period from the date of grant. For grants made from fiscal 2020 through fiscal 2022, restricted stock units generally vest at a rate of 25% each year over a four year period from the date of the grant. Prior to fiscal 2020, 50% of restricted stock units generally vested three years from the grant date and the remaining 50% were vested five years from the grant date. The fair value of each restricted stock unit is determined on the date of grant using the stock price discounted for the expected dividend yield through the vesting period and is recognized ratably over the vesting period. The expected dividend yield is based on the anticipated dividends over the vesting period. The weighted-average discount for the dividend yield used to determine the fair value of restricted stock units granted in fiscal 2024, 2023 and 2022 was 2.2%, 2.3% and 3.8%, respectively.

- *Restricted Stock and Performance-based Restricted Stock Units.* Restricted stock awards are for shares that vest based on the passage of time and include restrictions related to employment. Performance-based restricted stock units vest based on the passage of time and achievement of performance criteria and generally range from 0% to 150% of the original award amount. Vesting periods for restricted stock are generally between one month and three years. Vesting periods for performance-based restricted stock units are generally between one and three years. Restricted stock and performance-based restricted stock units may be settled or deferred in stock and are accounted for as equity in the Company's Consolidated Balance Sheets. The fair value of restricted stock awards is determined on the date of grant and is expensed ratably over the vesting period. The fair value of performance-based restricted stock units is determined on the date of grant using the Company's stock price discounted for the expected dividend yield through the vesting period and is recognized over the vesting period. The weighted-average discount for the dividend yield used to determine the fair value of performance-based restricted stock units in fiscal 2024, 2023 and 2022 was 3.3%, 3.3% and 4.2%, respectively.

In addition to the Plan, Flipkart and PhonePe have share-based compensation plans for associates under which options to acquire their own common shares may be issued. These plans may be subject to performance or other conditions, including vesting upon an initial public offering. Share-based compensation expense associated with certain of these plans is included in the Other line in the table above.

The following table shows the activity for restricted stock units and restricted stock and performance-based restricted stock units during fiscal 2024:

	Restricted Stock Units		**Restricted Stock and Performance-based Restricted Stock Units**	
(Shares in thousands)	**Shares**	**Weighted-Average Grant-Date Fair Value Per Share**	**Shares**	**Weighted-Average Grant-Date Fair Value Per Share**
Outstanding as of February 1, 2023	48,660	$ 42.67	21,480	$ 46.29
Granted	35,751	48.37	12,999	49.07
Adjustment for performance achievement[1]	—	—	1,713	47.27
Vested/exercised	(31,794)	42.29	(10,383)	45.85
Forfeited	(3,426)	46.47	(2,706)	46.51
Outstanding as of January 31, 2024	49,191	$ 46.79	23,103	$ 48.09

[1] Represents the adjustment to previously granted performance share units for performance achievement.

The following table includes additional information related to restricted stock units and restricted stock and performance-based restricted stock units:

	Fiscal Years Ended January 31,		
(Amounts in millions, except years)	**2024**	**2023**	**2022**
Fair value of restricted stock units vested	$ 1,345	$ 931	$ 703
Fair value of restricted stock and performance-based restricted stock units vested	477	390	264
Unrecognized compensation cost for restricted stock units	1,686	1,323	1,102
Unrecognized compensation cost for restricted stock and performance-based restricted stock units	656	548	417
Weighted average remaining period to expense for restricted stock units (years)	0.9	1.0	1.2
Weighted average remaining period to expense for restricted stock and performance-based restricted stock units (years)	1.3	1.4	1.5

Share Repurchase Program

From time to time, the Company repurchases shares of its common stock under share repurchase programs authorized by the Company's Board of Directors. All repurchases made during fiscal 2024 were made under the current $20.0 billion share repurchase program approved in November 2022, which has no expiration date or other restrictions limiting the period over which the Company can make repurchases. As of January 31, 2024 authorization for $16.5 billion of share repurchases remained under the share repurchase program. Any repurchased shares are constructively retired and returned to an unissued status.

The Company regularly reviews share repurchase activity and considers several factors in determining when to execute share repurchases, including, among other things, current cash needs, capacity for leverage, cost of borrowings, results of operations and the market price of the Company's common stock. The following table provides, on a settlement date basis, the number of shares repurchased, average price paid per share and total amount paid for share repurchases for fiscal 2024, 2023 and 2022:

	Fiscal Years Ended January 31,		
(Amounts in millions, except per share data)	2024	2023	2022
Total number of shares repurchased	54.6	221.8	209.1
Average price paid per share	$ 50.87	$ 44.72	$ 46.82
Total cash paid for share repurchases	$ 2,779	$ 9,920	$ 9,787

Note 4. Accumulated Other Comprehensive Loss

The following table provides the changes in the composition of total accumulated other comprehensive loss for fiscal 2024, 2023 and 2022:

(Amounts in millions and net of immaterial income taxes)	Currency Translation and Other	Net Investment Hedges	Cash Flow Hedges	Minimum Pension Liability	Total
Balances as of February 1, 2021	$ (10,772)	$ 1,296	$ (304)	$ (1,986)	$ (11,766)
Other comprehensive loss before reclassifications, net	(586)	(7)	(540)	—	(1,133)

Other comprehensive income (loss) before reclassifications, net	333	—	(8)	(11)	314
Reclassifications to income, net	—	—	64	—	64
Balances as of January 31, 2024	$ (10,483)	$ 94	$ (895)	$ (18)	$ (11,302)

[1] Upon closing of the sale of the Company's operations in the U.K. and Japan during the first quarter of fiscal 2022, these amounts were released from accumulated other comprehensive loss, the majority of which was considered in the impairment evaluation when the individual disposal groups met the held for sale classification in fiscal 2021.
[2] Upon closing of the noncontrolling interest shareholder buyout of the Company's Massmart subsidiary during the fourth quarter of fiscal 2023, the cumulative amount of currency translation was reallocated from the Company's noncontrolling interest back to the Company. Refer to Note 3.

Amounts reclassified from accumulated other comprehensive loss for derivative instruments are generally recorded in interest, net, in the Company's Consolidated Statements of Income. The amounts for the minimum pension liability, as well as the cumulative translation resulting from the disposition of a business, are recorded in other gains and losses in the Company's Consolidated Statements of Income. Amounts related to the Company's derivatives expected to be reclassified from accumulated other comprehensive loss to net income during the next 12 months are not significant.

Note 5. Accrued Liabilities

The Company's accrued liabilities consist of the following as of January 31, 2024 and 2023:

	January 31,	
(Amounts in millions)	2024	2023
Accrued wages and benefits[1]	8,590	8,287
Self-insurance[2]	4,916	4,724
Accrued non-income taxes[3]	3,459	3,425
Opioid litigation settlement[4]	—	2,949
Deferred gift card revenue	2,664	2,488
Other[5]	9,130	9,253
Total accrued liabilities	$ 28,759	$ 31,126

(1) Accrued wages and benefits include accrued wages, salaries, vacation, bonuses and other incentive plans.
(2) Self-insurance consists of insurance-related liabilities, such as workers' compensation, general liability, auto liability, product liability and certain employee-related healthcare benefits.
(3) Accrued non-income taxes include accrued payroll, property, value-added, sales and miscellaneous other taxes.
(4) Represents the remaining balance for the opioids litigation settlement (substantially all of the balance outstanding at the end of fiscal 2023 was paid in fiscal 2024, see Note 10.)
(5) Other accrued liabilities includes items such as deferred membership revenue, interest, the purchase of PhonePe stock (see Note 3), supply chain, advertising, and maintenance & utilities.

Note 6. Short-term Borrowings and Long-term Debt

Short-term borrowings consist of commercial paper and lines of credit. Short-term borrowings as of January 31, 2024 and 2023 were $0.9 billion and $0.4 billion, respectively, with weighted-average interest rates of 7.7% and 6.6%, respectively.

The Company has various committed lines of credit in the U.S. to support its commercial paper program and are summarized in the following table:

	January 31, 2024			January 31, 2023		
(Amounts in millions)	Available	Drawn	Undrawn	Available	Drawn	Undrawn
Five-year credit facility[1]	$ 5,000	$ —	$ 5,000	$ 5,000	$ —	$ 5,000
364-day revolving credit facility[1]	10,000	—	10,000	10,000	—	10,000
Total	$ 15,000	$ —	$ 15,000	$ 15,000	$ —	$ 15,000

(1) In April 2023, the Company renewed and extended its existing 364-day revolving credit facility as well as its five year credit facility.

The committed lines of credit in the table above mature in April 2024 and April 2028, carry interest rates of the Secured Overnight Financing Rate plus 55 basis points, and incur commitment fees ranging between 1.5 and 4.0 basis points. In conjunction with the committed lines of credit listed in the table above, the Company has agreed to observe certain covenants, the most restrictive of which relates to the maximum amount of secured debt. Additionally, the Company has syndicated and fronted letters of credit available which totaled $2.1 billion as of January 31, 2024 and 2023, of which $1.7 billion and $1.8 billion was drawn as of January 31, 2024 and 2023, respectively.

The Company's long-term debt, which includes the fair value instruments further discussed in Note 8, consists of the following as of January 31, 2024 and 2023:

	January 31, 2024			January 31, 2023	
(Amounts in millions)	Maturity Dates By Fiscal Year	Amount	Average Rate[1]	Amount	Average Rate[1]
Unsecured debt					
Fixed	2025 - 2054	$ 34,527	3.7%	$ 33,707	3.6%
Total U.S. dollar denominated		34,527		33,707	
Fixed	2027 - 2030	1,789	4.0%	1,790	4.0%
Total Euro denominated		1,789		1,790	
Fixed	2031 - 2039	3,412	5.4%	3,318	5.4%
Total Sterling denominated		3,412		3,318	
Fixed	2025 - 2028	677	0.4%	767	0.4%
Total Yen denominated		677		767	
Total unsecured debt		40,405		39,582	
Total other[2]		(826)		(742)	
Total debt		39,579		38,840	
Less amounts due within one year		(3,447)		(4,191)	
Long-term debt		$ 36,132		$ 34,649	

(1) The average rate represents the weighted-average stated rate for each corresponding debt category, based on year-end balances and year-end interest rates.
(2) Includes deferred loan costs, discounts, fair value hedges, foreign-held debt and secured debt.

Annual maturities of long-term debt during the next five years and thereafter are as follows:

(Amounts in millions) Fiscal Year	Annual Maturities
2025	$ 3,447
2026	2,600
2027	3,483
2028	1,760
2029	3,458
Thereafter	24,831
Total	$ 39,579

Debt Issuances

Information on significant long-term debt issued during fiscal 2024 and 2023, for general corporate purposes, is as follows:

(Amounts in millions)

Issue Date	Principal Amount	Maturity Date	Fixed vs. Floating	Interest Rate	Net Proceeds
April 18, 2023	$750	April 15, 2026	Fixed	4.000%	$ 748
April 18, 2023	$750	April 15, 2028	Fixed	3.900%	746
April 18, 2023	$500	April 15, 2030	Fixed	4.000%	497
April 18, 2023	$1,500	April 15, 2033	Fixed	4.100%	1,491
April 18, 2023	$1,500	April 15, 2053	Fixed	4.500%	1,485
Total					$ 4,967

(Amounts in millions)

Issue Date	Principal Amount	Maturity Date	Fixed vs. Floating	Interest Rate	Net Proceeds
September 9, 2022	$1,750	September 9, 2025	Fixed	3.900%	$ 1,744
September 9, 2022	$1,000	September 9, 2027	Fixed	3.950%	994
September 9, 2022	$1,250	September 9, 2032	Fixed	4.150%	1,239
September 9, 2022	$1,000	September 9, 2052	Fixed	4.500%	992
Total					$ 4,969

These issuances are senior, unsecured notes which rank equally with all other senior, unsecured debt obligations of the Company, and are not convertible or exchangeable. These issuances do not contain any financial covenants which restrict the Company's ability to pay dividends or repurchase Company stock. Additionally, the Company received immaterial proceeds from debt issuances by certain international markets during fiscal 2023.

Maturities and Extinguishments

The following tables provide details of significant long-term debt repayments during fiscal 2024 and 2023:

(Amounts in millions)

Maturity Date	Principal Amount	Fixed vs. Floating	Interest Rate	Repayment
April 11, 2023	$1,750	Fixed	2.550%	$ 1,750
June 26, 2023	$2,280	Fixed	3.400%	2,280
Total repayment of matured debt				$ 4,030

(Amounts in millions)

Maturity Date	Principal Amount	Fixed vs. Floating	Interest Rate	Repayment
April 8, 2022	€850	Fixed	1.900%	$ 927
July 15, 2022	¥70,000	Fixed	0.183%	512
December 15, 2022	$1,250	Fixed	2.350%	1,250
Total repayment of matured debt				$ 2,689

Note 7. Leases

The Company leases certain retail locations, distribution and fulfillment centers, warehouses, office spaces, land and equipment throughout the U.S. and internationally. The Company's lease costs recognized in the Consolidated Statements of Income consist of the following:

	Fiscal years ended January 31,		
(Amounts in millions)	2024	2023	2022
Operating lease cost	$ 2,277	$ 2,306	$ 2,274
Finance lease cost:			
Amortization of right-of-use assets	755	596	565
Interest on lease obligations	326	256	232
Variable lease cost	1,082	899	823

Other lease information is as follows:

(Amounts in millions)	Fiscal years ended January 31, 2024	2023	2022
Cash paid for amounts included in measurement of lease obligations:			
Operating cash flows from operating leases	$ 2,273	2,280	2,234
Operating cash flows from finance leases	315	248	225
Financing cash flows from finance leases	1,055	563	538
Assets obtained in exchange for operating lease obligations	1,514	1,714	1,816
Assets obtained in exchange for finance lease obligations	1,572	1,226	1,044

	As of January 31, 2024	2023
Weighted-average remaining lease term - operating leases	11.7 years	12.0 years
Weighted-average remaining lease term - finance leases	12.4 years	13.3 years
Weighted-average discount rate - operating leases	6.4%	6.0%
Weighted-average discount rate - finance leases	6.8%	6.5%

The aggregate annual lease obligations at January 31, 2024, are as follows:

(Amounts in millions) Fiscal Year	Operating Leases	Finance Leases
2025	$ 2,181	$ 1,071
2026	2,107	1,000
2027	1,970	926
2028	1,815	823
2029	1,645	636
Thereafter	11,295	5,850
Total undiscounted lease obligations	21,013	10,306
Less imputed interest	(6,583)	(3,872)
Net lease obligations	$ 14,430	$ 6,434

Note 8. Fair Value Measurements

Assets and liabilities recorded at fair value are measured using the fair value hierarchy, which prioritizes the inputs used in measuring fair value. The levels of the fair value hierarchy are:

- Level 1: observable inputs such as quoted prices in active markets;
- Level 2: inputs other than quoted prices in active markets that are either directly or indirectly observable; and
- Level 3: unobservable inputs for which little or no market data exists, therefore requiring the Company to develop its own assumptions.

As described in Note 1, the Company measures the fair value of certain equity investments, including certain immaterial equity method investments where the Company has elected the fair value option, on a recurring basis within other long-term assets in the accompanying Consolidated Balance Sheets. The amounts of gains and losses included in earnings from fair value changes for these investments are recognized within other gains and losses in the Consolidated Statements of Income. The fair value of these investments is as follows:

(Amounts in millions)	Fair Value as of January 31, 2024	Fair Value as of January 31, 2023
Equity investments measured using Level 1 inputs	$ 2,835	$ 5,099
Equity investments measured using Level 2 inputs	4,414	5,570
Total	$ 7,249	$ 10,669

Changes in the fair value of these investments were primarily due to gains and losses resulting from net changes in the underlying stock prices, along with certain other immaterial investment activity. The fair value of these investments decreased $3.4 billion and $1.2 billion during fiscal 2024 and 2023, respectively. Equity investments without readily determinable fair values are carried at cost and adjusted for any observable price changes or impairments within other gains and losses in the Consolidated Statements of Income.

Derivatives

The Company also has derivatives recorded at fair value. Derivative fair values are the estimated amounts the Company would receive or pay upon termination of the related derivative agreements as of the reporting dates. The fair values have been measured using the income approach and Level 2 inputs, which include the relevant interest rate and foreign currency forward curves. As of January 31, 2024 and January 31, 2023, the notional amounts and fair values of these derivatives were as follows:

	January 31, 2024		January 31, 2023	
(Amounts in millions)	Notional Amount	Fair Value	Notional Amount	Fair Value
Receive fixed-rate, pay variable-rate interest rate swaps designated as fair value hedges	$ 6,271	$ (654) [1]	$ 8,021	$ (689) [1]
Receive fixed-rate, pay fixed-rate cross-currency swaps designated as cash flow hedges	5,879	(1,302) [1]	5,900	(1,423) [1]
Total	$ 12,150	$ (1,956)	$ 13,921	$ (2,112)

(1) Primarily classified in deferred income taxes and other in the Company's Consolidated Balance Sheets.

Nonrecurring Fair Value Measurements

In addition to assets and liabilities that are recorded at fair value on a recurring basis, the Company's assets and liabilities are also subject to nonrecurring fair value measurements. Generally, assets are recorded at fair value on a nonrecurring basis as a result of impairment charges.

Upon completing the sales of the Company's operations in the U.K. in February 2021 and Japan in March 2021, the Company recorded incremental non-recurring impairment charges of $0.4 billion in the first quarter of fiscal 2022 within other gains and losses in the Consolidated Statements of Income. Refer to Note 12. The Company did not have any material assets or liabilities resulting in nonrecurring fair value measurements as of January 31, 2024 and January 31, 2023.

Other Fair Value Disclosures

The Company records cash and cash equivalents, restricted cash and short-term borrowings at cost. The carrying values of these instruments approximate their fair value due to their short-term maturities.

The Company's long-term debt is also recorded at cost. The fair value is estimated using Level 2 inputs based on the Company's current incremental borrowing rate for similar types of borrowing arrangements. The carrying value and fair value of the Company's long-term debt as of January 31, 2024 and 2023, are as follows:

	January 31, 2024		January 31, 2023	
(Amounts in millions)	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt, including amounts due within one year	$ 39,579	$ 38,431	$ 38,840	$ 38,169

Note 9. Taxes

The components of income before income taxes are as follows:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
U.S.	$ 20,092	$ 15,089	$ 15,536
Non-U.S.	1,756	1,927	3,160
Total income before income taxes	$ 21,848	$ 17,016	$ 18,696

A summary of the provision for income taxes is as follows:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Current:			
U.S. federal	$ 3,215	$ 2,030	$ 3,313
U.S. state and local	762	610	649
International	1,772	2,654	1,553
Total current tax provision	5,749	5,294	5,515
Deferred:			
U.S. federal	(438)	608	(671)
U.S. state and local	141	119	41
International	126	(297)	(129)
Total deferred tax expense (benefit)	(171)	430	(759)
Total provision for income taxes	$ 5,578	$ 5,724	$ 4,756

Effective Income Tax Rate Reconciliation

A reconciliation of the significant differences between the U.S. statutory tax rate and the effective income tax rate on pre-tax income from continuing operations is as follows:

	Fiscal Years Ended January 31,		
	2024	2023	2022
U.S. statutory tax rate	21.0 %	21.0 %	21.0 %
U.S. state income taxes, net of federal income tax benefit	3.0 %	3.1 %	2.8 %
Income taxed outside the U.S.	0.1 %	1.1 %	(1.5)%
Separation, disposal and wind-down of certain business operations	— %	6.3 %	0.5 %
Valuation allowance	1.2 %	1.7 %	4.4 %
Net impact of repatriated international earnings	(0.4)%	(0.4)%	(0.3)%
Federal tax credits	(1.5)%	(1.3)%	(1.1)%
Change in unrecognized tax benefits	0.6 %	0.3 %	0.2 %
Other, net	1.5 %	1.8 %	(0.6)%
Effective income tax rate	25.5 %	33.6 %	25.4 %

The following sections regarding deferred taxes, unremitted earnings, net operating losses, tax credit carryforwards, valuation allowances and uncertain tax positions exclude amounts related to operations classified as held for sale.

Deferred Taxes

The significant components of the Company's deferred tax account balances are as follows:

	January 31,	
(Amounts in millions)	2024	2023
Deferred tax assets:		
Loss and tax credit carryforwards	$ 7,136	$ 7,690
Accrued liabilities	3,066	3,312
Share-based compensation	238	237
Lease obligations	4,831	4,653
Other	1,124	839
Total deferred tax assets	16,395	16,731
Valuation allowances	(7,485)	(7,815)
Deferred tax assets, net of valuation allowances	8,910	8,916
Deferred tax liabilities:		
Property and equipment	4,813	4,352
Acquired intangibles	898	932
Inventory	3,035	3,032
Lease right of use assets	4,941	4,727
Mark-to-market investments	322	1,390
Other	486	249
Total deferred tax liabilities	14,495	14,682
Net deferred tax liabilities	$ 5,585	$ 5,766

The deferred taxes noted above are classified as follows in the Company's Consolidated Balance Sheets:

(Amounts in millions)	January 31, 2024	January 31, 2023
Balance Sheet classification		
Assets:		
Other long-term assets	$ 1,663	$ 1,503
Liabilities:		
Deferred income taxes and other	7,248	7,269
Net deferred tax liabilities	$ 5,585	$ 5,766

Unremitted Earnings

Prior to the Tax Cuts and Jobs Act of 2017 (the "Tax Act"), the Company asserted that all unremitted earnings of its foreign subsidiaries were considered indefinitely reinvested. As a result of the Tax Act, the Company reported and paid U.S. tax on the majority of its previously unremitted foreign earnings, and repatriations of foreign earnings will generally be free of U.S. federal tax, but may incur other taxes such as withholding or state taxes. As of January 31, 2024, the Company has not recorded approximately $1 billion of deferred tax liabilities associated with remaining unremitted foreign earnings considered indefinitely reinvested, for which U.S. and foreign income and withholding taxes would be due upon repatriation.

Net Operating Losses, Tax Credit Carryforwards and Valuation Allowances

As of January 31, 2024, the Company's net operating loss and capital loss carryforwards totaled approximately $30.3 billion. Of these carryforwards, approximately $16.5 billion will expire, if not utilized, in various years through 2044. The remaining carryforwards have no expiration.

The realizability of these future tax deductions and credits is evaluated by assessing the adequacy of future expected taxable income from all sources, including taxable income in prior carryback years, reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. To the extent the Company does not consider it more likely than not that a deferred tax asset will be recovered, a valuation allowance is generally established. To the extent that a valuation allowance was established and it is subsequently determined that it is more likely than not that the deferred tax assets will be recovered, the change in the valuation allowance is recognized in the Consolidated Statements of Income.

The Company had valuation allowances of approximately $7.5 billion and $7.8 billion as of January 31, 2024 and 2023, respectively, on deferred tax assets associated primarily with the net operating loss carryforwards. Activity in the valuation allowance during fiscal 2024 related to valuation allowance builds in multiple markets, as well as releases due to the expiration of unrealized deferred tax assets.

Uncertain Tax Positions

The benefits of uncertain tax positions are recorded in the Company's Consolidated Financial Statements only after determining a more-likely-than-not probability that the uncertain tax positions will withstand challenge, if any, from taxing authorities.

As of January 31, 2024 and 2023, the amount of gross unrecognized tax benefits related to continuing operations was $3.5 billion and $3.3 billion, respectively. The amount of unrecognized tax benefits that would affect the Company's effective income tax rate was $1.7 billion and $1.5 billion as of January 31, 2024 and 2023, respectively.

A reconciliation of gross unrecognized tax benefits from continuing operations is as follows:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Gross unrecognized tax benefits, beginning of year	$ 3,307	$ 3,245	$ 3,135
Increases related to prior year tax positions	336	79	170
Decreases related to prior year tax positions	(74)	(248)	(97)
Increases related to current year tax positions	102	357	75
Settlements during the period	(102)	(89)	(5)
Lapse in statutes of limitations	(29)	(37)	(33)
Gross unrecognized tax benefits, end of year	$ 3,540	$ 3,307	$ 3,245

The Company classifies interest and penalties related to uncertain tax benefits as interest expense and as operating, selling, general and administrative expenses, respectively. Interest expense and penalties related to these positions were immaterial for fiscal 2024, 2023 and 2022. During the next twelve months, it is reasonably possible that tax audit resolutions could reduce unrecognized tax benefits by an immaterial amount, either because the tax positions are sustained on audit or because the Company agrees to their disallowance. The Company does not expect any change to have a material impact to its Consolidated Financial Statements.

The Company remains subject to income tax examinations for its U.S. federal income taxes generally for fiscal 2018 through 2023. The Company also remains subject to income tax examinations for international income taxes for fiscal 2013 through 2023, and for U.S. state and local income taxes generally for the fiscal years ended 2017 through 2023. With few exceptions, the Company is no longer subject to U.S. federal, state, local or foreign examinations by tax authorities for years before fiscal 2013.

Other Taxes

The Company is subject to tax examinations for value added, sales-based, payroll and other non-income taxes. A number of these examinations are ongoing in various jurisdictions. In certain cases, the Company has received assessments and judgments from the respective taxing authorities in connection with these examinations. Unless otherwise indicated, the possible losses or range of possible losses associated with these matters are individually immaterial, but a group of related matters, if decided adversely to the Company, could result in a liability material to the Company's Consolidated Financial Statements.

Note 10. Contingencies

Legal Proceedings

The Company is involved in a number of legal proceedings and certain regulatory matters. The Company records a liability for those legal proceedings and regulatory matters when it determines it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company also discloses when it is reasonably possible that a material loss may be incurred. From time to time, the Company may enter into discussions regarding settlement of these matters, and may enter into settlement agreements, if it believes settlement is in the best interest of the Company and its shareholders.

Unless stated otherwise, the matters discussed below, if decided adversely to or settled by the Company, individually or in the aggregate, may result in a liability material to the Company's financial position, results of operations or cash flows.

Settlement Framework Regarding Multidistrict and State or Local Opioid-Related Litigation

During fiscal 2023, the Company accrued a liability for approximately $3.3 billion for the Settlement Framework (described below) and other previously agreed upon state and tribal settlements. The Settlement Framework includes no admission of wrongdoing or liability by the Company, and the Company continues to believe it has substantial factual and legal defenses to opioids-related litigation. As of January 31, 2024, substantially all of the original approximately $3.3 billion accrued liability for the Settlement Framework and other settlements have been paid.

In December 2017, the United States Judicial Panel on Multidistrict Litigation consolidated numerous lawsuits filed against a wide array of defendants by various plaintiffs, including counties, cities, healthcare providers, Native American tribes, individuals and third-party payers, asserting claims generally concerning the impacts of widespread opioid abuse. The consolidated multidistrict litigation is entitled In re National Prescription Opiate Litigation (MDL No. 2804) (the "MDL") and is pending in the U.S. District Court for the Northern District of Ohio. The Company is named as a defendant in some of the cases included in the MDL.

On November 15, 2022, the Company announced it had agreed to financial amounts and payment terms to resolve substantially all opioids-related lawsuits filed against the Company by states, political subdivisions, and Native American tribes whether as part of the MDL (excluding, however, a single, two-county trial described further below) or in state court, as well as all potential claims that could be made against the Company by states, political subdivisions, and Native American tribes for up to approximately $3.1 billion (the "Settlement Amount"). The Settlement Amount includes amounts for remediation of alleged harms as well as attorneys' fees and costs and also includes some, but not all, amounts from previously agreed recent settlements by the Company. One settlement framework with corresponding conditions and participation thresholds applies for the states and political subdivisions, and another settlement framework with corresponding conditions and participation thresholds applies for the Native American tribes. Both settlement frameworks are referred to collectively as the "Settlement Framework."

The Settlement Framework, among other applicable conditions, provides that payments to states and political subdivisions are contingent upon the number of states and political subdivisions, including those states and political subdivisions who have not yet sued the Company, that agree to participate in the Settlement Framework or otherwise have their claims foreclosed within a prescribed deadline. On December 20, 2022, the Company announced that it had settlement agreements with all 50 states, including four states that previously settled with the Company, as well as the District of Columbia, Puerto Rico and three other U.S. territories (the "Settling States"), thus satisfying the initial threshold of required participation by Settling States. On August 22, 2023, the settlement administrator determined that a sufficient number of political subdivisions had agreed to participate in the Settlement Framework, which was a necessary condition for the Settlement Framework to become effective. The Settlement Framework became effective 15 days later, on September 6, 2023. The Company deposited the full portion of the Settlement Amount attributable to the Settling States on October 11, 2023. Although the settlement administrator has determined that sufficient number of political subdivisions have agreed to participate in the Settlement Framework, and thus the

Settlement Framework was effective, eligible political subdivisions still have until July 15, 2025, to join the Settlement Framework.

Other Opioid-Related Litigation

The Company will continue to vigorously defend against any opioid-related litigation not covered or otherwise resolved by the Settlement Framework, including, but not limited to, each of the matters described below; any other actions filed by healthcare providers, individuals, and third-party payers; and any action filed by a political subdivision or Native American tribe that is not resolved by the Settlement Framework. Accordingly, the Company has not accrued a liability for these opioid-related litigation matters nor can the Company reasonably estimate any loss or range of loss that may arise from these matters. The Company can provide no assurance as to the scope and outcome of any of these matters and no assurance that its business, financial position, results of operations or cash flows will not be materially adversely affected.

Two-County Trial and MDL Bellwethers; Canada; and Other Litigation. The liability phase of a single, two-county trial in one of the MDL cases resulted in a jury verdict on November 23, 2021, finding in favor of the plaintiffs as to the liability of all defendants, including the Company. The abatement phase of the single, two-county trial resulted in a judgment on August 17, 2022, that ordered all three defendants, including the Company, to pay an aggregate amount of approximately $0.7 billion over fifteen years, on a joint and several liability basis, and granted the plaintiffs injunctive relief. On September 7, 2022, the Company filed an appeal with the Sixth Circuit Court of Appeals. The monetary aspect of the judgment is stayed pending appeal, and the injunctive aspect of the judgment went into effect on February 20, 2023. On September 11, 2023, the Sixth Circuit Court of Appeals issued an order of certifying certain questions in the appeal for review by the Supreme Court of Ohio. On November 29, 2023, the Supreme Court of Ohio accepted the request for certification, and the matter remains pending with the court.

The MDL designated five additional single-county cases as bellwethers to proceed through discovery; however, these five counties have elected to participate in the Settlement Framework and receive a portion of the Settlement Amount rather than go to trial. On October 25, 2023, the MDL designated four cases brought by third-party payers as bellwether cases to proceed through discovery. Additional bellwethers of cases brought by hospitals and other healthcare providers may be designated in the future.

Wal-Mart Canada Corp. and certain other subsidiaries of the Company have been named as defendants in two putative class action complaints filed in Canada related to dispensing and distribution practices involving opioids. These matters remain pending.

Similar cases that name the Company also have been filed in state and federal courts by state, local, and tribal governments, healthcare providers, and other plaintiffs. Plaintiffs in these cases and in the MDL are seeking compensatory and punitive damages, as well as injunctive relief including abatement. The Company has also been responding to subpoenas, information requests, and investigations from governmental entities related to nationwide controlled substance dispensing and distribution practices involving opioids.

DOJ Opioid Civil Litigation. On December 22, 2020, the U.S. Department of Justice (the "DOJ") filed a civil complaint in the U.S. District Court for the District of Delaware alleging that the Company unlawfully dispensed controlled substances from its pharmacies and unlawfully distributed controlled substances to those pharmacies. The complaint alleges that this conduct resulted in violations of the Controlled Substances Act. The DOJ is seeking civil penalties and injunctive relief. The Company initially moved to dismiss the DOJ complaint on February 22, 2021. After that motion was fully briefed, the DOJ filed an amended complaint on October 7, 2022. On November 7, 2022, the Company filed a partial motion to dismiss the amended complaint. The Court held a hearing on the partial motion to dismiss on January 18, 2024, and ordered the DOJ to file an amended complaint. The DOJ filed that amended complaint on February 1, 2024, and Walmart filed a partial motion to dismiss that complaint on February 6, 2024. On March 11, 2024, the Court granted in-part Walmart's motion by dismissing the entirety of the DOJ's claims related to distribution and dismissing the DOJ's claims arising under one of the DOJ's two dispensing liability theories. The DOJ's claims arising under its other dispensing liability theory remain pending.

Opioid-Related Securities Class Actions and Derivative Litigation. In addition, the Company is the subject of two securities class actions alleging violations of the federal securities laws regarding the Company's disclosures with respect to opioids, filed in the U.S. District Court for the District of Delaware on January 20, 2021 and March 5, 2021, purportedly on behalf of a class of investors who acquired Walmart stock from March 30, 2016 through December 22, 2020. Those cases have been consolidated. On October 8, 2021, the defendants filed a motion to dismiss the consolidated securities action. After the parties had fully briefed the motion to dismiss, on September 9, 2022, the Court entered an order permitting the plaintiffs to file an amended complaint, which was filed on October 14, 2022, and which revised the applicable putative class of investors to those who acquired Walmart stock from March 31, 2017, through December 22, 2020. On November 16, 2022, the defendants filed a motion to dismiss the amended complaint. That motion remains pending.

Derivative actions were also filed by two of the Company's shareholders in the U.S. District Court for the District of Delaware on February 9, 2021 and April 16, 2021, alleging breach of fiduciary duties against certain of its current and former directors with respect to oversight of the Company's distribution and dispensing of opioids and also alleging violations of the federal securities laws and other breaches of duty by certain current and former directors and officers in connection with the Company's opioids disclosures. Those cases have been stayed pending developments in other opioids litigation matters. On September 27, 2021, three shareholders filed a derivative action in the Delaware Court of Chancery alleging that certain members of the Board of Directors and certain former officers breached their fiduciary duties in failing to adequately oversee the Company's prescription opioids business. The defendants moved to dismiss and/or to stay proceedings on December 21, 2021, and the plaintiffs responded by filing an amended complaint on February 22, 2022. On April 20, 2022, the defendants moved to dismiss and/or to stay proceedings with respect to the amended complaint. In two orders issued on April 12 and 26, 2023, the Court of Chancery granted the defendants' motion to dismiss with respect to claims involving the Company's distribution practices and denied the remainder of the motion, including the Company's request to stay the litigation. On May 5, 2023, the Company's Board of Directors (the "Board") appointed an independent Special Litigation Committee (the "SLC") to investigate the allegations regarding certain current and former officers and directors named in the various derivative proceedings regarding oversight with respect to opioids. The Board has authorized the SLC to retain independent legal counsel and such other advisors as the SLC deems appropriate in carrying out its duties. The derivative matter pending in the Delaware Court of Chancery is stayed until the SLC completes its investigation.

Other Legal Proceedings

Asda Equal Value Claims. Asda, formerly a subsidiary of the Company, was and still is a defendant in certain equal value claims that began in 2008 and are proceeding before an Employment Tribunal in Manchester in the United Kingdom on behalf of current and former Asda store employees, as well as additional claims in the High Court of the United Kingdom (the "Asda Equal Value Claims"). Further claims may be asserted in the future. Subsequent to the divestiture of Asda in February 2021, the Company continues to oversee the conduct of the defense of these claims. While potential liability for these claims remains with Asda, the Company has agreed to provide indemnification with respect to certain of these claims up to a contractually determined amount. The Company cannot predict the number of such claims that may be filed, and cannot reasonably estimate any loss or range of loss that may arise related to these proceedings. Accordingly, the Company can provide no assurance as to the scope and outcome of these matters.

Money Transfer Agent Services Matters. The Company has responded to grand jury subpoenas issued by the United States Attorney's Office for the Middle District of Pennsylvania on behalf of the DOJ seeking documents regarding the Company's consumer fraud prevention program and anti-money laundering compliance related to the Company's money transfer services, where Walmart is an agent. The most recent subpoena was issued in August 2020. Walmart's responses to DOJ's subpoenas have been complete since 2021. The Company continues to cooperate with and provide information and documents voluntarily in response to supplemental requests from the DOJ. The Company has also responded to civil investigative demands from the United States Federal Trade Commission (the "FTC") in connection with the FTC's investigation related to money transfers and the Company's anti-fraud program in its capacity as an agent. On June 28, 2022, the FTC filed a complaint against the Company in the U.S. District Court for the Northern District of Illinois alleging that Walmart violated the Federal Trade Commission Act and the Telemarketing Sales Rule regarding its money transfer agent services and is requesting non-monetary relief and civil penalties. On August 29, 2022, the Company filed a motion to dismiss the complaint. On March 27, 2023, the Court issued an opinion dismissing the FTC's claim under the Telemarketing Sales Rule and denying Walmart's motion to dismiss the claim under Section 5 of the Federal Trade Commission Act. On April 12, 2023, Walmart filed a motion to certify the Court's March 27, 2023, order for interlocutory appeal. On June 30, 2023, the FTC filed an amended complaint against Walmart again asserting claims under the Federal Trade Commission Act and Telemarketing Sales Rule. On July 20, 2023, the Court denied Walmart's motion to certify the Court's March 27, 2023, order for interlocutory appeal, finding that it would be more orderly to consider a request for interlocutory appeal after a ruling on Walmart's motion to dismiss the amended complaint. Walmart's motion to dismiss the amended complaint was filed on August 11, 2023. The motion remains pending. No other deadlines have yet been set, and discovery is stayed.

The Company intends to vigorously defend these matters. However, the Company can provide no assurance as to the scope and outcome of these matters and cannot reasonably estimate any loss or range of loss that may arise. Accordingly, the Company can provide no assurance that its business, financial position, results of operations or cash flows will not be materially adversely affected.

Mexico Antitrust Matter. On October 6, 2023, the Comisión Federal de Competencia Económica of México ("COFECE") notified the main Mexican operating subsidiary of Wal-Mart de México, S.A.B. de C.V. ("Walmex"), a majority owned subsidiary of the Company, that COFECE's Investigatory Authority ("IA") had requested COFECE to initiate a quasi-judicial administrative process against Walmex's subsidiary for alleged relative monopolistic practices in connection with the supply and wholesale distribution of certain consumer goods, retail marketing practices of such consumer goods and related services. The quasi-judicial administrative process is the first opportunity for Walmex's subsidiary to respond to and defend against the IA's allegations before COFECE. While COFECE has the authority to impose monetary relief and/or non-structural conduct measures, such relief and conduct measures would be subject to appeal by Walmex's subsidiary. On December 14, 2023, Walmex's subsidiary submitted its defense arguments and will continue to defend against the allegations vigorously, both at the quasi-judicial administrative process and, if required, before any courts. Because this process is at an early stage, the Company can provide no assurance as to the scope and outcome of these matters, cannot reasonably estimate any loss or range of loss that may arise and can provide no assurance that its business, financial position, results of operations or cash flows will not be materially adversely affected.

Note 11. Retirement-Related Benefits

The Company offers a 401(k) plan for associates in the U.S. under which eligible associates can begin contributing to the plan immediately upon hire. The Company also offers a 401(k) type plan for associates in Puerto Rico under which associates can begin to contribute generally after one year of employment. Under these plans, after one year of employment, the Company matches 100% of participant contributions up to 6% of annual eligible earnings. The matching contributions immediately vest at 100% for each associate. Participants can contribute up to 50% of their pre-tax earnings, but not more than the statutory limits.

Associates in international countries who are not U.S. citizens are covered by various defined contribution post-employment benefit arrangements. These plans are administered based upon the legislative and tax requirements in the countries in which they are established.

The following table summarizes the contribution expense related to the Company's defined contribution plans for fiscal 2024, 2023 and 2022:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Defined contribution plans:			
U.S.	$ 1,528	$ 1,491	$ 1,441
International	85	74	39
Total contribution expense for defined contribution plans	$ 1,613	$ 1,565	$ 1,480

Note 12. Disposals, Acquisitions and Related Items

The following dispositions impact the Company's Walmart International segment. Other immaterial transactions have also occurred.

Asda

In February 2021, the Company completed the divestiture of Asda, the Company's retail operations in the U.K., for net consideration of $9.6 billion. Upon closing of the transaction, the Company recorded an incremental pre-tax loss of $0.2 billion in other gains and losses in its Consolidated Statements of Income in the first quarter of fiscal 2022, primarily related to changes in the net assets of the disposal group, currency exchange rate fluctuations and customary purchase price adjustments upon closing. During the first quarter of fiscal 2022, the Company deconsolidated the financial statements of Asda and recognized its retained investment in Asda as a debt security within other long-term assets and also recognized certain legal and tax indemnity liabilities within deferred income taxes and other in the Consolidated Balance Sheet.

Seiyu

In March 2021, the Company completed the divestiture of Seiyu, the Company's retail operations in Japan, for net consideration of $1.2 billion. Upon closing of the transaction, the Company recorded an incremental pre-tax loss of $0.2 billion in other gains and losses in its Consolidated Statements of Income in the first quarter of fiscal 2022, primarily related to changes in the net assets of the disposal group, currency exchange rate fluctuations and customary purchase price adjustments upon closing. During the first quarter of fiscal 2022, the Company deconsolidated the financial statements of Seiyu and recognized its retained 15 percent ownership interest in Seiyu as an equity investment within other long-term assets in the Consolidated Balance Sheet.

Note 13. Segments and Disaggregated Revenue

Segments

The Company is engaged in the operation of retail and wholesale stores and clubs, as well as eCommerce websites and mobile applications, located throughout the U.S., Africa, Canada, Central America, Chile, China, India and Mexico. The Company previously operated in the United Kingdom and Japan prior to the sale of those operations in the first quarter of fiscal 2022. Refer to Note 12 for discussion of recent divestitures. The Company's operations are conducted in three reportable segments: Walmart U.S., Walmart International and Sam's Club. The Company defines its segments as those operations whose results the chief operating decision maker ("CODM") regularly reviews to analyze performance and allocate resources. The Company sells similar individual products and services in each of its segments. It is impracticable to segregate and identify revenues for each of these individual products and services.

The Walmart U.S. segment includes the Company's mass merchant concept in the U.S., as well as eCommerce, which includes omni-channel initiatives and certain other business offerings such as advertising services through Walmart Connect. The

Walmart International segment consists of the Company's operations outside of the U.S., as well as eCommerce and omni-channel initiatives. The Sam's Club segment includes the warehouse membership clubs in the U.S., as well as eCommerce and omni-channel initiatives. Corporate and support consists of corporate overhead and other items not allocated to any of the Company's segments.

The Company measures the results of its segments using, among other measures, each segment's net sales and operating income, which includes certain corporate overhead allocations. From time to time, the Company revises the measurement of each segment's operating income, including any corporate overhead allocations, as determined by the information regularly reviewed by its CODM. Information for the Company's segments, as well as for Corporate and support, including the reconciliation to income before income taxes, is provided in the following table:

(Amounts in millions)	Walmart U.S.	Walmart International	Sam's Club	Corporate and support	Consolidated
Fiscal Year Ended January 31, 2024					
Net sales	$ 441,817	$ 114,641	$ 86,179	$ —	$ 642,637
Operating income (loss)	22,154	4,909	2,192	(2,243)	27,012
Interest, net					(2,137)
Other gains and (losses)					(3,027)
Income before income taxes					$ 21,848
Total assets	$ 137,782	$ 86,136	$ 15,682	$ 12,799	$ 252,399
Depreciation and amortization	7,671	2,159	642	1,381	11,853
Capital expenditures	$ 13,877	$ 2,911	$ 1,041	$ 2,777	$ 20,606
Fiscal Year Ended January 31, 2023					
Net sales	$ 420,553	$ 100,983	$ 84,345	$ —	$ 605,881
Operating income (loss)	20,620	2,965	1,964	(5,121)	20,428
Interest, net					(1,874)
Other gains and (losses)					(1,538)
Income before income taxes					$ 17,016
Total assets	$ 130,659	$ 86,766	$ 15,490	$ 10,282	$ 243,197
Depreciation and amortization	$ 7,054	$ 1,964	$ 609	$ 1,318	10,945
Capital expenditures	$ 11,425	$ 2,625	$ 727	$ 2,080	16,857
Fiscal Year Ended January 31, 2022					
Net sales	$ 393,247	$ 100,959	$ 73,556	$ —	$ 567,762
Operating income (loss)	21,587	3,758	2,259	(1,662)	25,942
Interest, net					(1,836)
Loss on extinguishment of debt					(2,410)
Other gains and (losses)					(3,000)
Income before income taxes					$ 18,696
Total assets	$ 125,044	$ 91,403	$ 14,678	$ 13,735	$ 244,860
Depreciation and amortization	$ 6,773	$ 1,963	$ 601	$ 1,321	10,658
Capital expenditures	$ 8,475	$ 2,497	$ 622	$ 1,512	13,106

Total revenues, consisting of net sales and membership and other income, and long-lived assets, consisting primarily of net property and equipment and lease right-of-use assets, aggregated by the Company's U.S. and non-U.S. operations for fiscal 2024, 2023 and 2022, are as follows:

	Fiscal Years Ended January 31,		
(Amounts in millions)	2024	2023	2022
Revenues			
U.S. operations	$ 532,076	$ 508,685	$ 470,295
Non-U.S. operations	116,049	102,604	102,459
Total revenues	$ 648,125	$ 611,289	$ 572,754
Long-lived assets			
U.S. operations	$ 104,480	$ 95,567	$ 89,795
Non-U.S. operations	25,858	23,667	22,829
Total long-lived assets	$ 130,338	$ 119,234	$ 112,624

No individual country outside of the U.S. had total revenues or long-lived assets that were material to the consolidated totals. Long-lived assets related to operations classified as held for sale are excluded from the table above. Additionally, the Company did not generate material revenues from any single customer.

Disaggregated Revenues

In the following tables, segment net sales are disaggregated by either merchandise category or market. In addition, net sales related to eCommerce, which include omni-channel sales where a customer initiates an order digitally and the order is fulfilled through a store or club, are provided for each segment.

(Amounts in millions)	Fiscal Years Ended January 31,		
Walmart U.S. net sales by merchandise category	**2024**	**2023**	**2022**
Grocery	$ 264,210	$ 247,299	$ 218,944
General merchandise	113,985	118,597	125,876
Health and wellness	54,898	46,591	42,839
Other categories	8,724	8,066	5,588
Total	$ 441,817	$ 420,553	$ 393,247

Of Walmart U.S.'s total net sales, approximately $65.4 billion, $53.4 billion and $47.8 billion related to eCommerce for fiscal 2024, 2023 and 2022, respectively.

(Amounts in millions)	Fiscal Years Ended January 31,		
Walmart International net sales by market	**2024**	**2023**	**2022**
Mexico and Central America	$ 49,726	$ 40,496	$ 35,964
Canada	22,639	22,300	21,773
China	17,011	14,711	13,852
United Kingdom	—	—	3,811
Other	25,265	23,476	25,559
Total	$ 114,641	$ 100,983	$ 100,959

Of Walmart International's total net sales, approximately $24.8 billion, $20.3 billion and $18.5 billion related to eCommerce for fiscal 2024, 2023 and 2022, respectively.

(Amounts in millions)	Fiscal Years Ended January 31,		
Sam's Club net sales by merchandise category	**2024**	**2023**	**2022**
Grocery and consumables	$ 56,449	$ 53,027	$ 46,822
Fuel, tobacco and other categories	12,854	14,636	10,751
Home and apparel	9,263	9,579	9,037
Health and wellness	5,005	4,248	3,956
Technology, office and entertainment	2,608	2,855	2,990
Total	$ 86,179	$ 84,345	$ 73,556

Of Sam's Club's total net sales, approximately $9.9 billion, $8.4 billion and $6.9 billion related to eCommerce for fiscal 2024, 2023 and 2022, respectively.

Note 14. Subsequent Event

Dividends Declared

The Company approved, effective February 20, 2024, the fiscal 2025 annual dividend of $0.83 per share, an increase over the fiscal 2024 dividend of $0.76 per share. For fiscal 2025, the annual dividend will be paid in four quarterly installments of $0.2075 per share, according to the following record and payable dates:

Record Date	**Payable Date**
March 15, 2024	April 1, 2024
May 10, 2024	May 28, 2024
August 16, 2024	September 3, 2024
December 13, 2024	January 6, 2025

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information, which is required to be timely disclosed, is accumulated and communicated to management in a timely fashion. In designing and evaluating such controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Our management is necessarily required to use judgment in evaluating controls and procedures. Also, we have investments in unconsolidated entities. Since we do not control or manage those entities, our controls and procedures with respect to those entities are substantially more limited than those we maintain with respect to our consolidated subsidiaries.

In the ordinary course of business, we review our internal control over financial reporting and make changes to our systems and processes to improve such controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, updating existing systems, automating manual processes, standardizing controls globally, migrating certain processes to our shared services organizations and increasing monitoring controls. We are currently upgrading our financial system in stages, beginning in our U.S. and Canadian markets, including our general ledger which was upgraded for these markets during fiscal 2024. Our financial system is a significant component of our internal control over financial reporting. We will continue to implement other components of our new financial system in stages, and each implementation will impact our internal control over financial reporting.

An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of January 31, 2024 was performed under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and are effective to provide reasonable assurance that such information is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Report on Internal Control Over Financial Reporting

Management has responsibility for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Management has assessed the effectiveness of the Company's internal control over financial reporting as of January 31, 2024. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission in Internal Control-Integrated Framework (2013). Management concluded that based on its assessment, Walmart's internal control over financial reporting was effective as of January 31, 2024. The Company's internal control over financial reporting as of January 31, 2024, has been audited by Ernst & Young LLP as stated in their report which appears herein.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting as of January 31, 2024, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Security Trading Plans of Directors and Executive Officers

None of the Company's directors or executive officers adopted or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement during the Company's fiscal quarter ended January 31, 2024, as such terms are defined under Item 408(a) or Regulation S-K.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Please see the information concerning our executive officers contained in "Item 1. Business" herein under the caption "Information About Our Executive Officers," which is included in accordance with the Instruction to Item 401 of the SEC's Regulation S-K.

Information required by this Item 10 with respect to the Company's directors and certain family relationships is incorporated by reference to such information under the caption "Proposal No. 1 – Election of Directors" included in our Proxy Statement relating to our 2024 Annual Meeting of Shareholders (our "Proxy Statement").

No material changes have been made to the procedures by which shareholders of the Company may recommend nominees to our Board of Directors since those procedures were disclosed in our proxy statement relating to our 2023 Annual Shareholders' Meeting as previously filed with the SEC.

The information regarding our Audit Committee, including our audit committee financial experts, our Reporting Protocols for Senior Financial Officers and our Code of Conduct applicable to all of our associates, including our Chief Executive Officer, Chief Financial Officer and our Controller, who is our principal accounting officer, required by this Item 10 is incorporated herein by reference to the information under the captions "Corporate Governance" and "Proposal No. 4: Ratification of Independent Accountants" included in our Proxy Statement. "Item 1. Business" above contains information relating to the availability of a copy of our Reporting Protocols for Senior Financial Officers and our Code of Conduct and the posting of amendments to and any waivers of the Reporting Protocols for Senior Financial Officers and our Code of Conduct on our website.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item 11 is incorporated herein by reference to the information under the captions "Corporate Governance – Director Compensation" and "Executive Compensation" included in our Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item 12 is incorporated herein by reference to the information that appears under the caption "Stock Ownership" included in our Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item 13 is incorporated herein by reference to the information under the caption "Corporate Governance – Board Processes and Practices" included in our Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item 14 is incorporated herein by reference to the information under the caption "Proposal No. 4 – Ratification of Independent Accountants" included in our Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) Documents filed as part of this report are as follows:

1. Financial Statements: See the Financial Statements in "Item 8. Financial Statements and Supplementary Data."

2. Financial Statement Schedules:

   Certain schedules have been omitted because the required information is not present or is not present in amounts sufficient to require submission of the schedule, or because the information required is included in the Consolidated Financial Statements, including the notes thereto.

3. Exhibits:

   See exhibits listed under part (b) below.

(b) The required exhibits are filed as part of this Form 10-K or are incorporated by reference herein.[(1)]

3.1(a)	Restated Certificate of Incorporation of the Company dated February 1, 2018 is incorporated herein by reference to Exhibit 3.1 to the Report on Form 8-K filed by the Company on February 1, 2018
3.1(b)	Certificate of Amendment to the Restated Certificate of Incorporation of the Company, effective February 23, 2024 is incorporated herein by reference to Exhibit 3.1 to the Report on Form 8-K filed by the Company on February 23, 2024

**DESCRIPTION OF THE REGISTRANT'S SECURITIES
REGISTERED PURSUANT TO SECTION 12 OF
THE SECURITIES EXCHANGE ACT OF 1934**

Walmart Inc. has ten classes of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended (the "***Exchange Act***"): (i) Common Stock, $0.10 par value per share ("***Common Stock***"), (ii) 2.550% Notes due 2026 (the "***2.550% 2026 Notes***"), (iii) 1.050% Notes due 2026 (the "***2026 Notes***"), (iv) 1.500% Notes due 2028 (the "***2028 Notes***"), (v) 5.750% Notes due 2030 (the "***2030 Notes***"), (vi) 1.800% Notes due 2031 (the "***2031 Notes***," and, collectively with the 2026 Notes, 2028 Notes and 2030 Notes, the "***Luxembourg Notes***"), (vii) 4.875% Notes due 2029 (the "***2029 Notes***"), (viii) 5.625% Notes due 2034 (the "***2034 Notes***"), (ix) 5.250% Notes due 2035 (the "***2035 Notes***") and (x) 4.875% Notes due 2039 (the "***2039 Notes***," and, collectively with the 2029 Notes, 2034 Notes, and 2035 Notes, the "***Irish Notes***" and, together with the 2.550% 2026 Notes and the Luxembourg Notes, the "***Notes***"). Each of the Company's securities registered under Section 12 of the Exchange Act is listed on The New York Stock Exchange (the "***NYSE***"). Except as the context otherwise requires, or as otherwise specified in this Exhibit 4.8 or the information incorporated by reference into this Exhibit 4.8, the terms "***Walmart Inc.***," "***Walmart***," the "***Company***," "***we***," "***us***," "***our***" and "***our company***" refer to Walmart Inc.

DESCRIPTION OF COMMON STOCK

The following is a description of the rights of holders of Common Stock and related provisions of the Company's Restated Certificate of Incorporation, as amended (the "***Certificate***"), and Amended and Restated Bylaws (the "***Bylaws***"), which are incorporated by reference as Exhibit 3.1(a), Exhibit 3.1(b) and Exhibit 3.2, respectively, to the Annual Report on Form 10-K of which this Exhibit 4.8 is a part, and applicable Delaware law, including the General Corporation Law of Delaware, as amended (the "***DGCL***"). This description is qualified in its entirety by, and should be read in conjunction with, the Certificate, Bylaws and applicable Delaware law.

Authorized Capital Stock

Pursuant to our Certificate, our authorized capital stock consists of 33,100,000,000 shares, with a par value of $0.10 per share, of which 33,000,000,000 shares are designated as Common Stock and 100,000,000 shares are designated as preferred stock. The number of shares of Common Stock issued and outstanding varies from time to time.

Common Stock

Fully Paid and Non-Assessable Shares; No Liability for Corporate Obligations

All of the outstanding shares of Common Stock are fully paid and non-assessable. A share of Common Stock is fully paid and non-assessable if such share has been issued for consideration legally permissible under the DGCL with a value at least equal to the par value per share of Common Stock. Holders of fully paid and non-assessable shares of the Common Stock will not be liable for any obligations or liabilities of the Company that the Company may fail to discharge.

Voting Rights

Each holder of shares of Common Stock is entitled to one vote for each share owned of record on all matters submitted to a vote of shareholders. Except as noted below or as otherwise required by the DGCL, the vote of shareholders required to decide any matter brought before a shareholder meeting at which a quorum is present is a majority of the outstanding shares present in person or represented by proxy at that meeting and entitled to vote on the question subject to the shareholder vote. In a contested election of directors, which is an election in which there are more nominees for election than board positions to be filled, directors are elected by the vote of a plurality of the outstanding shares present in person or represented by proxy at that meeting and entitled to vote on the election of directors. The holders of a majority of the outstanding shares of our stock must approve any amendments to our Certificate, any merger or consolidation to which we are a party (other than parent-subsidiary mergers), any sale of all or substantially all of our assets or our dissolution as a corporation. In addition, the DGCL requires the holders of a majority of the outstanding shares of our stock to approve any conversion of our corporation to another type of entity, such as a limited liability company. Our shareholders do not have cumulative voting rights as to the election of directors.

Dividends

Subject to the preferential rights of any holders of any series of our preferred stock that may be issued in the future, the holders of shares of Common Stock are entitled to such dividends and distributions, whether payable in cash or otherwise, as may be declared from time to time by our board of directors from legally available funds.

Liquidation Distributions

Subject to the preferential rights of any holders of any series of our preferred stock that may be issued in the future, upon our liquidation, dissolution or winding-up and after payment of all prior claims against our assets and our outstanding obligations, the holders shares of Common Stock will be entitled to receive, pro rata, all of our remaining assets.

Preemptive, Conversion, Redemption or Similar Rights

The holders of shares of Common Stock are not entitled to any preemptive or other similar rights to subscribe for or acquire additional shares of Common Stock or any other securities of the Company. The shares of Common Stock are not subject to conversion or redemption by the Company and the holders of shares of Common Stock do not have any right or option to convert such shares into any other security or property of the Company or to cause the Company to redeem such shares of Common Stock. There are no sinking fund provisions applicable to the Common Stock.

Certificate, Bylaws and DGCL

Provisions of the Certificate and Bylaws may delay or discourage transactions involving an actual or potential change in control of the Company or change in the Company's management, including transactions in which shareholders might otherwise receive a premium for their shares, or transactions that shareholders might otherwise deem to be in their best interests. Among other things, the Certificate and Bylaws include the following provisions:

i. vacancies on our board of directors, and any new director positions created by the expansion of our board of directors, may be filled only by a majority of the directors then in office, subject to certain exceptions;

ii. our Bylaws establish an advance notice procedure for shareholders to submit proposed nominations of persons for election to our board of directors and other proposals for business to be brought before an annual meeting of our shareholders;

iii. our Bylaws include enhanced procedural and disclosure requirements with which shareholders must comply in connection proposed nominations of persons for election to our board of directors, including related to the U.S. Securities and Exchange Commission's ("***SEC***") rules regarding universal proxy cards;

iv. our board of directors may issue up to 100,000,000 shares of preferred stock, with designations, rights and preferences as may be determined from time to time by our board of directors; and

v. our Bylaws may be amended by our shareholders or our board of directors.

Anti-Takeover Provisions of Delaware Law, Our Certificate and Our Bylaws

In addition, as a Delaware corporation, the Company is subject to the provisions of Section 203 of the DGCL, which prohibits the Company, subject to certain exceptions described below, from engaging in a "business combination" with:

- a stockholder who owns 15% or more of the Company's outstanding voting stock (otherwise known as an "***interested stockholder***");
- an affiliate of an interested stockholder; or
- an associate of an interested stockholder,

in each case, for three years following the date that the stockholder became an interested stockholder.

A "***business combination***" includes a merger or sale of more than 10% of the Company's assets. However, the above provisions of Section 203 do not apply if:

- the board of directors approves the transaction that made the stockholder an "interested stockholder," prior to the date of the transaction;

- after the completion of the transaction that resulted in the stockholder becoming an interested stockholder, that stockholder owned at least 85% of the Company's voting stock outstanding at the time the transaction commenced, other than statutorily excluded shares of Common Stock; or
- on or subsequent to the date of the transaction, the business combination is approved by the board of directors and authorized at a meeting of the Company's stockholders, and not by written consent, by an affirmative vote of at least two-thirds of the outstanding voting stock not owned by the interested stockholder.

Exclusive Forum Provision

Our Certificate provides that, unless we select or consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware shall, to the fullest extent permitted by law, and subject to applicable jurisdictional requirements, be the sole and exclusive forum for any current or former stockholder (including any current or former beneficial owner) to bring claim, including claims in the right of the corporation (a) that are based upon a violation of a duty by a current or former director, officer, employee or stockholder in such capacity; or (b) as to which the DGCL confers jurisdiction upon the Court of Chancery.

Listing

Shares of the Common Stock are listed for trading on the NYSE under the symbol "WMT."

Transfer Agent and Registrar

The transfer agent and registrar for the Common Stock is Computershare Trust Company, N.A.

DESCRIPTION OF DEBT SECURITIES

The Indentures

The following description of the Notes is qualified in its entirety by reference to:

i. the Indenture, dated as of July 19, 2005, between the Company and The Bank of New York Mellon Trust Company, N.A. ("***BNYM***"), as successor-in-interest to J.P. Morgan Trust Company, National Association ("***JPMTC***"), as trustee, as amended by the First Supplemental Indenture, dated as of December 1, 2006, the Second Supplemental Indenture, dated as of December 19, 2014, and the Third Supplemental Indenture, dated as of June 26, 2018 (the "***2005 Indenture***"), incorporated by reference to Exhibit 4.4, Exhibit 4.5, Exhibit 4.6 and Exhibit 4.7, respectively, to the Annual Report on Form 10-K of which this Exhibit 4.8 is a part;
ii. the Indenture, dated as of December 11, 2002, between the Company and BNYM, as successor trustee to JPMTC , as successor trustee to Bank One Trust Company, NA ("***Bank One***"), as trustee (the "***2002 Indenture***"), incorporated by reference to Exhibit 4.3 to the Annual Report on Form 10-K of which this Exhibit 4.8 is a part; and
iii. the Indenture, dated as of April 1, 1991, between the Company and BNYM, as successor trustee to JPMTC, as successor trustee to Bank One, as successor trustee to the First National Bank of Chicago, as trustee, as amended by the First Supplemental Indenture, dated as of September 9, 1992 (the "***1991 Indenture***"), incorporated by reference to Exhibit 4.1 and Exhibit 4.2, respectively, to the Annual Report on Form 10-K of which this Exhibit 4.8 is a part.

Notes issued under the 2005 Indenture are referred to herein as the "***2005 Indenture Notes***," Notes issued under the 2002 Indenture are referred to herein as the "***2002 Indenture Notes***" and Notes issued under the 1991 Indenture are referred to herein as the "***1991 Indenture Notes***".

Trustee under the Indentures

BNYM is the trustee under each of the Indentures. We have commercial deposits and custodial arrangements with BNYM and its affiliates. We may enter into similar or other banking relationships with BNYM in the future in the normal course of business. In addition, BNYM acts as trustee and as paying agent with respect to other debt securities issued by us, and may do so for future issuances of debt securities by us as well.

The 2005 Indenture

The 2005 Indenture Notes were issued under the 2005 Indenture, which provides that debt securities may be issued under the 2005 Indenture from time to time in one or more series. The 2005 Indenture and the 2005 Indenture Notes are governed by, and construed in accordance with, the laws of the State of New York. The 2005 Indenture does not limit the amount of debt securities that we may issue under the 2005 Indenture. We may, without the consent of the holders of the debt securities of any series, issue additional debt securities ranking equally with, and otherwise similar in all respects to, the debt securities of the series (except for the public offering price and the issue date) so that those additional debt securities will be consolidated and form a single series with the debt securities of the series previously offered and sold.

Covenants

The 2005 Indenture sets forth limited covenants that apply to the 2005 Indenture Notes. However, these covenants do not, among other things:

- limit the amount of indebtedness or lease obligations that may be incurred by us and our subsidiaries;
- limit our ability or that of our subsidiaries to issue, assume or guarantee debt secured by liens; or
- restrict us from paying dividends or making distributions on our capital stock or purchasing or redeeming our capital stock.

Consolidation, Merger and Sale of Assets

The 2005 Indenture provides that we may amalgamate, consolidate with, merge into or transfer our assets substantially as an entirety to any person; provided that the following conditions are satisfied:

- any successor to us (a "***Successor***") assumes our obligations on the 2005 Indenture Notes and under the 2005 Indenture;
- any Successor be an entity incorporated or organized under the laws of the United States;
- after giving effect to such transaction, no event of default, as described below under "—Events of Default," has occurred and is continuing; and
- certain other conditions under the 2005 Indenture are met.

Upon any amalgamation, consolidation, merger, reorganization or arrangement or any conveyance or transfer of the properties and assets of the Company substantially as an entirety, the Successor will succeed to, and be substituted for, and may exercise every right and power of, the Company, as the case may be, under the 2005 Indenture with the same effect as if such Successor had been named as the Company therein.

Any such amalgamation, consolidation, merger or transfer of assets substantially as an entirety that meets the conditions described above would not constitute a default or event of default that would entitle holders of the 2005 Indenture Notes or the trustee, on their behalf, to take any of the actions described below under "—Events of Default."

Events of Default

Each of the following events are defined in the 2005 Indenture as an "***event of default***" with respect to the debt securities of any series, including the 2005 Indenture Notes:

i. we fail to pay interest on any outstanding debt securities of that series when that interest is due and payable and that failure continues for 30 days;
ii. we fail to pay principal of or premium, if any, on any outstanding debt securities of that series when that principal or premium, if any, is due and payable;
iii. we fail to perform or we breach any covenant or warranty in the 2005 Indenture with respect to any outstanding debt securities of that series and that failure continues for 90 days after we receive written notice of that default;
iv. certain events of bankruptcy, insolvency or reorganization occur with respect to us; or
v. any other event occurs that is designated as an event of default with respect to the particular series of debt securities when that particular series of debt security is established.

An event of default with respect to the debt securities of any series issued under the 2005 Indenture does not necessarily constitute an event of default with respect to the debt securities of any other series issued under the 2005 Indenture.

If an event of default with respect to any series of outstanding debt securities occurs and is continuing (other than an event of default relating to certain events of bankruptcy, insolvency or reorganization with respect to us), the trustee or the holders of not less than 25% in aggregate principal amount of the outstanding debt securities of that series may declare the principal amount of the outstanding debt securities of that series to be immediately due and payable. If an event of default relating to certain events of bankruptcy, insolvency or reorganization with respect to us occurs and is continuing, the principal of and accrued and unpaid interest on the then outstanding debt securities of all series issued under the 2005 Indenture will become and be immediately due and payable without any declaration or other act on the part of the trustee or any holders.

The holders of not less than a majority in aggregate principal amount of the outstanding debt securities of any series may rescind a declaration of acceleration and its consequences, if we have deposited certain sums with the trustee and all events of default with respect to the debt securities of such series, other than the nonpayment of the principal which have become due solely by such acceleration, have been cured or waived, as provided in the 2005 Indenture.

An event of default for a particular series of debt securities does not necessarily constitute an event of default for any other series of debt securities issued under the 2005 Indenture.

We are required to file annually with the trustee a written statement as to the existence or non-existence of defaults under the 2005 Indenture or any series of debt securities issued thereunder.

No holder of any debt securities of any series, including the 2005 Indenture Notes, will have any right to institute any proceeding, judicial or otherwise, with respect to the 2005 Indenture, or for the appointment of a receiver or trustee, or for any other remedy, unless:

i. such holder has previously given written notice to the trustee of a continuing event of default with respect to the debt securities of such series;

ii. the holders of not less than 25% in principal amount of the outstanding debt securities of such series have made a written request to the trustee to institute proceedings in respect of such event of default in its own name as trustee;

iii. such holder or holders have offered to the trustee reasonable indemnity against the costs, expenses and liabilities to be incurred in compliance with such request;

iv. the trustee for 60 days after its receipt of such notice, request and offer of indemnity has failed to institute any such proceeding; and

v. no direction inconsistent with such written request has been given to the trustee during such 60-day period by the holders of a majority in principal amount of the outstanding debt securities of such series;

it being understood and intended that no one or more holders of the debt securities of such series has any right in any manner whatever by virtue of, or by availing of, any provision of the 2005 Indenture to affect, disturb or prejudice the rights of any other holders of the debt securities of such series or to obtain or to seek to obtain priority or preference over any other such holders or to enforce any right under the 2005 Indenture, except in the manner herein provided and for the equal and ratable benefit of all the holders of the debt securities of such series.

The holders of a majority in aggregate principal amount of outstanding debt securities of a series will have the right, subject to certain limitations, to direct the time, method and place of conducting any proceeding for any remedy available to the trustee with respect to the debt securities of that series or exercising any trust or power conferred on the trustee, and to waive certain defaults. The 2005 Indenture provides that if an event of default occurs and is continuing, the trustee will exercise such of its rights and powers under the 2005 Indenture, and use the same degree of care and skill in their exercise, as a prudent person would exercise under the circumstances in the conduct of such person's own affairs.

Notwithstanding the foregoing, the holder of any debt security will have the right to institute suit for the enforcement of any payment of principal of and premium, if any, and interest on that debt security or any redemption price or repurchase price when due and that that right will not be impaired without the consent of that holder.

Modification and Waivers

We and the trustee may execute a supplemental indenture to add provisions to or to eliminate or change provisions of the 2005 Indenture or to modify otherwise the rights of the holders of the 2005 Indenture Notes if we have the consent of the holders of not less than a majority in aggregate principal amount of the 2005 Indenture Notes affected by that supplemental indenture. However, we and the trustee may not execute a supplemental indenture without the consent of each holder of the 2005 Indenture Notes affected by that supplemental indenture if that supplement indenture would, among other things:

- change the maturity of the principal of, or the stated maturity of any installment of interest or premium, if any, on, any Note, reduce the principal amount of or the premium, if any, or rate of interest on any Note, change any method for determining the rate of interest on any Note, change the obligation to pay any additional amounts with respect to any Note, reduce the amount due and payable on a Note upon the acceleration of its maturity or upon its repurchase or redemption if the amount payable upon acceleration, repurchase or redemption is otherwise less than the stated principal amount of that Note, change the method of calculating interest on a Note, change the currency in which the principal of or the premium, if any, or interest on a Note is payable, reduce the minimum rate of interest on any Note or impair the right to institute suit for the enforcement of any such payment on or with respect to any such holder's 2005 Indenture Notes;
- reduce the percentage in principal amount of outstanding 2005 Indenture Notes described above as being required to consent to entry into a particular supplemental indenture or for the waiver of certain defaults under the 2005 Indenture and their consequences; or
- modify the provisions of the 2005 Indenture relating to modification of the 2005 Indenture, except in certain specified respects.

The trustee and we, without the consent of any holders, may execute a supplemental indenture to, among other things:

- evidence the succession of another corporation to us and the Successor's assumption to our covenants with respect to the 2005 Indenture Notes and the 2005 Indenture;
- add to our covenants further restrictions or conditions for the benefit of holders of the 2005 Indenture Notes;
- cure ambiguities or correct or supplement any provision contained in the 2005 Indenture or any supplemental indenture that may be inconsistent with another provision;
- add additional events of default with respect to the 2005 Indenture Notes;
- add to, change or eliminate any provision of the Indenture, provided that the addition, change or elimination will not affect any outstanding 2005 Indenture Notes;
- establish new series of debt securities and the form or terms of such series of debt securities and to provide for the issuance of securities of any series so established;
- evidence and provide for the acceptance of appointment of a successor trustee with respect to the 2005 Indenture Notes and to add or change any provision to or of the 2005 Indenture as necessary to have more than one trustee under the 2005 Indenture; and
- comply with the requirements of the SEC in order to maintain the qualification of the 2005 Indenture under the Trust Indenture Act of 1939.

The holders of a majority in aggregate principal amount of the outstanding 2005 Indenture Notes may waive an event of default resulting in acceleration of the 2005 Indenture Notes and rescind and annul that acceleration, but only if all other events of default with respect to the 2005 Indenture Notes have been remedied or waived and all payments due with respect to the 2005 Indenture Notes, other than those becoming due as a result of acceleration, have been made. If an event of default occurs and is continuing with respect to the 2005 Indenture Notes, the trustee may, in its discretion, and will, at the written request of holders of not less than a majority in aggregate principal amount of the outstanding 2005 Indenture Notes and upon reasonable indemnity against the costs, expenses and liabilities to be incurred in compliance with such request and subject to certain other conditions set forth in the 2005 Indenture, proceed to protect the rights of the holders of the 2005 Indenture Notes.

The holders of a majority in aggregate principal amount of the 2005 Indenture Notes may waive any past default under the 2005 Indenture and its consequences except an uncured default in the payment of principal of and premium, if any, or interest on the 2005 Indenture Notes or with respect to any covenant or provision of the 2005 Indenture that the 2005 Indenture or the 2005 Indenture Notes specifically provide cannot be waived without the consent of each holder of the 2005 Indenture Notes. Upon such a waiver, the default and any event of default arising out of the default will be deemed cured for all purposes of the 2005 Indenture Notes.

The 2002 Indenture

The 2002 Indenture Notes were issued under the 2002 Indenture, which provides that debt securities may be issued under the 2002 Indenture from time to time in one or more series. The 2002 Indenture and the 2002 Indenture Notes are governed by, and construed in accordance with, the laws of the State of New York. The 2002 Indenture does not limit the amount of debt securities that we may issue under the 2002 Indenture. We may, without the consent of the holders of the debt securities of any series, issue additional debt securities ranking equally with, and otherwise similar in all respects to, the debt securities of the series (except for the public offering price and the issue date) so that those additional debt securities will be consolidated and form a single series with the debt securities of the series previously offered and sold.

Conversion or Exchange Rights

Debt securities offered under the 2002 Indenture may be convertible into or exchangeable for other securities, including, for example, shares of our equity securities. The terms and conditions may include, among others, the following:

- the conversion or exchange price or prices or the ratio or ratios or method of determining the conversion or exchange prices or ratios;
- the conversion or exchange period;
- provisions regarding our ability or the ability of the holder to convert or exchange the debt securities;
- events requiring adjustment to the conversion or exchange price; and
- provisions affecting conversion or exchange in the event of our redemption of the debt securities.

Events of Default and Waiver

An event of default with respect to debt securities of a series issued under the 2002 Indenture will occur if:

- we fail to pay interest on any outstanding debt securities of that series when it is due and payable and that failure continues for 30 days;
- we fail to pay principal of, or premium, if any, on any outstanding debt securities of that series when it is due and payable;
- we fail to perform or we breach any covenant or warranty in the 2002 Indenture with respect to any outstanding debt securities of that series and that failure continues for 90 days after we receive written notice of that default;
- certain events of bankruptcy, insolvency or reorganization occur with respect to us; or
- any other event occurs that is designated as an event of default with respect to the particular series of debt securities when that particular series of debt securities is established.

An event of default with respect to a particular series of debt securities issued under the 2002 Indenture does not necessarily constitute an event of default with respect to any other series of debt securities issued under the 2002 Indenture. If an event of default with respect to any series of outstanding debt securities occurs and is continuing, the trustee or the holders of not less than 25% in aggregate principal amount of the outstanding debt securities of that series may declare the principal amount of the outstanding debt securities of that series to be immediately due and payable. The holders of a majority in aggregate principal amount of the outstanding debt securities of a series may waive an event of default resulting in acceleration of the debt securities of that series and rescind and annul that acceleration, but only if all other events of default with respect to the debt securities of that series have been remedied or waived and all payments due with respect to the debt securities of that series, other than those due as a result of acceleration, have been made. If an event of default occurs and is continuing with respect to the debt securities of a series, the trustee may, in its discretion, and will, at the written request of holders of not less than a majority in aggregate principal amount of the outstanding debt securities of that series and upon reasonable indemnity against the costs, expenses and liabilities to be incurred in compliance with such request and subject to certain other conditions set forth in the indenture, proceed to protect the rights of the holders of the debt securities of that series. The holders of a majority in aggregate principal amount of the debt securities of that series may waive any past default under the 2002 Indenture and its consequences except a default in the payment of principal of, premium, if any, or interest on, those debt securities and any covenant or provision of the 2002 Indenture that cannot be waived without the consent of each holder of debt securities of that series. Upon such a waiver, the default and any event of default arising out of the default will be deemed cured for all purposes of the debt securities of that series.

The 2002 Indenture provides that upon the occurrence of an event of default described in the first two bullet points in the first paragraph under "—Events of Default and Waiver" with respect to debt securities of a series, we will, upon the trustee's demand, pay to the trustee for the benefit of the holders of the outstanding debt securities of that series, the whole amount then due and payable on the debt securities of that series for principal, premium, if any, and interest. The 2002 Indenture also provides that if we fail to pay such amount forthwith upon such demand, the trustee may, among other things, institute a judicial proceeding for the collection of those amounts.

The 2002 Indenture also provides that, notwithstanding any other provision of the 2002 Indenture, the holder of any debt securities of a series will have the right to institute suit for the enforcement of any payment of principal of, and interest on, the debt securities of that series or any redemption price or repurchase price when due and that that right will not be impaired without the consent of that holder.

The trustee is required, within 90 days after the occurrence of a default with respect to the debt securities of a series, to give to the holders of the debt securities of that series notice of all uncured defaults known to it. However, except in the case of default in the payment of principal or interest on any of the debt securities of that series, the trustee will be protected in withholding that notice if the trustee in good faith determines that the withholding of that notice is in the interest of the holders of the debt securities of that series. The term "***default***," for the purpose of this provision only, means the occurrence of any event that is or would become, after notice or the passage of time or both, an event of default with respect to that series.

We are required to file annually with the trustee a written statement as to the existence or non-existence of defaults under the 2002 Indenture or any series of debt securities.

Legal Defeasance and Covenant Defeasance

We may, at our option and at any time, elect to have all of the obligations discharged with respect to the outstanding debt securities issued under the 2002 Indenture or as to any series thereof, except for:

- the rights of holders of debt securities to receive payments of principal and interest from the trust referred to below when those payments are due;
- our obligations respecting the debt securities concerning issuing temporary notes, registration of transfers of debt securities, mutilated, destroyed, lost or stolen debt securities, the maintenance of an office or agency for payment and money for debt security payments being held in trust;
- the rights, powers, trusts, duties and immunities of the trustee and our obligations in connection therewith; and
- the provisions of the 2002 Indenture relating to such a discharge of obligations.

We refer to a discharge of this type as "***defeasance***."

In addition, other than our covenant to pay the amounts due and owing with respect to a series of debt securities, we may elect to have our obligations as the issuer of a series of debt securities released with respect to covenants relating to that series of debt securities. Thereafter, any failure to comply with those obligations will not constitute a default or event of default with respect to the debt securities of that series. If such a release of our covenants occurs, our failure to perform or our breach of the covenants or warranties defeased will no longer constitute an event of default with respect to those debt securities.

To exercise either of the rights we describe above, certain conditions must be met, including:

- we must irrevocably deposit with the trustee, in trust for the debt security holders' benefit, moneys in the currency in which the securities are denominated, securities issued by a government, governmental agency or central bank of the country in whose currency the securities are denominated, or a combination of cash and such securities, in amounts sufficient to pay the principal of and interest on all of the then outstanding debt securities to be affected by the defeasance at their stated maturity;

- the trustee must receive an opinion of counsel confirming that the holders of the outstanding debt securities will not recognize income, gain or loss for U.S. federal income tax purposes as a result of that defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if that defeasance had not occurred, which opinion, only in the case of the type of defeasance described first above, will be based on a ruling of the Internal Revenue Service or a change in federal income tax law to that effect occurring after the date of the indenture;
- no default or event of default exists on the date of such deposit, subject to certain exceptions; and
- the trustee must receive an opinion of counsel to the effect that, after the 91st day following the deposit, the trust funds will not be part of any "estate" formed by the bankruptcy or reorganization of the party depositing those funds with the trustee or subject to the "automatic stay" under the United States Bankruptcy Code or, in the case of covenant defeasance, will be subject to a first priority lien in favor of the trustee for the benefit of the holders.

Satisfaction and Discharge

If we so request, the 2002 Indenture will cease to be of further effect, other than as to certain rights of registration of transfer or exchange of the notes, as provided for in the 2002 Indenture, and the trustee, at our expense, will execute proper instruments acknowledging satisfaction and discharge of the 2002 Indenture and the debt securities when:

- either all the debt securities previously authenticated and delivered under the 2002 Indenture, other than destroyed, lost or stolen securities that have been replaced or paid and notes that have been subject to defeasance, have been delivered to the trustee for cancellation; or
- all of the securities issued under the 2002 Indenture not previously delivered to the trustee for cancellation have become due and payable, will become due and payable at their stated maturity within 60 days or will become due and payable at redemption within 60 days under arrangements satisfactory to the trustee for the giving of notice of redemption by the trustee in our name and expense; and
- in each of the foregoing cases, we have irrevocably deposited or caused to be deposited with the trustee cash in U.S. dollars, certain United States government securities or a combination thereof, in trust for the purpose and in an amount sufficient to pay and discharge the entire indebtedness arising under the debt securities issued pursuant to the 2002 Indenture not previously delivered to the trustee for cancellation, for principal and premium, if any, on and interest on these securities to the date of such deposit (in the case of notes that have become due and payable) or to the stated maturity of these securities or redemption date, as the case may be; and
- we have paid or caused to be paid all sums payable under the 2002 Indenture by us; and
- no default or event of default then exists; and
- we have delivered to the trustee an officers' certificate and an opinion of counsel, each stating that all conditions precedent provided in the 2002 Indenture relating to the satisfaction and discharge of the 2002 Indenture and the securities issued under the indenture have been complied with.

Modification of the 2002 Indenture

The 2002 Indenture provides that, with the consent of the holders of not less than a majority in aggregate principal amount of the outstanding debt securities of each affected series, modifications and alterations of the 2002 Indenture may be made which affect the rights of the holders of such debt securities. However, no such modification or alteration may be made without the consent of the holder of each debt security affected if the modification or alteration would, among other things:

- change the maturity of the principal of, or of any installment of interest on, any such debt security, or reduce the principal amount of any such debt security, or change the method of calculation of interest or the currency of payment of principal or interest on, or reduce the minimum rate of interest thereon, or impair the right to institute suit for the enforcement of any such payment on or with respect to any such debt security, or

- reduce the above-stated percentage in principal amount of outstanding debt securities required to modify or alter the 2002 Indenture.

The trustee and we, without the consent of the holders of the debt securities, may execute a supplemental indenture to the 2002 Indenture to, among other things:

- evidence the succession of another corporation to us and the successor's assumption to our respective covenants with respect to the debt securities and the 2002 Indenture;
- add to our covenants further restrictions or conditions that our board of directors and the trustee consider to be for the protection of holders of all or any series of the debt securities and to make the occurrence of a default in any of those additional covenants, restrictions or conditions a default or an event of default under the 2002 Indenture subject to certain limitations;
- cure ambiguities or correct or supplement any provision contained in the 2002 Indenture or any supplemental indenture that may be defective or inconsistent with another provision;
- add additional events of default with respect to all or any series of the debt securities;
- add to, change or eliminate any provision of the 2002 Indenture provided that the addition, change or elimination will not affect any outstanding debt securities;
- provide for the issuance of debt securities whether or not then outstanding under the 2002 Indenture in coupon form and to provide for exchangeability of the coupon form securities with other debt securities issued under the 2002 Indenture in fully registered form;
- establish new series of debt securities and the form or terms of such series of debt securities and to provide for the issuance of securities of any series so established; and
- evidence and provide for the acceptance of appointment of a successor trustee and to change the 2002 Indenture as necessary to have more than one trustee under the 2002 Indenture.

Amalgamation, Consolidation, Merger or Sale of Assets

The 2002 Indenture provides that we may, without the consent of the holders of any of the outstanding debt securities of any series, amalgamate, consolidate with, merge into or transfer our assets substantially as an entirety to any person, provided that:

- any successor to us assumes our obligations on the debt securities and under the 2002 Indenture;
- any successor to us must be an entity incorporated or organized under the laws of the United States;
- after giving effect thereto, no event of default, as defined in the 2002 Indenture, shall have occurred and be continuing; and
- certain other conditions under the 2002 Indenture are met.

Any such amalgamation, consolidation, merger or transfer of assets substantially as an entirety that meets the conditions described above would not constitute a default or event of default that would entitle holders of the debt securities or the trustee, on their behalf, to take any of the actions described above under "—Events of Default and Waiver."

No Limitations on Additional Debt and Liens

The 2002 Indenture does not contain any covenants or other provisions that would limit our right to incur additional indebtedness, enter into any sale and leaseback transaction or grant liens on our assets.

The 1991 Indenture

The 1991 Indenture Notes were issued under the 1991 Indenture, which provides that debt securities may be issued under the 1991 Indenture from time to time in one or more series. The 1991 Indenture and the 1991 Indenture Notes are governed by, and construed in accordance with, the laws of the State of New York. The 1991 Indenture does not limit the amount of debt securities that we may issue under the 1991 Indenture. We may, without the consent of the holders of the debt securities of any series, issue additional debt securities ranking equally with, and otherwise similar in all respects to, the debt securities of the series (except for the public offering price and the issue date) so that those additional debt securities will be consolidated and form a single series with the debt securities of the series previously offered and sold.

Covenants

We will not, and will not permit any of our subsidiaries to issue, assume or guarantee any debt for money we borrow if that debt is secured by any mortgage, deed of trust, security interest, pledge, lien or other encumbrance upon any Operating Property (as defined below) belonging to us or of any of our subsidiaries or any shares of stock or indebtedness of any of our subsidiaries, whether owned at the date of the 1991 Indenture or thereafter acquired, without effectively securing the debt securities equally and ratably with that debt. This restriction does not, however, apply to:

- mortgages on any property acquired, constructed or improved by us or any of our subsidiaries after January 31, 1991, created or assumed within 60 months after the acquisition, or construction or improvement is complete, or within six months after completion pursuant to a firm commitment for financing arrangement that we enter into within that 60-month period, to secure or provide for the payment of the purchase price or cost;
- mortgages existing on any property at the time of its acquisition;
- mortgages existing on any property, shares of stock or debt acquired from a corporation merged with or into us or one of our subsidiaries;
- mortgages on property of any corporation existing at the time it becomes our subsidiary;
- mortgages to secure debt of any of our subsidiaries to us or to another of our subsidiaries;
- mortgages in favor of governmental bodies to secure partial progress, advance or other payments pursuant to any contract or statute or to secure indebtedness incurred to finance the purchase price or cost of constructing or improving the property subject to those mortgages; or
- mortgages for extending, renewing or replacing debt secured by any mortgage referred to in the foregoing items or in this item or any mortgages existing on January 31, 1991.

This restriction does not apply to the issuance, assumption or guarantee by us or any of our subsidiaries of debt secured by a mortgage which would otherwise be subject to the restrictions described above up to an aggregate amount which, together with all of our and our subsidiaries' secured debt, not including secured debt permitted under the foregoing exceptions, and the Value (as defined below) of Sale and Lease-back Transactions (as defined below) existing at that time other than those Sale and Lease-back Transactions the proceeds of which have been applied to the retirement of certain long-term debt or to the purchase of other operating property, and other than those Sale and Lease-back Transactions in which the property involved would have been permitted to be mortgaged under the principle described in the first item above, does not exceed the greater of 10% of our Consolidated Net Tangible Assets (as defined below) or 15% of Consolidated Capitalization (as defined below).

We will not, and will not permit any of our subsidiaries to, engage in Sale and Lease-back Transactions relating to any Operating Property, except for temporary leases for a term, including renewals, of not more than 48 months and except for leases between us and one of our subsidiaries or between our subsidiaries. However, we or our subsidiaries can engage in that type of transaction if the net proceeds of the Sale and Lease-back Transaction are at least equal to the sum of all costs incurred by us in connection with the acquisition of, and construction of any improvement on, the Operating Property to be leased and either:

- we or our subsidiary would be entitled to incur debt secured by a mortgage on the property to be leased without securing the debt securities pursuant to the first exception to the prohibition on liens stated above; or
- the Value thereof would be an amount permitted as described above; or
- we apply an amount equal to the sum of all costs incurred by us in connection with the acquisition of, and the construction of any improvements on, that property (1) to the payment or other retirement of certain of our or one of our subsidiary's long-term debt or (2) to the purchase of Operating Property, other than that involved in that Sale and Lease-back Transaction.

We may merge with or consolidate into another corporation or sell or convey all or substantially all of our property to another corporation that is authorized to purchase and operate our property, as long as:

- immediately after the merger, consolidation, sale or conveyance, the surviving or acquiring corporation is not in default under the 1991 Indenture;

- the surviving or acquiring corporation is a U.S. corporation; and
- the surviving or acquiring corporation assumes, by a supplemental indenture satisfactory to the trustee, the obligation to pay the principal of and interest and any premium on all of the debt securities and to perform our covenants under the 1991 Indenture.

In the case of a merger or consolidation or a sale or conveyance of all or substantially all of our assets and the assumption of our liabilities under the 1991 Indenture by a successor corporation, the successor corporation will assume our place in the 1991 Indenture as if it had originally been a party to the 1991 Indenture. The successor corporation may then issue debt securities under the 1991 Indenture.

Events of Default, Notice and Waiver

An event of default with respect to any series of debt securities under the 1991 Indenture is:

- a default in payment of principal or premium, if any, at maturity;
- a default for 30 days in payment of any interest;
- our failure for 60 days after notice to perform any other of the covenants or agreements in the 1991 Indenture;
- our default in the payment of any of our debt or acceleration of any of that debt under the terms of the instrument under which that debt is issued, if that default in payment is not cured or that acceleration is not annulled within 10 days after written notice;
- certain events in the case of our bankruptcy, insolvency or reorganization; or
- any other event of default provided with respect to any series of debt securities.

If an event of default occurs and is continuing with respect to any series of debt securities, either the trustee or the holders of 25% in principal amount then outstanding of the debt securities of that series may declare the principal of all the debt securities to be due and payable immediately, but upon certain conditions that declaration may be annulled. The holders of a majority in principal amount then outstanding of the debt securities of a series may waive defaults, except an uncured default in the payment of principal of or interest or any premium on the debt securities.

We are required to file annually with the trustee a certificate either stating the absence of any default or specifying any default that exists. The trustee is required, within 90 days after the occurrence of a default with respect to the debt securities of any series, to give to the holders of the debt securities notice of all uncured defaults known to it. However, except in the case of default in the payment of principal and premium, if any, or interest on any of the debt securities of that series, the trustee will be protected in withholding that notice if the trustee in good faith determines that the withholding of that notice is in the interest of the holders of the debt securities of that series. The term “default,” for the purpose of this provision only, means the occurrence of any of the events of default specified above excluding any grace periods.

The trustee is entitled, subject to the duty of the trustee during a default to act with the required standard of care, to be indemnified by the holders of the debt securities of any series before proceeding to exercise any right or power under the 1991 Indenture at the request of those holders. The 1991 Indenture provides that the holders of a majority in principal amount of each series of outstanding debt securities may direct, with regard to that series, the time, method and place of conducting any proceeding for any remedy available to the trustee, or exercising any trust or power conferred on the trustee, provided that the trustee may decline to act if that direction is contrary to law or if the trustee determines in good faith that the proceeding so directed would be illegal or would involve it in personal liability.

Modification of the 1991 Indenture

The trustee and we, with the consent of the holders of not less than 66 2/3% in aggregate principal amount of each series of the debt securities at the time outstanding affected thereby, may execute supplemental indentures amending, changing or eliminating the provisions of the 1991 Indenture or of any supplemental indenture or modifying in any manner the rights of the holders of those debt securities. However, no supplemental indenture of that kind may:

- extend the fixed maturity of any debt securities or the time of payment of interest, reduce the interest rate, the principal amount or any premium to be paid upon redemption or the amount of principal of an original issue discount security that would be payable upon acceleration of maturity, or impair or affect the right of any debt security holder to institute suit for payment or the right of repayment, if any, at the option of the holder of debt securities, without the consent of the holder of each debt securities so affected; or

- reduce the above percentage of debt securities, the holders of which are required to consent to any supplemental indenture of that kind, without the consent of the holders of all the affected debt securities then outstanding.

In some circumstances, the holders of a majority in aggregate principal amount of each series of debt securities may waive all defaults and rescind and annul a declaration that the series of debt securities has become due and payable and the consequences of a declaration of that kind.

The trustee and we, without the consent of the holders of the debt securities, may execute an indenture or supplemental indentures to:

- evidence the succession of another corporation to us and our successor's assumption to our agreements and obligations with respect to the debt securities and the indenture;
- add to our covenants further restrictions or conditions that our board of directors and the trustee consider to be for the protection of holders of all or any series of the debt securities and to make the occurrence of a default in any of those additional covenants, restrictions or conditions a default or an event of default permitting enforcement of all or any of the several remedies provided in the indenture with some permissible limitations;
- cure ambiguities or correct or supplement any provision contained in the indenture or any supplemental indenture that may be defective or inconsistent with another provision;
- provide for the issuance of debt securities whether or not then outstanding under the indenture in coupon form and to provide for exchangeability of the coupon form securities with debt securities issued under the indenture in fully registered form;
- establish the form or terms and to provide for the issuance of any series of debt securities under the indenture; and
- evidence and provide for the acceptance of appointment of a successor trustee and to change the indenture as necessary to have more than one trustee under the indenture.

Defeasance of Offered Debt Securities in Certain Circumstances

The 1991 Indenture provides that our board of directors may provide by resolution that we will be discharged from any and all obligations in respect of the debt securities of any series upon the deposit with the trustee, in trust, of money and/or obligations of, or obligations the principal of and interest on which are fully guaranteed by, the United States of America, which through the payment of interest and principal those debt securities in accordance with their terms will provide money in an amount sufficient to pay any installment of principal of and interest on the debt securities of that series on the stated maturity of that payments in accordance with the terms of the 1991 Indenture and those debt securities. A discharge may only occur if we have received from, or there has been published by, the U.S. Internal Revenue Service a ruling to the effect that the discharge will not be deemed, or result in, a taxable event with respect to holders of the debt securities of that series.

Definitions

The 1991 Indenture contains the following defined terms:

"***Consolidated Capitalization***" means the total of all the assets appearing on our and our subsidiaries' consolidated balance sheets less current liabilities and deferred income taxes.

"***Consolidated Net Tangible Assets***" means the total of all the assets appearing on our and our subsidiaries' consolidated balance sheets less:

- current liabilities;
- reserves for depreciation and other asset valuation reserves;
- intangible assets such as goodwill, trademarks, trade names, patents, and unamortized debt discount and expense; and
- appropriate adjustments on account of minority interests of other persons holding stock in any of our majority-owned subsidiaries.

"***Operating Property***" means any manufacturing or processing plant, office facility, retail store, wholesale club, Supercenter, hypermart, warehouse, distribution center or equipment located within the United States of America or its territories or possessions and owned and operated now or hereafter by us or any of our subsidiaries and having a book value on the date as of which the determination is being made of more than 0.60% of Consolidated Net Tangible Assets; provided, however, that separate items of equipment with an aggregate book value in excess of $200,000,000 that are secured pursuant to the same financing transaction will constitute one "Operating Property."

"***Sale and Lease-back Transaction***" means any arrangement with any person providing for the leasing to us or any of our subsidiaries of any Operating Property, except for temporary leases for a term, including any renewal thereof, of not more than 48 months and except for leases between us and one of our subsidiaries or between our subsidiaries, which Operating Property has been or is to be sold or transferred by us or one of our subsidiaries to that person.

"***Value***" means, with respect to a Sale and Lease-back Transaction, as of any particular time, the amount equal to the greater of:

- the net proceeds from the sale or transfer of the property leased pursuant to that Sale and Lease-back Transaction; or
- the sum of all of our costs incurred in connection with the acquisition of that property and the construction of any improvements thereon, as determined in good faith by us at the time of entering into that Sale and Lease-back Transaction,

in either case multiplied by a fraction, the numerator of which shall be equal to the number of full years of the term of the lease remaining at the time of determination and the denominator of which shall be equal to the number of full years of that term, without regard to any renewal or extension options contained in the lease.

The Notes

The 2.550% 2026 Notes

The 2.550% 2026 Notes were issued under and pursuant to the 2005 Indenture. The 2.550% 2026 Notes were issued in an aggregate principal amount of €650,000,000. The maturity date of the 2.550% 2026 Notes is April 8, 2026, and interest at a rate of 2.550% per annum is paid annually on April 8 of each year and on the maturity date.

Ranking

The 2.550% 2026 Notes are our senior unsecured debt obligations and rank equally among themselves and with all of our existing and future unsecured and unsubordinated debt obligations. Consequently, the holders of the 2.550% 2026 Notes have a right to payment equal to that of our other unsecured creditors. None of our subsidiaries have any obligation as to any of the 2.550% 2026 Notes or will guarantee the payment of amounts owing with respect to any of the 2.550% 2026 Notes. Neither the 2.550% 2026 Notes nor the 2005 Indenture restricts the ability of our subsidiaries to incur indebtedness.

Payment on the 2.550% 2026 Notes

All payments of principal, including payments made upon any redemption of the 2.550% 2026 Notes, of, accrued interest on, and any additional amounts payable with respect to, the 2.550% 2026 Notes are payable in euro; provided, however, if the euro is unavailable to us due to the imposition of exchange controls or other circumstances beyond our control or if the euro is no longer being used by the then member states of the European Monetary Union that have adopted the euro as their currency or for the settlement of transactions by public institutions of or within the international banking community, then all payments in respect of the 2.550% 2026 Notes will be made in U.S. dollars until the euro is again available to us or so used. The amount payable on any date in euro will be converted into U.S. dollars at the rate mandated by the Board of Governors of the U.S. Federal Reserve System as of the close of business on the second Business Day prior to the relevant payment date or, in the event the Board of Governors of the U.S. Federal Reserve System has not mandated a rate of conversion on such date, on the basis of the most recent U.S. dollar/euro exchange rate published in *The Wall Street Journal* on or most recently prior to the second Business Day prior to the relevant payment date. Any payment in respect of the 2.550% 2026 Notes so made in U.S. dollars will not constitute an event of default under such 2.550% 2026 Notes or the 2005 Indenture.

"***Business Day***" means any day, other than a Saturday or a Sunday, (1) which is not a day on which banking institutions are authorized or obligated by law or executive order to close in New York City or London and (2) on which the Trans-European Automated Real-time Gross Settlement Express Transfer system (the TARGET2 system), or any successor thereto, is open.

Payment of Additional Amounts

All payments of principal and interest in respect of the 2.550% 2026 Notes will be made free and clear of, and without deduction or withholding for or on account of any present or future taxes, duties, assessments or other governmental charges of whatsoever nature required to be deducted or withheld by the United States or any political subdivision or taxing authority of or in the United States, unless such withholding or deduction is required by law.

In the event any withholding or deduction on payments in respect of the 2.550% 2026 Notes for or on account of any present or future tax, assessment or other governmental charge is required to be deducted or withheld by the United States or any taxing authority thereof or therein, we will pay such additional amounts on the 2.550% 2026 Notes as will result in receipt by each beneficial owner of a Note that is a Non-U.S. Person (as defined below) of such amounts (after all such withholding or deduction, including on any additional amounts) as would have been received by such beneficial owner had no such withholding or deduction been required. We will not be required, however, to make any payment of additional amounts for or on account of:

i. any tax, assessment or other governmental charge that would not have been imposed but for (A) the existence of any present or former connection (other than a connection arising solely from the ownership of those 2.550% 2026 Notes or the receipt of payments in respect of those 2.550% 2026 Notes) between that beneficial owner, or between a fiduciary, settlor, beneficiary of, member or shareholder of, or possessor of a power over, that beneficial owner, if that beneficial owner is an estate, trust, partnership or corporation, and the United States, including that beneficial owner, or that fiduciary, settlor, beneficiary, member, shareholder or possessor, being or having been a citizen or resident or treated as a resident of the United States or being or having been engaged in trade or business or present in the United States or (B) the presentation of a Note for payment on a date more than 30 days after the later of the date on which that payment becomes due and payable and the date on which payment is duly provided for;

ii. any estate, inheritance, gift, sales, transfer, excise, personal property or similar tax, assessment or other governmental charge;

iii. any tax, assessment or other governmental charge imposed by reason of that beneficial owner's past or present status as a passive foreign investment company, a controlled foreign corporation or a personal holding company with respect to the United States or as a corporation that accumulates earnings to avoid U.S. federal income tax;

iv. any tax, assessment or other governmental charge which is payable otherwise than by withholding from payment of principal of or premium, if any, or interest on such holder's 2.550% 2026 Notes;

v. any tax, assessment or other governmental charge required to be withheld by any paying agent from any payment of principal of and premium, if any, or interest on any Note if that payment can be made without withholding by any other paying agent;

vi. any tax, assessment or other governmental charge which would not have been imposed but for the failure of a beneficial owner or any holder of 2.550% 2026 Notes to comply with our request to comply with certification, information, documentation or other reporting requirements concerning the nationality, residence, identity or connections with the United States of the beneficial owner or any holder of the 2.550% 2026 Notes, if such compliance is required by statute or by regulation of the U.S. Treasury Department as a precondition to relief or exemption from such tax, assessment or other governmental charge, including, without limitation, any withholding required pursuant to Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986, as amended (the "***Code***");

vii. any tax, assessment or other governmental charge imposed on interest received by (A) a 10% shareholder (as defined in Section 871(h)(3)(B) of the Code and the regulations that may be promulgated thereunder) of our Company or (B) a controlled foreign corporation that is related to us within the meaning of Section 864(d)(4) of the Code;

viii. any withholding or deduction that is imposed on a payment to an individual and is required to be made pursuant to that European Union Directive relating to the taxation of savings adopted on June 3, 2003 by the European Union's Economic and Financial Affairs Council, or any law implementing or complying with, or introduced in order to conform to, such Directive; or

ix. any combination of items (i), (ii), (iii), (iv), (v), (vi), (vii) and (viii).

In addition, we will not pay any additional amounts to any beneficial owner or holder of 2.550% 2026 Notes who is a fiduciary or partnership to the extent that a beneficiary or settlor with respect to that fiduciary or a member of that partnership or a beneficial owner thereof would not have been entitled to the payment of those additional amounts had that beneficiary, settlor, member or beneficial owner been the beneficial owner of those 2.550% 2026 Notes.

As used in the preceding section, "***Non-U.S. Person***" means any corporation, partnership, individual or fiduciary that is, as to the United States, a foreign corporation, a non-resident alien individual who has not made a valid election to be treated as a United States resident, a non-resident fiduciary of a foreign estate or trust or a foreign partnership, one or more of the members of which is, as to the United States, a foreign corporation, a non-resident alien individual or a non-resident fiduciary of a foreign estate or trust.

Redemption for Tax Reasons

If, as a result of any change or amendment to the laws, treaties, regulations or rulings of the United States or any political subdivision or taxing authority thereof, any proposed change in such laws, treaties, regulations or rulings, or any change in the official application, enforcement or interpretation of those laws, treaties, regulations or rulings, we become, or based upon a written opinion of independent counsel selected by us, will become obligated to pay additional amounts as described above under the heading "Payments of Additional Amounts" with respect to the 2.550% 2026 Notes, then we may redeem the 2.550% 2026 Notes, in whole, but not in part, at our option, on not more than 60 days' and not less than 30 days' prior notice, at a redemption price equal to 100% of the principal amount of the 2.550% 2026 Notes, plus accrued but unpaid interest, if any, on the 2.550% 2026 Notes to the date fixed for redemption.

Optional Redemption

We may redeem the 2.550% 2026 Notes, in whole or in part, at our option, at any time. If the 2.550% 2026 Notes are redeemed before January 8, 2026, then the 2.550% 2026 Notes will be redeemed at a redemption price equal to the greater of:

- 100% of the principal amount of the 2.550% 2026 Notes to be redeemed; or
- the sum of the present values of the remaining scheduled payments of principal and interest thereon (not including any portion of such payments of interest accrued as of the date of redemption), discounted to the date of redemption on an annual basis (Actual/Actual (ICMA)) at the applicable Comparable Government Bond Rate (as defined below), plus 15 basis points, plus, in each case, accrued and unpaid interest on the principal amount being redeemed to, but excluding, the date fixed for redemption.

Any 2.550% 2026 Notes redeemed on or after January 8, 2026 will be redeemed at a redemption price equal to 100% of the principal amount of the 2.550% 2026 Notes then outstanding to be redeemed, plus accrued and unpaid interest on the principal amount being redeemed to, but excluding, the date fixed for redemption.

Installments of interest on 2.550% 2026 Notes being redeemed that are due and payable on interest payment dates falling on or prior to a redemption date shall be payable on the interest payment date to the holders as of the close of business on the relevant regular record date according to the 2.550% 2026 Notes and the 2005 Indenture.

"***Comparable Government Bond***" means, in relation to any Comparable Government Bond Rate calculation for the 2.550% 2026 Notes, at the discretion of an independent investment bank selected by us, a German government bond whose maturity is closest to the maturity of the 2.550% 2026 Notes, or if such independent investment bank in its discretion determines that such similar bond is not in issue, such other German government bond as such independent investment bank may, with the advice of three brokers of, and/or market makers in, German government bonds selected by us, determine to be appropriate for determining the Comparable Government Bond Rate.

"***Comparable Government Bond Rate***" means the price, expressed as a percentage (rounded to three decimal places, with 0.0005 being rounded upwards), at which the gross redemption yield on the 2.550% 2026 Notes being redeemed, if they were to be purchased at such price on the third Business Day prior to the date fixed for redemption, would be equal to the gross redemption yield on such Business Day of the Comparable Government Bond on the basis of the middle market price of the Comparable Government Bond prevailing at 11:00 a.m. (London time) on such Business Day as determined by an independent investment bank selected by us. Such independent bank will calculate such gross redemption yield on the 2.550% 2026 Notes to be redeemed and the Comparable Government Bond in accordance with generally accepted market practices at the time of such calculations.

Discharge, Legal Defeasance and Covenant Defeasance

We may, at our option, elect to have all of the obligations discharged with respect to the outstanding 2.550% 2026 Notes, except for:

- the rights of holders of the 2.550% 2026 Notes to receive payments of principal, premium, if any, interest and additional amounts, if any, from the trust referred to below when those payments are due;
- our obligations respecting the 2.550% 2026 Notes concerning issuing temporary debt securities, registration of transfers of debt securities, mutilated, destroyed, lost or stolen debt securities, the maintenance of an office or agency for payment and money for payments with respect to the 2.550% 2026 Notes being held in trust;
- the rights, powers, trusts, duties and immunities of the trustee and our obligations in connection therewith; and
- the provisions of the 2005 Indenture relating to such a discharge of obligations.

We refer to a discharge of this type as "***legal defeasance***."

In addition, other than our covenant to pay the amounts due and owing with respect to the 2.550% 2026 Notes, we may elect to have our obligations as the issuer of the 2.550% 2026 Notes released with respect to covenants relating to the 2.550% 2026 Notes. Thereafter, any failure to comply with those obligations will not constitute a default or event of default with respect to the 2.550% 2026 Notes. If such a release of our covenants occurs, our failure to perform or our breach of the covenants or warranties defeased will no longer constitute an event of default with respect to the 2.550% 2026 Notes. We refer to a discharge of this type as "***covenant defeasance***."

To exercise either of the defeasance rights described above as to the outstanding 2.550% 2026 Notes, certain conditions must be met, including:

- we must irrevocably deposit with the trustee, in trust for the benefit of the holders of the outstanding 2.550% 2026 Notes, moneys in the currency in which the 2.550% 2026 Notes are denominated, securities issued by a government, governmental agency or central bank of the country in whose currency the 2.550% 2026 Notes are denominated or a combination of cash and such securities, in amounts sufficient to pay the principal of and premium, if any, and interest on all of the then outstanding 2.550% 2026 Notes to be affected by the defeasance at their stated maturity;
- no default or event of default exists on the date of such deposit, subject to certain exceptions;
- the trustee must receive an opinion of counsel confirming that the holders of the outstanding 2.550% 2026 Notes will not recognize income, gain or loss for U.S. federal income tax purposes as a result of that legal defeasance or covenant defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if that defeasance had not occurred, which opinion, only in the case of the legal defeasance of the 2.550% 2026 Notes, will be based on a ruling of the Internal Revenue Service or a change in United States federal income tax law to that effect occurring after the date of the 2005 Indenture; and
- the trustee must receive an opinion of counsel to the effect that, after the 91st day following the deposit, the trust funds will not be part of any "estate" formed by the bankruptcy of the party depositing those funds with the trustee or subject to the "automatic stay" under the United States Bankruptcy Code or, in the case of covenant defeasance, will be subject to a first priority lien in favor of the trustee for the benefit of the holders of the outstanding 2.550% 2026 Notes.

We may exercise our legal defeasance option notwithstanding our prior exercise of our covenant defeasance option.

Book-Entry and Settlement

The 2.550% 2026 Notes were issued in book-entry form and are represented by global notes deposited with, or on behalf of, a common depositary on behalf of Clearstream Banking, société anonyme ("***Clearstream***") and Euroclear Bank SA/NV, as the operator of the Euroclear System ("***Euroclear***"), and are registered in the name of the common depositary or its nominee. Beneficial interests in the global notes will be shown on, and transfers of beneficial interests in the global notes will be made only through, records maintained by Euroclear and Clearstream. Except as described below, certificated notes will not be issued in exchange for beneficial interests in the global notes.

Certificated Notes

Subject to certain conditions, the 2.550% 2026 Notes represented by the global notes are exchangeable for certificated debt securities with the same terms in authorized denominations only if:

- The Depository Trust Company, Euroclear or Clearstream, as the case may be, is unwilling or unable to continue as depositary or ceases to be a clearing agency registered under applicable law, and a successor is not appointed by us within 90 days; or
- we decide to discontinue the book-entry system; or
- an event of default has occurred and is continuing with respect to the 2.550% 2026 Notes.

Any Note that is exchangeable as above is exchangeable for certificated notes issuable in authorized denominations and registered in such names as the common depositary shall direct. Subject to the foregoing, a global note is not exchangeable, except for a global note of the same aggregate denomination to be registered in the name of the common depositary or its nominee.

The 2026 Notes and 2028 Notes

The 2026 Notes and 2028 Notes were issued under and pursuant to the 2005 Indenture. The 2026 Notes and the 2028 Notes are each a separate series of notes under the 2005 Indenture. The 2026 Notes and 2028 Notes were issued in registered book-entry form without interest coupons in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof. The 2026 Notes and 2028 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our other existing and future senior unsecured debt.

The 2026 Notes were issued in an aggregate principal amount of $1,250,000,000, and the 2028 Notes were issued in an aggregate principal amount of $1,250,000,000.

Interest Rates on the 2026 Notes and 2028 Notes

The 2026 Notes bear interest from September 17, 2021 at a rate equal to 1.050%, and the 2028 Notes bear interest from September 22, 2021 at a rate equal to 1.500%. Interest on the notes is paid semi-annually, in the case of 2026 Notes, on March 17 and September 17 of each year, beginning on March 17, 2022, and in the case of the 2028 Notes, on March 22 and September 22 of each year, beginning on March 22, 2022.

Interest on each 2026 Note or 2028 Note, as applicable, is payable to the person in whose name such note is registered at the close of business, in the case of the 2026 Notes, on the March 2 and September 2 immediately preceding the applicable interest payment date, and in the case of the 2028 Notes, on the March 7 and September 7 immediately preceding the applicable interest payment date. Interest on the 2026 Notes and 2028 Notes is computed on the basis of a 360-day year of twelve 30-day months.

Other Terms of the 2026 and 2028 Notes

If any interest payment date for 2026 Notes or 2028 Notes would otherwise be a day that is not a business day, then the interest payment date for such notes of that series is postponed to the following date that is a business day.

Interest will not accrue as a result of any such postponed payment. The term "***business day***" means any day which is not a day on which banking institutions in The City of New York, or the relevant place of payment are authorized or required by law, regulation or executive order to close.

None of the 2026 Notes or 2028 Notes are subject to a sinking fund or are convertible into or exchangeable for any other securities.

The 2026 Notes or 2028 Notes are subject to defeasance.

Optional Redemption

We may redeem the 2026 Notes at any time prior to August 17, 2026 (one month prior to the maturity date of such notes) and the 2028 Notes at any time prior to July 22, 2028 (two months prior to the maturity date of such notes), in each case, at our option and, as to each series of notes, as a whole or in part, at a redemption price equal to the greater of:

- 100% of the principal amount of such notes to be redeemed, plus any accrued and unpaid interest to, but excluding, the redemption date; and
- the sum of the present values of the Remaining Scheduled Payments (as defined below), plus any accrued and unpaid interest to, but excluding, the redemption date.

We refer to the date on which we may first redeem the notes of each series pursuant to the redemption rights described in this paragraph as the "***Par Call Date***" for the notes of such series. In determining the present value of the Remaining Scheduled Payments, we will discount such payments to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) using a discount rate equal to the Applicable Treasury Rate plus, in the case of the 2026 Notes, 5 basis points, and, in the case of the 2028 Notes, 10 basis points.

The term "***Applicable Treasury Rate***" means, with respect to any redemption date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue. In determining this rate, we will assume a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date.

The term "***Comparable Treasury Issue***" means the United States Treasury security selected by the Independent Investment Banker as having a maturity comparable to the remaining term of the notes of a series to be redeemed (assuming the notes of such series matured on the Par Call Date (as defined below) for the notes of such series) that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing a new issue of corporate debt securities of comparable maturity to the remaining term of the notes of such series.

The term "***Independent Investment Banker***" means one of the Reference Treasury Dealers that we appoint to act as the Independent Investment Banker from time to time.

The term "***Comparable Treasury Price***" means, with respect to any redemption date, the arithmetic average, as determined by the Independent Investment Banker, of the Reference Treasury Dealer Quotations for such redemption date.

The term "***Reference Treasury Dealer Quotations***" means, with respect to each Reference Treasury Dealer and any redemption date, the arithmetic average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer by 5:00 p.m., New York City time, on the third business day preceding such redemption date.

The term "***Reference Treasury Dealer***" means each of Citigroup Global Markets Inc., Mizuho Securities USA LLC and Wells Fargo Securities, LLC or one of their respective affiliates or successors; provided, however, that if any of the foregoing shall cease to be a primary U.S. Government securities dealer (a "***Primary Treasury Dealer***"), we will substitute another Primary Treasury Dealer for such entity.

The term "***Remaining Scheduled Payments***" means, with respect to any 2026 Note or 2028 Note, the remaining scheduled payments of the principal thereof to be redeemed and interest thereon that would be due after the related redemption date but for such redemption (assuming the notes of such series matured on the Par Call Date for the notes of such series); provided, however, that, if such redemption date is not an interest payment date with respect to such note, then the amount of the next scheduled interest payment thereon will be reduced by the amount of interest accrued thereon to such redemption date.

Pursuant to the redemption procedures with respect to any such note, a notice of redemption will be given to each holder of the 2026 Notes or 2028 Notes to be redeemed not less than 10 days nor more than 60 days prior to the date set for the redemption.

The calculation of the redemption price for any notes to be redeemed and the accrued interest payable upon a redemption of such notes will be made by the Company or on behalf of the Company by a person the Company designates. Such calculation will not be the duty or obligation of BNYM unless otherwise expressly agreed.

Notices

Notices to holders of the 2026 Notes or 2028 Notes will be sent to such holders. Any notice shall be deemed to have been given on the date of mailing. So long as the 2026 Notes or 2028 Notes are represented by one or more global securities deposited with DTC or its nominee, notices to holders of such notes may be given by delivery of those notices to DTC, and such notices shall be deemed to be given on the date of delivery to DTC. BNYM will transmit notices to each registered holder's last known address as it appears in the security register that BNYM maintains. BNYM will only transmit these notices to the registered holder of the 2026 Notes or 2028 Notes. Holders of 2026 Notes or 2028 Notes will not receive notices regarding the 2026 Notes or 2028 Notes directly from us unless we reissue the 2026 Notes or 2028 Notes in fully certificated form.

Other Matters

We may acquire the 2026 Notes or 2028 Notes by means other than a redemption, whether by tender offer, open market purchases, negotiated transactions or otherwise, in accordance with applicable securities laws, so long as such acquisition does not otherwise violate the terms of the 2005 Indenture.

Same-Day Settlement and Payment

We will make all payments of principal and interest on the 2026 Notes or 2028 Notes to DTC in immediately available funds. The 2026 Notes and 2028 Notes will trade in the same-day funds settlement system in the United States until maturity. Purchases of 2026 Notes or 2028 Notes in secondary market trading must be in immediately available funds. Secondary market trading in the 2026 Notes or 2028 Notes between participants in Clearstream and Euroclear will occur in accordance with the applicable rules and operating procedures of Clearstream and Euroclear and will be settled using the procedures applicable to eurobonds in immediately available funds.

The 2030 Notes

The 2030 Notes were issued under and pursuant to the 1991 Indenture. The 2030 Notes were issued in registered book-entry form, without coupons, only in denominations of (Pounds) 1,000, (Pounds) 10,000 and (Pounds) 100,000 and integral multiples of (Pounds) 1,000 in excess of those denominations. The 2030 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our existing and future senior, unsecured and unsubordinated debt.

The 2030 Notes will mature on December 19, 2030 and were issued in a total principal amount of (Pounds) 500 million. Unless previously redeemed or purchased and cancelled, we will repay the 2030 Notes at 100% of their principal amount together with accrued and unpaid interest thereon at maturity. We will pay principal of, interest on and any other amounts payable under the 2030 Notes in pounds sterling or, if the United Kingdom adopts the euro, in euro.

We may, without the consent of the holders of the 2030 Notes, create and issue additional notes ranking equally with the 2030 Notes and otherwise similar in all respects to the 2030 Notes so that these additional notes will be consolidated and form a single series with the 2030 Notes. No additional 2030 Notes may be issued if an event of default under the 1991 Indenture has occurred.

The 2030 Notes are not subject to a sinking fund. The 2030 Notes are not convertible or exchangeable.

The 2030 Notes bear interest from December 19, 2000, at the annual interest rate of 5.750%. Interest is payable semi-annually in arrears on June 19 and December 19 of each year, beginning on June 19, 2001, to the person in whose name a 2030 Note is registered at the close of business on the preceding June 10 or December 10, as the case may be.

If interest is required to be calculated for any period other than from one scheduled interest payment date to the next interest payment date, it will be calculated on the basis of a 360-day year of twelve 30-day months.

If any interest payment date for the 2030 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any delayed payment. The term "business day" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are generally authorized or required by law or regulation to close in New York City or London.

If, prior to the maturity of the 2030 Notes, the United Kingdom adopts the euro as its lawful currency in accordance with the Treaty establishing the European Communities, as amended by the Treaty on European Union, the 2030 Notes will be re-denominated into euro, and the regulations of the European Commission relating to the euro shall apply to the 2030 Notes. The circumstances and consequences described in this paragraph will not entitle us, the trustee under the 1991 Indenture or any holder of the 2030 Notes to redeem early, rescind, or receive notice relating to the 2030 Notes, repudiate the terms of the 2030 Notes or the 1991 Indenture, or raise any defense, request any compensation or make any claim related to the 2030 Notes or the 1991 Indenture, nor will these circumstances and consequences affect any of our other obligations under the 2030 Notes or the 1991 Indenture.

While the 2030 Notes are represented by a global note deposited with the common depositary for Clearstream, and Euroclear, notices to holders may be given by delivery to Clearstream and Euroclear and such notices shall be deemed to be given on the date of delivery to Clearstream and Euroclear. The trustee will mail notices by first-class mail, postage prepaid, to each registered holder's last known address as it appears in the security register that the trustee maintains. The trustee will only mail these notices to the registered holder of the 2030 Notes. Holders of 2030 Notes will not receive notices regarding the 2030 Notes directly from us unless we reissue the 2030 Notes in fully certificated form.

The trustee will also publish notices regarding the 2030 Notes in a daily newspaper of general circulation in The City of New York and in London. In addition, if the notes are listed on the Luxembourg Stock Exchange, and so long as the rules of the Luxembourg Stock Exchange require notice by publication, the trustee will publish notices regarding the 2030 Notes in a daily newspaper of general circulation in Luxembourg. We expect that publication will be made in The City of New York in *The Wall Street Journal*, in London in the *Financial Times*, and in Luxembourg in the *Luxemburger Wort*. If publication in Luxembourg is not practical, the trustee will publish these notices in an English language newspaper of general circulation elsewhere in Europe. Published notices will be deemed to have been given on the date they are published or, if published more than once, on the date of first publication. If publication as described above becomes impossible, the trustee may publish sufficient notice by alternate means that approximate the terms and conditions described in this paragraph.

Optional Redemption

The 2030 Notes will be redeemable as a whole or in part, at our option, at any time after December 19, 2003, at a redemption price equal to the greater of (i) 100% of the principal amount of such 2030 Notes and (ii) as determined by the Calculation Agent, the price at which the yield on the outstanding principal amount of the 2030 Notes on the Reference Date is equal to the yield on the Benchmark Gilt as of that date as determined by reference to the middle-market price on the Benchmark Gilt at 3:00 p.m., London time, on that date, in either case, plus accrued and unpaid interest on the 2030 Notes up to, but excluding, the date specified as the redemption date.

"***Reference Date***" means the date that is the first dealing day in London prior to the publication of the notice of redemption referred to below.

"***Benchmark Gilt***" means the 4.25% Treasury Stock due June 2032 or such other U.K. government stock as the Calculation Agent, with the advice of three brokers and/or U.K. gilt-edged market makers or three other persons operating in the U.K. gilt-edged market that may be chosen by the Calculation Agent, may determine from time to time to be the most appropriate benchmark U.K. government stock for the notes.

"***Calculation Agent***" means the trustee or any successor entity.

We will give notice of any redemption between 30 and 60 days preceding the redemption date to each holder of the 2030 Notes to be redeemed as described above.

In the case of any partial redemption, selection of the 2030 Notes for redemption will be made by the trustee under the 1991 Indenture in compliance with the rules and requirements of the principal securities exchange, if any, on which the 2030 Notes are listed or, if the 2030 Notes are not so listed or that exchange prescribes no method of selection, on a pro rata basis, by lot or by any other method as the trustee in its sole discretion deems to be fair and appropriate, although no 2030 Note of (Pounds) 1,000 in original principal amount or less shall be redeemed in part. If any 2030 Note is to be redeemed in part only, the notice of redemption relating to the 2030 Note will state the portion of the principal amount thereof to be redeemed. A new 2030 Note in principal amount equal to the unredeemed portion thereof will be issued and delivered to the trustee, or its nominee, or, in the case of 2030 Notes in definitive form, issued in the name of the holder thereof, in each case upon cancellation of the original 2030 Note.

Unless we default in payment of the redemption price of the 2030 Notes, on and after the redemption date, interest will cease to accrue on the notes or the portions of the 2030 Notes called for redemption.

Payment of Additional Amounts

We will pay to the holder of any 2030 Note who is a United States Alien, as defined below, additional amounts as may be necessary so that every net payment of the principal of, interest on and any other amounts payable under that 2030 Note, after deduction or withholding for or on account of any present or future tax, assessment or other governmental charge imposed upon that holder by the United States or any taxing authority thereof or therein, will not be less than the amount provided in that 2030 Note to be then due and payable. We will not be required, however, to make any payment of additional amounts for or on account of:

a. any tax, assessment or other governmental charge that would not have been imposed but for (1) the existence of any present or former connection between that holder, or between a fiduciary, settlor, beneficiary of, member or shareholder of, or possessor of a power over, that holder, if that holder is an estate, trust, partnership or corporation, and the United States including, without limitation, that holder, or that fiduciary, settlor, beneficiary, member, shareholder or possessor, being or having been a citizen or resident or treated as a resident of the United States or being or having been engaged in trade or business in, or present in, the United States or (2) the presentation of a note for payment on a date more than 30 days after the later of the date on which that payment becomes due and payable and the date on which payment is duly provided for;

b. any estate, inheritance, gift, sales, transfer, excise, personal property or similar tax, assessment or other governmental charge;

c. any tax, assessment or other governmental charge imposed by reason of that holder's past or present status as a passive foreign investment company, a controlled foreign corporation, a personal holding company or foreign personal holding company with respect to the United States, or as a corporation which accumulates earnings to avoid United States federal income tax;

d. any tax, assessment or other governmental charge which is payable otherwise than by withholding from payment of the principal of, interest on or any other amounts payable under that note;

e. any tax, assessment or other governmental charge required to be withheld by any paying agent from any payment of the principal of, interest on or any other amounts payable under any note if that payment can be made without withholding by any other paying agent;

f. any tax, assessment or other governmental charge which would not have been imposed but for the failure to comply with certification, information, documentation or other reporting requirements concerning the nationality, residence, identity or connections with the United States of the holder or beneficial owner of that note, if such compliance is required by statute or by regulation of the U.S. Treasury Department as a precondition to relief or exemption from such tax, assessment or other governmental charge;

g. any tax, assessment or other governmental charge imposed on interest received by (1) a 10% shareholder (as defined in Section 871(h)(3)(B) of the U.S. Internal Revenue Code of 1986 and the regulations that may be promulgated thereunder) of our company or (2) a controlled foreign corporation with respect to our company within the meaning of the U.S. Internal Revenue Code; or

h. any combination of items (a), (b), (c), (d), (e), (f) and (g);

nor will we pay any additional amounts to any holder who is a fiduciary or partnership other than the sole beneficial owner of that note to the extent that a beneficiary or settlor with respect to that fiduciary, or a member of that partnership or a beneficial owner thereof would not have been entitled to the payment of those additional amounts had that beneficiary, settlor, member or beneficial owner been the holder of that 2030 Note.

"***United States Alien***" means any corporation, partnership, individual or fiduciary that is, as to the United States, a foreign corporation, a non-resident alien individual who has not made a valid election to be treated as a United States resident, a non-resident fiduciary of a foreign estate or trust, or a foreign partnership one or more of the members of which is, as to the United States, a foreign corporation, a non-resident alien individual or a non-resident fiduciary of a foreign estate or trust.

Redemption Upon Tax Event

The 2030 Notes may be redeemed at our option in whole, but not in part, on not more than 60 days' and not less than 30 days' notice, at a redemption price equal to 100% of their principal amount, plus accrued and unpaid interest on the notes, if we determine that as a result of any change in or amendment to the laws, treaties, regulations or rulings of the United States or any political subdivision or taxing authority thereof, or any proposed change in such laws, treaties, regulations or rulings, or any change in the official application, enforcement or interpretation of those laws, treaties, regulations or rulings, including a holding by a court of competent jurisdiction in the United States, or any other action, other than an action predicated on law generally known on or before December 5, 2000 except for proposals before the Congress before that date, taken by any taxing authority or a court of competent jurisdiction in the United States, or the official proposal of any action, whether or not the action or proposal was taken or made with respect to our company, (A) we have or will become obligated to pay additional amounts on any 2030 Note or (B) there is a substantial possibility that we will be required to pay those additional amounts. Prior to the publication of any notice of redemption, we will deliver to the trustee (1) an officers' certificate stating that we are entitled to effect a redemption and setting forth a statement of facts showing that the conditions precedent to the right of our company to so redeem have occurred and (2) an opinion of counsel to that effect based on that statement of facts. If we redeem the 2030 Notes upon a tax event, we will publish a notice of that redemption in Luxembourg in the *Luxemburger Wort* at the time notice is given to the holders of the 2030 Notes as described above.

Prescription

Under New York's statute of limitations, any legal action to enforce our payment obligations evidenced by the 2030 Notes must be commenced within six years after payment is due. Thereafter our payment obligations will generally become unenforceable.

Replacement of 2030 Notes

If any mutilated 2030 Note is surrendered to the trustee, we will execute and the trustee will authenticate and deliver in exchange for such mutilated 2030 Note a new note of the same series and principal amount. If the trustee and we receive evidence to our satisfaction of the destruction, loss or theft of any 2030 Note and any security or indemnity required by them, then we shall execute and the trustee shall authenticate and deliver, in lieu of such destroyed, lost or stolen 2030 Note, a new note of the same series and principal amount. All expenses associated with issuing the new note shall be borne by the owner of the mutilated, destroyed, lost or stolen 2030 Note.

The 2031 Notes

The 2031 Notes were issued under and pursuant to the 2005 Indenture. The 2031 Notes were issued in registered book-entry form without interest coupons in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof. The 2031 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our other existing and future senior unsecured debt.

The 2031 Notes will mature on September 22, 2031. Unless previously purchased and cancelled or, to the extent permitted by the notes, redeemed prior to maturity, we will repay the 2031 Notes at 100% of their principal amount, together with accrued and unpaid interest thereon, at their maturity.

The 2031 Notes were issued in an aggregate principal amount of $2,000,000,000. We may, without the consent of the holders of the 2031 Notes, create and issue additional notes ranking equally with and otherwise similar in all respects to the 2031 Notes (except for the public offering price, initial interest accrual date, initial interest payment date, and the issue date) so that those additional notes will be consolidated and form a single series with the other outstanding 2031 Notes; provided, however, that any additional notes issued that are not fungible with the outstanding 2031 Notes for U.S. federal income tax purposes will be issued under one or more separate CUSIP and ISIN numbers. No additional notes may be issued if an event of default under the indenture has occurred and is continuing.

Interest Rates on the 2031 Notes

The 2031 Notes bear interest from September 22, 2021 at the annual interest rate 1.800%. Interest on the 2031 Notes is paid semi-annually on March 22 and September 22 of each year, beginning on March 22, 2022.

Interest on each 2031 Note is payable to the person in whose name the 2031 Note is registered at the close of business on the March 7 and September 7 immediately preceding the applicable interest payment date. Interest on the 2031 Notes is computed on the basis of a 360-day year of twelve 30-day months.

Other Terms of the 2031 Notes

If any interest payment date for the 2031 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any such postponed payment. The term "***business day***" means any day which is not a day on which banking institutions in The City of New York, or the relevant place of payment are authorized or required by law, regulation or executive order to close.

The 2031 Notes are not subject to a sinking fund and are not convertible into or exchangeable for any other securities.

The 2031 Notes are subject to defeasance.

Optional Redemption

We may redeem the 2031 Notes at any time prior to June 22, 2031 (three months prior to the maturity date of the 2031 Notes), at our option and, as a whole or in part, at a redemption price equal to the greater of:

- 100% of the principal amount of the 2031 Notes to be redeemed, plus any accrued and unpaid interest to, but excluding, the redemption date; and
- the sum of the present values of the Remaining Scheduled Payments (as defined below), plus any accrued and unpaid interest to, but excluding, the redemption date.

We refer to the date on which we may first redeem the 2031 Notes pursuant to the redemption rights described in this paragraph as the "***Par Call Date***" for the 2031 Notes. In determining the present value of the Remaining Scheduled Payments, we will discount such payments to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) using a discount rate equal to the Applicable Treasury Rate plus 10 basis points.

The term "***Applicable Treasury Rate***" means, with respect to any redemption date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue. In determining this rate, we will assume a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date.

The term "***Comparable Treasury Issue***" means the United States Treasury security selected by the Independent Investment Banker as having a maturity comparable to the remaining term of the 2031 Notes to be redeemed (assuming the 2031 Notes matured on the Par Call Date for the 2031 Notes) that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing a new issue of corporate debt securities of comparable maturity to the remaining term of the 2031 Notes.

The term "***Independent Investment Banker***" means one of the Reference Treasury Dealers that we appoint to act as the Independent Investment Banker from time to time.

The term "***Comparable Treasury Price***" means, with respect to any redemption date, the arithmetic average, as determined by the Independent Investment Banker, of the Reference Treasury Dealer Quotations for such redemption date.

The term "***Reference Treasury Dealer Quotations***" means, with respect to each Reference Treasury Dealer and any redemption date, the arithmetic average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer by 5:00 p.m., New York City time, on the third business day preceding such redemption date.

The term "***Reference Treasury Dealer***" means each of BofA Securities, Inc., Citigroup Global Markets Inc. and Morgan Stanley & Co. LLC or one of their respective affiliates or successors; *provided*, *however*, that if any of the foregoing shall cease to be a primary U.S. Government securities dealer (a "***Primary Treasury Dealer***"), we will substitute another Primary Treasury Dealer for such entity.

The term "***Remaining Scheduled Payments***" means, with respect to the 2031 Notes, the remaining scheduled payments of the principal thereof to be redeemed and interest thereon that would be due after the related redemption date but for such redemption (assuming the 2031 Notes matured on the Par Call Date); *provided*, *however*, that, if such redemption date is not an interest payment date with respect to the 2031 Notes, then the amount of the next scheduled interest payment thereon will be reduced by the amount of interest accrued thereon to such redemption date.

A notice of redemption will be given to each holder of the 2031 Notes to be redeemed not less than 10 days nor more than 60 days prior to the date set for the redemption.

The calculation of the redemption price for any 2031 Notes to be redeemed and the accrued interest payable upon a redemption of such 2031 Notes will be made by the Company or on behalf of the Company by a person the Company designates. Such calculation will not be the duty or obligation of BNYM unless otherwise expressly agreed.

Notices

Notices to holders of the 2031 Notes will be sent to such holders. Any notice shall be deemed to have been given on the date of mailing. So long as the 2031 Notes are represented by one or more global securities deposited with DTC or its nominee, notices to holders of the 2031 Notes may be given by delivery of those notices to DTC, and such notices shall be deemed to be given on the date of delivery to DTC. BNYM will transmit notices to each registered holder's last known address as it appears in the security register that BNYM maintains. BNYM will only transmit these notices to the registered holder of the 2031 Notes. Holders of 2031 Notes will not receive notices regarding the 2031 Notes directly from us unless we reissue the 2031 Notes in fully certificated form.

Other Matters

We may acquire the 2031 Notes by means other than a redemption, whether by tender offer, open market purchases, negotiated transactions or otherwise, in accordance with applicable securities laws, so long as such acquisition does not otherwise violate the terms of the 2005 Indenture.

Same-Day Settlement and Payment

We will make all payments of principal and interest on the 2031 Notes to DTC in immediately available funds. The 2031 Notes will trade in the same-day funds settlement system in the United States until maturity. Purchases of 2031 Notes in secondary market trading must be in immediately available funds. Secondary market trading in the 2031 Notes between participants in Clearstream and Euroclear will occur in accordance with the applicable rules and operating procedures of Clearstream and Euroclear and will be settled using the procedures applicable to eurobonds in immediately available funds.

The 2029 Notes

The 2029 Notes were issued under and pursuant to 2005 Indenture. The 2029 Notes were issued in registered book-entry form without interest coupons in denominations of €50,000 and integral multiples of €1,000 in excess thereof. The 2029 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our existing and future senior unsecured debt.

The 2029 Notes mature on September 21, 2029. Unless previously redeemed or purchased and cancelled, we will repay the 2029 Notes at 100% of their principal amount, together with accrued and unpaid interest thereon at their maturity. We will pay principal of and interest on the 2029 Notes in euro.

The 2029 Notes were issued in an aggregate principal amount of €1,000,000,000. We may, without the consent of the holders of the 2029 Notes, create and issue additional notes ranking equally with and otherwise similar in all respects to the 2029 Notes (except for the offering price and the issue date) so that those additional notes will be consolidated and form a single series with the 2029 Notes. No additional 2029 Notes may be issued if an event of default under the 2005 Indenture has occurred and is continuing.

The 2029 Notes bear interest from September 21, 2009 at the annual interest rate of 4.875%. Interest on each 2029 Note is payable annually in arrears on September 21 of each year, beginning on September 21, 2010, to the person in whose name the 2029 Note is registered at the close of business on the immediately preceding September 15. Interest is computed on the basis of the actual number of days in the period for which interest is being calculated and the actual number of days from and including the last date on which interest was paid on the 2029 Notes (or September 21, 2009 if no interest has been paid on the 2029 Notes), to but excluding the next scheduled interest payment date. This payment convention is referred to as Actual/Actual (ICMA) as defined in the rulebook of the International Capital Market Association.

We will pay to beneficial owners of the 2029 Notes who are non-U.S. persons additional amounts in the event of deduction or withholding of taxes, assessments or other governmental charges imposed by the United States or any taxing authority thereof or therein. Any additional amounts will be paid in euro.

The 2029 Notes are not subject to a sinking fund and are not convertible or exchangeable. The 2029 Notes are generally not be redeemable prior to maturity.

The 2029 Notes are subject to defeasance.

If any interest payment date for the 2029 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any delayed payment. The term "***business day***" means any day, other than a Saturday or Sunday, that (i) is neither a legal holiday nor a day on which banking institutions are generally authorized or required by law or regulation to close in The City of New York or London and (ii) is a day on which the Trans-European Automated Real-time Gross Settlement Express Transfer system (the TARGET2 system), or any successor thereto, operates.

Notices to holders of the 2029 Notes will be mailed to such holders. Any notice shall be deemed to have been given on the date of mailing and publication or, if published more than once, on the date of first publication. So long as the 2029 Notes are represented by a global security deposited with BNYM, as the common depositary (the "***Common Depositary***") for Clearstream and Euroclear, notices to holders may be given by delivery to Clearstream and Euroclear, and such notices shall be deemed to be given on the date of delivery to Clearstream and Euroclear. BNYM will mail notices by first-class mail, postage prepaid, to each registered holder's last known address as it appears in the security register that BNYM maintains. BNYM will only mail these notices to the registered holder of the 2029 Notes. Holders of the 2029 Notes will not receive notices regarding the 2029 Notes directly from us unless we reissue the 2029 Notes in fully certificated form.

BNYM will publish any notices regarding the 2029 Notes in a daily newspaper of general circulation in The City of New York and in London. If the 2029 Notes are admitted to the Official List and to trading on its regulated market, the trustee will publish notices regarding the notes in a daily newspaper of general circulation in Dublin, Ireland for so long as such publication is required pursuant to the Prospectus Directive or the rules of the applicable stock exchange. We expect that publication will be made in The City of New York in *The Wall Street Journal*, in London in the *Financial Times* and in Dublin, Ireland in the *Irish Times*. If publication in Dublin, Ireland is not practical, BNYM will publish these notices in an English language newspaper of general circulation elsewhere in Europe. Published notices will be deemed to have been given on the date they are published or, if published more than once, on the date of first publication. If publication as described above becomes impossible, BNYM may publish sufficient notice by alternate means that approximate the terms and conditions described in this paragraph.

Redemption upon Tax Event

We may redeem the 2029 Notes if certain tax-related events occur. If we redeem the 2029 Notes as a result of a tax event and the 2029 Notes are admitted to the Official List and to trading on its regulated market, we will publish a notice of the redemption in Dublin, Ireland. The redemption price paid for the 2029 Notes upon any such redemption will be paid in euro.

Prescription

Under New York law, any legal action to enforce our payment obligations evidenced by the 2029 Notes must be commenced within six years after payment is due. Thereafter, our payment obligations will generally become unenforceable.

Replacement of the 2029 Notes

If any mutilated 2029 Note is surrendered to BNYM, we will execute and the trustee will authenticate and deliver a new note of the same series and principal amount in exchange for such mutilated 2029 Note. If BNYM and we receive evidence to our satisfaction of the destruction, loss or theft of any 2029 Note and any security or indemnity required by it and us, then we shall execute, and BNYM shall authenticate and deliver, in lieu of such destroyed, lost or stolen note, a new 2029 Note of the same series and principal amount. All expenses associated with issuing the new note shall be borne by the owner of the mutilated, destroyed, lost or stolen 2029 Note.

The 2034 Notes

The 2034 Notes were issued under and pursuant to the 2005 Indenture. The 2034 Notes were issued in registered book-entry form without interest coupons in denominations of £50,000 and integral multiples of £1,000 in excess thereof. The 2034 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our existing and future senior unsecured debt.

The 2034 Notes will mature on March 27, 2034. Unless previously redeemed or purchased and cancelled, we will repay the 2034 Notes at 100% of their principal amount, together with accrued and unpaid interest thereon at maturity. We will pay principal of and interest on the 2034 Notes in pounds sterling or, solely if the United Kingdom adopts the euro, in euro.

The 2034 Notes were issued in an aggregate principal amount of £1,000,000,000. We may, without the consent of the holders of the 2034 Notes, create and issue additional notes ranking equally with and otherwise similar in all respects to the 2034 Notes (except for the public offering price and the issue date) so that those additional notes will be consolidated and form a single series with the 2034 Notes. No additional 2034 Notes may be issued if an event of default under the 2005 Indenture has occurred and is continuing.

The 2034 Notes bear interest from March 27, 2009 at the annual interest rate of 5.625%. Interest on each 2024 Note is payable semi-annually in arrears on March 27 and September 27 of each year, beginning on September 27, 2009, to the person in whose name the 2034 Note is registered at the close of business on the immediately preceding March 15 or September 15, as the case may be. Interest on the 2034 Notes is computed on the basis of a 360-day year consisting of twelve 30-day months.

We will pay to beneficial owners of notes who are non-U.S. persons additional amounts in the event of deduction or withholding of taxes, assessments or other governmental charges imposed by the United States or any taxing authority thereof or therein. Any additional amounts will be paid in pounds sterling or, if the United Kingdom adopts the euro, in euro.

The 2034 Notes are redeemable at our option, as described below. The 2034 Notes are not subject to a sinking fund and are not convertible or exchangeable.

The 2024 Notes are subject to defeasance.

If any interest payment date for the 2034 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any delayed payment. The term "***business day***" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are generally authorized or required by law or regulation to close in The City of New York or London.

If, prior to the maturity of the 2034 Notes, the United Kingdom adopts the euro as its lawful currency in accordance with the Treaty Establishing the European Communities, as amended from time to time, the 2034 Notes will be re-denominated into euro, and the regulations of the European Commission relating to the euro shall apply to the 2034 Notes. The circumstances and consequences described in this paragraph will not entitle us, BNYM under the 2005 Indenture or any holder of the 2034 Notes to redeem early, rescind or receive notice relating to the 2034 Notes, repudiate the terms of the 2034 Notes or the 2005 Indenture, or raise any defense, request any compensation or make any claim with respect to the 2034 Notes or the 2005 Indenture, nor will these circumstances and consequences affect any of our other obligations under the 2034 Notes or the 2005 Indenture.

Notices to holders of the 2034 Notes will be mailed to such holders. Any notice shall be deemed to have been given on the date of mailing and publication or, if published more than once, on the date of first publication. So long as the 2034 Notes are represented by a global security deposited with the Common Depositary for Clearstream and Euroclear, notices to holders may be given by delivery to Clearstream and Euroclear, and such notices shall be deemed to be given on the date of delivery to Clearstream and Euroclear. BNYM will mail notices by first-class mail, postage prepaid, to each registered holder's last known address as it appears in the security register that BNYM maintains. BNYM will only mail these notices to the registered holder of the 2034 Notes. Holders of 2034 Notes will not receive notices regarding the 2034 Notes directly from us unless we reissue the 2034 Notes in fully certificated form.

BNYM will publish any notices regarding the 2034 Notes in a daily newspaper of general circulation in The City of New York and in London. If the 2034 Notes are admitted to the Official List and to trading on its regulated market, BNYM will publish notices regarding the 2034 Notes in a daily newspaper of general circulation in Dublin, Ireland for so long as such publication is required pursuant to the Prospectus Directive or the rules of the applicable stock exchange. We expect that publication will be made in The City of New York in *The Wall Street Journal*, in London in the *Financial Times* and in Dublin, Ireland in the *Irish Times*. If publication in Dublin, Ireland is not practical, BNYM will publish these notices in an English language newspaper of general circulation elsewhere in Europe. Published notices will be deemed to have been given on the date they are published or, if published more than once, on the date of first publication. If publication as described above becomes impossible, BNYM may publish sufficient notice by alternate means that approximate the terms and conditions described in this paragraph.

Redemption upon Tax Event

We may redeem the 2034 Notes if certain tax-related events occur. If we redeem the 2034 Notes as a result of a tax event and the 2034 Notes are admitted to the Official List and to trading on its regulated market, we will publish a notice of the redemption in Dublin, Ireland. The redemption price paid for the 2034 Notes upon any such redemption will be paid in pounds sterling or, if the United Kingdom adopts the euro, in euro.

Prescription

Under New York law, any legal action to enforce our payment obligations evidenced by the 2034 Notes must be commenced within six years after payment is due. Thereafter, our payment obligations will generally become unenforceable.

Replacement of the 2034 Notes

If any mutilated 2034 Note is surrendered to BNYM, we will execute and the trustee will authenticate and deliver a new note of the same series and principal amount in exchange for such mutilated 2034 Note. If BNYM and we receive evidence to our satisfaction of the destruction, loss or theft of any 2034 Note and any security or indemnity required by it and us, then we shall execute, and BNYM shall authenticate and deliver, in lieu of such destroyed, lost or stolen note, a new 2034 Note of the same series and principal amount. All expenses associated with issuing the new note shall be borne by the owner of the mutilated, destroyed, lost or stolen 2034 Note.

The 2035 Notes

The 2035 Notes were issued under and pursuant to the 2002 Indenture. The 2035 Notes were issued in registered book-entry form without interest coupons in denominations of £1,000 and integral multiples of £1,000 in excess thereof. The 2035 Notes constitute our senior, unsecured and unsubordinated debt obligations and rank equally among themselves and with all of our existing and future senior, unsecured and unsubordinated debt.

The 2035 Notes will mature on September 28, 2035. Unless previously redeemed or purchased and cancelled, we will repay the 2035 Notes at 100% of their principal amount together with accrued and unpaid interest thereon at maturity. We will pay principal of, interest on and any other amounts payable under the 2035 Notes in pounds sterling or, if the United Kingdom adopts the euro, in euro.

The 2035 Notes were issued in a total principal amount of £1,000,000,000. We may, without the consent of the holders of the 2035 Notes, create and issue additional notes ranking equally with the 2035 Notes and otherwise similar in all respects to the 2035 Notes so that those additional notes will be consolidated and form a single series with the 2035 Notes. No additional 2035 Notes may be issued if an event of default under the 2002 Indenture has occurred.

The 2035 Notes are redeemable at our option, as described below. The 2035 Notes are not subject to a sinking fund. The 2035 Notes are subject to defeasance. The 2035 Notes are not convertible or exchangeable.

The 2035 Notes bear interest from September 29, 2004 at the annual interest rate of 5.250%. Interest is payable semi-annually in arrears on September 28 and March 28 of each year, beginning on March 28, 2005, to the person in whose name the 2035 Note is registered at the close of business on the preceding September 15 or March 15, as the case may be. Interest on the 2035 Notes is computed on the basis of a 360-day year of twelve 30-day months.

The 2035 Notes do not have the covenant restricting the grant of liens and cross-default event of default provisions.

If any interest payment date for the 2035 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any delayed payment. The term "***business day***" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are generally authorized or required by law or regulation to close in The City of New York or London.

If, prior to the maturity of the 2035 Notes, the United Kingdom adopts the euro as its lawful currency in accordance with the Treaty establishing the European Communities, as amended from time to time, the 2035 Notes will be re-denominated into euro, and the regulations of the European Commission relating to the euro shall apply to the 2035 Notes. The circumstances and consequences described in this paragraph will not entitle us, the trustee under the 2002 Indenture or any holder of the 2035 Notes to redeem early, rescind, or receive notice relating to the 2035 Notes, repudiate the terms of the 2035 Notes or the 2002 Indenture, or raise any defense, request any compensation or make any claim with respect to the 2035 Notes or the 2002 Indenture, nor will these circumstances and consequences affect any of our other obligations under the 2035 Notes or the 2002 Indenture.

While the 2035 Notes are represented by a global note deposited with the trustee, as common depositary for Clearstream and Euroclear with respect to the 2035 Notes, notices to holders may be given by delivery to Clearstream and Euroclear, and such notices shall be deemed to be given on the date of delivery to Clearstream and Euroclear. The trustee will mail notices by first-class mail, postage prepaid, to each registered holder's last known address as it appears in the security register that the trustee maintains. The trustee will only mail these notices to the registered holder of the 2035 Notes. Holders of 2035 Notes will not receive notices regarding the 2035 Notes directly from us unless we reissue the 2035 Notes in fully certificated form.

The trustee will also publish notices regarding the 2035 Notes in a daily newspaper of general circulation in the City of New York and in London. We expect that publication will be made in the City of New York in *The Wall Street Journal*, in London in the *Financial Times* and in Dublin, Ireland in the *Irish Times*. If publication in Dublin, Ireland is not practical, the trustee will publish these notices in an English language newspaper of general circulation elsewhere in Europe. Published notices will be deemed to have been given on the date they are published or, if published more than once, on the date of first publication. If publication as described above becomes impossible, the trustee may publish sufficient notice by alternate means that approximate the terms and conditions described in this paragraph.

Optional Redemption

The 2035 Notes are redeemable as a whole or in part, at our option, at any time at a redemption price equal to the greater of (1) 100% of the principal amount of such 2035 Notes and (2) as determined by the Calculation Agent, the price at which the yield on the outstanding principal amount of the 2035 Notes on the Reference Date is equal to the yield on the Benchmark Gilt as of that date as determined by reference to the middle-market price on the Benchmark Gilt at 3:00 p.m., London time, on that date, in either case, plus accrued and unpaid interest on the 2035 Notes up to, but excluding, the date specified as the redemption date.

"***Reference Date***" means the date that is the first dealing day in London prior to the publication of the notice of redemption referred to below.

"***Benchmark Gilt***" means the 4.25% Treasury Stock due March 7, 2036 or such other U.K. government stock as the Calculation Agent, with the advice of three brokers and/or U.K. gilt-edged market makers or three other persons operating in the U.K. gilt-edged market that may be chosen by the Calculation Agent, may determine from time to time to be the most appropriate benchmark U.K. government stock for the notes.

"***Calculation Agent***" means J.P. Morgan Trust Company, National Association or any successor entity.

We will give notice of any redemption between 30 and 60 days preceding the redemption date to each holder of the 2035 Notes to be redeemed as described above.

In the case of any partial redemption, selection of the 2035 Notes for redemption will be made by the trustee under the 2002 Indenture in compliance with the rules and requirements of the principal securities exchange, if any, on which the 2035 Notes are listed or, if the 2035 Notes are not so listed or that exchange prescribes no method of selection, on a pro rata basis, by lot or by any other method as the trustee in its sole discretion deems to be fair and appropriate, although no 2035 Note of £1,000 in original principal amount or less shall be redeemed in part. If any 2035 Note is to be redeemed in part only, the notice of redemption relating to the 2035 Note will state the portion of the principal amount thereof to be redeemed. A new 2035 Note in principal amount equal to the unredeemed portion thereof will be issued and delivered to the trustee, or its nominee, or, in the case of 2035 Notes in definitive form, issued in the name of the holder thereof, in each case upon cancellation of the original 2035 Note.

Unless we default in payment of the redemption price of the 2035 Notes, on and after the redemption date, interest will cease to accrue on the 2035 Notes or the portions of the 2035 Notes called for redemption.

Redemption upon Tax Event

The 2035 Notes may be redeemed at our option in whole, but not in part, on not more than 60 days' and not less than 30 days' notice, at a redemption price equal to 100% of their principal amount, if we determine that as a result of any change or amendment to the laws, treaties, regulations or rulings of the United States or any political subdivision or taxing authority thereof, or any proposed change in such laws, treaties, regulations or rulings, or any change in the official application, enforcement or interpretation of those laws, treaties, regulations or rulings, including a holding by a court of competent jurisdiction in the United States, or any other action, other than an action predicated on law generally known on or before September 22, 2004 except for proposals before the Congress before that date, taken by any taxing authority or a court of competent jurisdiction in the United States, or the official proposal of any action, whether or not such action or proposal was taken or made with respect to us, (A) we have or will become obligated to pay additional amounts on any 2035 Note or (B) there is a substantial possibility that we will be required to pay those additional amounts. Prior to the publication of any notice of such a redemption, we will deliver to the trustee (1) an officers' certificate stating that we are entitled to effect such a redemption and setting forth a statement of facts showing that the conditions precedent to the right of our company to so redeem have occurred and (2) an opinion of counsel to that effect based on that statement of facts.

Payment of Additional Amounts

We will pay to beneficial owners of 2035 Notes who are non-U.S. persons additional amounts in the event of deduction or withholding of taxes, assessments or other governmental charges imposed by the United States or any taxing authority thereof or therein.

Prescription

Under New York's statute of limitations, any legal action to enforce our payment obligations evidenced by the 2035 Notes must be commenced within six years after payment is due. Thereafter our payment obligations will generally become unenforceable.

Replacement of 2035 Notes

If any mutilated 2035 Note is surrendered to the trustee, we will execute and the trustee will authenticate and deliver a new note of the same series and principal amount in exchange for such mutilated 2035 Note. If the trustee and we receive evidence to our satisfaction of the destruction, loss or theft of any 2035 Note and any security or indemnity required by it and us, then we shall execute, and the trustee shall authenticate and deliver, in lieu of such destroyed, lost or stolen note, a new 2035 Note of the same series and principal amount. All expenses associated with issuing the new note shall be borne by the owner of the mutilated, destroyed, lost or stolen 2035 Note.

The 2039 Notes

The 2039 Notes were issued under and pursuant to the 2005 Indenture. The 2039 Notes were issued in registered book-entry form without interest coupons in denominations of £50,000 and integral multiples of £1,000 in excess thereof. The 2039 Notes constitute our senior unsecured debt obligations and rank equally among themselves and with all of our existing and future senior unsecured debt.

The 2039 Notes will mature on January 19, 2039. Unless previously redeemed or purchased and cancelled, we will repay the 2039 Notes at 100% of their principal amount, together with accrued and unpaid interest thereon at maturity. We will pay principal of and interest on the notes in pounds sterling or, solely if the United Kingdom adopts the euro, in euro.

The 2039 Notes were issued in a total principal amount of £1,000,000,000. We may, without the consent of the holders of the 2039 Notes, create and issue additional notes ranking equally with and otherwise similar in all respects to the 2039 Notes (except for the public offering price and the issue date) so that those additional notes will be consolidated and form a single series with the 2039 Notes. No additional 2039 Notes may be issued if an event of default under the 2005 Indenture has occurred and is continuing.

The 2039 Notes bear interest from December 19, 2006 at the annual interest rate of 4.875%. Interest on each 2039 Note is payable semi-annually in arrears on January 19 and July 19 of each year, beginning on July 19, 2007, to the person in whose name the 2039 Note is registered at the close of business on the immediately preceding January 15 or July 15, as the case may be. Interest on the 2039 Notes is computed on the basis of a 360-day year consisting of twelve 30-day months.

We will pay to beneficial owners of 2039 Notes who are non-U.S. persons additional amounts in the event of deduction or withholding of taxes, assessments or other governmental charges imposed by the United States or any taxing authority thereof or therein.

The 2039 Notes are redeemable at our option, as described below. The 2039 Notes are not subject to a sinking fund. The 2039 Notes re subject to defeasance. The 2039 Notes are not convertible or exchangeable.

The 2039 Notes do not have a covenant restricting the grant of liens and cross-default event of default provisions.

If any interest payment date for the 2039 Notes would otherwise be a day that is not a business day, then the interest payment date will be postponed to the following date that is a business day. Interest will not accrue as a result of any delayed payment. The term "***business day***" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are generally authorized or required by law or regulation to close in The City of New York or London.

If, prior to the maturity of the 2039 Notes, the United Kingdom adopts the euro as its lawful currency in accordance with the Treaty Establishing the European Communities, as amended from time to time, the 2039 Notes will be re-denominated into euro, and the regulations of the European Commission relating to the euro shall apply to the 2039 Notes. The circumstances and consequences described in this paragraph will not entitle us, BNYM under the 2005 Indenture or any holder of the 2039 Notes to redeem early, rescind or receive notice relating to the 2039 Notes, repudiate the terms of the 2039 Notes or the 2005 Indenture, or raise any defense, request any compensation or make any claim with respect to the 2039 Notes or the 2005 Indenture, nor will these circumstances and consequences affect any of our other obligations under the 2039 Notes or the 2005 Indenture.

Notices to holders of the 2039 Notes will be mailed to such holders. Any notice shall be deemed to have been given on the date of mailing and publication or, if published more than once, on the date of first publication. So long as the 2039 Notes are represented by a global security deposited with the Common Depositary for Clearstream and Euroclear, notices to holders may be given by delivery to Clearstream and Euroclear, and such notices shall be deemed to be given on the date of delivery to Clearstream and Euroclear. BNYM will mail notices by first-class mail, postage prepaid, to each registered holder's last known address as it appears in the security register that BNYM maintains. BNYM will only mail these notices to the registered holder of the 2039 Notes. Holders of 2039 Notes will not receive notices regarding the 2039 Notes directly from us unless we reissue the 2039 Notes in fully certificated form.

BNYM will publish any notices regarding the 2039 Notes in a daily newspaper of general circulation in The City of New York and in London. We expect that publication will be made in The City of New York in *The Wall Street Journal*, in London in the *Financial Times* and in Dublin, Ireland in the *Irish Times*. If publication in Dublin, Ireland is not practical, BNYM will publish these notices in an English language newspaper of general circulation elsewhere in Europe. Published notices will be deemed to have been given on the date they are published or, if published more than once, on the date of first publication. If publication as described above becomes impossible, BNYM may publish sufficient notice by alternate means that approximate the terms and conditions described in this paragraph.

Optional Redemption

The 2039 Notes are redeemable as a whole or in part, at our option, at any time at a redemption price equal to the greater of (1) 100% of the principal amount of such 2039 Notes and (2) as determined by the Calculation Agent, the price at which the yield on the outstanding principal amount of such 2039 Notes on the Reference Date is equal to the yield on the Benchmark Gilt as of that date as determined by reference to the middle-market price on the Benchmark Gilt at 3:00 p.m., London time, on that date, in either case, plus accrued and unpaid interest on such 2039 Notes up to, but excluding, the date specified as the redemption date.

"***Reference Date***" means the date that is the first dealing day in London prior to the publication of the notice of redemption referred to below.

"***Benchmark Gilt***" means the 4.75% Treasury Stock due December 7, 2038, or such other U.K. government stock as the Calculation Agent, with the advice of three brokers and/or U.K. gilt-edged market makers or three other persons operating in the U.K. gilt-edged market that may be chosen by the Calculation Agent, may determine from time to time to be the most appropriate benchmark U.K. government stock for the notes.

"***Calculation Agent***" means The Bank of New York, or any successor entity.

We will give notice of any redemption between 30 and 60 days preceding the redemption date to each holder of the 2039 Notes to be redeemed as described above.

The redemption price paid for the 2039 Notes upon any such redemption will be paid in pounds sterling or, solely if the United Kingdom adopts the euro, in euro.

In the case of any partial redemption, selection of the 2039 Notes for redemption will be made by BNYM under the 2005 Indenture in compliance with the rules and requirements of the principal securities exchange, if any, on which the 2039 Notes are listed at the time of redemption or, if the 2039 Notes are not so listed or that exchange prescribes no method of selection, on a pro rata basis, by lot or by any other method as BNYM in its sole discretion deems to be fair and appropriate, although no 2039 Note of £50,000 in original principal amount or less shall be redeemed in part. If any 2039 Note is to be redeemed in part only, the notice of redemption relating to the 2039 Note will state the position of the principal amount thereof to be redeemed. A new 2039 Note in principal amount equal to the unredeemed portion thereof will be issued and delivered to BNYM, or its nominee, or, in the case of 2039 Notes in definitive form, issued in the name of the holder thereof, in each case upon cancellation of the original 2039 Note.

Unless we default in payment of the redemption price of the 2039 Notes, on and after the redemption date, interest will cease to accrue on the 2039 Notes or the portions of the 2039 Notes called for redemption.

We may redeem the 2039 Notes if certain tax-related events occur. If we redeem the 2039 Notes as a result of a tax event, we will publish a notice of the redemption in Dublin, Ireland. The redemption price paid for the 2039 Notes upon any such redemption will be paid in pounds sterling or, solely if the United Kingdom adopts the euro, in euro.

Prescription

Under New York law, any legal action to enforce our payment obligations evidenced by the 2039 Notes must be commenced within six years after payment is due. Thereafter, our payment obligations will generally become unenforceable.

Replacement of the 2039 Notes

If any mutilated 2039 Note is surrendered to BNYM, we will execute and BNYM will authenticate and deliver a new note of the same series and principal amount in exchange for such mutilated 2039 Note. If BNYM and we receive evidence to our satisfaction of the destruction, loss or theft of any 2039 Note and any security or indemnity required by it and us, then we shall execute, and BNYM shall authenticate and deliver, in lieu of such destroyed, lost or stolen note, a new 2039 Note of the same series and principal amount. All expenses associated with issuing the new note shall be borne by the owner of the mutilated, destroyed, lost or stolen 2039 Note.

Exhibit 10.1

WALMART DEFERRED COMPENSATION MATCHING PLAN

Amended and Restated Effective November 8, 2023

TABLE OF CONTENTS

PAGE

WALMART DEFERRED COMPENSATION MATCHING PLAN

ARTICLE I.
GENERAL

1.1 Purpose.

The purpose of the Walmart Deferred Compensation Matching Plan is to enable certain individuals to defer compensation and to be credited with matching allocations and earnings. The Plan is intended to reward such individuals for their contributions to the success of Walmart and its Related Affiliates. The Plan is also intended to assist such individuals in saving for retirement by providing benefits that are in excess of benefits permitted by applicable law under the 401(k) Plan.

1.2 Effective Date.

The effective date of the amended and restated Plan is November 8, 2023.

1.3 Nature of Plan.

The Plan is intended to be (and shall be administered as) an unfunded employee pension plan benefiting a select group of management or highly compensated employees under the provisions of ERISA. The Plan shall be "unfunded" for tax purposes and for purposes of Title I of ERISA. Any and all payments under the Plan shall be made solely from the general assets of Walmart. A Participant's interests under the Plan do not represent or create a claim against specific assets of Walmart or any Employer. Nothing herein shall be deemed to create a trust of any kind or create any fiduciary relationship between the Committee, the Plan Administrator, Walmart or any Employer and a Participant, the Participant's beneficiary or any other person. To the extent any person acquires a right to receive payments from Walmart under this Plan, such right is no greater than the right of any other unsecured general creditor of Walmart. The Plan is intended to be in compliance with Code Section 409A and shall be interpreted, applied and administered at all times in accordance with Code Section 409A and guidance issued thereunder.

ARTICLE II.
DEFINITIONS

2.1 Definitions.

Whenever used in this Plan, the following words and phrases have the meaning set forth below unless the context plainly requires a different meaning:

(a) **Account** means the bookkeeping account maintained on behalf of a Participant under the Plan to reflect such Participant's Class Accounts.

(b) **Class Account** means a bookkeeping subaccount maintained under a Participant's Account to reflect such Participant's Deferral Credits and Employer Matching Contribution Credits, and earnings credited in accordance with Section 4.4.

(1) Each Class Account shall be a Post-2020 Class Account or a Pre-2021 Class Account. A Post-2020 Class Account shall be maintained under a Participant's Account to reflect Deferral Credits and Employer Matching Contribution Credits earned for each Plan Year commencing on or after February 1, 2021. A Pre-2021 Class Account shall be maintained under a Participant's Account to reflect Deferral Credits and Employer Matching Contribution Credits attributable to all Plan Years commencing prior to February 1, 2021.

(2) Each Post-2020 Class Account shall consist of a Deferral Account and a Matching Account. Such Deferral Account may be allocated among one or more Scheduled In-Service Accounts and one or more Retirement Accounts, as elected or deemed elected by the Participant in accordance with Section 3.5. Such Matching Account may be allocated to one Retirement Account, as elected or deemed elected by the Participant in accordance with Section 3.5.

(3) Each Pre-2021 Class Account shall consist of a Deferral Account and a Matching Account. Such Deferral Account may be allocated among one or more Scheduled In-Service Accounts and one or more Retirement Accounts to the extent authorized hereunder and as elected or deemed elected by the Participant in accordance with Section 3.5. Such Matching Account may be allocated among one or more Retirement Accounts as elected or deemed elected by the Participant in accordance with Section 3.5.

(c) **Code** means the Internal Revenue Code of 1986, as amended from time to time.

(d) **Committee** means the Compensation and Management Development Committee of the Board of Directors of Walmart.

(e) **Compensation** means a Participant's base compensation for a Plan Year with respect to services rendered for an Employer. Compensation includes, but is not limited to, short-term disability payments made by an Employer. Compensation does not include military differential payments.

(f) **Deferral Account** means a bookkeeping subaccount maintained under a Participant's Class Account to reflect his or her Deferral Credits.

(g) **Deferral Credit** means the amount of Deferred Compensation credited to a Participant's Deferral Account in accordance with Section 3.1, the amount of Deferred MIP Bonus credited to a Participant's Deferral Account in accordance with Section 3.2, and the amount of Deferred Special Bonus credited to a Participant's Deferral Account in accordance with Section 3.3.

(h) **Deferred Compensation** means the Compensation deferred by a Participant in accordance with Section 3.1.

(i) **Deferred MIP Bonus** means the amount deferred by a Participant in accordance with Section 3.2 from bonuses payable to the Participant under the MIP.

(j) **Deferred Special Bonus** means the amount deferred by a Participant in accordance with Section 3.3 from a Special Bonus payable to the Participant.

(k) **Disabled** means the Participant has incurred a Separation from Service because the Participant, as determined by the Plan Administrator or his or her delegate, is unable to engage in any substantial gainful activity by reason of a medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than twelve (12) months.

(l) **Eligible Officer** means an individual who is a corporate officer of an Employer, and who holds the title of Vice President or above, Treasurer, Controller, or an officer title of similar rank or other position as determined by the Plan Administrator. In no event will any individual constitute an Eligible Officer if he or she is not subject to federal income tax withholding in the United States. Notwithstanding anything in the preceding provisions of this Section 2.1(k), Eligible Officer shall exclude any individual who, pursuant to Walmart's Global Assignment Policy, is seconded to an Employer and, under the terms of his or her offer or assignment letter, he or she is intended to remain on the home country's benefit and pension programs. For purposes of this Plan, effective February 1, 2019 an individual shall not become an Eligible Officer prior to the first day of the month immediately following the month in which the individual would otherwise satisfy the requirements of being an Eligible Officer.

(m) **Eligible Participant** means with respect to a Plan Year an individual who either (1) is an Eligible Officer, or (2) is an employee of an Employer and who as of the October 31 immediately preceding the Plan Year is in an eligible position determined by the Plan Administrator and is a member of a select group of management or highly compensated employees under the provisions of ERISA. For purposes of this Plan, effective February 1, 2019, an individual shall not become an Eligible Participant prior to the first day of the month immediately following the month in which the individual would otherwise satisfy the requirements of being an Eligible Participant.

(n) **Employer** means Walmart and any entity, whether or not incorporated, which is a member of a controlled group of corporations, trades or businesses, as defined in Code Sections 414(b) and 414(c), of which Walmart is a member, and which has been designated by the Committee as a participating employer in the Plan.

(o) **Employer Matching Contribution Credits** means the amount credited to a Participant's Matching Account pursuant to Section 3.4.

(p) **ERISA** means the Employee Retirement Income Security Act of 1974, as amended from time to time.

(q) **Excess Compensation** means for a Plan Year the excess, if any, of (1) the sum of (i) the Participant's base compensation for the Plan Year for services rendered for an Employer, and (ii) the Participant's MIP bonus payable with respect to a performance period that coincides with the Plan Year or that ends within the Plan Year, over (2) the annual compensation limit under Code Section 401(a)(17) (or under a comparable provision of the Internal Revenue Code of the Commonwealth of Puerto Rico if the Participant is an eligible participant under the Walmart Puerto Rico 401(k) Plan) in effect for the calendar year in which the Plan Year begins. For purposes of this paragraph, a Participant's base compensation and a Participant's MIP bonus shall include the cash amounts of such base compensation and MIP bonus payable to the Participant regardless of whether the payment of any or all of such amounts to the Participant is deferred or not made on account of (1) a deferral election by the Participant under the 401(k) Plan, (2) a deferral election by the Participant under this Plan, (3) a pre-tax contribution by the Participant under Code Section 125, (4) a pre-tax contribution by the Participant under Code Section 132(f)(4), or (5) withholding for the payment of employment taxes or income taxes with respect to the Participant.

(r) **401(k) Plan** means the Walmart 401(k) Plan and the Walmart Puerto Rico 401(k) Plan, as amended from time to time.

(s) **Gross Misconduct** means conduct engaged in by the Participant which has been deemed by the Plan Administrator or his or her delegate to be detrimental to the best interests of Walmart or any Related Affiliate or any entity in which Walmart has an ownership interest. Examples of such conduct include, without limitation, disclosure of confidential information in violation of Walmart's Statement of Ethics, theft, the commission of a felony or a crime involving moral turpitude, gross misconduct or similar serious offenses.

(t) **Interest Rate** means a daily rate of simple interest based on the yield on United States Treasury securities (not indexed for inflation) with a constant maturity of ten (10) years, as of the first business day of January preceding such Plan Year, plus two hundred seventy (270) basis points. This rate shall be determined on the basis of Federal Reserve Statistical Release H-15 (or any successor statistical release of the Federal Reserve) and, if there is no such statistical release, on the basis of such other generally recognized source of information concerning the market for United States Treasury securities as the Committee selects.

(u) **Investment Options** means the investment options, determined from time to time by the Plan Administrator, used to credit earnings, gains and losses on Account balances.

(v) **Matching Account** means a bookkeeping subaccount maintained under a Participant's Class Account to reflect his or her Employer Matching Contribution Credits.

(w) **MIP** means the Walmart Inc. Management Incentive Plan, as amended from time to time, without regard to any non-U.S. subplans.

(x) **Participant** means any individual for whom an Account is maintained. An individual will cease to be a Participant at such time that the Participant's Account has been fully distributed or forfeited in accordance with the Plan.

(y) **Plan** means the Walmart Deferred Compensation Matching Plan, as set forth herein, and as amended from time to time.

(z) **Plan Administrator** means the Senior Vice President, Global Total Rewards of Walmart or any successor position.

(aa) **Plan Year** means the twelve (12)-month period commencing on February 1 and ending on January 31.

(bb) **Post-2020 Class Account** means a Class Account maintained under a Participant's Account to reflect Deferral Credits and Employer Matching Contribution Credits earned for each Plan Year commencing on or after February 1, 2021.

(cc) **Post-Investments Portion** means the portion of a Participant's Account, if any, attributable to Deferral Credits and Employer Matching Contribution Credits earned in Plan Years commencing on or after February 1, 2023.

(dd) **Pre-2021 Class Account** means a Class Account maintained under a Participant's Account to reflect Deferral Credits and Employer Matching Contribution Credits attributable to all Plan Years commencing prior to February 1, 2021.

(ee) **Pre-Investments Portion** means the portion of a Participant's Account, if any, attributable to Deferral Credits and Employer Matching Contribution Credits earned in Plan Years commencing prior to February 1, 2023.

(ff) **Related Affiliate** means all persons with whom Walmart would be considered a single employer under Code Sections 414(b) and 414(c), except that in applying Code Sections 1563(a)(1), (2) and (3) for purposes of determining a controlled group of corporations under Code Section 414(b), the language "at least 50 percent" shall be used instead of "at least 80 percent" in each place it appears in Code Sections 1563(a)(1), (2) and (3), and in applying Treas. Regs. Sec. 1.414(c)-2 for purposes of determining a controlled group of trades or businesses under Code Section 414(c), the language "at least 50 percent" shall be used instead of "at least 80 percent" in each place it appears in Treas. Regs. Sec. 1.414(c)-2.

(gg) **Retirement Account** means a bookkeeping subaccount maintained under a Participant's Deferral Account or Matching Account to which Deferral Credits and Employer Matching Contribution Credits (as applicable), and earnings credited in accordance with Section 4.4, may be allocated pursuant to the election or deemed election of the Participant in accordance with Section 3.5.

(hh) **Scheduled In-Service Account** means a bookkeeping subaccount maintained under a Participant's Deferral Account to which Deferral Credits and earnings credited in accordance with Section 4.4 may be allocated pursuant to the election of the Participant in accordance with Section 3.5.

(ii) **Scheduled Pay Date** means, with respect to each Scheduled In-Service Account, the first day of a calendar month designated by the Participant in accordance with Section 3.5. In no event shall such date be earlier than the first day of the second Plan Year beginning after the Plan Year for which Deferral Credits are first allocated to such Scheduled In-Service Account. Once selected, the Scheduled Pay Date with respect to any Scheduled In-Service Account is irrevocable. If a Participant fails to designate a Scheduled Pay Date with respect to a Scheduled In-Service Account, then the Participant is deemed to have designated as the Scheduled Pay Date for such Scheduled In-Service Account the first day of the second Plan Year beginning after the Plan Year for which Deferral Credits are first allocated to such Scheduled In-Service Account.

(jj) **Separation from Service** means the Participant has a termination of employment (other than on account of death) with the Company. For purposes of this paragraph, "Company" means the Employer and any Related Affiliate. Whether a termination of employment has occurred shall be determined based on whether the facts and circumstances indicate the Participant and the Company reasonably anticipate that no further services will be performed by the Participant for the Company; provided, however, that a Participant shall be deemed to have a termination of employment if the level of services he or she actually performs for the Company after a certain date permanently decreases to no more than twenty percent (20%) of the average level of bona fide services performed for the Company by the Participant (whether as an employee or independent contractor) over the immediately preceding 36-month period (or the full period of services for the Company if the Participant has been providing services to the Company for less than 36 months). For this purpose, a Participant is not treated as having a Separation from Service while he or she is on a military leave, sick leave, or other bona fide leave of absence, if the period of such leave does not exceed six (6) months, or if longer, so long as the Participant has a right to reemployment with the Company under an applicable statute or by contract. This definition of Separation from Service is intended to be consistent with the separation from service requirements as defined in Code Section 409A.

(kk) **Separation Pay Date** means the last day of the calendar month in which falls the date that is six (6) months after a Participant's Separation from Service.

(ll) **Special Bonus** means a bonus, other than a bonus payable under the MIP, that is payable to an Eligible Officer with respect to services rendered or to be rendered for an Employer and that is eligible for deferral under the Plan either because (1) the bonus is payable pursuant to an offer letter accepted in writing by the Eligible Officer before commencement of employment and that specifically refers to the deferability of the bonus by explicit reference to this Plan or (2) the bonus is eligible for deferral in accordance with guidelines established by the Plan Administrator, or by an officer to whom the Plan Administrator has delegated authority to establish such guidelines, and the bonus requires as a condition of receipt of the bonus and to avoid forfeiture of the bonus that the recipient continue to perform services for the Employer for a period of at least thirteen (13) months after the date he or she obtains the legally binding right to the bonus.

(mm) **Unforeseeable Emergency** means a severe financial hardship to the Participant resulting from an illness or accident of the Participant, the Participant's spouse, the Participant's beneficiary, or the Participant's dependent (as defined in Code Section 152, without regard to subsections (b)(1), (b)(2) and (d)(1)(B)), the loss of the Participant's property due to casualty, or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant.

(nn) **Valuation Date** means the last business day of each month of the Plan Year.

(oo) **Walmart** means Walmart Inc., a Delaware corporation.

(pp) **Years of Participation** means a period of Plan Years which includes the first Plan Year with respect to which an Eligible Participant makes a deferral election in accordance with any one or more of Sections 3.1, 3.2 and 3.3 and an amount is credited to the Participant's Account with respect to any such deferral election, and each subsequent Plan Year during all or part of which the Participant remains a Participant and an employee of an Employer. In addition to the preceding definition, a Participant's Years of Participation shall include any period commencing February 1 and ending January 31, whether before or after the effective date of the Plan, during which or with respect to which an account is maintained for the Participant under the Walmart Inc. Officer Deferred Compensation Plan, as such plan may be amended from time to time.

ARTICLE III.
DEFERRAL CREDITS AND MATCHING CONTRIBUTION CREDITS AND

ACCOUNT ALLOCATIONS

3.1 Deferred Compensation.

(a) For each Plan Year, each Eligible Officer may elect to defer, as Deferred Compensation, all or a portion of the Eligible Officer's Compensation to be otherwise paid for such Plan Year by the Employer, provided that: (i) for Plan Years commencing on and after February 1, 2022, an Eligible Officer may elect to defer no more than eighty percent (80%) of the Eligible Officer's Compensation for a Plan Year; and (ii) no election shall be effective to reduce amounts paid by the Employer to an Eligible Officer to an amount which is less than the sum of the amount the Employer is required to withhold for a Plan Year for purposes of federal, state, or local taxes (including, but not limited to, income and FICA withholding) or for insurance premiums or other withholdings as allowed by Code Section 409A. The Eligible Officer's Deferred Compensation will be deferred proratably for each payroll period of the Plan Year. If a payroll period begins in one Plan Year and ends in the following Plan Year, the Deferred Compensation with respect to such payroll period shall be determined by the Eligible Officer's deferral election made with respect to the Plan Year in which the payroll period ends. All deferral elections made under this Section 3.1 must be filed with, and on forms (which may be electronic) approved by, the Plan Administrator.

(b) Compensation deferral elections must be filed:

(1) With respect to an individual who is an Eligible Officer as of the December 31 preceding the Plan Year for which the deferral election is to be effective, no later than such December 31; or

(2) With respect to an individual who first becomes an Eligible Officer during the Plan Year, within thirty (30) days following the first date he or she becomes an Eligible Officer. For purposes of this rule, an Eligible Officer will be treated as first becoming an Eligible Officer during the Plan Year only if:

(A) he or she was not eligible to participate in the Plan or any other plan required by Code Section 409A to be aggregated with the Plan at any time during the twenty-four (24)-month period ending on the date during the Plan Year he or she becomes an Eligible Officer; or

(B) he or she was paid all amounts previously due under the Plan and any other plan required by Code Section 409A to be aggregated with the Plan and, on and before the date of the last such payment, was not eligible to continue to participate in the Plan and any other plan required by Code Section 409A to be aggregated with the Plan for periods after such payment.

A deferral election under this Section 3.1(b)(2) will be effective only with respect to Compensation for payroll periods beginning after the payroll period in which the Eligible Officer's election form (which may be electronic) is received by the Plan Administrator and has become irrevocable. For the avoidance of doubt, an Eligible Officer's election form shall become irrevocable at the end of the thirty (30) day period following the first date he or she becomes an Eligible Officer. In addition, a deferral election under this Section 3.1(b)(2) will be effective only if the deferral election meets the requirements set forth in Code Section 409A(a)(4)(B).

(c) The Deferred Compensation of an Eligible Officer who elects to defer all or a portion of the Eligible Officer's Compensation under this Section 3.1 with respect to a Plan Year shall be credited to the Eligible Officer's Deferral Account under his or her Class Account for such Plan Year and shall be allocated to a Retirement Account or to a Scheduled In-Service Account under such Deferral Account in accordance with Section 3.5.

3.2 Deferred MIP Bonuses.

(a) For each Plan Year, each Eligible Participant may elect to defer all or a portion of the Eligible Participant's bonus (if any) to be otherwise paid to the Eligible Participant under the MIP with respect to a performance period under the MIP that coincides with the Plan Year or that ends within the Plan Year; provided, however, an Eligible Participant who is not an Eligible Officer may elect to defer no more than eighty percent (80%) of the Eligible Participant's MIP bonus for a Plan Year. No election under this Section 3.2 shall be effective to reduce amounts paid by the Employer to an Eligible Participant to an amount which is less than the sum of the amount the Employer is required to withhold for a Plan Year for purposes of federal, state, or local taxes (including, but not limited to, income and FICA withholding) or for insurance premiums or other withholdings as allowed by Code Section 409A. All bonus deferral elections made under this Section 3.2 must be filed with, and on forms (which may be electronic) approved by, the Plan Administrator.

(b) MIP bonus deferral elections must be filed:

(1) No later than the December 31 (or such other date as determined by the Plan Administrator or his or her delegate) preceding the first day of the performance period for which the deferral election is to be effective.

(2) If authorized by the Plan Administrator or his or her delegate with respect to an Eligible Participant, and if the MIP bonus constitutes "performance-based compensation" within the meaning of Code Section 409A based on services performed over a performance period of at least twelve (12) months, and if the Eligible Participant has been continuously employed by an Employer or a Related Affiliate since the first day of the performance period, then no later than the earlier of (i) the date that is six months prior to the last day of the performance period, or (ii) the date in the performance period as of which the amount of the MIP bonus has become both substantially certain to be paid and calculable.

(3) Solely with respect to an Eligible Officer who first becomes an Eligible Participant during the Plan Year, within thirty (30) days following the first date he or she becomes an Eligible Participant, as described in Code

Section 409A(a)(4)(B). For purposes of this rule, an Eligible Officer will be treated as first becoming an Eligible Participant during the Plan Year only if:

(A) he or she was not eligible to participate in the Plan or any other plan required by Code Section 409A to be aggregated with the Plan at any time during the twenty-four (24)-month period ending on the date during the Plan Year he or she becomes an Eligible Participant; or

(B) he or she was paid all amounts previously due under the Plan and any other plan required by Code Section 409A to be aggregated with the Plan and, on and before the date of the last such payment, was not eligible to continue to participate in the Plan and any other plan required by Code Section 409A to be aggregated with the Plan for periods after such payment.

An MIP bonus deferral election under this Section 3.2(b)(3) will be effective only with respect to an MIP bonus paid for services performed after such election. For this purpose, the amount of the MIP bonus payable to the Eligible Officer for services rendered subsequent to the Eligible Officer's election will be determined by multiplying the bonus by a fraction, the numerator of which is the number of calendar days remaining in the performance period after the election and the denominator of which is the total number of calendar days in such performance period. For purposes of this Section 3.2(b)(3), the date of an Eligible Officer's election is the date the executed election form (which may be electronic) is received by the Plan Administrator.

(c) The Deferred MIP Bonus of an Eligible Participant who elects to defer all or a portion of the Eligible Participant's MIP bonus under this Section 3.2 with respect to a performance period that coincides with a Plan Year or that ends within a Plan Year shall be credited to the Eligible Participant's Deferral Account under his or her Class Account for such Plan Year and shall be allocated to a Retirement Account or to a Scheduled In-Service Account under such Deferral Account in accordance with Section 3.5.

3.3 Deferred Special Bonuses.

(a) An Eligible Officer may elect to defer all or a portion of the Eligible Officer's Special Bonus to be otherwise paid to the Eligible Officer in a Plan Year. All Special Bonus deferral elections made under this Section 3.3 must be filed with, and on forms (which may be electronic) approved by, the Plan Administrator. No election under this Section 3.3 shall be effective to reduce amounts paid by the Employer to an Eligible Participant to an amount which is less than the sum of the amount the Employer is required to withhold for a Plan Year for purposes of federal, state, or local taxes (including, but not limited to, income and FICA withholding) for insurance premiums or other withholdings as allowed by Code Section 409A. For purposes of this Section 3.3, the date of an Eligible Officer's election is the date the executed election form (which may be electronic) is received by the Plan Administrator. A deferral election is not permitted with respect to a Special Bonus unless the Special Bonus is a type described in, and the deferral election with respect to the Special Bonus satisfies the applicable conditions of, Section 3.3(b) or Section 3.3(c).

(b) A Special Bonus described in this Section 3.3(b) is one that: (1) requires as a condition of receipt of the Special Bonus and to avoid forfeiture of the Special Bonus that the Eligible Officer continue to perform services for a period of at least thirteen (13) months after the date he or she obtains the legally binding right to the Special Bonus; (2) may not have an earlier vesting date for a good reason termination or the Eligible Officer's retirement; and (3) must otherwise meet the qualifications as described in Code Section 409A. The deferral election with respect to a Special Bonus described in this Section 3.3(b) must be filed within thirty (30) days after the Eligible Officer obtains the legally binding right to the Special Bonus.

(c) A Special Bonus described in this Section 3.3(c) is one payable pursuant to an offer letter accepted in writing by an Eligible Officer before commencement of employment and that specifically refers to the deferability of the Special Bonus by explicit reference to the Plan. The deferral election with respect to a Special Bonus described in this Section 3.3(c) must be filed prior to the time the Eligible Officer renders any services to the Employer, regardless of whether the deferral election relates to all of the Special Bonus or a portion of the Special Bonus.

(d) The Deferred Special Bonus of an Eligible Officer who elects to defer all or a portion of the Eligible Officer's Special Bonus under this Section 3.3 otherwise payable in a Plan Year shall be credited to the Eligible Officer's Deferral Account under his or her Class Account for such Plan Year and shall be allocated to a Retirement Account or to a Scheduled In-Service Account under such Deferral Account in accordance with Section 3.5.

3.4 Employer Matching Contribution Credits.

(a) If a Participant is employed by the Employer or any Related Affiliate on the last day of the Plan Year and has not incurred a Separation from Service during that Plan Year, and if Deferral Credits have been made to the Participant's Account with respect to the Plan Year, then to the extent applicable under the following provisions of this Section 3.4 an Employer Matching Contribution Credit will be made to the Participant's Matching Account under his or her Class Account for such Plan Year and shall be allocated to a Retirement Account under such Matching Account in accordance with Section 3.5. The amount of the Employer Matching Contribution Credit, if any, made to such Matching Account for the Plan Year will equal the total amount of Deferred Compensation and Deferred MIP Bonus credited to the Participant's Account for the Plan Year under Section 3.1(c) and Section 3.2(c); provided, however, in no event shall the Employer Matching Contribution Credit made to such Matching Account for a Plan Year exceed 6% of the Participant's Excess Compensation for such Plan Year. Notwithstanding the preceding provisions of this Section 3.4(a), an Employer

Matching Contribution Credit for a Plan Year shall not be made with respect to any Deferral Credits for the Plan Year that have been withdrawn in accordance with Section 5.5.

(b) A Participant shall become vested in his or her Matching Accounts, including earnings thereon, if the Participant has completed at least three (3) Years of Participation. If a Participant is not otherwise vested in the Participant's Matching Accounts under the preceding sentence of this Section 3.4(b), the Participant will become vested in the Participant's Matching Accounts if the Participant dies prior to the Participant's Separation from Service, or if the Participant is Disabled. Notwithstanding any provision hereunder to the contrary, a Participant's Matching Accounts shall be distributed pursuant to Article V only if the Participant has become vested in the Participant's Matching Accounts under this Section 3.4(b) as of the date of the Participant's Separation from Service.

3.5 Account Allocation Elections

(a) At the same time that an Eligible Participant makes an election to defer Compensation, an MIP bonus, or a Special Bonus to a Deferral Account in accordance with the provisions of the Plan, the Eligible Participant shall also make an election to allocate the amount or amounts subject to each such deferral election either to a Retirement Account or to a Scheduled In-Service Account under such Deferral Account. In addition to the preceding requirement, at the same time that an Eligible Participant makes an election to defer Compensation or an MIP bonus in accordance with the provisions of this Plan, the Eligible Participant shall also make an election to allocate the Employer Matching Contribution Credits (if any) with respect to such Deferred Compensation or Deferred MIP Bonus to one Retirement Account under the Matching Account of his or her Class Account for the Plan Year to which such Employer Matching Contribution Credits relate.

(b) At the time of an Eligible Participant's first election to allocate any amount subject to a deferral election (regardless of whether the amount is Deferred Compensation, Deferred MIP Bonus, Deferred Special Bonus or Employer Matching Contribution Credit) to a Retirement Account, the Eligible Participant shall also designate the form of distribution with respect to such Retirement Account. The form of distribution must be a form permitted under Section 5.4(a).

(c) At the time of an Eligible Participant's first election to allocate any amount subject to a deferral election (regardless of whether the amount is Deferred Compensation, Deferred MIP Bonus or Deferred Special Bonus) to a Scheduled In-Service Account, the Eligible Participant shall also designate the Scheduled Pay Date with respect to such Scheduled In-Service Account.

(d) If at the time of an Eligible Participant's deferral election under the Plan the Eligible Participant fails to make an account allocation election under Section 3.5(a), then:

(1) If the amount subject to such deferral election is for services attributable to a Plan Year commencing prior to February 1, 2021, such amount shall be allocated in the same manner as the same category of deferred amounts (meaning either Deferred Compensation, Deferred MIP Bonus, Deferred Special Bonus or Employer Matching Contribution Credits) were allocated for the most recent preceding Plan Year for which the Eligible Participant made an allocation election, but if none then to the Eligible Participant's Retirement Account under the Deferral Account or Matching Account (as applicable) of his Pre-2021 Class Account if there is only one, or equally to the Eligible Participant's Retirement Accounts under such Deferral Account or Matching Account if the Eligible Participant has more than one Retirement Account thereunder, but if the Eligible Participant has no Retirement Account thereunder then the amount subject to such deferral election shall be allocated to a Retirement Account deemed to be elected by the Participant under such Deferral Account or Matching Account with a lump sum form of payment, and such Retirement Account shall be one of the Participant's permitted Retirement Accounts under the Plan.

(2) If the amount subject to such deferral election is for services attributable to a Plan Year commencing on or after February 1, 2021, such amount shall be allocated in the same manner as the same category of deferred amounts (meaning either Deferred Compensation, Deferred MIP Bonus, Deferred Special Bonus or Employer Matching Contribution Credits) were allocated for the most recent preceding Plan Year for which the Eligible Participant made an allocation election, but if none then such deferral election shall be allocated to a Retirement Account deemed to be elected by the Participant under the Deferral Account or Matching Account (as applicable) of his Class Account for such Plan Year with a lump sum form of payment.

3.6 Irrevocability of Deferral Elections and Account Allocation Elections.

(a) Except as otherwise provided herein, once made for a Plan Year, a deferral election or elections under Sections 3.1(b)(1), 3.2(b)(1) and 3.2(b)(2), and the corresponding account allocation election or elections under Section 3.5, may not be revoked, changed or modified after the applicable deferral election filing deadline specified in Sections 3.1(b)(1), 3.2(b)(1), and 3.2(b)(2), and a deferral election or elections under Sections 3.1(b)(2), 3.2(b)(3), 3.3(b) and 3.3(c), and the corresponding account allocation election or elections under Section 3.5, may not be revoked, changed or modified after the date of each such deferral election as provided in Sections 3.1(b)(2), 3.2(b)(3), 3.3(b) and 3.3(c). A deferral election for one Plan Year will not automatically be given effect for a subsequent Plan Year, so that if a deferral is desired for a subsequent Plan Year, a separate election must be made by the Eligible Participant.

(b) In the event an Eligible Officer has a Separation from Service for any reason, then his or her deferral election under Section 3.1 will terminate as of the date of such Separation from Service (but will be effective with respect to the last regular paycheck issued to such Eligible Officer), regardless of whether the Eligible Officer continues to receive Compensation, or other remuneration, from any Employer or Related Affiliate thereafter. If an Eligible Officer has a Separation from Service for any reason and is rehired (whether or not as an Eligible Officer) within the same Plan Year, his or her deferral election, if any, under Section 3.1 shall be automatically reinstated and shall remain in effect for the remainder of such Plan Year.

(c) In the event an Eligible Participant has a Separation from Service for any reason, then his or her deferral elections, if any, under Sections 3.2 and 3.3 will remain in effect with respect to the bonus, if any, subject to any such deferral election. If an Eligible Participant has a Separation from Service for any reason and is rehired (whether or not as an Eligible Participant) within the same Plan Year or the same performance period, his or her deferral elections, if any, under Sections 3.2 and 3.3 will remain in effect with respect to the bonus, if any, subject to any such deferral elections.

(d) In the event an Eligible Participant who is an Eligible Officer ceases to be an Eligible Officer (other than on account of a Separation from Service) during any Plan Year, then his or her Compensation deferral election, if any, under Section 3.1 will terminate as of the next following January 31. In addition, in the event the Compensation of such individual is reduced as a result of the change in status, his or her deferral election following such loss and through the date of termination of such election as provided in the preceding sentence will be pro rated based on his or her new level of Compensation.

(e) In the event an Eligible Officer receives Company-paid short term disability payments and the Compensation of such individual is reduced as a result of the short term disability status, then following such reduction in Compensation his or her Compensation deferral election, if any, under Section 3.1 will be pro rated based on his or her new level of Compensation through the date of termination of such election.

(f) In the event an Eligible Participant ceases to be an Eligible Participant (other than on account of a Separation from Service) during any Plan Year, then his or her bonus deferral election, if any, under Section 3.2 will terminate for any performance period beginning in the calendar year following the year of the loss of Eligible Participant status.

(g) In the event an Eligible Participant who is an Eligible Officer ceases to be an Eligible Officer (other than on account of Separation from Service) during any Plan Year, then his or her bonus deferral election, if any, under Section 3.3 will remain in effect.

(h) Notwithstanding anything herein to the contrary, in the event an Eligible Officer goes on an unpaid leave of absence, his or her Compensation deferral election, if any, under Section 3.1 shall automatically cease when he or she commences the unpaid leave of absence; provided, however, that if he or she returns from the unpaid leave of absence during the same Plan Year, his or her Compensation deferral election under Section 3.1 shall automatically resume immediately upon return from the leave of absence and shall continue in effect for the balance of the Plan Year. An Eligible Officer's Compensation deferral election under Section 3.1, if any, shall remain in effect with respect to any Compensation to which such election applies that is paid while on a leave of absence. An Eligible Participant's deferral election under Sections 3.2 or 3.3, if any, shall not be affected by his or her leave of absence.

3.7 Automatic Suspension of Deferral Elections.

In the event a Participant requests a distribution pursuant to Section 5.5 due to an Unforeseeable Emergency, or the Participant requests a cancellation of deferrals under the Plan in order to alleviate his or her Unforeseeable Emergency, and the Plan Administrator or his or her delegate determines that the Participant's Unforeseeable Emergency may be relieved through the cessation of deferrals under the Plan, some or all the Participant's deferral elections under Sections 3.1, 3.2 and 3.3, if any, for such Plan Year as determined by the Plan Administrator or his or her delegate, shall be cancelled as soon as administratively practicable following such determination by the Plan Administrator or his or her delegate.

ARTICLE IV.
ACCOUNTS AND TIMING OF CREDITS TO ACCOUNTS

4.1 Nature of Accounts.

Each Participant's Account will be used solely as a measuring device to determine the amount to be paid a Participant under this Plan. The Accounts do not constitute, nor will they be treated as, property or a trust fund of any kind. All amounts at any time attributable to a Participant's Account will be, and remain, the sole property of Walmart. A Participant's rights hereunder are limited to the right to receive Plan benefits as provided herein. The Plan represents an unsecured promise by Walmart to pay the benefits provided by the Plan.

4.2 Deferral Credits and Employer Matching Contribution Credits.

Deferral Credits and Employer Matching Contribution Credits for a Plan Year will be credited to each Participant's Class Account for such Plan Year as follows:

(a) Deferred Compensation will be credited to the Deferral Account of such Class Account as soon as practicable after the date such Compensation would have otherwise been paid in cash.

(b) Deferred MIP Bonuses and Deferred Special Bonuses will be credited to the Deferral Account of such Class Account as soon as practicable after the date the bonus could have otherwise been paid in cash.

(c) Employer Matching Contribution Credits earned in Plan Years commencing prior to February 1, 2023 will be credited to the Matching Account of such Class Account as of the last day of the Plan Year. Employer Matching Contribution Credits earned in Plan Years commencing on or after February 1, 2023 will be credited to the Matching Account of such Class Account as soon as practicable following the last day of the Plan Year.

A Participant's Account, including earnings credited thereto, will be maintained by the Plan Administrator until the Participant's Plan benefits have been paid in full.

4.3 Valuation of Accounts.

Each Participant's Account will be valued monthly as of each Valuation Date.

4.4 Credited Earnings.

(a) Every Valuation Date during a Plan Year, the Pre-Investments Portion of a Participant's Account will be credited with either of the following, as elected by the Participant in accordance with this Section 4.4(a):

(1) Interest at the Interest Rate, which will be for the entire month and calculated based on the value of such Pre-Investments Portion as of the immediately preceding Valuation Date, resulting in the monthly compounding of interest on each Valuation Date; or

(2) Earnings, gains and losses based on the results that would have been achieved had such Pre-Investments Portion been invested as soon as practicable after such election into the Investment Options selected by the Participant.

The Plan Administrator, in his or her sole discretion, shall establish one or more windows of time during which a Participant may irrevocably elect for all or a portion of his or her Pre-Investments Portion to be credited with earnings, gains and losses in accordance with Section 4.4(a)(2). If a Participant does not make such an election in accordance with the procedures established by the Plan Administrator in his or her sole discretion, the Participant's entire Pre-Investments Portion shall be credited with interest in accordance with Section 4.4(a)(1). Once earnings are elected under Section 4.4(a)(2) with respect to any portion of a Participant's Pre-Investments Portion, such Participant shall be prohibited from subsequently electing to receive interest with respect to such portion in accordance with Section 4.4(a)(1).

(b) Every Valuation Date during a Plan Year, the Post-Investments Portion of a Participant's Account, if any, will be credited with earnings, gains and losses based on the results that would have been achieved had amounts credited to his or her Account been invested as soon as practicable after crediting into the Investment Options selected by the Participant.

(c) The Plan Administrator shall specify procedures to allow Participants to make elections as to the deemed investment of amounts in Investment Options in accordance with Sections 4.4(a)(2) and 4.4(b). Nothing in this Section 4.4 or otherwise in the Plan, however, will require Walmart to actually invest any amounts in such Investment Options or otherwise.

ARTICLE V.
PAYMENT OF PLAN BENEFITS

5.1 Scheduled In-Service Benefits.

(a) In-Service Benefits. Each of a Participant's Scheduled In-Service Accounts will be distributed in a lump sum within the 90-day period commencing on the Scheduled Pay Date applicable to such Scheduled In-Service Account. The lump sum amount will be the value of the applicable Participant's Scheduled In-Service Account as of the Scheduled Pay Date.

(b) Intervening Separation or Death. Notwithstanding the preceding, should an event occur prior to the Scheduled Pay Date of any Scheduled In-Service Account that would trigger a distribution under Section 5.2 or 5.3 earlier than the Scheduled Pay Date, such Scheduled In-Service Account or Accounts shall be distributed in accordance with Section 5.2 or 5.3, as applicable, and not in accordance with Section 5.1(a).

5.2 Separation Benefits.

(a) Separation Benefits. In the event of a Participant's Separation from Service, the Participant's Scheduled In-Service Accounts will be distributed in a lump sum under Section 5.2(b) and the Participant's Retirement Accounts will be distributed in one of the forms provided in Section 5.2(b) or 5.2(c) below in accordance with the Participant's distribution election given effect under the provisions of Section 5.4 with respect to each such Retirement Account.

(b) Lump Sum Distributions.

(1) Any lump sum to be paid under this Section 5.2(b) shall be paid within the 90-day period commencing on the Participant's Separation Pay Date.

(2) The lump sum amount will be the value of the Participant's Account, or Retirement Account, as applicable, as of the last day of the month preceding the date of the distribution.

(c) Installment Distributions.

(1) If a Participant's Retirement Account is to be distributed in the form of annual installments, the first such installment shall be made within the 90-day period commencing on the first January 31 following the Participant's Separation from Service; provided, however, that if such January 31 is earlier than the Participant's Separation Pay Date, the first such installment shall be made within the 90-day period commencing on the Participant's Separation Pay Date. Subsequent installments shall be made within the 90-day period commencing on each successive January 31, until the Participant's benefits under such Account are distributed in full.

(2) If any portion of a Participant's Retirement Account is being credited with interest at the Interest Rate in accordance with Section 4.4(a)(1) as of the applicable Valuation Date, such portion will be paid in equal annual installments in an amount which would fully amortize a loan equal to the lump sum value of such portion determined in accordance with Section 5.2(b)(2) (using as the distribution date the date of the first installment) over the installment period, with interest calculated at the Interest Rate in effect for the Plan Year in which the Participant's Separation from Service occurs.

(3) If any portion of a Participant's Retirement Account is being credited with earnings, gains and losses in accordance with Sections 4.4(a)(2) or 4.4(b) as of the applicable Valuation Date, such portion of such Retirement Account will be paid in substantially equal annual installments equal to the quotient of (A) the total remaining balance in the applicable portion of the Retirement Account as of the Valuation Date immediately prior to the date on which such installment payment is scheduled to be paid, divided by (B) the number of installment payments remaining in the applicable period of annual installments.

5.3 Death Benefits.

(a) General. In the event of the Participant's death before incurring a Separation from Service or before commencement of benefits, the Participant's Account will be distributed in one of the forms provided in Section 5.3(b) or 5.3(c) below in accordance with the Participant's distribution election given effect under the provisions of Section 5.4 below. A Participant may elect only one form of payment under the Plan for all beneficiaries (at any level). If the Participant fails to make an effective election as provided in Section 5.4 below, the Participant will be deemed to have elected distribution in a lump sum under Section 5.3(b) for all beneficiary levels.

(b) Lump Sum Distributions.

(1) Any lump sum to be paid under this Section 5.3(b) shall be paid within the 90-day period commencing on the last day of the month in which the Participant's death occurs.

(2) The lump sum amount will be the value of the Participant's Account as of the last day of the month preceding the date of distribution.

(c) Installment Distributions.

(1) If the Participant's Account is to be distributed in the form of annual installments, the first such installment shall be made within the 90-day period commencing on the first January 31 coincident with or next following the Participant's death. Subsequent installments will be made during the 90-day period commencing on each successive January 31, until the Participant's benefits are distributed in full.

(2) If a portion of a Participant's Account is being credited with interest at the Interest Rate in accordance with Section 4.4(a)(1) as of the applicable Valuation Date, such portion will be paid in equal annual installments in an amount which would fully amortize a loan equal to the lump sum value of such portion as of the last day of the month preceding the date of distribution (using as the distribution date the date of the first installment) over the installment period, with interest calculated at the Interest Rate in effect for the Plan Year in which the Participant's death occurs.

(3) If a portion of a Participant's Account is being credited with earnings, gains and losses in accordance with Section 4.4(a)(2) or 4.4(b) as of the applicable Valuation Date, such portion will be paid in substantially equal annual installments equal to the quotient of (A) the total remaining balance of such portion as of the Valuation Date immediately prior to the date on which such installment payment is scheduled to be paid, divided by (B) the number of installment payments remaining in the applicable period of annual installments.

(d) Death After Commencement of Installments. Notwithstanding the preceding, in the event of a Participant's death after installment payments to the Participant have commenced, such installment payments shall continue to be made to the Participant's designated beneficiary in the same manner as they were being distributed to the Participant prior to his or her death, provided, however, that if the Participant's distribution election applicable to Section 5.3(a) is a lump sum payment, the Participant's remaining installments will be distributed in lump sum to the Participant's designated beneficiary within the 90-day period commencing on the last day of the month in which the Participant's death occurs.

(e) Designation of Beneficiary. A Participant may, by written or electronic instrument delivered to the Plan Administrator in the form prescribed by the Plan Administrator, designate primary and contingent beneficiaries (which may be a trust or trusts) to receive any benefit payments which may be payable under this Plan following the Participant's death, and may designate the proportions in which such beneficiaries are to receive such payments. A Participant may change such designation from time to time and the last designation filed with the Plan Administrator in accordance with its procedures prior to the Participant's death will control. In the event no beneficiary is designated, or if all designated beneficiaries predecease the Participant, payment shall be payable to the following "default" beneficiaries of the Participant in the following order of priority: (1) the Participant's surviving spouse known to the Plan Administrator, if any; (2) the Participant's living children known to the Plan Administrator in equal shares; (3) the Participant's living parents known to the Plan Administrator in equal shares; (4) the Participant's surviving siblings known to the Plan Administrator in equal shares; or (5) the beneficiary's estate for distribution in accordance with the terms of the beneficiary's last will and testament or as a court of competent jurisdiction shall determine.

(f) Death of Beneficiary. In the event a beneficiary dies before full payment of the Participant's benefits under the Plan, benefits that would have been paid to such beneficiary shall continue in the same form in equal shares to the remaining beneficiaries at the same level (i.e., primary, contingent) and, if none, to the next level of beneficiaries. If there are no beneficiaries at the next level, then any remaining benefits shall be paid to the following "default" beneficiaries of the last living beneficiary in the following order of priority: (1) the beneficiary's surviving spouse known to the Plan Administrator, if any; (2) the beneficiary's living children known to the Plan Administrator in equal shares; (3) the beneficiary's surviving parents known to the Plan Administrator in equal shares; (4) the beneficiary's surviving siblings known to the Plan Administrator in equal shares; or (5) the beneficiary's estate for distribution in accordance with the terms of the beneficiary's last will and testament or as a court of competent jurisdiction shall determine.

5.4 Form of Distribution.

(a) Forms Available. In the event of a Participant's Separation from Service, or in the event of a Participant's death if the Participant dies prior to Separation from Service, distribution of his or her Retirement Account or, in the event of death, his or her Account, may be made, at the Participant's election per this Section 5.4, in one of the following forms:

(1) a lump sum;

(2) subject to the minimum account value restriction below, substantially equal annual installments over a period not to exceed fifteen (15) years; or

(3) solely with respect to distribution of the Participant's Account in the event of death, partially a lump sum and, subject to the minimum account value restriction below, substantially equal annual installments over a period not to exceed fifteen (15) years;

Notwithstanding the foregoing:

(A) With respect to an installment election applicable to a Retirement Account under a Participant's Pre-2021 Class Account, such election will be given effect only if, as of the date on which any lump sum payment would be valued, the value of such Retirement Account, or, in the event of death, the Participant's Account, is at least fifty thousand dollars ($50,000). If such Retirement Account, or in the event of death, the Participant's Account, is valued at less than fifty thousand dollars ($50,000) as of the date on which any lump sum payment would be valued, such Retirement Account shall be defaulted to a lump sum payment.

(B) With respect to an installment election applicable to a Retirement Account under a Participant's Post-2020 Class Account, such election will be given effect only if, as of the date on which any lump sum payment would be valued, the combined value of all of the Participant's Retirement Accounts subject to an installment election under his or her Post-2020 Class Accounts, or, in the event of death, the Participant's Account, is at least fifty thousand dollars ($50,000). If the total of all such Retirement Accounts, or in the event of death, the Participant's Account, is valued at less than fifty thousand dollars ($50,000) as of the date on which any lump sum payment would be valued, such Retirement Account shall be defaulted to a lump sum payment.

(C) For purposes of clarification, to the extent a Retirement Account, or in the event of death, an Account, is defaulted to a lump sum payment pursuant to paragraph (A) or (B) above, such lump sum payment shall be paid at the same time the first installment with respect to such Retirement Account or Account would have been paid but for the application of paragraph (A) or (B) above.

(b) Subsequent Elections. In accordance with the procedures and rules established by the Plan Administrator, a Participant may change his or her distribution election (or deemed distribution election) with respect to his or her Retirement Account, or, in the event of death, his or her Account, per this Section 5.4 at any time by making a new election (referred to in this subsection as a "subsequent election") on a form (which may be electronic) approved by, and filed with, the Plan Administrator; provided, however, that such subsequent election shall be subject to the following restrictions:

(1) A subsequent election may not take effect until at least twelve (12) months after the date on which such subsequent election is made;

(2) Payment or initial payment pursuant to a subsequent election may not be made earlier than five (5) years from the date such payment would have been made absent the subsequent election (but, for this purpose, installment payments shall not commence until the first January 31 after such delay), unless the distribution is made on account of the Participant's death;

(3) A subsequent election related to a payment must be made not less than twelve (12) months before the date the payment is scheduled to be paid;

(4) Payment of a Participant's Retirement Account or, in the event of death, Account, pursuant to a subsequent election must be completed by the last day of the Plan Year which contains the twentieth (20^{th}) anniversary of the Participant's Separation Pay Date or the Participant's death;

(5) For purposes of this Section 5.4(b) and Code Section 409A, the entitlement to annual installment payments is treated as the entitlement to a single payment.

If a Participant's distribution election does not satisfy the requirements of this Section 5.4(b), it will not be recognized or given effect by the Plan Administrator. In that event, distribution of the benefit will be made in accordance with the Participant's most recent distribution election which does satisfy the requirements of this Section 5.4(b).

(c) Filing of Election. A Participant's distribution election applicable to the Participant's Account in the event of the Participant's death prior to Separation from Service, and a Participant's distribution election with respect to the Participant's Retirement Account or Retirement Accounts, and the Participant's Scheduled Pay Date with respect to the Participant's Scheduled In-Service Accounts, must be filed with, and on forms (which may be electronic) prescribed by, the Plan Administrator.

5.5 Distributions for Unforeseeable Emergencies.

(a) In the event of an Unforeseeable Emergency, the Plan Administrator or his or her delegate, in its sole and absolute discretion and upon written application of a Participant or, following the Participant's death, the beneficiary to whom a Participant's benefits are then being paid, or will be paid, pursuant to Section 5.3, may direct immediate distribution of all or a portion of the Participant's Account (excluding the Participant's Matching Account and related earnings if the Participant is not fully vested in his or her Matching Account). The Plan Administrator will permit distribution on account of an Unforeseeable Emergency only to the extent reasonably necessary to satisfy the emergency need, plus amounts necessary to pay federal, state or local income taxes and penalties reasonably anticipated to result from the distribution, after taking into account the extent to which such need is or may be relieved through reimbursement or compensation by insurance, by liquidation of the Participant's or beneficiary's assets (to the extent the liquidation of such assets would not itself cause severe financial hardship), or by cessation of deferrals under the Plan. Any distribution under this Section 5.5 shall first be made from the Participant's Scheduled In-Service Accounts with respect to Deferral Credits made in the same Plan Year as the Distribution under this Section 5.5, and then from the Participant's Retirement Accounts with respect to Deferral Credits made in the same Plan Year as the Distribution under this Section 5.5, and then proratably from the remaining amount of the Participant's Scheduled In-Service Accounts and then proratably from the Participant's Retirement Accounts.

(b) Notwithstanding anything in the Plan to the contrary, if the Plan Administrator reasonably anticipates that its deduction with respect to any distribution under this Section 5.5 that occurs prior to January 1, 2021 would not be permitted due to the application of Code Section 162(m); such payment shall be suspended to the extent a deduction would not be permitted until the earliest date at which it reasonably anticipates that the deduction of such distribution would not be barred by application of Code Section 162(m); provided, however, that the conditions of Section 5.5(a) are still satisfied as of such date.

5.6 Distributions for Payment of Taxes.

The Plan Administrator may accelerate and pay a portion of a Participant's Plan benefits in a lump sum equal to (a) the Federal Insurance Contributions Act tax imposed on Plan benefits and any income tax withholding related to such amounts, as well as (b) any state, local or foreign tax obligations arising from participation in the Plan (and related withholding under Code Section 3401) that apply to the amounts deferred under the Plan before such amount is paid or made available to the Participant.

5.7 Reductions Arising from a Participant's Gross Misconduct.

Notwithstanding anything herein to the contrary, a Participant's Plan benefits are contingent upon the Participant not engaging in Gross Misconduct while employed with any Employer or Related Affiliate or any entity in which Walmart has an ownership interest, or during such additional period as provided in Walmart's Statement of Ethics. In the event the Plan Administrator determines that the Participant has engaged in Gross Misconduct during the prescribed period, then notwithstanding any provisions hereunder to the contrary: (a) the Participant shall forfeit all Employer Matching Contribution Credits and credited Plan earnings thereon; (b) earnings credited to the Participant's Deferral Accounts shall be recalculated for each Plan Year to reflect the amount which would otherwise have been credited if the applicable Interest Rate (or if a portion of such Deferral Accounts is being credited with earnings, gains and losses, the positive earnings rate (if any) for such Plan Year) were fifty percent (50%) of the Interest Rate in effect (or positive earnings rate, as applicable) for such Plan Year; and (c) if the Participant is then receiving installment payments, any remaining installments shall be recalculated to reflect the amount which would otherwise have been paid if the applicable Interest Rate (or positive earnings rate, as applicable) were fifty percent (50%) of the Interest Rate in effect (or positive earnings rate, as applicable) with respect to such installment payments. For the avoidance of doubt, if a portion of a Participant's Deferral Accounts is being credited with earnings, gains and losses and such portion experiences a net loss for a Plan Year, such net loss shall not be adjusted as a result of the Participant's engaging in Gross Misconduct under this Section 5.7. Under no circumstances will a Participant forfeit any portion of the Participant's Deferred Compensation, Deferred MIP Bonus and Deferred Special Bonus as a result of the Participant's engaging in Gross Misconduct under this Section 5.7. Any payments received hereunder by a Participant (or the Participant's beneficiary) are contingent upon the Participant not engaging (or not having engaged) in Gross Misconduct while employed with any Employer or Related Affiliate or any entity in which Walmart has an ownership interest, or during such additional period as provided in Walmart's Statement of Ethics. If the Plan Administrator determines, after payment of amounts hereunder, that the Participant has engaged in Gross Misconduct during the prescribed period, the Participant (or the Participant's beneficiary) shall repay to Walmart any amount in excess of that to which the Participant is entitled under this Section 5.7.

ARTICLE VI.
ADMINISTRATION

6.1 General.

The Plan Administrator is responsible for the administration of the Plan and is granted the following rights and duties:

(a) The Plan Administrator shall have the exclusive duty, authority and discretion to interpret and construe the provisions of the Plan, to determine eligibility for and the amount of any benefit payable under the Plan, and to decide any dispute which may arise regarding the rights of Participants (or their beneficiaries) under this Plan;

(b) The Plan Administrator shall have the authority to adopt, alter, and repeal such administrative rules, regulations, and practices governing the operation of the Plan as it shall from time to time deem advisable;

(c) The Plan Administrator may appoint a person or persons to act on behalf of, or to assist, the Plan Administrator in the administration of the Plan, establishment of forms (including electronic forms) desirable for Plan operation, and such other matters as the Plan Administrator deems necessary or appropriate;

(d) The decision of the Plan Administrator in matters pertaining to this Plan shall be final, binding, and conclusive upon Walmart, any Related Affiliate, the Participant, the Participant's beneficiary, and upon any person affected by such decision, subject to the claims procedure set forth in Article VII; and

(e) In any matter relating solely to a Plan Administrator's individual rights or benefits under this Plan, the Plan Administrator's duties under this Section 6.1 shall be performed by the Committee and the Plan Administrator shall not participate in any Committee proceeding pertaining to, or vote on, such matter.

6.2 Allocation and Delegation of Duties.

The Plan Administrator shall have the authority to delegate, from time to time, by written instrument filed in its records, all or any part of its responsibilities under the Plan to such person or persons as the Plan Administrator may deem advisable (and may authorize such person to delegate such responsibilities to such other person or persons as the Plan Administrator shall authorize) and in the same manner to revoke any such delegation of responsibility. Any action of the delegate in the exercise of such delegated responsibilities shall have the same force and effect for all purposes hereunder as if such action had been taken by the Plan Administrator. The Plan Administrator shall not be liable for any acts or omissions of any such delegate. The delegate shall periodically report to the Plan Administrator concerning the discharge of the delegated responsibilities.

ARTICLE VII.
CLAIMS PROCEDURE

7.1 General.

Any claim for benefits under the Plan must be filed by the Participant or beneficiary ("claimant") in writing with the Plan Administrator or his or her delegate within one (1) year of the Participant's Separation from Service. If the claim is not filed within one (1) year of the Participant's Separation from Service, neither the Plan nor any Employer nor any Related Affiliate shall have any obligation to pay the benefit and the claimant shall have no further rights under the Plan. If a timely claim for a Plan benefit is wholly or partially denied, notice of the decision will be furnished to the claimant by the Plan Administrator or his or her delegate within a reasonable period of time, not to exceed sixty (60) days, after receipt of the claim by the Plan Administrator or his or her delegate, unless special circumstances require an extension of time for processing, in which case a decision will be rendered within a reasonable period of time, but not later than one hundred twenty (120) days after receipt. Any claimant who is denied a claim for benefits will be furnished written notice setting forth:

(a) the specific reason or reasons for the denial;

(b) specific reference to the pertinent Plan provision upon which the denial is based;

(c) a description of any additional material or information necessary for the claimant to perfect the claim and an explanation of why such material or information is necessary; and

(d) an explanation of the Plan's claim review procedure, including the claimant's right to bring a civil action under ERISA Section 502(a) following an adverse determination on review.

7.2 Appeals Procedure.

To appeal a denial of a claim, a claimant or the claimant's duly authorized representative:

(a) may request a review by written application to the Plan Administrator not later than sixty (60) days after receipt by the claimant of the written notification of denial of a claim;

(b) may review pertinent documents; and

(c) may submit issues and comments in writing.

A decision on review of a denied claim will be made by the Plan Administrator not later than sixty (60) days after receipt of a request for review, unless special circumstances require an extension of time for processing, in which case a decision will be rendered within a reasonable period of time, but not later than one hundred twenty (120) days after receipt of a request for review. The decision on review will be in writing and shall include:

(a) the specific reason or reasons for the adverse determination;

(b) specific reference to pertinent Plan provisions on which the adverse determination is based;

(c) a statement that the claimant is entitled to receive, upon request and free of charge, reasonable access to, and copies of, all documents, records, and other information relevant to the claimant's claim for benefits; and

(d) a statement describing any voluntary appeal procedures offered by the Plan and the claimant's right to obtain the information about such procedures, as well as a statement of the claimant's right to bring an action under ERISA section 502(a).

7.3 Disability Claims.

Claims for disability benefits shall be determined under DOL Regulation section 2560.503-1 which is hereby incorporated by reference.

ARTICLE VIII.
MISCELLANEOUS PROVISIONS

8.1 Amendment, Suspension or Termination of Plan.

Walmart, by action of the Committee, reserves the right to amend, suspend or to terminate the Plan in any manner that it deems advisable. Notwithstanding the preceding sentence, the Plan may not be amended, suspended or terminated to cause a Participant to forfeit the Participant's then-existing Account.

Notwithstanding the preceding, Walmart may, by action of the Committee within the thirty (30) days preceding or twelve (12) months following a change in control (within the meaning of Code Section 409A) of a relevant affiliate, partially terminate the Plan and distribute benefits to all Participants involved in such change in control within twelve (12) months after such action, provided that all plans sponsored by the service recipient immediately after the change in control (which are required to be aggregated with this Plan pursuant to Code Section

409A) are also terminated and liquidated with respect to each Participant involved in the change in control. Any action taken in this Section 8.1 will be done in accordance with Code Section 409A.

8.2 Non-Alienability.

No interest or amounts payable under the Plan may be subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, charge, garnishment, execution or levy of any kind, whether voluntary or involuntary. Notwithstanding the preceding, distribution may be made to the extent necessary to fulfill a domestic relations order as defined in Code Section 414(p)(1)(B) and in accordance with procedures established by the Plan Administrator from time to time; provided, however, that all such distributions shall be made in a single lump sum payment.

8.3 Recovery of Overpayments.

In the event any payments under the Plan are made on account of a mistake of fact or law, the recipient shall return such payment or overpayment to Walmart as requested by Walmart.

8.4 No Employment Rights.

Nothing contained herein shall be construed as conferring upon any Eligible Participant or Participant the right to continue in the employ of any Employer or any Related Affiliate as an officer or in any other capacity.

8.5 No Right to Bonus.

Nothing contained herein shall be construed as conferring upon the Participant the right to receive a bonus from the MIP or any other bonus or award from any Employer or a Related Affiliate. A Participant's entitlement to such a bonus or award is governed solely by the provisions of the MIP or such other plan or arrangement.

8.6 Withholding and Employment Taxes.

To the extent required by law, the Employer or a Related Affiliate will withhold from a Participant's current compensation such taxes as are required to be withheld for employment taxes. To the extent required by law, the Employer or a Related Affiliate will withhold from a Participant's Plan distributions such taxes as are required to be withheld for federal, Puerto Rican, state or local government income tax purposes.

8.7 Income and Excise Taxes.

The Participant (or the Participant's Beneficiaries) is solely responsible for the payment of all federal, Puerto Rican, state and local income and excise taxes resulting from the Participant's participation in this Plan.

8.8 Successors and Assigns.

The provisions of this Plan are binding upon and inure to the benefit of Walmart and each other Employer, their successors and assigns, and the Participant, the Participant's beneficiaries, heirs, and legal representatives.

8.9 Governing Law.

This Plan shall be subject to and construed in accordance with the laws of the State of Delaware to the extent not preempted by federal law.

Exhibit 10.3

Walmart Inc.
2016 Associate Stock Purchase Plan

(As amended effective February 1, 2024)

Table of Contents

Walmart Inc. 2016
Associate Stock Purchase Plan

I. Definitions

1.1 **“Account”** shall mean a Participant’s account which holds his or her shares of Stock pursuant to the Plan.

1.2 **“Account Administrator”** shall mean the third party administrator for the Accounts as may be from time to time appointed by the Committee.

1.3 **“Account Closure”** shall mean the closing of a Participant’s Account by one of the following means:

(a) **“Automatic Account Closure”** shall mean the closure of a Participant’s Account by the Committee (or the Account Administrator if applicable) at the time such Participant’s Account balance contains no shares (or fractional shares) of Stock on or after his or her termination of employment with the Employer.

(b) **“Participant Account Closure”** shall mean the closure of a Participant’s Account pursuant to a request by the Participant to have his or her Account closed and to have all Stock or proceeds from the sale thereof distributed.

1.4 **“Affiliate”** shall mean any entity that is more than 50% owned or controlled, directly or indirectly, by the Company.

1.5 **“Associate”** shall mean any common law employee of an Employer, but shall not include independent contractors. An individual classified by the Employer as either an independent contractor or an individual who provides services to the Employer through another entity shall not be eligible to participate in this Plan during the period that the individual is so classified, even if such individual is later retroactively reclassified as an Associate during all or any part of such period pursuant to applicable law or otherwise.

1.6 **“Award Program”** shall mean a program established by the Company or a Participating Employer that results in its Associates receiving shares of Stock as an award for job performance.

1.7 **“Board”** shall mean the Board of Directors of the Company.

1.8 **“Committee”** shall mean the Compensation and Management Development Committee of the Board, or such other committee as may be appointed by the Board.

1.9 **“Company”** shall mean Walmart Inc., a Delaware corporation.

1.10 **“Contribution”** shall mean any of the types of contributions that may be made to a Participant’s Account under the Plan, either by the Company, a Participating Employer or a Participant as set forth in Section III.

1.11 **“Employer”** shall mean the Company and its Affiliates.

1.12 **“Participant”** shall mean any Associate of the Company or a Participating Employer who satisfies the eligibility requirements in Section II and who has an Account established under the Plan, and Participant shall also include any former Associate of the Company or a Participating Employer who was a Participant in the Plan at the time of his or her termination of employment until such time as an Account Closure occurs.

1.13 **“Participating Employer”** shall mean an Affiliate whose participation in the Plan has been approved by the Committee. The Committee may require the Participating Employer to make corresponding contributions under the Plan in accordance with rules and procedures established by the Committee. The Committee, in its sole discretion, may terminate any such Affiliate’s Participating Employer status at any time and the Accounts of those Participants who are Associates of such Affiliate will be treated as if such Participants had transferred employment to an Affiliate that is not a Participating Employer as described in Section 5.3 of the Plan.

1.14 “Payroll Deduction” shall mean the payroll deduction from a Participant’s biweekly or weekly regular compensation (including from vacation pay and pay from any paid leave of absence) of an amount authorized by the Participant as a Payroll Deduction Contribution.

1.15 “Plan” shall mean the Walmart Inc. 2016 Associate Stock Purchase Plan (formerly known as the Wal-Mart Stores, Inc. 2016 Associate Stock Incentive Plan, and the Wal-Mart Stores, Inc. 2004 Associate Stock Purchase Plan), as amended, restated and renamed herein, or as it may be further amended from time to time.

1.16 “Plan Year” shall mean April 1 of a calendar year to March 31 of the following calendar year, or such other period as set by the Committee.

1.17 “Section 16 Officers” shall mean those officers of the Company who are subject to subsection 16(a) of the Securities Exchange Act of 1934, as amended.

1.18 “Stock” shall mean the common stock, $.10 par value per share, of the Company.

II. Eligibility

2.1 In General. All Associates (including Section 16 Officers) of the Company or a Participating Employer are eligible to participate in the Plan, subject to the following limitations:

(a) Associates who are restricted or prohibited from participating in the Plan under the applicable law of their state or country of residence may not participate in the Plan, except as may be provided in accordance with rules and procedures established by the Committee.

(b) Associates of the Company and its Affiliates who are members of a collective bargaining unit whose benefits were the subject of good faith collective bargaining are excluded from participation in the Plan.

(c) Participation by Associates of non-U.S. Participating Employers shall only be permitted upon approval by the Committee, which approval may be limited to groups or categories of Associates designated by the non-U.S. Participating Employer.

(d) Section 16 Officers may be restricted in their ability to acquire or sell shares of Stock in order to comply with Section 16 of the Securities Exchange Act of 1934, as amended, in accordance with rules and procedures adopted by the Company’s Audit Committee.

2.2 Leaves of Absence. Participants continue to be eligible to participate in the Plan while on a bona fide leave of absence from the Company or a Participating Employer in accordance with applicable policies of the Company or Participating Employer, or under such other circumstances with the approval of the Committee.

III. Plan Contributions

3.1 Shares Available for Contributions. Subject to stockholder approval of this Plan: (i) 10,943,171 shares of Stock shall be available for purchase from the Company under the Plan for credit to Accounts or for purchase in open market transactions over a national securities exchange under the Plan for credit to Accounts; (ii) 20,000,000 shares of Stock shall be available for purchase from the Company under the Plan for credit to Accounts; and (iii) 100,000,000 shares of Stock shall be available for purchase in open market transactions over a national securities exchange under the Plan for credit to Accounts.

3.2 Plan Contributions. The definitions of the types of Contributions which may be made pursuant to the Plan are as follows (subject to the limits provided in Section 3.3 as applicable):

(a) "Award Contribution" means a contribution under the Plan on behalf of a Participant by the Company or a Participating Employer, as applicable, made pursuant to the Award Program in the sole discretion of the Committee.

(b) "Matching Contribution" means a cash contribution to the Plan on behalf of a Participant by the Company or a Participating Employer, as applicable, which is equal to fifteen percent (15%) of the amount of the Participant's Payroll Deduction (up to a maximum dollar limit).

(c) "Payroll Deduction Contribution" means a contribution to the Plan by a Participant pursuant to a valid authorization for a Payroll Deduction.

(d) "Voluntary Contribution" means a contribution, if and to the extent permitted by the Committee from time to time, of shares of Stock or cash by the Participant to the Participant's Account which is not made by Payroll Deduction.

3.3 Maximum Limits on Contributions.

(a) Matching Contributions and "Outstanding Performance" awards under the Award Program are subject to a maximum dollar limit for the Plan Year as set by the Committee from time to time in its discretion.

(b) During any Plan Year, the combination of Payroll Deduction Contributions and Voluntary Contributions made in cash (not Stock) by a Participant shall not exceed $125,000.

3.4 Payroll Deductions.

(a) Subject to the Committee's authority to adjust the following amounts, a Participant's authorization for Payroll Deduction shall be for a minimum amount of $2.00 per biweekly pay period or $1.00 per weekly pay period, as applicable to the Participant, and such Payroll Deduction shall be in even multiples of $.50.

(b) A Participant's request for Payroll Deduction (or a request for a revision thereto) will become effective as soon as practicable after receipt of such request by the Company or the Participating Employer, as applicable.

(c) A Participant's Payroll Deduction authorization may be revised or terminated at any time by the Participant's request to the Company or the Participating Employer, as applicable.

(d) A Participant's authorization for Payroll Deduction shall remain effective until the earlier of the Participant's (1) request to revise or terminate the Payroll Deduction authorization or (2) termination of employment with the Company or a Participating Employer, subject to Section 8 of the Plan.

(e) All requests to initiate, revise or terminate an authorization for Payroll Deduction as described in this Section 3.4 shall be made in writing or in such other form acceptable to the Committee or its delegate from time to time.

(f) The Senior Vice President, Total Rewards, or any successor position, in his or her discretion, may prohibit a Payroll Deduction from the final paycheck of a Participant. This Section applies to the Participant's final paycheck even if the Participant made a valid Payroll Deduction election applicable to prior paychecks. If a Payroll Deduction is prohibited from a Participant's final paycheck, any corresponding Matching Contributions shall also be prohibited.

3.5 Matching Contributions. The Company or Participating Employer, as applicable, shall make Matching Contributions as provided under the Plan and subject to the limits set forth in Section 3.3.

3.6 Award Contributions. Award Contributions shall be made, in the Committee's sole discretion, by either (1) the Company or the Participating Employer, as applicable, remitting to the Account Administrator on behalf of the Participant funds sufficient to purchase any shares or fractional shares of Stock that have been granted to such Participant under the Award Program or (2) the Participant receiving the Award Contribution directly as a certificate for a share or shares (as applicable) of Stock.

3.7 Voluntary Contributions. Participants may make Voluntary Contributions to the Plan subject to the terms and limitations described herein or that may be prescribed by the Committee from time to time.

3.8 Remittance of Contributions.

(a) The Company or a Participating Employer, as applicable, will forward the total of all Payroll Deductions for the applicable payroll period along with the corresponding Matching Contributions, a list of Participants for whom the Contributions are being made and the amount allocable to each such Participant's Account to the Account Administrator as soon as practicable.

(b) Voluntary Contributions, whether made in cash or shares of Stock, shall be remitted to the Account Administrator directly by the Participant.

(c) As soon as practicable following a grant of an Award Contribution, an Award Contribution shall be made in the Committee's sole discretion as described in Section 3.6 of the Plan.

(d) Prior to the time a Participant's Payroll Deduction and corresponding Matching Contribution is distributed to the Account Administrator, such amounts are considered general assets of the Company or Participating Employer (as applicable) and, as such, are subject to the claims of the Company's or Participating Employer's (as applicable) creditors in the event of insolvency or bankruptcy. In addition, no interest shall be paid on such amounts and all Participants assume the risk of fluctuations in the value or market price of Stock.

IV. Account Purchases, Maintenance & Sales

4.1 Account Establishment. The Account Administrator shall establish an Account in accordance with the Plan for any Associate who becomes a Participant. Upon the Committee's (or its delegate's) request, the Account Administrator shall establish an Account for an Associate who is to be awarded shares under an Award Program and who is not then a Participant.

4.2 Share Purchases. No later than five business days after the Account Administrator receives the remittance of funds for Contributions (including Voluntary Contributions made in cash) made to the Plan, the Account Administrator shall purchase shares of Stock from the Company, which may be purchases from the Company of authorized, but unissued, shares of Stock, shares of Stock held as treasury shares of Stock, in open market transactions over a national securities exchange, or in a combination of the foregoing. Notwithstanding the foregoing, the Committee may from time to time provide instructions to the Account Administrator with respect to the purchase of such shares of Stock but, absent such instructions, the Account Administrator shall determine the source of such Stock purchases in its discretion.

(a) In the case of purchases from the Company of authorized but unissued or treasury shares of Stock, the price of such shares is equal to the Volume Weighted Average Price (VWAP) as reported on the New York Stock Exchange - Composite Transactions on the relevant date of purchase; provided, however, that the Committee may, in its discretion, designate some other methodology for determining the fair market value of such shares of Stock purchased from the Company.

(b) The Account Administrator's purchase of shares of Stock in open market transactions over a national securities exchange and the price per share shall be in accordance with rules and procedures established by the Committee from time to time, the rules of the national securities exchange over which the shares of Stock are purchased and the rules of the Financial Industry Regulatory Authority.

(c) As determined in the discretion of the Account Administrator (in accordance with any applicable rules and procedures of the Committee), funds received as Voluntary Contributions may be bundled into a group for the purpose of purchasing shares of Stock and such shares may be purchased over a time period that is greater than one day. If such shares of Stock are purchased as part of a bundled group, a Participant's purchase price for each share of Stock shall be the average price of all shares of Stock purchased within that group as determined by the Account Administrator.

(d) No provision of this Plan shall limit the ability of the Committee to implement a real-time trading (or other) mechanism for the purchase or sale of shares of Stock under the Plan and, to the extent determined by the Committee, shall replace any other methodology for valuing and allocating shares of Stock purchased or sold under the Plan.

4.3 Share Purchases for Non-U.S. Participants. With respect to non-U.S. Participants, the amounts (1) withheld from such a Participant's compensation pursuant to an authorization for Payroll Deduction or (2) contributed as either a Matching Contribution or an Award Contribution made directly to a Participant's Account shall be converted from the applicable foreign currency to U.S. dollars for the purpose of purchasing shares of Stock, and such conversion shall be pursuant to the exchange rate published in The Wall Street Journal (or other similar source) on a date as soon as practicable prior to the effective date of the cash transfer from the Company or the Participating Employer, as applicable, to the Account Administrator. All such Participants assume the risk of fluctuations in the value or market price of shares of Stock and applicable currency exchange rates. With respect to non-U.S. Participants making Voluntary Contributions in cash, such amounts must be tendered to the Account Administrator in U.S. dollars unless otherwise determined by the Committee.

Notwithstanding anything to the contrary contained in the terms of this Plan, at the discretion of the Committee, purchases of shares of Stock for, or the participation in the Plan by, non-U.S. Participants may be suspended or discontinued if the applicable laws of a country or another governmental authority (such as the European Union) governing such purchases of shares of Stock or participation in the Plan would require the Company to register or qualify such shares of Stock, or its deemed offer or sale of shares of Stock under the Plan to, or to otherwise comply with procedures under such laws with respect to any deemed offer and sale of shares of Stock by the Company under the Plan to, such non-U.S. Participants or the Company would otherwise become subject to the laws of such country or other governmental authority as a result of such purchases of shares of Stock by or on behalf of a non-U.S. Participant unless the Company is already subject in all respects to the jurisdiction of such country or governmental authority.

4.4 Allocation to Accounts. The number of shares (whole and fractional shares) of Stock shall depend upon the purchase price as described in Section 4.2 at the time such purchases are made. Purchases of Stock will be allocated by the Account Administrator based upon the applicable purchase price to each applicable Participant's Account in proportion to the respective amount of Contributions received for each Participant's Account. Allocations of Stock will be made in full shares and in fractional interests in shares to the thousandths of a share.

4.5 Share Ownership. At the time shares of Stock are credited to a Participant's Account, he or she will acquire full ownership of all such shares (as well as any fractional interests) of Stock.

(a) All shares of Stock will be registered in the name of the Account Administrator and will remain so registered until delivery is requested by the Participant. The Participant may request from the Account Administrator that a certificate for any or all full shares of Stock be delivered to the Participant or that the Participant be reflected as the record owner of such shares of Stock in the Direct Registration System of the Depository Trust Company, if the Company participates in that system, at no cost to such Participant at any time.

(b) The Account Administrator shall cause to be delivered at no cost to each Participant as promptly as practicable, by mail, electronic mail, or otherwise, all notices of shareholders' meetings, proxy statements and other material distributed by the Company to its stockholders. The full shares of Stock in each Participant's Account shall be voted in accordance with the Participant's signed proxy voting instructions timely delivered to the Account Administrator. In the event that a Participant does not timely provide the Account Administrator with proxy voting instructions, the Account Administrator may direct the voting of such shares of Stock held in an Account to the extent such action or direction would comply with applicable law and any applicable listing standards of a national securities exchange.

(c) A Participant may not assign or hypothecate any interest in the Plan; provided, however, that upon purchase of shares under the Plan, such shares may be sold, assigned, pledged, hypothecated or otherwise dealt with as would be the case with respect to any other shares of Stock the Participant might otherwise own, subject to the Participant's compliance with the Walmart Inc. Insider Trading Policy.

(d) Neither the Company nor any Participating Employer may make any deductions from amounts properly credited to a Participant's Account. Neither the Company nor any Participating Employer shall have any security interest on the shares of Stock held in a Participant's Account. Notwithstanding the foregoing, a lender may have a security interest on the shares of Stock held in a Participant's Account if the Participant has pledged such Stock as collateral in connection with a line of credit that may be obtained by certain Participants (other than Section 16 Officers) through the Account Administrator's Stock Secured Line of Credit Program, if any.

4.6 **Account Statements.** Each Participant will be sent at least an annual statement reflecting all Account activity during the period covered by the statement.

4.7 **Risk of Loss.** There is no guarantee of the value or market price of shares of Stock acquired pursuant to the Plan. In seeking potential benefits of Stock ownership, each Participant bears the risks associated with Plan participation and ownership of Stock, including the risk of any decrease in the value of market price of shares of Stock acquired pursuant to the Plan.

4.8 **Commission & Maintenance Charges.**

(a) No brokerage commissions are charged to Participants for purchases of Stock under the Plan, however, brokerage commissions and other applicable fees shall be charged to the Participant for all sales of Stock from his or her Account. Such commissions and other applicable fees for sales of Stock held in a Participant's Account shall be at the rates posted by the Account Administrator, which may be changed from time to time by the Account Administrator with approval of the Committee (or its delegate).

(b) The Company or Participating Employer, as applicable, shall pay the applicable periodic maintenance fees (if any) for the Participant's Account until the earlier of (1) a Participant Account Closure occurs or (2) the Participant incurs a termination of employment with the Company or Participating Employer, as applicable, subject to Section 5.3. Any services requested of the Account Administrator by the Participant that are not covered by the Company's arrangement with the Account Administrator shall be paid for solely by the Participant.

(c) At such time as the Company or Participating Employer, as applicable, ceases to pay the applicable Account maintenance fees as set forth subsection (b) above, the Participant shall become responsible for any applicable Account maintenance fees. In this case, periodic maintenance fees and other applicable charges to the Account shall be paid from time to time to the Account Administrator automatically from the proceeds of a sale of a sufficient number of shares of Stock held in the Participant's Account to cover such fees and charges until the earlier of a Participant Account Closure or an Automatic Account Closure occurring.

4.9 **Account Sales.** The Participant may instruct the Account Administrator in writing (or any other method acceptable to the Committee or its delegate) at any time to sell any portion or all of his or her full shares of Stock and the fractional interest in any shares of Stock allocable to his or her Account, and the timing for such sale of Stock shall be in accordance with rules and procedures established by the Committee from time to time. Any account sales shall be subject to the Walmart Inc. Insider Trading Policy, including, but not limited to, the Trading Windows and trading restrictions on Section 16 Officers.

(a) The sale price for a share of Stock under the Plan shall be the average price of all shares of Stock sold by the Account Administrator on the date of the Participant's sale transaction; provided, however, that the Committee reserves the right to implement a real-time trading or similar mechanism for Participants' sales of shares of Stock from their respective Accounts under the Plan and the valuation of shares of Stock would be in accordance with any such mechanism.

(b) Upon such sale, the Account Administrator shall mail to the Participant a check (or such method of payment as approved by the Committee or its delegate) for the proceeds, less the brokerage commission, and other normal charges such as sales fees, which are payable by the Participant.

(c) Such instruction to the Account Administrator, or a request for delivery of Stock certificates held in the Participant's Account, will not affect the Participant's status as a Participant under the Plan unless the delivery of such certificates results in an Account Closure.

(d) With respect to non-U.S. Participants, shares of Stock are sold or traded in U.S. dollars and such amounts can be converted for the purpose of remitting the proceeds to the non-U.S. Participant. If the proceeds from the sale of shares of Stock held in the Participant's Account are converted to a currency other than U.S. dollars, such conversion shall be made pursuant to the applicable exchange rate published in The Wall Street Journal (or other similar source) on the date such transaction is executed. All such Participants assume the risk of fluctuations in the value or market price of shares of Stock and applicable currency exchange rates.

V. Account Closure & Termination of Employment

5.1 **Account Closure.** A Participant who elects to discontinue Payroll Deductions under the Plan shall continue to be a Participant until the earlier of a Participant Account Closure or an Automatic Account Closure occurring. In connection with a Participant Account Closure, the Participant must elect to have his or her Account fully distributed in either (1) Stock (except that the value of any fractional shares of Stock will be distributed in cash) less any applicable fees or (2) cash by directing all full shares (and fractional interests) of Stock to be sold with the proceeds, less applicable brokerage commissions and other applicable fees, being distributed in accordance with the terms, provisions, and conditions of the Plan.

5.2 **By Termination of Employment Other Than Due to Death of Participant.** The Account of a Participant who incurs a termination of employment (other than by reason of death) with the Company or a Participating Employer will continue to be maintained with the periodic fees and any other applicable charges being paid by the Participant in accordance with Section 4.8(c) of the Plan.

5.3 **By Transferring Employment from the Company or a Participating Employer to an Affiliate.** A Participant who transfers employment from the Company or a Participating Employer to an Affiliate who does not sponsor or participate in the Plan may continue to have his or her Account maintained at the expense of the Company while still employed with an Affiliate until the earlier of a Participant Account Closure or an Automatic Account Closure occurring (provided that such Automatic Account Closure can only occur following termination of employment with such Affiliate). In connection with a Participant Account Closure, the Participant must elect to have his or her Account fully distributed in either (1) Stock (except that the value of any fractional shares of Stock will be distributed in cash less any applicable fees) or (2) cash by directing all full shares (and fractional interests) of Stock to be sold with the proceeds, less applicable brokerage commissions and other applicable fees, being distributed, in accordance with the terms, provisions, and conditions of the Plan. Unless and until such Participant re-establishes eligibility to participate in the Plan, such Participant shall no longer be eligible to make or receive Contributions to the Plan (including by Payroll Deduction or Voluntary Contribution).

5.4 **Termination Due to Death of Participant.** Following a Participant's death, the Company or Participating Employer, as applicable, shall cease making Payroll Deductions and Matching Contributions to such Participant's Account as soon as practicable. In addition, as soon as practicable following the Participant's death, the Account Administrator will distribute the proceeds of the deceased Participant's Account less applicable brokerage commissions and other applicable fees in accordance with rules and procedures established by the Committee (which may include a designation by a Participant of a beneficiary or a joint tenant with respect to a Participant's Account) and, in the absence of applicable rules and procedures (or such designations), to the Participant's estate.

VI. Award Program

6.1 **Scope of the Award Program.** The Award Program is designed to provide an incentive to Associates of the Company and Participating Employers who provide exceptional customer service and job performance. Awards under the Award Program are not intended to be given to those who satisfy, but do not exceed, expectations. The Award Program includes an "Outstanding Performance" component.

6.2 Outstanding Performance Component. An "Outstanding Performance" award is an award of Stock to an Associate in recognition of the individual's consistently outstanding performance in his or her specific job-related roles over a month, a quarter, or a year.

(a) Associates who receive "Outstanding Performance" awards may either be issued certificates for shares of Stock or, at the discretion of the Committee, the Company (or Participating Employer) may have the Account Administrator purchase shares of Stock to be credited to the Participant's Account as described in Section 3.6 of the Plan.

(b) "Outstanding Performance" awards are either approved directly by the Committee or by its delegate in accordance with rules and procedures established by the Committee, and are subject to individual maximum dollar limitations as set by the Committee from time to time.

6.3 Former Great Job Component. This component of the Plan was discontinued in 2007 and all outstanding Great Job buttons were cancelled on September 1, 2008.

VII. Administration

7.1 Committee.

(a) Subject to Section 7.2, the Plan shall be administered by the Committee.

(b) The Committee may delegate to officers or managers of the Company or any Affiliate the authority, subject to such terms as the Committee shall determine, to perform specified functions under the Plan. The Committee also may revoke any such delegation of authority at any time.

7.2 Powers of the Committee. Subject to and consistent with the provisions of the Plan, the Committee has full and final authority and sole discretion as follows:

(a) to determine when, to whom and in what types and amounts Contributions should be made;

(b) to make Contributions to eligible Associates in any number, and to determine the terms and conditions applicable to each Contribution;

(c) to determine whether any terms and conditions applicable to a Contribution have been satisfied;

(d) to set minimum and maximum dollar, share or other limitations on the various types of Contributions under the Plan;

(e) to determine whether an Affiliate should be designated as a Participating Employer and whether an Affiliate's Participating Employer status should be terminated;

(f) to determine whether Associates of non-U.S. Participating Employers should be eligible to participate in the Plan;

(g) to construe and interpret the Plan and to make all determinations, including factual determinations, necessary or advisable for the administration of the Plan;

(h) to make, amend, suspend, waive and rescind rules and regulations relating to the Plan (including, but not limited to, such rules and regulations that would allow designations for beneficiaries and/or joint tenants to be made by Participants in connection with Accounts under the Plan);

(i) to appoint such agents as the Committee may deem necessary or advisable to administer the Plan;

(j) to correct any defect or supply any omission or reconcile any inconsistency, and to construe and interpret the Plan, the rules and regulations, and award agreements or any other instrument entered into or relating to a Contribution under the Plan; and

(k) to take any other action with respect to any matters relating to the Plan for which it is responsible and to make all other decisions and determinations as may be required under the terms of the Plan or as the Committee may deem necessary or advisable for the administration of the Plan.

Any action of the Committee with respect to the Plan shall be final, conclusive and binding on all persons, including the Company, its Affiliates, any Associate, any person claiming any rights under the Plan from or through any Participant, and stockholders, except to the extent the Committee may subsequently modify, or take further action not consistent with, its prior action. If not specified in the Plan, the time at which the Committee must or may make any determination shall be determined by the Committee, and any such determination may thereafter be modified by the Committee. The express grant of any specific power to the Committee, and the taking of any action by the Committee, shall not be construed as limiting any power or authority of the Committee.

VIII. Amendment & Termination

8.1 **Right to Amend or Terminate.** The Board, or a duly authorized committee thereof, reserves the right to amend, modify, suspend or discontinue the Plan at any time in its sole discretion without the approval of the Company's stockholders, except that (a) any amendment or modification shall be subject to the approval of the Company's stockholders if such stockholder approval is required by any federal or state law or regulation or the rules of any securities exchange or automated quotation system on which the shares of Stock may then be listed or quoted, and (b) the Board may otherwise, in its discretion, determine to submit other such amendments or modifications to stockholders for approval.

8.2 **Limitation on Right to Amend or Terminate.** Any such amendment, modification, suspension or termination will not result in the forfeiture of (1) subject to Section 3.8(d), any funds contributed but not yet invested in the Participant's Account, (2) any shares (or fractional interests) of Stock purchased on behalf of the Participant under the Plan, or (3) subject to Section 3.8(d), any dividends or other distributions in respect of such shares that are declared subsequent to a Participant's Contribution but prior to the effective date of the amendment, modification, suspension or termination of the Plan.

IX. Miscellaneous Provisions

9.1 **Successors.** All obligations of the Company under the Plan with respect to Contributions made hereunder shall be binding on any successor to the Company, whether the existence of such successor is the result of a direct or indirect purchase, merger, consolidation, or otherwise of all or substantially all of the business and/or assets of the Company.

9.2 **Severability.** If any part of the Plan is declared by any court or governmental authority to be unlawful or invalid, such unlawfulness or invalidity shall not invalidate any other part of the Plan. Any Section or part of a Section so declared to be unlawful or invalid shall, if possible, be construed in a manner which will give effect to the terms of such Section or part of a Section to the fullest extent possible while remaining lawful and valid.

9.3 **Requirements of Law.** The granting of awards, the making of Contributions, and the delivery of shares of Stock under the Plan shall be subject to all applicable laws, rules, and regulations, and to such approvals by any governmental agencies or national securities exchanges as may be required. Notwithstanding any provision of the Plan, Participants shall not be entitled to receive benefits under the Plan, and the Company (and any Affiliate) shall not be obligated to deliver any shares of Stock or deliver benefits to a Participant, if such delivery would constitute a violation by the Participant or the Company or any of its Affiliates of any applicable law or regulation.

9.4 **Securities Law Compliance.**

(a) If the Committee deems it necessary to comply with any applicable securities law or the requirements of any securities exchange upon which shares of Stock may be listed, the Committee may impose any restriction on Contributions, shares of Stock acquired pursuant to Contributions or purchases of shares of Stock under the Plan as it may deem advisable. Shares of Stock credited to the Account of a Participant, delivered to a Participant in certificated form or registered to a Participant in the Direct Registration System that may not be reoffered and resold by such Participant under applicable securities laws except pursuant to an effective registration statement covering or with respect to, or a qualification of, such shares of Stock or of such reoffer and resale of such shares of Stock or in accordance with another compliance procedure permitting a public reoffer and resale of such shares of Stock, in each case, in accordance with applicable securities laws, shall be subject to such stop transfer orders and other restrictions as the Committee may deem advisable under applicable securities laws and the listing requirements and rules for listed companies of any securities exchange upon which shares of Stock are then listed and the Committee may cause a legend or legends to be put on any such certificates to make appropriate reference to such restrictions and, if so requested by the Company, such Participant shall make a written representation to the Company that he or she will not reoffer or resell any shares of Stock held by him or her except in compliance with all applicable requirements for the registration or qualification of such shares of Stock or of such reoffer and resale of such shares of Stock or in accordance with such other compliance procedure permitting the public reoffer and resale of such shares of Stock unless he or she shall have furnished to the Company an opinion of an experienced securities attorney licensed in the jurisdiction whose securities laws govern such reoffer and resale that such registration, qualification or other compliance actions regarding such reoffer and resale are not required for such reoffer and resale of such shares of Stock to be effected in compliance with the applicable securities laws, which opinion shall be in form and substance satisfactory to the Company in its sole discretion.

(b) If the Committee determines that the nonforfeitability of, or delivery of benefits pursuant to, any Contribution or any purchase of shares of Stock, either from the Company or in an open market purchase over a national securities exchange, would result in a violation of any provision of any applicable securities laws or the listing requirements or rules for listed companies of any securities exchange on which the Stock is listed for trading, then the Committee may postpone any such nonforfeitability or delivery, as applicable, and may suspend the purchase of shares of Stock under the Plan, but the Company shall use all reasonable efforts to cause such nonforfeitability or delivery to comply with all such provisions at the earliest practicable date and to permit the Account Administrator to make purchases of shares of Stock in accordance with the Plan at the earliest practicable date; provided that the Company may, in its sole discretion, suspend the participation in the Plan of any Participant or any or all Participants to the extent necessary for the Company to comply or remain in compliance with the securities laws of any jurisdiction, including the United States, and may suspend purchases of shares of Stock that would be deemed to be the offer and sale of shares of Stock by the Company in a transaction that is not registered pursuant to, or exempt from registration under, Section 5 of the Securities Act of 1933, as amended, or is not qualified or otherwise permitted to be made under the securities laws of any jurisdiction outside of the United States, for such period as the Company deems appropriate in order for the Company to file a registration statement with the U.S. Securities and Exchange Commission with respect to the offer and sale of shares of Stock under the Plan and to have such registration statement declared effective by the U.S. Securities and Exchange Commission and to effect all necessary qualifications and to comply with any other compliance procedures required to be adhered to in order for such purchases of such shares of Stock on behalf of Participants to comply with all applicable securities laws, rules, and regulations.

9.5 **No Rights as a Stockholder.** No Participant shall have any rights as a stockholder of the Company with respect to the shares of Stock which may be deliverable to the Participant's Account in connection with a Contribution (other than a Voluntary Contribution of previously-owned shares of Stock) under the Plan until such shares of Stock have been credited to his or her Account or have been delivered to him or her.

9.6 **Nature of Payments.** Matching Contributions and Award Contributions shall be special incentive payments to the Participant and shall not be taken into account in computing the amount of salary or compensation of the Participant for purposes of determining any pension, retirement, death or other benefit under (a) any pension, retirement, profit-sharing, bonus, insurance or other employee benefit plan of the Company or any Affiliate, except as such plan shall otherwise expressly provide, or (b) any agreement between (i) the Company or any Affiliate and (ii) the Participant, except as such agreement shall otherwise expressly provide.

9.7 **Non-Exclusivity of the Plan.** Neither the adoption of the Plan by the Board nor its submission to the stockholders of the Company for approval shall be construed as creating any limitations on the power of the Board to adopt such other compensatory arrangements for Associates as it may deem desirable.

9.8 **Military Service.** The Plan shall be administered in accordance with Section 414(u) of the Internal Revenue Code and the Uniformed Services Employment and Reemployment Rights Act of 1994.

9.9 **Construction.** The following rules of construction will apply to the Plan: (a) the word "or" is disjunctive but not necessarily exclusive, and (b) words in the singular include the plural, words in the plural include the singular, and words in the neuter gender include the masculine and feminine genders and words in the masculine or feminine gender include the other neuter genders.

9.10 **Headings.** The headings of articles and sections are included solely for convenience of reference, and if there is any conflict between such headings and the text of this Plan, the text shall control.

9.11 **Stockholder Approval.** All Contributions made on or after the effective date of the amended and restated Plan and prior to the date the Company's stockholders approve the amended and restated Plan are expressly conditioned upon and subject to approval of the amended and restated Plan by the Company's stockholders.

9.12 **Taxes.** All Payroll Deduction Contributions, Matching Contributions and Award Contributions are subject to withholding for applicable federal, state and local income taxes and will be reported as wage income by the Company. When a Participant authorizes a Payroll Deduction of a specific amount, more than that amount will actually be withheld from his or her compensation to cover the withholding taxes due on the Payroll Deduction Contribution and Matching Contribution. Unless set forth otherwise by applicable law, rule, or regulation, the distribution of shares of Stock from a Participant's Account to a Participant, or cash in lieu of fractional shares, will not be a taxable event.

9.13 **Company-Associate Relationships.** Nothing contained in this Plan shall in any way affect the rights of the Company (including any of its Affiliates) in its relationship with any Associate or affect the Company's (including any of its Affiliates') right to discharge any Associate or increase or reduce any Associate's compensation.

9.14 **Governing Law.** This Plan shall be governed by and construed in accordance with the laws of the State of Delaware, except to the extent it is governed by the federal securities laws or the choice of laws provision contained in the Company's agreement with the Account Administrator.

9.15 **Adjustments upon Changes in Capitalization or Merger.** Subject to any required action by the Company's stockholders, the number and type of shares of Stock available for Contributions under the Plan shall be proportionately adjusted to reflect an extraordinary dividend or other distribution, stock split, reverse stock split, merger, reorganization, subdivision, consolidation or reduction of capital, recapitalization, consolidation, split-up, spin-off, combination or reclassification of the Stock, or any other increase or decrease in the number of outstanding Stock effected without receipt of consideration by the Company, issuance or warrants or other rights to purchase Stock or other securities of the Company or other similar corporate transaction or event that affects the Stock such that an adjustment is determined by the Board or the Committee to be appropriate in order to prevent dilution or enlargement of the benefits or potential benefits intended to be made available under the Plan. That adjustment shall be made by the Board or the Committee, whose determination shall be final, binding, and conclusive as to every person interested under the Plan.

Exhibit 10.7(a)

AMENDED SCHEDULE OF EXECUTIVE OFFICERS WHO HAVE EXECUTED A POST-TERMINATION AGREEMENT AND COVENANT NOT TO COMPETE IN THE FORM FILED AS EXHIBIT 10(p) TO THE ANNUAL REPORT ON FORM 10-K OF THE COMPANY FOR THE FISCAL YEAR ENDED JANUARY 31, 2011 (this "Amended Schedule")

This Amended Schedule amends the Schedule of Executive Officers Who Have Executed a Post-Termination Agreement and Covenant Not to Compete that followed the form of Post-Termination Agreement and Covenant Not to Compete originally filed by Walmart Inc. (formerly Wal-Mart Stores, Inc.) as Exhibit 10(p) to its Annual Report on Form 10-K for the year ended January 31, 2011, as filed on March 30, 2011 (the "Form Agreement"). This Amended Schedule is included pursuant to Instruction 2 of Item 601(a) of Regulation S-K for the purpose of setting forth the details in which the specific agreements executed in the form of the Form Agreement differ from the Form Agreement, in particular to set forth the persons who, with Walmart Inc., were parties to Post-Termination Agreements and Covenants Not to Compete in such form as of January 31, 2024.

Executive Officer Who is a Party to such a Post-Termination Agreement and Covenant Not to Compete	Date of Agreement	Value of Restricted Stock Award Granted in Connection with Agreement
Daniel J. Bartlett	May 16, 2013	Not Applicable
Rachel L. Brand	February 21, 2018	Not Applicable
David Chojnowski	November 16, 2016	Not Applicable
John R. Furner	May 7, 2011	Not Applicable
C. Douglas McMillon	January 19, 2010	$2,000,000
Christopher Nicholas	March 10, 2018	Not Applicable
Kathryn McLay	December 24, 2015	Not Applicable
Donna Morris	December 17, 2019	Not Applicable
John David Rainey	May 23, 2022	Not Applicable

Exhibit 21

Significant Subsidiaries of Walmart Inc.

The following list details certain of the subsidiaries of Walmart Inc. Subsidiaries not included in the list are omitted because, in the aggregate, they are not significant as permitted by Item 601(b)(21) of Regulation S-K.

Subsidiary	Organized or Incorporated	Percent of Equity Securities Owned	Name Under Which Doing Business Other Than Subsidiary's
Wal-Mart Stores East, LP	Delaware, U.S.	100%	Walmart
Wal-Mart Stores Texas, LLC	Delaware, U.S.	100%	Walmart
Wal-Mart Property Company	Delaware, U.S.	100%	NA
Wal-Mart Real Estate Business Trust	Delaware, U.S.	100%	NA
Sam's West, Inc.	Arkansas, U.S.	100%	Sam's Club
Sam's East, Inc.	Arkansas, U.S.	100%	Sam's Club
Sam's Property Company	Delaware, U.S.	100%	NA
Sam's Real Estate Business Trust	Delaware, U.S.	100%	NA
Wal-Mart de Mexico, S.A.B. de C.V.	Mexico	71%	Walmex
Wal-Mart Canada Corp.	Canada	100%	Walmart
Flipkart Private Limited	Singapore	85%	Flipkart
Walmart Chile S.A.[(1)]	Chile	100%	Walmart Chile
Massmart Holdings Ltd.	South Africa	100%	Massmart
Qomolangma Holdings Ltd.	Luxembourg	100%	NA

(1) The Company owns substantially all of Walmart Chile.

(19)	Debt Securities of Walmart Inc.	Form S-3 ASR File No. 333-275878

of our reports dated March 15, 2024, with respect to the Consolidated Financial Statements of Walmart Inc. and the effectiveness of internal control over financial reporting of Walmart Inc. included in this Annual Report (Form 10-K) of Walmart Inc. for the year ended January 31, 2024.

/s/ Ernst & Young LLP

Rogers, Arkansas
March 15, 2024

Exhibit 31.1

I, C. Douglas McMillon, certify that:

1. I have reviewed this Annual Report on Form 10-K of Walmart Inc. (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report, based on such evaluation; and
   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the Audit Committee of registrant's Board of Directors:
   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350 (AS ADOPTED
PURSUANT TO SECTION 906 OF THE
SARBANES-OXLEY ACT OF 2002)**

In connection with the Annual Report of Walmart Inc. (the "Company") on Form 10-K for the period ending January 31, 2024 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, C. Douglas McMillon, President and Chief Executive Officer of the Company, certify to my knowledge and in my capacity as an officer of the Company, pursuant to 18 U.S.C. 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and

2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company as of the dates and for the periods expressed in the Report.

IN WITNESS WHEREOF, the undersigned has executed this Certificate, effective as of March 15, 2024.

Exhibit 97.1

WALMART INC.
EXECUTIVE COMPENSATION RECOUPMENT POLICY

1. **Purpose**. The purpose of this Policy is to describe the circumstances in which Executive Officers will be required to repay or return Erroneously Awarded Compensation to members of the Company. Each Executive Officer shall be required to sign and return to the Company the Acknowledgement Form attached hereto pursuant to which such Executive Officer will agree to be bound by the terms and comply with this Policy.

2. **Administration**. This Policy shall be administered by the Committee. Any determinations made by the Committee shall be final and binding on all affected individuals.

3. **Definitions**. For purposes of this Policy, the following capitalized terms shall have the meanings set forth below.

    a. "***Accounting Restatement***" shall mean an accounting restatement (i) due to the material noncompliance of the Company with any financial reporting requirement under the securities laws, including any required accounting restatement to correct an error in previously issued financial restatements that is material to the previously issued financial statements (a "Big R" restatement), or (ii) that corrects an error that is not material to previously issued financial statements, but would result in a material misstatement if the error were corrected the current period or left uncorrected in the current period (a "little r" restatement).

    b. "***Board***" shall mean the Board of Directors of the Company.

    c. "***Clawback Eligible Incentive Compensation***" shall mean, in connection with an Accounting Restatement and with respect to each individual who served as an Executive Officer at any time during the applicable performance period for any Incentive-based Compensation (whether or not such Executive Officer is serving at the time the Erroneously Awarded Compensation is required to be repaid to the Company), all Incentive-based Compensation Received by such Executive Officer (i) on or after the Effective Date, (ii) after beginning service as an Executive Officer, (iii) while the Company has a class of securities listed on a national securities exchange or a national securities association, and (iv) during the applicable Clawback Period.

    d. "***Clawback Period***" shall mean, with respect to any Accounting Restatement, the three most recently completed fiscal years of the Company immediately preceding the Restatement Date. In the event the Company changes its fiscal year within or immediately following the above-described three fiscal year period, the Clawback Period will also include the resulting transition period if such transition period is less than nine months. For purposes of this Policy, any transition period of nine to twelve months will be deemed a completed fiscal year.

e. "***Committee***" shall mean the Compensation and Management Development Committee of the Board or any successor committee of the Board that satisfies the requirements of Section 303A.05 of the NYSE Listed Company Manual.

f. "***Company***" shall mean Walmart Inc. a Delaware corporation, together with its subsidiaries and affiliates.

g. "***Effective Date***" shall mean October 2, 2023.

h. "***Erroneously Awarded Compensation***" shall mean, with respect to each Executive Officer in connection with an Accounting Restatement, the amount of Clawback Eligible Incentive Compensation that exceeds the amount of Incentive-based Compensation that otherwise would have been Received had it been determined based on the restated amounts, computed without regard to any taxes paid.

i. "***Executive Officer***" shall mean each individual who is or was designated as an "officer" of the Company in accordance with 17 C.F.R. 240.16a-1(f). For purposes of this policy, Executive Officers shall include at a minimum the executive officers identified pursuant to 17 C.F.R. 229.401(b).

j. "***Financial Reporting Measures***" shall mean: (i) measures that are determined and presented in accordance with the accounting principles used in preparing the Company's financial statements; (ii) measures derived wholly or in part from such measures; (iii) the Company's stock price; and (iv) the Company's total shareholder return. For the avoidance of doubt, a Financial Reporting Measure need not be presented in the Company's financial statements or included in a filing with the SEC.

k. "***Incentive-based Compensation***" shall mean any compensation that is granted, earned or vested based wholly or in part upon the attainment of a Financial Reporting Measure.

l. "***NYSE***" shall mean the New York Stock Exchange.

m. "***Policy***" shall mean this Policy, as the same may be amended and/or restated from time to time.

n. "***Received***" shall, with respect to any Incentive-based Compensation, mean actual or deemed receipt, and Incentive-based Compensation shall be deemed received in the Company's fiscal period during which the Financial Reporting Measure specified in the Incentive-based Compensation award is attained, even if payment or grant of the Incentive-based Compensation occurs after the end of that period.

o. "***Restatement Date***" shall mean the earlier to occur of (i) the date the Board, a committee of the Board, or the officers of the Company authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the issuer is required to prepare an Accounting Restatement, or (ii) the date of court, regulator or other legally authorized body directs the issuer to prepare an Accounting Restatement.

p. “***SEC***” shall mean the U.S. Securities and Exchange Commission.

4. **Repayment of Erroneously Awarded Compensation**.

a. In the event of an Accounting Restatement, the Committee shall reasonably promptly (and in all events within ninety (90) days after the Restatement Date) determine the amount of any Erroneously Awarded Compensation for each Executive Officer in connection with such Accounting Restatement and shall promptly thereafter provide each Executive Officer with a written notice containing the amount of Erroneously Awarded Compensation and a demand for repayment or return, as applicable. For Incentive-based Compensation based on (or derived from) stock price or total shareholder return where the amount of Erroneously Awarded Compensation is not subject to mathematical recalculation directly from the information in the applicable Accounting Restatement, the amount shall be determined by the Committee based on a reasonable estimate of the effect of the Accounting Restatement on the stock price or total shareholder return upon which the Incentive-based Compensation was Received (in which case, the Company shall maintain documentation of such determination of that reasonable estimate and provide such documentation to the NYSE.

b. The Committee shall have broad discretion to determine the appropriate means of recovery of Erroneously Awarded Compensation based on all applicable facts and circumstances and taking into account the time value of money and the cost to shareholders of delaying recovery. To the extent that the Committee determines that any method of recovery (other than repayment by the Executive Officer in a lump sum in cash or property) is appropriate, the Company shall offer to enter into a repayment agreement (in a form reasonable acceptable to the Committee) with the Executive Officer. If the Executive Officer accepts such offer and signs the repayment agreement within thirty (30) days after such offer is extended, the Company shall countersign such repayment agreement. If the Executive Officer fails to sign the repayment agreement within thirty (30) days after such offer is extended, the Executive Officer will be required to repay the Erroneously Awarded Compensation in a lump sum in cash (or such property as the Committee agrees to accept with a value equal to such Erroneously Awarded Compensation) on or prior to the date that is one hundred twenty (120) days following the Restatement Date. For the avoidance of doubt, except as set forth in Section 4(d) below, in no event may the Company accept an amount that is less than the amount of Erroneously Awarded Compensation in satisfaction of an Executive Officer’s obligations hereunder.

c. To the extent that an Executive Officer fails to repay all Erroneously Awarded Compensation to the Company when due (as determined in accordance with Section 4(b) above), the Company shall take all actions reasonable and appropriate to recover such Erroneously Awarded Compensation from the applicable Executive Officer. The applicable Executive Officer shall be required to reimburse the

Company for any and all expenses reasonably incurred (including legal fees) by the Company in recovering such Erroneously Awarded Compensation in accordance with the immediately preceding sentence.

d. Notwithstanding anything herein to the contrary, the Company shall not be required to take the actions contemplated by Section 4(b) above if the following conditions are met and the Committee determines that recovery would be impracticable:

   i. The direct expenses paid to a third party to assist in enforcing the Policy against an Executive Officer would exceed the amount to be recovered, after the Company has made a reasonable attempt to recover the applicable Erroneously Awarded Compensation, documented such attempts and provided such documentation to the NYSE;

   ii. Recovery would violate home country law where that law was adopted prior to November 28, 2022, provided that, before determining that it would be impracticable to recover any amount of Erroneously Awarded Compensation based on violation of home country law, the Company has obtained an opinion of home country counsel, acceptable to the NYSE, that recovery would result in such a violation and a copy of the opinion is provided to the NYSE; or

   iii. Recovery would likely cause an otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of the Company, to fail to meet the requirements of 26 U.S.C. 401(a)(13) or 26 U.S.C. 411(a)and regulations thereunder.

5. **Reporting and Disclosure**. The Company shall file all disclosures with respect to this Policy in accordance with the requirement of the federal securities laws and regulations thereunder, including the disclosure required by applicable SEC filings.

6. **Indemnification Prohibition**. The Company shall not be permitted to indemnify any Executive Officer against (i) the loss of any Erroneously Awarded Compensation that is repaid, returned or recovered pursuant to the terms of this Policy, or (ii) any claims relating to the Company’s enforcement of its rights under this Policy. Further, the Company shall not enter into any agreement that exempts any Incentive-based Compensation from the application of this Policy or that waives the Company’s right to recovery of any Erroneously Awarded Compensation, and this Policy shall supersede any such agreement (whether entered into before, on or after the Effective Date).

7. **Interpretation**. The Committee is authorized to interpret and construe this Policy and to make all determinations necessary, appropriate, or advisable for the administration of this Policy.

8. **Effective Date**. This Policy shall be effective as of the Effective Date.

9. **Amendment**; **Termination**. The Committee may amend this Policy from time to time in its discretion and shall amend this Policy as it deems necessary, including as and when it determines that it is legally required by any federal securities laws, SEC rule or the rules of any national securities exchange or national securities association on which the Company's securities are listed. The Committee may terminate this Policy at any time. Notwithstanding anything in this Section 9 to the contrary, no amendment or termination of this Policy shall be effective if such amendment or termination would (after taking into account any actions taken by the Company contemporaneously with such amendment or termination) cause the Company to violate any federal securities laws, SEC rule or the rules of any national securities exchange or national securities association on which the Company's securities are listed.

10. **Other Recoupment Rights**; **No Additional Payments**. The Committee may require that any offer letter, employment agreement, equity award agreement, or any other agreement entered into on or after the Effective Date shall, as a condition to the grant of any benefit thereunder, require an Executive Officer to agree to abide by the terms of this Policy. Any right of recoupment under this Policy is in addition to, and not in lieu of, any other remedies or rights of recoupment that may be available to the Company under applicable law, regulation or rule or pursuant to the terms of any compensatory plan, offer letter, employment agreement, equity award agreement, or similar agreement and any other legal remedies available to the Company.

11. **Successors**. This Policy shall be binding and enforceable against all Executive Officers and their beneficiaries, heirs, executors, administrators or other legal representatives.

WALMART INC.
EXECUTIVE COMPENSATION RECOUPMENT POLICY

ACKNOWLEDGEMENT FORM

By signing below, the undersigned acknowledges and confirms that the undersigned has received and reviewed a copy of the Walmart Inc. Executive Compensation Recoupment Policy (the "***Policy***"). Capitalized terms used but not otherwise defined in this Acknowledgement Form (this "***Acknowledgement Form***") shall have the meanings ascribed to such terms in the Policy.

By signing this Acknowledgement Form, the undersigned acknowledges and agrees that the undersigned is and will continue to be subject to the Policy and that the Policy will apply both during and after the undersigned's employment with the Company. Further, by signing below, the undersigned agrees to abide by the terms of the Policy, including, without limitation, by returning any Erroneously Awarded Compensation (as defined in the Policy) to the Company to the extent required by, and in a manner permitted by, the Policy.
