The framework is employed across the Firm using historical simulation based on data for the previous 12 months. The framework's approach assumes that historical changes in market values are representative of the distribution of potential outcomes in the immediate future. The Firm believes the use of Risk Management VaR provides a daily measure of risk that is closely aligned to risk management decisions made by the LOBs and Corporate and, along with other market risk measures, provides the appropriate information needed to respond to risk events.

The Firm's Risk Management VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 95% confidence level. Risk Management VaR provides a consistent framework to measure risk profiles and levels of diversification across product types and is used for aggregating risks and monitoring limits across businesses. VaR results are reported as appropriate to various groups including senior management, the Board Risk Committee and regulators.

Underlying the overall VaR model framework are individual VaR models that simulate historical market returns for individual risk factors and/or product types. To capture material market risks as part of the Firm's risk management framework, comprehensive VaR model calculations are performed daily for businesses whose activities give rise to market risk. These VaR models are granular and incorporate numerous risk factors and inputs to simulate daily changes in market values over the historical period; inputs are selected based on the risk profile of each portfolio, as sensitivities and historical time series used to generate daily market values may be different across product types or risk management systems. The VaR model results across all portfolios are aggregated at the Firm level.

As VaR is based on historical data, it is an imperfect measure of market risk exposure and potential future losses. In addition, based on their reliance on available historical data, limited time horizons, and other factors, VaR measures are inherently limited in their ability to measure certain risks and to predict losses, particularly those associated with market illiquidity and sudden or severe shifts in market conditions.

For certain products, specific risk parameters are not captured in VaR due to the lack of liquidity and availability of appropriate historical data. The Firm uses proxies to estimate the VaR for these and other products when daily time series are not available. It is likely that using an actual price-based time series for these products, if available, would affect the VaR results presented. The Firm therefore considers other nonstatistical measures such as stress testing, in addition to VaR, to capture and manage its market risk positions.

As VaR model calculations require daily data and a consistent source for valuation, the daily market data used may be different than the independent third-party data collected for VCG price testing in its monthly valuation process. For example, in cases where market prices are not observable, or where proxies are used in VaR historical time series, the data sources may differ. Refer to Valuation process in Note 2 for further information on the Firm's valuation process.

The Firm's VaR model calculations are periodically evaluated and enhanced in response to changes in the composition of the Firm's portfolios, changes in market conditions, improvements in the Firm's modeling techniques and measurements, and other factors. Such changes may affect historical comparisons of VaR results. Refer to Estimations and Model Risk Management on page 160 for information regarding model reviews and approvals.

The Firm calculates separately a daily aggregated VaR in accordance with regulatory rules ("Regulatory VaR"), which is used to derive the Firm's regulatory VaR-based capital requirements under Basel III capital rules. This Regulatory VaR model framework currently assumes a ten business-day holding period and an expected tail-loss methodology which approximates a 99% confidence level. Regulatory VaR is applied to "covered" positions as defined by Basel III capital rules, which may be different than the positions included in the Firm's Risk Management VaR. For example, credit derivative hedges of accrual loans are included in the Firm's Risk Management VaR, while Regulatory VaR excludes these credit derivative hedges. In addition, in contrast to the Firm's Risk Management VaR, Regulatory VaR currently excludes the diversification benefit for certain VaR models.

Refer to JPMorganChase's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for additional information on Regulatory VaR and the other components of market risk regulatory capital for the Firm (e.g., VaR-based measure, stressed VaR-based measure and the respective backtesting).

The table below shows the results of the Firm's Risk Management VaR measure using a 95% confidence level. VaR can vary significantly as positions change, market volatility fluctuates, and diversification benefits change.

Total VaR

As of or for the year ended December 31,	2024			2023		
(in millions)	Avg.	Min	Max	Avg.	Min	Max
CIB trading VaR by risk type[(a)]						
Fixed income	**$ 34**	**$ 26**	**$ 53**	$ 49	$ 31	$ 71
Foreign exchange	**15**	**7**	**23**	12	6	26
Equities	**8**	**4**	**15**	7	3	11
Commodities and other	**8**	**6**	**13**	11	6	19
Diversification benefit to CIB trading VaR [(b)]	**(32)**	**NM**	**NM**	(42)	NM	NM
CIB trading VaR	**33**	**27**	**42**	37	24	55
Credit Portfolio VaR[(c)]	**22**	**18**	**28**	14	8	26
Diversification benefit to CIB VaR[(b)]	**(16)**	**NM**	**NM**	(11)	NM	NM
CIB VaR	**39**	**27**	**52**	40	23	58
CCB VaR	**3**	**1**	**6**	7	1	15
AWM VaR[(d)]	**9**	**5**	**10**	1	—	10
Corporate VaR[(d)(e)]	**23**	**7**	**102**	12	9	17
Diversification benefit to other VaR[(b)]	**(10)**	**NM**	**NM**	(6)	NM	NM
Other VaR	**25**	**10**	**101**	14	9	22
Diversification benefit to CIB and other VaR[(b)]	**(17)**	**NM**	**NM**	(11)	NM	NM
Total VaR	**$ 47**	**$ 30**	**$ 91**	$ 43	$ 26	$ 57

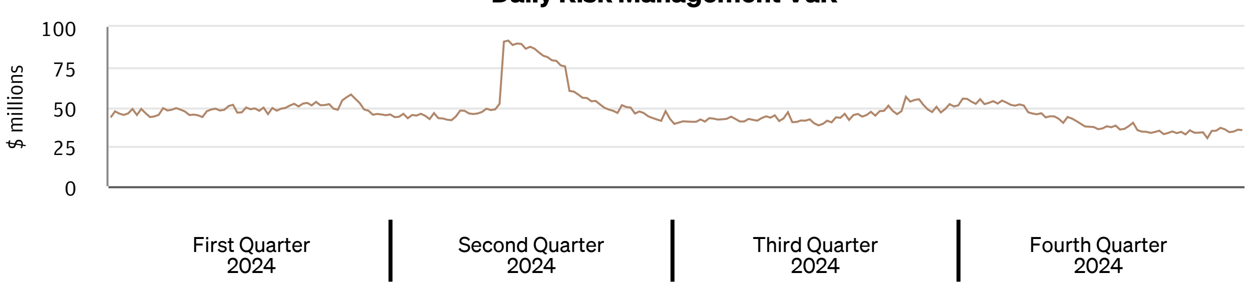
(a) The impact of the business segment reorganization in the second quarter of 2024 was not material to Total CIB VaR. Prior periods have not been revised. Refer to Business Segment & Corporate Results on pages 70–90 for additional information.
(b) Diversification benefit represents the difference between the portfolio VaR and the sum of its individual components. This reflects the non-additive nature of VaR due to imperfect correlation across LOBs, Corporate, and risk types. For maximum and minimum VaR, diversification benefit is not meaningful as the maximum and minimum VaR for each portfolio may have occurred on different trading days than the components.
(c) Includes the derivative CVA, hedges of the CVA and credit protection purchased against certain retained loans and lending-related commitments, which are reported in principal transactions revenue. This VaR does not include the retained loan portfolio, which is not reported at fair value. In line with the Firm's internal model governance, the credit risk component of CVA related to certain counterparties was removed from Credit Portfolio VaR due to the widening of the credit spreads for those counterparties to elevated levels. The related hedges were also removed to maintain consistency. This exposure is now reflected in other sensitivity-based measures.
(d) In the second quarter of 2024, the presentation of Corporate and other LOB VaR was updated to disaggregate AWM VaR due to the increase associated with credit protection purchased against certain retained loans and lending-related commitments. The VaR does not include the retained loan portfolio, which is not reported at fair value.
(e) Includes a legacy private equity position which is publicly traded, as well as Visa C shares which the Firm disposed of in the second and third quarters of 2024. The impact of Visa C shares resulted in elevated average and maximum Corporate VaR, Other VaR and Total VaR. Refer to Executive Overview on pages 54–58 for additional information.

2024 compared with 2023

Average Total VaR increased by $4 million for the year ended December 31, 2024 when compared with the prior year. The increase was predominantly driven by the impact of the Firm's receipt of Visa C shares on Corporate VaR and increases associated with credit protection purchased against certain retained loans and lending-related commitments within Credit Portfolio VaR and AWM VaR, largely offset by market volatility rolling out of the one-year historical look-back period impacting the Fixed income risk type.

The following graph presents daily Risk Management VaR for the four trailing quarters. The increase in VaR and subsequent decline observed in the second quarter of 2024 was primarily driven by changes in Visa C share exposure in the Firm's Corporate VaR.

Daily Risk Management VaR



VaR backtesting

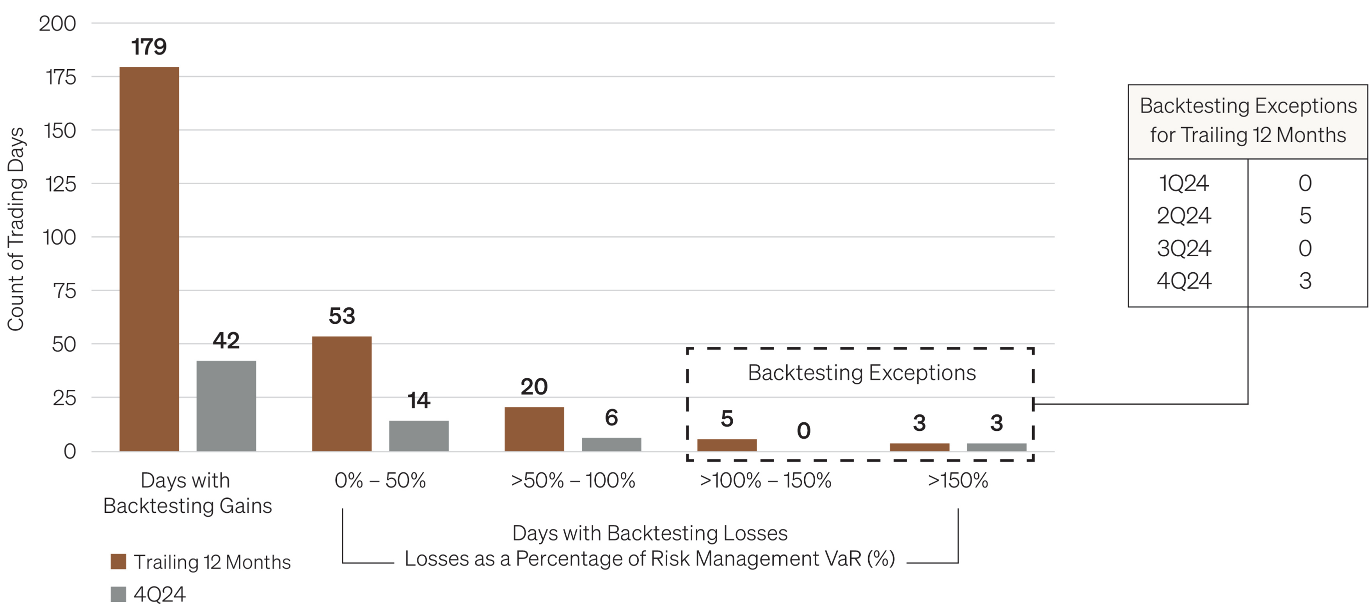
The Firm performs daily VaR model backtesting, which compares the daily Risk Management VaR results with the daily gains and losses that are utilized for VaR backtesting purposes. The gains and losses depicted in the chart below do not reflect the Firm's reported revenue as they exclude certain components of total net revenue, such as those associated with the execution of new transactions (i.e., intraday client-driven trading and intraday risk management activities), fees, commissions, other valuation adjustments and net interest income. These excluded components of total net revenue may more than offset the backtesting gain or loss on a particular day. The definition of backtesting gains and losses above is consistent with the requirements for backtesting under Basel III capital rules.

A backtesting exception occurs when the daily backtesting loss exceeds the daily Risk Management VaR for the prior day. Under the Firm's Risk Management VaR methodology, assuming current changes in market values are consistent with the historical changes used in the simulation, the Firm would expect to incur VaR backtesting exceptions five times every 100 trading days on average. The number of VaR backtesting exceptions observed can differ from the statistically expected number of backtesting exceptions if the current level of market volatility is materially different from the level of market volatility during the 12 months of historical data used in the VaR calculation.

For the 12 months ended December 31, 2024, the Firm posted backtesting gains on 179 of the 260 days, and observed eight VaR backtesting exceptions, of which three were in the three months ended December 31, 2024. Firmwide backtesting loss days can differ from the loss days for which Fixed Income Markets and Equity Markets posted losses, as disclosed in CIB Markets revenue, as the population of positions which comprise each metric are different and due to the exclusion of certain components of total net revenue in backtesting gains and losses as described above.

The following chart presents the distribution of Firmwide daily backtesting gains and losses for the trailing 12 months and three months ended December 31, 2024. The daily backtesting losses are displayed as a percentage of the corresponding daily Risk Management VaR. The count of days with backtesting losses are shown in aggregate, in fifty percentage point intervals. Backtesting exceptions are displayed within the intervals that are greater than one hundred percent. The results in the chart below differ from the results of backtesting disclosed in the Market Risk section of the Firm's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are based on Regulatory VaR applied to the Firm's covered positions.

Distribution of Daily Backtesting Gains and Losses



Other risk measures

Stress testing

Along with VaR, stress testing is an important tool used to assess risk. While VaR reflects the risk of loss due to adverse changes in markets using recent historical market behavior, stress testing reflects the risk of loss from hypothetical changes in the value of market risk sensitive positions applied simultaneously. Stress testing measures the Firm's vulnerability to losses under a range of stressed but possible economic and market scenarios. The results are used to understand the exposures responsible for those potential losses and are measured against limits.

The Firm's stress framework covers market risk sensitive positions in the LOBs and Corporate. The framework is used to calculate multiple magnitudes of potential stress for both market rallies and market sell-offs, assuming significant changes in market factors such as credit spreads, equity prices, interest rates, currency rates and commodity prices, and combines them in multiple ways to capture an array of hypothetical economic and market scenarios.

The Firm generates a number of scenarios that focus on tail events in specific asset classes and geographies, including how the event may impact multiple market factors simultaneously. Scenarios also incorporate specific idiosyncratic risks and stress basis risk between different products. The flexibility in the stress framework allows the Firm to construct new scenarios that can test the outcomes against possible future stress events. Stress testing results are reported periodically to senior management of the Firm, as appropriate.

Stress methodologies are governed by the overall stress framework, under the oversight of Market Risk Management. The Firmwide Market Risk Stress Methodology Committee reviews and approves changes to stress testing methodology and scenarios across the Firm. Significant changes to the framework are escalated to senior management, as appropriate. In addition, stress methodology and the models to calculate the stress results are subject to the Firm's Estimations and Model Risk Management Policy

The Firm's stress testing framework is utilized in calculating the Firm's CCAR and other stress test results, which are reported periodically to the Board of Directors. In addition, stress testing results are incorporated into the Firm's Risk Appetite framework, and are reported periodically to the Board Risk Committee.

Profit and loss drawdowns

Profit and loss drawdowns are used to highlight trading losses above certain levels of risk tolerance. A profit and loss drawdown is a decline in revenue from its year-to-date peak level.

Structural interest rate risk management

The effect of interest rate exposure on the Firm's reported net income is important as interest rate risk represents one of the Firm's significant market risks. Interest rate risk arises not only from trading activities which are included in VaR, but also from the Firm's traditional banking activities, which include extension of loans and credit facilities, taking deposits, issuing debt, as well as the investment securities portfolio, and associated derivative instruments. Refer to the table on page 142 for a summary by LOB and Corporate identifying positions included in earnings-at-risk.

Governance

The CTC Risk Committee establishes the Firm's interest rate risk management policy and related limits, which are subject to approval by the Board Risk Committee. Treasury and CIO, working in partnership with the LOBs, calculates the Firm's structural interest rate risk profile and reviews it with senior management, including the CTC Risk Committee. In addition, oversight of structural interest rate risk is managed through a dedicated risk function reporting to the CTC CRO. This risk function is responsible for providing independent oversight and governance around assumptions and establishing and monitoring limits for structural interest rate risk, including limits related to Earnings-at-Risk and Economic Value Sensitivity. The Firm manages structural interest rate risk generally through its investment securities portfolio and interest rate derivatives.

Key risk drivers and risk management process

Structural interest rate risk can arise due to a variety of factors, including:

- Differences in timing among the maturity or repricing of assets, liabilities and off-balance sheet instruments
- Differences in the amounts of assets, liabilities and off-balance sheet instruments that are maturing or repricing at the same time
- Differences in the amounts by which short-term and long-term market interest rates change (for example, changes in the slope of the yield curve)
- The impact of changes in the maturity of various assets, liabilities or off-balance sheet instruments as interest rates change

The Firm manages interest rate exposure related to its assets and liabilities on a consolidated, Firmwide basis. Business units transfer their interest rate risk to Treasury and CIO through funds transfer pricing, which takes into account the elements of interest rate exposure that can be risk-managed in financial markets. These elements include asset and liability balances and contractual rates of interest, contractual principal payment schedules, expected prepayment experience, interest rate reset dates and maturities, rate indices used for repricing, and any interest rate ceilings or floors for adjustable rate products.

Earnings-at-Risk

One way that the Firm evaluates its structural interest rate risk is through earnings-at-risk. Earnings-at-risk estimates the Firm's interest rate exposure for a given interest rate scenario. It is presented as a sensitivity to a baseline, which includes net interest income and certain interest rate sensitive fees. The baseline uses market interest rates and, in the case of deposits, pricing assumptions. The Firm conducts simulations of changes to this baseline for interest rate-sensitive assets and liabilities denominated in U.S. dollars and other currencies ("non-U.S. dollar" currencies). These simulations primarily include retained and held-for-sale loans, deposits, deposits with banks and financing activities, investment securities, long-term debt, related interest rate hedges, and funds transfer pricing of other positions in risk management VaR and other sensitivity-based measures as described on page 142. Beginning in the fourth quarter of 2024, these simulations also include hedges of non-U.S. dollar foreign exchange exposures arising from capital investments. Refer to non-U.S. dollar foreign exchange risk on page 149 for more information.

Earnings-at-risk scenarios estimate the potential change to a baseline over the following 12 months utilizing multiple assumptions. These scenarios include a parallel shift involving changes to both short-term and long-term rates by an equal amount; a steeper yield curve involving holding short-term rates constant and increasing long-term rates; and a flatter yield curve involving increasing short-term rates and holding long-term rates constant or holding short-term rates constant and decreasing long-term rates. These scenarios consider many different factors, including:

- The impact on exposures as a result of instantaneous changes in interest rates from baseline rates.
- Forecasted balance sheet, as well as modeled prepayment and reinvestment behavior, but excluding assumptions about actions that could be taken by the Firm or its clients and customers in response to instantaneous rate changes. Mortgage prepayment assumptions are based on the interest rates used in the scenarios compared with underlying contractual rates, the time since origination, and other factors which are updated periodically based on historical experience. Deposit forecasts are a key assumption in the Firm's earnings-at-risk. The baseline reflects certain assumptions relating to the Federal Reserve's balance sheet policy (e.g., quantitative tightening and usage at the Reverse Repurchase Facility) that require management judgment. The amount of deposits that the Firm holds at any given time may be influenced by Federal Reserve actions, as well as broader monetary conditions and competition for deposits.
- The pricing sensitivity of deposits, known as deposit betas, represent the amount by which deposit rates paid could change upon a given change in market interest rates. Actual deposit rates paid may differ from the modeled assumptions, primarily due to customer behavior and competition for deposits.

The Firm performs sensitivity analyses of the assumptions used in earnings-at-risk scenarios, including with respect to deposit betas and forecasts of deposit balances, both of which are especially significant in the case of consumer deposits. The results of these sensitivity analyses are reported to the CTC Risk Committee and the Board Risk Committee.

The Firm's earnings-at-risk scenarios are periodically evaluated and enhanced in response to changes in the composition of the Firm's balance sheet, changes in market conditions, improvements in the Firm's simulation and other factors. In the second quarter of 2024, the Firm updated certain deposit rates paid assumptions which take into account observed pricing and client and customer behavior during the most recent economic cycle. These updated deposit rates paid assumptions impacted the U.S. dollar scenarios, resulting in an increase in positive sensitivity in higher interest rate scenarios, and an increase in negative sensitivity in lower interest rate scenarios.

The Firm's earnings-at-risk sensitivities are measures of the Firm's interest rate exposure. The Firm's actual net interest income for the rate changes presented may differ as the earnings-at-risk scenarios are modelled as instantaneous changes and exclude any actions that could be taken by the Firm or its clients or customers in response to rate changes. Other significant assumptions in the earnings-at-risk scenarios, including mortgage prepayments and deposit rates paid, may also differ from actual results. The Firm's forecast for net interest income is included in the Firm's outlook on page 57.

The Firm's sensitivities are presented in the table below.

December 31, (in billions)	2024[(a)]	2023[(b)]
Parallel shift:		
+100 bps shift in rates	**$ 2.3**	$ 3.1
-100 bps shift in rates	**(2.5)**	(2.8)
+200 bps shift in rates	**4.6**	6.2
-200 bps shift in rates	**(4.9)**	(6.1)
Steeper yield curve:		
+100 bps shift in long-term rates	**1.0**	0.6
-100 bps shift in short-term rates	**(1.4)**	(2.2)
Flatter yield curve:		
+100 bps shift in short-term rates	**1.2**	2.5
-100 bps shift in long-term rates	**(1.1)**	(0.6)

(a) Reflects the simultaneous shift of U.S. dollar and non-U.S. dollar rates, and the inclusion of the hedges of non-U.S. dollar capital investments. This inclusion had no impact on total sensitivities but increased U.S. dollar and decreased non-U.S. dollar sensitivities. Subsequent to this change, non-U.S. dollar sensitivities were insignificant.
(b) At December 31, 2023, represents the total of the Firm's U.S. dollar and non-U.S. dollar sensitivities as previously reported.

The change in the Firm's sensitivities as of December 31, 2024, compared to December 31, 2023, were primarily driven by Treasury and CIO balance sheet actions where the Firm added duration through investment securities activity, cash flow hedges of retained loans and fair value hedges of Firm debt. The impact on the sensitivities of the Treasury and CIO balance sheet actions were largely offset by the impact of deposits, primarily from the second quarter of 2024 update of the deposit rates paid assumptions for certain consumer and wholesale deposit products. Additionally, the results as of December 31, 2024 reflected the update to include hedges of the Firm's non-U.S. dollar capital investments. Although total results were not impacted, these hedges increase U.S. dollar sensitivities and decrease non-U.S. dollar sensitivities. In the absence of these updates the Firm's sensitivities as of December 31, 2024, would have been different by the amounts reported in the following table:

	Amounts by which reported sensitivities would have been different	
December 31, 2024 (in billions)	Impact from update in the second quarter of 2024	Impact from update in the fourth quarter of 2024
U.S. dollar:		
Parallel shift:		
+100 bps shift in rates	$ (1.0)	$ (0.6)
-100 bps shift in rates	0.9	0.6
+200 bps shift in rates	(1.9)	(1.3)
-200 bps shift in rates	1.5	1.3
Steeper yield curve:		
+100 bps shift in long-term rates	—	—
-100 bps shift in short-term rates	0.9	0.6
Flatter yield curve:		
+100 bps shift in short-term rates	(1.0)	(0.6)
-100 bps shift in long-term rates	—	—
Non-U.S. dollar:		
Parallel shift:		
+100 bps shift in rates	—	0.6
-100 bps shift in rates	—	(0.6)

Economic Value Sensitivity

In addition to earnings-at-risk, which is measured as a sensitivity to a baseline of earnings over the next 12 months, the Firm also measures Economic Value Sensitivity ("EVS"). EVS stress tests the longer-term economic value of equity by measuring the sensitivity of the Firm's current balance sheet, primarily retained loans, deposits, debt and investment securities as well as related hedges, under various interest rate scenarios. The Firm's pricing and cash flow assumptions associated with deposits, as well as prepayment assumptions for loans and securities, are significant factors in the EVS measure. In accordance with the CTC interest rate risk management policy, the Firm has established limits on EVS as a percentage of TCE.

Certain assumptions used in the EVS measure may differ from those required in the fair value measurement note to the Consolidated Financial Statements. For example, certain assets and liabilities with no stated maturity, such as credit card receivables and deposits, have longer assumed durations in the EVS measure. Additional information on long-term debt and held to maturity investment securities is disclosed on page 201 in Note 2.

Non-U.S. dollar foreign exchange risk

Non-U.S. dollar FX risk is the risk that changes in foreign exchange rates affect the value of the Firm's assets or liabilities or future results. The Firm has structural non-U.S. dollar FX exposures arising from capital investments, forecasted expense and revenue, the investment securities portfolio and non-U.S. dollar-denominated debt issuance. Treasury and CIO, working in partnership with the LOBs, primarily manage these risks on behalf of the Firm. Treasury and CIO may hedge certain of these risks using derivatives. Refer to Business Segment & Corporate Results on page 71 for additional information.

Other sensitivity-based measures

The Firm quantifies the market risk of certain debt and equity and credit and funding-related exposures by assessing the potential impact on net revenue, other comprehensive income ("OCI") and noninterest expense due to changes in relevant market variables. Refer to the predominant business activities that give rise to market risk on page 142 for additional information on the positions captured in other sensitivity-based measures.

The table below represents the potential impact to net revenue, OCI or noninterest expense for market risk sensitive instruments that are not included in VaR or earnings-at-risk. Where appropriate, instruments used for hedging purposes are reported net of the positions being hedged. The sensitivities disclosed in the table below may not be representative of the actual gain or loss that would have been realized at December 31, 2024 and 2023, as the movement in market parameters across maturities may vary and are not intended to imply management's expectation of future changes in these sensitivities.

Gain/(loss) (in millions) Activity	Description	Sensitivity measure	December 31, 2024	December 31, 2023
Debt and equity[(a)]				
Asset Management activities	Consists of seed capital and related hedges; fund co-investments[(c)]; and certain deferred compensation and related hedges[(d)]	10% decline in market value	**$ (53)**	$ (61)
Other debt and equity	Consists of certain real estate-related fair value option elected loans, privately held equity and other investments held at fair value[(c)]	10% decline in market value	**(1,030)**	(1,044)
Credit- and funding-related exposures				
Non-USD LTD cross-currency basis	Represents the basis risk on derivatives used to hedge the foreign exchange risk on the non-USD LTD[(e)]	1 basis point parallel tightening of cross currency basis	**(10)**	(12)
Non-USD LTD hedges foreign currency ("FX") exposure	Primarily represents the foreign exchange revaluation on the fair value of the derivative hedges[(e)]	10% depreciation of currency	**28**	16
Derivatives – funding spread risk	Impact of changes in the spread related to derivatives FVA[(c)]	1 basis point parallel increase in spread	**(2)**	(3)
CVA - counterparty credit risk[(b)]	Credit risk component of CVA and associated hedges	10% credit spread widening	**—**	—
Fair value option elected liabilities - funding spread risk	Impact of changes in the spread related to fair value option elected liabilities DVA[(e)]	1 basis point parallel increase in spread	**47**	46

(a) Excludes equity securities without readily determinable fair values that are measured under the measurement alternative. Refer to Note 2 for additional information.
(b) In line with the Firm's internal model governance, the credit risk component of CVA related to certain counterparties was removed from Credit Portfolio VaR due to the widening of the credit spreads for those counterparties to elevated levels. The related hedges were also removed to maintain consistency. This exposure is now reflected in the table above.
(c) Impact recognized through net revenue.
(d) Impact recognized through noninterest expense.
(e) Impact recognized through OCI.

COUNTRY RISK MANAGEMENT

The Firm, through its LOBs and Corporate, may be exposed to country risk resulting from financial, economic, political or other significant developments which adversely affect the value of the Firm's exposures related to a particular country or set of countries. The Country Risk Management group actively monitors the various portfolios which may be impacted by these developments and measures the extent to which the Firm's exposures are diversified given the Firm's strategy and risk tolerance relative to a country.

Organization and management

Country Risk Management is an independent risk management function that assesses and monitors exposure to country risk across the Firm.

The Firm's country risk management function includes the following activities:

- Maintaining policies, procedures and standards consistent with a comprehensive country risk framework
- Assigning sovereign ratings, assessing country risks and establishing risk tolerance relative to a country
- Measuring and monitoring country risk exposure and stress across the Firm
- Managing and approving country limits and reporting trends and limit breaches to senior management
- Developing surveillance tools, such as signaling models and ratings indicators, for early identification of potential country risk concerns
- Providing country risk scenario analysis

Sources and measurement

The Firm is exposed to country risk through its lending and deposits, investing, and market-making activities, whether cross-border or locally funded. Country exposure includes activity with both government and private-sector entities in a country.

Under the Firm's internal country risk management approach, attribution of exposure to an individual country is based on the country where the largest proportion of the assets of the counterparty, issuer, obligor or guarantor are located or where the largest proportion of its revenue is derived, which may be different than the domicile (i.e. legal residence) or country of incorporation.

Individual country exposures reflect an aggregation of the Firm's risk to an immediate default, with zero recovery, of the counterparties, issuers, obligors or guarantors attributed to that country. Activities which result in contingent or indirect exposure to a country are not included in the country exposure measure (for example, providing clearing services or secondary exposure to collateral on securities financing receivables).

Assumptions are sometimes required in determining the measurement and allocation of country exposure, particularly in the case of certain non-linear or index products, or where the nature of the counterparty, issuer, obligor or guarantor is not suitable for attribution to an individual country. The use of different measurement approaches or assumptions could affect the amount of reported country exposure.

Under the Firm's internal country risk measurement framework:

- Deposits with banks are measured as the cash balances placed with central banks, commercial banks, and other financial institutions
- Lending exposures are measured at the total committed amount (funded and unfunded), net of the allowance for credit losses and eligible cash and marketable securities collateral received
- Securities financing exposures are measured at their receivable balance, net of eligible collateral received
- Debt and equity securities are measured at the fair value of all positions, including both long and short positions
- Counterparty exposure on derivative receivables is measured at the derivative's fair value, net of the fair value of the eligible collateral received
- Credit derivatives exposure is measured at the net notional amount of protection purchased or sold for the same underlying reference entity, inclusive of the fair value of the derivative receivable or payable, reflecting the manner in which the Firm manages these exposures

The Firm's internal country risk reporting differs from the reporting provided under the FFIEC bank regulatory requirements.

Stress testing

Stress testing is an important component of the Firm's country risk management framework, which aims to estimate and limit losses arising from a country crisis by measuring the impact of adverse asset price movements to a country based on market shocks combined with counterparty specific assumptions. Country Risk Management periodically designs and runs tailored stress scenarios to test vulnerabilities to individual countries or sets of countries in response to specific or potential market events, sector performance concerns, sovereign actions and geopolitical risks. These tailored stress results are used to inform potential risk reduction across the Firm, as necessary.

Risk reporting

Country exposure and stress are measured and reported regularly, and used by Country Risk Management to identify trends and monitor high usages and breaches against limits.

For country risk management purposes, the Firm may report exposure to jurisdictions that are not fully autonomous, including dependent territories and Special Administrative Regions ("SAR") such as Hong Kong SAR, separately from the independent sovereign states with which they are associated.

The following table presents the Firm's top 20 exposures by country (excluding the U.S.) as of December 31, 2024, and their comparative exposures as of December 31, 2023. The top 20 country exposures represent the Firm's largest total exposures by individual country. Country exposures may fluctuate from period to period due to a variety of factors, including client activity, market flows and liquidity management activities undertaken by the Firm.

The increase in exposure to Germany when compared to December 31, 2023, was driven by an increase in cash placed with the central bank of Germany, predominantly due to client-driven market-making activities and higher client deposits.

The increase in exposure to Japan when compared to December 31, 2023, was driven by an increase in cash placed with the central bank of Japan as a result of client-driven market-making activities.

The Firm continues to monitor its exposure to Russia, which corresponds to cash placed with the central bank, but which excludes deposits placed on behalf of clients at the Deposit Insurance Agency of Russia. The Firm currently believes that its remaining exposure to Russia is not material. Refer to Note 30 on pages 310–311 for information concerning Russian litigation.

Top 20 country exposures (excluding the U.S.)[a]

	2024					2023[f]
December 31, (in billions)	Deposits with banks[b]	Lending[c]	Trading and investing[d]	Other[e]	Total exposure	Total exposure
Germany	$ 89.7	$ 12.6	$ 0.9	$0.7	$ 103.9	$ 84.8
United Kingdom	24.6	22.4	27.7	1.4	76.1	77.1

Luxembourg	0.9	1.7	1.0	—	3.6	4.0

(a) Country exposures presented in the table reflect 89% and 88% of total Firmwide non-U.S. exposure, where exposure is attributed to an individual country based on the Firm's internal country risk management approach, at December 31, 2024 and 2023, respectively.
(b) Predominantly represents cash placed with central banks.
(c) Includes loans and accrued interest receivable, lending-related commitments (net of eligible collateral and the allowance for credit losses). Excludes intra-day and operating exposures, such as those from settlement and clearing activities.
(d) Includes market-making positions and hedging, investment securities, and counterparty exposure on derivative and securities financings net of eligible collateral. Market-making positions and hedging includes exposure from single reference entity ("single-name"), index and other multiple reference entity transactions for which one or more of the underlying reference entities is in a country listed in the above table.
(e) Includes physical commodities inventory and clearing house guarantee funds.
(f) The country rankings presented in the table as of December 31, 2023, are based on the country rankings of the corresponding exposures at December 31, 2024, not actual rankings of such exposures at December 31, 2023.

CLIMATE RISK MANAGEMENT

Climate risk refers to the potential threats posed by climate change to the Firm and its clients, customers, operations and business strategy. Climate change is viewed as a driver of risk that may impact existing types of risks managed by the Firm. Climate risk is categorized into physical risk and transition risk.

Physical risk involves economic costs and financial losses due to a changing climate. Acute physical risk drivers include the increased frequency or severity of climate and weather events, such as floods, wildfires and tropical cyclones. Chronic physical risk drivers include more gradual shifts in the climate, such as sea level rise, persistent changes in precipitation levels and increases in average ambient temperatures.

Transition risk involves the financial and economic consequences of society's shift toward a lower-carbon economy. Transition risk drivers include possible changes in public policy, adoption of new technologies and shifts in consumer preferences. Transition risks may also be influenced by changes in the physical climate.

Organization and management

The Firm has a Climate Risk Management function that is responsible for establishing and maintaining the Firmwide framework and strategy for managing climate risks that may impact the Firm.

Other responsibilities of Climate Risk Management include:

- Setting policies, standards, procedures and processes to support identification, escalation, monitoring and management of climate risk across the Firm
- Developing metrics, scenarios and stress testing mechanisms designed to assess the range of potential climate-related financial and economic impacts to the Firm
- Establishing a Firmwide climate risk data strategy and the supporting climate risk technology infrastructure

The LOBs and Corporate are responsible for the identification, assessment and management of climate risks present in their business activities and for the adherence to applicable climate-related laws, rules and regulations.

Governance and oversight

The Firm's framework and strategy for managing climate risk is integrated into the Firm's risk governance structure. This framework allows for the escalation of significant climate risk-related issues to LOB Risk Committees. The Board Risk Committee also receives information on significant climate risks and climate-related initiatives, as appropriate.

Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems. Operational Risk includes compliance, conduct, legal, and estimations and model risk. Operational risk is inherent in the Firm's activities and can manifest itself in various ways, including fraudulent acts, business disruptions (including those caused by extraordinary events beyond the Firm's control), cyber attacks, inappropriate employee behavior, failure to comply with applicable laws, rules and regulations or failure of vendors or other third party providers to perform in accordance with their agreements. Operational Risk Management attempts to manage operational risk at appropriate levels in light of the Firm's financial position, the characteristics of its businesses, and the markets and regulatory environments in which it operates.

Operational Risk Management Framework

The Firm's Compliance, Conduct, and Operational Risk ("CCOR") Management Framework is designed to enable the Firm to govern, identify, measure, monitor and test, manage and report on the Firm's operational risk.

Operational Risk Governance

The LOBs and Corporate are responsible for the management of operational risk. The Control Management Organization, which consists of control managers within each LOB and Corporate, is responsible for the day-to-day execution of the CCOR Framework.

The Firm's Global Chief Compliance Officer ("CCO") and FRE for Operational Risk and Qualitative Risk Appetite is responsible for defining the CCOR Management Framework and establishing the minimum standards for its execution. The LOB and Corporate aligned CCOR Lead Officers report to the Global CCO and FRE for Operational Risk and Qualitative Risk Appetite and are independent of the respective businesses or functions they oversee. The CCOR Management Framework is included in the Risk Governance and Oversight Policy that is reviewed and approved by the Board Risk Committee periodically.

Operational Risk Identification

The Firm utilizes a structured risk and control self-assessment process that is executed by the LOBs and Corporate. As part of this process, the LOBs and Corporate evaluate the effectiveness of their respective control environment to assess circumstances in which controls have failed, and to determine where remediation efforts may be required. The Firm's Operational Risk and Compliance organization ("Operational Risk and Compliance") provides oversight of and challenge to these evaluations and may also perform independent assessments of significant operational risk events and areas of concentrated or emerging risk.

Operational Risk Measurement

Operational Risk and Compliance performs an independent assessment of the operational risks inherent within the LOBs and Corporate, which includes evaluating the effectiveness of the control environments and reporting the results to senior management.

In addition, Operational Risk and Compliance assesses operational risks through quantitative means, including operational risk-based capital and estimation of operational risk losses under both baseline and stressed conditions.

The primary component of the operational risk-based capital estimate is the Loss Distribution Approach ("LDA") statistical model, which simulates the projected frequency and severity of operational risk losses based on historical data. The LDA model is used to estimate an aggregate operational risk loss over a one-year time horizon, at a 99.9% confidence level. The LDA model incorporates actual internal operational risk losses in the quarter following the period in which those losses were realized, and the calculation generally continues to reflect such losses even after the issues or business activities giving rise to the losses have been remediated or reduced.

As required under the Basel III capital framework, the Firm's operational risk capital methodology, which uses the Advanced Measurement Approach ("AMA"), incorporates internal and external losses as well as management's view of tail risk captured through operational risk scenario analysis, and evaluation of key business environment and internal control metrics. The Firm does not reflect the impact of insurance in its AMA estimate of operational risk capital.

The Firm considers the impact of stressed economic conditions on operational risk losses and develops a forward looking view of material operational risk events that may occur in a stressed environment. The Firm's operational risk stress testing framework is utilized in calculating results for the Firm's CCAR and other stress testing processes.

Refer to Capital Risk Management on pages 97–107 for information related to operational risk RWA, and CCAR.

Operational Risk Monitoring and Testing

The results of risk assessments performed by Operational Risk and Compliance are used in connection with their independent monitoring and testing compliance of the LOBs and Corporate with laws, rules and regulations. Through monitoring and testing, Operational Risk and Compliance independently identify areas of heightened operational risk and tests the effectiveness of controls within the LOBs and Corporate.

Management of Operational Risk
The operational risk areas or issues identified through monitoring and testing are escalated to the LOBs and Corporate to be remediated through action plans, as needed, to mitigate operational risk. Operational Risk and Compliance may advise the LOBs and Corporate in the development and implementation of action plans.

Operational Risk Reporting
All employees of the Firm are expected to escalate risks appropriately. Risks identified by Operational Risk and Compliance are escalated to the appropriate LOB and Corporate Control Committees, as needed. Operational Risk and Compliance has established standards designed to ensure that consistent operational risk reporting and operational risk reports are produced on a Firmwide basis as well as by the LOBs and Corporate. Reporting includes the evaluation of key risk and performance indicators against established thresholds as well as the assessment of different types of operational risk against stated risk appetite. The standards establish escalation protocols to senior management and to the Board of Directors.

Insurance
One of the ways in which operational risk may be mitigated is through insurance maintained by the Firm. The Firm purchases insurance from commercial insurers and maintains a wholly-owned captive insurer, Park Assurance Company. Insurance may also be required by third parties with whom the Firm does business.

Subcategories and examples of operational risks
Operational risk can manifest itself in various ways. Operational risk subcategories include Compliance risk, Conduct risk, Legal risk, and Estimations and Model risk. Refer to pages 157, 158, 159 and 160, respectively for more information on Compliance, Conduct, Legal, and Estimations and Model risk. Details on other select examples of operational risks such as business and technology resiliency, payment fraud and third-party outsourcing, as well as cybersecurity, are provided below.

Firmwide resiliency risk
Disruptions of the Firm's business and operations can occur due to forces beyond the Firm's control such as the spread of infectious diseases or pandemics, severe weather, natural disasters, the effects of climate change, power or telecommunications loss, failure of a third party to provide expected services, cyberattacks, civil or political unrest or terrorism. The Firm's resiliency framework is intended to enable the Firm to prepare for and adapt to changing conditions and withstand and recover from, and address adverse effects on its operations caused by, disruptions that may impact critical business functions and supporting assets, including its staff, technology, data and facilities, as well as those of third-party service providers. The framework includes governance, awareness training, planning and testing of recovery strategies, as well as strategic and tactical initiatives to identify, assess, and manage resiliency risks. The framework operates in accordance with the Firm's overall approach to Operational Risk Management, including alignment with technology, cybersecurity, data, physical security, crisis management, real estate and outsourcing programs.

Payment fraud risk
Payment fraud risk is the risk of external and internal parties unlawfully obtaining personal monetary benefit through misdirected or otherwise improper payment. The Firm employs various controls for managing payment fraud risk as well as providing employee and client education and awareness trainings.

Third-party outsourcing risk
The Firm's Third-Party Oversight ("TPO") and Inter-affiliates Oversight ("IAO") frameworks assist the LOBs and Corporate in selecting, documenting, onboarding, monitoring and managing their supplier relationships including services provided by affiliates. The objectives of the TPO framework are to hold suppliers and other third parties to an appropriate standard of operational performance and to mitigate key risks, including data loss and business disruptions. The Corporate Third-Party Oversight group is responsible for Firmwide training, monitoring, reporting and standards with respect to third-party outsourcing risks.

Cybersecurity risk
Cybersecurity risk is the risk of harm or loss resulting from misuse or abuse of technology or the unauthorized disclosure of data.

Overview

Cybersecurity risk is an important and continuously evolving focus for the Firm. Significant resources are devoted to protecting and enhancing the security of computer systems, software, networks, storage devices, and other technology. The Firm's security efforts are designed to protect against, among other things, cybersecurity attacks that can result in unauthorized access to confidential information, the destruction of data, disruptions to or degradations of service, the sabotaging of systems or other damage.

The Firm has experienced, and expects that it will continue to experience, a higher volume and complexity of cyber attacks against the backdrop of heightened geopolitical tensions. The Firm has implemented measures and controls reasonably designed to address this evolving environment, including enhanced threat monitoring. In addition, the Firm continues to review and enhance its capabilities to address associated risks, such as those relating to the management of administrative access to systems.

Third parties with which the Firm does business, that facilitate the Firm's business activities (e.g., vendors, supply chain, exchanges, clearing houses, central depositories, and financial intermediaries) or that the Firm has acquired are also sources of cybersecurity risk to the Firm. Third party incidents such as system breakdowns or failures, misconduct by the employees of such parties, or cyber attacks, including ransomware and supply-chain compromises, could have a material adverse effect on the Firm, including in circumstances in which an affected third party is unable to deliver a product or service to the Firm or where the incident delivers compromised software to the Firm or results in lost or compromised information of the Firm or its clients or customers.

Clients and customers are also sources of cybersecurity risk to the Firm and its information assets, particularly when their activities and systems are beyond the Firm's own security and control systems. The Firm engages in periodic discussions with its clients, customers and other external parties concerning cybersecurity risks including opportunities to improve cybersecurity.

Risks from cybersecurity threats, including any previous cybersecurity events, have not materially affected the Firm or its business strategy, results of operations or financial condition. Notwithstanding the comprehensive approach that the Firm takes to address cybersecurity risk, the Firm may not be successful in preventing or mitigating a future cybersecurity incident that could have a material adverse effect on the Firm or its business strategy, results of operations or financial condition.

Organization and management

The Global Chief Information Security Officer ("CISO") reports to the Global Chief Information Officer, and is a member of key cybersecurity governance forums. The CISO leads the Global Cybersecurity and Technology Controls organization, which is responsible for identifying technology and cybersecurity risks and for implementing and maintaining controls to manage cybersecurity threats. The CISO and the members of senior management within Global Technology and the Cybersecurity and Technology Controls organizations all have relevant expertise and experience in cybersecurity and information technology risk management, including relevant experience at the Firm, at other financial services companies or in other highly-regulated industries.

The CISO is responsible for the Firm's Information Security Program, which is designed to prevent, detect and respond to cyber attacks in order to help safeguard the confidentiality, integrity and availability of the Firm's infrastructure, resources and information. The program includes managing the Firm's global cybersecurity operations centers, providing training, conducting cybersecurity event simulation exercises, implementing the Firm's policies and standards relating to technology risk and cybersecurity management, and enhancing, as needed, the Firm's cybersecurity capabilities.

The Firm's Information Security Program includes the following functions:

Cyber Operations, which is responsible for implementing and maintaining controls designed to detect and defend the Firm against cyber attacks, and includes a dedicated function for incident response and ongoing monitoring for cybersecurity threats and vulnerabilities, including those among the Firm's third-party suppliers.

Technology Governance, Risk & Controls, which is responsible for operationalizing technology risk and control frameworks, analyzing regulatory developments that may impact the Firm, and developing control catalogs and assessments of controls, as well as overseeing governance and reporting of technology and cybersecurity risk.

Security Awareness, which provides awareness and training that reinforces information risk and security management practices and compliance with the Firm's policies, standards and practices. The training is mandatory for all employees globally on a periodic basis, and it is supplemented by Firmwide testing initiatives, including periodic phishing tests. The Firm also provides specialized security training to employees in specific roles, such as application developers. The Firm's Global Privacy Program requires all employees to take periodic training on data privacy that focuses on confidentiality and security, as well as responding to unauthorized access to or use of information.

Technology Resiliency, which establishes control requirements for planning and testing the prioritized recovery of technology services in the event of degradation or outage, including incident response planning, data backup and retention, and recovery readiness in support of the Firmwide Business Resiliency Program and operational risk management practices.

The Firm has a cybersecurity incident response plan designed to enable the Firm to respond to attempted cybersecurity incidents, coordinate as appropriate with law enforcement and other government agencies, notify clients and customers, as applicable, and recover from such incidents. In addition, the Firm actively partners with appropriate government and law enforcement agencies and peer industry forums, participating in discussions and simulations to assist in understanding the full spectrum of cybersecurity risks and in enhancing defenses and improving resiliency in the Firm's operating environment.

Governance and oversight

The governance structure for the Global Cybersecurity and Technology Controls organization is designed to appropriately identify, escalate and mitigate cybersecurity risks. Cybersecurity risk management and its governance and oversight are integrated into the Firm's operational risk management framework, including through the escalation of key risk and control issues to management and the development of risk mitigation plans for heightened risk and control issues. IRM independently assesses and challenges the activities and risk management practices of the Global Cybersecurity and Technology Controls organization related to the identification, assessment, measurement and mitigation of cybersecurity risk. As needed, the Firm engages third-party assessors or auditing firms with industry-recognized expertise on cybersecurity matters to review specific aspects of the Firm's cybersecurity risk management framework, processes and controls.

The governance and oversight for cybersecurity risk management includes governance forums that inform management of key areas of concern regarding the prevention, detection, mitigation and remediation of cybersecurity risks.

The Cybersecurity and Technology Controls Operating Committee ("CTOC") is the principal management committee that oversees the Firm's assessment and management of cybersecurity risk, including oversight of the implementation and maintenance of appropriate controls in support of the Firm's Information Security Program. The membership of the CTOC includes senior representatives from the Global Cybersecurity and Technology Controls organization and relevant corporate functions, including IRM and Internal Audit.

The CTOC escalates key operational risk and control issues, as appropriate, to the Global Technology Operating Committee ("GTOC") or its business control committee or to the appropriate LOB and Corporate Control Committees. The GTOC is responsible for the governance of the Firmwide Global Technology organization, including oversight of Firmwide technology strategies, the delivery of technology and technology operations, the effective use of information technology resources, and monitoring and resolving key operational risk and control matters arising in the Global Technology organization.

As part of its oversight of management's implementation and maintenance of the Firm's risk management framework, the Firm's Board of Directors receives periodic updates from the CIO, the CISO and senior members of the CTOC concerning cybersecurity matters. These updates generally include information regarding cybersecurity and technology developments, the Firm's Information Security Program and recommended changes to that program, cybersecurity policies and practices, and ongoing initiatives to improve information security, as well as any significant cybersecurity incidents and the Firm's efforts to address those incidents. The Audit Committee and the Risk Committee assist the Board in this oversight.

Compliance risk, a subcategory of operational risk, is the risk of failing to comply with laws, rules, regulations or codes of conduct and standards of self-regulatory organizations.

Overview

Each of the LOBs and Corporate hold primary ownership of and accountability for managing their compliance risk. The Firm's Operational Risk and Compliance Organization ("Operational Risk and Compliance"), which is independent of the LOBs and Corporate, provides independent review, monitoring and oversight of business operations with a focus on compliance with the laws, rules, and regulations applicable to the delivery of the Firm's products and services to clients and customers.

These compliance risks relate to a wide variety of laws, rules and regulations across the LOBs and Corporate, and jurisdictions, and include risks related to financial products and services, relationships and interactions with clients and customers, and employee activities. For example, compliance risks include those associated with anti-money laundering compliance, trading activities, market conduct, and complying with the laws, rules, and regulations related to the offering of products and services across jurisdictional borders. Compliance risk is also inherent in the Firm's fiduciary activities, including the failure to exercise the applicable standard of care to act in the best interest of fiduciary clients and customers or to treat fiduciary clients and customers fairly.

Other functions provide oversight of significant regulatory obligations that are specific to their respective areas of responsibility.

Operational Risk and Compliance implements policies and standards designed to govern, identify, measure, monitor and test, manage, and report on compliance risk.

Governance and oversight

Operational Risk and Compliance is led by the Firm's Global CCO and FRE for Operational Risk and Qualitative Risk Appetite.

The Firm maintains oversight and coordination of its compliance risk through the CCOR Management Framework. The Firm's Global CCO and FRE for Operational Risk and Qualitative Risk Appetite also provides regular updates to the Board Risk Committee and the Audit Committee on significant compliance risk issues, as appropriate.

Code of Conduct

The Firm has a Code of Conduct (the "Code") that sets forth the Firm's expectation that employees will conduct themselves with integrity, at all times. The Code provides the principles that help govern employee conduct with clients, customers, suppliers, vendors, shareholders, regulators, other employees, as well as with the markets and communities in which the Firm operates. The Code requires employees to promptly report any potential or actual violation of the Code, Firm policies, or laws, rules or regulations applicable to the Firm's business. It also requires employees to report any illegal or unethical conduct, or conduct that violates the underlying principles of the Code, by any of the Firm's employees, consultants, clients, customers, suppliers, contract or temporary workers, or business partners or agents. Training is assigned to newly hired employees after joining the Firm, and to current employees periodically thereafter. Employees are required to affirm their compliance with the Code annually.

Employees can report any potential or actual violations of the Code through the Firm's Conduct Hotline (the "Hotline") by phone, mobile device or the internet. The Hotline is anonymous, where permitted by law, is available at all times globally, has translation services, and is administered by an outside service provider. The Code prohibits retaliation against anyone who raises an issue or concern in good faith or assists with an inquiry or investigation. Periodically, the Audit Committee receives reports on the Code of Conduct program.

CONDUCT RISK MANAGEMENT

Conduct risk, a subcategory of operational risk, is the risk that any action or misconduct by an employee could lead to unfair client or customer outcomes, impact the integrity of the markets in which the Firm operates, harm employees or the Firm, or compromise the Firm's reputation.

Overview

Each LOB and Corporate is accountable for identifying and managing its conduct risk to provide appropriate engagement, ownership and sustainability of a culture consistent with the Firm's Business Principles. The Business Principles serve as a guide for how employees are expected to conduct themselves. With the Business Principles serving as a guide, the Firm's Code sets out the Firm's expectations for each employee and provides information and resources to help employees conduct business ethically and in compliance with applicable laws, rules and regulations everywhere the Firm operates. Refer to Compliance Risk Management on page 157 for further discussion of the Code.

Governance and oversight

The Firm's oversight and coordination of conduct risk is managed in the same manner as Compliance risk. Refer to Compliance Risk Management on page 157 for further information.

Conduct risk management encompasses various aspects of people management practices throughout the employee life cycle, including recruiting, onboarding, training and development, performance management, promotion and compensation processes. Each LOB, Treasury and CIO, and each designated corporate function completes an assessment of conduct risk periodically, reviews metrics and issues which may involve conduct risk, and provides conduct education as appropriate.

Legal risk, a subcategory of operational risk, is the risk of loss primarily caused by the actual or alleged failure to meet legal obligations that arise from the rule of law in jurisdictions in which the Firm operates, agreements with clients and customers, and products and services offered by the Firm.

Overview

The global Legal function ("Legal") provides legal services and advice to the Firm. Legal is responsible for managing the Firm's exposure to legal risk by:

- managing actual and potential litigation and enforcement matters, including internal reviews and investigations related to such matters
- advising on products and services, including contract negotiation and documentation
- advising on offering and marketing documents and new business initiatives
- managing dispute resolution
- interpreting existing laws, rules and regulations, and advising on changes to them
- advising on advocacy in connection with contemplated and proposed laws, rules and regulations, and
- providing legal advice to the LOBs, Corporate and the Board.

Legal selects, engages and manages outside counsel for the Firm on all matters in which outside counsel is engaged. In addition, Legal advises the Firm's Conflicts Office which reviews the Firm's wholesale transactions that may have the potential to create conflicts of interest for the Firm.

Governance and oversight

The Firm's General Counsel reports to the CEO and is a member of the Operating Committee, the Firmwide Risk Committee and the Firmwide Control Committee. The Firm's General Counsel and other members of Legal report on significant legal matters to the Firm's Board of Directors and to the Audit Committee.

Legal serves on and advises various committees and advises the Firm's LOBs and Corporate on potential reputation risk issues.

ESTIMATIONS AND MODEL RISK MANAGEMENT

Estimations and Model risk, a subcategory of operational risk, is the potential for adverse consequences from decisions based on incorrect or misused estimation outputs.

The Firm uses models and other analytical and judgment-based estimations, including those based upon machine learning or artificial intelligence techniques, across various businesses and functions. The estimation methods are of varying levels of sophistication and are used for many purposes, such as the valuation of positions and measurement of risk, assessing regulatory capital requirements, conducting stress testing, evaluating the allowance for credit losses and making business decisions. A dedicated independent function, Model Risk Governance and Review ("MRGR"), defines and governs the Firm's policies relating to the management of model risk and risks associated with certain analytical and judgment-based estimations, such as those used in risk management, budget forecasting and capital planning and analysis.

Model risks are owned by the users of the models within the LOBs and Corporate based on the specific purposes of such models. Users and developers of models are responsible for developing, implementing and testing their models, as well as referring models to MRGR for review and approval. Once models have been approved, model users and developers are responsible for maintaining a robust operating environment, and must monitor and evaluate the performance of the models on an ongoing basis. Model users and developers may seek to enhance models in response to changes in the relevant portfolios and in product and market developments, as well as to capture improvements in available modeling techniques and systems capabilities.

Models are tiered based on an internal standard according to their complexity, the exposure associated with the model and the Firm's reliance on the model. This tiering is subject to the approval of MRGR. In its review of a model, MRGR considers whether the model is suitable for the specific purposes for which it will be used. When reviewing a model, MRGR analyzes and challenges the model methodology and the reasonableness of model assumptions, and may perform or require additional testing, including back-testing of model outcomes. Model reviews are approved by the appropriate level of management within MRGR based on the relevant model tier.

Under the Firm's Estimations and Model Risk Management Policy, MRGR reviews and approves new models, as well as material changes to existing models, prior to their use. In certain circumstances, exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity.

While models are inherently imprecise, the degree of imprecision or uncertainty can be heightened by the market or economic environment. This is particularly true when the current and forecasted environments are significantly different from the historical environments upon which the models were developed. This increased uncertainty may necessitate a greater degree of judgment and analytics to inform any adjustments that the Firm may make to model outputs than would otherwise be the case. In addition, the Firm may experience increased uncertainty in its estimates if assets acquired differ from those used to develop the models.

Refer to Critical Accounting Estimates Used by the Firm on pages 161–164 and Note 2 for a summary of model-based valuations and other valuation techniques.

JPMorganChase's accounting policies and use of estimates are integral to understanding its reported results. The Firm's most complex accounting estimates require management's judgment to ascertain the appropriate carrying value of assets and liabilities. The Firm has established policies and control procedures intended to ensure that estimation methods, including any judgments made as part of such methods, are well-controlled, independently reviewed and applied consistently from period to period. The methods used and judgments made reflect, among other factors, the nature of the assets or liabilities and the related business and risk management strategies, which may vary across the Firm's businesses and portfolios. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The Firm believes its estimates for determining the carrying value of its assets and liabilities are appropriate. The following is a brief description of the Firm's critical accounting estimates involving significant judgments.

Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses generally comprises:

- The allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated),
- The allowance for lending-related commitments, and
- The allowance for credit losses on investment securities.

The allowance for credit losses involves significant judgment on a number of matters including development and weighting of macroeconomic forecasts, incorporation of historical loss experience, assessment of risk characteristics, assignment of risk ratings, valuation of collateral, and the determination of remaining expected life. Refer to Note 10 and Note 13 for further information on these judgments as well as the Firm's policies and methodologies used to determine the Firm's allowance for credit losses.

One of the most significant judgments involved in estimating the Firm's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the eight-quarter forecast period within the Firm's methodology. The eight-quarter forecast incorporates hundreds of macroeconomic variables ("MEVs") that are relevant for exposures across the Firm, with modeled credit losses being driven primarily by a subset of less than twenty variables. The specific variables that have the greatest effect on the modeled losses vary by portfolio and geography.

- Key MEVs for the consumer portfolio include regional U.S. unemployment rates and U.S. HPI.
- Key MEVs for the wholesale portfolio include U.S. unemployment, U.S. real GDP, U.S. equity prices, U.S. interest rates, U.S. corporate credit spreads, oil prices, U.S. commercial real estate prices and U.S. HPI.

Changes in the Firm's assumptions and forecasts of economic conditions could significantly affect its estimate of expected credit losses in the portfolio at the balance sheet date or lead to significant changes in the estimate from one reporting period to the next.

As a result of the First Republic acquisition, the Firm recorded an allowance for credit losses for the loans acquired and lending-related commitments assumed as of May 1, 2023. Due to differences in risk rating methodologies for the First Republic portfolio and the ongoing integration of products and systems, the allowance for credit losses for the acquired wholesale portfolio was initially measured based on similar risk characteristics from other facilities underwritten by the Firm. Starting in the second quarter of 2024, the acquired portfolio was incorporated into the Firm's modeled credit loss estimates and is now reflected in the wholesale sensitivity analysis below. Refer to Note 34 for additional information on the First Republic acquisition.

It is difficult to estimate how potential changes in any one factor or input might affect the overall allowance for credit losses because management considers a wide variety of factors and inputs in estimating the allowance for credit losses. Changes in the factors and inputs considered may not occur at the same rate and may not be consistent across all geographies or product types, and changes in factors and inputs may be directionally inconsistent, such that improvement in one factor or input may offset deterioration in others.

To consider the impact of a hypothetical alternate macroeconomic forecast, the Firm compared the modeled credit losses determined using its central and relative adverse macroeconomic scenarios, which are two of the five scenarios considered in estimating the allowances for loan losses and lending-related commitments. The central and relative adverse scenarios each included a full suite of MEVs, but differed in the levels, paths and peaks/troughs of those variables over the eight-quarter forecast period.

For example, compared to the Firm's central scenario shown on page 137 and in Note 13, the Firm's relative adverse scenario assumes an elevated U.S.

unemployment rate, averaging approximately 2.1% higher over the eight-quarter forecast, with a peak difference of approximately 3.0% in the fourth quarter of 2025.

This analysis is not intended to estimate expected future changes in the allowance for credit losses, for a number of reasons, including:

- The allowance as of December 31, 2024, reflects credit losses beyond those estimated under the central scenario due to the weight placed on the adverse scenarios.
- The impacts of changes in many MEVs are both interrelated and nonlinear, so the results of this analysis cannot be simply extrapolated for more severe changes in macroeconomic variables.
- Expectations of future changes in portfolio composition and borrower behavior can significantly affect the allowance for credit losses.

To demonstrate the sensitivity of credit loss estimates to macroeconomic forecasts as of December 31, 2024, the Firm compared the modeled estimates under its relative adverse scenario to its central scenario. Without considering offsetting or correlated effects in other qualitative components of the Firm's allowance for credit losses, the comparison between these two scenarios for the exposures below reflect the following differences:

- An increase of approximately $850 million for residential real estate loans and lending-related commitments
- An increase of approximately $3.7 billion for credit card loans
- An increase of approximately $4.1 billion for wholesale loans and lending-related commitments

This analysis relates only to the modeled credit loss estimates and is not intended to estimate changes in the overall allowance for credit losses as it does not reflect any potential changes in other adjustments to the quantitative calculation, which would also be influenced by the judgment management applies to the modeled lifetime loss estimates to reflect the uncertainty and imprecision of these modeled lifetime loss estimates based on then-current circumstances and conditions.

Recognizing that forecasts of macroeconomic conditions are inherently uncertain, the Firm believes that its process to consider the available information and associated risks and uncertainties is appropriately governed and that its estimates of expected credit losses were reasonable and appropriate for the period ended December 31, 2024.

Fair value

JPMorganChase carries a portion of its assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis, including derivatives, structured note products and certain securities financing agreements. Certain assets and liabilities are measured at fair value on a nonrecurring basis, including certain mortgage, home equity and other loans, where the carrying value is based on the fair value of the underlying collateral.

Assets measured at fair value

The following table includes the Firm's assets measured at fair value and the portion of such assets that are classified within level 3 of the fair value hierarchy. Refer to Note 2 for further information.

December 31, 2024 (in millions, except ratios)	Total assets at fair value	Total level 3 assets
Federal funds sold and securities purchased under resale agreements	$ 286,771	$ —
Securities borrowed	83,962	—
Trading assets:		
Trading-debt and equity instruments	576,817	2,442
Derivative receivables[(a)]	60,967	8,452
Total trading assets	637,784	10,894
AFS securities	406,852	8
Loans	41,350	2,416
MSRs	9,121	9,121
Other	14,073	1,344
Total assets measured at fair value on a recurring basis	1,479,913	23,783
Total assets measured at fair value on a nonrecurring basis	2,489	1,742
Total assets measured at fair value	$ 1,482,402	$ 25,525
Total Firm assets	$ 4,002,814	
Level 3 assets at fair value as a percentage of total Firm assets[(a)]		1%
Level 3 assets at fair value as a percentage of total Firm assets at fair value[(a)]		2%

(a) For purposes of the table above, the derivative receivables total reflects the impact of netting adjustments; however, the $8.5 billion of derivative receivables classified as level 3 does not reflect the netting adjustment as such netting is not relevant to a presentation based on the transparency of inputs to the valuation of an asset. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

Valuation
Details of the Firm's processes for determining fair value are set out in Note 2. Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2.

In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, the lack of observability of certain significant inputs requires management to assess relevant empirical data in deriving valuation inputs including, for example, transaction details, yield curves, interest rates, prepayment speeds, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves. Refer to Note 2 for a further discussion of the valuation of level 3 instruments, including unobservable inputs used.

For instruments classified in levels 2 and 3, management judgment must be applied to assess the appropriate level of valuation adjustments to reflect counterparty credit quality, the Firm's creditworthiness, market funding rates, liquidity considerations, unobservable parameters, and for portfolios that meet specified criteria, the size of the net open risk position. The judgments made are typically affected by the type of product and its specific contractual terms, and the level of liquidity for the product or within the market as a whole. In periods of heightened market volatility and uncertainty judgments are further affected by the wider variation of reasonable valuation estimates, particularly for positions that are less liquid. Refer to Note 2 for a further discussion of valuation adjustments applied by the Firm.

Imprecision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios.

The Firm uses various methodologies and assumptions in the determination of fair value. The use of methodologies or assumptions different than those used by the Firm could result in a different estimate of fair value at the reporting date. Refer to Note 2 for a detailed discussion of the Firm's valuation process and hierarchy, and its determination of fair value for individual financial instruments.

Goodwill impairment

Under U.S. GAAP, goodwill must be allocated to reporting units and tested for impairment at least annually. The Firm's process and methodology used to conduct goodwill impairment testing is described in Note 15.

Management applies significant judgment when testing goodwill for impairment. The goodwill associated with each business combination is allocated to the related reporting units for goodwill impairment testing.

For the year ended December 31, 2024, the Firm reviewed current economic conditions, estimated market cost of equity, as well as actual business results and projections of business performance. Based on such reviews, the Firm has concluded that goodwill was not impaired as of December 31, 2024. For each of the reporting units, fair value exceeded carrying value by at least 10% and there was no indication of a significant risk of goodwill impairment based on current projections and valuations.

The projections for the Firm's reporting units are consistent with management's current business outlook assumptions in the short term, and the Firm's best estimates of long-term growth and return on equity in the longer term. Where possible, the Firm uses third-party and peer data to benchmark its assumptions and estimates.

Refer to Note 15 for additional information on goodwill, including the goodwill impairment assessment as of December 31, 2024.

Credit card rewards liability

JPMorganChase offers credit cards with various rewards programs which allow cardholders to earn rewards points based on their account activity and the terms and conditions of the rewards program. Generally, there are no limits on the points that an eligible cardholder can earn, nor do the points expire, and the points can be redeemed for a variety of rewards, including cash (predominantly in the form of account credits), gift cards and travel. The Firm maintains a rewards liability which represents the estimated cost of rewards points earned and expected to be redeemed by cardholders. The liability is accrued as the cardholder earns the benefit and is reduced when the cardholder redeems points. This liability was $14.4 billion and $13.2 billion at December 31, 2024 and 2023, respectively, and is recorded in accounts payable and other liabilities on the Consolidated balance sheets. The increase in the liability was driven by continued growth in rewards points earned on higher spend and promotional offers outpacing redemptions throughout 2024.

The rewards liability is sensitive to redemption rate ("RR") and cost per point ("CPP") assumptions. The RR assumption is used to estimate the number of points earned by customers that will be redeemed over the life of the account. The CPP assumption is used to estimate the cost of future point redemptions. These assumptions are evaluated periodically considering historical actuals, cardholder redemption behavior and management judgment. Updates to these assumptions will impact the rewards liability. As of December 31, 2024, a combined increase of 25 basis points in RR and 1 basis point in CPP would increase the rewards liability by approximately $442 million.

Income taxes

JPMorganChase is subject to the income tax laws of the various jurisdictions in which it operates, including U.S. federal, state and local, and non-U.S. jurisdictions. These laws are often complex and may be subject to different interpretations. To determine the financial statement impact of accounting for income taxes, including the provision for income tax expense and unrecognized tax benefits, JPMorganChase must make assumptions and judgments about how to interpret and apply these complex tax laws to numerous transactions and business events, as well as make judgments regarding the timing of when certain items may affect taxable income in the U.S. and non-U.S. tax jurisdictions.

JPMorganChase's interpretations of tax laws around the world are subject to review and examination by the various taxing authorities in the jurisdictions where the Firm operates, and disputes may occur regarding its view on a tax position. These disputes over interpretations with the various taxing authorities may be settled by audit, administrative appeals or adjudication in the court systems of the tax jurisdictions in which the Firm operates. JPMorganChase regularly reviews whether it may be assessed additional income taxes as a result of the resolution of these matters, and the Firm records additional unrecognized tax benefits, as appropriate. In addition, the Firm may revise its estimate of income taxes due to changes in income tax laws, legal interpretations, and business strategies. It is possible that revisions in the Firm's estimate of income taxes may materially affect the Firm's results of operations in any reporting period.

Deferred taxes arise from differences between assets and liabilities measured for financial reporting versus income tax return purposes. Deferred tax assets are recognized if, in management's judgment, their realizability is determined to be more likely than not. Deferred taxes are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized within the provision for income taxes in the period enacted.

The Firm has also recognized deferred tax assets in connection with certain tax attributes, including net operating loss ("NOL") carryforwards and foreign tax credit ("FTC") carryforwards. The Firm performs regular reviews to ascertain whether its deferred tax assets are realizable. These reviews include management's estimates and assumptions regarding future taxable income, including foreign source income, and may incorporate various tax planning strategies, including strategies that may be available to utilize NOLs and FTCs before they expire. In connection with these reviews, if it is determined that a deferred tax asset is not realizable, a valuation allowance is established. The valuation allowance may be reversed in a subsequent reporting period if the Firm determines that, based on revised estimates of future taxable income or changes in tax planning strategies, it is more likely than not that all or part of the deferred tax asset will become realizable. As of December 31, 2024, management has determined it is more likely than not that the Firm will realize its deferred tax assets, net of the existing valuation allowance.

The Firm adjusts its unrecognized tax benefits as necessary when new information becomes available, including changes in tax law and regulations, and interactions with taxing authorities. Uncertain tax positions that meet the more-likely-than-not recognition threshold are measured to determine the amount of benefit to recognize. An uncertain tax position is measured at the largest amount of benefit that management believes is more likely than not to be realized upon settlement. It is possible that the reassessment of JPMorganChase's unrecognized tax benefits may have a material impact on its effective income tax rate in the period in which the reassessment occurs. Although the Firm believes that its estimates are reasonable, the final tax amount could be different from the amounts reflected in the Firm's income tax provisions and accruals. To the extent that the final outcome of these amounts is different than the amounts recorded, such differences will generally impact the Firm's provision for income taxes in the period in which such a determination is made.

The Firm's provision for income taxes is composed of current and deferred taxes. The current and deferred tax provisions are calculated based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed during the subsequent year. Adjustments based on filed returns are generally recorded in the period when the tax returns are filed and the global tax implications are known, which could impact the Firm's effective tax rate.

Refer to Note 25 for additional information on income taxes.

Litigation reserves

Refer to Note 30 for a description of the significant estimates and judgments associated with establishing litigation reserves.

Financial Accounting Standards Board ("FASB") Standards Adopted since January 1, 2024

Standard	Summary of guidance	Effects on financial statements
Fair Value Measurement: Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions *Issued June 2022*	• Clarifies that a contractual sale restriction is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. • Requires disclosure for investments in equity securities subject to contractual sale restrictions, including: 1) fair value of these investments, 2) nature and remaining duration of the restriction(s) and 3) circumstances that could cause a lapse in the restriction(s).	• Adopted prospectively on January 1, 2024, with no impact to the Firm's Consolidated Financial Statements.
Investments - Equity Method and Joint Ventures: Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method *Issued March 2023*	• Expands the ability to elect proportional amortization on a program-by-program basis, for additional types of tax-oriented investments (beyond affordable housing tax credit investments). • May be adopted using a full retrospective method, or a modified retrospective method wherein the effect of adoption is reflected as an adjustment to retained earnings at the effective date.	• Adopted under the modified retrospective method on January 1, 2024. • Refer to Note 1 for further information.
Segment Reporting: Improvements to Reportable Segment Disclosures *Issued November 2023*	• Requires disclosure of significant segment expenses that are readily provided to the chief operating decision maker ("CODM") and included in segment profit or loss. • Requires disclosure of the composition and aggregate amount of other segment items, which represent the difference between profit or loss and segment revenues less significant segment expenses. • Requires disclosure of the title and position of the CODM and an explanation of how the CODM uses the reported segment measures in assessing segment performance and deciding how to allocate resources.	• Adopted retrospectively for the Firm's annual Consolidated Financial Statements for the year ended December 31, 2024.[a] • The adoption of this guidance resulted in additional reportable segment disclosures, primarily relating to significant segment expenses and the CODM. Refer to Note 32 for further information.

(a) The accounting standards update applies to the Firm's annual Consolidated Financial Statements for the year ended December 31, 2024, and interim financial statements thereafter.

FASB Standards Issued but not yet Adopted as of December 31, 2024

Standard	Summary of guidance	Effects on financial statements
Income Taxes: Improvements to Income Tax Disclosures *Issued December 2023*	• Requires disclosure of income taxes paid disaggregated by 1) federal, state, and foreign taxes and 2) individual jurisdiction on the basis of a quantitative threshold of equal to or greater than 5 percent of total income taxes paid (net of refunds received). • Requires disclosure of the effective tax rate reconciliation by specific categories, at a minimum, with accompanying qualitative disclosures, and separate disclosure of reconciling items based on quantitative thresholds. • Requires categories within the effective tax rate reconciliation to be further disaggregated if quantitative thresholds are met.	• Required effective date: Annual financial statements for the year ending December 31, 2025. • The guidance can be applied on a prospective basis with the option to apply the standard retrospectively. • The Firm is evaluating the potential impact on the Consolidated Financial Statements disclosures.
Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures: Disaggregation of Income Statement Expenses *Issued November 2024*	• Requires additional annual and interim disclosures about specific types of expenses presented in the Consolidated statements of income.	• Required effective date: Annual financial statements for the year ending December 31, 2027, and interim financial statements for the year ending December 31, 2028. (a) • The guidance can be applied on a prospective basis with the option to apply the standard retrospectively. • The Firm is evaluating the potential impact on the Consolidated Financial Statements disclosures, as well as the Firm's planned date of adoption.

(a) Early adoption is permitted.

FORWARD-LOOKING STATEMENTS

From time to time, the Firm has made and will make forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipate,” “target,” “expect,” “estimate,” “intend,” “plan,” “goal,” “believe,” or other words of similar meaning. Forward-looking statements provide JPMorganChase’s current expectations or forecasts of future events, circumstances, results or aspirations. JPMorganChase’s disclosures in this 2024 Form 10-K contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Firm also may make forward-looking statements in its other documents filed or furnished with the SEC. In addition, the Firm’s senior management may make forward-looking statements orally to investors, analysts, representatives of the media and others.

All forward-looking statements are, by their nature, subject to risks and uncertainties, many of which are beyond the Firm’s control. JPMorganChase’s actual future results may differ materially from those set forth in its forward-looking statements. While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ from those in the forward-looking statements:

- Local, regional and global business, economic and political conditions and geopolitical events, including geopolitical tensions and hostilities;
- Changes in laws, rules and regulatory requirements, including capital and liquidity requirements affecting the Firm’s businesses, and the ability of the Firm to address those requirements;
- Heightened regulatory and governmental oversight and scrutiny of JPMorganChase’s business practices, including dealings with retail customers;
- Changes in trade, monetary and fiscal policies and laws;
- Changes in the level of inflation;
- Changes in income tax laws, rules, and regulations;
- Changes in FDIC assessments;
- Securities and capital markets behavior, including changes in market liquidity and volatility;
- Changes in investor sentiment or consumer spending or savings behavior;
- Ability of the Firm to manage effectively its capital and liquidity;
- Changes in credit ratings assigned to the Firm or its subsidiaries;
- Damage to the Firm’s reputation;
- Ability of the Firm to appropriately address social, environmental and sustainability concerns that may arise, including from its business activities;
- Ability of the Firm to deal effectively with an economic slowdown or other economic or market disruption, including, but not limited to, in the interest rate environment;
- Technology changes instituted by the Firm, its counterparties or competitors;
- The effectiveness of the Firm’s control agenda;
- Ability of the Firm to develop or discontinue products and services, and the extent to which products or services previously sold by the Firm require the Firm to incur liabilities or absorb losses not contemplated at their initiation or origination;
- Acceptance of the Firm’s new and existing products and services by the marketplace and the ability of the Firm to innovate and to increase market share;
- Ability of the Firm to attract and retain qualified employees;
- Ability of the Firm to control expenses;
- Competitive pressures;
- Changes in the credit quality of the Firm’s clients, customers and counterparties;
- Adequacy of the Firm’s risk management framework, disclosure controls and procedures and internal control over financial reporting;
- Adverse judicial or regulatory proceedings;
- Ability of the Firm to determine accurate values of certain assets and liabilities;
- Occurrence of natural or man-made disasters or calamities, including health emergencies, the spread of infectious diseases, epidemics or pandemics, an outbreak or escalation of hostilities or other geopolitical instabilities, the effects of climate change or extraordinary events beyond the Firm’s control, and the Firm’s ability to deal effectively with disruptions caused by the foregoing;
- Ability of the Firm to maintain the security of its financial, accounting, technology, data processing and other operational systems and facilities;
- Ability of the Firm to withstand disruptions that may be caused by any failure of its operational systems or those of third parties;
- Ability of the Firm to effectively defend itself against cyber attacks and other attempts by unauthorized parties to access information of the Firm or its customers or to disrupt the Firm’s systems; and
- The other risks and uncertainties detailed in Part I, Item 1A: Risk Factors in JPMorganChase’s 2024 Form 10-K.

Any forward-looking statements made by or on behalf of the Firm speak only as of the date they are made, and JPMorganChase does not undertake to update any forward-looking statements. The reader should, however, consult any further disclosures of a forward-looking nature the Firm may make in any subsequent Annual Reports on Form 10-Ks, Quarterly Reports on Form 10-Qs, or Current Reports on Form 8-K.

Management's report on internal control over financial reporting

Management of JPMorgan Chase & Co. ("JPMorganChase" or the "Firm") is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the Firm's principal executive and principal financial officers, or persons performing similar functions, and effected by JPMorganChase's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

JPMorganChase's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records, that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Firm's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the Firm are being made only in accordance with authorizations of JPMorganChase's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Firm's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management has completed an assessment of the effectiveness of the Firm's internal control over financial reporting as of December 31, 2024. In making the assessment, management used the "Internal Control — Integrated Framework" ("COSO 2013") promulgated by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Based upon the assessment performed, management concluded that as of December 31, 2024, JPMorganChase's internal control over financial reporting was effective based upon the COSO 2013 framework. Additionally, based upon management's assessment, the Firm determined that there were no material weaknesses in its internal control over financial reporting as of December 31, 2024.

The effectiveness of the Firm's internal control over financial reporting as of December 31, 2024, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

James Dimon

pwc

To the Board of Directors and Shareholders of JPMorgan Chase & Co.:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of JPMorgan Chase & Co. and its subsidiaries (the "Firm") as of December 31, 2024 and 2023, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2024, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Firm's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Firm as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Firm maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Firm's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's report on internal control over financial reporting. Our responsibility is to express opinions on the Firm's consolidated financial statements and on the Firm's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Firm in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PricewaterhouseCoopers LLP • 300 Madison Avenue • New York, NY 10017

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Allowance for Loan Losses – Portfolio-based component of Wholesale Loan and Credit Card Loan Portfolios

As described in Note 13 to the consolidated financial statements, the allowance for loan losses for the portfolio-based component of the wholesale and credit card loan portfolios was $22.0 billion on total portfolio-based retained loans of $919.3 billion at December 31, 2024. The Firm's allowance for loan losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's loan portfolios and considers expected future changes in macroeconomic conditions. The portfolio-based component of the Firm's allowance for loan losses for the wholesale and credit card retained loan portfolios begins with a quantitative calculation of expected credit losses over the expected life of the loan by applying credit loss factors to the estimated exposure at default. The credit loss factors applied are determined based on the weighted average of five internally developed macroeconomic scenarios that take into consideration the Firm's economic outlook as derived through forecast macroeconomic variables, the most significant of which are U.S. unemployment and U.S. real gross domestic product. This quantitative calculation is further adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate.

The principal considerations for our determination that performing procedures relating to the allowance for loan losses for the portfolio-based component of the wholesale and credit card loan portfolios is a critical audit matter are (i) the significant judgment and estimation by management in the forecast of macroeconomic variables, specifically U.S. unemployment and U.S. real gross domestic product, as the Firm's forecasts of economic conditions significantly affect its estimate of expected credit losses at the balance sheet date, (ii) the significant judgment and estimation by management in determining the quantitative calculation utilized in their credit loss estimates and the adjustments to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate, which in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and in evaluating audit evidence obtained relating to the credit loss estimates and the appropriateness of the adjustments to the credit loss estimates, and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's allowance for loan losses, including controls over model validation and generation of macroeconomic scenarios. These procedures also included, among others, testing management's process for estimating the allowance for loan losses, which involved (i) evaluating the appropriateness of the models and methodologies used in quantitative calculations; (ii) evaluating the reasonableness of forecasts of U.S. unemployment and U.S. real gross domestic product; (iii) testing the completeness and accuracy of data used in the estimate; and (iv) evaluating the reasonableness of management's adjustments to the quantitative output for the impacts of model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate. These procedures also included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of certain models, methodologies and macroeconomic variables.

Fair Value of Certain Level 3 Financial Instruments

As described in Notes 2 and 3 to the consolidated financial statements, the Firm carries $1.5 trillion of its assets and $586.2 billion of its liabilities at fair value on a recurring basis. Included in these balances are $10.9 billion of trading assets and $51.8 billion of liabilities measured at fair value on a recurring basis, collectively financial instruments, which are classified as level 3 as they contain one or more inputs to valuation which are unobservable and significant to their fair value measurement. The Firm utilized internally developed valuation models and unobservable inputs to estimate fair value of the level 3 financial instruments. The unobservable inputs used by management to estimate the fair value of certain of these financial instruments include interest rate volatility, equity volatility, Bermudan switch value and correlation relating to interest rates, interest rate-to-foreign exchange, equity prices, equity-to-foreign exchange and equity-to-interest rate.

The principal considerations for our determination that performing procedures relating to the fair value of certain level 3 financial instruments is a critical audit matter are (i) the significant judgment and estimation by management in determining the inputs to estimate fair value, which in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and in evaluating audit evidence obtained related to the fair value of these financial instruments, and (ii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's determination of the fair value, including controls over models, inputs, and data. These procedures also included, among others, the involvement of professionals with specialized skill and knowledge to assist in developing an independent estimate of fair value for a sample of these financial instruments and comparing management's estimate to the independently developed estimate of fair value. Developing the independent estimate involved testing the completeness and accuracy of data provided by management, developing independent inputs and, as appropriate, evaluating and utilizing management's aforementioned unobservable inputs.

The Notes to Consolidated Financial Statements are an integral part of these statements.

Note 1 – Basis of presentation

JPMorgan Chase & Co. ("JPMorganChase" or the "Firm"), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the U.S., with operations worldwide. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Refer to Note 32 for further discussion of the Firm's reportable business segments.

The accounting and financial reporting policies of JPMorganChase and its subsidiaries conform to U.S. GAAP. Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by regulatory authorities.

Consolidation

The Consolidated Financial Statements include the accounts of JPMorganChase and other entities in which the Firm has a controlling financial interest. All material intercompany balances and transactions have been eliminated.

Assets held for clients in an agency or fiduciary capacity by the Firm are not assets of JPMorganChase and are not included on the Consolidated balance sheets.

The Firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity.

Voting interest entities

Voting interest entities are entities that have sufficient equity and provide the equity investors voting rights that enable them to make significant decisions relating to the entity's operations. For these types of entities, the Firm's determination of whether it has a controlling interest is primarily based on the amount of voting equity interests held. Entities in which the Firm has a controlling financial interest, through ownership of the majority of the entities' voting equity interests, or through other contractual rights that give the Firm control, are consolidated by the Firm.

Investments in companies in which the Firm has significant influence over operating and financing decisions (but does not own a majority of the voting equity interests) are accounted for (i) in accordance with the equity method of accounting, or (ii) at fair value if the fair value option was elected. These investments are generally included in other assets, with income or loss included in noninterest revenue.

Certain Firm-sponsored asset management funds are structured as limited partnerships or limited liability companies. For many of these entities, the Firm is the general partner or managing member, but the non-affiliated partners or members have the ability to remove the Firm as the general partner or managing member without cause (i.e., kick-out rights), based on a simple majority vote, or the non-affiliated partners or members have rights to participate in important decisions. Accordingly, the Firm does not consolidate these voting interest entities. However, in the limited cases where the non-managing partners or members do not have substantive kick-out or participating rights, the Firm evaluates the funds as VIEs and consolidates the funds if the Firm is the general partner or managing member and has both power and a potentially significant interest.

The Firm's investment companies and asset management funds have investments in both publicly-held and privately-held entities, including investments in buyouts, growth equity and venture opportunities. These investments are accounted for under investment company guidelines and, accordingly, irrespective of the percentage of equity ownership interests held, are carried on the Consolidated balance sheets at fair value, and are recorded in other assets, with income or loss included in noninterest revenue. If consolidated, the Firm retains the accounting under such specialized investment company guidelines.

Variable interest entities

VIEs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity.

The most common type of VIE is an SPE. SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. The basic SPE structure involves a company selling assets to the SPE; the SPE funds the purchase of those assets by issuing securities to investors. The legal documents that govern the transaction specify how the cash earned on the assets must be allocated to the SPE's investors and other parties that have rights to those cash flows. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets.

The primary beneficiary of a VIE (i.e., the party that has a controlling financial interest) is required to consolidate the assets and liabilities of the VIE. The primary beneficiary is the party that has both (1) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance; and (2) through its interests in the VIE, the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

To assess whether the Firm has the power to direct the activities of a VIE that most significantly impact the VIE's economic performance, the Firm considers all the facts and circumstances, including its role in establishing the VIE and its ongoing rights and responsibilities. This assessment includes, first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE (such as asset managers, collateral managers, servicers, or owners of call options or liquidation rights over the VIE's assets) or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the activities of a VIE.

To assess whether the Firm has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, the Firm considers all of its economic interests, including debt and equity investments, servicing fees, and derivatives or other arrangements deemed to be variable interests in the VIE. This assessment requires that the Firm apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by the Firm.

The Firm performs on-going reassessments of: (1) whether entities previously evaluated under the majority voting-interest framework have become VIEs, based on certain events, and are therefore subject to the VIE consolidation framework; and (2) whether changes in the facts and circumstances regarding the Firm's involvement with a VIE cause the Firm's consolidation conclusion to change.

Refer to Note 14 for further discussion of Firm-sponsored VIEs.

Revenue recognition

Interest income
The Firm recognizes interest income on loans, debt securities, and other debt instruments, generally on a level-yield basis, based on the underlying contractual rate. Refer to Note 7 for further information.

Revenue from contracts with customers
JPMorganChase recognizes noninterest revenue from certain contracts with customers, in investment banking fees, deposit-related fees, asset management fees, commissions and other fees, and components of card income, when the Firm's related performance obligations are satisfied. Refer to Note 6 for further discussion of the Firm's revenue from contracts with customers.

Principal transactions revenue
JPMorganChase carries a portion of its assets and liabilities at fair value. Changes in fair value are reported primarily in principal transactions revenue. Refer to Notes 2 and 3 for further discussion of fair value measurement. Refer to Note 6 for further discussion of principal transactions revenue.

Use of estimates in the preparation of consolidated financial statements

The preparation of the Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense, and disclosures of contingent assets and liabilities. Actual results could be different from these estimates.

Foreign currency translation

JPMorganChase revalues assets, liabilities, revenue and expense denominated in non-U.S. currencies into U.S. dollars using applicable exchange rates.

Gains and losses relating to translating functional currency financial statements for U.S. reporting are included in the Consolidated statements of comprehensive income. Gains and losses relating to nonfunctional currency transactions, including non-U.S. operations where the functional currency is the U.S. dollar, are reported in the Consolidated statements of income.

Offsetting assets and liabilities

U.S. GAAP permits entities to present derivative receivables and derivative payables with the same counterparty and the related cash collateral receivables and payables on a net basis on the Consolidated balance sheets when a legally enforceable master netting agreement exists. U.S. GAAP also permits securities sold and purchased under repurchase agreements and securities borrowed or loaned under securities loan agreements to be presented net when specified conditions are met, including the existence of a legally enforceable master netting agreement. The Firm has elected to net such balances where it has determined that the specified conditions are met.

The Firm uses master netting agreements to mitigate counterparty credit risk in certain transactions, including derivative contracts, resale, repurchase, securities borrowed and securities loaned agreements. A master netting agreement is a single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due). Upon the exercise of derivatives termination rights by the non-defaulting party (i) all transactions are terminated, (ii) all transactions are valued and the positive values of "in the money" transactions are netted against the negative values of "out of the money" transactions and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount. Upon exercise of default rights under repurchase agreements and securities loan agreements in general (i) all transactions are terminated and accelerated, (ii) all values of securities or cash held or to be delivered are calculated, and all such sums are netted against each other and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount.

Typical master netting agreements for these types of transactions also often contain a collateral/margin agreement that provides for a security interest in, or title transfer of, securities or cash collateral/margin to the party that has the right to demand margin (the "demanding party"). The collateral/margin agreement typically requires a party to transfer collateral/margin to the demanding party with a value equal to the amount of the margin deficit on a net basis across all transactions governed by the master netting agreement, less any threshold. The collateral/margin agreement grants to the demanding party, upon default by the counterparty, the right to set-off any amounts payable by the counterparty against any posted collateral or the cash equivalent of any posted collateral/margin. It also grants to the demanding party the right to liquidate collateral/margin and to apply the proceeds to an amount payable by the counterparty.

Refer to Note 5 for further discussion of the Firm's derivative instruments. Refer to Note 11 for further discussion of the Firm's securities financing agreements.

Statements of cash flows

For JPMorganChase's Consolidated statements of cash flows, cash is defined as those amounts included in cash and due from banks and deposits with banks on the Consolidated balance sheets.

Accounting standard adopted January 1, 2024

Equity Method and Joint Ventures: Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method

The guidance expanded the types of tax-oriented investments, beyond affordable housing tax credit investments, that the Firm can elect on a program by program basis, to be accounted for using the proportional amortization method. This method requires the cost of eligible investments, within an elected program, to be amortized in proportion to the tax benefits received with the resulting amortization reported directly in income tax expense, which aligns with the associated tax credits and other tax benefits. Eligible investments must meet certain criteria, including that substantially all of the return is from income tax credits and other income tax benefits.

This guidance was adopted on January 1, 2024 under the modified retrospective method. The adoption of this guidance resulted in a change to the classification and timing of the amortization associated with certain of the Firm's alternative energy tax-oriented investments. As a result of the adoption, the amortization of these investments that was previously recognized in other income is now recognized in income tax expense. The change in accounting resulted in a decrease to retained earnings of $161 million and increased the Firm's income tax expense and the effective tax rate by approximately $450 million and two percentage points, respectively, in the first quarter of 2024, with no material impact to net income.

The guidance requires additional disclosure for all investments that generate income tax credits and other income tax benefits from a tax-oriented investment program for which the Firm has elected to apply the proportional amortization method. The guidance also requires a reevaluation of eligible investments when significant modifications or events occur that result in a change in the nature of the investment or a change in the Firm's relationship with the underlying project.

Refer to Notes 6, 14 and 25 for additional information.

Accounting standards adopted January 1, 2023

Derivatives and Hedging: Fair Value Hedging – Portfolio Layer Method

The adoption of this guidance expanded the ability to hedge a portfolio of fixed-rate assets in a qualifying hedge accounting relationship. As permitted by the guidance, the Firm elected to transfer HTM securities to AFS and designated those securities in a portfolio layer method hedge upon adoption. The adoption impact of the transfer on retained earnings was not material.

Financial Instruments – Credit Losses: Troubled Debt Restructurings ("TDRs")

The adoption of this guidance eliminated the requirement to measure the allowance for TDRs using a discounted cash flow ("DCF") methodology and allowed the option of a non-DCF portfolio-based approach for modified loans to troubled borrowers. The Firm elected this option for all portfolios of modified loans to troubled borrowers except collateral-dependent loans and nonaccrual risk-rated loans, for which the Firm elected to continue applying a DCF methodology. The adoption of this guidance under the modified retrospective method on January 1, 2023, resulted in a $446 million increase to retained earnings.

Significant accounting policies

The following table identifies JPMorganChase's other significant accounting policies and the Note and page where a detailed description of each policy can be found.

Fair value measurement	Note 2	page 181
Fair value option	Note 3	page 203
Derivative instruments	Note 5	page 209

Note 2 – Fair value measurement

JPMorganChase carries a portion of its assets and liabilities at fair value. These assets and liabilities are predominantly carried at fair value on a recurring basis (i.e., assets and liabilities that are measured and reported at fair value on the Firm's Consolidated balance sheets). Certain assets, liabilities and unfunded lending-related commitments are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment).

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is based on quoted market prices or inputs, where available. If prices or quotes are not available, fair value is based on valuation models and other valuation techniques that consider relevant transaction characteristics (such as maturity) and use, as inputs, observable or unobservable market parameters, including yield curves, interest rates, volatilities, prices (such as commodity, equity or debt prices), correlations, foreign exchange rates and credit curves. Fair value may also incorporate valuation adjustments.

The level of precision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios.

The Firm uses various methodologies and assumptions in the determination of fair value. The use of different methodologies or assumptions by other market participants compared with those used by the Firm could result in the Firm deriving a different estimate of fair value at the reporting date.

Valuation process

Risk-taking functions are responsible for providing fair value estimates for assets and liabilities carried on the Consolidated balance sheets at fair value. The Firm's Valuation Control Group ("VCG"), which is part of the Firm's Finance function and independent of the risk-taking functions, is responsible for verifying these estimates and determining any fair value adjustments that may be required to ensure that the Firm's positions are recorded at fair value. In addition, the Firm's Valuation Governance Forum ("VGF"), which is composed of senior finance and risk executives, is responsible for overseeing the management of risks arising from valuation activities conducted across the Firm. The Firmwide VGF is chaired by the Firmwide head of the VCG (under the direction of the Firm's Controller), and includes sub-forums covering the CIB, CCB, AWM and certain corporate functions including Treasury and CIO.

Price verification process

The VCG verifies fair value estimates provided by the risk-taking functions by leveraging independently derived prices, valuation inputs and other market data, where available. Where independent prices or inputs are not available, the VCG performs additional review to ensure the reasonableness of the estimates. The additional review may include evaluating the limited market activity including client unwinds, benchmarking valuation inputs to those used for similar instruments, decomposing the valuation of structured instruments into individual components, comparing expected to actual cash flows, reviewing profit and loss trends, and reviewing trends in collateral valuation. There are also additional levels of management review for more significant or complex positions.

The VCG determines any valuation adjustments that may be required to the estimates provided by the risk-taking functions. No adjustments to quoted prices are applied for instruments classified within level 1 of the fair value hierarchy (refer to the discussion of the fair value hierarchy on page 182 for further information). For other positions, judgment is required to assess the need for valuation adjustments to appropriately reflect liquidity considerations, unobservable parameters, and, for certain portfolios that meet specified criteria, the size of the net open risk position. The determination of such adjustments follows a consistent framework across the Firm:

- Liquidity valuation adjustments are considered where an observable external price or valuation parameter exists but is of lower reliability, potentially due to lower market activity. Liquidity valuation adjustments are made based on current market conditions. Factors that may be considered in determining the liquidity adjustment include analysis of: (1) the estimated bid-offer spread for the instrument being traded; (2) alternative pricing points for similar instruments in active markets; and (3) the range of reasonable values that the price or parameter could take.
- The Firm manages certain portfolios of financial instruments on the basis of net open risk exposure and, as permitted by U.S. GAAP, has elected to estimate the fair value of such portfolios on the basis of a transfer of the entire net open risk position in an orderly transaction. Where this is the case, valuation adjustments may be necessary to reflect the cost of exiting a larger-than-normal market-size net open risk position. Where applied, such adjustments are

based on factors that a relevant market participant would consider in the transfer of the net open risk position, including the size of the adverse market move that is likely to occur during the period required to sufficiently reduce the net open risk position.

- Uncertainty adjustments related to unobservable parameters may be made when positions are valued using prices or input parameters to valuation models that are unobservable due to a lack of market activity or because they cannot be implied from observable market data. Such prices or parameters must be estimated and are, therefore, subject to management judgment. Adjustments are made to reflect the uncertainty inherent in the resulting valuation estimate.
- Where appropriate, the Firm also applies adjustments to its estimates of fair value in order to appropriately reflect counterparty credit quality (CVA), the Firm's own creditworthiness (DVA) and the impact of funding (FVA), using a consistent framework across the Firm. Refer to Credit and funding adjustments on page 198 of this Note for more information on such adjustments.

Valuation model review and approval

If prices or quotes are not available for an instrument or a similar instrument, fair value is generally determined using valuation models that consider relevant transaction terms such as maturity and use as inputs market-based or independently sourced parameters. Where this is the case the price verification process described above is applied to the inputs in those models.

Under the Firm's Estimations and Model Risk Management Policy, MRGR reviews and approves new models, as well as material changes to existing models, prior to implementation in the operating environment. In certain circumstances exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity.

Fair value hierarchy

A three-level fair value hierarchy has been established under U.S. GAAP for disclosure of fair value measurements. The fair value hierarchy is based on the observability of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows.

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 – one or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following table describes the valuation methodologies generally used by the Firm to measure its significant products/instruments at fair value, including the general classification of such instruments pursuant to the fair value hierarchy.

Product/instrument	Valuation methodology	Classifications in the fair value hierarchy
Securities financing agreements	Valuations are based on discounted cash flows, which consider: • Derivative features: refer to the discussion of derivatives below for further information • Market rates for the respective maturity • Collateral characteristics	Predominantly level 2
Loans and lending-related commitments — wholesale Loans carried at fair value (trading loans and non-trading loans) and associated lending-related commitments	Where observable market data is available, valuations are based on: • Observed market prices (circumstances are infrequent) • Relevant broker quotes • Observed market prices for similar instruments Where observable market data is unavailable or limited, valuations are based on discounted cash flows, which consider the following: • Credit spreads derived from the cost of CDS; or benchmark credit curves developed by the Firm, by industry and credit rating • Prepayment speed • Collateral characteristics	Level 2 or 3
Loans — consumer Loans carried at fair value — residential mortgage loans expected to be sold	Fair value is based on observable market prices for mortgage-backed securities with similar collateral and incorporates adjustments to these prices to account for differences between the securities and the value of the underlying loans, which include credit characteristics, portfolio composition, and liquidity.	Predominantly level 2
Investment and trading securities	Quoted market prices	Level 1
	In the absence of quoted market prices, securities are valued based on: • Observable market prices for similar securities • Relevant broker quotes • Discounted cash flows In addition, the following inputs to discounted cash flows are used for the following products: Mortgage- and asset-backed securities specific inputs: • Collateral characteristics • Deal-specific payment and loss allocations • Current market assumptions related to yield, prepayment speed, conditional default rates and loss severity Collateralized loan obligations ("CLOs") specific inputs: • Collateral characteristics • Deal-specific payment and loss allocations • Expected prepayment speed, conditional default rates, loss severity • Credit spreads • Credit rating data	Level 2 or 3
Physical commodities	Valued using observable market prices or data.	Predominantly Level 1 or 2

Product/instrument	Valuation methodology	Classifications in the fair value hierarchy
Derivatives	Actively traded derivatives, e.g., exchange-traded derivatives, that are valued using quoted prices.	Level 1
	Derivatives that are valued using models such as the Black-Scholes option pricing model, simulation models, or a combination of models that may use observable or unobservable valuation inputs as well as considering the contractual terms. The key valuation inputs used will depend on the type of derivative and the nature of the underlying instruments and may include equity prices, commodity prices, foreign exchange rates, volatilities, correlations, CDS spreads, recovery rates and prepayment speed. In addition, specific inputs used for derivatives that are valued based on models with significant unobservable inputs are as follows: Interest rate and FX exotic derivatives specific inputs include: • Interest rate curve • Interest rate volatility • Interest rate spread volatility • Bermudan switch value • Interest rate correlation • Interest rate-FX correlation • Foreign exchange correlation Credit derivatives specific inputs include: • Credit correlation between the underlying debt instruments Equity derivatives specific inputs include: • Forward equity price • Equity volatility • Equity correlation • Equity-FX correlation • Equity-IR correlation Commodity derivatives specific inputs include: • Forward commodity price • Commodity volatility • Commodity correlation Additionally, adjustments are made to reflect counterparty credit quality (CVA) and the impact of funding (FVA). Refer to page 198 of this Note.	Level 2 or 3
Mortgage servicing rights	Refer to Mortgage servicing rights in Note 15.	Level 3
Private equity direct investments	Fair value is estimated using all available information; the range of potential inputs include: • Transaction prices • Trading multiples of comparable public companies • Operating performance of the underlying portfolio company • Adjustments as required, since comparable public companies are not identical to the company being valued, and for company-specific issues including lack of liquidity • Additional available inputs relevant to the investment	Level 2 or 3

Product/instrument	Valuation methodology	Classification in the fair value hierarchy
Fund investments (e.g., mutual/collective investment funds, private equity funds, hedge funds, and real estate funds)	Net asset value	
	• NAV is supported by the ability to redeem and purchase at the NAV level	Level 1
	• Adjustments to the NAV as required, for restrictions on redemption (e.g., lock-up periods or withdrawal limitations) or where observable activity is limited	Level 2 or 3[(a)]
Beneficial interests issued by consolidated VIEs	Valued using observable market information, where available. In the absence of observable market information, valuations are based on the fair value of the underlying assets held by the VIE.	Level 2 or 3
Structured notes (included in deposits, short-term borrowings and long-term debt)	Valuations are based on discounted cash flow analyses that consider the embedded derivative and the terms and payment structure of the note. The embedded derivative features are considered using models such as the Black-Scholes option pricing model, simulation models, or a combination of models that may use observable or unobservable valuation inputs, depending on the embedded derivative. The specific inputs used vary according to the nature of the embedded derivative features, as described in the discussion above regarding derivatives valuation. Adjustments are then made to this base valuation to reflect the Firm's own credit risk (DVA). Refer to page 198 of this Note.	Level 2 or 3

(a) Excludes certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient.

The following table presents the assets and liabilities reported at fair value as of December 31, 2024 and 2023, by major product category and fair value hierarchy.

Assets and liabilities measured at fair value on a recurring basis

(a) At December 31, 2024 and 2023, included total U.S. GSE obligations of $120.1 billion and $78.5 billion, respectively, which were mortgage-related.

(b) Physical commodities inventories are generally accounted for at the lower of cost or net realizable value. "Net realizable value" is a term defined in U.S. GAAP as not exceeding fair value less costs to sell ("transaction costs"). Transaction costs for the Firm's physical commodities inventories are either not applicable or immaterial to the value of the inventory. Therefore, net realizable value approximates fair value for the Firm's physical commodities inventories. When fair value hedging has been applied (or when net realizable value is below cost), the carrying value of physical commodities approximates fair value, because under fair value hedge accounting, the cost basis is adjusted for changes in fair value. Refer to Note 5 for a further discussion of the Firm's hedge accounting relationships. To provide consistent fair value disclosure information, all physical commodities inventories have been included in each period presented.

(c) Balances reflect the reduction of securities owned (long positions) by the amount of identical securities sold but not yet purchased (short positions).

(d) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not required to be classified in the fair value hierarchy. At both December 31, 2024 and 2023, the fair values of these investments, which include certain hedge funds, private equity funds, real estate and other funds, were $1.0 billion, primarily reported in other assets.

(e) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral received and paid when a legally enforceable master netting agreement exists. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral.

Level 3 valuations

The Firm has established well-structured processes for determining fair value, including for instruments where fair value is estimated using significant unobservable inputs (level 3). Refer to pages 181–185 of this Note for further information on the Firm's valuation process and a detailed discussion of the determination of fair value for individual financial instruments.

Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2.

In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, due to the lack of observability of significant inputs, management must assess relevant empirical data in deriving valuation inputs including transaction details, yield curves, interest rates, prepayment speed, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves.

The following table presents the Firm's primary level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments, the significant unobservable inputs, the range of values for those inputs and the weighted or arithmetic averages of such inputs. While the determination to classify an instrument within level 3 is based on the significance of the unobservable inputs to the overall fair value measurement, level 3 financial instruments typically include observable components (that is, components that are actively quoted and can be validated to external sources) in addition to the unobservable components. The level 1 and/or level 2 inputs are not included in the table. In addition, the Firm manages the risk of the observable components of level 3 financial instruments using securities and derivative positions that are classified within levels 1 or 2 of the fair value hierarchy.

The range of values presented in the table is representative of the highest and lowest level input used to value the significant groups of instruments within a product/instrument classification. Where provided, the weighted averages of the input values presented in the table are calculated based on the fair value of the instruments that the input is being used to value.

In the Firm's view, the input range, weighted and arithmetic average values do not reflect the degree of input uncertainty or an assessment of the reasonableness of the Firm's estimates and assumptions. Rather, they reflect the characteristics of the various instruments held by the Firm and the relative distribution of instruments within the range of characteristics. For example, two option contracts may have similar levels of market risk exposure and valuation uncertainty, but may have significantly different implied volatility levels because the option contracts have different underlyings, tenors, or strike prices. The input range and weighted and arithmetic average values will therefore vary from period-to-period and parameter-to-parameter based on the characteristics of the instruments held by the Firm at each balance sheet date.

Level 3 inputs[(a)]

(a) The categories presented in the table have been aggregated based upon the product type, which may differ from their classification on the Consolidated balance sheets. Furthermore, the inputs presented for each valuation technique in the table are, in some cases, not applicable to every instrument valued using the technique as the characteristics of the instruments can differ.
(b) Comprises U.S. GSE and government agency securities of $488 million, nonagency securities of $5 million and non-trading loans of $368 million.
(c) Comprises nonagency securities of $18 million, trading loans of $65 million and non-trading loans of $1.3 billion.
(d) Comprises trading loans of $1.0 billion and non-trading loans of $707 million.
(e) Long-term debt, short-term borrowings and deposits include structured notes issued by the Firm that are financial instruments that typically contain embedded derivatives. The estimation of the fair value of structured notes includes the derivative features embedded within the instrument. The significant unobservable inputs are broadly consistent with those presented for derivative receivables.
(f) Includes equity securities of $734 million including $672 million in Other assets, for which quoted prices are not readily available and the fair value is generally based on internal valuation techniques such as EBITDA multiples and comparable analysis. All other level 3 assets and liabilities are insignificant both individually and in aggregate.
(g) Price is a significant unobservable input for certain instruments. When quoted market prices are not readily available, reliance is generally placed on price-based internal valuation techniques. The price input is expressed assuming a par value of $100.
(h) Forward equity price is expressed as a percentage of the current equity price.
(i) Amounts represent weighted averages except for derivative related inputs where arithmetic averages are used.

Changes in and ranges of unobservable inputs

The following discussion provides a description of the impact on a fair value measurement of a change in each unobservable input in isolation, and the interrelationship between unobservable inputs, where relevant and significant. The impact of changes in inputs may not be independent, as a change in one unobservable input may give rise to a change in another unobservable input. Where relationships do exist between two unobservable inputs, those relationships are discussed below. Relationships may also exist between observable and unobservable inputs (for example, as observable interest rates rise, unobservable prepayment rates decline); such relationships have not been included in the discussion below. In addition, for each of the individual relationships described below, the inverse relationship would also generally apply.

The following discussion also provides a description of attributes of the underlying instruments and external market factors that affect the range of inputs used in the valuation of the Firm's positions.

Yield – The yield of an asset is the interest rate used to discount future cash flows in a discounted cash flow calculation. An increase in the yield, in isolation, would result in a decrease in a fair value measurement.

Credit spread – The credit spread is the amount of additional annualized return over the market interest rate that a market participant would demand for taking exposure to the credit risk of an instrument. The credit spread for an instrument forms part of the discount rate used in a discounted cash flow calculation. Generally, an increase in the credit spread would result in a decrease in a fair value measurement.

The yield and the credit spread of a particular mortgage-backed security primarily reflect the risk inherent in the instrument. The yield is also impacted by the absolute level of the coupon paid by the instrument (which may not correspond directly to the level of inherent risk). Therefore, the range of yield and credit spreads reflects the range of risk inherent in various instruments owned by the Firm. The risk inherent in mortgage-backed securities is driven by the subordination of the security being valued and the characteristics of the underlying mortgages within the collateralized pool, including borrower FICO scores, LTV ratios for residential mortgages and the nature of the property and/or any tenants for commercial mortgages. For corporate debt securities, obligations of U.S. states and municipalities and other similar instruments, credit spreads reflect the credit quality of the obligor and the tenor of the obligation.

Prepayment speed – The prepayment speed is a measure of the voluntary unscheduled principal repayments of a prepayable obligation in a collateralized pool. Prepayment speeds generally decline as borrower delinquencies rise. An increase in prepayment speeds, in isolation, would result in a decrease in a fair value measurement of assets valued at a premium to par and an increase in a fair value measurement of assets valued at a discount to par.

Prepayment speeds may vary from collateral pool to collateral pool, and are driven by the type and location of the underlying borrower, and the remaining tenor of the obligation as well as the level and type (e.g., fixed or floating) of interest rate being paid by the borrower. Typically collateral pools with higher borrower credit quality have a higher prepayment rate than those with lower borrower credit quality, all other factors being equal.

Conditional default rate – The conditional default rate is a measure of the reduction in the outstanding collateral balance underlying a collateralized obligation as a result of defaults. While there is typically no direct relationship between conditional default rates and prepayment speeds, collateralized obligations for which the underlying collateral has high prepayment speeds will tend to have lower conditional default rates. An increase in conditional default rates would generally be accompanied by an increase in loss severity and an increase in credit spreads. An increase in the conditional default rate, in isolation, would result in a decrease in a fair value measurement. Conditional default rates reflect the quality of the collateral underlying a securitization and the structure of the securitization itself. Based on the types of securities owned in the Firm's market-making portfolios, conditional default rates are most typically at the lower end of the range presented.

Loss severity – The loss severity (the inverse concept is the recovery rate) is the expected amount of future realized losses resulting from the ultimate liquidation of a particular loan, expressed as the net amount of loss relative to the outstanding loan balance. An increase in loss severity is generally accompanied by an increase in conditional default rates. An increase in the loss severity, in isolation, would result in a decrease in a fair value measurement.

The loss severity applied in valuing a mortgage-backed security depends on factors relating to the underlying mortgages, including the LTV ratio, the nature of the lender's lien on the property and other instrument-specific factors.

Correlation – Correlation is a measure of the relationship between the movements of two variables. Correlation is a pricing input for a derivative product where the payoff is driven by one or more underlying risks. Correlation inputs are related to the type of derivative (e.g., interest rate, credit, equity, foreign exchange and commodity) due to the nature of the underlying risks. When parameters are positively correlated, an increase in one parameter will result in an increase in the other parameter. When parameters are negatively correlated, an increase in one parameter will result in a decrease in the other parameter. An increase in correlation can result in an increase or a decrease in a fair value measurement. Given a short correlation position, an increase in correlation, in isolation, would generally result in a decrease in a fair value measurement.

The level of correlation used in the valuation of derivatives with multiple underlying risks depends on a number of factors including the nature of those risks. For example, the correlation between two credit risk exposures would be different than that between two interest rate risk exposures. Similarly, the tenor of the transaction may also impact the correlation input, as the relationship between the underlying risks may be different over different time periods. Furthermore, correlation levels are dependent on market conditions and could have a relatively wide range of levels within or across asset classes over time, particularly in volatile market conditions.

Volatility – Volatility is a measure of the variability in possible returns for an instrument, parameter or market index given how much the particular instrument, parameter or index changes in value over time. Volatility is a pricing input for options, including equity options, commodity options, and interest rate options. Given a long position in an option, an increase in volatility, in isolation, would generally result in an increase in a fair value measurement.

The level of volatility used in the valuation of a particular option-based derivative depends on a number of factors, including the nature of the risk underlying the option (e.g., the volatility of a particular equity security may be significantly different from that of a particular commodity index), the tenor of the derivative as well as the strike price of the option.

Bermudan switch value – The switch value is the difference between the overall value of a Bermudan swaption, which can be exercised at multiple points in time, and its most expensive European swaption and reflects the additional value that the multiple exercise dates provide the holder. Switch values are dependent on market conditions and can vary greatly depending on a number of factors, such as the tenor of the underlying swap as well as the strike price of the option. An increase in switch value, in isolation, would generally result in an increase in a fair value measurement.

Interest rate curve – The interest rate curve represents the relationship of interest rates over differing tenors. The interest rate curve is used to set interest rate and foreign exchange derivative cash flows and is also a pricing input used in the discounting of any derivative cash flow.

Forward price – The forward price is the price at which the buyer agrees to purchase the asset underlying a forward contract on the predetermined future delivery date, and is such that the value of the contract is zero at inception.

The forward price is used as an input in the valuation of certain derivatives and depends on a number of factors including interest rates, the current price of the underlying asset, and the expected income to be received and costs to be incurred by the seller as a result of holding that asset until the delivery date. An increase in the forward can result in an increase or a decrease in a fair value measurement.

Changes in level 3 recurring fair value measurements

The following tables include a rollforward of the Consolidated balance sheets amounts (including changes in fair value) for financial instruments classified by the Firm within level 3 of the fair value hierarchy for the years ended December 31, 2024, 2023 and 2022. When a determination is made to classify a financial instrument within level 3, the determination is based on the significance of the unobservable inputs to the overall fair value measurement. However, level 3 financial instruments typically include, in addition to the unobservable or level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources); accordingly, the gains and losses in the table below include changes in fair value due in part to observable factors that are part of the valuation methodology. The Firm risk-manages the observable components of level 3 financial instruments using securities and derivative positions that are classified within level 1 or 2 of the fair value hierarchy; as these level 1 and level 2 risk management instruments are not included below, the gains or losses in the following tables do not reflect the effect of the Firm's risk management activities related to such level 3 instruments.

(a) Level 3 assets at fair value as a percentage of total Firm assets at fair value (including assets measured at fair value on a nonrecurring basis) were 2% at December 31, 2024, 2023 and 2022. Level 3 liabilities at fair value as a percentage of total Firm liabilities at fair value (including liabilities measured at fair value on a nonrecurring basis) were 9% at December 31, 2024, and 8% at both December 31, 2023 and 2022.
(b) All level 3 derivatives are presented on a net basis, irrespective of the underlying counterparty.
(c) Primarily reported in principal transactions revenue, except for changes in fair value for CCB mortgage loans and lending-related commitments originated with the intent to sell, and mortgage loan purchase commitments, which are reported in mortgage fees and related income.
(d) Realized gains/(losses) on AFS securities are reported in investment securities gains/(losses). Unrealized gains/(losses) are reported in OCI. Realized and unrealized gains/(losses) recorded on level 3 AFS securities were not material for the years ended December 31, 2024, 2023 and 2022.
(e) Changes in fair value for MSRs are reported in mortgage fees and related income.
(f) Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue, and were not material for the years ended December 31, 2024, 2023 and 2022. Unrealized (gains)/losses are reported in OCI, and were $(50) million, $(158) million and $(529) million for the years ended December 31, 2024, 2023 and 2022, respectively.
(g) Loan originations are included in purchases.
(h) Includes financial assets and liabilities that have matured, been partially or fully repaid, impacts of modifications, deconsolidations associated with beneficial interests in VIEs and other items.

Level 3 analysis

Consolidated balance sheets changes

The following describes significant changes to level 3 assets since December 31, 2023, for those items measured at fair value on a recurring basis. Refer to Assets and liabilities measured at fair value on a nonrecurring basis on page 199 for further information on changes impacting items measured at fair value on a nonrecurring basis.

For the year ended December 31, 2024

Level 3 assets were $23.8 billion at December 31, 2024, reflecting an increase of $127 million from December 31, 2023.

The increase for the year ended December 31, 2024 was driven by:

- $599 million increase in MSRs.
- $586 million increase in other assets primarily due to purchases,

offset by:

- $472 million decrease in gross derivative receivables due to sales and settlements predominantly offset by gains, purchases and net transfers.
- $663 million decrease in non-trading loans due to sales and settlements largely offset by gains, purchases and net transfers.

Refer to Note 15 for information on MSRs.

Refer to the sections below for additional information.

Transfers between levels for instruments carried at fair value on a recurring basis

During the year ended December 31, 2024, significant transfers from level 2 into level 3 included the following:

- $1.0 billion of total debt and equity instruments, predominantly trading loans, driven by a decrease in observability.
- $959 million of gross interest rate derivative receivables and $1.1 billion of gross interest rate derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $1.6 billion of gross equity derivative receivables and $1.7 billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $816 million of non-trading loans driven by a decrease in observability.

During the year ended December 31, 2024, significant transfers from level 3 into level 2 included the following:

- $880 million of total debt and equity instruments, predominantly trading loans and equity securities, driven by an increase in observability.
- $1.4 billion of gross equity derivative receivables and $2.0 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $863 million of long-term debt as a result of an increase in observability and a decrease in the significance of unobservable inputs.

During the year ended December 31, 2023, significant transfers from level 2 into level 3 included the following:

- $951 million of gross interest rate derivative receivables as a result of a decrease in observability and an increase in the significance of unobservable inputs and $2.1 billion of gross interest rate derivative payables as a result of transition to term SOFR for certain interest rate options.
- $1.5 billion of gross equity derivative receivables and $829 million of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $1.3 billion of non-trading loans driven by a decrease in observability.

During the year ended December 31, 2023, significant transfers from level 3 into level 2 included the following:

- $1.1 billion of total debt and equity instruments, partially due to trading loans, driven by an increase in observability.
- $921 million of gross interest rate derivative receivables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $2.3 billion of gross equity derivative receivables and $1.7 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $1.1 billion of non-trading loans as a result of an increase in observability and a decrease in the significance of unobservable inputs.

During the year ended December 31, 2022, significant transfers from level 2 into level 3 included the following:

- $2.4 billion of total debt and equity instruments, predominantly due to equity securities of $1.1 billion driven by a decrease in observability predominantly as a result of restricted access to certain markets and trading loans of $925 million driven by a decrease in observability.
- $1.6 billion of gross interest rate derivative receivables and $878 million of gross interest rate derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $1.6 billion of gross equity derivative receivables and $2.3 billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs.
- $1.1 billion of non-trading loans driven by a decrease in observability.
- $793 million of long-term debt driven by a decrease in observability and an increase in the significance of unobservable inputs for structured notes.

During the year ended December 31, 2022, significant transfers from level 3 into level 2 included the following:

- $1.2 billion of total debt and equity instruments, largely due to trading loans, driven by an increase in observability.
- $1.2 billion of gross interest rate derivative receivables and $807 million of gross interest rate derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $2.2 billion of gross equity derivative receivables and $2.3 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs.
- $831 million of non-trading loans driven by an increase in observability.
- $1.0 billion of long-term debt driven by an increase in observability and a decrease in the significance of unobservable inputs for structured notes.

All transfers are based on changes in the observability and/or significance of the valuation inputs and are assumed to occur at the beginning of the quarterly reporting period in which they occur.

Gains and losses

The following describes significant components of total realized/unrealized gains/(losses) for instruments measured at fair value on a recurring basis for the years ended December 31, 2024, 2023 and 2022. These amounts exclude any effects of the Firm's risk management activities where the financial instruments are classified as level 1 and 2 of the fair value hierarchy. Refer to Changes in level 3 recurring fair value measurements rollforward tables on pages 192–196 for further information on these instruments.

2024

- $1.9 billion of net gains on assets, predominantly driven by gains in net interest rate derivative receivables due to market movements and gains in MSRs reflecting lower prepayment speeds on higher rates.
- $1.6 billion of net losses on liabilities, predominantly driven by losses in long-term debt due to market movements.

2023

- $1.8 billion of net gains on assets, largely driven by gains in net interest rate derivative receivables due to market movements and gains in MSRs reflecting lower prepayment speeds on higher rates.
- $3.3 billion of net losses on liabilities, predominantly driven by losses in long-term debt due to market movements.

2022

- $7.7 billion of net gains on assets, predominantly driven by gains in net equity derivative receivables due to market movements and gains in MSRs reflecting lower prepayment speeds on higher rates.
- $4.6 billion of net gains on liabilities, predominantly driven by a decline in the fair value of long-term debt due to market movements.

Refer to Note 15 for information on MSRs.

Credit and funding adjustments – derivatives

Derivatives are generally valued using models that use as their basis observable market parameters. These market parameters generally do not consider factors such as counterparty nonperformance risk, the Firm's own credit quality, and funding costs. Therefore, it is generally necessary to make adjustments to the base estimate of fair value to reflect these factors.

CVA represents the adjustment, relative to the relevant benchmark interest rate, necessary to reflect counterparty nonperformance risk. The Firm estimates CVA using a scenario analysis to estimate the expected positive credit exposure across all of the Firm's existing positions with each counterparty, and then estimates losses based on the probability of default and estimated recovery rate as a result of a counterparty credit event considering contractual factors designed to mitigate the Firm's credit exposure, such as collateral and legal rights of offset. The key inputs to this methodology are (i) the probability of a default event occurring for each counterparty, as derived from observed or estimated CDS spreads; and (ii) estimated recovery rates implied by CDS spreads, adjusted to consider the differences in recovery rates as a derivative creditor relative to those reflected in CDS spreads, which generally reflect senior unsecured creditor risk.

FVA represents the adjustment to reflect the impact of funding and is recognized where there is evidence that a market participant in the principal market would incorporate it in a transfer of the instrument. The Firm's FVA framework, applied to uncollateralized (including partially collateralized) over-the-counter ("OTC") derivatives incorporates key inputs such as: (i) the expected funding requirements arising from the Firm's positions with each counterparty and collateral arrangements; and (ii) the estimated market funding cost in the principal market which, for derivative liabilities, considers the Firm's credit risk (DVA). For collateralized derivatives, the fair value is estimated by discounting expected future cash flows at the relevant overnight indexed swap rate given the underlying collateral agreement with the counterparty, and therefore a separate FVA is not necessary.

The following table provides the impact of credit and funding adjustments on principal transactions revenue in the respective periods, excluding the effect of any associated hedging activities. The FVA presented below includes the impact of the Firm's own credit quality on the inception value of liabilities as well as the impact of changes in the Firm's own credit quality over time.

Year ended December 31, (in millions)	**2024**	2023	2022
Credit and funding adjustments:			
Derivatives CVA	**$ 29**	$ 221	$ 22
Derivatives FVA	**99**	114	42

Valuation adjustments on fair value option elected liabilities

The valuation of the Firm's liabilities for which the fair value option has been elected requires consideration of the Firm's own credit risk. DVA on fair value option elected liabilities reflects changes (subsequent to the issuance of the liability) in the Firm's probability of default and LGD, which are estimated based on changes in the Firm's credit spread observed in the bond market. Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue. Unrealized (gains)/ losses are reported in OCI. Refer to page 196 in this Note and Note 24 for further information.

Assets and liabilities measured at fair value on a nonrecurring basis

The following tables present the assets held as of December 31, 2024 and 2023, for which nonrecurring fair value adjustments were recorded during the years ended December 31, 2024 and 2023, by major product category and fair value hierarchy. There were no liabilities measured at fair value on a nonrecurring basis at both December 31, 2024 and 2023.

December 31, 2024 (in millions)	Fair value hierarchy Level 1	Level 2	Level 3	Total fair value
Loans	**$ —**	**$ 738**	**$ 694**	**$ 1,432**
Other assets[a]	**—**	**9**	**1,048**	**1,057**
Total assets measured at fair value on a nonrecurring basis	**$ —**	**$ 747**	**$ 1,742**	**$ 2,489**

December 31, 2023 (in millions)	Fair value hierarchy Level 1	Level 2	Level 3	Total fair value
Loans	$ —	$ 599	$ 1,156	$ 1,755
Other assets	—	52	1,334	1,386
Total assets measured at fair value on a nonrecurring basis	$ —	$ 651	$ 2,490	$ 3,141

(a) Included equity securities without readily determinable fair values that were adjusted based on observable price changes in orderly transactions from an identical or similar investment of the same issuer (measurement alternative). Of the $1.0 billion in level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2024, $668 million related to equity securities adjusted based on the measurement alternative. These equity securities are classified as level 3 due to the infrequency of the observable prices and/or the restrictions on the shares. Also, included impairments on certain equity method investments.

Nonrecurring fair value changes

The following table presents the total change in value of assets and liabilities for which fair value adjustments have been recognized for the years ended December 31, 2024, 2023 and 2022, related to assets and liabilities held at those dates.

December 31, (in millions)	**2024**	2023	2022
Loans	**$ (302)**	$ (276)	$ (55)
Other assets[a]	**(610)**	(789)	(409)
Accounts payable and other liabilities	**—**	—	(83)
Total nonrecurring fair value gains/(losses)	**$ (912)**	$ (1,065)	$ (547)

(a) Included $(197) million, $(232) million and $(338) million for the years ended December 31, 2024, 2023 and 2022, respectively, of net gains/(losses) as a result of the measurement alternative. The current period also included impairments on certain equity method investments.

Equity securities without readily determinable fair values

The Firm measures certain equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer (i.e., measurement alternative), with such changes recognized in other income.

In its determination of the new carrying values upon observable price changes, the Firm may adjust the prices if deemed necessary to arrive at the Firm's estimated fair values. Such adjustments may include adjustments to reflect the different rights and obligations of similar securities, and other adjustments that are consistent with the Firm's valuation techniques for private equity direct investments.

The following table presents the carrying value of equity securities without readily determinable fair values held as of December 31, 2024 and 2023, that are measured under the measurement alternative and the related adjustments recorded during the periods presented for those securities with observable price changes. These securities are included in the nonrecurring fair value tables when applicable price changes are observable.

As of or for the year ended December 31, (in millions)	2024	2023
Other assets		
Carrying value[(a)]	**$ 3,737**	$ 4,457
Upward carrying value changes[(b)]	**89**	93
Downward carrying value changes/impairment[(c)]	**(286)**	(325)

(a) The period-end carrying values reflect cumulative purchases and sales in addition to upward and downward carrying value changes.
(b) The cumulative upward carrying value changes between January 1, 2018 and December 31, 2024 were $1.1 billion.
(c) The cumulative downward carrying value changes/impairment between January 1, 2018 and December 31, 2024 were $(1.5) billion.

Included in other assets above is the Firm's interest in approximately 18.6 million Visa Class B-2 common shares ("Visa B-2 shares") and 37.2 million Visa Class B common shares ("Visa B shares") reflected in the Firm's principal investment portfolio as of December 31, 2024 and 2023, respectively.

The Visa B shares were redenominated to Visa Class B-1 common shares ("Visa B-1 shares") on January 24, 2024. On April 8, 2024, Visa commenced an initial exchange offer for any and all outstanding Visa B-1 shares. On May 6, 2024, the Firm announced that Visa had accepted the Firm's tender of its 37.2 million Visa B-1 shares in exchange for a combination of Visa B-2 shares and Visa Class C common shares ("Visa C shares"), resulting in an initial gain of $8.0 billion based on the fair value of the Visa C shares. In addition, the second quarter of 2024 also reflected other Visa-related activity, including the fair value changes of the Visa C shares and derivative instruments, as well as dividends, resulting in the $7.9 billion net gain on Visa shares in the quarter. As of September 30, 2024, the Firm had disposed of all of its Visa C shares through sales in the second and third quarters of 2024 and through a $1.0 billion contribution to the Firm's Foundation in the second quarter of 2024.

The Visa B-2 shares are subject to certain transfer restrictions and are convertible into Visa Class A common shares ("Visa A shares") at a specified conversion rate upon final resolution of certain litigation matters involving Visa. The conversion rate of Visa B-2 shares to Visa A shares was 1.5430 at December 31, 2024 and may be adjusted by Visa depending on developments related to the litigation matters. The outcome of those litigation matters, and the effect that the resolution of those matters may have on the conversion rate, is unknown. Accordingly, as of December 31, 2024, there is significant uncertainty regarding when the transfer restrictions on Visa B-2 shares may be terminated and what the final conversion rate for the Visa B-2 shares will be. As a result of these considerations, as well as differences in voting rights, Visa B-2 shares are not considered to be similar to Visa A shares, and are held at their nominal carryover basis.

Separately, in connection with sales of Visa B shares prior to 2024, the Firm has entered into derivative instruments with the purchasers of the shares under which the Firm retains the risk associated with changes in the conversion rate. Under the terms of the derivative instruments, the Firm will (a) make or receive payments based on subsequent changes in the conversion rate and (b) make periodic interest payments to the purchasers of the Visa B shares. The payments under the derivative instruments will continue as long as the Visa B-2 shares associated with the previously sold Visa B shares remain subject to transfer restrictions. The derivative instruments are accounted for at fair value using a discounted cash flow methodology based upon the Firm's estimate of the timing and magnitude of final resolution of the litigation matters. The derivative instruments are recorded in trading liabilities, and changes in fair value are recognized in other income. The notional amount of shares associated with those derivative instruments has been adjusted as a result of the Visa exchange offer. As of December 31, 2024, the Firm held derivative instruments associated with 11.6 million Visa B-2 shares related to Visa B share sales prior to 2024, which are all subject to similar terms and conditions.

Additional disclosures about the fair value of financial instruments that are not carried on the Consolidated balance sheets at fair value

U.S. GAAP requires disclosure of the estimated fair value of certain financial instruments, which are included in the following table. However, this table does not include other items, such as nonfinancial assets, intangible assets, certain financial instruments, and customer relationships. In the opinion of management, these items, in the aggregate, add significant value to JPMorganChase.

Financial instruments for which carrying value approximates fair value

Certain financial instruments that are not carried at fair value on the Consolidated balance sheets are carried at amounts that approximate fair value, due to their short-term nature and generally negligible credit risk. These instruments include cash and due from banks, deposits with banks, federal funds sold, securities purchased under resale agreements and securities borrowed, short-term receivables and accrued interest receivable, short-term borrowings, federal funds purchased, securities loaned and sold under repurchase agreements, accounts payable, and accrued liabilities. In addition, U.S. GAAP requires that the fair value of deposit liabilities with no stated maturity (i.e., demand, savings and certain money market deposits) be equal to their carrying value; recognition of the inherent funding value of these instruments is not permitted.

The following table presents, by fair value hierarchy classification, the carrying values and estimated fair values at December 31, 2024 and 2023, of financial assets and liabilities, excluding financial instruments that are carried at fair value on a recurring basis, and their classification within the fair value hierarchy.

	December 31, 2024					December 31, 2023				
		Estimated fair value hierarchy					Estimated fair value hierarchy			
(in billions)	Carrying value	Level 1	Level 2	Level 3	Total estimated fair value	Carrying value	Level 1	Level 2	Level 3	Total estimated fair value

Short-term borrowings	**26.4**	**—**	**26.3**	**—**	**26.3**	24.7	—	24.7	—	24.7
Accounts payable and other liabilities(b)	**232.8**	**—**	**219.6**	**12.6**	**232.2**	241.8	—	233.3	8.1	241.4
Beneficial interests issued by consolidated VIEs	**27.3**	**—**	**27.4**	**—**	**27.4**	23.0	—	23.0	—	23.0
Long-term debt	**300.6**	**—**	**251.2**	**50.7**	**301.9**	303.9	—	252.2	51.3	303.5

(a) Fair value is typically estimated using a discounted cash flow model that incorporates the characteristics of the underlying loans (including principal, contractual interest rate and contractual fees) and other key inputs, including expected lifetime credit losses, interest rates, prepayment rates, and primary origination or secondary market spreads. For certain loans, the fair value is measured based on the value of the underlying collateral. Carrying value of the loan takes into account the loan's allowance for loan losses, which represents the loan's expected credit losses over its remaining expected life. The difference between the estimated fair value and carrying value of a loan is generally attributable to changes in market interest rates, including credit spreads, market liquidity premiums and other factors that affect the fair value of a loan but do not affect its carrying value.

(b) Excludes lending-related commitments disclosed in the table below.

The majority of the Firm's lending-related commitments are not carried at fair value on a recurring basis on the Consolidated balance sheets. The carrying value and the estimated fair value of these wholesale lending-related commitments were as follows for the periods indicated.

	December 31, 2024					December 31, 2023				
		Estimated fair value hierarchy					Estimated fair value hierarchy			
(in billions)	Carrying value(a)(b)(c)	Level 1	Level 2	Level 3	Total estimated fair value	Carrying value(a)(b)(c)	Level 1	Level 2	Level 3	Total estimated fair value
Wholesale lending-related commitments	**$ 2.7**	**$ —**	**$ —**	**$ 4.4**	**$ 4.4**	$ 3.0	$ —	$ —	$ 4.8	$ 4.8

(a) Excludes the current carrying values of the guarantee liability and the offsetting asset, each of which is recognized at fair value at the inception of the guarantees.
(b) Includes the wholesale allowance for lending-related commitments.
(c) As of December 31, 2024 and 2023, included fair value adjustments associated with First Republic for other unfunded commitments to extend credit totaling $699 million and $1.1 billion, respectively, recorded in accounts payable and other liabilities on the Consolidated balance sheets. Refer to Notes 28 and 34 for additional information.

The Firm does not estimate the fair value of consumer off-balance sheet lending-related commitments. In many cases, the Firm can reduce or cancel these commitments with or without notice to the borrower, as permitted by law, or in accordance with the contract. Refer to page 183 of this Note for a further discussion of the valuation of lending-related commitments.

Note 3 – Fair value option

The fair value option provides an option to elect fair value for selected financial assets, financial liabilities, unrecognized firm commitments, and written loan commitments.

The Firm has elected to measure certain instruments at fair value for several reasons including to mitigate income statement volatility caused by the differences between the measurement basis of elected instruments (e.g., certain instruments that otherwise would be accounted for on an accrual basis) and the associated risk management arrangements that are accounted for on a fair value basis, as well as to better reflect those instruments that are managed on a fair value basis.

The Firm's election of fair value includes the following instruments:

- Loans purchased or originated as part of securitization warehousing activity, subject to bifurcation accounting, or managed on a fair value basis, including lending-related commitments
- Certain securities financing agreements
- Owned beneficial interests in securitized financial assets that contain embedded credit derivatives, which would otherwise be required to be separately accounted for as a derivative instrument
- Structured notes and other hybrid instruments, which are predominantly financial instruments that contain embedded derivatives, that are issued or transacted as part of client-driven activities
- Certain long-term beneficial interests issued by CIB's consolidated securitization trusts where the underlying assets are carried at fair value

Changes in fair value under the fair value option election

The following table presents the changes in fair value included in the Consolidated statements of income for the years ended December 31, 2024, 2023 and 2022, for items for which the fair value option was elected. The profit and loss information presented below only includes the financial instruments that were elected to be measured at fair value; related risk management instruments, which are required to be measured at fair value, are not included in the table.

December 31, (in millions)	2024			2023			2022		
	Principal transactions	All other income	Total changes in fair value recorded[e]	Principal transactions	All other income	Total changes in fair value recorded[e]	Principal transactions	All other income	Total changes in fair value recorded[e]
Federal funds sold and securities purchased under resale agreements	$ 144	$ —	$ 144	$ 300	$ —	$ 300	$ (384)	$ —	$ (384)
Securities borrowed	347	—	347	164	—	164	(499)	—	(499)
Trading assets:									
Debt and equity instruments, excluding loans	7,205	—	7,205	3,656	—	3,656	(1,703)	—	(1,703)
Loans reported as trading assets:									
Changes in instrument-specific credit risk	346	—	346	248	—	248	(136)	—	(136)
Other changes in fair value	9	10 [c]	19	3	5 [c]	8	(59)	—	(59)
Loans:									
Changes in instrument-specific credit risk	517	(6) [c]	511	322	(4) [c]	318	(242)	21 [c]	(221)
Other changes in fair value	75	371 [c]	446	427	216 [c]	643	(1,421)	(794) [c]	(2,215)
Other assets	63	—	63	282	(4) [d]	278	39	(6) [d]	33
Deposits[a]	(3,398)	—	(3,398)	(2,582)	—	(2,582)	901	—	901
Federal funds purchased and securities loaned or sold under repurchase agreements	(12)	—	(12)	(121)	—	(121)	181	—	181
Short-term borrowings[a]	(922)	—	(922)	(567)	—	(567)	473	—	473
Trading liabilities	(1)	—	(1)	(24)	—	(24)	43	—	43
Beneficial interests issued by consolidated VIEs	—	—	—	—	—	—	(1)	—	(1)
Other liabilities	(11)	—	(11)	(16)	—	(16)	(11)	—	(11)
Long-term debt[a][b]	(2,711)	(6) [c][d]	(2,717)	(5,875)	(78) [c][d]	(5,953)	8,990	98 [c][d]	9,088

(a) Unrealized gains/(losses) due to instrument-specific credit risk (DVA) for liabilities for which the fair value option has been elected are recorded in OCI, while realized gains/(losses) are recorded in principal transactions revenue. Realized gains/(losses) due to instrument-specific credit risk recorded in principal transactions revenue were not material for the years ended December 31, 2024, 2023 and 2022.
(b) Long-term debt measured at fair value predominantly relates to structured notes. Although the risk associated with the structured notes is actively managed, the gains/(losses) reported in this table do not include the income statement impact of the risk management instruments used to manage such risk.
(c) Reported in mortgage fees and related income.
(d) Reported in other income.
(e) Changes in fair value exclude contractual interest, which is included in interest income and interest expense for all instruments other than certain hybrid financial instruments in CIB. Refer to Note 7 for further information regarding interest income and interest expense.

Determination of instrument-specific credit risk for items for which the fair value option was elected

The following describes how the gains and losses that are attributable to changes in instrument-specific credit risk, were determined.

- Loans and lending-related commitments: For floating-rate instruments, all changes in value are attributed to instrument-specific credit risk. For fixed-rate instruments, an allocation of the changes in value for the period is made between those changes in value that are interest rate-related and changes in value that are credit-related. Allocations are generally based on an analysis of borrower-specific credit spread and recovery information, where available, or benchmarking to similar entities or industries.
- Long-term debt: Changes in value attributable to instrument-specific credit risk were derived principally from observable changes in the Firm's credit spread as observed in the bond market.
- Securities financing agreements: Generally, for these types of agreements, there is a requirement that collateral be maintained with a market value equal to or in excess of the principal amount loaned; as a result, there would be no adjustment or an immaterial adjustment for instrument-specific credit risk related to these agreements.

Difference between aggregate fair value and aggregate remaining contractual principal balance outstanding

The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of December 31, 2024 and 2023, for loans, long-term debt and long-term beneficial interests for which the fair value option has been elected.

	2024			2023		
December 31, (in millions)	Contractual principal outstanding	Fair value	Fair value over/(under) contractual principal outstanding	Contractual principal outstanding	Fair value	Fair value over/(under) contractual principal outstanding
Loans						
Nonaccrual loans						
Loans reported as trading assets	**$ 3,429**	**$ 464**	**$ (2,965)**	$ 2,987	$ 588	$ (2,399)
Loans	**1,711**	**1,492**	**(219)**	838	732	(106)
Subtotal	**5,140**	**1,956**	**(3,184)**	3,825	1,320	(2,505)
90 or more days past due and government guaranteed						
Loans[(a)]	**50**	**45**	**(5)**	65	59	(6)
All other performing loans[(b)]						
Loans reported as trading assets	**12,171**	**10,852**	**(1,319)**	9,547	7,968	(1,579)
Loans[(c)]	**40,342**	**39,813**	**(529)**	38,948	38,060	(888)
Subtotal	**52,513**	**50,665**	**(1,848)**	48,495	46,028	(2,467)
Total loans	**$ 57,703**	**$ 52,666**	**$ (5,037)**	$ 52,385	$ 47,407	$ (4,978)
Long-term debt						
Principal-protected debt	**$ 57,414** [(e)]	**$ 47,780**	**$ (9,634)**	$ 47,768 [(e)]	$ 38,882	$ (8,886)
Nonprincipal-protected debt[(d)]	**NA**	**53,000**	**NA**	NA	49,042	NA
Total long-term debt	**NA**	**$ 100,780**	**NA**	NA	$ 87,924	NA
Long-term beneficial interests						
Nonprincipal-protected debt[(d)]	**NA**	**$ 1**	**NA**	NA	$ 1	NA
Total long-term beneficial interests	**NA**	**$ 1**	**NA**	NA	$ 1	NA

(a) These balances are excluded from nonaccrual loans as the loans are insured and/or guaranteed by U.S. government agencies.
(b) There were no performing loans that were ninety days or more past due as of December 31, 2024 and 2023.
(c) Includes loans insured and/or guaranteed by U.S. government agencies less than 90 days past due.
(d) Remaining contractual principal is not applicable to nonprincipal-protected structured notes and long-term beneficial interests. Unlike principal-protected structured notes and long-term beneficial interests, for which the Firm is obligated to return a stated amount of principal at maturity, nonprincipal-protected structured notes and long-term beneficial interests do not obligate the Firm to return a stated amount of principal at maturity, but for structured notes to return an amount based on the performance of an underlying variable or derivative feature embedded in the note. However, investors are exposed to the credit risk of the Firm as issuer for both nonprincipal-protected and principal-protected notes.
(e) Where the Firm issues principal-protected zero-coupon or discount notes, the balance reflects the contractual principal payment at maturity or, if applicable, the contractual principal payment at the Firm's next call date.

At December 31, 2024 and 2023, the contractual amount of lending-related commitments for which the fair value option was elected was $12.2 billion and $9.7 billion, respectively, with a corresponding fair value of $50 million and $97 million, respectively. Refer to Note 28 for further information regarding off-balance sheet lending-related financial instruments.

Structured note products by balance sheet classification and risk component

The following table presents the fair value of structured notes, by balance sheet classification and the primary risk type.

	December 31, 2024				December 31, 2023			
(in millions)	Long-term debt	Short-term borrowings	Deposits	Total	Long-term debt	Short-term borrowings	Deposits	Total
Risk exposure								
Interest rate	**$ 46,220**	**$ 1,065**	**$ 28,871**	**$ 76,156**	$ 38,604	$ 654	$ 74,526	$ 113,784

Total structured notes	**$ 100,222**	**$ 11,308**	**$ 32,274**	**$ 143,804**	$ 87,200	$ 7,439	$ 77,619	$ 172,258

(a) Excludes deposits linked to precious metals for which the fair value option has not been elected of $869 million and $627 million for the years ended December 31, 2024 and 2023, respectively.

Note 4 – Credit risk concentrations

Concentrations of credit risk arise when a number of clients, counterparties or customers are engaged in similar business activities or activities in the same geographic region, or when they have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions.

JPMorganChase regularly monitors various segments of its credit portfolios to assess potential credit risk concentrations and to obtain additional collateral when deemed necessary and permitted under the Firm's agreements. Senior management is significantly involved in the credit approval and review process, and risk levels are adjusted as needed to reflect the Firm's risk appetite.

In the Firm's consumer portfolio, concentrations are managed primarily by product and by U.S. geographic region, with a key focus on trends and concentrations at the portfolio level, where potential credit risk concentrations can be remedied through changes in underwriting policies and portfolio guidelines. Refer to Note 12 for additional information on the geographic composition of the Firm's consumer loan portfolios. In the wholesale portfolio, credit risk concentrations are evaluated primarily by industry and monitored regularly on both an aggregate portfolio level and on an individual client or counterparty basis.

The Firm's wholesale exposure is managed through loan syndications and participations, loan sales, securitizations, credit derivatives, master netting agreements, collateral and other risk-reduction techniques. Refer to Note 12 for additional information on loans.

The Firm does not believe that its exposure to any particular loan product or industry segment results in a significant concentration of credit risk.

Terms of loan products and collateral coverage are included in the Firm's assessment when extending credit and establishing its allowance for credit losses. Refer to Note 13 for additional information on the allowance for credit losses.

The table below presents both on–balance sheet and off–balance sheet consumer and wholesale credit exposure by the Firm's three credit portfolio segments as of December 31, 2024 and 2023. The wholesale industry of risk category is generally based on the client or counterparty's primary business activity.

(a) Also includes commercial card lending-related commitments primarily in CIB.
(b) The industry rankings presented in the table as of December 31, 2023, are based on the industry rankings of the corresponding exposures at December 31, 2024, not actual rankings of such exposures at December 31, 2023.
(c) Individuals and Individual Entities predominantly consists of Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB, and includes exposure to personal investment companies and personal and testamentary trusts.
(d) In addition to the credit risk exposure to states and municipal governments (both U.S. and non-U.S.) at December 31, 2024 and 2023, noted above, the Firm held: $6.1 billion and $5.9 billion, respectively, of trading assets; $17.9 billion and $21.4 billion, respectively, of AFS securities; and $9.3 billion and $9.9 billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Note 2 and Note 10 for further information.
(e) All other includes: SPEs and Private education and civic organizations, representing approximately 94% and 6%, respectively, at both December 31, 2024 and 2023. Refer to Note 14 for more information on exposures to SPEs.
(f) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients' brokerage accounts (including cash on deposit, and primarily liquid and readily marketable debt or equity securities).
(g) Excludes cash placed with banks of $459.2 billion and $614.1 billion, at December 31, 2024 and 2023, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks.
(h) Credit exposure is net of risk participations and excludes the benefit of credit derivatives used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables.
(i) Represents lending-related financial instruments.

Note 5 – Derivative instruments

Derivative contracts derive their value from underlying asset prices, indices, reference rates, other inputs or a combination of these factors and may expose counterparties to risks and rewards of an underlying asset or liability without having to initially invest in, own or exchange the asset or liability. JPMorganChase makes markets in derivatives for clients and also uses derivatives to hedge or manage its own risk exposures. Predominantly all of the Firm's derivatives are entered into for market-making or risk management purposes.

Market-making derivatives
The majority of the Firm's derivatives are entered into for market-making purposes. Clients use derivatives to mitigate or modify interest rate, credit, foreign exchange, equity and commodity risks. The Firm actively manages the risks from its exposure to these derivatives by entering into other derivative contracts or by purchasing or selling other financial instruments that partially or fully offset the exposure from client derivatives.

Risk management derivatives
The Firm manages certain market and credit risk exposures using derivative instruments, including derivatives in hedge accounting relationships and other derivatives that are used to manage risks associated with specified assets and liabilities.

The Firm generally uses interest rate derivatives to manage the risk associated with changes in interest rates. Fixed-rate assets and liabilities appreciate or depreciate in market value as interest rates change. Similarly, interest income and expense increase or decrease as a result of variable-rate assets and liabilities resetting to current market rates, and as a result of the repayment and subsequent origination or issuance of fixed-rate assets and liabilities at current market rates. Gains and losses on the derivative instruments related to these assets and liabilities are expected to substantially offset this variability.

Foreign currency derivatives are used to manage the foreign exchange risk associated with certain foreign currency–denominated (i.e., non-U.S. dollar) assets and liabilities and forecasted transactions, as well as the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. As a result of fluctuations in foreign currencies, the U.S. dollar–equivalent values of the foreign currency–denominated assets and liabilities or the forecasted revenues or expenses increase or decrease. Gains or losses on the derivative instruments related to these foreign currency–denominated assets or liabilities, or forecasted transactions, are expected to substantially offset this variability.

Commodities derivatives are used to manage the price risk of certain commodities inventories. Gains or losses on these derivative instruments are expected to substantially offset the depreciation or appreciation of the related inventory.

Credit derivatives are used to manage the counterparty credit risk associated with loans and lending-related commitments. Credit derivatives compensate the purchaser when the entity referenced in the contract experiences a credit event, such as bankruptcy or a failure to pay an obligation when due. Credit derivatives primarily consist of CDS. Refer to the Credit derivatives section on pages 222–224 of this Note for a further discussion of credit derivatives.

Refer to the risk management derivatives gains and losses table on page 221 and the hedge accounting gains and losses tables on pages 218–221 of this Note for more information about risk management derivatives.

Derivative counterparties and settlement types
The Firm enters into OTC derivatives, which are negotiated and settled bilaterally with the derivative counterparty. The Firm also enters into, as principal, certain ETD such as futures and options, and OTC-cleared derivative contracts with CCPs. ETD contracts are generally standardized contracts traded on an exchange and cleared by the CCP, which is the Firm's counterparty from the inception of the transactions. OTC-cleared derivatives are traded on a bilateral basis and then novated to the CCP for clearing.

Derivative clearing services
The Firm provides clearing services for clients in which the Firm acts as a clearing member at certain exchanges and clearing houses. The Firm does not reflect the clients' derivative contracts in its Consolidated Financial Statements. Refer to Note 28 for further information on the Firm's clearing services.

Accounting for derivatives
All free-standing derivatives that the Firm executes for its own account are required to be recorded on the Consolidated balance sheets at fair value.

As permitted under U.S. GAAP, the Firm nets derivative assets and liabilities, and the related cash collateral receivables and payables, when a legally enforceable master netting agreement exists between the Firm and the derivative counterparty. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. The accounting for changes in value of a derivative depends on whether or not the transaction has been designated and qualifies for hedge accounting. Derivatives that are not designated as hedges are reported and measured at fair value through earnings. The tabular disclosures on pages 213–221 of this Note provide additional information on the amount of, and reporting for, derivative assets, liabilities, gains and losses. Refer to Notes 2 and 3 for a further discussion of derivatives embedded in structured notes.

Derivatives designated as hedges

The Firm applies hedge accounting to certain derivatives executed for risk management purposes – generally interest rate, foreign exchange and commodity derivatives. However, JPMorganChase does not seek to apply hedge accounting to all of the derivatives associated with the Firm's risk management activities. For example, the Firm does not apply hedge accounting to purchased CDS used to manage the credit risk of loans and lending-related commitments, because of the difficulties in qualifying such contracts as hedges. For the same reason, the Firm does not apply hedge accounting to certain interest rate, foreign exchange, and commodity derivatives used for risk management purposes.

To qualify for hedge accounting, a derivative must be highly effective at reducing the risk associated with the exposure being hedged. In addition, for a derivative to be designated as a hedge, the risk management objective and strategy must be documented. Hedge documentation must identify the derivative hedging instrument, the asset or liability or forecasted transaction and type of risk to be hedged, and how the effectiveness of the derivative is assessed prospectively and retrospectively. To assess effectiveness, the Firm uses statistical methods such as regression analysis, nonstatistical methods such as dollar-value comparisons of the change in the fair value of the derivative to the change in the fair value or cash flows of the hedged item, and qualitative comparisons of critical terms and the evaluation of any changes in those terms. The extent to which a derivative has been, and is expected to continue to be, highly effective at offsetting changes in the fair value or cash flows of the hedged item must be assessed and documented at least quarterly. If it is determined that a derivative is not highly effective at hedging the designated exposure, hedge accounting is discontinued.

There are three types of hedge accounting designations: fair value hedges, cash flow hedges and net investment hedges. JPMorganChase uses fair value hedges primarily to hedge fixed-rate long-term debt, AFS securities and certain commodities inventories. For qualifying fair value hedges, the changes in the fair value of the derivative, and in the value of the hedged item for the risk being hedged, are recognized in earnings. Certain amounts excluded from the assessment of effectiveness are recorded in OCI and recognized in earnings over the life of the derivative. If the hedge relationship is terminated, then the adjustment to the hedged item continues to be reported as part of the basis of the hedged item and, for interest-bearing financial instruments, is amortized to earnings as a yield adjustment. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item – primarily net interest income and principal transactions revenue.

The Firm employs the portfolio layer method to manage the interest rate risk of portfolios of fixed-rate assets. Throughout the life of the open hedge, basis adjustments are maintained at the portfolio level and are only allocated to individual assets under certain circumstances. These include instances where the portfolio amount falls below the hedged layer amounts, or in cases of voluntary de-designation.

JPMorganChase uses cash flow hedges primarily to hedge the exposure to variability in forecasted cash flows from floating-rate assets and liabilities and foreign currency–denominated revenue and expense. For qualifying cash flow hedges, changes in the fair value of the derivative are recorded in OCI and recognized in earnings as the hedged item affects earnings. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item – primarily noninterest revenue, net interest income and compensation expense. If the hedge relationship is terminated, then the change in value of the derivative recorded in AOCI is recognized in earnings when the cash flows that were hedged affect earnings. For hedge relationships that are discontinued because a forecasted transaction is expected to not occur according to the original hedge forecast, any related derivative values recorded in AOCI are immediately recognized in earnings.

JPMorganChase uses net investment hedges to protect the value of the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. For qualifying net investment hedges, changes in the fair value of the derivatives due to changes in spot foreign exchange rates are recorded in OCI as translation adjustments. Amounts excluded from the assessment of effectiveness are recorded directly in earnings.

The following table outlines the Firm's primary uses of derivatives and the related hedge accounting designation or disclosure category.

Type of Derivative	Use of Derivative	Designation and disclosure	Affected segment or unit	Page reference
Manage specifically identified risk exposures in qualifying hedge accounting relationships:				
• Interest rate	Hedge fixed rate assets and liabilities	Fair value hedge	Corporate	218-219
• Interest rate	Hedge floating-rate assets and liabilities	Cash flow hedge	Corporate	220
• Foreign exchange	Hedge foreign currency-denominated assets and liabilities	Fair value hedge	Corporate	218-219
• Foreign exchange	Hedge foreign currency-denominated forecasted revenue and expense	Cash flow hedge	Corporate	220
• Foreign exchange	Hedge the value of the Firm's investments in non-U.S. dollar functional currency entities	Net investment hedge	Corporate	221
• Commodity	Hedge commodity inventory	Fair value hedge	CIB, AWM	218-219
Manage specifically identified risk exposures not designated in qualifying hedge accounting relationships:				
• Interest rate	Manage the risk associated with mortgage commitments, warehouse loans and MSRs	Specified risk management	CCB	221
• Credit	Manage the credit risk associated with wholesale lending exposures	Specified risk management	CIB, AWM	221
• Interest rate and foreign exchange	Manage the risk associated with certain other specified assets and liabilities	Specified risk management	Corporate, CIB	221
Market-making derivatives and other activities:				
• Various	Market-making and related risk management	Market-making and other	CIB	221
• Various	Other derivatives	Market-making and other	CIB, AWM, Corporate	221

Notional amount of derivative contracts

The following table summarizes the notional amount of free-standing derivative contracts outstanding as of December 31, 2024 and 2023.

	Notional amounts[(b)]	
December 31, (in billions)	**2024**	2023
Interest rate contracts		
Swaps	**$ 20,437**	$ 23,251
Futures and forwards	**3,067**	2,690
Written options	**3,067**	3,370
Purchased options	**3,089**	3,362
Total interest rate contracts	**29,660**	32,673
Credit derivatives[(a)]	**1,191**	1,045
Foreign exchange contracts		
Cross-currency swaps	**4,509**	4,721
Spot, futures and forwards	**7,005**	6,957
Written options	**1,015**	830
Purchased options	**984**	798
Total foreign exchange contracts	**13,513**	13,306
Equity contracts		
Swaps	**850**	639
Futures and forwards	**206**	157
Written options	**914**	778
Purchased options	**788**	698
Total equity contracts	**2,758**	2,272
Commodity contracts		
Swaps	**148**	115
Spot, futures and forwards	**191**	157
Written options	**137**	130
Purchased options	**125**	115
Total commodity contracts	**601**	517
Total derivative notional amounts	**$ 47,723**	$ 49,813

(a) Refer to the Credit derivatives discussion on pages 222–224 for more information on volumes and types of credit derivative contracts.
(b) Represents the sum of gross long and gross short third-party notional derivative contracts.

While the notional amounts disclosed above give an indication of the volume of the Firm's derivatives activity, the notional amounts significantly exceed, in the Firm's view, the possible losses that could arise from such transactions. For most derivative contracts, the notional amount is not exchanged; it is simply a reference amount used to calculate payments.

Impact of derivatives on the Consolidated balance sheets

The following table summarizes information on derivative receivables and payables (before and after netting adjustments) that are reflected on the Firm's Consolidated balance sheets as of December 31, 2024 and 2023, by accounting designation (e.g., whether the derivatives were designated in qualifying hedge accounting relationships or not) and contract type.

(a) Balances exclude structured notes for which the fair value option has been elected. Refer to Note 3 for further information.
(b) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral receivables and payables when a legally enforceable master netting agreement exists.

Derivatives netting

The following tables present, as of December 31, 2024 and 2023, gross and net derivative receivables and payables by contract and settlement type. Derivative receivables and payables, as well as the related cash collateral from the same counterparty, have been netted on the Consolidated balance sheets where the Firm has obtained an appropriate legal opinion with respect to the master netting agreement. Where such a legal opinion has not been either sought or obtained, amounts are not eligible for netting on the Consolidated balance sheets, and those derivative receivables and payables are shown separately in the tables.

In addition to the cash collateral received and transferred that is presented on a net basis with derivative receivables and payables, the Firm receives and transfers additional collateral (financial instruments and cash). These amounts mitigate counterparty credit risk associated with the Firm's derivative instruments, but are not eligible for net presentation:

- collateral that consists of liquid securities and other cash collateral held at third-party custodians, which are shown separately as "Collateral not nettable on the Consolidated balance sheets" in the tables, up to the fair value exposure amount. For the purpose of this disclosure, the definition of liquid securities is consistent with the definition of high quality liquid assets as defined in the LCR rule;
- the amount of collateral held or transferred that exceeds the fair value exposure at the individual counterparty level, as of the date presented, which is excluded from the tables; and
- collateral held or transferred that relates to derivative receivables or payables where an appropriate legal opinion has not been either sought or obtained with respect to the master netting agreement, which is excluded from the tables.

Collateral not nettable on the Consolidated balance sheets[(b)(c)]			**(10,163)**			(4,547)
Net amounts			**$ 29,498**			$ 36,300

(a) Exchange-traded derivative balances that relate to futures contracts are settled daily.
(b) Includes liquid securities and other cash collateral held at third-party custodians related to derivative instruments where an appropriate legal opinion has been obtained. For some counterparties, the collateral amounts of financial instruments may exceed the derivative receivables and derivative payables balances. Where this is the case, the total amount reported is limited to the net derivative receivables and net derivative payables balances with that counterparty.
(c) Derivative collateral relates only to OTC and OTC-cleared derivative instruments.
(d) Net derivatives receivable included cash collateral netted of $51.9 billion and $48.3 billion at December 31, 2024 and 2023, respectively. Net derivatives payable included cash collateral netted of $60.8 billion and $70.0 billion at December 31, 2024 and 2023, respectively. Derivative cash collateral relates to OTC and OTC-cleared derivative instruments.

Liquidity risk and credit-related contingent features

In addition to the specific market risks introduced by each derivative contract type, derivatives expose JPMorganChase to credit risk — the risk that derivative counterparties may fail to meet their payment obligations under the derivative contracts and the collateral, if any, held by the Firm proves to be of insufficient value to cover the payment obligation. It is the policy of JPMorganChase to actively pursue, where possible, the use of legally enforceable master netting arrangements and collateral agreements to mitigate derivative counterparty credit risk inherent in derivative receivables.

While derivative receivables expose the Firm to credit risk, derivative payables expose the Firm to liquidity risk, as the derivative contracts typically require the Firm to post cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties' favor or upon specified downgrades in the Firm's and its subsidiaries' respective credit ratings. Certain derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Firm or the counterparty, at the fair value of the derivative contracts. The following table shows the aggregate fair value of net derivative payables related to OTC and OTC-cleared derivatives that contain contingent collateral or termination features that may be triggered upon a ratings downgrade, and the associated collateral the Firm has posted in the normal course of business, at December 31, 2024 and 2023.

OTC and OTC-cleared derivative payables containing downgrade triggers

(in millions)	**December 31, 2024**	December 31, 2023
Aggregate fair value of net derivative payables	**$ 15,371**	$ 14,655
Collateral posted	**15,204**	14,673

The following table shows the impact of a single-notch and two-notch downgrade of the long-term issuer ratings of JPMorgan Chase & Co. and its subsidiaries, predominantly JPMorgan Chase Bank, N.A., at December 31, 2024 and 2023, related to OTC and OTC-cleared derivative contracts with contingent collateral or termination features that may be triggered upon a ratings downgrade. Derivatives contracts generally require additional collateral to be posted or terminations to be triggered when the predefined rating threshold is breached. A downgrade by a single rating agency that does not result in a rating lower than a preexisting corresponding rating provided by another major rating agency will generally not result in additional collateral (except in certain instances in which additional initial margin may be required upon a ratings downgrade), nor in termination payment requirements. The liquidity impact in the table is calculated based upon a downgrade below the lowest current rating of the rating agencies referred to in the derivative contract.

Liquidity impact of downgrade triggers on OTC and OTC-cleared derivatives

	December 31, 2024		December 31, 2023	
(in millions)	Single-notch downgrade	Two-notch downgrade	Single-notch downgrade	Two-notch downgrade
Amount of additional collateral to be posted upon downgrade[(a)]	**$ 119**	**$ 1,205**	$ 75	$ 1,153
Amount required to settle contracts with termination triggers upon downgrade[(b)]	**78**	**458**	93	592

(a) Includes the additional collateral to be posted for initial margin.
(b) Amounts represent fair values of derivative payables, and do not reflect collateral posted.

Derivatives executed in contemplation of a sale of the underlying financial asset

In certain instances the Firm enters into transactions in which it transfers financial assets but maintains the economic exposure to the transferred assets by entering into a derivative with the same counterparty in contemplation of the initial transfer. The Firm generally accounts for such transfers as collateralized financing transactions as described in Note 11, but in limited circumstances they may qualify to be accounted for as a sale and a derivative under U.S. GAAP. The amount of such transfers accounted for as a sale where the associated derivative was outstanding was not material at December 31, 2024 and 2023.

Impact of derivatives on the Consolidated statements of income

The following tables provide information related to gains and losses recorded on derivatives based on their hedge accounting designation or purpose.

Fair value hedge gains and losses

The following tables present derivative instruments, by contract type, used in fair value hedge accounting relationships, as well as pre-tax gains/(losses) recorded on such derivatives and the related hedged items for the years ended December 31, 2024, 2023 and 2022, respectively. The Firm includes gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the related hedged item.

	Gains/(losses) recorded in income			Income statement impact of excluded components[e]		OCI impact

Total	$ (15,563)	$ 15,400	$ (163)	$ (528)	$ (108)	$ 130

(a) Primarily consists of hedges of the benchmark (e.g., Secured Overnight Financing Rate ("SOFR")) interest rate risk of fixed-rate long-term debt and AFS securities. Gains and losses were recorded in net interest income.
(b) Includes the amortization of income/expense associated with the inception hedge accounting adjustment applied to the hedged item. Excludes the accrual of interest on interest rate swaps and the related hedged items.
(c) Primarily consists of hedges of the foreign currency risk of long-term debt and AFS securities for changes in spot foreign currency rates. Gains and losses related to the derivatives and the hedged items due to changes in foreign currency rates and the income statement impact of excluded components were recorded primarily in principal transactions revenue and net interest income.
(d) Consists of overall fair value hedges of physical commodities inventories that are generally carried at the lower of cost or net realizable value (net realizable value approximates fair value). Gains and losses were recorded in principal transactions revenue.
(e) The assessment of hedge effectiveness excludes certain components of the changes in fair values of the derivatives and hedged items such as forward points on foreign exchange forward contracts, time values and cross-currency basis spreads. Excluded components may impact earnings either through amortization of the initial amount over the life of the derivative or through fair value changes recognized in the current period.
(f) Represents the change in value of amounts excluded from the assessment of effectiveness under the amortization approach, predominantly cross-currency basis spreads. The amount excluded at inception of the hedge is recognized in earnings over the life of the derivative.

As of December 31, 2024 and 2023, the following amounts were recorded on the Consolidated balance sheets related to certain cumulative fair value hedge basis adjustments that are expected to reverse through the income statement in future periods as an adjustment to yield.

December 31, 2024 (in millions)	Carrying amount of the hedged items[a][b]		Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items:[d] Active hedging relationships	Discontinued hedging relationships[e]	Total
Assets					
Investment securities - AFS	**$ 203,141**	(c)	**$ (1,675)**	**$ (1,959)**	**$ (3,634)**
Liabilities					
Long-term debt	**$ 211,288**		**$ (3,711)**	**$ (9,332)**	**$ (13,043)**
Beneficial interests issued by consolidated VIEs	**$ 5,312**		**$ (30)**	**$ (5)**	**$ (35)**

December 31, 2023 (in millions)	Carrying amount of the hedged items[a][b]		Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items:[d] Active hedging relationships	Discontinued hedging relationships[e]	Total
Assets					
Investment securities - AFS	$ 151,752	(c)	$ 549	$ (2,010)	$ (1,461)
Liabilities					
Long-term debt	$ 195,455		$ (2,042)	$ (9,727)	$ (11,769)
Beneficial interests issued by consolidated VIEs	$ —		$ —	$ —	—

(a) Excludes physical commodities with a carrying value of $6.2 billion and $5.6 billion at December 31, 2024 and 2023, respectively, to which the Firm applies fair value hedge accounting. As a result of the application of hedge accounting, these inventories are carried at fair value, thus recognizing unrealized gains and losses in current periods. Since the Firm exits these positions at fair value, there is no incremental impact to net income in future periods.

(b) Excludes hedged items where only foreign currency risk is the designated hedged risk, as basis adjustments related to foreign currency hedges will not reverse through the income statement in future periods. At December 31, 2024 and 2023, the carrying amount excluded for AFS securities was $28.7 billion and $19.3 billion, respectively. At December 31, 2024 and 2023, the carrying amount excluded for long-term debt was $518 million and zero, respectively.

(c) Carrying amount represents the amortized cost, net of allowance if applicable. At December 31, 2024 and December 31, 2023, the amortized cost of the portfolio layer method closed portfolios was $72.8 billion and $83.9 billion, of which $41.2 billion and $68.0 billion was designated as hedged, respectively. The amount designated as hedged is the sum of the notional amounts of all outstanding layers in each portfolio, which includes both spot starting and forward starting layers. At December 31, 2024 and December 31, 2023, the cumulative amount of basis adjustments was $(1.7) billion and $(165) million, which is comprised of $(1.2) billion and $73 million for active hedging relationships, and $(566) million and $(238) million for discontinued hedging relationships, respectively. Refer to Note 10 for additional information.

(d) Positive (negative) amounts related to assets represent cumulative fair value hedge basis adjustments that will reduce (increase) net interest income in future periods. Positive (negative) amounts related to liabilities represent cumulative fair value hedge basis adjustments that will increase (reduce) net interest income in future periods.

(e) Represents basis adjustments existing on the balance sheet date associated with hedged items that have been de-designated from qualifying fair value hedging relationships.

Cash flow hedge gains and losses

The following tables present derivative instruments, by contract type, used in cash flow hedge accounting relationships, and the pre-tax gains/(losses) recorded on such derivatives, for the years ended December 31, 2024, 2023 and 2022, respectively. The Firm includes the gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the change in cash flows on the related hedged item.

Year ended December 31, 2024 (in millions)	Derivatives gains/(losses) recorded in income and other comprehensive income/(loss)		
	Amounts reclassified from AOCI to income	Amounts recorded in OCI	Total change in OCI for period
Contract type			
Interest rate[(a)]	**$ (2,668)**	**$ (3,603)**	**$ (935)**
Foreign exchange[(b)]	**89**	**(139)**	**(228)**
Total	**$ (2,579)**	**$ (3,742)**	**$ (1,163)**

Year ended December 31, 2023 (in millions)	Derivatives gains/(losses) recorded in income and other comprehensive income/(loss)		
	Amounts reclassified from AOCI to income	Amounts recorded in OCI	Total change in OCI for period
Contract type			
Interest rate[(a)]	$ (1,839)	$ 274	$ 2,113
Foreign exchange[(b)]	64	209	145
Total	$ (1,775)	$ 483	$ 2,258

Year ended December 31, 2022 (in millions)	Derivatives gains/(losses) recorded in income and other comprehensive income/(loss)		
	Amounts reclassified from AOCI to income	Amounts recorded in OCI	Total change in OCI for period
Contract type			
Interest rate[(a)]	$ (153)	$ (7,131)	$ (6,978)
Foreign exchange[(b)]	(267)	(342)	(75)
Total	$ (420)	$ (7,473)	$ (7,053)

(a) Primarily consists of hedges of SOFR-indexed floating-rate assets. Gains and losses were recorded in net interest income.

(b) Primarily consists of hedges of the foreign currency risk of non-U.S. dollar-denominated revenue and expense. The income statement classification of gains and losses follows the hedged item – primarily noninterest revenue and compensation expense.

The Firm did not experience any forecasted transactions that failed to occur for the years ended 2024, 2023 and 2022.

Over the next 12 months, the Firm expects that approximately $(1.6) billion (after-tax) of net losses recorded in AOCI at December 31, 2024, related to cash flow hedges will be recognized in income. For cash flow hedges that have been terminated, the maximum length of time over which the derivative results recorded in AOCI will be recognized in earnings is approximately seven years, corresponding to the timing of the originally hedged forecasted cash flows. For open cash flow hedges, the maximum length of time over which forecasted transactions are hedged is approximately seven years. The Firm's longer-dated forecasted transactions relate to core lending and borrowing activities.

Net investment hedge gains and losses

The following table presents hedging instruments, by contract type, that were used in net investment hedge accounting relationships, and the pre-tax gains/(losses) recorded on such instruments for the years ended December 31, 2024, 2023 and 2022.

Year ended December 31, (in millions)	**2024**		2023		2022	
	Amounts recorded in income[(a)(b)]	**Amounts recorded in OCI**	Amounts recorded in income[(a)(b)]	Amounts recorded in OCI	Amounts recorded in income[(a)(b)]	Amounts recorded in OCI
Foreign exchange derivatives	**$467**	**$4,411**	$384	$(1,732)	$(123)	$3,591

(a) Certain components of hedging derivatives are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on foreign exchange forward contracts. The Firm elects to record changes in fair value of these amounts directly in other income.

(b) Excludes amounts reclassified from AOCI to income on the sale or liquidation of hedged entities. During the year ended December 31, 2024, the Firm reclassified a net pre-tax gain of $89 million to other income/expense. During the year ended December 31, 2023, the Firm reclassified a net pre-tax loss of $(35) million to other revenue including the impact of the acquisition of CIFM. During the year ended December 31, 2022, the Firm reclassified net pre-tax gains of $38 million to other income/expense related to the liquidation of certain legal entities. Refer to Note 24 for further information.

Gains and losses on derivatives used for specified risk management purposes

The following table presents pre-tax gains/(losses) recorded on a limited number of derivatives, not designated in hedge accounting relationships, that are used to manage risks associated with certain specified assets and liabilities, including certain risks arising from mortgage commitments, warehouse loans, MSRs, wholesale lending exposures, and foreign currency denominated assets and liabilities.

Year ended December 31, (in millions)	Derivatives gains/(losses) recorded in income		
	2024	2023	2022
Contract type			
Interest rate[(a)]	**$ (425)**	$ (135)	$ (827)
Credit[(b)]	**(604)**	(441)	51
Foreign exchange[(c)]	**(10)**	(2)	(48)
Total	**$ (1,039)**	$ (578)	$ (824)

(a) Primarily represents interest rate derivatives used to hedge the interest rate risk inherent in mortgage commitments, warehouse loans and MSRs, as well as written commitments to originate warehouse loans. Gains and losses were recorded predominantly in mortgage fees and related income.

(b) Relates to credit derivatives used to mitigate credit risk associated with lending exposures in the Firm's wholesale businesses. These derivatives do not include credit derivatives used to mitigate counterparty credit risk arising from derivative receivables, which is included in gains and losses on derivatives related to market-making activities and other derivatives. Gains and losses were recorded in principal transactions revenue.

(c) Primarily relates to derivatives used to mitigate foreign exchange risk of specified foreign currency-denominated assets and liabilities. Gains and losses were recorded in principal transactions revenue.

Gains and losses on derivatives related to market-making activities and other derivatives

The Firm makes markets in derivatives in order to meet the needs of customers and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. All derivatives not included in the hedge accounting or specified risk management categories above are included in this category. Gains and losses on these derivatives are primarily recorded in principal transactions revenue. Refer to Note 6 for information on principal transactions revenue.

Credit derivatives

Credit derivatives are financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) and which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Credit derivatives expose the protection purchaser to the creditworthiness of the protection seller, as the protection seller is required to make payments under the contract when the reference entity experiences a credit event, such as a bankruptcy, a failure to pay its obligation or a restructuring. The seller of credit protection receives a premium for providing protection but has the risk that the underlying instrument referenced in the contract will be subject to a credit event.

The Firm is both a purchaser and seller of protection in the credit derivatives market and uses these derivatives for two primary purposes. First, in its capacity as a market-maker, the Firm actively manages a portfolio of credit derivatives by purchasing and selling credit protection, predominantly on corporate debt obligations, to meet the needs of customers. Second, as an end-user, the Firm uses credit derivatives to manage credit risk associated with lending exposures (loans and unfunded commitments) in its wholesale and consumer businesses and derivatives counterparty exposures in its wholesale businesses, and to manage the credit risk arising from certain financial instruments in the Firm's market-making businesses. Following is a summary of various types of credit derivatives.

Credit default swaps

Credit derivatives may reference the credit of either a single reference entity ("single-name"), broad-based index or portfolio. The Firm purchases and sells protection on both single- name and index-reference obligations. Single-name CDS and index CDS contracts are either OTC or OTC-cleared derivative contracts. Single-name CDS are used to manage the default risk of a single reference entity, while index CDS contracts are used to manage the credit risk associated with the broader credit markets or credit market segments. Like the S&P 500 and other market indices, a CDS index consists of a portfolio of CDS across many reference entities. New series of CDS indices are periodically established with a new underlying portfolio of reference entities to reflect changes in the credit markets. If one of the reference entities in the index experiences a credit event, then the reference entity that defaulted is removed from the index. CDS can also be referenced against specific portfolios of reference names or against customized exposure levels: for example, to provide protection against the first $1 million of realized credit losses in a $10 million portfolio of exposure. Such structures are commonly known as tranche CDS.

For both single-name CDS contracts and index CDS contracts, upon the occurrence of a credit event, under the terms of a CDS contract neither party to the CDS contract has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value of the reference obligation at settlement of the credit derivative contract, also known as the recovery value. The protection purchaser does not need to hold the debt instrument of the underlying reference entity in order to receive amounts due under the CDS contract when a credit event occurs.

Credit-related notes

A credit-related note is a funded derivative with a credit risk component where the issuer of the credit-related note purchases from the note investor credit protection on a reference entity or an index. Under the contract, the investor pays the issuer the par value of the note at the inception of the transaction, and in return, the issuer makes periodic payments to the investor, based on the credit risk of the referenced entity. The issuer also repays the investor the par value of the note at maturity unless the reference entity (or one of the entities that makes up a reference index) experiences a specified credit event. If a credit event occurs, the issuer is not obligated to repay the par value of the note, but rather, the issuer pays the investor the difference between the par value of the note and the fair value of the defaulted reference obligation at the time of settlement. Neither party to the credit-related note has recourse to the defaulting reference entity.

The following tables present a summary of the notional amounts of credit derivatives and credit-related notes the Firm sold and purchased as of December 31, 2024 and 2023. Upon a credit event, the Firm as a seller of protection would typically pay out a percentage of the full notional amount of net protection sold, as the amount actually required to be paid on the contracts takes into account the recovery value of the reference obligation at the time of settlement. The Firm manages the credit risk on contracts to sell protection by purchasing protection with identical or similar underlying reference entities. Other purchased protection referenced in the following tables includes credit derivatives bought on related, but not identical, reference positions (including indices, portfolio coverage and other reference points) as well as protection purchased by CIB through credit-related notes. Other purchased protection also includes credit protection against certain loans in the retained lending portfolio through the issuance of credit derivatives and credit-related notes.

The Firm does not use notional amounts of credit derivatives as the primary measure of risk management for such derivatives, because the notional amount does not take into account the probability of the occurrence of a credit event, the recovery value of the reference obligation, or related cash instruments and economic hedges, each of which reduces, in the Firm's view, the risks associated with such derivatives.

Total credit derivatives and credit-related notes

December 31, 2024 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings[c]	Net protection (sold)/ purchased[d]	Other protection purchased[e]
Credit derivatives				
Credit default swaps	**$ (450,184)**	**$ 474,554**	**$ 24,370**	**$ 6,858**
Other credit derivatives[a]	**(110,913)**	**137,927**	**27,014**	**10,169**
Total credit derivatives	**(561,097)**	**612,481**	**51,384**	**17,027**
Credit-related notes[b]	**—**	**—**	**—**	**10,471**
Total	**$ (561,097)**	**$ 612,481**	**$ 51,384**	**$ 27,498**

December 31, 2023 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings[c]	Net protection (sold)/ purchased[d]	Other protection purchased[e]
Credit derivatives				
Credit default swaps	$ (450,172)	$ 473,823	$ 23,651	$ 7,517
Other credit derivatives[a]	(38,846)	45,416	6,570	29,206
Total credit derivatives	(489,018)	519,239	30,221	36,723
Credit-related notes[b]	—	—	—	9,788
Total	$ (489,018)	$ 519,239	$ 30,221	$ 46,511

(a) Other credit derivatives predominantly consist of credit swap options and total return swaps.
(b) Predominantly represents Other protection purchased by CIB.
(c) Represents the total notional amount of protection purchased where the underlying reference instrument is identical to the reference instrument on protection sold; the notional amount of protection purchased for each individual identical underlying reference instrument may be greater or lower than the notional amount of protection sold.
(d) Does not take into account the fair value of the reference obligation at the time of settlement, which would generally reduce the amount the seller of protection pays to the buyer of protection in determining settlement value.
(e) Represents protection purchased by the Firm on referenced instruments (single-name, portfolio or index) where the Firm has not sold any protection on the identical reference instrument. Also includes credit protection against certain loans and lending-related commitments in the retained lending portfolio through the issuance of credit derivatives and credit-related notes.

The following tables summarize the notional amounts by the ratings, maturity profile, and total fair value, of credit derivatives as of December 31, 2024 and 2023, where JPMorganChase is the seller of protection. The maturity profile is based on the remaining contractual maturity of the credit derivative contracts. The ratings profile is based on the rating of the reference entity on which the credit derivative contract is based. The ratings and maturity profile of credit derivatives where JPMorganChase is the purchaser of protection are comparable to the profile reflected below.

Protection sold – credit derivatives ratings[(a)]/maturity profile

December 31, 2024 (in millions)	<1 year	1–5 years	>5 years	Total notional amount	Fair value of receivables[(b)]	Fair value of payables[(b)]	Net fair value
Risk rating of reference entity							
Investment-grade	**$ (135,950)**	**$ (277,052)**	**$ (33,379)**	**$ (446,381)**	**$ 4,593**	**$ (904)**	**$ 3,689**
Noninvestment-grade	**(42,149)**	**(70,525)**	**(2,042)**	**(114,716)**	**1,889**	**(1,738)**	**151**
Total	**$ (178,099)**	**$ (347,577)**	**$ (35,421)**	**$ (561,097)**	**$ 6,482**	**$ (2,642)**	**$ 3,840**

December 31, 2023 (in millions)	<1 year	1–5 years	>5 years	Total notional amount	Fair value of receivables[(b)]	Fair value of payables[(b)]	Net fair value
Risk rating of reference entity							
Investment-grade	$ (89,981)	$ (263,834)	$ (29,470)	$ (383,285)	$ 3,659	$ (1,144)	$ 2,515
Noninvestment-grade	(31,419)	(69,515)	(4,799)	(105,733)	2,466	(1,583)	883
Total	$ (121,400)	$ (333,349)	$ (34,269)	$ (489,018)	$ 6,125	$ (2,727)	$ 3,398

(a) The ratings scale is primarily based on external credit ratings defined by S&P and Moody's.
(b) Amounts are shown on a gross basis, before the benefit of legally enforceable master netting agreements including cash collateral netting.

Note 6 – Noninterest revenue and noninterest expense

Noninterest revenue

The Firm records noninterest revenue from certain contracts with customers in investment banking fees, deposit-related fees, asset management fees, commissions and other fees, and components of card income. The related contracts are often terminable on demand and the Firm has no remaining obligation to deliver future services. For arrangements with a fixed term, the Firm may commit to deliver services in the future. Revenue associated with these remaining performance obligations typically depends on the occurrence of future events or underlying asset values, and is not recognized until the outcome of those events or values are known.

Investment banking fees

This revenue category includes debt and equity underwriting and advisory fees. As an underwriter, the Firm helps clients raise capital via public offering and private placement of various types of debt and equity instruments. Underwriting fees are primarily based on the issuance price and quantity of the underlying instruments, and are recognized as revenue typically upon execution of the client's transaction. The Firm also manages and syndicates loan arrangements. Credit arrangement and syndication fees, included within debt underwriting fees, are recorded as revenue after satisfying certain retention, timing and yield criteria.

The Firm also provides advisory services by assisting its clients with mergers and acquisitions, divestitures, restructuring and other complex transactions. Advisory fees are recognized as revenue typically upon execution of the client's transaction.

The following table presents the components of investment banking fees.

Year ended December 31, (in millions)	**2024**	2023	2022
Underwriting			
Equity	**$ 1,687**	$ 1,149	$ 975
Debt	**3,945**	2,610	2,732
Total underwriting	**5,632**	3,759	3,707
Advisory	**3,278**	2,760	2,979
Total investment banking fees	**$ 8,910**	$ 6,519	$ 6,686

Investment banking fees are earned primarily by CIB.

Principal transactions

Principal transactions revenue is driven by many factors, including:

- the bid-offer spread, which is the difference between the price at which a market participant is willing and able to sell an instrument to the Firm and the price at which another market participant is willing and able to buy it from the Firm, and vice versa; and
- realized and unrealized gains and losses on financial instruments and commodities transactions, including those accounted for under the fair value option, primarily used in client-driven market-making activities.
  - Realized gains and losses result from the sale of instruments, closing out or termination of transactions, or interim cash payments.
  - Unrealized gains and losses result from changes in valuation.

In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities, including physical commodities inventories and financial instruments that reference commodities.

Principal transactions revenue also includes realized and unrealized gains and losses related to:

- derivatives designated in qualifying hedge accounting relationships, primarily fair value hedges of commodity and foreign exchange risk;
- derivatives used for specific risk management purposes, primarily to mitigate credit, foreign exchange and interest rate risks.

Refer to Note 5 for further information on the income statement classification of gains and losses from derivatives activities.

In the financial commodity markets, the Firm transacts in OTC derivatives (e.g., swaps, forwards, options) and ETD that reference a wide range of underlying commodities. In the physical commodity markets, the Firm primarily purchases and sells precious and base metals, natural gas, and may hold other commodities inventories under financing and other arrangements with clients.

The following table presents all realized and unrealized gains and losses recorded in principal transactions revenue. This table excludes interest income and interest expense on trading assets and liabilities, which are an integral part of the overall performance of the Firm's client-driven market-making activities in CIB and fund deployment activities in Treasury and CIO. Refer to Note 7 for further information on interest income and interest expense.

Trading revenue is presented primarily by instrument type. The Firm's client-driven market-making businesses generally utilize a variety of instrument types in connection with their market-making and related risk-management activities; accordingly, the trading revenue presented in the table below is not representative of the total revenue of any individual LOB.

Year ended December 31, (in millions)	2024	2023	2022
Trading revenue by instrument type			
Interest rate[(a)]	**$ 3,631**	$ 5,607	$ 3,010
Credit[(b)]	**1,545**	1,434	1,412 [(c)]
Foreign exchange	**4,874**	5,082	5,119
Equity	**13,476**	10,229	8,068
Commodity	**1,194**	2,202	2,348
Total trading revenue	**24,720**	24,554	19,957
Private equity gains/(losses)	**67**	(94)	(45)
Principal transactions	**$24,787**	$ 24,460	$ 19,912

(a) Includes the impact of changes in funding valuation adjustments on derivatives.
(b) Includes the impact of changes in credit valuation adjustments on derivatives, net of the associated hedging activities.
(c) Includes net markdowns on held-for-sale positions, primarily unfunded commitments, in the bridge financing portfolio.

Principal transactions revenue is earned primarily by CIB.

Lending- and deposit-related fees

Lending-related fees include fees earned from loan commitments, standby letters of credit, financial guarantees, and other loan-servicing activities. Deposit-related fees include fees earned from performing cash management activities, and providing overdraft and other deposit account services. Deposit-related fees also include the impact of credits earned by clients that reduce such fees. Lending- and deposit-related fees are recognized over the period in which the related service is provided. Refer to Note 28 for further information on lending-related commitments.

The following table presents the components of lending- and deposit-related fees.

Year ended December 31, (in millions)	2024	2023	2022
Lending-related fees	**$ 2,192** [(a)]	$ 2,365 [(a)]	$ 1,468
Deposit-related fees	**5,414**	5,048	5,630
Total lending- and deposit-related fees	**$7,606**	$ 7,413	$ 7,098

(a) Includes the amortization of the fair value discount on certain acquired lending-related commitments associated with First Republic, predominantly in AWM and CIB. The discount is deferred in other liabilities and recognized on a straight-line basis over the commitment period and was largely recognized in 2023 as the commitments were generally short term. Refer to Note 34 for additional information.

Lending- and deposit-related fees are earned by CCB, CIB and AWM.

Asset management fees

Investment management fees include fees associated with assets the Firm manages on behalf of its clients, including investors in Firm-sponsored funds and owners of separately managed investment accounts. Management fees are typically based on the value of assets under management and are collected and recognized at the end of each period over which the management services are provided and the value of the managed assets is known. The Firm also receives performance-based management fees, which are earned based on exceeding certain benchmarks or other performance targets and are accrued and recognized when the probability of reversal is remote, typically at the end of the related billing period.

All other asset management fees include commissions earned on the sales or distribution of mutual funds to clients. These fees are recorded as revenue at the time the service is rendered or, in the case of certain distribution fees, based on the underlying fund's asset value or investor redemption activity.

The following table presents the components of asset management fees.

Year ended December 31, (in millions)	2024	2023	2022
Asset management fees			
Investment management fees	**$ 17,425**	$ 14,908	$ 13,765
All other asset management fees	**376**	312	331
Total asset management fees	**$ 17,801**	$ 15,220	$ 14,096

Asset management fees earned primarily by AWM and CCB.

Commissions and other fees

This revenue category includes commissions and fees from brokerage and custody services, and other products.

Brokerage commissions represents commissions earned when the Firm acts as a broker, by facilitating its clients' purchases and sales of securities and other financial instruments. Brokerage commissions are collected and recognized as revenue upon occurrence of the client transaction. The Firm reports certain costs paid to third-party clearing houses and exchanges net against commission revenue.

Administration fees predominantly include fees for custody, funds services, securities lending and securities clearance. These fees are recorded as revenue over the period in which the related service is provided.

The following table presents the components of commissions and other fees.

Year ended December 31, (in millions)	2024	2023	2022
Commissions and other fees			
Brokerage commissions and fees	**$ 3,119**	$ 2,820	$ 2,831
Administration fees	**2,526**	2,310	2,348
All other commissions and fees[(a)]	**1,885**	1,706	1,402
Total commissions and other fees	**$ 7,530**	$ 6,836	$ 6,581

(a) Includes annuity sales commissions, depositary receipt-related service fees and travel-related sales commissions, as well as other service fees, which are recognized as revenue when the services are rendered.

Commissions and other fees are earned primarily by CIB, CCB and AWM.

Mortgage fees and related income

This revenue category reflects CCB's Home Lending production and net mortgage servicing revenue.

Production revenue includes fees and income recognized as earned on mortgage loans originated with the intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option. Net mortgage servicing revenue includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSRs; the impact of risk management activities associated with MSRs; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies.

Refer to Note 15 for further information on risk management activities and MSRs.

Net interest income from mortgage loans is recorded in interest income.

Card income

This revenue category includes interchange and other income from credit and debit card transactions; and fees earned from processing card transactions for merchants, both of which are recognized when purchases are made by a cardholder and presented net of certain transaction-related costs. Card income also includes account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12-month period.

Certain credit card products offer the cardholder the ability to earn points based on account activity, which the cardholder can choose to redeem for cash and non-cash rewards. The cost to the Firm related to these proprietary rewards programs varies based on multiple factors including the terms and conditions of the rewards programs, cardholder activity, cardholder reward redemption rates and cardholder reward selections. The Firm maintains a liability for its obligations under its rewards programs and reports the current-period cost as a reduction of card income.

Credit card revenue sharing agreements

The Firm has contractual agreements with numerous co-brand partners that grant the Firm exclusive rights to issue co-branded credit card products and market them to the customers of such partners. These partners endorse the co-brand credit card programs and provide their customer or member lists to the Firm. The partners may also conduct marketing activities and provide rewards redeemable under their own loyalty programs that the Firm will grant to co-brand credit cardholders based on account activity. The terms of these agreements generally range from five to ten years.

The Firm typically makes payments to the co-brand credit card partners based on the cost of partners' marketing activities and loyalty program rewards provided to credit cardholders, new account originations and sales volumes. Payments to partners based on marketing efforts undertaken by the partners are expensed by the Firm as incurred and reported as marketing expense. Payments for partner loyalty program rewards are reported as a reduction of card income when incurred. Payments to partners based on new credit card account originations are accounted for as direct loan origination costs and are deferred and recognized as a reduction of card income on a straight-line basis over a 12-month period. Payments to partners based on sales volumes are reported as a reduction of card income when the related interchange income is earned.

The following table presents the components of card income:

Year ended December 31, (in millions)	2024	2023	2022
Interchange and merchant processing income	**$ 33,847**	$ 31,021	$ 28,085
Reward costs and partner payments	**(26,784)**	(24,601)	(22,162)
All other[(a)]	**(1,566)**	(1,636)	(1,503)
Total card income	**$ 5,497**	$ 4,784	$ 4,420

(a) Predominantly represents the amortization of account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12-month period.

Card income is earned primarily by CCB and CIB.

Other income

This revenue category includes operating lease income, as well as losses associated with the Firm's tax-oriented investments, predominantly alternative energy equity-method investments in CIB. The losses associated with these tax-oriented investments are more than offset by lower income tax expense from the associated tax credits.

The following table presents certain components of other income:

Year ended December 31, (in millions)	2024	2023	2022
Operating lease income	**$ 2,795**	$ 2,843	$ 3,654
Losses on tax-oriented investments	**(97)**	(1,538)	(1,491)
Gain on Visa shares	**7,990** (b)	—	914 (c)
Estimated bargain purchase gain associated with the First Republic acquisition	**103**	2,775	—
Gain related to the acquisition of CIFM (a)	**—**	339	—

(a) Gain on the original minority interest in CIFM upon the Firm's acquisition of the remaining 51% of the entity.
(b) Relates to the initial gain recognized on May 6, 2024 on the Visa C shares. Refer to Note 2 for additional information.
(c) Relates to the sale of Visa B shares.

Refer to Note 18 for additional information on operating leases.

Proportional Amortization Method: Effective January 1, 2024, as a result of adopting updates to the Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method guidance, the amortization of certain of the Firm's alternative energy tax-oriented investments that was previously recognized in other income is now recognized in income tax expense, which aligns with the associated tax credits and other tax benefits. Refer to Notes 1, 14 and 25 for additional information.

Noninterest expense

Other expense

Other expense on the Firm's Consolidated statements of income included:

Year ended December 31, (in millions)	2024	2023	2022
Legal expense	**$ 740**	$1,436	$ 266
FDIC-related expense	**1,893** (c)	4,203 (c)	860
Operating losses	**1,417**	1,228	1,101
Contribution of Visa shares(a)	**1,000**	—	—
First Republic-related expense(b)	**777**	1,060	—

(a) Represents the contribution of a portion of Visa C shares to the JPMorgan Chase Foundation recorded in the second quarter of 2024. Refer to Note 2 for additional information.
(b) Reflects the expenses classified within other expense, including $488 million and $360 million of integration and restructuring costs associated with First Republic for the full years ended December 31, 2024 and 2023, respectively. Additionally, the second quarter of 2023 included payments to the FDIC for the First Republic individuals who were not employees of the Firm until July 2, 2023. Refer to Note 34 for additional information on the First Republic acquisition.
(c) The first quarter of 2024 included an increase of $725 million to the FDIC special assessment reflecting the FDIC's revised estimate of Deposit Insurance Fund losses. The fourth quarter of 2023 included the $2.9 billion FDIC special assessment.

Refer to Note 32 for additional information on noninterest revenue and expense by segment.

Note 7 – Interest income and interest expense

Interest income and interest expense are recorded in the Consolidated statements of income and classified based on the nature of the underlying asset or liability.

Interest income and interest expense includes the current-period interest accruals for financial instruments measured at fair value, except for derivatives and certain financial instruments containing embedded derivatives; for those instruments, all changes in fair value including any interest elements, are primarily reported in principal transactions revenue. For financial instruments that are not measured at fair value, the related interest is included within interest income or interest expense, as applicable. Interest income and interest expense also includes the effect of derivatives that qualify for hedge accounting where applicable.

Interest income on loans and securities include the amortization and accretion of purchase premiums and discounts, as well as net deferred fees and costs on loans. These amounts are deferred in loans and investment securities, respectively, and recognized on a level-yield basis.

Refer to Notes 5, 10, 11, 12, and 20 for further information on accounting for interest income and interest expense related to hedge accounting, investment securities, securities financing activities (i.e., securities purchased or sold under resale or repurchase agreements; securities borrowed; and securities loaned), loans and long-term debt, respectively.

The following table presents the components of interest income and interest expense:

Year ended December 31, (in millions)	2024	2023	2022
Interest income			
Loans	**$ 92,353** [d]	$ 83,384 [d]	$ 52,736
Taxable securities	**21,947**	17,390	10,372
Non-taxable securities[a]	**1,197**	1,336	975
Total investment securities	**23,144** [d]	18,726 [d]	11,347
Trading assets - debt instruments	**20,327**	15,950	9,053
Federal funds sold and securities purchased under resale agreements	**18,299**	15,079	4,632
Securities borrowed	**9,208**	7,983	2,237
Deposits with banks	**22,297**	21,797	9,039
All other interest-earning assets[b]	**8,305**	7,669	3,763
Total interest income	**$193,933**	$170,588	$ 92,807
Interest expense			
Interest bearing deposits	**$ 49,559**	$ 40,016	$ 10,082
Federal funds purchased and securities loaned or sold under repurchase agreements	**19,149**	13,259	3,721
Short-term borrowings	**2,101**	1,894	747
Trading liabilities - debt and all other interest-bearing liabilities[c]	**10,238**	9,396	3,246
Long-term debt	**18,920**	15,803	8,075
Beneficial interest issued by consolidated VIEs	**1,383**	953	226
Total interest expense	**$101,350**	$ 81,321	$ 26,097
Net interest income	**$ 92,583**	$ 89,267	$ 66,710
Provision for credit losses	**10,678**	9,320	6,389
Net interest income after provision for credit losses	**$ 81,905**	$ 79,947	$ 60,321

(a) Represents securities that are tax-exempt for U.S. federal income tax purposes.
(b) Includes interest earned on brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated balance sheets.
(c) All other interest-bearing liabilities includes interest expense on brokerage-related customer payables.
(d) Includes the accretion of the purchase discount on certain acquired loans and investment securities associated with First Republic. Refer to Note 34 for additional information.

Note 8 – Pension and other postretirement employee benefit plans

The Firm has various defined benefit pension plans and OPEB plans that provide benefits to its employees in the U.S. and certain non-U.S. locations. Substantially all the defined benefit pension plans are closed to new participants. The principal defined benefit pension plan in the U.S., which covered substantially all U.S. employees, was closed to new participants and frozen for existing participants on January 1, 2020, (and January 1, 2019 for new hires on or after December 2, 2017). Interest credits continue to accrue to participants' accounts based on their accumulated balances.

The Firm maintains funded and unfunded postretirement benefit plans that provide medical and life insurance for certain eligible employees and retirees as well as their dependents covered under these programs. None of these plans have a material impact on the Firm's Consolidated Financial Statements.

The Firm also provides a qualified defined contribution plan in the U.S. and maintains other similar arrangements in certain non-U.S. locations. The most significant of these plans is the JPMorgan Chase 401(k) Savings Plan ("the 401(k) Savings Plan"), which covers substantially all U.S. employees. Employees can contribute to the 401(k) Savings Plan on a pretax and/or Roth 401(k) after-tax basis. The Firm makes annual matching and pay credit contributions to the 401(k) Savings Plan on behalf of eligible participants.

The following table presents the pretax benefit obligations, plan assets, the net funded status, and the amounts recorded in AOCI on the Consolidated balance sheets for the Firm's significant defined benefit pension and OPEB plans.

As of or for the year ended December 31, (in millions)		**2024**		2023
Projected benefit obligations	**$**	**(14,459)**	$	(14,740)
Fair value of plan assets		**22,201**		22,013
Net funded status		**7,742**		7,273
Accumulated other comprehensive income/(loss)		**(1,649)**		(1,517)

The weighted-average discount rate used to value the benefit obligations as of December 31, 2024 and 2023, was 5.49% and 5.16%, respectively.

Gains and losses

Gains or losses resulting from changes in the benefit obligation and the fair value of plan assets are recorded in OCI. Amortization of net gains or losses are recognized as part of the net periodic benefit cost over subsequent periods, if, as of the beginning of the year, the net gain or loss exceeds 10% of the greater of the projected benefit obligation or the fair value of the plan assets. Amortization is generally over the average expected remaining lifetime of plan participants, given the frozen status of most plans. For the year ended December 31, 2024, the net loss was attributable to lower than expected returns on plan assets, partially offset by projected benefit obligation net gains primarily related to changes in the discount rate. For the year ended December 31, 2023, the net gain was attributable to market-driven increases in the fair value of plan assets, partially offset by changes in the discount rate and interest crediting rate.

The following table presents the net periodic benefit costs reported in the Consolidated statements of income for the Firm's defined benefit pension, defined contribution and OPEB plans, and in other comprehensive income for the defined benefit pension and OPEB plans.

Year ended December 31, (in millions)		**2024**		2023		2022
Total net periodic defined benefit plan cost/(credit)[(a)]	**$**	**(462)**	$	(393)	$	(192) [(b)]
Total defined contribution plans		**1,733**		1,609		1,408
Total pension and OPEB cost included in noninterest expense	**$**	**1,271**	$	1,216	$	1,216
Total recognized in other comprehensive (income)/loss	**$**	**131**	$	(421)	$	1,459

(a) The service cost component of net periodic defined benefit cost is reported in compensation expense; all other components of net periodic defined benefit costs are reported in other expense in the Consolidated statements of income.
(b) Includes pension settlement losses of $92 million for the year ended December 31, 2022.

The following table presents the weighted-average actuarial assumptions used to determine the net periodic benefit costs for the defined benefit pension and OPEB plans.

Year ended December 31,	**2024**	2023	2022
Discount rate	**5.16 %**	5.14 %	2.54 %
Expected long-term rate of return on plan assets	**6.15 %**	5.74 %	3.68 %

Plan assumptions

The Firm's expected long-term rate of return is a blended weighted average, by asset allocation of the projected long-term returns for the various asset classes, taking into consideration local market conditions and the specific allocation of plan assets. Returns on asset classes are developed using a forward-looking approach and are not strictly based on historical returns, with consideration given to current market conditions and the portfolio mix of each plan.

The discount rates used in determining the benefit obligations are generally provided by the Firm's actuaries, with the Firm's principal defined benefit pension plan using a rate that was selected by reference to the yields on portfolios of bonds with maturity dates and coupons that closely match the plan's projected annual cash flows.

Investment strategy and asset allocation

The assets of the Firm's defined benefit pension plans are held in various trusts and are invested in well-diversified portfolios of equity and fixed income securities, cash and cash equivalents, and alternative investments. The Firm regularly reviews the asset allocations and asset managers, as well as other factors that could impact the portfolios, which are rebalanced when deemed necessary. As of December 31, 2024, the approved asset allocation ranges by asset class for the Firm's principal defined benefit plan are 41-100% debt securities, 0-40% equity securities, 0-1% real estate, and 0-8% alternatives.

Assets held by the Firm's defined benefit pension and OPEB plans do not include securities issued by JPMorganChase or its affiliates, except through indirect exposures through investments in exchange traded funds, mutual funds and collective investment funds managed by third-parties. The defined benefit pension and OPEB plans hold investments that are sponsored or managed by affiliates of JPMorganChase in the amount of $1.8 billion as of both December 31, 2024 and 2023.

Fair value measurement of the plans' assets and liabilities

Refer to Note 2 for information on fair value measurements, including descriptions of level 1, 2, and 3 of the fair value hierarchy and the valuation methods employed by the Firm.

Defined benefit pension and OPEB plans assets and liabilities measured at fair value

	2024				2023			
December 31, (in millions)	Level 1[(a)]	Level 2[(b)]	Level 3[(c)]	Total fair value	Level 1[(a)]	Level 2[(b)]	Level 3[(c)]	Total fair value
Assets measured at fair value classified in the fair value hierarchy	**$ 6,910**	**$ 9,693**	**$ 3,956**	**$ 20,559**	$ 6,521	$ 10,713	$ 3,124	$ 20,358
Assets measured at fair value using NAV as a practical expedient				**2,101**				2,097
Net defined benefit pension plan payables				**(459)**				(442)
Total fair value of plan assets				**$ 22,201**				$ 22,013

(a) Consists predominantly of equity securities, U.S. federal, state, and local and non-U.S. government debt securities, and cash equivalents.
(b) Consists of corporate debt securities, fund investments, mortgage-backed securities, and U.S. federal, state, and local and non-U.S. government debt securities.
(c) Consists predominantly of corporate-owned life insurance policies.

Changes in level 3 fair value measurements using significant unobservable inputs

Investments classified in level 3 of the fair value hierarchy increased in 2024 to $4.0 billion, due to $536 million of transfers in and $415 million in unrealized gains, partially offset by $123 million in settlements. The net increase in 2023 was due to $400 million in unrealized gains and $173 million of transfers in, partially offset by $59 million in settlements.

Estimated future benefit payments

The following table presents benefit payments expected to be paid for the defined benefit pension and OPEB plans for the years indicated.

Year ended December 31, (in millions)		
2025	$	1,186
2026		1,155
2027		1,134
2028		1,095
2029		1,093
Years 2030–2034		5,229

Note 9 – Employee share-based incentives

Employee share-based awards

In 2024, 2023 and 2022, JPMorganChase granted long-term share-based awards to certain employees under its LTIP, as amended and restated effective May 18, 2021, and subsequently amended effective May 21, 2024. Under the terms of the LTIP, as of December 31, 2024, 81 million shares of common stock were available for issuance through May 2028. The LTIP is the only active plan under which the Firm is currently granting share-based incentive awards. In the following discussion, the LTIP constitutes the Firm's share-based incentive plans.

RSUs are awarded at no cost to the recipient upon their grant. Generally, RSUs are granted annually and vest at a rate of 50% after two years and 50% after three years and are converted into shares of common stock as of the vesting date. In addition, RSUs typically include full-career eligibility provisions, which allow employees to continue to vest upon voluntary termination based on age and/or service-related requirements, subject to post-employment and other restrictions. All RSU awards are subject to forfeiture until vested and contain clawback provisions that may result in cancellation under certain specified circumstances. Predominantly all RSUs entitle the recipient to receive cash payments equivalent to any dividends paid on the underlying common stock during the period the RSUs are outstanding.

Performance share units ("PSUs") are granted annually, and approved by the Firm's Board of Directors, to members of the Firm's Operating Committee under the variable compensation program. PSUs are subject to the Firm's achievement of specified performance criteria over a three-year period. The number of awards that vest can range from zero to 150% of the grant amount. In addition, dividends that accrue during the vesting period are reinvested in dividend equivalent share units. PSUs and the related dividend equivalent share units are converted into shares of common stock after vesting.

Once the PSUs and dividend equivalent share units have vested, the shares of common stock that are delivered, after applicable tax withholding, must be retained for an additional holding period, for a total combined vesting and holding period of approximately five to eight years from the grant date depending on regulations in certain countries.

Under the LTI Plans, stock appreciation rights ("SARs") were granted with an exercise price equal to the fair value of JPMorganChase's common stock on the grant date. SARs expire ten years after the grant date. There were no grants of SARs in 2024, 2023 or 2022.

The Firm separately recognizes compensation expense for each tranche of each award, net of estimated forfeitures, as if it were a separate award with its own vesting date. Generally, for each tranche granted, compensation expense is recognized on a straight-line basis from the grant date until the vesting date of the respective tranche, provided that the employees will not become full-career eligible during the vesting period. For awards with full-career eligibility provisions and awards granted with no future substantive service requirement, the Firm accrues the estimated value of awards expected to be awarded to employees as of the grant date without giving consideration to the impact of post-employment restrictions. For each tranche granted to employees who will become full-career eligible during the vesting period, compensation expense is recognized on a straight-line basis from the grant date until the earlier of the employee's full-career eligibility date or the vesting date of the respective tranche.

The Firm's policy for issuing shares upon settlement of employee share-based incentive awards is to issue either new shares of common stock or treasury shares. During 2024, 2023 and 2022, the Firm settled all of its employee share-based awards by issuing treasury shares.

Refer to Note 23 for further information on the classification of share-based awards for purposes of calculating earnings per share.

RSUs, PSUs and SARs activity

Generally, compensation expense for RSUs and PSUs is measured based on the number of units granted multiplied by the stock price at the grant date, and for SARs, is measured at the grant date using the Black-Scholes valuation model. Compensation expense for these awards is recognized in net income as described previously. The following table summarizes JPMorganChase's RSUs, PSUs and SARs activity for 2024.

Year ended December 31, 2024 (in thousands, except weighted-average data, and where otherwise stated)	RSUs/PSUs Number of units	RSUs/PSUs Weighted-average grant date fair value	SARs Number of awards	SARs Weighted-average exercise price	SARs Weighted-average remaining contractual life (in years)	SARs Aggregate intrinsic value
Outstanding, January 1	**52,243**	**$ 141.31**	**2,250**	**$ 152.19**		
Granted	**20,020**	**166.74**	**—**	**—**		
Exercised or vested	**(19,542)**	**143.02**	**—**	**—**		
Forfeited	**(2,112)**	**147.41**	**—**	**—**		
Canceled	**NA**	**NA**	**—**	**—**		
Outstanding, December 31	**50,609**	**$ 150.41**	**2,250**	**$ 152.19**	**6.7**	**$ 198,113**
Exercisable, December 31	**NA**	**NA**	**—**	**—**	**—**	**—**

The total fair value of RSUs and PSUs that vested during the years ended December 31, 2024, 2023 and 2022, was $3.5 billion, $2.5 billion and $3.2 billion, respectively. There were no SARs exercised in 2024. The total intrinsic value of SARs exercised during the years ended December 31, 2023 and 2022, was $24 million and $75 million, respectively.

Compensation expense

The Firm recognized the following noncash compensation expense related to its various employee share-based incentive plans in its Consolidated statements of income.

Year ended December 31, (in millions)	**2024**	2023	2022
Cost of prior grants of RSUs, PSUs and SARs that are amortized over their applicable vesting periods	**$ 1,622**	$ 1,510	$ 1,253
Accrual of estimated costs of share-based awards to be granted in future periods, predominantly those to full-career eligible employees	**1,882**	1,607	1,541
Total noncash compensation expense related to employee share-based incentive plans	**$3,504**	$ 3,117	$ 2,794

At December 31, 2024, approximately $963 million (pretax) of compensation expense related to unvested awards had not yet been charged to net income. That cost is expected to be amortized into compensation expense over a weighted-average period of 1.6 years. The Firm does not capitalize any compensation expense related to share-based compensation awards to employees.

Tax benefits

Income tax benefits (including tax benefits from dividends or dividend equivalents) related to share-based incentive arrangements recognized in the Firm's Consolidated statements of income for the years ended December 31, 2024, 2023 and 2022, were $1.0 billion, $836 million and $901 million, respectively.

Note 10 – Investment securities

Investment securities consist of debt securities that are classified as AFS or HTM. Debt securities classified as trading assets are discussed in Note 2. Predominantly all of the Firm's AFS and HTM securities are held by Treasury and CIO in connection with its asset-liability management activities.

AFS securities are carried at fair value on the Consolidated balance sheets. Unrealized gains and losses, after any applicable hedge accounting adjustments or allowance for credit losses, are reported in AOCI. The specific identification method is used to determine realized gains and losses on AFS securities, which are included in investment securities gains/(losses) on the Consolidated statements of income. HTM securities, which the Firm has the intent and ability to hold until maturity, are carried at amortized cost, net of allowance for credit losses, on the Consolidated balance sheets.

For both AFS and HTM securities, purchase discounts or premiums are generally amortized into interest income on a level-yield basis over the contractual life of the security. However, premiums on certain callable debt securities are amortized to the earliest call date.

The amortized costs and estimated fair values of the investment securities portfolio were as follows for the dates indicated.

December 31, (in millions)	2024 Amortized cost[(d)(e)]	2024 Gross unrealized gains	2024 Gross unrealized losses	2024 Fair value	2023 Amortized cost[(d)(e)]	2023 Gross unrealized gains	2023 Gross unrealized losses	2023 Fair value

(a) Represents the amount of portfolio layer method basis adjustments related to AFS securities hedged in a closed portfolio. Under U.S. GAAP portfolio layer method basis adjustments are not allocated to individual securities, however the amounts impact the unrealized gains or losses in the table for the types of securities being hedged. Refer to Note 1 and Note 5 for additional information.

(b) The Firm purchased $4.7 billion, $4.1 billion and $33.7 billion of HTM securities for the years ended December 31, 2024, 2023 and 2022, respectively.

(c) Effective January 1, 2023, the Firm adopted the portfolio layer method hedge accounting guidance which permitted a transfer of HTM securities to AFS upon adoption. The Firm transferred obligations of U.S. states and municipalities with a carrying value of $7.1 billion resulting in the recognition of $38 million net pre-tax unrealized losses in AOCI. This transfer was a non-cash transaction. Refer to Note 24 for additional information.

(d) The amortized cost of investment securities is reported net of allowance for credit losses of $152 million, $128 million and $96 million at December 31, 2024, 2023 and 2022, respectively.

(e) Excludes $3.7 billion and $2.8 billion of accrued interest receivable at December 31, 2024 and 2023, respectively, included in accrued interest and accounts receivable on the Consolidated balance sheets. The Firm generally does not recognize an allowance for credit losses on accrued interest receivable, consistent with its policy to write them off no later than 90 days past due by reversing interest income. The Firm did not reverse through interest income any accrued interest receivable for the years ended December 31, 2024 and 2023.

At December 31, 2024, the investment securities portfolio consisted of debt securities with an average credit rating of AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings). Risk ratings are used to identify the credit quality of securities and differentiate risk within the portfolio. The Firm's internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S&P and Moody's, however the quantitative characteristics (e.g., probability of default ("PD") and loss given default ("LGD")) may differ as they reflect internal historical experiences and assumptions. Risk ratings are assigned at acquisition, reviewed on a regular and ongoing basis by Credit Risk Management and adjusted as necessary over the life of the investment for updated information affecting the issuer's ability to fulfill its obligations.

AFS securities impairment

The following tables present the fair value and gross unrealized losses by aging category for AFS securities at December 31, 2024 and 2023. The tables exclude U.S. Treasury and government agency securities and U.S. GSE and government agency MBS with unrealized losses of $5.3 billion and $4.6 billion, at December 31, 2024 and 2023, respectively; changes in the value of these securities are generally driven by changes in interest rates rather than changes in their credit profile given the explicit or implicit guarantees provided by the U.S. government.

AFS securities are considered impaired if the fair value is less than the amortized cost.

The Firm recognizes impairment losses in earnings if the Firm has the intent to sell the debt security, or if it is more likely than not that the Firm will be required to sell the debt security before recovery of its amortized cost. In these circumstances the impairment loss is recognized in investment securities gains/(losses) in the Consolidated Statements of Income and is equal to the full difference between the amortized cost (net of allowance if applicable) and the fair value of the security.

For impaired debt securities that the Firm has the intent and ability to hold, the securities are evaluated to determine if a credit loss exists. If it is determined that a credit loss exists, that loss is recognized as an allowance for credit losses through the provision for credit losses in the Consolidated Statements of Income, limited by the amount of impairment. Any impairment on debt securities that the Firm has the intent and ability to hold not due to credit losses is recorded in OCI.

Factors considered in evaluating credit losses include adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; and payment structure of the security.

When assessing securities issued in a securitization for credit losses, the Firm estimates cash flows considering relevant market and economic data, underlying loan-level data, and structural features of the securitization, such as subordination, excess spread, overcollateralization or other forms of credit enhancement, and compares the losses projected for the underlying collateral ("pool losses") against the level of credit enhancement in the securitization structure to determine whether these features are sufficient to absorb the pool losses, or whether a credit loss exists.

For beneficial interests in securitizations that are rated below "AA" at their acquisition, or that can be contractually prepaid or otherwise settled in such a way that the Firm would not recover substantially all of its recorded investment, the Firm evaluates impairment for credit losses when there is an adverse change in expected cash flows.

HTM securities – credit risk

Allowance for credit losses

The allowance for credit losses on HTM securities represents expected credit losses over the remaining expected life of the securities.

The allowance for credit losses on HTM obligations of U.S. states and municipalities and commercial mortgage-backed securities is calculated by applying statistical credit loss factors (estimated PD and LGD) to the amortized cost. The credit loss factors are derived using a weighted average of five internally developed eight-quarter macroeconomic scenarios, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the forecast period. Refer to Note 13 for further information on the eight-quarter macroeconomic forecast.

The allowance for credit losses on HTM collateralized loan obligations and U.S. residential mortgage-backed securities is calculated as the difference between the amortized cost and the present value of the cash flows expected to be collected, discounted at the security's effective interest rate. These cash flow estimates are developed based on expectations of underlying collateral performance derived using the eight-quarter macroeconomic forecast and the single year straight-line interpolation, as well as considering the structural features of the security.

The application of different inputs and assumptions into the calculation of the allowance for credit losses is subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for credit losses on HTM securities.

Credit quality indicator

The primary credit quality indicator for HTM securities is the risk rating assigned to each security. At both December 31, 2024 and 2023, all HTM securities were rated investment grade and were current and accruing, with approximately 99% rated at least AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings).

Allowance for credit losses on investment securities

The allowance for credit losses on investment securities was $152 million, $128 million and $96 million as of December 31, 2024, 2023 and 2022, respectively, which included a cumulative-effect adjustment to retained earnings related to the transfer of HTM securities to AFS for the year ended December 31, 2023.

Selected impacts of investment securities on the Consolidated statements of income

Average yield[a]	— %	4.76 %	3.25 %	3.97 %	3.95 %
Asset-backed securities					
Amortized cost	$ —	$ 134	$ 22,433	$ 19,360	$ 41,927
Fair value	—	134	22,466	19,360	41,960
Average yield[a]	— %	5.94 %	5.57 %	5.73 %	5.65 %
Total held-to-maturity securities					
Amortized cost[b]	$ 20,187	$ 48,634	$ 76,869	$ 128,881	$ 274,571
Fair value	19,601	45,311	68,299	114,689	247,900
Average yield[a]	0.43 %	1.47 %	2.63 %	3.44 %	2.64 %

(a) Average yield is computed using the effective yield of each security owned at the end of the period, weighted based on the amortized cost of each security. The effective yield considers the contractual coupon, amortization of premiums and accretion of discounts, and the effect of related hedging derivatives, including closed portfolio hedges. Taxable-equivalent amounts are used where applicable. The effective yield excludes unscheduled principal prepayments; and accordingly, actual maturities of securities may differ from their contractual or expected maturities as certain securities may be prepaid. However, for certain callable debt securities, the average yield is calculated to the earliest call date.

(b) For purposes of this table, the amortized cost of available-for-sale securities excludes the allowance for credit losses of $49 million and the portfolio layer fair value hedge basis adjustments of $(1.2) billion at December 31, 2024. The amortized cost of held-to-maturity securities also excludes the allowance for credit losses of $103 million at December 31, 2024.

(c) Substantially all of the Firm's U.S. residential MBS and collateralized mortgage obligations are due in 10 years or more, based on contractual maturity. The estimated weighted-average life, which reflects anticipated future prepayments, is approximately eight years for agency residential MBS, six years for agency residential collateralized mortgage obligations, and five years for nonagency residential collateralized mortgage obligations.

Note 11 – Securities financing activities

JPMorganChase enters into resale, repurchase, securities borrowed and securities loaned agreements (collectively, "securities financing agreements") primarily to finance the Firm's inventory positions, acquire securities to cover short sales, accommodate customers' financing needs, settle other securities obligations and to deploy the Firm's excess cash.

Securities financing agreements are treated as collateralized financings on the Firm's Consolidated balance sheets. Where appropriate under applicable accounting guidance, securities financing agreements with the same counterparty are reported on a net basis. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. Fees received and paid in connection with securities financing agreements are recorded over the life of the agreement in interest income and interest expense on the Consolidated statements of income.

The Firm has elected the fair value option for certain securities financing agreements. Refer to Note 3 for further information regarding the fair value option. The securities financing agreements for which the fair value option has been elected are reported within securities purchased under resale agreements, securities loaned or sold under repurchase agreements, and securities borrowed on the Consolidated balance sheets. Generally, for agreements carried at fair value, current-period interest accruals are recorded within interest income and interest expense, with changes in fair value reported in principal transactions revenue. However, for financial instruments containing embedded derivatives that would be separately accounted for in accordance with accounting guidance for hybrid instruments, all changes in fair value, including any interest elements, are reported in principal transactions revenue.

Securities financing agreements not elected under the fair value option are measured at amortized cost. As a result of the Firm's credit risk mitigation practices described below, the Firm did not hold any allowance for credit losses with respect to resale and securities borrowed arrangements as of December 31, 2024 and 2023.

Credit risk mitigation practices

Securities financing agreements expose the Firm primarily to credit and liquidity risk. To manage these risks, the Firm monitors the value of the underlying securities (predominantly high-quality securities collateral, including government-issued debt and U.S. GSEs and government agencies MBS) that it has received from or provided to its counterparties compared to the value of cash proceeds and exchanged collateral, and either requests additional collateral or returns securities or collateral when appropriate. Margin levels are initially established based upon the counterparty, the type of underlying securities, and the permissible collateral, and are monitored on an ongoing basis.

In resale and securities borrowed agreements, the Firm is exposed to credit risk to the extent that the value of the securities received is less than initial cash principal advanced and any collateral amounts exchanged. In repurchase and securities loaned agreements, credit risk exposure arises to the extent that the value of underlying securities advanced exceeds the value of the initial cash principal received, and any collateral amounts exchanged.

Additionally, the Firm typically enters into master netting agreements and other similar arrangements with its counterparties, which provide for the right to liquidate the underlying securities and any collateral amounts exchanged in the event of a counterparty default. It is also the Firm's policy to take possession, where possible, of the securities underlying resale and securities borrowed agreements. Refer to Note 29 for further information regarding assets pledged and collateral received in securities financing agreements.

The table below summarizes the gross and net amounts of the Firm's securities financing agreements, as of December 31, 2024 and 2023. When the Firm has obtained an appropriate legal opinion with respect to a master netting agreement with a counterparty and where other relevant netting criteria under U.S. GAAP are met, the Firm nets, on the Consolidated balance sheets, the balances outstanding under its securities financing agreements with the same counterparty. In addition, the Firm exchanges securities and/or cash collateral with its counterparty to reduce the economic exposure with the counterparty, but such collateral is not eligible for net Consolidated balance sheet presentation. Where the Firm has obtained an appropriate legal opinion with respect to the counterparty master netting agreement, such collateral, along with securities financing balances that do not meet all these relevant netting criteria under U.S. GAAP, is presented in the table below as "Amounts not nettable on the Consolidated balance sheets," and reduces the "Net amounts" presented. Where a legal opinion has not been either sought or obtained, the securities financing balances are presented gross in the "Net amounts" below. In transactions where the Firm is acting as the lender in a securities-for-securities lending agreement and receives securities that can be pledged or sold as collateral, the Firm recognizes the securities received at fair value within other assets and the obligation to return those securities within accounts payable and other liabilities on the Consolidated balance sheets.

	December 31, 2024				
(in millions)	Gross amounts	Amounts netted on the Consolidated balance sheets	Amounts presented on the Consolidated balance sheets	Amounts not nettable on the Consolidated balance sheets[(b)]	Net amounts[(c)]

Transfers not qualifying for sale accounting

At December 31, 2024 and 2023, the Firm held $805 million and $505 million, respectively, of financial assets for which the rights have been transferred to third parties; however, the transfers did not qualify as a sale in accordance with U.S. GAAP. These transfers have been recognized as collateralized financing transactions. The transferred assets are recorded in trading assets and loans, and the corresponding liabilities are recorded primarily in short-term borrowings and long-term debt on the Consolidated balance sheets.

Note 12 – Loans

Loan accounting framework

The accounting for a loan depends on management's strategy for the loan. The Firm accounts for loans based on the following categories:

- Originated or purchased loans held-for-investment (i.e., "retained")
- Loans held-for-sale
- Loans at fair value

The following provides a detailed accounting discussion of the Firm's loans by category:

Loans held-for-investment

Originated or purchased loans held-for-investment, including PCD, are recorded at amortized cost, reflecting the principal amount outstanding, net of the following: unamortized deferred loan fees, costs, premiums or discounts; charge-offs; collection of cash; and foreign exchange. Credit card loans also include billed finance charges and fees.

Interest income

Interest income on performing loans held-for-investment is accrued and recognized as interest income at the contractual rate of interest. Purchase price discounts or premiums, as well as net deferred loan fees or costs, are recognized in interest income over the contractual life of the loan as an adjustment of yield.

The Firm classifies accrued interest on loans, including accrued but unbilled interest on credit card loans, in accrued interest and accounts receivables on the Consolidated balance sheets. For credit card loans, accrued interest once billed is then recognized in the loan balances, with the related allowance recorded in the allowance for credit losses. Changes in the allowance for credit losses on accrued interest on credit card loans are recognized in the provision for credit losses and charge-offs are recognized by reversing interest income. For other loans, the Firm generally does not recognize an allowance for credit losses on accrued interest receivables, consistent with its policy to write them off no later than 90 days past due by reversing interest income.

Nonaccrual loans

Nonaccrual loans are those on which the accrual of interest has been suspended. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status and considered nonperforming when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest has been in default for a period of 90 days or more, unless the loan is both well-secured and in the process of collection. A loan is determined to be past due when the minimum payment is not received from the borrower by the contractually specified due date or for certain loans (e.g., residential real estate loans), when a monthly payment is due and unpaid for 30 days or more. Finally, collateral-dependent loans are typically maintained on nonaccrual status.

On the date a loan is placed on nonaccrual status, all interest accrued but not collected is reversed against interest income. In addition, the amortization of deferred amounts is suspended. Interest income on nonaccrual loans may be recognized as cash interest payments are received (i.e., on a cash basis) if the recorded loan balance is deemed fully collectible; however, if there is doubt regarding the ultimate collectibility of the recorded loan balance, all interest cash receipts are applied to reduce the carrying value of the loan (the cost recovery method). For consumer loans, application of this policy typically results in the Firm recognizing interest income on nonaccrual consumer loans on a cash basis.

A loan may be returned to accrual status when repayment is reasonably assured and there has been demonstrated performance under the terms of the loan or, if applicable, the terms of the restructured loan.

As permitted by regulatory guidance, credit card loans are generally exempt from being placed on nonaccrual status; accordingly, interest and fees related to credit card loans continue to accrue until the loan is charged off or paid in full.

Allowance for loan losses

The allowance for loan losses represents the estimated expected credit losses in the held-for-investment loan portfolio at the balance sheet date and is recognized on the balance sheet as a contra asset, which brings the amortized cost to the net carrying value. Changes in the allowance for loan losses resulting from lending-related activity, macroeconomic variables, changes in credit and other inputs are recorded in the provision for credit losses on the Firm's Consolidated statements of income. Refer to Note 13 for further information on the Firm's accounting policies for the allowance for loan losses.

Charge-offs

Consumer loans are generally charged off or charged down to the lower of the amortized cost or the net realizable value of the underlying collateral (i.e., fair value less estimated costs to sell), with an offset to the allowance for loan losses, upon reaching specified stages of delinquency in accordance with standards established by the FFIEC. Residential real estate loans, unmodified credit card loans and scored business banking loans are generally charged off no later than 180 days past due. Scored auto and closed-end consumer loans, including modified credit card accounts placed on a fixed payment plan, are charged off no later than 120 days past due.

Certain consumer loans are charged off or charged down to their net realizable value earlier than the FFIEC charge-off standards in the following circumstances:

- Loans modified to borrowers experiencing financial difficulty that are determined to be collateral-dependent.
- Loans to borrowers who have experienced an event that suggests a loss is either known or highly certain are subject to accelerated charge-off standards (e.g., residential real estate and auto loans are charged off or charged down within 60 days of receiving notification of a bankruptcy filing).
- Auto loans upon repossession of the automobile.

Other than in certain limited circumstances, the Firm typically does not recognize charge-offs on the government-guaranteed portion of loans.

Wholesale loans are charged off when it is highly certain that a loss has been realized. The determination of whether to recognize a charge-off includes many factors, including the prioritization of the Firm's claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity or the loan collateral.

When a loan is charged down to the lower of its amortized cost or the estimated net realizable value of the underlying collateral, the determination of the fair value of the collateral depends on the type of collateral (e.g., securities, real estate). In cases where the collateral is in the form of liquid securities, the fair value is based on quoted market prices or broker quotes. For illiquid securities or other financial assets, the fair value of the collateral is generally estimated using a discounted cash flow model.

For residential real estate loans, collateral values are based upon external valuation sources. When it becomes likely that a borrower is either unable or unwilling to pay, the Firm utilizes a broker's price opinion, appraisal and/or an automated valuation model of the home based on an exterior-only valuation ("exterior opinions"), which is then updated at least every 12 months, or more frequently depending on various market factors. As soon as practicable after the Firm receives the property in satisfaction of a debt (e.g., by taking legal title or physical possession), the Firm generally obtains an appraisal based on an inspection that includes the interior of the home ("interior appraisals"). Exterior opinions and interior appraisals are discounted based upon the Firm's experience with actual liquidation values as compared with the estimated values provided by exterior opinions and interior appraisals, considering state-specific factors.

For commercial real estate loans, collateral values are generally based on appraisals from internal and external valuation sources. Collateral values are typically updated every six to twelve months, either by obtaining a new appraisal or by performing an internal analysis, in accordance with the Firm's policies. The Firm also considers both borrower- and market-specific factors, which may result in obtaining appraisal updates or broker price opinions at more frequent intervals.

Loans held-for-sale

Loans held-for-sale are measured at the lower of cost or fair value, with valuation changes recorded in noninterest revenue. For consumer loans, the valuation is performed on a portfolio basis. For wholesale loans, the valuation is performed on an individual loan basis.

Interest income on loans held-for-sale is accrued and recognized based on the contractual rate of interest.

Loan origination fees or costs and purchase price discounts or premiums are deferred in a contra loan account until the related loan is sold. The deferred fees or costs and discounts or premiums are an adjustment to the basis of the loan and therefore are included in the periodic determination of the lower of cost or fair value adjustments and/or the gain or loss recognized at the time of sale.

Because these loans are recognized at the lower of cost or fair value, the Firm's allowance for loan losses and charge-off policies do not apply to these loans. However, loans held-for-sale are subject to the Firm's nonaccrual policies.

Loans at fair value

Loans for which the fair value option has been elected are measured at fair value, with changes in fair value recorded in noninterest revenue.

Interest income on these loans is accrued and recognized based on the contractual rate of interest. Changes in fair value are recognized in noninterest revenue. Loan origination fees are recognized upfront in noninterest revenue. Loan origination costs are recognized in the associated expense category as incurred.

Because these loans are recognized at fair value, the Firm's allowance for loan losses and charge-off policies do not apply to these loans. However, loans at fair value are subject to the Firm's nonaccrual policies.

Refer to Note 3 for further information on the Firm's elections of fair value accounting under the fair value option. Refer to Note 2 and Note 3 for further information on loans carried at fair value and classified as trading assets.

Loan classification changes

Loans in the held-for-investment portfolio that management decides to sell are transferred to the held-for-sale portfolio at the lower of cost or fair value on the date of transfer. Credit-related losses are charged against the allowance for loan losses; non-credit related losses such as those due to changes in interest rates or foreign currency exchange rates are recognized in noninterest revenue.

In the event that management decides to retain a loan in the held-for-sale portfolio, the loan is transferred to the held-for-investment portfolio at amortized cost on the date of transfer. These loans are subsequently assessed for impairment based on the Firm's allowance methodology. Refer to Note 13 for a further discussion of the methodologies used in establishing the Firm's allowance for loan losses.

Loan modifications

The Firm seeks to modify certain loans in conjunction with its loss mitigation activities. Through the modification, JPMorganChase grants one or more concessions to a borrower who is experiencing financial difficulty in order to minimize the Firm's economic loss and avoid foreclosure or repossession of the collateral, and to ultimately maximize payments received by the Firm from the borrower. The concessions granted vary by program and by borrower-specific characteristics, and may include interest rate reductions, term extensions, other-than-insignificant payment delays or principal forgiveness.

Loans, except for credit card loans, reported as FDMs are generally placed on nonaccrual status, although in many cases such loans were already on nonaccrual status prior to modification. These loans may be returned to performing status (the accrual of interest is resumed) if the following criteria are met: (i) the borrower has performed under the modified terms for a minimum of six months and/or six payments, and (ii) the Firm has an expectation that repayment of the modified loan is reasonably assured based on, for example, the borrower's debt capacity and level of future earnings, collateral values, LTV ratios, and other current market considerations. In certain limited and well-defined circumstances in which the loan is current at the modification date, such loans are not placed on nonaccrual status at the time of modification.

The allowance for credit losses associated with FDMs is measured using the Firm's established allowance methodology, which considers the expected default rates for the modified loans. Refer to Note 13 for further discussion.

Foreclosed property

The Firm acquires property from borrowers through loan restructurings, workouts, and foreclosures. Property acquired may include real property (e.g., residential real estate, land, and buildings) and other commercial and personal property (e.g., automobiles, aircraft, railcars, and ships).

The Firm recognizes foreclosed property upon receiving assets in satisfaction of a loan (e.g., by taking legal title or physical possession). For loans collateralized by real property, the Firm generally recognizes the asset received at foreclosure sale or upon the execution of a deed in lieu of foreclosure transaction with the borrower. Foreclosed assets are reported in other assets on the Consolidated balance sheets and initially recognized at fair value less estimated costs to sell. Each quarter the fair value of the acquired property is reviewed and adjusted, if necessary, to the lower of cost or fair value. Subsequent adjustments to fair value are charged/credited to noninterest revenue. Operating expense, such as real estate taxes and maintenance, are charged to other expense.

Loan portfolio

The Firm's loan portfolio is divided into three portfolio segments, which are the same segments used by the Firm to determine the allowance for loan losses: Consumer, excluding credit card; Credit card; and Wholesale. Within each portfolio segment the Firm monitors and assesses the credit risk in the following classes of loans, based on the risk characteristics of each loan class.

Consumer, excluding credit card	Credit card	Wholesale[c][d]
• Residential real estate[a] • Auto and other[b]	• Credit card loans	• Secured by real estate • Commercial and industrial • Other[e]

(a) Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in CIB.
(b) Includes scored auto, business banking and consumer unsecured loans as well as overdrafts, primarily in CCB.
(c) Includes loans held in CIB, AWM, Corporate, and risk-rated exposure held in CCB, for which the wholesale methodology is applied when determining the allowance for loan losses.
(d) The wholesale portfolio segment's classes align with loan classifications as defined by the bank regulatory agencies, based on the loan's collateral, purpose, and type of borrower.
(e) Includes loans to financial institutions, SPEs, personal investment companies and trusts, individuals and individual entities (predominantly Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB), states and political subdivisions, as well as loans to nonprofits. Refer to Note 14 for more information on SPEs.

The following tables summarize the Firm's loan balances by portfolio segment.

December 31, 2024 (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total[a][b]
Retained	**$ 376,334**	**$ 232,860**	**$ 690,396**	**$ 1,299,590**
Held-for-sale	**945**	**—**	**6,103**	**7,048**
At fair value	**15,531**	**—**	**25,819**	**41,350**
Total	**$ 392,810**	**$ 232,860**	**$ 722,318**	**$ 1,347,988**

December 31, 2023 (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total[a][b]
Retained	$ 397,275	$ 211,123	$ 672,472	$ 1,280,870
Held-for-sale	487	—	3,498	3,985
At fair value	12,331	—	26,520	38,851
Total	$ 410,093	$ 211,123	$ 702,490	$ 1,323,706

(a) Excludes $6.6 billion and $6.8 billion of accrued interest receivable at December 31, 2024 and 2023, respectively. The Firm wrote off accrued interest receivable of $84 million and $49 million for the years ended December 31, 2024 and 2023, respectively.
(b) Loans (other than those for which the fair value option has been elected) are presented net of unamortized discounts and premiums and net deferred loan fees or costs. These amounts were not material as of December 31, 2024 and 2023. For the discount associated with First Republic loans, refer to Note 34 on pages 319–321.

The following tables provide information about the carrying value of retained loans purchased, sold and reclassified to held-for-sale during the periods indicated. Loans that were reclassified to held-for-sale and sold in a subsequent period are excluded from the sales line of these tables.

	2024			
Year ended December 31, (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total
Purchases	**$ 647** [b][c]	**$ —**	**$ 1,432**	**$ 2,079**
Sales	**10,440**	**—**	**45,147**	**55,587**
Retained loans reclassified to held-for-sale[a]	**1,656**	**—**	**749**	**2,405**

	2023			
Year ended December 31, (in millions)	Consumer, excluding credit card	Credit card	Wholesale	Total
Purchases	$ 92,205 [b][c][d]	$ —	$ 60,300 [d]	$ 152,505
Sales	2,202	—	43,949	46,151
Retained loans reclassified to held-for-sale[a]	274	—	1,486	1,760

Year ended December 31, (in millions)	2022			
	Consumer, excluding credit card	Credit card	Wholesale	Total
Purchases	$ 1,625 [b][c]	$ —	$ 1,088	$ 2,713
Sales	2,884	—	41,934	44,818
Retained loans reclassified to held-for-sale[a]	229	—	1,055	1,284

(a) Reclassifications of loans to held-for-sale are non-cash transactions.
(b) Includes purchases of residential real estate loans, including the Firm's voluntary repurchases of certain delinquent loans from loan pools as permitted by Government National Mortgage Association ("Ginnie Mae") guidelines for the years ended December 31, 2024, 2023 and 2022. The Firm typically elects to repurchase these delinquent loans as it continues to service them and/or manage the foreclosure process in accordance with applicable requirements of Ginnie Mae, FHA, RHS, and/or VA.
(c) Excludes purchases of retained loans of $902 million, $5.1 billion and $12.4 billion for the years ended December 31, 2024, 2023 and 2022, respectively, which are predominantly sourced through the correspondent origination channel and underwritten in accordance with the Firm's standards.
(d) Includes loans acquired in the First Republic acquisition consisting of $91.9 billion in Consumer, excluding credit card and $59.2 billion in Wholesale. Refer to Note 34 for additional information.

Gains and losses on sales of loans

Net gains/(losses) on sales of loans and lending-related commitments (including adjustments to record loans and lending-related commitments held-for-sale at the lower of cost or fair value) recognized in noninterest revenue were $154 million for the year ended December 31, 2024, of which $113 million were related to loans. Net gains/(losses) on sales of loans and lending-related commitments were $56 million for the year ended December 31, 2023, of which $62 million were related to loans. Net gains/(losses) on sales of loans and lending-related commitments were $(186) million for the year ended December 31, 2022, of which $(48) million were related to loans. In addition, the sale of loans may also result in write downs, recoveries or changes in the allowance recognized in the provision for credit losses.

Consumer, excluding credit card loan portfolio

Consumer loans, excluding credit card loans, consist primarily of scored residential mortgages, home equity loans and lines of credit, auto and business banking loans, with a focus on serving the prime consumer credit market. These loans include home equity loans secured by junior liens, prime mortgage loans with an interest-only payment period, and certain payment-option loans that may result in negative amortization.

The following table provides information about retained consumer loans, excluding credit card, by class.

December 31, (in millions)	2024	2023
Residential real estate	**$ 309,513**	$ 326,409
Auto and other	**66,821**	70,866
Total retained loans	**$ 376,334**	$ 397,275

Delinquency rates are the primary credit quality indicator for consumer loans. Loans that are more than 30 days past due provide an early warning of borrowers who may be experiencing financial difficulties and/or who may be unable or unwilling to repay the loan. As the loan continues to age, it becomes more clear whether the borrower is likely to be unable or unwilling to pay. In the case of residential real estate loans, late-stage delinquencies (greater than 150 days past due) are a strong indicator of loans that will ultimately result in a foreclosure or similar liquidation transaction. In addition to delinquency rates, other credit quality indicators for consumer loans vary based on the class of loan, as follows:

- For residential real estate loans, the current estimated LTV ratio, or the combined LTV ratio in the case of junior lien loans, is an indicator of the potential loss severity in the event of default. Additionally, LTV or combined LTV ratios can provide insight into a borrower's continued willingness to pay, as the delinquency rate of high-LTV loans tends to be greater than that for loans where the borrower has equity in the collateral. The geographic distribution of the loan collateral also provides insight as to the credit quality of the portfolio, as factors such as the regional economy, home price changes and specific events such as natural disasters, will affect credit quality. The borrower's current or "refreshed" FICO score is a secondary credit quality indicator for certain loans, as FICO scores are an indication of the borrower's credit payment history. Thus, a loan to a borrower with a low FICO score (less than 660) is considered to be of higher risk than a loan to a borrower with a higher FICO score. Further, a loan to a borrower with a high LTV ratio and a low FICO score is at greater risk of default than a loan to a borrower that has both a high LTV ratio and a high FICO score.
- For scored auto and business banking loans, geographic distribution is an indicator of the credit performance of the portfolio. Similar to residential real estate loans, geographic distribution provides insights into the portfolio performance based on regional economic activity and events.

Residential real estate

Delinquency is the primary credit quality indicator for retained residential real estate loans. The following tables provide information on delinquency and gross charge-offs.

	December 31, 2024								
	Term loans by origination year[c]						Revolving loans		
(in millions, except ratios)	2024	2023	2022	2021	2020	Prior to 2020	Within the revolving period	Converted to term loans	Total
Loan delinquency[a]

	December 31, 2023								
	Term loans by origination year[c]						Revolving loans		
(in millions, except ratios)	2023	2022	2021	2020	2019	Prior to 2019	Within the revolving period	Converted to term loans	Total
Loan delinquency[a]									
Current	$ 23,216	$ 64,366	$ 84,496	$ 55,546	$ 21,530	$59,563	$ 7,479	$ 8,151	$324,347
30–149 days past due	33	74	89	70	41	801	49	223	1,380
150 or more days past due	1	10	17	8	21	456	5	164	682
Total retained loans	$ 23,250	$ 64,450	$ 84,602	$ 55,624	$ 21,592	$60,820	$ 7,533	$ 8,538	$326,409
% of 30+ days past due to total retained loans[b]	0.15 %	0.13 %	0.13 %	0.14 %	0.29 %	2.04 %	0.72 %	4.53 %	0.63 %
Gross charge-offs	$ —	$ —	$ —	$ —	$ 4	$ 167	$ 26	$ 7	$ 204

(a) Individual delinquency classifications include mortgage loans insured by U.S. government agencies which were not material at December 31, 2024 and 2023.
(b) Excludes mortgage loans that are 30 or more days past due insured by U.S. government agencies which were not material at December 31, 2024 and 2023. These amounts have been excluded based upon the government guarantee.
(c) Purchased loans are included in the year in which they were originated.

Approximately 38% of the total revolving loans are senior lien loans; the remaining balance are junior lien loans. The lien position the Firm holds is considered in the Firm's allowance for credit losses. Revolving loans that have been converted to term loans have higher delinquency rates than those that are still within the revolving period. That is primarily because the fully-amortizing payment that is generally required for those products is higher than the minimum payment options available for revolving loans within the revolving period.

Nonaccrual loans and other credit quality indicators

The following table provides information on nonaccrual and other credit quality indicators for retained residential real estate loans.

(in millions, except weighted-average data)	**December 31, 2024**	December 31, 2023
Nonaccrual loans[(a)(b)(c)(d)]	**$ 2,984**	$ 3,466
Current estimated LTV ratios[(e)(f)(g)]		
Greater than 125% and refreshed FICO scores:		
Equal to or greater than 660	**$ 72**	$ 72
Less than 660	**3**	—
101% to 125% and refreshed FICO scores:		
Equal to or greater than 660	**161**	223
Less than 660	**5**	4
80% to 100% and refreshed FICO scores:		
Equal to or greater than 660	**4,962**	6,491
Less than 660	**73**	102
Less than 80% and refreshed FICO scores:		
Equal to or greater than 660	**294,797**	309,251
Less than 660	**8,534**	9,277
No FICO/LTV available[(h)]	**906**	989
Total retained loans	**$ 309,513**	$ 326,409
Weighted-average LTV ratio[(e)(i)]	**47 %**	49 %
Weighted-average FICO[(f)(i)]	**774**	770
Geographic region[(h)(j)]		
California	**$ 120,944**	$ 127,072
New York	**46,854**	48,815
Florida	**21,820**	22,778
Texas	**14,531**	15,506
Massachusetts	**13,511**	14,213
Colorado	**10,465**	10,800
Illinois	**9,835**	10,856
Washington	**9,372**	9,923
New Jersey	**7,554**	8,050
Connecticut	**6,854**	7,163
All other	**47,773**	51,233
Total retained loans	**$ 309,513**	$ 326,409

(a) Includes collateral-dependent residential real estate loans that are charged down to the fair value of the underlying collateral less costs to sell. The Firm reports, in accordance with regulatory guidance, residential real estate loans that have been discharged under Chapter 7 bankruptcy and not reaffirmed by the borrower ("Chapter 7 loans") as collateral-dependent nonaccrual loans, regardless of their delinquency status. At December 31, 2024, approximately 8% of Chapter 7 residential real estate loans were 30 days or more past due.
(b) Mortgage loans insured by U.S. government agencies excluded from nonaccrual loans were not material at December 31, 2024 and 2023.
(c) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
(d) Interest income on nonaccrual loans recognized on a cash basis was $160 million and $180 million for the years ended December 31, 2024 and 2023, respectively.
(e) Represents the aggregate unpaid principal balance of loans divided by the estimated current property value. Current property values are estimated, at a minimum, quarterly, based on home valuation models using nationally recognized home price index valuation estimates incorporating actual data to the extent available and forecasted data where actual data is not available. Current estimated combined LTV for junior lien home equity loans considers all available lien positions, as well as unused lines, related to the property.
(f) Refreshed FICO scores represent each borrower's most recent credit score, which is obtained by the Firm on at least a quarterly basis.
(g) Includes residential real estate loans, primarily held in LLCs in AWM that did not have a refreshed FICO score. These loans have been included in a FICO band based on management's estimation of the borrower's credit quality.
(h) Included U.S. government-guaranteed loans as of December 31, 2024 and 2023.
(i) Excludes loans with no FICO and/or LTV available.
(j) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December 31, 2024.

Loan modifications

The Firm grants certain modifications of residential real estate loans to borrowers experiencing financial difficulty. The Firm's proprietary modification programs as well as government programs, including U.S. GSE programs, that generally provide various modifications to borrowers experiencing financial difficulty including, but not limited to, interest rate reductions, term extensions, other-than-insignificant payment deferral and principal forgiveness that would otherwise have been required under the terms of the original agreement, are considered FDMs.

In addition, the Firm offers trial modifications of residential real estate loans, which generally include a three-month trial payment period during which the borrower makes monthly payments under the proposed modified loan terms. Loans in a trial payment period continue to age and accrue interest in accordance with the original contractual terms. At the completion of a trial period, the loan modification is considered permanent.

Financial effects of FDMs

For the year ended December 31, 2024, retained residential real estate FDMs were $206 million. The financial effects of the FDMs, which were predominantly in the form of term extensions and interest rate reductions, included extending the weighted-average life of the loans by 15 years, and reducing the weighted-average contractual interest rate from 7.53% to 5.44% for the year ended December 31, 2024.

For the year ended December 31, 2023, retained residential real estate FDMs were $136 million. The financial effects of the FDMs, which were predominantly in the form of term extensions and interest rate reductions, included extending the weighted-average life of the loans by 20 years, and reducing the weighted-average contractual interest rate from 7.21% to 4.44% for the year ended December 31, 2023.

As of December 31, 2024 and 2023, there were no additional commitments to lend to borrowers experiencing financial difficulty whose loans have been modified as FDMs.

For the years ended December 31, 2024 and 2023, loans subject to a trial modification, where the terms of the loans have not been permanently modified, and Chapter 7 loans were not material.

Payment status of FDMs

The following table provides information on the payment status of retained residential real estate FDMs during the years ended December 31, 2024 and 2023.

Year ended December 31, (in millions)	Amortized cost basis	
	2024	2023
Current	**$ 139**	$ 107
30-149 days past due	**47**	13
150 or more days past due	**20**	16
Total	**$ 206**	$ 136

Defaults of FDMs

Retained residential real estate FDMs that defaulted during the year ended December 31, 2024 and that were reported as FDMs in the twelve months prior to the default were $93 million. Retained residential real estate FDMs that defaulted during the year ended December 31, 2023 and that were reported as FDMs on or after January 1, 2023, the date that the Firm adopted the changes to the TDR accounting guidance were not material. Refer to Note 1 for further information.

Nature and extent of TDRs
For periods ending prior to January 1, 2023, modifications of residential real estate loans where the Firm granted concessions to borrowers who were experiencing financial difficulty were generally accounted for and reported as TDRs. Loans with short-term or other insignificant modifications that were not considered concessions were not TDRs. For the year ended December 31, 2022, new TDRs were $362 million, and there were no additional commitments to lend to borrowers whose residential real estate loans were modified in TDRs.

The Firm's proprietary modification programs as well as government programs, including U.S. GSE programs, generally provide various concessions to financially troubled borrowers including, but not limited to, interest rate reductions, term or payment extensions and delays of principal and/or interest payments that would otherwise have been required under the terms of the original agreement.

The following table provides information about how residential real estate loans were modified in TDRs during the period presented. This table excludes loans with short-term or other insignificant modifications that are not considered concessions.

Year ended December 31,	2022
Number of loans approved for a trial modification	3,902
Number of loans permanently modified	4,182
Concession granted:(a)	
Interest rate reduction	54 %
Term or payment extension	67
Principal and/or interest deferred	10
Principal forgiveness	1
Other(b)	37

(a) Represents concessions granted in permanent modifications as a percentage of the number of loans permanently modified. The sum of the percentages exceeds 100% because predominantly all of the modifications include more than one type of concession. Concessions offered on trial modifications are generally consistent with those granted on permanent modifications.
(b) Includes variable interest rate to fixed interest rate modifications and payment delays that meet the definition of a TDR.

Financial effects of TDRs and defaults
The following table provides information about the financial effects of the various concessions granted in modifications of residential real estate loans and about defaults of certain loans modified in TDRs for the period presented. The following table presents only the financial effects of permanent modifications and does not include temporary concessions offered through trial modifications. This table also excludes loans with short-term or other insignificant modifications that were not considered concessions.

Year ended December 31, (in millions, except weighted - average data)		2022
Weighted-average interest rate of loans with interest rate reductions – before TDR		4.75 %
Weighted-average interest rate of loans with interest rate reductions – after TDR		3.35
Weighted-average remaining contractual term (in years) of loans with term or payment extensions – before TDR		22
Weighted-average remaining contractual term (in years) of loans with term or payment extensions – after TDR		38
Charge-offs recognized upon permanent modification	$	1
Principal deferred		16
Principal forgiven		2
Balance of loans that defaulted within one year of permanent modification(a)	$	147

(a) Represents loans permanently modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The dollar amounts presented represent the balance of such loans at the end of the reporting period in which such loans defaulted.

Active and suspended foreclosure

At December 31, 2024 and 2023, the Firm had retained residential real estate loans, excluding those insured by U.S. government agencies, with a carrying value of $576 million and $566 million, respectively, that were not included in REO, but were in the process of active or suspended foreclosure.

Auto and other

Delinquency is the primary credit quality indicator for retained auto and other loans. The following tables provide information on delinquency and gross charge-offs.

	December 31, 2024								
	Term loans by origination year						Revolving loans

Nonaccrual loans and other credit quality indicators
The following table provides information on nonaccrual and geographic region as a credit quality indicator for retained auto and other consumer loans.

	Total Auto and other	
(in millions)	**December 31, 2024**	December 31, 2023
Nonaccrual loans[(a)(b)]	**$ 249**	$ 177
Geographic region[(c)]		
California	**$ 10,321**	$ 10,959
Texas	**7,772**	8,502
Florida	**5,428**	5,684
New York	**4,905**	4,938
Illinois	**2,890**	3,147
New Jersey	**2,468**	2,609
Pennsylvania	**2,012**	1,900
Georgia	**1,716**	1,912
Arizona	**1,643**	1,779
North Carolina	**1,597**	1,714
All other	**26,069**	27,722
Total retained loans	**$ 66,821**	$ 70,866

(a) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to charge down, the related allowance may be negative.
(b) Interest income on nonaccrual loans recognized on a cash basis was not material for the years ended December 31, 2024 and 2023.
(c) The geographic regions presented in this table are ordered based on the magnitude of the corresponding loan balances at December 31, 2024.

Loan modifications

The Firm grants certain modifications of auto and other loans to borrowers experiencing financial difficulty.

For the years ended December 31, 2024 and 2023, retained auto and other FDMs were not material.

As of December 31, 2024 and 2023, there were no additional commitments to lend to borrowers modified as FDMs.

For periods ending prior to January 1, 2023, modifications of auto and other loans where the Firm granted concessions to borrowers who were experiencing financial difficulty were generally accounted for and reported as TDRs. Loans with short-term or other insignificant modifications that were not considered concessions were not TDRs. For the year ended December 31, 2022, auto and other TDRs were not material.

Credit card loan portfolio

The credit card portfolio segment includes credit card loans originated and purchased by the Firm. Delinquency rates are the primary credit quality indicator for credit card loans as they provide an early warning that borrowers may be experiencing difficulties (30 days past due); information on those borrowers that have been delinquent for a longer period of time (90 days past due) is also considered. In addition to delinquency rates, the geographic distribution of the loans provides insight as to the credit quality of the portfolio based on the regional economy.

While the borrower's credit score is another general indicator of credit quality, the Firm does not view credit scores as a primary indicator of credit quality because the borrower's credit score tends to be a lagging indicator. The distribution of such scores provides a general indicator of credit quality trends within the portfolio; however, the score does not capture all factors that would be predictive of future credit performance. Refreshed FICO score information, which is obtained at least quarterly, for a statistically significant random sample of the credit card portfolio is indicated in other credit quality indicators. FICO is considered to be the industry benchmark for credit scores.

The Firm generally originates new credit card accounts to prime consumer borrowers. However, certain cardholders' FICO scores may decrease over time, depending on the performance of the cardholder and changes in the credit score calculation.

The following tables provide information on delinquency and gross charge-offs.

	December 31, 2024		
(in millions, except ratios)	Within the revolving period	Converted to term loans	Total

All other	**87,913**	80,287
Total retained loans	**$ 232,860**	$ 211,123
Percentage of portfolio based on carrying value with estimated refreshed FICO scores		
Equal to or greater than 660	**85.5 %**	85.8 %
Less than 660	**14.3**	14.0
No FICO available	**0.2**	0.2

(a) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December 31, 2024.

Loan modifications

The Firm grants certain modifications of credit card loans to borrowers experiencing financial difficulty. These modifications may involve placing the customer's credit card account on a fixed payment plan, generally for 60 months, which typically includes reducing the interest rate on the credit card account. If the borrower does not make the contractual payments when due under the modified payment terms, the credit card loan continues to age and will be charged-off in accordance with the Firm's standard charge-off policy. In most cases, the Firm does not reinstate the borrower's line of credit.

Financial effects of FDMs

The following table provides information on retained credit card FDMs.

Year ended December 31, (in millions)	Loan modifications	
	2024	2023
Term extension and interest rate reduction[(a)(b)]		
Amortized cost basis	**$ 926**	$ 648
% of total modifications to total retained credit card loans	**0.40 %**	0.31 %
Financial effect of loan modifications	**Term extension with a reduction in the weighted average contractual interest rate from 23.64% to 3.20%**	Term extension with a reduction in the weighted average contractual interest rate from 23.19% to 3.64%

(a) Term extension includes credit card loans whose terms have been modified under long-term programs by placing the customer's credit card account on a fixed payment plan.

(b) The interest rates represent weighted average at the time of modification.

Payment status of FDMs

The following table provides information on the payment status of retained credit card FDMs during the years ended December 31, 2024 and 2023.

Year ended December 31, (in millions)	Amortized cost basis 2024	2023
Current and less than 30 days past due and still accruing	**$ 811**	$ 558
30-89 days past due and still accruing	**74**	59
90 or more days past due and still accruing	**41**	31
Total	**$ 926**	$ 648

Defaults of FDMs

Retained credit card FDMs that defaulted during the year ended December 31, 2024 and that were reported as FDMs in the twelve months prior to the default were not material. Retained credit card FDMs that defaulted during the year ended December 31, 2023 and that were reported as FDMs on or after January 1, 2023, the date that the Firm adopted the changes to the TDR accounting guidance were not material. Refer to Note 1 for further information.

For credit card loans modified as FDMs, payment default is deemed to have occurred when the borrower misses two consecutive contractual payments. Defaulted modified credit card loans remain in the modification program and continue to be charged off in accordance with the Firm's standard charge-off policy.

Financial effects of TDRs and defaults

For periods ending prior to January 1, 2023, modifications of credit card loans where the Firm granted concessions to borrowers who were experiencing financial difficulty were generally accounted for and reported as TDRs. The Firm granted concessions for most of the credit card loans under long-term programs. These concessions involved placing the customer's credit card account on a fixed payment plan, generally for 60 months, and typically included reducing the interest rate on the credit card account. Substantially all modifications under the Firm's long-term programs were considered to be TDRs. Loans with short-term or other insignificant modifications that were not considered concessions were not reported as TDRs.

The following table provides information about the financial effects of the concessions granted on credit card loans modified in TDRs and defaults for the periods presented. For the period disclosed, new enrollments were less than 1% of total retained credit card loans.

Year ended December 31, (in millions, except weighted-average data)	2022
Balance of new TDRs[(a)]	$ 418
Weighted-average interest rate of loans – before TDR	19.86 %
Weighted-average interest rate of loans – after TDR	4.13
Balance of loans that defaulted within one year of modification[(b)]	$ 34

(a) Represents the outstanding balance prior to modification.
(b) Represents loans modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The amounts presented represent the balance of such loans as of the end of the quarter in which they defaulted.

For credit card loans modified in TDRs, payment default was deemed to have occurred when the borrower missed two consecutive contractual payments. Defaulted modified credit card loans remained in the modification program and continued to be charged of in accordance with the Firm's standard charge-off policy.

Wholesale loan portfolio

Wholesale loans include loans made to a variety of clients, ranging from large corporate and institutional clients to small businesses and high-net-worth individuals.

The primary credit quality indicator for wholesale loans is the internal risk rating assigned to each loan. Risk ratings are used to identify the credit quality of loans and differentiate risk within the portfolio. Risk ratings on loans consider the PD and the LGD. The PD is the likelihood that a loan will default. The LGD is the estimated loss on the loan that would be realized upon the default of the borrower and takes into consideration collateral and structural support for each credit facility.

Management considers several factors to determine an appropriate internal risk rating, including the obligor's debt capacity and financial flexibility, the level of the obligor's earnings, the amount and sources for repayment, the level and nature of contingencies, management strength, and the industry and geography in which the obligor operates. The Firm's internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S&P and Moody's, however the quantitative characteristics (e.g., PD and LGD) may differ as they reflect internal historical experiences and assumptions. The Firm generally considers internal ratings with qualitative characteristics equivalent to BBB-/Baa3 or higher as investment grade, and these ratings have a lower PD and/or lower LGD than non-investment grade ratings.

Noninvestment-grade ratings are further classified as noncriticized and criticized, and the criticized portion is further subdivided into performing and nonaccrual loans, representing management's assessment of the collectibility of principal and interest. Criticized loans have a higher PD than noncriticized loans. The Firm's definition of criticized aligns with the U.S. banking regulatory definition of criticized exposures, which consist of special mention, substandard and doubtful categories. Refer to Note 1 for additional information.

Risk ratings are reviewed on a regular and ongoing basis by Credit Risk Management and are adjusted as necessary for updated information affecting the obligor's ability to fulfill its obligations.

As noted above, the risk rating of a loan considers the industry in which the obligor conducts its operations. As part of the overall credit risk management framework, the Firm focuses on the management and diversification of its industry and client exposures, with particular attention paid to industries with an actual or potential credit concern. Refer to Note 4 for further detail on industry concentrations.

Internal risk rating is the primary credit quality indicator for retained wholesale loans. The following tables provide information on internal risk rating and gross charge-offs for the year ended December 31, 2024.

December 31, (in millions, except ratios)	Secured by real estate		Commercial and industrial		Other[(a)]		Total retained loans

(a) Includes loans to financial institutions, SPEs, personal investment companies and trusts, individuals and individual entities (predominantly Global Private Bank clients within AWM and J.P. Morgan Wealth Management within CCB), states and political subdivisions, as well as loans to nonprofits. Refer to Note 14 for more information on SPEs.

The following table presents additional information on retained loans secured by real estate, which consists of loans secured wholly or substantially by a lien or liens on real property at origination. Multifamily lending includes financing for acquisition, leasing and construction of apartment buildings. Other commercial lending largely includes financing for acquisition, leasing and construction, largely for office, retail and industrial real estate. Included in secured by real estate loans were $12.2 billion and $10.2 billion as of December 31, 2024 and 2023, respectively, of construction and development loans made to finance land development and on-site construction of commercial, industrial, residential, or farm buildings.

Total[(a)]	**$ 3**	**$ 210**	**$ 22**	$ 6	$ 50	$ 31

(a) Represents FDMs that were 30 days or more past due.

As of December 31, 2024 and 2023, additional unfunded commitments on modified loans to borrowers experiencing financial difficulty were $1.8 billion at each period in Commercial and industrial, and $69 million and $4 million, respectively, in Other loan class. Additional commitments on modified loans to borrowers experiencing financial difficulty whose loans have been modified as FDMs in Secured by real estate were not material at each period.

Nature and extent of TDRs

Prior to January 1, 2023, certain loan modifications were considered TDRs. These loan modifications provided various concessions to borrower who were experiencing financial difficulty. Loans with short-term or other insignificant modifications that were not considered concessions were not TDRs nor were loans for which the Firm elected to suspend TDR accounting guidance under the option provided by the CARES Act.

For the year ended December 31, 2022, new TDRs were $801 million. New TDRs for the year ended December 31, 2022 reflected extended maturity dates and covenant waivers primarily in the Commercial and Industrial loan class. For the year ended December 31, 2022, the impact of these modifications resulting in new TDRs was not material to the Firm.

As a result of the elimination of the requirement to assess whether a modification is reasonably expected or involves a concession, the population of loans considered FDMs is greater than the population previously considered TDRs.

Note 13 – Allowance for credit losses

The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses generally comprises:

- the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated),
- the allowance for lending-related commitments, which is presented on the Consolidated balance sheets in accounts payable and other liabilities, and
- the allowance for credit losses on investment securities, which is reflected in investment securities on the Consolidated balance sheets.

The income statement effect of all changes in the allowance for credit losses is recognized in the provision for credit losses.

Determining the appropriateness of the allowance for credit losses is complex and requires significant judgment by management about the effect of matters that are inherently uncertain. At least quarterly, the allowance for credit losses is reviewed by the CRO, the CFO and the Controller of the Firm. Subsequent evaluations of credit exposures, considering the macroeconomic conditions, forecasts and other factors then prevailing, may result in significant changes in the allowance for credit losses in future periods.

The Firm's policies used to determine its allowance for loan losses and its allowance for lending-related commitments are described in the following paragraphs. Refer to Note 10 for a description of the policies used to determine the allowance for credit losses on investment securities.

Methodology for allowances for loan losses and lending-related commitments

The allowance for loan losses and allowance for lending-related commitments represents expected credit losses over the remaining expected life of retained loans and lending-related commitments that are not unconditionally cancellable. The Firm does not record an allowance for future draws on unconditionally cancellable lending-related commitments (e.g., credit cards). Expected losses related to accrued interest on credit card loans are considered in the Firm's allowance for loan losses. However, the Firm does not record an allowance on other accrued interest receivables, due to its policy to write these receivables off no later than 90 days past due by reversing interest income.

The expected life of each instrument is determined by considering its contractual term, expected prepayments, cancellation features, and certain extension and call options. The expected life of funded credit card loans is generally estimated by considering expected future payments on the credit card account, and determining how much of those amounts should be allocated to repayments of the funded loan balance (as of the balance sheet date) versus other account activity. This allocation is made using an approach that incorporates the payment application requirements of the Credit Card Accountability Responsibility and Disclosure Act of 2009, generally paying down the highest interest rate balances first.

The estimate of expected credit losses includes expected recoveries of amounts previously charged off or expected to be charged off, even if such recoveries result in a negative allowance.

Collective and Individual Assessments

When calculating the allowance for loan losses and the allowance for lending-related commitments, the Firm assesses whether exposures share similar risk characteristics. If similar risk characteristics exist, the Firm estimates expected credit losses collectively, considering the risk associated with a particular pool and the probability that the exposures within the pool will deteriorate or default. The assessment of risk characteristics is subject to significant management judgment. Emphasizing one characteristic over another or considering additional characteristics could affect the allowance.

- Relevant risk characteristics for the consumer portfolio include product type, delinquency status, current FICO scores, geographic distribution, and, for collateralized loans, current LTV ratios.
- Relevant risk characteristics for the wholesale portfolio include risk rating, delinquency status, tenor, level and type of collateral, LOB, geography, industry, credit enhancement, product type, facility purpose, and payment terms.

The majority of the Firm's credit exposures share risk characteristics with other similar exposures, and as a result are collectively assessed for impairment ("portfolio-based component"). The portfolio-based component covers consumer loans, performing risk-rated loans and certain lending-related commitments.

If an exposure does not share risk characteristics with other exposures, the Firm generally estimates expected credit losses on an individual basis, considering expected repayment and conditions impacting that individual exposure ("asset-specific component"). The asset-specific component covers collateral-dependent loans and risk-rated loans that have been placed on nonaccrual status.

Portfolio-based component

The portfolio-based component begins with a quantitative calculation that considers the likelihood of the borrower changing delinquency status or moving from one risk rating to another. The quantitative calculation covers expected credit losses over an instrument's expected life and is estimated by applying credit loss factors to the Firm's estimated exposure at default. The credit loss factors incorporate the probability of borrower default as well as loss severity in the event of default. They are derived using a weighted average of five internally developed macroeconomic scenarios over an eight-quarter forecast period, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the eight-quarter forecast period. The five macroeconomic scenarios consist of a central, relative adverse, extreme adverse, relative upside and extreme upside scenario, and are updated by the Firm's central forecasting team. The scenarios take into consideration the Firm's macroeconomic outlook, internal perspectives from subject matter experts across the Firm, and market consensus and involve a governed process that incorporates feedback from senior management across LOBs, Corporate Finance and Risk Management.

The quantitative calculation is adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet reflected in the calculation. These adjustments are accomplished in part by analyzing the historical loss experience, including during stressed periods, for each major product or model. Management applies judgment in making this adjustment, including taking into account uncertainties associated with the economic and political conditions, quality of underwriting standards, borrower behavior, credit concentrations or deterioration within an industry, product or portfolio, as well as other relevant internal and external factors affecting the credit quality of the portfolio. In certain instances, the interrelationships between these factors create further uncertainties.

The application of different inputs into the quantitative calculation, and the assumptions used by management to adjust the quantitative calculation, are subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for loan losses and the allowance for lending-related commitments.

Asset-specific component
To determine the asset-specific component of the allowance, collateral-dependent loans (including those loans for which foreclosure is probable) and nonaccrual risk-rated loans in the wholesale portfolio segment are generally evaluated individually.

For collateral-dependent loans, the fair value of collateral less estimated costs to sell, as applicable, is used to determine the charge-off amount for declines in value (to reduce the amortized cost of the loan to the fair value of collateral) or the amount of negative allowance that should be recognized (for recoveries of prior charge-offs associated with improvements in the fair value of the collateral).

For non-collateral dependent loans, the Firm generally measures the asset-specific allowance as the difference between the amortized cost of the loan and the present value of the cash flows expected to be collected, discounted at the loan's effective interest rate. Subsequent changes in impairment are generally recognized as an adjustment to the allowance for loan losses. The asset-specific component of the allowance for non-collateral dependent loans incorporates the effect of the modification on the loan's expected cash flows including changes in interest rates, principal forgiveness, and other concessions, as well as management's expectation of the borrower's ability to repay under the modified terms.

Estimating the timing and amounts of future cash flows is highly judgmental as these cash flow projections rely upon estimates such as loss severities, asset valuations, the amounts and timing of interest or principal payments (including any expected prepayments) or other factors that are reflective of current and expected market conditions. These estimates are, in turn, dependent on factors such as the duration of current overall economic conditions, industry, portfolio, or borrower-specific factors, the expected outcome of insolvency proceedings as well as, in certain circumstances, other economic factors. All of these estimates and assumptions require significant management judgment and certain assumptions are highly subjective.

Other financial assets
In addition to loans and investment securities, the Firm holds other financial assets that are measured at amortized cost on the Consolidated balance sheets, including credit exposures arising from lending activities subject to collateral maintenance requirements. Management estimates the allowance for other financial assets using various techniques considering historical losses and current economic conditions.

Credit risk arising from lending activities subject to collateral maintenance requirements is generally mitigated by factors such as the short-term nature of the activity, the fair value of collateral held and the Firm's right to call for, and the borrower's obligation to provide additional margin when the fair value of the collateral declines. Because of these mitigating factors, these exposures generally do not require an allowance for credit losses. However, management may also consider other factors such as the borrower's ongoing ability to provide collateral to satisfy margin requirements, or whether collateral is significantly concentrated in an individual issuer or in securities with similar risk characteristics. If in management's judgment, an allowance for credit losses for these exposures is required, the Firm estimates expected credit losses based on the value of the collateral and probability of borrower default.

Allowance for credit losses and related information

The table below summarizes information about the allowances for credit losses and includes a breakdown of loans and lending-related commitments by impairment methodology. Refer to Note 10 for further information on the allowance for credit losses on investment securities.

(Table continued on next page)

Discussion of changes in the allowance

The allowance for credit losses as of December 31, 2024 was $26.9 billion, reflecting a net addition of $2.1 billion from December 31, 2023.

The net addition to the allowance for credit losses included:

- $2.1 billion in **consumer**, reflecting:
  - a $2.2 billion net addition in Card Services, predominantly driven by loan growth, reflecting higher revolving balances, including the seasoning of vintages originated in recent years,

  partially offset by

  - a $125 million net reduction in Home Lending in the first quarter of 2024, and
- a net reduction of $30 million in **wholesale**, reflecting:
  - changes in certain macroeconomic variables, an update to loss assumptions on certain loans in Markets, and a reduction due to charge-offs largely from collateral-dependent loans,

  predominantly offset by

  - net downgrade activity, primarily in Real Estate, and the impact of incorporating the First Republic portfolio into the Firm's modeled credit loss estimates in the second quarter of 2024.

The Firm's qualitative adjustments continued to include additional weight placed on the adverse scenarios to reflect ongoing uncertainties and downside risks related to the geopolitical and macroeconomic environment.

The Firm's allowance for credit losses is estimated using a weighted average of five internally developed macroeconomic scenarios. The adverse scenarios incorporate more punitive macroeconomic factors than the central case assumptions provided in the table below, resulting in:

- a weighted average U.S. unemployment rate peaking at 5.5% in the fourth quarter of 2025, and
- a weighted average U.S. real GDP level that is 1.9% lower than the central case at the end of the second quarter of 2026.

The following table presents the Firm's central case assumptions for the periods presented:

	Central case assumptions at December 31, 2024		
	2Q25	**4Q25**	**2Q26**
U.S. unemployment rate[(a)]	**4.5 %**	**4.3 %**	**4.3 %**
YoY growth in U.S. real GDP[(b)]	**2.0 %**	**1.9 %**	**1.8 %**

	Central case assumptions at December 31, 2023		
	2Q24	4Q24	2Q25
U.S. unemployment rate[(a)]	4.1 %	4.4 %	4.1 %
YoY growth in U.S. real GDP[(b)]	1.8 %	0.7 %	1.0 %

(a) Reflects quarterly average of forecasted U.S. unemployment rate.
(b) The year over year growth in U.S. real GDP in the forecast horizon of the central scenario is calculated as the percentage change in U.S. real GDP levels from the prior year.

Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

Refer to Note 12 for additional information on the consumer and wholesale credit portfolios.

Refer to Critical Accounting Estimates Used by the Firm on pages 161–164 for further information on the allowance for credit losses and related management judgments.

Note 14 – Variable interest entities

Refer to Note 1 on page 177 for a further description of the Firm's accounting policies regarding consolidation of and involvement with VIEs.

The following table summarizes the most significant types of Firm-sponsored VIEs by business segment. The Firm considers a "Firm-sponsored" VIE to include any entity where: (1) JPMorganChase is the primary beneficiary of the structure; (2) the VIE is used by JPMorganChase to securitize Firm assets; (3) the VIE issues financial instruments with the JPMorganChase name; or (4) the entity is a JPMorganChase–administered asset-backed commercial paper conduit.

Line of Business	*Transaction Type*	*Activity*	*2024 Form 10-K page references*
CCB	Credit card securitization trusts	Securitization of originated credit card receivables	pages 271–272
	Mortgage securitization trusts	Servicing and securitization of both originated and purchased residential mortgages	pages 272–274
CIB	Mortgage and other securitization trusts	Securitization of both originated and purchased residential and commercial mortgages, and other consumer loans	pages 272–274
	Multi-seller conduits	Assisting clients in accessing the financial markets in a cost-efficient manner and structuring transactions to meet investor needs	page 274
	Municipal bond vehicles	Financing of municipal bond investments	pages 274–275

The Firm's other business segments and Corporate are also involved with VIEs (both third-party and Firm-sponsored), but to a lesser extent, as follows:

- Asset & Wealth Management: AWM sponsors and manages certain funds that are deemed VIEs. As asset manager of the funds, AWM earns a fee based on assets managed; the fee varies with each fund's investment objective and is competitively priced. For fund entities that qualify as VIEs, AWM's interests are, in certain cases, considered to be significant variable interests that result in consolidation of the financial results of these entities.
- Corporate: Corporate is involved with entities that may meet the definition of VIEs; however these entities are generally subject to specialized investment company accounting, which does not require the consolidation of investments, including VIEs. In addition, Treasury and CIO invest in securities generally issued by third parties which may meet the definition of VIEs (e.g., issuers of asset-backed securities). In general, the Firm does not have the power to direct the significant activities of these entities and therefore does not consolidate these entities. Refer to Note 10 for further information on the Firm's investment securities portfolio.

In addition, CIB also invests in and provides financing, lending-related services and other services to VIEs sponsored by third parties. Refer to page 276 of this Note for more information on the VIEs sponsored by third parties.

Significant Firm-sponsored VIEs

Credit card securitizations

CCB's Card Services business may securitize originated credit card loans, primarily through the Chase Issuance Trust (the "Trust"). The Firm's continuing involvement in credit card securitizations includes servicing the receivables, retaining an undivided seller's interest in the receivables, retaining certain senior and subordinated securities and maintaining escrow accounts.

The Firm consolidates the assets and liabilities of its sponsored credit card trusts as it is considered to be the primary beneficiary of these securitization trusts based on the Firm's ability to direct the activities of these VIEs through its servicing responsibilities and other duties, including making decisions as to the receivables that are transferred into those trusts and as to any related modifications and workouts. Additionally, the nature and extent of the Firm's other continuing involvement with the trusts, as indicated above, obligates the Firm to absorb losses and gives the Firm the right to receive certain benefits from these VIEs that could potentially be significant.

The underlying securitized credit card receivables and other assets of the securitization trusts are available only for payment of the beneficial interests issued by the securitization trusts; they are not available to pay the Firm's other obligations or the claims of the Firm's creditors.

The agreements with the credit card securitization trusts require the Firm to maintain a minimum undivided interest in the credit card trusts (generally 5%). As of December 31, 2024 and 2023, the Firm held undivided interests in Firm-sponsored credit card securitization trusts of $6.6 billion and $4.9 billion, respectively. The Firm maintained an average undivided interest in principal receivables owned by those trusts of approximately 45% and 65% for the years ended December 31, 2024 and 2023, respectively. The Firm did not retain any senior securities and retained $1.5 billion of subordinated securities in certain of its credit card securitization trusts at both December 31, 2024 and 2023. The Firm's undivided interests in the credit card trusts and securities retained are eliminated in consolidation.

Firm-sponsored mortgage and other securitization trusts

The Firm securitizes (or has securitized) originated and purchased residential mortgages, commercial mortgages and other consumer loans primarily in its CCB and CIB businesses. Depending on the particular transaction, as well as the respective business involved, the Firm may act as the servicer of the loans and/or retain certain beneficial interests in the securitization trusts.

The following tables present the total unpaid principal amount of assets held in Firm-sponsored private-label securitization entities, including those in which the Firm has continuing involvement, and those that are consolidated by the Firm. Continuing involvement includes servicing the loans, holding senior interests or subordinated interests (including amounts required to be held pursuant to credit risk retention rules), recourse or guarantee arrangements, and derivative contracts. In certain instances, the Firm's only continuing involvement is servicing the loans. The Firm's maximum loss exposure from retained and purchased interests is the carrying value of these interests. Refer to page 279 of this Note for information on the securitization-related loan delinquencies and liquidation losses.

(a) Excludes U.S. GSEs and government agency securitizations and re-securitizations, which are not Firm-sponsored.
(b) Consists of securities backed by commercial real estate loans and non-mortgage-related consumer receivables.
(c) Excludes the following: retained servicing; securities retained from loan sales and securitization activity related to U.S. GSEs and government agencies; interest rate and foreign exchange derivatives primarily used to manage interest rate and foreign exchange risks of securitization entities; senior securities of $256 million and $52 million at December 31, 2024 and 2023, respectively, and subordinated securities which were not material at December 31, 2024 and 2023, which the Firm purchased in connection with CIB's secondary market-making activities.
(d) Includes interests held in re-securitization transactions.
(e) At both December 31, 2024 and 2023, 77% of the Firm's retained securitization interests, which are predominantly carried at fair value and include amounts required to be held pursuant to credit risk retention rules, were risk-rated "A" or better, on an S&P-equivalent basis. The retained interests in prime residential mortgages consisted of $2.9 billion and $2.5 billion of investment-grade retained interests at December 31, 2024 and 2023, respectively, and $216 million and $88 million of noninvestment-grade retained interests at December 31, 2024 and 2023, respectively. The retained interests in commercial and other securitization trusts consisted of $6.0 billion and $6.1 billion of investment-grade retained interests, and $1.4 billion and $1.7 billion of noninvestment-grade retained interests at December 31, 2024 and 2023, respectively.

Residential mortgage
The Firm securitizes residential mortgage loans originated by CCB, as well as residential mortgage loans purchased from third parties by either CCB or CIB. CCB generally retains servicing for all residential mortgage loans it originated or purchased, and for certain mortgage loans purchased by CIB. For securitizations of loans serviced by CCB, the Firm has the power to direct the significant activities of the VIE because it is responsible for decisions related to loan modifications and workouts. CCB may also retain an interest upon securitization.

In addition, CIB engages in underwriting and trading activities involving securities issued by Firm-sponsored securitization trusts. As a result, CIB at times retains senior and/or subordinated interests (including residual interests and amounts required to be held pursuant to credit risk retention rules) in residential mortgage securitizations at the time of securitization, and/or reacquires positions in the secondary market in the normal course of business. In certain instances, as a result of the positions retained or reacquired by CIB or held by Treasury and CIO or CCB, when considered together with the servicing arrangements entered into by CCB, the Firm is deemed to be the primary beneficiary of certain securitization trusts.

The Firm does not consolidate residential mortgage securitizations (Firm-sponsored or third-party-sponsored) when it is not the servicer (and therefore does not have the power to direct the most significant activities of the trust) or does not hold a beneficial interest in the trust that could potentially be significant to the trust.

Commercial mortgages and other consumer securitizations
CIB originates and securitizes commercial mortgage loans, and engages in underwriting and trading activities involving the securities issued by securitization trusts. CIB may retain unsold senior and/or subordinated interests (including amounts required to be held pursuant to credit risk retention rules) in commercial mortgage securitizations at the time of securitization but, generally, the Firm does not service commercial loan securitizations. Treasury and CIO may choose to invest in these securitizations as well. For commercial mortgage securitizations the power to direct the significant activities of the VIE generally is held by the servicer or investors in a specified class of securities ("controlling class"). The Firm generally does not retain an interest in the controlling class in its sponsored commercial mortgage securitization transactions.

Re-securitizations
The Firm engages in certain re-securitization transactions in which debt securities are transferred to a VIE in exchange for new beneficial interests. These transfers occur in connection with both U.S. GSEs and government agency sponsored VIEs, which are backed by residential mortgages. The Firm's consolidation analysis is largely dependent on the Firm's role and interest in the re-securitization trusts.

The following table presents the principal amount of securities transferred to re-securitization VIEs.

Year ended December 31, (in millions)	**2024**	2023	2022
Transfers of securities to VIEs			
U.S. GSEs and government agencies	**$ 44,456**	$ 18,864	$ 16,128

Most re-securitizations with which the Firm is involved are client-driven transactions in which a specific client or group of clients is seeking a specific return or risk profile. For these transactions, the Firm has concluded that the decision-making power of the entity is shared between the Firm and its clients, considering the joint effort and decisions in establishing the re-securitization trust and its assets, as well as the significant economic interest the client holds in the re-securitization trust; therefore the Firm does not consolidate the re-securitization VIE.

The Firm did not transfer any private label securities to re-securitization VIEs during 2024, 2023 and 2022, and retained interests in any such Firm-sponsored VIEs as of December 31, 2024 and 2023 were not material.

Additionally, the Firm may invest in beneficial interests of third-party-sponsored re-securitizations and generally purchases these interests in the secondary market. In these circumstances, the Firm does not have the unilateral ability to direct the most significant activities of the re-securitization trust, either because it was not involved in the initial design of the trust, or the Firm was involved with an independent third-party sponsor and demonstrated shared power over the creation of the trust; therefore, the Firm does not consolidate the re-securitization VIE.

The following table presents information on the Firm's interests in nonconsolidated re-securitization VIEs.

December 31, (in millions)	Nonconsolidated re-securitization VIEs 2024	2023
U.S. GSEs and government agencies		
Interest in VIEs	**$ 3,219**	$ 3,371

As of December 31, 2024 and 2023, the Firm did not consolidate any U.S. GSE and government agency re-securitization VIEs or any Firm-sponsored private-label re-securitization VIEs.

Multi-seller conduits

Multi-seller conduit entities are separate bankruptcy remote entities that provide secured financing, collateralized by pools of receivables and other financial assets, to customers of the Firm. The conduits fund their financing facilities through the issuance of highly rated commercial paper. The primary source of repayment of the commercial paper is the cash flows from the pools of assets. In most instances, the assets are structured with deal-specific credit enhancements provided to the conduits by the customers (i.e., sellers) or other third parties. Deal-specific credit enhancements are generally structured to cover a multiple of historical losses expected on the pool of assets, and are typically in the form of overcollateralization provided by the seller. The deal-specific credit enhancements mitigate the Firm's potential losses on its agreements with the conduits.

To ensure timely repayment of the commercial paper, and to provide the conduits with funding to provide financing to customers in the event that the conduits do not obtain funding in the commercial paper market, each asset pool financed by the conduits has a minimum 100% deal-specific liquidity facility associated with it provided by JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. also provides the multi-seller conduit vehicles with uncommitted program-wide liquidity facilities and program-wide credit enhancement in the form of standby letters of credit. The amount of program-wide credit enhancement required is based upon commercial paper issuance and approximates 10% of the outstanding balance of commercial paper.

The Firm consolidates its Firm-administered multi-seller conduits, as the Firm has both the power to direct the significant activities of the conduits and a potentially significant economic interest in the conduits. As administrative agent and in its role in structuring transactions, the Firm makes decisions regarding asset types and credit quality, and manages the commercial paper funding needs of the conduits. The Firm's interests that could potentially be significant to the VIEs include the fees received as administrative agent and liquidity and program-wide credit enhancement provider, as well as the potential exposure created by the liquidity and credit enhancement facilities provided to the conduits.

In the normal course of business, JPMorganChase makes markets in and invests in commercial paper issued by the Firm-administered multi-seller conduits. The Firm held $2.9 billion and $9.8 billion of the commercial paper issued by the Firm-administered multi-seller conduits at December 31, 2024 and 2023, respectively, which have been eliminated in consolidation. The Firm's investments reflect the Firm's funding needs and capacity and were not driven by market illiquidity. Other than the amounts required to be held pursuant to credit risk retention rules, the Firm is not obligated under any agreement to purchase the commercial paper issued by the Firm-administered multi-seller conduits.

Deal-specific liquidity facilities, program-wide liquidity and credit enhancement provided by the Firm have been eliminated in consolidation. The Firm or the Firm-administered multi-seller conduits provide lending-related commitments to certain clients of the Firm-administered multi-seller conduits. The unfunded commitments were $10.3 billion and $10.8 billion at December 31, 2024 and 2023, respectively, and are reported as off-balance sheet lending-related commitments in other unfunded commitments to extend credit. Refer to Note 28 for more information on off-balance sheet lending-related commitments.

Municipal bond vehicles

Municipal bond vehicles or tender option bond ("TOB") trusts allow institutions to finance their municipal bond investments at short-term rates. In a typical TOB transaction, the trust purchases highly rated municipal bond(s) of a single issuer and funds the purchase by issuing two types of securities: (1) puttable floating-rate certificates ("floaters") and (2) inverse floating-rate residual interests ("residuals"). The floaters are typically purchased by money market funds or other short-term investors and may be tendered, with requisite notice, to the TOB trust. The residuals are retained by the investor seeking to finance its municipal bond investment. TOB transactions where the residual is held by a third-party investor are typically known as customer TOB trusts, and non-customer TOB trusts are transactions where the Residual is retained by the Firm. Customer TOB trusts are sponsored by a third party. The Firm serves as sponsor for all non-customer TOB transactions. The Firm may provide various services to a TOB trust, including remarketing agent, liquidity or tender option provider, and/or sponsor.

J.P. Morgan Securities LLC may serve as a remarketing agent on the floaters for TOB trusts. The remarketing agent is responsible for establishing the periodic variable rate on the floaters, conducting the initial placement and remarketing tendered floaters. The remarketing agent may, but is not obligated to, make markets in floaters. Floaters held by the Firm were not material during 2024 and 2023.

JPMorgan Chase Bank, N.A. or J.P. Morgan Securities LLC often serves as the sole liquidity or tender option provider for the TOB trusts. The liquidity provider's obligation to perform is conditional and is limited by certain events ("Termination Events"), which include bankruptcy or failure to pay by the municipal bond issuer or credit enhancement provider, an event of taxability on the municipal bonds or the immediate downgrade of the municipal bond to below investment grade. In addition, the liquidity provider's exposure is typically further limited by the high credit quality of the underlying municipal bonds, the excess collateralization in the vehicle, or, in certain transactions, the reimbursement agreements with the Residual holders.

Holders of the floaters may "put," or tender, their floaters to the TOB trust. If the remarketing agent cannot successfully remarket the floaters to another investor, the liquidity provider either provides a loan to the TOB trust for the TOB trust's purchase of the floaters, or it directly purchases the tendered floaters.

TOB trusts are considered to be variable interest entities. The Firm consolidates non-customer TOB trusts because as the Residual holder, the Firm has the right to make decisions that significantly impact the economic performance of the municipal bond vehicle, and it has the right to receive benefits and bear losses that could potentially be significant to the municipal bond vehicle.

Consolidated VIE assets and liabilities

The following table presents information on assets and liabilities related to VIEs consolidated by the Firm as of December 31, 2024 and 2023.

December 31, 2024 (in millions)	Assets				Liabilities		
	Trading assets	Loans	Other[c]	Total assets[d]	Beneficial interests in VIE assets[e]	Other[f]	Total liabilities

December 31, 2023 (in millions)	Assets				Liabilities		
	Trading assets	Loans	Other[c]	Total assets[d]	Beneficial interests in VIE assets[e]	Other[f]	Total liabilities
VIE program type							
Firm-sponsored credit card trusts	$ —	$ 9,460	$ 117	$ 9,577	$ 2,998	$ 6	$ 3,004
Firm-administered multi-seller conduits	1	27,372	194	27,567	17,781	30	17,811
Municipal bond vehicles	2,056	—	22	2,078	2,116	11	2,127
Mortgage securitization entities[a]	—	693	8	701	125	57	182
Other	113	86	250	449	—	159	159
Total	$ 2,170	$ 37,611	$ 591	$ 40,372	$ 23,020	$ 263	$ 23,283

(a) Includes residential mortgage securitizations.
(b) Primarily includes consumer loans in CIB.
(c) Includes assets classified as cash and other assets on the Consolidated balance sheets.
(d) The assets of the consolidated VIEs included in the program types above are used to settle the liabilities of those entities. The assets and liabilities include third-party assets and liabilities of consolidated VIEs and exclude intercompany balances that eliminate in consolidation.
(e) The interest-bearing beneficial interest liabilities issued by consolidated VIEs are classified on the Consolidated balance sheets as "Beneficial interests issued by consolidated VIEs". The holders of these beneficial interests generally do not have recourse to the general credit of JPMorganChase. Included in beneficial interests in VIE assets are long-term beneficial interests of $5.5 billion and $3.1 billion at December 31, 2024 and 2023, respectively.
(f) Includes liabilities classified as accounts payable and other liabilities on the Consolidated balance sheets.

VIEs sponsored by third parties

The Firm enters into transactions with VIEs structured by other parties. These include, for example, acting as a derivative counterparty, liquidity provider, investor, underwriter, placement agent, remarketing agent, trustee or custodian. These transactions are conducted at arm's-length, and individual credit decisions are based on the analysis of the specific VIE, taking into consideration the quality of the underlying assets. Where the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, or a variable interest that could potentially be significant, the Firm generally does not consolidate the VIE, but it records and reports these positions on its Consolidated balance sheets in the same manner it would record and report positions in respect of any other third-party transaction.

Tax credit vehicles

The Firm holds investments in unconsolidated tax credit vehicles, which are limited partnerships and similar entities that own and operate affordable housing, alternative energy, and other projects. These entities are primarily considered VIEs. A third party is typically the general partner or managing member and has control over the significant activities of the tax credit vehicles, and accordingly the Firm does not consolidate tax credit vehicles. The Firm generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits allocated to the projects. The maximum loss exposure, represented by equity investments and funding commitments, was $35.2 billion and $35.1 billion, of which $15.0 billion and $14.7 billion was unfunded at December 31, 2024 and 2023, respectively. The Firm assesses each project and to reduce the risk of loss, may withhold varying amounts of its capital investment until the project qualifies for tax credits. Refer to Note 28 for more information on off-balance sheet lending-related commitments.

Effective January 1, 2024, the Firm adopted updates to the Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method guidance which expanded the types of tax-oriented investments, beyond affordable housing tax credit investments, that the Firm can elect on a program by program basis, to be accounted for using the proportional amortization method. Refer to Notes 1, 6 and 25 for further information.

The proportional amortization method requires the cost of eligible investments, within an elected program, be amortized in proportion to the tax benefits received with the resulting amortization reported directly in income tax expense, which aligns with the associated tax credits and other tax benefits. Investments must meet certain criteria to be eligible, including that substantially all of the return is from income tax credits and other income tax benefits.

In addition, under this method deferred taxes are generally not recorded as the investment is now amortized in proportion to the income tax credits and other income tax benefits received. Delayed equity contributions that are unconditional and legally binding or conditional and probable of occurring are recorded in other liabilities with a corresponding increase in the carrying value of the investment. The guidance also requires a reevaluation of eligible investments when significant modifications or events occur that result in a change in the nature of the investment or a change in the Firm's relationship with the underlying project. During the period, there were no significant modifications or events that resulted in a change in the nature of an eligible investment or a change in the Firm's relationship with the underlying project.

The following table provides information on tax-oriented investments for which the Firm elected to apply the proportional amortization method.

Year ended December 31, (in millions)	Alternative energy and affordable housing programs[(d)]		
	2024	2023	2022
Programs for which the Firm elected proportional amortization:			
Carrying value[(a)]	**$ 31,978**	$ 14,644	$ 12,052
Tax credits and other tax benefits[(b)]	**6,379**	2,044	1,786
Investments that qualify to be accounted for using proportional amortization:			
Amortization losses recognized as a component of income tax expense	**(5,018)**	(1,561)	(1,353)
Non-income-tax-related gains/(losses) and other returns received that are recognized outside of income tax expense[(c)]	**142**	(1)	(1)

(a) Recorded in Other assets on the Consolidated balance sheets. Excludes programs to which the Firm does not apply the proportional amortization method, such as historic tax credit and new market tax credit programs.
(b) Reflected in Income tax expense on the Consolidated statements of income and Operating activities on the Consolidated statements of cash flows.
(c) Recorded in Other income on the Consolidated statements of income and Operating activities on the Consolidated statements of cash flows.
(d) As of December 31, 2023 and 2022 represents eligible affordable housing investments.

Customer municipal bond vehicles (TOB trusts)
The Firm may provide various services to customer TOB trusts, including remarketing agent, liquidity or tender option provider. In certain customer TOB transactions, the Firm, as liquidity provider, has entered into a reimbursement agreement with the Residual holder. In those transactions, upon the termination of the vehicle, the Firm has recourse to the third-party Residual holders for any shortfall. The Firm does not have any intent to protect Residual holders from potential losses on any of the underlying municipal bonds. The Firm does not consolidate customer TOB trusts, since the Firm does not have the power to make decisions that significantly impact the economic performance of the municipal bond vehicle.

The Firm's maximum exposure as a liquidity provider to customer TOB trusts at December 31, 2024 and 2023, was $5.8 billion and $5.1 billion, respectively. The fair value of assets held by such VIEs at December 31, 2024 and 2023 was $8.1 billion and $7.3 billion, respectively.

Loan securitizations

The Firm has securitized and sold a variety of loans, including residential mortgages, credit card receivables, commercial mortgages and other consumer loans. The purposes of these securitization transactions were to satisfy investor demand and to generate liquidity for the Firm.

For loan securitizations in which the Firm is not required to consolidate the trust, the Firm records the transfer of the loan receivable to the trust as a sale when all of the following accounting criteria for a sale are met: (1) the transferred financial assets are legally isolated from the Firm's creditors; (2) the transferee or beneficial interest holder can pledge or exchange the transferred financial assets; and (3) the Firm does not maintain effective control over the transferred financial assets (e.g., the Firm cannot repurchase the transferred assets before their maturity and it does not have the ability to unilaterally cause the holder to return the transferred assets).

For loan securitizations accounted for as a sale, the Firm recognizes a gain or loss based on the difference between the value of proceeds received (including cash, beneficial interests, or servicing assets received) and the carrying value of the assets sold. Gains and losses on securitizations are reported in noninterest revenue.

Securitization activity

The following table provides information related to the Firm's securitization activities for the years ended December 31, 2024, 2023 and 2022, related to assets held in Firm-sponsored securitization entities that were not consolidated by the Firm, and where sale accounting was achieved at the time of the securitization.

	2024		2023		2022	
Year ended December 31, (in millions)	Residential mortgage[d]	Commercial and other[e]	Residential mortgage[d]	Commercial and other[e]	Residential mortgage[d]	Commercial and other[e]
Principal securitized	**$ 19,988**	**$ 17,683**	$ 7,678	$ 3,901	$ 10,218	$ 9,036
All cash flows during the period:[a]						
Proceeds received from loan sales as financial instruments[b][c]	**$ 19,870**	**$ 17,346**	$ 7,251	$ 3,896	$ 9,783	$ 8,921
Servicing fees collected	**35**	**35**	24	5	62	2
Cash flows received on interests	**405**	**1,303**	325	425	489	285

(a) Excludes re-securitization transactions.
(b) Primarily includes Level 2 assets.
(c) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.
(d) Represents prime mortgages. Excludes loan securitization activity related to U.S. GSEs and government agencies.
(e) Includes commercial mortgages and auto loans.

Key assumptions used to value retained interests originated during the year are shown in the table below.

Year ended December 31,	2024	2023	2022
Residential mortgage retained interest:			
Weighted-average life (in years)	**4.3**	9.6	10.8
Weighted-average discount rate	**7.1 %**	4.8 %	4.0 %
Commercial and other retained interest:			
Weighted-average life (in years)	**4.5**	3.0	5.9
Weighted-average discount rate	**6.2 %**	4.6 %	2.9 %

Loans and excess MSRs sold to U.S. government-sponsored enterprises and loans in securitization transactions pursuant to Ginnie Mae guidelines

In addition to the amounts reported in the securitization activity tables above, the Firm, in the normal course of business, sells originated and purchased mortgage loans and certain originated excess MSRs on a nonrecourse basis, predominantly to U.S. GSEs. These loans and excess MSRs are sold primarily for the purpose of securitization by the U.S. GSEs, who provide certain guarantee provisions (e.g., credit enhancement of the loans). The Firm also sells loans into securitization transactions pursuant to Ginnie Mae guidelines; these loans are typically insured or guaranteed by another U.S. government agency. The Firm does not consolidate the securitization vehicles underlying these transactions as it is not the primary beneficiary. For a limited number of loan sales, the Firm is obligated to share a portion of the credit risk associated with the sold loans with the purchaser. Refer to Note 28 for additional information about the Firm's loan sales- and securitization-related indemnifications and Note 15 for additional information about the impact of the Firm's sale of certain excess MSRs.

The following table summarizes the activities related to loans sold to the U.S. GSEs, and loans in securitization transactions pursuant to Ginnie Mae guidelines.

Year ended December 31, (in millions)	2024	2023	2022
Carrying value of loans sold	**$ 25,765**	$ 19,906	$ 48,891
Proceeds received from loan sales as cash	**$ 2,380**	$ 300	$ 22
Proceeds from loan sales as securities[a][b]	**23,178**	19,389	48,096
Total proceeds received from loan sales[c]	**$ 25,558**	$ 19,689	$ 48,118
Gains/(losses) on loan sales[d][e]	**$ —**	$ —	$ (25)

(a) Includes securities from U.S. GSEs and Ginnie Mae that are generally sold shortly after receipt or retained as part of the Firm's investment securities portfolio.
(b) Included in level 2 assets.
(c) Excludes the value of MSRs retained upon the sale of loans.
(d) Gains/(losses) on loan sales include the value of MSRs.
(e) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.

Options to repurchase delinquent loans

In addition to the Firm's obligation to repurchase certain loans due to material breaches of representations and warranties as discussed in Note 28, the Firm also has the option to repurchase delinquent loans that it services for Ginnie Mae loan pools, as well as for other U.S. government agencies under certain arrangements. The Firm typically elects to repurchase delinquent loans from Ginnie Mae loan pools as it continues to service them and/or manage the foreclosure process in accordance with the applicable requirements, and such loans continue to be insured or guaranteed. When the Firm's repurchase option becomes exercisable, such loans must be reported on the Consolidated balance sheets as a loan with a corresponding liability. Refer to Note 12 for additional information.

The following table presents loans the Firm repurchased or had an option to repurchase, real estate owned, and foreclosed government-guaranteed residential mortgage loans recognized on the Firm's Consolidated balance sheets as of December 31, 2024 and 2023. Substantially all of these loans and real estate are insured or guaranteed by U.S. government agencies.

December 31, (in millions)	**2024**	2023
Loans repurchased or option to repurchase[(a)]	**$ 577**	$ 597
Real estate owned	**6**	8
Foreclosed government-guaranteed residential mortgage loans[(b)]	**10**	22

(a) Primarily all of these amounts relate to loans that have been repurchased from Ginnie Mae loan pools.
(b) Relates to voluntary repurchases of loans, which are included in accrued interest and accounts receivable.

Loan delinquencies and liquidation losses

The table below includes information about components of and delinquencies related to nonconsolidated securitized financial assets held in Firm-sponsored private-label securitization entities, in which the Firm has continuing involvement as of December 31, 2024 and 2023. For loans sold or securitized where servicing is the Firm's only form of continuing involvement, the Firm generally experiences a loss only if the Firm was required to repurchase a delinquent loan or foreclosed asset due to a breach in representations and warranties associated with its loan sale or servicing contracts.

As of or for the year ended December 31, (in millions)	Securitized assets		90 days past due		Net liquidation losses / (recoveries)	
	2024	2023	**2024**	2023	**2024**	2023
Securitized loans						
Residential mortgage:						
Prime/ Alt-A & option ARMs	**$ 50,846**	$ 39,319	**$ 501**	$ 440	**$ 10**	$ 14
Subprime	**1,847**	1,312	**113**	131	**2**	5
Commercial and other	**125,510**	120,262	**1,715**	2,874	**77**	60
Total loans securitized	**$ 178,203**	$ 160,893	**$ 2,329**	$ 3,445	**$ 89**	$ 79

Note 15 – Goodwill, mortgage servicing rights, and other intangible assets

Goodwill

Goodwill is recorded upon completion of a business combination as the difference between the purchase price and the fair value of the net assets acquired, and can be adjusted up to one year from the acquisition date as additional information pertaining to facts and circumstances that existed as of the acquisition date is obtained about the fair value of assets acquired and liabilities assumed. Subsequent to initial recognition, goodwill is not amortized but is tested for impairment during the fourth quarter of each fiscal year, or more often if events or circumstances, such as adverse changes in the business climate, indicate that there may be an impairment.

The goodwill associated with each business combination is allocated to the related reporting units, which are generally determined based on how the Firm's businesses are managed and how they are reviewed. The following table presents goodwill attributed to the reportable business segments and Corporate.

December 31, (in millions)	**2024**	2023	2022
Consumer & Community Banking	**$ 32,116**	$ 32,116	$ 32,121
Commercial & Investment Bank	**11,236**	11,251	10,993
Asset & Wealth Management	**8,521**	8,582	7,902
Corporate	**692**	685	646
Total goodwill	**$ 52,565**	$ 52,634	$ 51,662

The following table presents changes in the carrying amount of goodwill.

(in millions)	**2024**	2023	2022
Balance at beginning of period	**$ 52,634**	$ 51,662	$ 50,315
Changes during the period from:			
Business combinations[(a)]	**29**	917	1,426
Other[(b)]	**(98)**	55	(79)
Balance at December 31,	**$ 52,565**	$ 52,634	$ 51,662

(a) For 2024, includes estimated goodwill associated with the acquisition of LayerOne Financial in CIB. For 2023, predominantly represents estimated goodwill associated with the acquisition of the remaining 51% interest in CIFM in AWM and the acquisition of Aumni Inc., predominantly in CIB. For 2022, represents estimated goodwill associated with the acquisitions of Global Shares PLC in AWM, Frosch Travel Group, LLC and Figg, Inc. in CCB, and Renovite Technologies, Inc. and Volkswagen Payments S.A. in CIB.
(b) Primarily foreign currency adjustments.

Goodwill impairment testing

The Firm's goodwill was not impaired at December 31, 2024, 2023 and 2022.

The goodwill impairment test is generally performed by comparing the current fair value of each reporting unit with its carrying value. If the fair value is in excess of the carrying value, then the reporting unit's goodwill is considered not to be impaired. If the fair value is less than the carrying value, then an impairment is recognized for the amount by which the reporting unit's carrying value exceeds its fair value, up to the amount of goodwill allocated to that reporting unit.

The Firm uses the reporting units' allocated capital plus goodwill and other intangible assets as a proxy for the carrying values of equity for the reporting units in the goodwill impairment testing. Reporting unit equity is determined on a similar basis as the allocation of capital to the LOBs which takes into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. LOB's allocated capital levels are incorporated into the Firm's annual budget process, which is reviewed by the Firm's Board of Directors and Operating Committee.

The primary method the Firm uses to estimate the fair value of its reporting units is the income approach. This approach projects cash flows for the forecast period and uses the perpetuity growth method to calculate terminal values. These cash flows and terminal values, which are based on the reporting units' annual budgets and forecasts are then discounted using an appropriate discount rate. The discount rate used for each reporting unit represents an estimate of the cost of equity for that reporting unit and is determined considering the Firm's overall estimated cost of equity (estimated using the Capital Asset Pricing Model), as adjusted for the risk characteristics specific to each reporting unit (for example, for higher levels of risk or uncertainty associated with the business or management's forecasts and assumptions). To assess the reasonableness of the discount rates used for each reporting unit, management compares the discount rate to the estimated cost of equity for publicly traded institutions with similar businesses and risk characteristics. In addition, the weighted average cost of equity (aggregating the various reporting units) is compared with the Firm's overall estimated cost of equity for reasonableness. The valuations derived from the discounted cash flow analysis are then compared with market-based trading and transaction multiples for relevant competitors. Trading and transaction comparables are used as general indicators to assess the overall reasonableness of the estimated fair values, although precise conclusions generally cannot be drawn due to the differences that naturally exist between the Firm's businesses and competitor institutions.

The Firm also takes into consideration a comparison between the aggregate fair values of the Firm's reporting units and JPMorganChase's market capitalization. In evaluating this comparison, the Firm considers several factors, including (i) a control premium that would exist in a market transaction, (ii) factors related to the level of execution risk that would exist at the Firmwide level that do not exist at the reporting unit level and (iii) short-term market volatility and other factors that do not directly affect the value of individual reporting units.

Unanticipated declines in business performance, increases in credit losses, increases in capital requirements, as well as deterioration in economic or market conditions, adverse regulatory or legislative changes or increases in the estimated market cost of equity, could cause the estimated fair values of the Firm's reporting units to decline in the future, which could result in a material impairment loss to earnings in a future period related to some portion of the associated goodwill.

Mortgage servicing rights

MSRs represent the fair value of expected future cash flows for performing servicing activities for others. The fair value considers estimated future servicing fees and ancillary revenue, offset by estimated costs to service the loans, and generally declines over time as net servicing cash flows are received, effectively amortizing the MSR asset against contractual servicing and ancillary fee income. MSRs are either purchased from third parties or recognized upon sale or securitization of mortgage loans if servicing is retained.

As permitted by U.S. GAAP, the Firm has elected to account for its MSRs at fair value. The Firm treats its MSRs as a single class of servicing assets based on the availability of market inputs used to measure the fair value of its MSR asset and its treatment of MSRs as one aggregate pool for risk management purposes. The Firm estimates the fair value of MSRs using an option-adjusted spread ("OAS") model, which projects MSR cash flows over multiple interest rate scenarios in conjunction with the Firm's prepayment model, and then discounts these cash flows at risk-adjusted rates. The model considers portfolio characteristics, contractually specified servicing fees, prepayment assumptions, delinquency rates, costs to service, late charges and other ancillary revenue, and other economic factors. The Firm compares fair value estimates and assumptions to observable market data where available, and also considers recent market activity and actual portfolio experience.

The fair value of MSRs is sensitive to changes in interest rates, including their effect on prepayment speeds. MSRs typically decrease in value when interest rates decline because declining interest rates tend to increase prepayments and therefore reduce the expected life of the net servicing cash flows that comprise the MSR asset. Conversely, securities (e.g., mortgage-backed securities), and certain derivatives (e.g., those for which the Firm receives fixed-rate interest payments) increase in value when interest rates decline. JPMorganChase uses combinations of derivatives and securities to manage the risk of changes in the fair value of MSRs. The intent is to offset any interest-rate related changes in the fair value of MSRs with changes in the fair value of the related risk management instruments.

The following table summarizes MSR activity for the years ended December 31, 2024, 2023 and 2022.

As of or for the year ended December 31, (in millions, except where otherwise noted)	**2024**	2023	2022
Fair value at beginning of period	**$ 8,522**	$ 7,973	$ 5,494
MSR activity:			
Originations of MSRs	**325**	253	798
Purchase of MSRs[(a)]	**601**	1,028	1,400
Disposition of MSRs[(b)]	**(21)**	(188)	(822)
Net additions/(dispositions)	**905**	1,093	1,376
Changes due to collection/realization of expected cash flows	**(1,068)**	(1,011)	(936)
Changes in valuation due to inputs and assumptions:			
Changes due to market interest rates and other[(c)]	**670**	424	2,022
Changes in valuation due to other inputs and assumptions:			
Projected cash flows (e.g., cost to service)	**102**	(22)	14
Discount rates	**14**	14	—
Prepayment model changes and other[(d)]	**(24)**	51	3
Total changes in valuation due to other inputs and assumptions	**92**	43	17
Total changes in valuation due to inputs and assumptions	**762**	467	2,039
Fair value at December 31,	**$ 9,121**	$ 8,522	$ 7,973
Change in unrealized gains/(losses) included in income related to MSRs held at December 31,	**$ 762**	$ 467	$ 2,039
Contractual service fees, late fees and other ancillary fees included in income	**1,606**	1,590	1,535
Third-party mortgage loans serviced at December 31, (in billions)	**652**	632	584
Servicer advances, net of an allowance for uncollectible amounts, at December 31[(e)]	**577**	659	758

(a) Includes purchase price adjustments associated with MSRs purchased, primarily as a result of loans that prepaid within 90 days of settlement, allowing the Firm to recover the purchase price.
(b) Includes excess MSRs transferred to agency-sponsored trusts in exchange for stripped mortgage-backed securities ("SMBS"). In each transaction, a portion of the SMBS was acquired by third parties at the transaction date; the Firm acquired the remaining balance of those SMBS as trading securities.
(c) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.
(d) Represents changes in prepayments other than those attributable to changes in market interest rates.
(e) Represents amounts the Firm pays as the servicer (e.g., scheduled principal and interest, taxes and insurance), which will generally be reimbursed within a short period of time after the advance from future cash flows from the trust or the underlying loans. The Firm's credit risk associated with these servicer advances is minimal because reimbursement of the advances is typically senior to all cash payments to investors. In addition, the Firm maintains the right to stop payment to investors if the collateral is insufficient to cover the advance. However, certain of these servicer advances may not be recoverable if they were not made in accordance with applicable rules and agreements.

The following table presents the components of mortgage fees and related income (including the impact of MSR risk management activities) for the years ended December 31, 2024, 2023 and 2022.

Year ended December 31, (in millions)	2024	2023	2022
CCB mortgage fees and related income			
Production revenue	**$ 627**	$ 421	$ 497
Net mortgage servicing revenue:			
Operating revenue:			
Loan servicing revenue	**1,659**	1,634	1,582
Changes in MSR asset fair value due to collection/ realization of expected cash flows	**(1,067)**	(1,011)	(936)
Total operating revenue	**592**	623	646
Risk management:			
Changes in MSR asset fair value due to market interest rates and other[(a)]	**670**	424	2,022
Other changes in MSR asset fair value due to other inputs and assumptions in model[(b)]	**92**	43	17
Change in derivative fair value and other	**(603)**	(336)	(1,946)
Total risk management	**159**	131	93
Total net mortgage servicing revenue	**751**	754	739
Total CCB mortgage fees and related income	**1,378**	1,175	1,236
All other	**23**	1	14
Mortgage fees and related income	**$ 1,401**	$ 1,176	$ 1,250

(a) Represents both the impact of changes in estimated future prepayments due to changes in market interest rates, and the difference between actual and expected prepayments.
(b) Represents the aggregate impact of changes in model inputs and assumptions such as projected cash flows (e.g., cost to service), discount rates and changes in prepayments other than those attributable to changes in market interest rates (e.g., changes in prepayments due to changes in home prices).

Changes in fair value based on variations in assumptions generally cannot be easily extrapolated, because the relationship of the change in the assumptions to the change in fair value are often highly interrelated and may not be linear. In the following table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which would either magnify or counteract the impact of the initial change.

The table below outlines the key economic assumptions used to determine the fair value of the Firm’s MSRs at December 31, 2024 and 2023, and outlines the sensitivities of those fair values to immediate adverse changes in those assumptions, as defined below.

December 31, (in millions, except rates)	2024	2023
Weighted-average prepayment speed assumption (constant prepayment rate)	**6.19 %**	6.29 %
Impact on fair value of 10% adverse change	**$ (209)**	$ (206)
Impact on fair value of 20% adverse change	**(406)**	(401)
Weighted-average option adjusted spread[(a)]	**5.97 %**	6.10 %
Impact on fair value of 100 basis points adverse change	**$ (391)**	$ (369)
Impact on fair value of 200 basis points adverse change	**(751)**	(709)

(a) Includes the impact of operational risk and regulatory capital.

Other intangible assets

The Firm’s finite-lived and indefinite-lived other intangible assets are initially recorded at their fair value primarily upon completion of a business combination. Subsequently, the Firm’s finite-lived intangible assets, including core deposit intangibles, customer relationship intangibles, and certain other intangible assets, are amortized over their useful lives, estimated based on the expected future economic benefits to the Firm of the intangible asset. The Firm’s intangible assets with indefinite lives, such as asset management contracts, are not subject to amortization and are assessed periodically for impairment.

As of December 31, 2024 and 2023, the gross carrying values of other intangible assets were $3.8 billion and $4.2 billion, respectively, and the accumulated amortization was $879 million and $994 million, respectively.

As of December 31, 2024 and 2023, the net carrying values consist of finite-lived intangible assets of $1.7 billion and $2.0 billion, respectively, as well as indefinite-lived intangible assets, which are not subject to amortization, of $1.2 billion at both periods.

As of December 31, 2024, other intangible assets reflected core deposit and certain wealth management customer relationship intangibles related to the First Republic acquisition, and asset management contracts related to the Firm’s acquisition of the remaining 51% interest in CIFM. Refer to Note 34 for additional information on the First Republic acquisition.

For the years ended December 31, 2024 and 2023, amortization expense was $339 million and $315 million, respectively.

The following table presents estimated future amortization expense.

December 31, (in millions)	Finite-lived intangible assets
2025	$ 288
2026	285
2027	284
2028	267
2029	261

Impairment testing

The Firm’s finite-lived and indefinite-lived other intangible assets are assessed for impairment annually or more often if events or changes in circumstances indicate that the asset might be impaired. Once the Firm determines that an impairment exists for an intangible asset, the impairment is recognized in other expense.

Note 16 – Premises and equipment

Premises and equipment includes land carried at cost, as well as buildings, leasehold improvements, internal-use software and furniture and equipment carried at cost less accumulated depreciation and amortization. The Firm's operating lease right-of-use assets are also included in Premises and equipment. Refer to Note 18 for a further discussion of the Firm's right-of-use assets.

The following table presents certain components of Premises and equipment.

December 31, (in millions)	2024	2023
Land, buildings and leasehold improvements	**$ 16,874**	$ 14,862
Right-of-use assets[(a)]	**7,930**	7,917
Other premises and equipment[(b)]	**7,419**	7,378
Total premises and equipment	**$ 32,223**	$ 30,157

(a) Excluded $564 million and $514 million of right-of-use assets that were recorded in Other assets at December 31, 2024 and 2023, respectively.
(b) Other premises and equipment is comprised of internal-use software and furniture and equipment.

JPMorganChase computes depreciation using the straight-line method over the estimated useful life for buildings and furniture and equipment. The Firm depreciates leasehold improvements over the lesser of the remainder of the lease term or the estimated useful life. The Firm also capitalizes certain costs associated with the acquisition or development of internal-use software. Once the software is ready for its intended use, these costs are amortized on a straight-line basis over the software's expected useful life. The estimated useful lives range from 10 to 50 years for buildings and leasehold improvements, and 3 to 10 years for internal-use software and furniture and equipment.

Impairment is assessed when events or changes in circumstances indicate that the carrying value of an asset may not be fully recoverable.

Note 17 – Deposits

As of December 31, 2024 and 2023, noninterest-bearing and interest-bearing deposits were as follows:

December 31, (in millions)	2024	2023
U.S. offices		
Noninterest-bearing (included **$28,904** and $75,393 at fair value)[(a)]	**$ 592,500**	$ 643,748
Interest-bearing (included **$1,101** and $573 at fair value)[(a)]	**1,345,914**	1,303,100
Total deposits in U.S. offices	**1,938,414**	1,946,848
Non-U.S. offices		
Noninterest-bearing (included **$2,255** and $1,737 at fair value)[(a)]	**26,806**	23,097
Interest-bearing (included **$1,508** and $681 at fair value)[(a)]	**440,812**	430,743
Total deposits in non-U.S. offices	**467,618**	453,840
Total deposits	**$2,406,032**	$ 2,400,688

(a) Includes structured notes classified as deposits for which the fair value option has been elected. Refer to Note 3 for further discussion.

As of December 31, 2024 and 2023, time deposits in denominations that met or exceeded the insured limit were as follows:

December 31, (in millions)	2024	2023
U.S. offices	**$ 149,239**	$ 132,654
Non-U.S. offices[(a)]	**92,639**	90,187
Total	**$ 241,878**	$ 222,841

(a) Represents all time deposits in non-U.S. offices as these deposits typically exceed the insured limit.

As of December 31, 2024, the remaining maturities of interest-bearing time deposits were as follows:

December 31, (in millions)	U.S.	Non-U.S.	Total
2025	$222,676	$ 89,427	$ 312,103
2026	749	87	836
2027	482	2	484
2028	149	18	167
2029	314	721	1,035
After 5 years	162	129	291
Total	$224,532	$ 90,384	$ 314,916

Note 18 - Leases

Firm as lessee

At December 31, 2024, JPMorganChase and its subsidiaries were obligated under a number of noncancellable leases, predominantly operating leases for premises and equipment used primarily for business purposes. These leases generally have terms of 20 years or less, determined based on the contractual maturity of the lease, and include periods covered by options to extend or terminate the lease when the Firm is reasonably certain that it will exercise those options. All leases with lease terms greater than twelve months are reported as a lease liability with a corresponding right-of-use ("ROU") asset. None of these lease agreements impose restrictions on the Firm's ability to pay dividends, engage in debt or equity financing transactions or enter into further lease agreements. Certain of these leases contain escalation clauses that will increase rental payments based on maintenance, utility and tax increases, which are non-lease components. The Firm elected not to separate lease and non-lease components of a contract for its real estate leases. As such, real estate lease payments represent payments on both lease and non-lease components.

Operating lease liabilities and ROU assets are recognized at the lease commencement date based on the present value of the future minimum lease payments over the lease term. The future lease payments are discounted at a rate that estimates the Firm's collateralized borrowing rate for financing instruments of a similar term and are included in accounts payable and other liabilities. The operating lease ROU assets, predominantly included in premises and equipment, also include any lease prepayments made, plus initial direct costs incurred, less any lease incentives received. Rental expense associated with operating leases is recognized on a straight-line basis over the lease term, and generally included in occupancy expense in the Consolidated statements of income.

The carrying values of the Firm's operating leases were as follows:

December 31, (in millions, except where otherwise noted)	2024	2023
Right-of-use assets	$ 8,494	$ 8,431
Lease liabilities	8,900	8,833
Weighted average remaining lease term (in years)	8.3	8.4
Weighted average discount rate	4.24 %	4.01 %
Supplemental cash flow information		
Cash paid for amounts included in the measurement of lease liabilities - operating cash flows	$ 1,734	$ 1,662
Supplemental non-cash information		
Right-of-use assets obtained in exchange for operating lease obligations	$ 1,565	$ 2,094

Year ended December 31, (in millions)	2024	2023
Rental expense		
Gross rental expense	$ 2,231	$ 2,079
Sublease rental income	(41)	(72)
Net rental expense	$ 2,190	$ 2,007

The following table presents future payments under operating leases as of December 31, 2024.

Year ended December 31, (in millions)	
2025	1,709
2026	1,553
2027	1,412
2028	1,248
2029	1,048
After 2029	3,721
Total future minimum lease payments	10,691
Less: Imputed interest	(1,791)
Total	$ 8,900

In addition to the table above, as of December 31, 2024, the Firm had additional future operating lease commitments of $887 million that were signed but had not yet commenced. These operating leases will commence between 2025 and 2027 with lease terms up to 21 years.

Firm as lessor

The Firm provides auto and equipment lease financing to its customers through lease arrangements with lease terms that may contain renewal, termination and/or purchase options. The Firm's lease financings are predominantly auto operating leases. These assets subject to operating leases are recognized in other assets on the Firm's Consolidated balance sheets and are depreciated on a straight-line basis over the lease term to reduce the asset to its estimated residual value. Depreciation expense is included in technology, communications and equipment expense in the Consolidated statements of income. The Firm's lease income is generally recognized on a straight-line basis over the lease term and is included in other income in the Consolidated statements of income.

On a periodic basis, the Firm assesses leased assets for impairment, and if the carrying amount of the leased asset exceeds the undiscounted cash flows from the lease payments and the estimated residual value upon disposition of the leased asset, an impairment is recognized.

The risk of loss on auto and equipment leased assets relating to the residual value of the leased assets is monitored through projections of the asset residual values at lease origination and periodic review of residual values, and is mitigated through arrangements with certain manufacturers or lessees.

The following table presents the carrying value of assets subject to leases reported on the Consolidated balance sheets.

December 31, (in millions)	**2024**	2023
Carrying value of assets subject to operating leases, net of accumulated depreciation	**$ 12,988**	$ 10,663
Accumulated depreciation	**2,509**	3,288

The following table presents the Firm's operating lease income and the related depreciation expense on the Consolidated statements of income.

Year ended December 31, (in millions)	**2024**	2023	2022
Operating lease income	**$ 2,795**	$ 2,843	$ 3,654
Depreciation expense	**1,685**	1,778	2,475

The following table presents future receipts under operating leases as of December 31, 2024.

Year ended December 31, (in millions)	
2025	$ 2,381
2026	1,707
2027	704
2028	47
2029	5
After 2029	4
Total future minimum lease receipts	**$ 4,848**

Note 19 – Accounts payable and other liabilities

Accounts payable and other liabilities consist of brokerage payables, which include payables to customers and payables related to security purchases that did not settle, as well as other accrued expenses, such as compensation accruals, credit card rewards liability, merchant servicing payables, operating lease liabilities, accrued interest payables, income tax payables and litigation reserves.

The following table presents the components of accounts payable and other liabilities.

December 31, (in millions)	**2024**	2023
Brokerage payables	**$ 153,153**	$ 161,960
Other payables and liabilities[(a)]	**127,519**	128,347
Total accounts payable and other liabilities	**$ 280,672**	$ 290,307

(a) Includes credit card rewards liability of $14.4 billion and $13.2 billion at December 31, 2024 and 2023, respectively.

The credit card rewards liability represents the estimated cost of rewards points earned and expected to be redeemed by cardholders. The liability is accrued as the cardholder earns the benefit and is reduced when the cardholder redeems points. The redemption rate and cost per point assumptions are key assumptions to estimate the liability and the current period impact is recognized in Card Income.

Refer to Notes 7, 18, 25 and 30 for additional information on accrued interest, operating lease liabilities, income taxes and litigation reserves, respectively.

Note 20 – Long-term debt

JPMorganChase issues long-term debt denominated in various currencies, predominantly U.S. dollars, with both fixed and variable interest rates. Included in senior and subordinated debt below are various equity-linked or other indexed instruments, which the Firm has elected to measure at fair value. Changes in fair value are recorded in principal transactions revenue in the Consolidated statements of income, except for unrealized gains/(losses) due to DVA which are recorded in OCI. The following table is a summary of long-term debt carrying values (including unamortized premiums and discounts, issuance costs, valuation adjustments and fair value adjustments, where applicable) by remaining contractual maturity as of December 31, 2024.

By remaining maturity at December 31, (in millions, except rates)		2024				2023
		Under 1 year	1-5 years	After 5 years	**Total**	Total
Parent company						
Senior debt:	Fixed rate	**$ 7,112**	**$ 90,132**	**$ 117,667**	**$ 214,911**	$ 200,984

	Subtotal	**$ —**	**$ 421**	**$ 1,182**	**$ 1,603**	$ 1,728
Total long-term debt[b][c][d]		**$ 40,962**	**$ 217,508**	**$ 142,948**	**$ 401,418** [g][h]	$ 391,825
Long-term beneficial interests:	Fixed rate	**$ 999**	**$ 4,313**	**$ —**	**$ 5,312**	$ 2,998
	Variable rate	**—**	**27**	**139**	**166**	125
	Interest rates[f]	**3.97 %**	**4.82 %**	**2.92 %**	**4.62 %**	4.69 %
Total long-term beneficial interests[e]		**$ 999**	**$ 4,340**	**$ 139**	**$ 5,478**	$ 3,123

(a) Reflects the Purchase Money Note associated with First Republic. Refer to Note 34 for additional information.
(b) Included long-term debt of $80.9 billion and $93.0 billion secured by assets totaling $185.5 billion and $218.5 billion at December 31, 2024 and 2023, respectively. The amount of long-term debt secured by assets does not include amounts related to hybrid instruments.
(c) Included $100.8 billion and $87.9 billion of long-term debt accounted for at fair value at December 31, 2024 and 2023, respectively.
(d) Included $13.5 billion and $12.5 billion of outstanding zero-coupon notes at December 31, 2024 and 2023, respectively. The aggregate principal amount of these notes at their respective maturities is $50.2 billion and $47.9 billion, respectively. The aggregate principal amount reflects the contractual principal payment at maturity, which may exceed the contractual principal payment at the Firm's next call date, if applicable.
(e) Included on the Consolidated balance sheets in beneficial interests issued by consolidated VIEs. Also included amounts accounted for at fair value which were not material as of December 31, 2024 and 2023. Excluded short-term commercial paper and other short-term beneficial interests of $21.8 billion and $19.9 billion at December 31, 2024 and 2023, respectively.
(f) The interest rates shown are the weighted average of contractual rates in effect at December 31, 2024 and 2023, respectively, including non-U.S. dollar fixed- and variable-rate issuances, which excludes the effects of the associated derivative instruments used in hedge accounting relationships, if applicable. The interest rates shown exclude structured notes accounted for at fair value.
(g) As of December 31, 2024, long-term debt in the aggregate of $297.1 billion was redeemable at the option of JPMorganChase, in whole or in part, prior to maturity, based on the terms specified in the respective instruments.
(h) The aggregate carrying values of debt that matures in each of the five years subsequent to 2024 is $41.0 billion in 2025, $64.5 billion in 2026, $32.7 billion in 2027, $93.4 billion in 2028 and $26.9 billion in 2029.

The weighted-average contractual interest rates for total long-term debt excluding structured notes accounted for at fair value were 3.82% and 3.65% as of December 31, 2024 and 2023, respectively. In order to modify exposure to interest rate and currency exchange rate movements, JPMorganChase utilizes derivative instruments, primarily interest rate and cross-currency interest rate swaps, in conjunction with some of its debt issuances. The use of these instruments modifies the Firm's interest expense on the associated debt. The modified weighted-average interest rates for total long-term debt, including the effects of related derivative instruments, were 5.15% and 5.20% as of December 31, 2024 and 2023, respectively.

JPMorgan Chase & Co. has guaranteed certain long-term debt of its subsidiaries, including structured notes. These guarantees rank pari passu with the Firm's other unsecured and unsubordinated indebtedness. The amount of such guaranteed long-term debt and structured notes was $41.2 billion and $41.1 billion at December 31, 2024 and 2023, respectively.

The Firm's unsecured debt does not contain requirements that would call for an acceleration of payments, maturities or changes in the structure of the existing debt, provide any limitations on future borrowings or require additional collateral, based on unfavorable changes in the Firm's credit ratings, financial ratios, earnings or stock price.

Note 21 – Preferred stock

At December 31, 2024 and 2023, JPMorganChase was authorized to issue 200 million shares of preferred stock, in one or more series, with a par value of $1 per share. In the event of a liquidation or dissolution of the Firm, JPMorganChase's preferred stock then outstanding takes precedence over the Firm's common stock with respect to the payment of dividends and the distribution of assets.

The following is a summary of JPMorganChase's non-cumulative preferred stock outstanding as of December 31, 2024 and 2023, and the quarterly dividend declarations for the years ended December 31, 2024, 2023 and 2022.

	Shares[a]		Carrying value (in millions)			Contractual rate in effect at December 31, 2024	Earliest redemption date[b]	Floating annualized rate[c]	Dividend declared per share[d]

Total preferred stock	**2,005,375**	2,740,375	**$20,050**	$ 27,404							

(a) Represented by depositary shares.
(b) Each series of fixed-to-floating rate preferred stock converts to a floating rate at the earliest redemption date.
(c) Effective June 30, 2023, CME Term SOFR became the replacement reference rate for fixed-to-floating rate preferred stock issued by the Firm that formerly referenced U.S. dollar LIBOR. References in the table to "SOFR" mean a floating annualized rate equal to three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spreads noted. References to "CMT" mean a floating annualized rate equal to the five-year Constant Maturity Treasury ("CMT") rate plus the spreads noted.
(d) Dividends on preferred stock are discretionary and non-cumulative. When declared, dividends are declared quarterly. Dividends are payable quarterly on fixed-rate preferred stock. Dividends are payable semiannually on fixed-to-floating rate preferred stock while at a fixed rate, and payable quarterly after converting to a floating rate.
(e) The dividend rate for Series S preferred stock became floating and payable quarterly starting on February 1, 2024; prior to which the dividend rate was fixed at 6.75% or $337.50 per share payable semiannually. The dividend rate for each quarterly dividend period commencing on February 1, 2024 was three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spread of 3.78%.
(f) The initial dividend declared was prorated based on the number of days outstanding for the period. Dividends were declared quarterly thereafter at the contractual rate.
(g) The dividend rate for Series Q preferred stock became floating and payable quarterly starting on May 1, 2023; prior to which the dividend rate was fixed at 5.15% or $257.50 per share payable semiannually. The dividend rate for each quarterly dividend period commencing on August 1, 2023 was three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spread of 3.25%.
(h) The dividend rate for Series R preferred stock became floating and payable quarterly starting on August 1, 2023; prior to which the dividend rate was fixed at 6.00% or $300.00 per share payable semiannually. The dividend rate for each quarterly dividend period commencing on August 1, 2023 was three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spread of 3.30%.
(i) The dividend rate for Series CC preferred stock became floating and payable quarterly starting on November 1, 2022; prior to which the dividend rate was fixed at 4.625% or $231.25 per share payable semiannually. The dividend rate for each quarterly dividend period commencing on August 1, 2023 was three-month term SOFR (plus a spread adjustment of 0.26% per annum) plus the spread of 2.58%.

Each series of preferred stock has a liquidation value and redemption price per share of $10,000, plus accrued but unpaid dividends. The aggregate liquidation value was $20.2 billion at December 31, 2024.

Issuances

On February 4, 2025, the Firm issued $3.0 billion of fixed-rate reset non-cumulative preferred stock, Series OO.

On March 12, 2024, the Firm issued $2.5 billion of fixed-rate reset non-cumulative preferred stock, Series NN.

Redemptions

On February 1, 2025, the Firm redeemed all $3.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series HH.

On October 1, 2024, the Firm redeemed all $1.6 billion of its fixed-to-floating rate non-cumulative preferred stock, Series X.

On August 1, 2024, the Firm redeemed all $2.3 billion of its fixed-to-floating rate non-cumulative preferred stock, Series FF.

On May 1, 2024, the Firm redeemed all $5.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series Q, Series R and Series S.

On April 30, 2024, the Firm redeemed all $1.0 billion of its fixed-to-floating rate non-cumulative preferred stock, Series U.

Redemption rights

Each series of the Firm’s preferred stock may be redeemed on any dividend payment date on or after the earliest redemption date for that series. All outstanding preferred stock series may also be redeemed following a “capital treatment event,” as described in the terms of each series. Any redemption of the Firm’s preferred stock is subject to non-objection from the Board of Governors of the Federal Reserve System (the “Federal Reserve”).

Note 22 – Common stock

At December 31, 2024 and 2023, JPMorganChase was authorized to issue 9.0 billion shares of common stock with a par value of $1 per share.

Common shares issued which were reissued from treasury by the Firm during the years ended December 31, 2024, 2023 and 2022 were as follows.

Year ended December 31, (in millions)	2024	2023	2022
Total issued – balance at January 1	**4,104.9**	4,104.9	4,104.9
Treasury – balance at January 1	**(1,228.3)**	(1,170.7)	(1,160.8)
Repurchase	**(91.7)**	(69.5)	(23.1)
Reissuance:			
Employee benefits and compensation plans	**11.9**	10.9	12.0
Employee stock purchase plans	**0.8**	1.0	1.2
Total reissuance	**12.7**	11.9	13.2
Total treasury – balance at December 31	**(1,307.3)**	(1,228.3)	(1,170.7)
Outstanding at December 31	**2,797.6**	2,876.6	2,934.2

On June 28, 2024, the Firm announced that its Board of Directors had authorized a new $30 billion common share repurchase program, effective July 1, 2024. Through June 30, 2024, the Firm was authorized to purchase up to $30 billion of common shares under its previously-approved common share repurchase program that was announced on April 13, 2022.

The following table sets forth the Firm's repurchases of common stock for the years ended December 31, 2024, 2023 and 2022.

Year ended December 31, (in millions)	2024	2023	2022[(b)]
Total number of shares of common stock repurchased	**91.7**	69.5	23.1
Aggregate purchase price of common stock repurchases[(a)]	**$18,841**	$ 9,898	$ 3,122

(a) Excludes excise tax and commissions. As part of the Inflation Reduction Act of 2022, a 1% excise tax is imposed on net share repurchases commencing January 1, 2023.
(b) In the second half of 2022, the Firm temporarily suspended share repurchases, which it resumed in the first quarter of 2023 under its common share repurchase program.

The Board of Directors' authorization to repurchase common shares is utilized at management's discretion. The $30 billion common share repurchase program approved by the Board of Directors does not establish specific price targets or timetables. Management determines the amount and timing of common share repurchases based on various factors, including market conditions; legal and regulatory considerations affecting the amount and timing of repurchase activity; the Firm's capital position (taking into account goodwill and intangibles); organic capital generation; current and proposed future capital requirements; and other investment opportunities. The amount of common shares that the Firm repurchases in any period may be substantially more or less than the amounts estimated or actually repurchased in prior periods, reflecting the dynamic nature of the decision-making process. The Firm's common share repurchases may be suspended by management at any time; and may be executed through open market purchases or privately negotiated transactions, or utilizing Rule 10b5-1 plans, which are written trading plans that the Firm may enter into from time to time under Rule 10b5-1 of the Securities Exchange Act of 1934 and which allow the Firm to repurchase its common shares during periods when it may otherwise not be repurchasing common shares — for example, during internal trading blackout periods.

As of December 31, 2024, approximately 58.8 million shares of common stock were reserved for issuance under various employee incentive, compensation, option and stock purchase plans, and directors' compensation plans.

Note 23 – Earnings per share

Basic earnings per share ("EPS") is calculated using the two-class method. Under the two-class method, all earnings (distributed and undistributed) are allocated to common stock and participating securities. JPMorganChase grants RSUs under its share-based compensation programs, predominantly all of which entitle recipients to receive nonforfeitable dividends during the vesting period on a basis equivalent to dividends paid to holders of the Firm's common stock. These unvested RSUs meet the definition of participating securities based on their respective rights to receive nonforfeitable dividends, and they are treated as a separate class of securities in computing basic EPS. Participating securities are not included as incremental shares in computing diluted EPS; refer to Note 9 for additional information.

Diluted EPS incorporates the potential impact of contingently issuable shares, including awards which require future service as a condition of delivery of the underlying common stock. Diluted EPS is calculated under both the two-class and treasury stock methods, and the more dilutive amount is reported. For each of the periods presented in the table below, diluted EPS calculated under the two-class method was more dilutive.

The following table presents the calculation of net income applicable to common stockholders and basic and diluted EPS for the years ended December 31, 2024, 2023 and 2022.

Year ended December 31, (in millions, except per share amounts)	**2024**	2023	2022
Basic earnings per share			
Net income	**$ 58,471**	$ 49,552	$ 37,676
Less: Preferred stock dividends	**1,259**	1,501	1,595
Net income applicable to common equity	**57,212**	48,051	36,081
Less: Dividends and undistributed earnings allocated to participating securities	**344**	291	189
Net income applicable to common stockholders	**$ 56,868**	$ 47,760	$ 35,892
Total weighted-average basic shares outstanding	**2,873.9**	2,938.6	2,965.8
Net income per share	**$ 19.79**	$ 16.25	$ 12.10
Diluted earnings per share			
Net income applicable to common stockholders	**$ 56,868**	$ 47,760	$ 35,892
Total weighted-average basic shares outstanding	**2,873.9**	2,938.6	2,965.8
Add: Dilutive impact of unvested PSUs, nondividend-earning RSUs and SARs	**5.1**	4.5	4.2
Total weighted-average diluted shares outstanding	**2,879.0**	2,943.1	2,970.0
Net income per share	**$ 19.75**	$ 16.23	$ 12.09

Note 24 – Accumulated other comprehensive income/(loss)

AOCI includes the after-tax change in unrealized gains and losses on investment securities, foreign currency translation adjustments (including the impact of related derivatives), fair value changes of excluded components on fair value hedges, cash flow hedging activities, net gain/(loss) related to the Firm's defined benefit pension and OPEB plans, and fair value option-elected liabilities arising from changes in the Firm's own credit risk (DVA).

Year ended December 31, (in millions)	Unrealized gains/(losses) on investment securities	Translation adjustments, net of hedges	Fair value hedges	Cash flow hedges	Defined benefit pension and OPEB plans	DVA on fair value option elected liabilities	Accumulated other comprehensive income/(loss)
Balance at December 31, 2021	$ 2,640	$ (934)	$ (131)	$ (296)	$ (210)	$ (1,153)	$ (84)
Net change	(11,764)	(611)	98	(5,360)	(1,241)	1,621	(17,257)
Balance at December 31, 2022	$ (9,124) [(a)]	$ (1,545)	$ (33)	$ (5,656)	$ (1,451)	$ 468	$ (17,341)
Net change	5,381	329	(101)	1,724	373	(808)	6,898
Balance at December 31, 2023	$ (3,743) [(a)]	$ (1,216)	$ (134)	$ (3,932)	$ (1,078)	$ (340)	$ (10,443)
Net change	(87)	(858)	(87)	(882)	(63)	(36)	(2,013)
Balance at December 31, 2024	**$ (3,830)** [(a)]	**$ (2,074)**	**$ (221)**	**$ (4,814)**	**$ (1,141)**	**$ (376)**	**$ (12,456)**

(a) Included after-tax net unamortized unrealized gains/(losses) of $(651) million, $(895) million, and $(1.3) billion for the years ended 2024, 2023 and 2022, respectively, related to AFS securities that have been transferred to HTM. As of December 31, 2023 included after-tax net unamortized unrealized gains/(losses) of $(29) million related to HTM securities that have been transferred to AFS as permitted by the new hedge accounting guidance adopted on January 1, 2023. Refer to Note 10 for further information.

The following table presents the pre-tax and after-tax changes in the components of OCI.

	2024			2023			2022		
Year ended December 31, (in millions)	Pre-tax	Tax effect	After-tax	Pre-tax	Tax effect	After-tax	Pre-tax	Tax effect	After-tax
Unrealized gains/(losses) on investment securities:									
Net unrealized gains/(losses) arising during the period	**$ (1,135)**	**$ 274**	**$ (861)**	$ 3,891	$ (922)	$ 2,969	$ (17,862)	$ 4,290	$ (13,572)
Reclassification adjustment for realized (gains)/losses included in net income[(a)]	**1,021**	**(247)**	**774**	3,180	(768)	2,412	2,380	(572)	1,808
Net change	**(114)**	**27**	**(87)**	7,071	(1,690)	5,381	(15,482)	3,718	(11,764)
Translation adjustments[(b)]:									
Translation	**(4,385)**	**250**	**(4,135)**	1,714	(95)	1,619	(3,574)	265	(3,309)
Hedges	**4,322**	**(1,045)**	**3,277**	(1,697)	407	(1,290)	3,553	(855)	2,698
Net change	**(63)**	**(795)**	**(858)**	17	312	329	(21)	(590)	(611)
Fair value hedges, net change[(c)]	**(115)**	**28**	**(87)**	(134)	33	(101)	130	(32)	98
Cash flow hedges:									
Net unrealized gains/(losses) arising during the period	**(3,742)**	**904**	**(2,838)**	483	(114)	369	(7,473)	1,794	(5,679)
Reclassification adjustment for realized (gains)/losses included in net income[(d)]	**2,579**	**(623)**	**1,956**	1,775	(420)	1,355	420	(101)	319
Net change	**(1,163)**	**281**	**(882)**	2,258	(534)	1,724	(7,053)	1,693	(5,360)
Defined benefit pension and OPEB plans, net change[(e)]	**(131)**	**68**	**(63)**	421	(48)	373	(1,459)	218	(1,241)
DVA on fair value option elected liabilities, net change	**(45)**	**9**	**(36)**	(1,066)	258	(808)	2,141	(520)	1,621
Total other comprehensive income/(loss)	**$ (1,631)**	**$ (382)**	**$ (2,013)**	$ 8,567	$ (1,669)	$ 6,898	$ (21,744)	$ 4,487	$ (17,257)

(a) The pre-tax amount is reported in Investment securities gains/(losses) in the Consolidated statements of income.
(b) Reclassifications of pre-tax realized gains/(losses) on translation adjustments and related hedges are reported in other income/expense in the Consolidated statements of income. During the year ended December 31, 2024, the Firm reclassified a net pre-tax gain of $7 million to other income/expense, of which $89 million gain related to net investment hedges and $(82) million loss related to cumulative translation adjustments. During the year ended December 31, 2023, the Firm reclassified a net pre-tax loss of $(3) million. During the year ended December 31, 2022, the Firm reclassified a net pre-tax loss of $(8) million.
(c) Represents changes in fair value of cross-currency swaps attributable to changes in cross-currency basis spreads, which are excluded from the assessment of hedge effectiveness and recorded in other comprehensive income. The initial cost of cross-currency basis spreads is recognized in earnings as part of the accrual of interest on the cross-currency swaps.
(d) The pre-tax amounts are primarily recorded in noninterest revenue, net interest income and compensation expense in the Consolidated statements of income.
(e) During the year ended December 31, 2022, a remeasurement of the Firm's U.S. principal defined benefit plan in the third quarter, was required as a result of a pension settlement. The remeasurement resulted in a net decrease of $1.4 billion in pre-tax AOCI.

Note 25 – Income taxes

JPMorganChase and its eligible subsidiaries file a consolidated U.S. federal income tax return. JPMorganChase uses the asset and liability method to provide for income taxes on all transactions recorded in the Consolidated Financial Statements. This method requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets or liabilities for book and tax purposes. Accordingly, a deferred tax asset or liability for each temporary difference is determined based on the tax rates that the Firm expects to be in effect when the underlying items of income and expense are realized. JPMorganChase's expense for income taxes includes the current and deferred portions of that expense. A valuation allowance is established to reduce deferred tax assets to the amount the Firm expects to realize.

Due to the inherent complexities arising from the nature of the Firm's businesses, and from conducting business and being taxed in a substantial number of jurisdictions, significant judgments and estimates are required to be made. Agreement of tax liabilities between JPMorganChase and the many tax jurisdictions in which the Firm files tax returns may not be finalized for several years. Thus, the Firm's final tax-related assets and liabilities may ultimately be different from those currently reported.

Effective January 1, 2024, the Firm adopted updates to the Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method guidance, under the modified retrospective method. Refer to Notes 1, 6 and 14 for additional information.

Effective tax rate and expense

The following table presents a reconciliation of the applicable statutory U.S. federal income tax rate to the effective tax rate.

Effective tax rate

Year ended December 31,	**2024**	2023	2022
Statutory U.S. federal tax rate	**21.0 %**	21.0 %	21.0 %
Increase/(decrease) in tax rate resulting from:			
U.S. state and local income taxes, net of U.S. federal income tax benefit	**3.1**	2.8	3.5
Tax-exempt income	**(0.7)**	(0.9)	(0.9)
Non-U.S. earnings	**1.4**	1.5	0.4
Business tax credits	**(2.4)**	(4.4)	(5.4)
Other, net	**(0.3)**	(0.4)	(0.2)
Effective tax rate	**22.1 %**	19.6 % [(a)]	18.4 %

(a) Income tax expense associated with the First Republic acquisition was reflected in the estimated bargain purchase gain, which resulted in a reduction in the Firm's effective tax rate.

The following table reflects the components of income tax expense/(benefit) included in the Consolidated statements of income.

Income tax expense/(benefit)

Year ended December 31, (in millions)	**2024**	2023	2022
Current income tax expense/(benefit)			
U.S. federal	**$ 7,091**	$ 8,973	$ 5,606
Non-U.S.	**4,753**	4,355	2,992
U.S. state and local	**2,762**	3,266	2,630
Total current income tax expense/(benefit)	**14,606**	16,594	11,228
Deferred income tax expense/(benefit)			
U.S. federal	**1,771**	(3,475)	(2,004)
Non-U.S.	**72**	35	(154)
U.S. state and local	**161**	(1,094)	(580)
Total deferred income tax expense/(benefit)	**2,004**	(4,534)	(2,738)
Total income tax expense	**$ 16,610**	$ 12,060	$ 8,490

Total income tax expense includes $314 million, $68 million and $331 million of tax benefits in 2024, 2023, and 2022, respectively, resulting from the resolution of tax audits.

Tax effect of items recorded in stockholders' equity

The preceding table does not reflect the tax effect of certain items that are recorded each period directly in stockholders' equity, which are predominantly reflected in OCI as disclosed in Note 24. For the year ended December 31, 2024, stockholders' equity reflected the tax effect associated with the Firm's adoption of the Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method guidance. For the year ended December 31, 2023, stockholders' equity reflected the tax effect associated with the Firm's adoption of the TDR accounting guidance. Both of the respective adoptions were recognized in retained earnings. Refer to Note 1, 6 and 14 for further information.

Results from U.S. and non-U.S. earnings

The following table presents the U.S. and non-U.S. components of income before income tax expense.

Year ended December 31, (in millions)	**2024**	2023	2022
U.S.	**$ 59,472**	$46,868	$34,626
Non-U.S.[(a)]	**15,609**	14,744	11,540
Income before income tax expense	**$ 75,081**	$ 61,612	$46,166

(a) For purposes of this table, non-U.S. income is defined as income generated from operations located outside the U.S.

The Firm will recognize any U.S. income tax expense it may incur on global intangible low tax income as income tax expense in the period in which the tax is incurred.

Deferred taxes

Deferred income tax expense/(benefit) reflects the differences between assets and liabilities measured for financial reporting purposes versus income tax return purposes. Deferred tax assets are recognized if, in management's judgment, their realizability is determined to be more likely than not. If a deferred tax asset is determined to be unrealizable, a valuation allowance is established. The significant components of deferred tax assets and liabilities are reflected in the following table, the net deferred tax assets are reflected in other assets on the Firm's Consolidated balance sheets.

December 31, (in millions)	2024	2023
Deferred tax assets		
Allowance for loan losses	**$ 6,117**	$ 5,809
Employee benefits	**1,165**	1,247
Accrued expenses and other	**8,881**	9,887 (a)
Depreciation and amortization	**386**	—
Non-U.S. operations	**948**	860
Tax attribute carryforwards	**352**	290
Gross deferred tax assets	**17,849**	18,093
Valuation allowance	**(249)**	(183)
Deferred tax assets, net of valuation allowance	**$ 17,600**	$ 17,910
Deferred tax liabilities		
Depreciation and amortization	**$ —**	$ 779
Mortgage servicing rights, net of hedges	**1,912**	1,794
Leasing transactions	**2,249**	2,254
Other, net	**1,264**	2,935
Gross deferred tax liabilities	**5,425**	7,762
Net deferred tax assets	**$ 12,175**	$ 10,148

(a) Includes the estimated net deferred tax asset associated with the First Republic acquisition.

JPMorganChase has recorded deferred tax assets of $352 million at December 31, 2024 in connection with tax attribute carryforwards. State and local capital loss carryforwards were $914 million, U.S. federal NOL carryforwards were $496 million, non-U.S. NOL carryforwards were $958 million, and other U.S. federal tax attributes were $111 million. If not utilized, a portion of the U.S. federal NOL carryforwards and other U.S. federal tax attributes will expire between 2026 and 2036 whereas others have an unlimited carryforward period. Similarly, certain non-U.S. NOL carryforwards will expire between 2026 and 2041 whereas others have an unlimited carryforward period. The state and local capital loss carryforwards will expire in 2026.

The valuation allowance at December 31, 2024, was predominantly driven by certain non-U.S. deferred tax assets, including NOL carryforwards.

Unrecognized tax benefits

At December 31, 2024, 2023 and 2022, JPMorganChase's unrecognized tax benefits, excluding related interest expense and penalties, were $6.2 billion, $5.4 billion and $5.0 billion, respectively, of which $4.4 billion, $3.9 billion and $3.8 billion, respectively, if recognized, would reduce the annual effective tax rate. Included in the amount of unrecognized tax benefits are certain items that would not affect the effective tax rate if they were recognized in the Consolidated statements of income. These unrecognized items include the tax effect of certain temporary differences, the portion of gross state and local unrecognized tax benefits that would be offset by the benefit from associated U.S. federal income tax deductions, and the portion of gross non-U.S. unrecognized tax benefits that would have offsets in other jurisdictions. JPMorganChase evaluates the need for changes in unrecognized tax benefits based on its anticipated tax return filing positions as part of its U.S. federal and state and local tax returns. In addition, the Firm is presently under audit by a number of taxing authorities, most notably by the Internal Revenue Service, as summarized in the Tax examination status table below. The evaluation of unrecognized tax benefits as well as the potential for audit settlements make it reasonably possible that over the next 12 months the gross balance of unrecognized tax benefits may increase or decrease by as much as approximately $2.4 billion. The change in the unrecognized tax benefit would result in a payment or income statement recognition.

The following table presents a reconciliation of the beginning and ending amount of unrecognized tax benefits.

(in millions)	**2024**	2023	2022
Balance at January 1,	**$ 5,401**	$ 5,043	$ 4,636
Increases based on tax positions related to the current period	**1,721**	1,440	1,234
Increases based on tax positions related to prior periods	**92**	37	123
Decreases based on tax positions related to prior periods	**(907)**	(1,110)	(824)
Decreases related to cash settlements with taxing authorities	**(148)**	(9)	(126)
Balance at December 31,	**$ 6,159**	$ 5,401	$ 5,043

After-tax interest expense/(benefit) and penalties related to income tax liabilities recognized in income tax expense were $288 million, $229 million and $141 million in 2024, 2023 and 2022, respectively.

At December 31, 2024 and 2023, in addition to the liability for unrecognized tax benefits, the Firm had accrued $1.7 billion and $1.6 billion, respectively, for income tax-related interest and penalties.

Tax examination status

JPMorganChase is continually under examination by the Internal Revenue Service, by taxing authorities throughout the world, and by many state and local jurisdictions throughout the U.S. The following table summarizes the status of tax years that remain subject to income tax examination of JPMorganChase and its consolidated subsidiaries by significant jurisdictions as of December 31, 2024.

	Periods under examination	Status
JPMorganChase – U.S.	2011 – 2013	Field examination of amended returns; certain matters at Appellate level
JPMorganChase – U.S.	2014 - 2020	Field examination of original and amended returns; certain matters at Appellate level
JPMorganChase – New York City	2015 - 2018	Field Examination
JPMorganChase – U.K.	2017 – 2022	Field examination of certain select entities

Note 26 – Restricted cash, other restricted assets and intercompany funds transfers

Restricted cash and other restricted assets

Certain of the Firm's cash and other assets are restricted as to withdrawal or usage. These restrictions are imposed by various regulatory authorities based on the particular activities of the Firm's subsidiaries.

The business of JPMorgan Chase Bank, N.A. is subject to examination and regulation by the OCC. The Bank is a member of the U.S. Federal Reserve System, and its deposits in the U.S. are insured by the FDIC, subject to applicable limits.

The Firm is required to maintain cash reserves at certain non-US central banks.

The Firm is also subject to rules and regulations established by other U.S. and non U.S. regulators. As part of its compliance with the respective regulatory requirements, the Firm's broker-dealer activities are subject to certain restrictions on cash and other assets.

The following table presents the components of the Firm's restricted cash:

December 31, (in billions)		2024		2023
Segregated for the benefit of securities and cleared derivative customers		**18.7**		10.3
Cash reserves at non-U.S. central banks and held for other general purposes		**8.8**		9.3
Total restricted cash[(a)]	**$**	**27.5**	$	19.6

(a) Comprises $26.1 billion and $18.2 billion in deposits with banks, and $1.4 billion and $1.4 billion in cash and due from banks on the Consolidated balance sheets as of December 31, 2024 and 2023, respectively.

Also, as of December 31, 2024 and 2023, the Firm had the following other restricted assets:

- Cash and securities pledged with clearing organizations for the benefit of customers of $40.7 billion and $40.5 billion, respectively.
- Securities with a fair value of $26.8 billion and $20.5 billion, respectively, were also restricted in relation to customer activity.

Intercompany funds transfers

Restrictions imposed by U.S. federal law prohibit JPMorgan Chase Bank, N.A., and its subsidiaries, from lending to JPMorgan Chase & Co. ("Parent Company") and certain of its affiliates unless the loans are secured in specified amounts. Such secured loans provided by any banking subsidiary to the Parent Company or to any particular affiliate, together with certain other transactions with such affiliate (collectively referred to as "covered transactions"), must be made on terms and conditions that are consistent with safe and sound banking practices. In addition, unless collateralized with cash or US Government debt obligations, covered transactions are generally limited to 10% of the banking subsidiary's total capital, as determined by the risk-based capital guidelines; the aggregate amount of covered transactions between any banking subsidiary and all of its affiliates is limited to 20% of the banking subsidiary's total capital.

The Parent Company's two principal subsidiaries are JPMorgan Chase Bank, N.A. and JPMorgan Chase Holdings LLC, an intermediate holding company (the "IHC"). The IHC generally holds the stock of JPMorganChase's subsidiaries other than JPMorgan Chase Bank, N.A. and its subsidiaries. The IHC also owns other assets and provides intercompany loans to the Parent Company. The Parent Company is obligated to contribute to the IHC substantially all the net proceeds received from securities issuances (including issuances of senior and subordinated debt securities and of preferred and common stock).

The principal sources of income and funding for the Parent Company are dividends from JPMorgan Chase Bank, N.A. and dividends and extensions of credit from the IHC. In addition to dividend restrictions set forth in statutes and regulations, the Federal Reserve, the OCC and the FDIC have authority under the Financial Institutions Supervisory Act to prohibit or to limit the payment of dividends by the banking organizations they supervise, including the Parent Company and its subsidiaries that are banks or bank holding companies, if, in the banking regulator's opinion, payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the banking organization. The IHC is prohibited from paying dividends or extending credit to the Parent Company if certain capital or liquidity "thresholds" are breached or if limits are otherwise imposed by the Parent Company's management or Board of Directors.

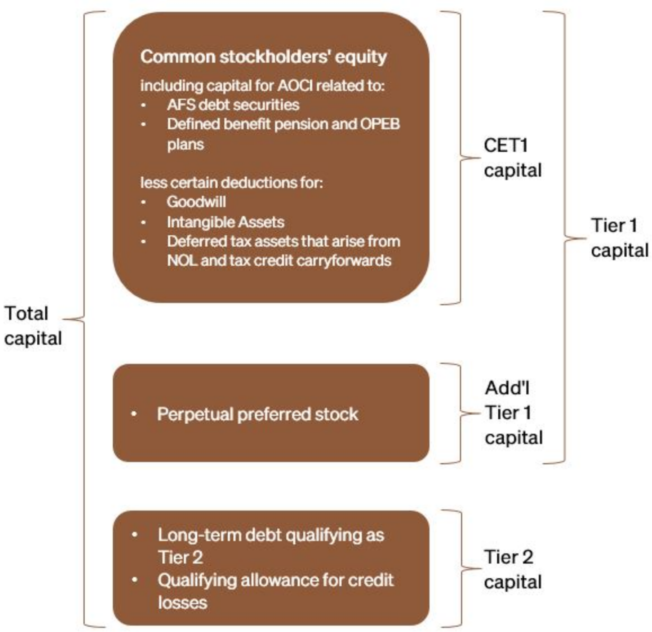
At January 1, 2025, the Parent Company's banking subsidiaries could pay, in the aggregate, approximately $15.5 billion in dividends to their respective bank holding companies without the prior approval of their relevant banking regulators. The capacity to pay dividends in 2025 will be supplemented by the banking subsidiaries' earnings during the year.

Note 27 – Regulatory capital

The Federal Reserve establishes capital requirements, including well-capitalized standards, for the Firm as a consolidated financial holding company. The OCC establishes similar minimum capital requirements and standards for the Firm's principal IDI subsidiary, JPMorgan Chase Bank, N.A.

The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. bank holding companies and banks, including the Firm and JPMorgan Chase Bank, N.A. Under the rules currently in effect, two comprehensive approaches are prescribed for calculating RWA: a standardized approach ("Basel III Standardized"), and an advanced approach ("Basel III Advanced"). For each of these risk-based capital ratios, the capital adequacy of the Firm and JPMorgan Chase Bank, N.A. is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements.

The three components of regulatory capital under the Basel III rules and their primary drivers are as illustrated below:



Under the risk-based capital and leverage-based guidelines of the Federal Reserve, JPMorgan Chase & Co. is required to maintain minimum ratios for CET1 capital, Tier 1 capital, Total capital, Tier 1 leverage and the SLR. Failure to meet these minimum requirements could cause the Federal Reserve to take action. JPMorgan Chase Bank, N.A. is also subject to these capital requirements established by its primary regulators.

The following table presents the risk-based regulatory capital ratio requirements and well-capitalized ratios to which the Firm and JPMorgan Chase Bank, N.A. were subject as of December 31, 2024 and 2023.

	Standardized capital ratio requirements		Advanced capital ratio requirements		Well-capitalized ratios	
	BHC[(a)(b)]	IDI[(c)]	BHC[(a)(b)]	IDI[(c)]	BHC[(d)]	IDI[(e)]
Risk-based capital ratios						
CET1 capital	12.3 %	7.0 %	11.5 %	7.0 %	NA	6.5 %
Tier 1 capital	13.8	8.5	13.0	8.5	6.0 %	8.0
Total capital	15.8	10.5	15.0	10.5	10.0	10.0

Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and JPMorgan Chase Bank, N.A. are subject.

(a) Represents the regulatory capital ratio requirements applicable to the Firm. The CET1, Tier 1 and Total capital ratio requirements each include a respective minimum requirement plus a GSIB surcharge of 4.5% as calculated under Method 2; plus a 3.3% SCB for Basel III Standardized ratios and a fixed 2.5% capital conservation buffer for Basel III Advanced ratios. The countercyclical buffer is currently set to 0% by the federal banking agencies.

(b) For the period ended December 31, 2023, the CET1, Tier 1, and Total capital ratio requirements under Basel III Standardized applicable to the Firm were 11.4%, 12.9%, and 14.9%, respectively; the Basel III Advanced CET1, Tier 1, and Total capital ratio requirements applicable to the Firm were 11.0%, 12.5%, and 14.5%, respectively.

(c) Represents requirements for JPMorgan Chase Bank, N.A. The CET1, Tier 1 and Total capital ratio requirements include a fixed capital conservation buffer requirement of 2.5% that is applicable to JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. is not subject to the GSIB surcharge.

(d) Represents requirements for bank holding companies pursuant to regulations issued by the Federal Reserve.

(e) Represents requirements for JPMorgan Chase Bank, N.A. pursuant to regulations issued under the FDIC Improvement Act.

The following table presents the leverage-based regulatory capital ratio requirements and well-capitalized ratios to which the Firm and JPMorgan Chase Bank, N.A. were subject as of December 31, 2024 and 2023.

	Capital ratio requirements[(a)]		Well-capitalized ratios	
	BHC	IDI	BHC[(b)]	IDI
Leverage-based capital ratios				
Tier 1 leverage	4.0 %	4.0 %	NA	5.0 %
SLR	5.0	6.0	NA	6.0

Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and JPMorgan Chase Bank, N.A. are subject.

(a) Represents minimum SLR requirement of 3.0%, as well as supplementary leverage buffer requirements of 2.0% and 3.0% for BHC and JPMorgan Chase Bank, N.A., respectively.

(b) The Federal Reserve's regulations do not establish well-capitalized thresholds for these measures for BHCs.

CECL Regulatory Capital Transition

Beginning January 1, 2022, the $2.9 billion CECL capital benefit, provided by the Federal Reserve in response to the COVID-19 pandemic, is being phased out at 25% per year over a three-year period. As of December 31, 2024 and 2023, the Firm's CET1 capital reflected the remaining benefit of $720 million and $1.4 billion, respectively, associated with the CECL capital transition provisions.

Similarly, as of January 1, 2024, the Firm has phased out 75% of the other CECL capital transition provisions which impacted Tier 2 capital, adjusted average assets, total leverage exposure and RWA, as applicable.

The following tables present risk-based capital metrics under both the Basel III Standardized and Basel III Advanced approaches and leverage-based capital metrics for JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. As of December 31, 2024 and 2023, JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. were well-capitalized and met all capital requirements to which each was subject.

Note 28 – Off–balance sheet lending-related financial instruments, guarantees, and other commitments

JPMorganChase provides lending-related financial instruments (e.g., commitments and guarantees) to address the financing needs of its customers and clients. The contractual amount of these financial instruments represents the maximum possible credit risk to the Firm should the customer or client draw upon the commitment or the Firm be required to fulfill its obligation under the guarantee, and should the customer or client subsequently fail to perform according to the terms of the contract. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn or a default occurring. As a result, the total contractual amount of these instruments is not, in the Firm’s view, representative of its expected future credit exposure or funding requirements.

To provide for expected credit losses in wholesale and certain consumer lending-related commitments, an allowance for credit losses on lending-related commitments is maintained. Refer to Note 13 for further information regarding the allowance for credit losses on lending-related commitments.

The following table summarizes the contractual amounts and carrying values of off-balance sheet lending-related financial instruments, guarantees and other commitments at December 31, 2024 and 2023. The amounts in the table below for credit card, home equity and certain scored business banking lending-related commitments represent the total available credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit for these commitments will be utilized at the same time. The Firm can reduce or cancel these commitments, in accordance with the contract, or to the extent otherwise permitted by law, including when there has been a demonstrable decline in the creditworthiness of the borrower or significant decrease in the value of underlying property.

Loan sale and securitization-related indemnifications:								
Mortgage repurchase liability	**NA**	**NA**	**NA**	**NA**	**NA**	NA	**45**	76
Loans sold with recourse	**NA**	**NA**	**NA**	**NA**	**1,189**	803	**23**	24
Exchange & clearing house guarantees and commitments[f]	**401,486**	**—**	**—**	**—**	**401,486**	265,887	**—**	—
Other guarantees and commitments[g]	**10,652**	**425**	**435**	**884**	**12,396**	15,074	**28**	38

(a) Includes certain commitments to purchase loans from correspondents.
(b) Also includes commercial card lending-related commitments primarily in CIB.
(c) Predominantly all consumer and wholesale lending-related commitments are in the U.S.
(d) As of December 31, 2024 and 2023, reflected the contractual amount net of risk participations totaling $85 million and $88 million, respectively, for other unfunded commitments to extend credit; $9.5 billion and $8.2 billion, respectively, for standby letters of credit and other financial guarantees; and $556 million and $589 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations.
(e) As of December 31, 2024 and 2023, collateral held by the Firm in support of securities lending indemnification agreements was $328.7 billion and $300.3 billion, respectively. Securities lending collateral primarily consists of cash, G7 government securities, and securities issued by U.S. GSEs and government agencies.
(f) As of December 31, 2024 and 2023, includes guarantees to the Fixed Income Clearing Corporation under the sponsored member repo program and commitments and guarantees associated with the Firm's membership in certain clearing houses.
(g) As of December 31, 2024 and 2023, primarily includes unfunded commitments to purchase secondary market loans, other equity investment commitments, and unfunded commitments related to certain tax-oriented equity investments, and reflects the impact of adopting updates to the Accounting for Investments in Tax Credit Structures guidance effective January 1, 2024.
(h) For lending-related products, the carrying value includes the allowance for lending-related commitments and the guarantee liability; for derivative-related products, and lending-related commitments for which the fair value option was elected, the carrying value represents the fair value.
(i) For lending-related commitments, the carrying value also includes fees and any purchase discounts or premiums that are deferred and recognized in accounts payable and other liabilities on the Consolidated balance sheets. Deferred amounts for revolving commitments and commitments not expected to fund, are amortized to lending- and deposit-related fees on a straight line basis over the commitment period. For all other commitments the deferred amounts remain deferred until the commitment funds or is sold.
(j) As of December 31, 2024 and 2023, includes fair value adjustments associated with First Republic for residential real estate lending-related commitments totaling $459 million and $630 million, respectively; for auto and other lending-related commitments totaling $37 million and $148 million, respectively; and for other unfunded commitments to extend credit totaling $699 million and $1.1 billion, respectively. Refer to Note 34 for additional information.

Other unfunded commitments to extend credit

Other unfunded commitments to extend credit generally consist of commitments for working capital and general corporate purposes, extensions of credit to support commercial paper facilities and bond financings in the event that those obligations cannot be remarketed to new investors, as well as committed liquidity facilities to clearing organizations. The Firm also issues commitments under multipurpose facilities which could be drawn upon in several forms, including the issuance of a standby letter of credit.

Guarantees

U.S. GAAP requires that a guarantor recognize, at the inception of a guarantee, a liability in an amount equal to the fair value of the obligation undertaken in issuing the guarantee. U.S. GAAP defines a guarantee as a contract that contingently requires the guarantor to pay the guaranteed party based upon: (a) changes in an underlying asset, liability or equity security of the guaranteed party; or (b) a third party's failure to perform under a specified agreement. The Firm considers the following off–balance sheet arrangements to be guarantees under U.S. GAAP: standby letters of credit and other financial guarantees, securities lending indemnifications, certain indemnification agreements included within third-party contractual arrangements, certain derivative contracts and the guarantees under the sponsored member repo program.

As required by U.S. GAAP, the Firm initially records guarantees at the inception date fair value of the non-contingent obligation assumed (e.g., the amount of consideration received or the net present value of the premium receivable). For these obligations, the Firm records this fair value amount in other liabilities with an offsetting entry recorded in cash (for premiums received), or other assets (for premiums receivable). Any premium receivable recorded in other assets is reduced as cash is received under the contract, and the fair value of the liability recorded at inception is amortized into income as lending and deposit-related fees over the life of the guarantee contract. The lending-related contingent obligation is recognized based on expected credit losses in addition to, and separate from, any non-contingent obligation.

Non-lending-related contingent obligations are recognized when the liability becomes probable and reasonably estimable. These obligations are not recognized if the estimated amount is less than the carrying amount of any non-contingent liability recognized at inception (adjusted for any amortization). Examples of non-lending-related contingent obligations include indemnifications provided in sales agreements, where a portion of the sale proceeds is allocated to the guarantee, which adjusts the gain or loss that would otherwise result from the transaction. For these indemnifications, the initial liability is amortized to income as the Firm's risk is reduced (i.e., over time or when the indemnification expires).

The contractual amount and carrying value of guarantees and indemnifications are included in the table on page 303.

For additional information on the guarantees, see below.

Standby letters of credit and other financial guarantees

Standby letters of credit and other financial guarantees are conditional lending commitments issued by the Firm to guarantee the performance of a client or customer to a third party under certain arrangements, such as commercial paper facilities, bond financings, acquisition financings, trade financings and similar transactions.

The following table summarizes the contractual amount and carrying value of standby letters of credit and other financial guarantees and other letters of credit arrangements as of December 31, 2024 and 2023.

Standby letters of credit, other financial guarantees and other letters of credit

December 31, (in millions)	2024 Standby letters of credit and other financial guarantees	2024 Other letters of credit	2023 Standby letters of credit and other financial guarantees	2023 Other letters of credit
Investment-grade[a]	**$ 20,443**	**$ 3,380**	$ 19,694	$ 3,552
Noninvestment-grade[a]	**8,233**	**974**	9,178	836
Total contractual amount	**$ 28,676**	**$ 4,354**	$ 28,872	$ 4,388
Allowance for lending-related commitments	**$ 94**	**$ 37**	$ 110	$ 37
Guarantee liability	**379**	**—**	369	—
Total carrying value	**$ 473**	**$ 37**	$ 479	$ 37
Commitments with collateral	**$ 16,805**	**$ 357**	$ 16,861	$ 539

(a) The ratings scale is based on the Firm's internal risk ratings. Refer to Note 12 for further information on internal risk ratings.

Securities lending indemnifications
Through the Firm's securities lending program, counterparties' securities, via custodial and non-custodial arrangements, may be lent to third parties. As part of this program, the Firm provides an indemnification in the lending agreements which protects the lender against the failure of the borrower to return the lent securities. To minimize its liability under these indemnification agreements, the Firm obtains cash or other highly liquid collateral with a market value exceeding 100% of the value of the securities on loan from the borrower. Collateral is marked to market daily to help assure that collateralization is adequate. Additional collateral is called from the borrower if a shortfall exists, or collateral may be released to the borrower in the event of overcollateralization. If a borrower defaults, the Firm would use the collateral held to purchase replacement securities in the market or to credit the lending client or counterparty with the cash equivalent thereof.

The cash collateral held by the Firm may be invested on behalf of the client in indemnified resale agreements, whereby the Firm indemnifies the client against the loss of principal invested. To minimize its liability under these agreements, the Firm obtains collateral with a market value exceeding 100% of the principal invested.

Derivatives qualifying as guarantees
The Firm transacts in certain derivative contracts that have the characteristics of a guarantee under U.S. GAAP. These contracts include written put options that require the Firm to purchase assets upon exercise by the option holder at a specified price by a specified date in the future. The Firm may enter into written put option contracts in order to meet client needs, or for other trading purposes. The terms of written put options are typically five years or less.

Derivatives deemed to be guarantees also includes stable value contracts, commonly referred to as "stable value products", that require the Firm to make a payment of the difference between the market value and the book value of a counterparty's reference portfolio of assets in the event that market value is less than book value and certain other conditions have been met. Stable value products are transacted in order to allow investors to realize investment returns with less volatility than an unprotected portfolio. These contracts are typically longer-term or may have no stated maturity, but allow the Firm to elect to terminate the contract under certain conditions.

The notional value of derivative guarantees generally represents the Firm's maximum exposure. However, exposure to certain stable value products is contractually limited to a substantially lower percentage of the notional amount.

The fair value of derivative guarantees reflects the probability, in the Firm's view, of whether the Firm will be required to perform under the contract. The Firm reduces exposures to these contracts by entering into offsetting transactions, or by entering into contracts that hedge the market risk related to the derivative guarantees.

The following table summarizes the derivatives qualifying as guarantees as of December 31, 2024 and 2023.

(in millions)	**December 31, 2024**	December 31, 2023
Notional amounts		
Derivative guarantees	**$ 49,628**	$ 54,562
Stable value contracts with contractually limited exposure	**32,939**	32,488
Maximum exposure of stable value contracts with contractually limited exposure	**1,740**	1,652
Fair value		
Derivative payables	**113**	89

In addition to derivative contracts that meet the characteristics of a guarantee, the Firm is both a purchaser and seller of credit protection in the credit derivatives market. Refer to Note 5 for a further discussion of credit derivatives.

Unsettled securities financing agreements
In the normal course of business, the Firm enters into resale and securities borrowed agreements. At settlement, these commitments result in the Firm advancing cash to and receiving securities collateral from the counterparty. The Firm also enters into repurchase and securities loaned agreements. At settlement, these commitments result in the Firm receiving cash from and providing securities collateral to the counterparty. Such agreements settle at a future date. These agreements generally do not meet the definition of a derivative, and therefore, are not recorded on the Consolidated balance sheets until settlement date. These agreements predominantly have regular-way settlement terms. Refer to Note 11 for a further discussion of securities financing agreements.

Loan sales- and securitization-related indemnifications
Mortgage repurchase liability
In connection with the Firm's mortgage loan sale and securitization activities with U.S. GSEs the Firm has made representations and warranties that the loans sold meet certain requirements, and that may require the Firm to repurchase mortgage loans and/or indemnify the loan purchaser if such representations and warranties are breached by the Firm.

Private label securitizations
The liability related to repurchase demands associated with private label securitizations is separately evaluated by the Firm in establishing its litigation reserves.

Refer to Note 30 for additional information regarding litigation.

Loans sold with recourse
The Firm provides servicing for mortgages and certain commercial lending products on both a recourse and nonrecourse basis. In nonrecourse servicing, the principal credit risk to the Firm is the cost of temporary servicing advances of funds (i.e., normal servicing advances). In recourse servicing, the servicer agrees to share credit risk with the owner of the mortgage loans, such as Fannie Mae or Freddie Mac or a private investor, insurer or guarantor. Losses on recourse servicing predominantly occur when foreclosure sales proceeds of the property underlying a defaulted loan are less than the sum of the outstanding principal balance, plus accrued interest on the loan and the cost of holding and disposing of the underlying property. The Firm's securitizations are predominantly nonrecourse, thereby effectively transferring the risk of future credit losses to the purchaser of the mortgage-backed securities issued by the trust. The unpaid principal balance of loans sold with recourse as well as the carrying value of the related liability that the Firm has recorded in accounts payable and other liabilities on the Consolidated balance sheets, which is representative of the Firm's view of the likelihood it will have to perform under its recourse obligations, are disclosed in the table on page 303.

Other off-balance sheet arrangements

Indemnification agreements – general
In connection with issuing securities to investors outside the U.S., the Firm may agree to pay additional amounts to the holders of the securities in the event that, due to a change in tax law, certain types of withholding taxes are imposed on payments on the securities. The terms of the securities may also give the Firm the right to redeem the securities if such additional amounts are payable. The Firm may also enter into indemnification clauses such as in connection with the licensing of software to clients ("software licensees") or when it sells a business or assets to a third party ("third-party purchasers"), pursuant to which it indemnifies software licensees for claims of liability or damages that may occur subsequent to the licensing of the software, or third-party purchasers for losses they may incur due to actions taken by the Firm prior to the sale of the business or assets. It is difficult to estimate the Firm's maximum exposure under these indemnification arrangements, since this would require an assessment of future changes in tax law and future claims that may be made against the Firm that have not yet occurred. However, based on historical experience, management expects the risk of loss to be remote.

Merchant charge-backs
Under the rules of payment networks, in its role as a merchant acquirer, the Firm's Merchant Services business in CIB Payments, retains a contingent liability for disputed processed credit and debit card transactions that result in a charge-back to the merchant. If a dispute is resolved in the cardholder's favor, the Firm will (through the cardholder's issuing bank) credit or refund the amount to the cardholder and will charge back the transaction to the merchant. If the Firm is unable to collect the amount from the merchant, the Firm will bear the loss for the amount credited or refunded to the cardholder. The Firm mitigates this risk by withholding future settlements, retaining cash reserve accounts or obtaining other collateral. In addition, the Firm recognizes a valuation allowance that covers the payment or performance risk related to charge-backs.

Clearing Services – Client Credit Risk
The Firm provides clearing services for clients by entering into securities purchases and sales and derivative contracts with CCPs, including ETDs such as futures and options, as well as OTC-cleared derivative contracts. As a clearing member, the Firm stands behind the performance of its clients, collects cash and securities collateral (margin) as well as any settlement amounts due from or to clients, and remits them to the relevant CCP or client in whole or part. There are two types of margin: variation margin is posted on a daily basis based on the value of clients' derivative contracts and initial margin is posted at inception of a derivative contract, generally on the basis of the potential changes in the variation margin requirement for the contract.

As a clearing member, the Firm is exposed to the risk of nonperformance by its clients, but is not liable to clients for the performance of the CCPs. Where possible, the Firm seeks to mitigate its risk to the client through the collection of appropriate amounts of margin at inception and throughout the life of the transactions. The Firm can also cease providing clearing services if clients do not adhere to their obligations under the clearing agreement. In the event of nonperformance by a client, the Firm would close out the client's positions and access available margin. The CCP would utilize any margin it holds to make itself whole, with any remaining shortfalls required to be paid by the Firm as a clearing member.

The Firm reflects its exposure to nonperformance risk of the client through the recognition of margin receivables from clients and margin payables to CCPs; the clients' underlying securities or derivative contracts are not reflected in the Firm's Consolidated Financial Statements.

It is difficult to estimate the Firm's maximum possible exposure through its role as a clearing member, as this would require an assessment of transactions that clients may execute in the future. However, based upon historical experience, and the credit risk mitigants available to the Firm, management believes it is unlikely that the Firm will have to make any material payments under these arrangements and the risk of loss is expected to be remote.

Refer to Note 5 for information on the derivatives that the Firm executes for its own account and records in its Consolidated Financial Statements.

Exchange & Clearing House Memberships
The Firm is a member of several securities and derivative exchanges and clearing houses, both in the U.S. and other countries, and it provides clearing services to its clients. Membership in some of these organizations requires the Firm to pay a pro rata share of the losses incurred by the organization as a result of the default of another member. Such obligations vary with different organizations. These obligations may be limited to the amount (or a multiple of the amount) of the Firm's contribution to the guarantee fund maintained by a clearing house or exchange as part of the resources available to cover any losses in the event of a member default. Alternatively, these obligations may also include a pro rata share of the residual losses after applying the guarantee fund. Additionally, certain clearing houses require the Firm as a member to pay a pro rata share of losses that may result from the clearing house's investment of guarantee fund contributions and initial margin, unrelated to and independent of the default of another member. Generally a payment would only be required should such losses exceed the resources of the clearing house or exchange that are contractually required to absorb the losses in the first instance. In certain cases, it is difficult to estimate the Firm's maximum possible exposure under these membership agreements, since this would require an assessment of future claims that may be made against the Firm that have not yet occurred. However, based on historical experience, management expects the risk of loss to the Firm to be remote. Where the Firm's maximum possible exposure can be estimated, the amount is disclosed in the table on page 303, in the Exchange & clearing house guarantees and commitments line.

Sponsored member repo program
The Firm acts as a sponsoring member to clear eligible overnight and term resale and repurchase agreements through the Government Securities Division of the Fixed Income Clearing Corporation ("FICC") on behalf of clients that become sponsored members under the FICC's rules. The Firm also guarantees to the FICC the prompt and full payment and performance of its sponsored member clients' respective obligations under the FICC's rules. The Firm minimizes its liability under these guarantees by obtaining a security interest in the cash or high-quality securities collateral that the clients place with the clearing house; therefore, the Firm expects the risk of loss to be remote. The Firm's maximum possible exposure, without taking into consideration the associated collateral, is included in the Exchange & clearing house guarantees and commitments line on page 303. Refer to Note 11 for additional information on credit risk mitigation practices on resale agreements and the types of collateral pledged under repurchase agreements.

Guarantees of subsidiaries
In the normal course of business, the Parent Company may provide counterparties with guarantees of certain of the trading and other obligations of its subsidiaries on a contract-by-contract basis, as negotiated with the Firm's counterparties. The obligations of the subsidiaries are included on the Firm's Consolidated balance sheets or are reflected as off-balance sheet commitments; therefore, the Parent Company has not recognized a separate liability for these guarantees. The Firm believes that the occurrence of any event that would trigger payments by the Parent Company under these guarantees is remote.

The Parent Company has guaranteed certain long-term debt and structured notes of its subsidiaries, including JPMorgan Chase Financial Company LLC ("JPMFC"), a 100%-owned finance subsidiary. All securities issued by JPMFC are fully and unconditionally guaranteed by the Parent Company and no other subsidiary of the Parent Company guarantees these securities. These guarantees, which rank pari passu with the Firm's unsecured and unsubordinated indebtedness, are not included in the table on page 303 of this Note. Refer to Note 20 for additional information.

Note 29 – Pledged assets and collateral

Pledged assets

The Firm pledges financial assets that it owns to maintain potential borrowing capacity at discount windows with Federal Reserve banks, various other central banks and FHLBs. Additionally, the Firm pledges assets for other purposes, including to collateralize repurchase and other securities financing agreements, to cover short sales and to collateralize derivative contracts and deposits. Certain of these pledged assets may be sold or repledged or otherwise used by the secured parties and are parenthetically identified on the Consolidated balance sheets as assets pledged.

The following table presents the carrying value of the Firm's pledged assets.

December 31, (in billions)	2024	2023
Assets that may be sold or repledged or otherwise used by secured parties	**$ 152.5**	$ 145.0
Assets that may not be sold or repledged or otherwise used by secured parties	**297.9**	244.2
Assets pledged at Federal Reserve banks and FHLBs	**724.0**	675.6
Total pledged assets	**$ 1,174.4**	$ 1,064.8

Total pledged assets do not include assets of consolidated VIEs; these assets are used to settle the liabilities of those entities. Refer to Note 14 for additional information on assets and liabilities of consolidated VIEs. Refer to Note 11 for additional information on the Firm's securities financing activities. Refer to Note 20 for additional information on the Firm's long-term debt. The significant components of the Firm's pledged assets were as follows.

December 31, (in billions)	2024	2023
Investment securities	**$ 89.6**	$ 108.6
Loans	**740.9**	681.7
Trading assets and other	**343.9**	274.5
Total pledged assets	**$ 1,174.4**	$ 1,064.8

Collateral

The Firm accepts financial assets as collateral that it is permitted to sell or repledge, deliver or otherwise use. This collateral is generally obtained under resale and other securities financing agreements, prime brokerage-related held-for-investment customer receivables and derivative contracts. Collateral is generally used under repurchase and other securities financing agreements, to cover short sales, and to collateralize derivative contracts and deposits.

The following table presents the fair value of collateral accepted.

December 31, (in billions)	2024	2023
Collateral permitted to be sold or repledged, delivered, or otherwise used	**$ 1,544.0**	$ 1,303.9
Collateral sold, repledged, delivered or otherwise used	**1,210.7**	982.8

Note 30 – Litigation

Contingencies

As of December 31, 2024, the Firm and its subsidiaries and affiliates are defendants or respondents in numerous evolving legal proceedings, including private proceedings, public proceedings, government investigations, regulatory enforcement matters, and the matters described below. The litigations range from individual actions involving a single plaintiff to class action lawsuits with potentially millions of class members. Investigations and regulatory enforcement matters involve both formal and informal proceedings, by both governmental agencies and self-regulatory organizations. These legal proceedings are at varying stages of adjudication, arbitration or investigation, and involve each of the Firm's lines of business and several geographies and a wide variety of claims (including common law tort and contract claims and statutory antitrust, securities and consumer protection claims), some of which present novel legal theories.

The Firm believes the estimate of the aggregate range of reasonably possible losses, in excess of reserves established, for its legal proceedings is from $0 to approximately $1.4 billion at December 31, 2024. This estimated aggregate range of reasonably possible losses was based upon information available as of that date for those proceedings in which the Firm believes that an estimate of reasonably possible loss can be made. For certain matters, the Firm does not believe that such an estimate can be made, as of that date. The Firm's estimate of the aggregate range of reasonably possible losses involves significant judgment, given:

- the number, variety and varying stages of the proceedings, including the fact that many are in preliminary stages,
- the existence in many such proceedings of multiple defendants, including the Firm, whose share of liability (if any) has yet to be determined,
- the numerous yet-unresolved issues in many of the proceedings, including issues regarding class certification and the scope of many of the claims, and
- the uncertainty of the various potential outcomes of such proceedings, including where the Firm has made assumptions concerning future rulings by the court or other adjudicator, or about the behavior or incentives of adverse parties or regulatory authorities, and those assumptions prove to be incorrect.

In addition, the outcome of a particular proceeding may be a result which the Firm did not take into account in its estimate because the Firm had deemed the likelihood of that outcome to be remote. Accordingly, the Firm's estimate of the aggregate range of reasonably possible losses will change from time to time, and actual losses may vary significantly.

Set forth below are descriptions of the Firm's material legal proceedings.

1MDB Litigation. J.P. Morgan (Suisse) SA was named as a defendant in a civil litigation filed in May 2021 in Malaysia by 1Malaysia Development Berhad ("1MDB"), a Malaysian state-owned and controlled investment fund. The claim alleges "dishonest assistance" against J.P. Morgan (Suisse) SA in relation to payments of $300 million and $500 million, from 2009 and 2010, respectively, received from 1MDB and paid into an account at J.P. Morgan (Suisse) SA held by 1MDB PetroSaudi Limited, a joint venture company between 1MDB and PetroSaudi Holdings (Cayman) Limited. In March 2024, the Court upheld the Firm's challenge to the validity of service and the Malaysian Court's jurisdiction to hear the claim. That decision has been appealed by 1MDB. In August 2023, the Court denied an application by 1MDB to discontinue its claim with permission to re-file a new claim in the future. That decision was appealed by both 1MDB and the Firm, and an appeals court is scheduled to hear both appeals in November 2025. In its appeal, the Firm seeks to prevent any claim from continuing.

In addition, in November 2023, the Federal Office of the Attorney General (OAG) in Switzerland notified J.P. Morgan (Suisse) SA that it is conducting an investigation into possible criminal liability in connection with transactions arising from J.P. Morgan (Suisse) SA's relationship with the 1MDB PetroSaudi joint venture and its related persons for the period September 2009 through August 2015. The OAG investigation is ongoing.

Amrapali. India's Enforcement Directorate ("ED") is investigating J.P. Morgan India Private Limited in connection with investments made in 2010 and 2012 by two offshore funds formerly managed by JPMorganChase entities into residential housing projects developed by the Amrapali Group ("Amrapali") relating to delays in delivering or failure to deliver residential units. In August 2021, the ED issued an order fining J.P. Morgan India Private Limited approximately $31.5 million, and the Firm is appealing that order. Relatedly, in July 2019, the Supreme Court of India issued an order making preliminary findings that Amrapali and other parties, including unspecified JPMorganChase entities and the offshore funds that had invested in the projects, violated certain criminal currency control and money laundering provisions, and ordered the ED to conduct a further inquiry. The Firm is responding to and cooperating with the inquiry.

Foreign Exchange Investigations and Litigation. The Firm previously reported settlements with certain government authorities relating to its foreign exchange ("FX") sales and trading activities and controls related to those activities. Among those resolutions, in May 2015, the Firm pleaded guilty to a single violation of federal antitrust law. The Department of Labor ("DOL") granted the Firm exemptions that permit the Firm and its affiliates to continue to rely on the Qualified Professional Asset Manager exemption under the Employee Retirement Income Security Act ("ERISA") through the ten-year disqualification period following the antitrust plea. The only remaining FX-related governmental inquiry is a South Africa Competition Commission matter which is currently pending before the South Africa Competition Tribunal.

With respect to civil litigation matters, some FX-related individual and putative class actions filed outside the U.S., including in the U.K., Israel, the Netherlands, Brazil and Australia, remain. In July 2023, the U.K. Court of Appeal overturned the Competition Appeal Tribunal's earlier denial of a request for class certification on an opt-out basis. The defendants have appealed this decision to the U.K. Supreme Court. In Israel, a settlement in principle has been reached on the putative class action, which remains subject to court approval.

Interchange Litigation. Groups of merchants and retail associations filed a series of class action complaints alleging that Visa and Mastercard, as well as certain banks, conspired to set the price of credit and debit card interchange fees and enacted related rules in violation of antitrust laws.

In September 2018, the parties settled the class action seeking monetary relief, with the defendants collectively contributing approximately $6.2 billion. The settlement has been approved by the United States District Court for the Eastern District of New York and affirmed on appeal. Based on the percentage of merchants that opted out of the settlement, $700 million has been returned to the defendants from the settlement escrow. A separate class action seeking injunctive relief continues, and in September 2021, the District Court granted plaintiffs' motion for class certification in part, and denied the motion in part. In June 2024, the District Court denied preliminary approval of a settlement of the injunctive class action in which Visa and Mastercard agreed to certain changes to their respective network rules and system-wide reductions in interchange rates for U.S.-based merchants. The parties are considering next steps.

Of the merchants who opted out of the damages class settlement, certain merchants filed individual actions raising similar allegations against Visa and Mastercard, as well as against the Firm and other banks. While some of those actions remain pending, the defendants have reached settlements with the merchants who opted out representing over 70% of the combined Mastercard-branded and Visa-branded payment card sales volume.

LIBOR and Other Benchmark Rate Investigations and Litigation. JPMorganChase has responded to inquiries from various governmental agencies and entities around the world relating primarily to the British Bankers Association's ("BBA") London Interbank Offered Rate ("LIBOR") for various currencies and the European Banking Federation's Euro Interbank Offered Rate ("EURIBOR"). The Swiss Competition Commission's investigation relating to EURIBOR, to which the Firm and one other bank remain subject, continues. The Firm appealed a December 2016 decision by the European Commission against the Firm and other banks finding an infringement of European antitrust rules relating to EURIBOR. In December 2023, the European General Court annulled the fine imposed by the European Commission, but exercised its discretion to re-impose a fine in an identical amount. In March 2024, the Firm filed an appeal of this decision with the Court of Justice of the European Union.

In addition, the Firm has been named as a defendant along with other banks in various individual and putative class actions related to benchmark rates, including U.S. dollar LIBOR. In actions related to U.S. dollar LIBOR during the period that it was administered by the BBA, the United States District Court for the Southern District of New York granted class certification of antitrust claims related to bonds and interest rate swaps sold directly by the defendants, including the Firm. The Firm has obtained dismissal of certain actions and resolved certain other actions, and as to all remaining actions has moved for summary judgment. In addition, a lawsuit filed by a group of individual plaintiffs asserting antitrust claims, alleging that the Firm and other defendants were engaged in an unlawful agreement to set U.S. dollar LIBOR and conspired to monopolize the market for LIBOR-based consumer loans and credit cards was dismissed in October 2023 and affirmed on appeal by the United States Court of Appeals for the Ninth Circuit in December 2024. The Firm has resolved all non-U.S. dollar LIBOR actions.

Russian Litigation. The Firm is obligated to comply with international sanctions laws, which mandate the blocking of certain assets. These laws apply when assets associated with individuals, companies, products or services are within the scope of the sanctions. The Firm has faced actual and threatened litigation in Russia seeking payments that the Firm cannot make under, and is contractually excused from paying as a result of, relevant sanctions laws. In claims involving the Firm and claims filed against other financial institutions, Russian courts have disregarded the parties' contractual agreements concerning forum selection and did not recognize foreign sanctions laws as a basis for not making payment. Russian courts have entered judgment against the Firm in a number of claims, including one for $439 million, and a judgment has been executed against assets held onshore by the Firm in Russia. The total amount of the judgments exceeds the total amount of available assets that the Firm holds in Russia. The Firm continues to appeal the Russian courts' decisions, and judgments may not be executed while on appeal. Russian courts have also ordered interim freezes of Firm assets in Russia (including, among other things, funds in bank accounts, securities, shares in authorized capital, and certain trademarks, of the named defendants) pending a determination of certain underlying claims against the Firm. The Firm has challenged claims being pursued in the Russian courts and related freeze orders in other jurisdictions provided for by the parties' contractual forum selections. If further claims are enforced despite the actions taken by the Firm to challenge the claims and orders and to seek the proper application of law, the Firm's assets in Russia could be seized in full, and certain client assets could also be seized, or the Firm could be prevented from complying with its obligations.

SEC Inquiries. In October 2024, the Firm entered into settlements with the SEC to resolve inquiries related to, among other things, conflict disclosures concerning the selection of portfolio managers and the timing of the Firm's liquidation of shares distributed in-kind to certain investment vehicles that invest in third-party managed private funds and certain other matters. The resolutions required the Firm to pay a combined $151 million in civil penalties and voluntary payments to customers. The Firm continues to cooperate in connection with SEC inquiries concerning the aggregation of accounts for fee billing and various other matters.

Shareholder Litigation. Several shareholder putative class actions, as well as shareholder derivative actions purporting to act on behalf of the Firm, have been filed against the Firm, its Board of Directors and certain of its current and former officers.

Certain of these shareholder suits relate to historical trading practices by former employees in the precious metals and U.S. treasuries markets and related conduct which were the subject of the Firm's resolutions with the DOJ, CFTC and SEC in September 2020, and fiduciary activities that were separately the subject of a resolution between JPMorgan Chase Bank, N.A. and the OCC in November 2020. One of these shareholder derivative suits was filed in the Supreme Court of the State of New York in May 2022, asserting breach of fiduciary duty and unjust enrichment claims relating to the historical trading practices and related conduct and fiduciary activities which were the subject of the resolutions described above. In December 2022, the court granted defendants' motion to dismiss this action in full, and in July 2023, the plaintiff filed an appeal, which remains pending.

A second shareholder derivative action relating to the historical trading practices and related conduct was filed in the United States District Court for the Eastern District of New York in December 2022. Defendants have moved to dismiss the complaint.

Zelle Network Litigation. In December 2024, the Consumer Financial Protection Bureau ("CFPB") filed a complaint against Early Warning Services, LLC ("EWS"), Bank of America, N.A., Wells Fargo Bank, N.A. and JPMorgan Chase Bank, N.A. in the United States District Court for the District of Arizona. The CFPB alleges that EWS and the defendant banks have failed to take sufficient efforts to prevent fraud on the Zelle network. The defendants will file a response to the complaint.

* * *

In addition to the various legal proceedings discussed above, JPMorganChase and its subsidiaries are named as defendants or are otherwise involved in a substantial number of other legal proceedings. The Firm believes it has meritorious defenses to the claims asserted against it in its currently outstanding legal proceedings and it intends to defend itself vigorously. Additional legal proceedings may be initiated from time to time in the future.

The Firm has established reserves for several hundred of its currently outstanding legal proceedings. In accordance with the provisions of U.S. GAAP for contingencies, the Firm accrues for a litigation-related liability when it is probable that such a liability has been incurred and the amount of the loss can be reasonably estimated. The Firm evaluates its outstanding legal proceedings each quarter to assess its litigation reserves, and makes adjustments in such reserves, upward or downward, as appropriate, based on management's best judgment after consultation with counsel. The Firm's legal expense was $740 million, $1.4 billion and $266 million for the years ended December 31, 2024, 2023 and 2022, respectively. There is no assurance that the Firm's litigation reserves will not need to be adjusted in the future.

In view of the inherent difficulty of predicting the outcome of legal proceedings, particularly where the claimants seek very large or indeterminate damages, or where the matters present novel legal theories, involve a large number of parties or are in early stages of discovery, the Firm cannot state with confidence what will be the eventual outcomes of the currently pending matters, the timing of their ultimate resolution or the eventual losses, fines, penalties or consequences related to those matters. JPMorganChase believes, based upon its current knowledge and after consultation with counsel, consideration of the material legal proceedings described above and after taking into account its current litigation reserves and its estimated aggregate range of possible losses, that the other legal proceedings currently pending against it should not have a material adverse effect on the Firm's consolidated financial condition. The Firm notes, however, that in light of the uncertainties involved in such proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves it has currently accrued or that a matter will not have material reputational consequences. As a result, the outcome of a particular matter may be material to JPMorganChase's operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of JPMorganChase's income for that period.

Note 31 – International operations

The following table presents income statement and balance sheet-related information for JPMorganChase by major international geographic area. The Firm defines international activities for purposes of this footnote presentation as business transactions that involve clients residing outside of the U.S., and the information presented below is based predominantly on the domicile of the client, the location from which the client relationship is managed, booking location or the location of the trading desk. However, many of the Firm's U.S. operations serve international businesses.

As the Firm's operations are highly integrated, estimates and subjective assumptions have been made to apportion revenue and expense between U.S. and international operations. These estimates and assumptions are consistent with the allocations used for the Firm's segment reporting as set forth in Note 32.

The Firm's long-lived assets for the periods presented are not considered by management to be significant in relation to total assets. The majority of the Firm's long-lived assets are located in the U.S.

As of or for the year ended December 31, (in millions)	Revenue[b]	Expense[c]	Income before income tax expense	Net income	Total assets	
2024						
Europe/Middle East/Africa	**$ 22,353**	**$ 12,843**	**$ 9,510**	**$ 6,713**	**$ 552,407**	[d]

Total	$ 128,695	$ 82,529	$ 46,166	$ 37,676	$ 3,665,743	

(a) Substantially reflects the U.S.
(b) Revenue is composed of net interest income and noninterest revenue.
(c) Expense is composed of noninterest expense and the provision for credit losses.
(d) Total assets for the U.K. were approximately $369 billion, $352 billion and $357 billion at December 31, 2024, 2023 and 2022, respectively.

Note 32 – Business segments & Corporate

Business segment reorganization: Effective in the second quarter of 2024, the Firm reorganized its reportable business segments by combining the former Corporate & Investment Bank and Commercial Banking business segments to form one reportable segment, the Commercial & Investment Bank. As a result of the reorganization, the Firm has three reportable business segments – Consumer & Community Banking, Commercial & Investment Bank, and Asset & Wealth Management – with the remaining activities in Corporate.

Adoption of accounting standard — Segment Reporting — Improvements to Reportable Segment Disclosures: This guidance was adopted retrospectively for the Firm's annual Consolidated Financial Statements for the year ended December 31, 2024. The adoption of this guidance requires additional reportable segment disclosures, primarily relating to significant segment expenses and the chief operating decision maker ("CODM"). Adoption of this guidance did not result in changes to the identification of the Firm's reportable business segments, or of its CODM.

The Firm is managed on an LOB basis. The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is evaluated by the Firm's Operating Committee, whose members act collectively as the Firm's CODM. Segment results are presented on a managed basis. Refer to Segment & Corporate results in this footnote for a further discussion of JPMorganChase's reportable business segments and Corporate.

The following is a description of each of the Firm's reportable business segments, and the products and services that they provide to their respective client bases, as well as a description of Corporate activities.

Consumer & Community Banking

Consumer & Community Banking offers products and services to consumers and small businesses through bank branches, ATMs, digital (including mobile and online) and telephone banking. CCB is organized into Banking & Wealth Management (including Consumer Banking, Business Banking and J.P. Morgan Wealth Management), Home Lending (including Home Lending Production, Home Lending Servicing and Real Estate Portfolios) and Card Services & Auto. Banking & Wealth Management offers deposit, investment and lending products, cash management, payments and services. Home Lending includes mortgage origination and servicing activities, as well as portfolios consisting of residential mortgages and home equity loans. Card Services issues credit cards and offers travel services. Auto originates and services auto loans and leases.

Commercial & Investment Bank

The Commercial & Investment Bank is comprised of the Banking & Payments and Markets & Securities Services businesses. These businesses offer investment banking, lending, payments, market-making, financing, custody and securities products and services to a global base of corporate and institutional clients. Banking & Payments offers products and services in all major capital markets, including advising on corporate strategy and structure, capital-raising in equity and debt markets, and loan origination and syndication. Banking & Payments also provides services that enable clients to manage payments globally across liquidity and account solutions, commerce solutions, clearing, trade, and working capital. Markets & Securities Services includes Markets, which is a global market-maker across products, including cash and derivative instruments, and also offers sophisticated risk management solutions, lending, prime brokerage, clearing and research. Markets & Securities Services also includes Securities Services, a leading global custodian that provides custody, fund services, liquidity and trading services, and data solutions products.

Asset & Wealth Management

Asset & Wealth Management, with client assets of $5.9 trillion, is a global leader in investment and wealth management.

Asset Management

Offers multi-asset investment management solutions across equities, fixed income, alternatives and money market funds to institutional and retail investors providing for a broad range of clients' investment needs.

Global Private Bank

Provides retirement products and services, brokerage, custody, estate planning, lending, deposits and investment management to high net worth clients.

The majority of AWM's client assets are in actively managed portfolios.

Corporate

Corporate consists of Treasury and Chief Investment Office ("CIO") and Other Corporate. Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks.

Other Corporate includes staff functions and expense that is centrally managed as well as certain Firm initiatives and activities not solely aligned to a specific LOB. The major Other Corporate functions include Real Estate, Technology, Legal, Corporate Finance, Human Resources, Internal Audit, Risk Management, Compliance, Control Management, Corporate Responsibility and various Other Corporate groups.

Description of business segment reporting methodology

Results of the reportable business segments are intended to present each segment as if it were a stand-alone business. The management reporting process that derives business segment results includes the allocation of certain income and expense items. The Firm periodically assesses the assumptions, methodologies and reporting classifications used for segment reporting, and therefore further refinements may be implemented in future periods. The Firm also assesses the level of capital required for each LOB on at least an annual basis. The Firm's LOBs also provide various business metrics which are utilized by the Firm and its investors and analysts in assessing performance.

Revenue sharing

When business segments or businesses within each segment join efforts to sell products and services to the Firm's clients and customers, the participating businesses may agree to share revenue from those transactions. Revenue is generally recognized in the segment responsible for the related product or service, with allocations to the other segments or businesses involved in the transaction. The segment and business results reflect these revenue-sharing agreements.

Expense allocation

Where business segments use services provided by Corporate support units, or another business segment, the costs of those services are allocated to the respective business segments. The expense is generally allocated based on the actual cost and use of services provided. In contrast, certain costs and investments related to Corporate that are not currently utilized by any LOB are not allocated to the business segments and are retained in Corporate. Expense retained in Corporate generally includes costs that would not be incurred if the segments were stand-alone businesses, and other items not solely aligned with a particular reportable business segment.

Funds transfer pricing

Funds transfer pricing ("FTP") is the process by which the Firm allocates interest income and expense to the LOBs and Other Corporate and transfers the primary interest rate risk and liquidity risk to Treasury and CIO.

The funds transfer pricing process considers the interest rate and liquidity risk characteristics of assets and liabilities and off-balance sheet products.

Periodically, the methodology and assumptions utilized in the FTP process are adjusted to reflect economic conditions and other factors, which may impact the allocation of net interest income to the segments. Effective in the fourth quarter of 2024, the Firm updated its FTP with respect to consumer deposits, which resulted in an increase in the funding benefit reflected within CCB's net interest income that is fully offset in Corporate, with no effect on the Firm's net interest income.

Foreign exchange risk

Foreign exchange risk is transferred from the LOBs and Other Corporate to Treasury and CIO for certain revenues and expenses. Treasury and CIO manages these risks centrally and reports the impact of foreign exchange rate movements related to the transferred risk in its results.

Debt expense and preferred stock dividend allocation

As part of the FTP process, almost all of the cost of the credit spread component of outstanding unsecured long-term debt and preferred stock dividends is allocated to the reportable business segments, while the balance of the cost is retained in Corporate. The methodology to allocate the cost of unsecured long-term debt and preferred stock dividends to the business segments is aligned with the relevant regulatory capital requirements and funding needs of the LOBs, as applicable. The allocated cost of unsecured long-term debt is included in a business segment's net interest income, and net income is reduced by preferred stock dividends, to arrive at a business segment's net income applicable to common equity.

Capital allocation

Each LOB and Corporate is allocated capital by taking into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. ROE is measured and internal targets for expected returns are established as key measures of an LOB's performance.

The Firm's current equity allocation methodology incorporates Basel III Standardized RWA and the GSIB surcharge, both under rules currently in effect, as well as a simulation of capital depletion in a severe stress environment. At least annually, the assumptions, judgments and methodologies used to allocate capital are reassessed and, as a result, the capital allocated to the LOBs and Corporate may change.

Segment & Corporate results

The following table provides a summary of results for the Firm's reportable business segments and Corporate activities as of or for the years ended December 31, 2024, 2023 and 2022, on a managed basis. The Firm's definition of managed basis starts with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm as a whole (and for each of the reportable business segments and Corporate) on an FTE basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. This allows management to assess the comparability of revenue from year-to-year arising from both taxable and tax-exempt sources. The corresponding income tax impact related to tax-exempt items is recorded within income tax expense/(benefit). These adjustments have no impact on net income as reported by the Firm as a whole or by the each of the LOBs and Corporate.

The Operating Committee reviews segment results including net interest income, noninterest revenue, noninterest expense, provision for credit losses and net income on a managed basis. The Operating Committee uses these measures to evaluate segment performance and to make key operating decisions, including resource and capital allocations.

Segment & Corporate results and reconciliation[a]

(a) Segment results on a managed basis reflect revenue on a FTE basis with the corresponding income tax impact recorded within income tax expense/(benefit). These adjustments are eliminated in reconciling items to arrive at the Firm's reported U.S. GAAP results. In addition, effective January 1, 2024, the Firm adopted updates to the Accounting for Investments in Tax Credit Structures guidance, under the modified retrospective method. Refer to Notes 1, 6, 14 and 25 for additional information.

(b) Excludes expense related to services provided by Corporate support units, which is allocated from Corporate to each respective reportable business segment, as applicable, through noncompensation expense.

(c) Reflects occupancy; technology, communications and equipment; professional and outside services; marketing; and other expense. Refer to Note 6 for additional information on other expense.

(d) Certain services are provided by Corporate and used by each of the reportable business segments. The costs of these services, including compensation-related costs, are allocated from Corporate to the respective reportable business segments, with the allocations recorded in noncompensation expense.

(e) In the first quarter of 2023, the allocations of revenue and expense to CCB associated with a Merchant Services revenue sharing agreement were discontinued and are now retained in Payments in CIB. Prior-period amounts have been revised to conform with the current presentation.

(f) Included a $7.9 billion net gain related to Visa shares recorded in the second quarter of 2024. Refer to Notes 2 and 6 for additional information.

(g) Included a $1.0 billion contribution of Visa shares to the JPMorgan Chase Foundation recorded in the second quarter of 2024. Refer to Notes 2 and 6 for additional information.

Note 33 – Parent Company

The following tables present Parent Company-only financial statements.

Statements of income and comprehensive income

Year ended December 31, (in millions)	2024	2023	2022
Income			
Dividends from subsidiaries and affiliates:			
Bank and bank holding company	**$ 37,000**	$ 61,000	$ 40,500

Cash interest paid	**$ 14,851**	$ 13,742	$ 7,462
Cash income taxes paid, net[(d)]	**6,252**	10,291	6,941

(a) Includes interest expense for intercompany derivative hedges on the Firm's LTD and related fair value adjustments, which is offset by related amounts in Other interest expense/(income).

(b) At December 31, 2024, long-term debt that contractually matures in 2025 through 2029 totaled $7.7 billion, $29.3 billion, $20.2 billion, $35.0 billion, and $18.5 billion, respectively.

(c) Refer to Notes 20 and 28 for information regarding the Parent Company's guarantees of its subsidiaries' obligations.

(d) Represents payments, net of refunds, made by the Parent Company to various taxing authorities and includes taxes paid on behalf of certain of its subsidiaries that are subsequently reimbursed. The reimbursements were $5.0 billion, $13.2 billion, and $11.3 billion for the years ended December 31, 2024, 2023 and 2022, respectively.

Note 34 – Business combinations

On May 1, 2023, JPMorganChase acquired certain assets and assumed certain liabilities of First Republic Bank (the "First Republic acquisition") from the Federal Deposit Insurance Corporation (“FDIC”), as receiver. The acquisition resulted in a bargain purchase gain, which represents the excess of the estimated fair value of the net assets acquired above the purchase price.

The Firm has determined that this acquisition constitutes a business combination under U.S. GAAP. Accordingly, the initial recognition of the assets acquired and liabilities assumed were generally measured at their estimated fair values as of May 1, 2023. The determination of those fair values required management to make certain market-based assumptions about expected future cash flows, discount rates and other valuation inputs at the time of the acquisition. The Firm believes that the fair value estimates of the assets acquired and liabilities assumed provide a reasonable basis for determining the estimated bargain purchase gain.

The First Republic acquisition resulted in a preliminary estimated bargain purchase gain of $2.7 billion. The final bargain purchase gain of $2.9 billion reflects adjustments of $103 million and $63 million for the years ended December 31, 2024 and 2023, respectively, made during the one-year measurement period, as permitted by U.S. GAAP, to finalize management's fair value estimates for the assets acquired and liabilities assumed. As of December 31, 2024, certain matters related to the final settlement remained outstanding between the Firm and the FDIC.

On January 17, 2025, the Firm reached an agreement with the FDIC with respect to certain outstanding items. As a result of the agreement, the Firm made a payment of $609 million to the FDIC on January 31, 2025 and reduced its additional payable to the FDIC, which will result in a gain of approximately $600 million to be recorded in other income in the first quarter of 2025.

In connection with the First Republic acquisition, the Firm and the FDIC entered into two shared-loss agreements with respect to certain loans and lending-related commitments (the "shared-loss assets"): the Commercial Shared-Loss Agreement ("CSLA") and the Single-Family Shared-Loss Agreement (“SFSLA”). The CSLA covers 80% of credit losses, on a pari passu basis, over 5 years with a subsequent 3-year recovery period for certain acquired commercial loans and other real estate exposure. The SFSLA covers 80% of credit losses, on a pari passu basis, for 7 years for certain acquired loans secured by mortgages on real property or shares in cooperative property constituting a primary residence. The indemnification assets, which represent the fair value of the CSLA and SFSLA on the acquisition date, are reflected in the total assets acquired.

As part of the consideration paid, JPMorganChase issued a five-year, $50 billion secured note to the FDIC (the "Purchase Money Note"). The Purchase Money Note bears interest at a fixed rate of 3.4% and is secured by certain of the acquired loans. The Purchase Money Note is prepayable upon notice to the holder.

The Firm had placed a $5 billion deposit with First Republic Bank on March 16, 2023, as part of $30 billion of deposits provided by a consortium of large U.S. banks. The Firm's $5 billion deposit was effectively settled as part of the acquisition and the associated allowance for credit losses was released upon closing. The Firm subsequently repaid the remaining $25 billion of deposits to the consortium of banks, including accrued interest through the payment date on May 9, 2023.

The computation of the purchase price, the fair values of the assets acquired and liabilities assumed as part of the First Republic acquisition and the related bargain purchase gain are presented below, which reflects adjustments made during the measurement period to the acquisition-date fair value of the net assets acquired. The measurement period ended on April 30, 2024.

(in millions)		Fair value purchase price allocation as of May 1, 2023
Purchase price consideration		
Amounts paid/due to the FDIC, net of cash acquired[(a)]	$	13,555
Purchase Money Note (at fair value)[(b)]		48,848
Settlement of First Republic deposit and other related party transactions[(c)]		5,447
Contingent consideration - Shared-loss agreements		15
Purchase price consideration	$	67,865
Assets		
Securities	$	30,285
Loans		153,242
Core deposit and customer relationship intangibles		1,455
Indemnification assets - Shared-loss agreements		675
Accounts receivable and other assets[(d)]		6,740
Total assets acquired	$	192,397
Liabilities		
Deposits	$	87,572
FHLB advances		27,919
Lending-related commitments		2,614
Accounts payable and other liabilities[(d)]		2,792
Deferred tax liabilities		757
Total liabilities assumed	$	121,654
Fair value of net assets acquired	$	70,743
Gain on acquisition, after income taxes	$	2,878

(a) Net of cash acquired of $680 million, and including disputed amounts with the FDIC as of April 30, 2024.
(b) As part of the consideration paid, JPMorganChase issued a five-year, $50 billion secured note to the FDIC (the "Purchase Money Note").
(c) Includes $447 million of securities financing transactions with First Republic Bank that were effectively settled on the acquisition date.
(d) Other assets include $1.2 billion in tax-oriented investments and $683 million of lease right-of-use assets. Other liabilities include the related tax-oriented investment liabilities of $669 million and lease liabilities of $748 million.

The following describes the accounting policies and fair value methodologies generally used by the Firm for the following assets acquired and liabilities assumed: core deposit and customer relationship intangibles, shared-loss agreements and the related indemnification assets, Purchase Money Note, and FHLB advances.

For further discussion of the Firm's accounting policies and valuation methodologies, refer to Notes 2 and 3 for fair value measurement, Note 10 for investment securities, Note 12 for loans, Note 17 for deposits, and Note 28 for lending-related commitments.

Core deposit and customer relationship intangibles

Core deposit and certain wealth management customer relationship intangibles were acquired as part of the First Republic acquisition. The core deposit intangible of $1.3 billion was valued by discounting estimated after-tax cost savings over the remaining useful life of the deposits using the favorable source of funds method. The after-tax cost savings were estimated based on the difference between the cost of maintaining the core deposit base relative to the cost of next best alternative funding sources available to market participants. The customer relationship intangibles of $180 million were valued by discounting estimated after-tax earnings over their remaining useful lives using the multi-period excess earnings method. Both intangible asset valuations utilized assumptions that the Firm believes a market participant would use to estimate fair values, such as growth and attrition rates, projected fee income as well as related costs to service the relationships, and discount rates. The core deposit and customer relationship intangibles are amortized over a projected period of future cash flows of approximately 7 years. Refer to Note 15 for further discussion on other intangible assets.

Indemnification assets - Shared-loss agreements

The indemnification assets represent forecasted recoveries from the FDIC associated with the shared-loss assets over the respective shared-loss recovery periods. The indemnification assets were recorded at fair value in other assets on the Consolidated balance sheets on the acquisition date. The fair values of the indemnification assets were estimated based on the timing of the forecasted losses underlying the related allowance for credit losses. The subsequent quarterly remeasurement of the indemnification assets is based on changes in the amount and timing of forecasted losses in the allowance for credit losses associated with the shared-loss assets and is recorded in other income. Under certain circumstances, the Firm may be required to make a payment to the FDIC upon termination of the shared-loss agreements based on the level of actual losses and recoveries on the shared-loss assets. The estimated potential future payment is reflected as contingent consideration as part of the purchase price consideration.

Purchase Money Note and FHLB advances

The Purchase Money Note is recorded in long-term debt on the Consolidated balance sheets. The fair value of the Purchase Money Note was estimated based on a discounted cash flow methodology and incorporated estimated market discount rates.

The FHLB advances assumed in the acquisition are recorded in short-term borrowings and in long-term debt. The fair values of the FHLB advances were based on a discounted cash flow methodology and considered the observed FHLB advance issuance rates.

Loans

The following table presents the unpaid principal balance ("UPB") and fair values of the loans acquired as of May 1, 2023, and reflects adjustments made during the measurement period to the acquisition-date fair value of the loans acquired.

	May 1, 2023	
(in millions)	UPB	Fair value
Residential real estate	$ **106,240**	$ **92,053**
Auto and other	**3,093**	**2,030**
Total consumer	**109,333**	**94,083**
Secured by real estate	**37,117**	**33,602**
Commercial & industrial	**4,332**	**3,932**
Other	**23,499**	**21,625**
Total wholesale	**64,948**	**59,159**
Total loans	$ **174,281**	$ **153,242**

Unaudited pro forma condensed combined financial information

The following table presents certain unaudited pro forma financial information for the year ended December 31, 2023 and 2022 as if the First Republic acquisition had occurred on January 1, 2022, including recognition of the estimated bargain purchase gain of $2.8 billion and the provision for credit losses of $1.2 billion. Additional adjustments include the interest on the Purchase Money Note and the impact of amortizing and accreting certain estimated fair value adjustments related to intangible assets, loans and lending-related commitments.

The Firm expects to achieve operating cost savings and other business synergies resulting from the acquisition that are not reflected in the pro forma amounts. The pro forma information is not necessarily indicative of the historical results of operations had the acquisition occurred on January 1, 2022, nor is it indicative of the results of operations in future periods.

	Year ended December 31,	
(in millions)	2023	2022
Noninterest revenue	$ **65,816**	$ 66,510
Net interest income	**90,856**	71,005
Net income	**48,665**	41,089

Supplementary Information: Distribution of assets, liabilities and stockholders' equity; interest rates and interest differentials

Consolidated average balance sheets, interest and rates

Provided below is a summary of JPMorganChase's consolidated average balances, interest and rates on a taxable-equivalent basis for the years 2022 through 2024. Income computed on a taxable-equivalent basis is the income reported in the Consolidated statements of income, adjusted to present interest income and rates earned on assets exempt from income taxes (i.e., federal taxes) on a basis comparable with other taxable investments. The incremental tax rate used for calculating the taxable-equivalent adjustment was approximately 24% in 2024, 2023 and 2022.

(Table continued on next page)

(Unaudited)	**2024**		
Year ended December 31, (Taxable-equivalent interest and rates; in millions, except rates)	Average balance[f]	Interest[f]	Rate

Interest rate spread			1.93 %
Net interest income and net yield on interest-earning assets		$ 93,060	2.63

(a) Represents securities that are tax-exempt for U.S. federal income tax purposes.
(b) Includes brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated Balance Sheets.
(c) The rates reflect the impact of interest earned on cash collateral where the cash collateral has been netted against certain derivative payables.
(d) All other interest-bearing liabilities include brokerage-related customer payables.
(e) The combined balance of trading liabilities – debt and equity instruments was $185.4 billion, $153.3 billion and $138.1 billion for the years ended December 31, 2024, 2023 and 2022, respectively.
(f) Includes the effect of derivatives that qualify for hedge accounting where applicable. Taxable-equivalent amounts are used, also where applicable. Refer to Note 5 for additional information on hedge accounting.

(g) The ratio of average stockholders' equity to average assets was 8.2%, 8.1% and 7.4% for the years ended December 31, 2024, 2023 and 2022, respectively. The return on average stockholders' equity, based on net income, was 17.4%, 16.0% and 13.2% for the years ended December 31, 2024, 2023 and 2022, respectively.

(h) Included fees and commissions on loans of $3.6 billion, $2.2 billion and $1.8 billion for the years ended December 31, 2024, 2023 and 2022, respectively.

(i) The annualized rate for securities based on amortized cost was 3.79%, 3.09% and 1.75% for the years ended December 31, 2024, 2023 and 2022, respectively, and does not give effect to changes in fair value that are reflected in AOCI.

Within the Consolidated average balance sheets, interest and rates summary, the principal amounts of nonaccrual loans have been included in the average loan balances used to determine the average interest rate earned on loans. Refer to Note 12 for additional information on nonaccrual loans, including interest accrued.

Interest rates and interest differential analysis of net interest income – U.S. and non-U.S.

Presented below is a summary of interest and rates segregated between U.S. and non-U.S. operations for the years 2022 through 2024. The segregation of U.S. and non-U.S. components is based on the location of the office recording the transaction.

(Table continued on next page)

(Unaudited) Year ended December 31, (Taxable-equivalent interest and rates; in millions, except rates)	2024 Average balance	2024 Interest	2024 Rate
Interest-earning assets			
Deposits with banks:			
U.S.	$ **284,913**	$ **15,157**	**5.32** %
Non-U.S.	**205,292**	**7,140**	**3.48**
Federal funds sold and securities purchased under resale agreements:			
U.S.	**193,210**	**10,686**	**5.53**
Non-U.S.	**165,987**	**7,613**	**4.59**
Securities borrowed:			
U.S.	**150,251**	**7,330**	**4.88**
Non-U.S.	**59,493**	**1,878**	**3.16**
Trading assets – debt instruments:			
U.S.	**309,568**	**13,579**	**4.39**
Non-U.S.	**146,461**	**6,794**	**4.64**
Investment securities:			
U.S.	**567,784**	**21,458**	**3.78**
Non-U.S.	**43,457**	**1,882**	**4.33**
Loans:			
U.S.	**1,211,978**	**85,621**	**7.06**
Non-U.S.	**110,447**	**6,967**	**6.31**
All other interest-earning assets, predominantly U.S.[(a)]	**88,726**	**8,305**	**9.36**
Total interest-earning assets	**3,537,567**	**194,410**	**5.50**
Interest-bearing liabilities			
Interest-bearing deposits:			
U.S.	**1,307,000**	**33,173**	**2.54**
Non-U.S.	**441,050**	**16,386**	**3.72**
Federal funds purchased and securities loaned or sold under repurchase agreements:			
U.S.	**294,476**	**15,949**	**5.42**
Non-U.S.	**69,344**	**3,200**	**4.61**
Trading liabilities – debt, short-term and all other interest-bearing liabilities:			
U.S.	**222,710**	**8,289**	**3.72**
Non-U.S.	**130,937**	**4,050**	**3.09**
Beneficial interests issued by consolidated VIEs, predominantly U.S.	**26,515**	**1,383**	**5.22**
Long-term debt:			
U.S.	**338,166**	**18,760**	**5.55**
Non-U.S.	**6,180**	**160**	**2.59**
Total interest-bearing liabilities	**2,836,378**	**101,350**	**3.57**
Noninterest-bearing liabilities[(b)]	**701,189**		
Total investable funds	$ **3,537,567**	$ **101,350**	**2.86** %
Net interest income and net yield:		$ **93,060**	**2.63** %
U.S.		**80,913**	**2.92**
Non-U.S.		**12,147**	**1.58**
Percentage of total assets and liabilities attributable to non-U.S. operations:			
Assets			**24.3**
Liabilities			**20.5**

(a) The rates reflect the impact of interest earned on cash collateral where that cash collateral has been netted against certain derivative payables.
(b) Represents the amount of noninterest-bearing liabilities funding interest-earning assets.

Refer to the "Net interest income" discussion in Consolidated Results of Operations on pages 59–62 for further information.

Changes in net interest income, volume and rate analysis

The table below presents an attribution of net interest income between volume and rate. The attribution between volume and rate is calculated using annual average balances for each category of assets and liabilities shown in the table and the corresponding annual rates (refer to pages 322-325 for more information on average balances and rates). In this analysis, when the change cannot be isolated to either volume or rate, it has been allocated to volume. The annual rates include the impact of changes in market rates, as well as the impact of any change in composition of the various products within each category of asset or liability. This analysis is calculated separately for each category without consideration of the relationship between categories (for example, the net spread between the rates earned on assets and the rates paid on liabilities that fund those assets). As a result, changes in the granularity or groupings considered in this analysis would produce a different attribution result, and due to the complexities involved, precise allocation of changes in interest rates between volume and rates is inherently complex and judgmental.

Glossary of Terms and Acronyms

2023 Form 10-K: Annual report on Form 10-K for the year ended December 31, 2023, filed with the U.S. Securities and Exchange Commission.

ABS: Asset-backed securities

Active foreclosures: Loans referred to foreclosure where formal foreclosure proceedings are ongoing. Includes both judicial and non-judicial states.

AFS: Available-for-sale

ALCO: Asset Liability Committee

Alternative assets "Alternatives": The following types of assets constitute alternative investments - hedge funds, currency, real estate, private equity and other investment funds designed to focus on nontraditional strategies

Amortized cost: Amount at which a financing receivable or investment is originated or acquired, adjusted for accretion or amortization of premium, discount, and net deferred fees or costs, collection of cash, charge-offs, foreign exchange, and fair value hedge accounting adjustments. For AFS securities, amortized cost is also reduced by any impairment losses recognized in earnings. Amortized cost is not reduced by the allowance for credit losses, except where explicitly presented net.

AOCI: Accumulated other comprehensive income/(loss)

ARM: Adjustable rate mortgage(s)

AUC: "Assets under custody": Represents assets held directly or indirectly on behalf of clients under safekeeping, custody and servicing arrangements.

AUM: "Assets under management": Represent assets managed by AWM on behalf of its Private Banking, Institutional and Retail clients. Includes "Committed capital not Called."

Auto loan and lease origination volume: Dollar amount of auto loans and leases originated.

AWM: Asset & Wealth Management

Beneficial interests issued by consolidated VIEs: Represents the interest of third-party holders of debt, equity securities, or other obligations, issued by VIEs that JPMorganChase consolidates.

Benefit obligation: Refers to the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for OPEB plans.

BHC: Bank holding company

BWM: Banking & Wealth Management

Bridge Financing Portfolio: A portfolio of held-for-sale unfunded loan commitments and funded loans. The unfunded commitments include both short-term bridge loan commitments that will ultimately be replaced by longer term financing as well as term loan commitments. The funded loans include term loans and funded revolver facilities.

CB: Commercial Banking

CCAR: Comprehensive Capital Analysis and Review

CCB: Consumer & Community Banking

CCB Consumer customer: A unique individual that has financial ownership or decision-making power with respect to accounts; excludes customers under the age of 18. Where a customer uses the same identifier as both a Consumer and a Small business, the customer is included in both metrics.

CCB Small business customer: A unique business or legal entity that has financial ownership or decision-making power with respect to accounts. Where a customer uses the same identifier as both a Consumer and a Small business, the customer is included in both metrics.

CCO: Chief Compliance Officer

CCP: "Central counterparty" is a clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the future performance of open contracts. A CCP becomes a counterparty to trades with market participants through novation, an open offer system, or another legally binding arrangement.

CDS: Credit default swaps

CECL: Current Expected Credit Losses

CEO: Chief Executive Officer

CET1 Capital: Common equity Tier 1 capital

CFO: Chief Financial Officer

CFP: Contingency funding plan

CFTC: Commodity Futures Trading Commission

CIB: Commercial & Investment Bank

CIO: Chief Investment Office

Client assets: Represent assets under management as well as custody, brokerage, administration and deposit accounts.

Client deposits and other third-party liabilities: Deposits, as well as deposits that are swept to on-balance sheet liabilities (e.g., commercial paper, federal funds purchased and securities loaned or sold under repurchase agreements) as part of client cash management programs.

Client investment assets: Represent assets under management as well as custody, brokerage and annuity accounts, and deposits held in investment accounts.

CLO: Collateralized loan obligations

CLTV: Combined loan-to-value

CMT: Constant Maturity Treasury

Collateral-dependent: A loan is considered to be collateral-dependent when repayment of the loan is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulty, including when foreclosure is deemed probable based on borrower delinquency.

Commercial Card: provides a wide range of payment services to corporate and public sector clients worldwide through the commercial card products. Services include procurement, corporate travel and entertainment, expense management services, and business-to-business payment solutions.

Credit derivatives: Financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Upon the occurrence of a credit event by the reference entity, which may include, among other events, the bankruptcy or failure to pay its obligations, or certain restructurings of the debt of the reference entity, neither party has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value at the time of settling the credit derivative contract. The determination as to whether a credit event has occurred is generally made by the relevant International Swaps and Derivatives Association ("ISDA") Determinations Committee.

Criticized: Criticized loans, lending-related commitments and derivative receivables that are classified as special mention, substandard and doubtful categories for regulatory purposes and are generally consistent with a rating of CCC+/Caa1 and below, as defined by S&P and Moody's.

CRO: Chief Risk Officer

CRR: Capital Requirements Regulation

CTC: CIO, Treasury and Corporate

Custom lending: Loans to AWM's Global Private Bank clients, including loans to private investment funds and loans that are collateralized by nontraditional asset types, such as art work, aircraft, etc.

CVA: Credit valuation adjustment

Debit and credit card sales volume: Dollar amount of card member purchases, net of returns.

Deposit margin: Represents net interest income expressed as a percentage of average deposits.

Distributed denial-of-service attack: The use of a large number of remote computer systems to electronically send a high volume of traffic to a target website to create a service outage at the target. This is a form of cyberattack.

Dodd-Frank Act: Wall Street Reform and Consumer Protection Act

DVA: Debit valuation adjustment

EC: European Commission

Eligible HQLA: Eligible high-quality liquid assets, for purposes of calculating the LCR, is the amount of unencumbered HQLA that satisfy certain operational considerations as defined in the LCR rule.

Eligible LTD: Long-term debt satisfying certain eligibility criteria

Embedded derivatives: are implicit or explicit terms or features of a financial instrument that affect some or all of the cash flows or the value of the instrument in a manner similar to a derivative. An instrument containing such terms or features is referred to as a "hybrid." The component of the hybrid that is the non-derivative instrument is referred to as the "host." For example, callable debt is a hybrid instrument that contains a plain vanilla debt instrument (i.e., the host) and an embedded option that allows the issuer to redeem the debt issue at a specified date for a specified amount (i.e., the embedded derivative). However, a floating rate instrument is not a hybrid composed of a fixed-rate instrument and an interest rate swap.

EPS: Earnings per share

ERISA: Employee Retirement Income Security Act of 1974

ETD: "Exchange-traded derivatives": Derivative contracts that are executed on an exchange and settled via a central clearing house.

EU: European Union

Expense categories:

- Volume- and/or revenue-related expenses generally correlate with changes in the related business/ transaction volume or revenue. Examples include commissions and incentive compensation within the LOBs, depreciation expense related to operating lease assets, and brokerage expense related to trading transaction volume.
- Investments in the business include expenses associated with supporting medium- to longer-term strategic plans of the Firm. Examples include front office growth, market expansion, initiatives in technology (including related compensation), marketing, and acquisitions.
- Structural expenses are those associated with the day-to-day cost of running the Firm and are expenses not included in the above two categories. Examples include employee salaries and benefits, certain other incentive compensation, and costs related to real estate.

Fannie Mae: Federal National Mortgage Association

FASB: Financial Accounting Standards Board

FCA: Financial Conduct Authority

FCC: Firmwide Control Committee

FDIC: Federal Deposit Insurance Corporation

FDM: "Financial difficulty modification" applies to loan modifications effective January 1, 2023, and is deemed to occur when the Firm modifies specific terms of the original loan agreement. The following types of modifications are considered FDMs: principal forgiveness, interest rate reduction, other-than-insignificant payment delay, term extension or a combination of these modifications.

Federal Reserve: The Board of the Governors of the Federal Reserve System

FFIEC: Federal Financial Institutions Examination Council

FHA: Federal Housing Administration

FHLB: Federal Home Loan Bank

FICC: The Fixed Income Clearing Corporation

FICO score: A measure of consumer credit risk provided by credit bureaus, typically produced from statistical models by Fair Isaac Corporation utilizing data collected by the credit bureaus.

FINRA: Financial Industry Regulatory Authority

Firm: JPMorgan Chase & Co.

Forward points: Represents the interest rate differential between two currencies, which is either added to or subtracted from the current exchange rate (i.e., "spot rate") to determine the forward exchange rate.

FRC: Firmwide Risk Committee

Freddie Mac: Federal Home Loan Mortgage Corporation

Free standing derivatives: a derivative contract entered into either separate and apart from any of the Firm's other financial instruments or equity transactions. Or, in conjunction with some other transaction and is legally detachable and separately exercisable.

FSB: Financial Stability Board

FTE: Fully taxable equivalent

FVA: Funding valuation adjustment

FX: Foreign exchange

G7: Group of Seven nations: Countries in the G7 are Canada, France, Germany, Italy, Japan, the U.K. and the U.S.

G7 government securities: Securities issued by the government of one of the G7 nations.

Ginnie Mae: Government National Mortgage Association

GSIB: Global systemically important banks

HELOC: Home equity line of credit

Home equity – senior lien: Represents loans and commitments where JPMorganChase holds the first security interest on the property.

Home equity – junior lien: Represents loans and commitments where JPMorganChase holds a security interest that is subordinate in rank to other liens.

HQLA: "High-quality liquid assets" consist of cash and certain high-quality liquid securities as defined in the LCR rule.

HTM: Held-to-maturity

IBOR: Interbank Offered Rate

ICAAP: Internal capital adequacy assessment process

IDI: Insured depository institutions

IHC: JPMorgan Chase Holdings LLC, an intermediate holding company

Indirect tax expense: Refers to taxes that are imposed on goods and services rather than on income. Examples of indirect taxes include value-added tax ("VAT") and sales tax, among others.

Investment-grade: An indication of credit quality based on JPMorganChase's internal risk assessment. The Firm considers ratings of BBB-/Baa3 or higher as investment-grade.

IPO: Initial public offering

ISDA: International Swaps and Derivatives Association

JPMorganChase: JPMorgan Chase & Co.

JPMorgan Chase Bank, N.A.: JPMorgan Chase Bank, National Association

JPMorgan Chase Foundation or the Firm's Foundation: A not-for-profit organization that makes contributions for charitable and educational purposes.

J.P. Morgan Securities: J.P. Morgan Securities LLC

JPMSE: J.P. Morgan SE

LCR: Liquidity coverage ratio

LDA: Loss Distribution Approach

LGD: Loss given default

LIBOR: London Interbank Offered Rate

LLC: Limited Liability Company

LOB: Line of business

LOB CROs: Line of Business and CTC Chief Risk Officers

LTIP: Long-term incentive plan

LTV: "Loan-to-value": For residential real estate loans, the relationship, expressed as a percentage, between the principal amount of a loan and the appraised value of the collateral (i.e., residential real estate) securing the loan.

Origination date LTV ratio
The LTV ratio at the origination date of the loan. Origination date LTV ratios are calculated based on the actual appraised values of collateral (i.e., loan-level data) at the origination date.

Current estimated LTV ratio
An estimate of the LTV as of a certain date. The current estimated LTV ratios are calculated using estimated collateral values derived from a nationally recognized

home price index measured at the metropolitan statistical area ("MSA") level. These MSA-level home price indices consist of actual data to the extent available and forecasted data where actual data is not available. As a result, the estimated collateral values used to calculate these ratios do not represent actual appraised loan-level collateral values; as such, the resulting LTV ratios are necessarily imprecise and should therefore be viewed as estimates.

Combined LTV ratio
The LTV ratio considering all available lien positions, as well as unused lines, related to the property. Combined LTV ratios are used for junior lien home equity products.

Macro businesses: the macro businesses include Rates, Currencies and Emerging Markets, Fixed Income Financing and Commodities in CIB's Fixed Income Markets.

Managed basis: A non-GAAP presentation of Firmwide financial results that includes reclassifications to present revenue on a fully taxable-equivalent basis. Management also uses this financial measure at the segment level, because it believes this provides information to enable investors to understand the underlying operational performance and trends of the particular business segment and facilitates a comparison of the business segment with the performance of competitors.

Markets: consists of CIB's Fixed Income Markets and Equity Markets businesses.

Master netting agreement: A single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due).

MBS: Mortgage-backed securities

MD&A: Management's discussion and analysis

Measurement alternative: Measures equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer.

Merchant Services: offers merchants payment processing capabilities, fraud and risk management, data and analytics, and other payments services. Through Merchant Services, merchants of all sizes can accept payments via credit and debit cards and payments in multiple currencies.

MEV: Macroeconomic variable

Moody's: Moody's Investor Services

Mortgage origination channels:

Retail – Borrowers who buy or refinance a home through direct contact with a mortgage banker employed by the Firm using a branch office, the Internet or by phone. Borrowers are frequently referred to a mortgage banker by a banker in a Chase branch, real estate brokers, home builders or other third parties.

Correspondent – Banks, thrifts, other mortgage banks and other financial institutions that sell closed loans to the Firm.

Mortgage product types:

Alt-A
Alt-A loans are generally higher in credit quality than subprime loans but have characteristics that would disqualify the borrower from a traditional prime loan. Alt-A lending characteristics may include one or more of the following: (i) limited documentation; (ii) a high CLTV ratio; (iii) loans secured by non-owner occupied properties; or (iv) a debt-to-income ratio above normal limits. A substantial proportion of the Firm's Alt-A loans are those where a borrower does not provide complete documentation of his or her assets or the amount or source of his or her income.

Option ARMs
The option ARM real estate loan product is an adjustable-rate mortgage loan that provides the borrower with the option each month to make a fully amortizing, interest-only or minimum payment. The minimum payment on an option ARM loan is based on the interest rate charged during the introductory period. This introductory rate is usually significantly below the fully indexed rate. The fully indexed rate is calculated using an index rate plus a margin. Once the introductory period ends, the contractual interest rate charged on the loan increases to the fully indexed rate and adjusts monthly to reflect movements in the index. The minimum payment is typically insufficient to cover interest accrued in the prior month, and any unpaid interest is deferred and added to the principal balance of the loan. Option ARM loans are subject to payment recast, which converts the loan to a variable-rate fully amortizing loan upon meeting specified loan balance and anniversary date triggers.

Prime
Prime mortgage loans are made to borrowers with good credit records who meet specific underwriting requirements, including prescriptive requirements related to income and overall debt levels. New prime mortgage borrowers provide full documentation and generally have reliable payment histories.

Subprime
Subprime loans are loans that, prior to mid-2008, were offered to certain customers with one or more high risk characteristics, including but not limited to: (i) unreliable or poor payment histories; (ii) a high LTV ratio of greater than 80% (without borrower-paid mortgage insurance); (iii) a high debt-to-income ratio; (iv) an occupancy type for the loan is other than the borrower's

primary residence; or (v) a history of delinquencies or late payments on the loan.

MREL: Minimum requirements for own funds and eligible liabilities

MSR: Mortgage servicing rights

Multi-asset: Any fund or account that allocates assets under management to more than one asset class.

NA: Data is not applicable or available for the period presented.

NAV: Net Asset Value

Net Capital Rule: Rule 15c3-1 under the Securities Exchange Act of 1934.

Net charge-off/(recovery) rate: Represents net charge-offs/(recoveries) (annualized) divided by average retained loans for the reporting period.

Net interchange income includes the following components:

- **Interchange income**: Fees earned by credit and debit card issuers on sales transactions.
- **Rewards costs**: The cost to the Firm for points earned by cardholders enrolled in credit card rewards programs generally tied to sales transactions.
- **Partner payments**: Payments to co-brand credit card partners based on the cost of loyalty program rewards earned by cardholders on credit card transactions.

Net mortgage servicing revenue: Includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSRs; the impact of risk management activities associated with MSRs; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies.

Net revenue rate: Represents Card Services net revenue (annualized) expressed as a percentage of average loans for the period.

Net yield on interest-earning assets: The average rate for interest-earning assets less the average rate paid for all sources of funds.

NFA: National Futures Association

NM: Not meaningful

NOL: Net operating loss

Nonaccrual loans: Loans for which interest income is not recognized on an accrual basis. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest have been in default for a period of 90 days or more unless the loan is both well-secured and in the process of collection. Collateral-dependent loans are typically maintained on nonaccrual status.

Nonperforming assets: Nonperforming assets include nonaccrual loans, nonperforming derivatives and certain assets acquired in loan satisfactions, predominantly real estate owned and other commercial and personal property.

NSFR: Net Stable Funding Ratio

OAS: Option-adjusted spread

OCC: Office of the Comptroller of the Currency

OCI: Other comprehensive income/(loss)

OPEB: Other postretirement employee benefit

Operating losses: Primarily refer to fraud losses associated with customer deposit accounts, credit and debit cards; exclude legal expense.

Over-the-counter (“OTC”) derivatives: Derivative contracts that are negotiated, executed and settled bilaterally between two derivative counterparties, where one or both counterparties is a derivatives dealer.

Over-the-counter cleared (“OTC-cleared”) derivatives: Derivative contracts that are negotiated and executed bilaterally, but subsequently settled via a central clearing house, such that each derivative counterparty is only exposed to the default of that clearing house.

Overhead ratio: Noninterest expense as a percentage of total net revenue.

Parent Company: JPMorgan Chase & Co.

Participating securities: Represents unvested share-based compensation awards containing nonforfeitable rights to dividends or dividend equivalents (collectively, “dividends”), which are included in the earnings per share calculation using the two-class method. JPMorganChase grants RSUs to certain employees under its share-based compensation programs, which entitle the recipients to receive nonforfeitable dividends during the vesting period on a basis equivalent to the dividends paid to holders of common stock. These unvested awards meet the definition of participating securities. Under the two-class method, all earnings (distributed and undistributed) are allocated to each class of common stock and participating securities, based on their respective rights to receive dividends.

PCAOB: Public Company Accounting Oversight Board

PCD: “Purchased credit deteriorated” assets represent acquired financial assets that as of the date of acquisition have experienced a more-than-insignificant deterioration in credit quality since origination, as determined by the Firm.

PD: Probability of default

Pillar 1: The Basel framework consists of a three “Pillar” approach. Pillar 1 establishes minimum capital requirements, defines eligible capital instruments, and prescribes rules for calculating RWA.

Pillar 3: The Basel framework consists of a three "Pillar" approach. Pillar 3 encourages market discipline through disclosure requirements which allow market participants to assess the risk and capital profiles of banks.

PRA: Prudential Regulation Authority

Preferred stock dividends: reflects dividends declared and deemed dividends upon redemption of preferred stock

Pre-provision profit/(loss): Represents total net revenue less noninterest expense. The Firm believes that this financial measure is useful in assessing the ability of a lending institution to generate income in excess of its provision for credit losses.

Pre-tax margin: Represents income before income tax expense divided by total net revenue, which is, in management's view, a comprehensive measure of pretax performance derived by measuring earnings after all costs are taken into consideration. It is one basis upon which management evaluates the performance of AWM against the performance of their respective competitors.

Principal transactions revenue: Principal transactions revenue is driven by many factors, including:

- the bid-offer spread, which is the difference between the price at which a market participant is willing and able to sell an instrument to the Firm and the price at which another market participant is willing and able to buy it from the Firm, and vice versa; and
- realized and unrealized gains and losses on financial instruments and commodities transactions, including those accounted for under the fair value option, primarily used in client-driven market-making activities.
  - Realized gains and losses result from the sale of instruments, closing out or termination of transactions, or interim cash payments.
  - Unrealized gains and losses result from changes in valuation.

In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities, including physical commodities inventories and financial instruments that reference commodities.

Principal transactions revenue also includes realized and unrealized gains and losses related to:

- derivatives designated in qualifying hedge accounting relationships, primarily fair value hedges of commodity and foreign exchange risk;
- derivatives used for specific risk management purposes, primarily to mitigate credit, foreign exchange and interest rate risks.

Production revenue: Includes fees and income recognized as earned on mortgage loans originated with the intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option.

PSU(s): Performance share units

Regulatory VaR: Daily aggregated VaR calculated in accordance with regulatory rules.

REO: Real estate owned

Reported basis: Financial statements prepared under U.S. GAAP, which excludes the impact of taxable-equivalent adjustments.

Retained loans: Loans that are held-for-investment (i.e., excludes loans held-for-sale and loans at fair value).

Revenue wallet: Proportion of fee revenue based on estimates of investment banking fees generated across the industry (i.e., the revenue wallet) from investment banking transactions in M&A, equity and debt underwriting, and loan syndications. Source: Dealogic, a third-party provider of investment banking competitive analysis and volume-based league tables for the above noted industry products.

RHS: Rural Housing Service of the U.S. Department of Agriculture

ROA: Return on assets

ROE: Return on equity

ROTCE: Return on tangible common equity

ROU assets: Right-of-use assets

RSU(s): Restricted stock units

RWA "Risk-weighted assets": Basel III establishes two comprehensive approaches for calculating RWA (a Standardized approach and an Advanced approach) which include capital requirements for credit risk, market risk, and in the case of Basel III Advanced, also operational risk. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced.

S&P: Standard and Poor's

SAR as it pertains to Hong Kong: Special Administrative Region

SAR(s) as it pertains to employee stock awards: Stock appreciation rights

SCB: Stress capital buffer

Scored portfolios: Consumer loan portfolios that predominantly include residential real estate loans, credit card loans, auto loans to individuals and certain small business loans.

SEC: U.S. Securities and Exchange Commission

Securities financing agreements: Include resale, repurchase, securities borrowed and securities loaned agreements

Securitized Products Group: Comprised of Securitized Products and tax-oriented investments.

Seed capital: Initial JPMorgan capital invested in products, such as mutual funds, with the intention of ensuring the fund is of sufficient size to represent a viable offering to clients, enabling pricing of its shares, and allowing the manager to develop a track record. After these goals are achieved, the intent is to remove the Firm's capital from the investment.

Shelf securities: Securities registered with the SEC under a shelf registration statement that have not been issued, offered or sold. These securities are not included in league tables until they have actually been issued.

Single-name: Single reference-entities

SLR: Supplementary leverage ratio

SMBS: Stripped mortgage-backed securities

SOFR: Secured Overnight Financing Rate

SPEs: Special purpose entities

Structural interest rate risk: Represents interest rate risk of the non-trading assets and liabilities of the Firm.

Structured notes: Structured notes are financial instruments whose cash flows are linked to the movement in one or more indexes, interest rates, foreign exchange rates, commodities prices, prepayment rates, underlying reference pool of loans or other market variables. The notes typically contain embedded (but not separable or detachable) derivatives. Contractual cash flows for principal, interest, or both can vary in amount and timing throughout the life of the note based on non-traditional indexes or non-traditional uses of traditional interest rates or indexes.

Suspended foreclosures: Loans referred to foreclosure where formal foreclosure proceedings have started but are currently on hold, which could be due to bankruptcy or loss mitigation. Includes both judicial and non-judicial states.

Taxable-equivalent basis: In presenting results on a managed basis, the total net revenue for each of the reportable business segments and Corporate, and the Firm as a whole, is presented on a tax-equivalent basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in managed basis results on a level comparable to taxable investments and securities; the corresponding income tax impact related to tax-exempt items is recorded within income tax expense.

TBVPS: Tangible book value per share

TCE: Tangible common equity

TDR: "Troubled debt restructuring" applies to loan modifications granted prior to January 1, 2023 and is deemed to occur when the Firm modifies the original terms of a loan agreement by granting a concession to a borrower that is experiencing financial difficulty. Loans with short-term and other insignificant modifications that are not considered concessions are not TDRs.

TLAC: Total Loss Absorbing Capacity

U.K.: United Kingdom

Unaudited: Financial statements and/or information that have not been subject to auditing procedures by an independent registered public accounting firm.

U.S.: United States of America

U.S. GAAP: Accounting principles generally accepted in the U.S.

U.S. government agencies: U.S. government agencies include, but are not limited to, agencies such as Ginnie Mae and FHA, and do not include Fannie Mae and Freddie Mac which are U.S. government-sponsored enterprises ("U.S. GSEs"). In general, obligations of U.S. government agencies are fully and explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government in the event of a default.

U.S. GSE(s): "U.S. government-sponsored enterprises" are quasi-governmental, privately-held entities established or chartered by the U.S. government to serve public purposes as specified by the U.S. Congress to improve the flow of credit to specific sectors of the economy and provide certain essential services to the public. U.S. GSEs include Fannie Mae and Freddie Mac, but do not include Ginnie Mae or FHA. U.S. GSE obligations are not explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government.

U.S. Treasury: U.S. Department of the Treasury

VA: U.S. Department of Veterans Affairs

VaR: "Value-at-risk" is a measure of the dollar amount of potential loss from adverse market moves in an ordinary market environment.

VCG: Valuation Control Group

VGF: Valuation Governance Forum

VIEs: Variable interest entities

Warehouse loans: Consist of prime mortgages originated with the intent to sell that are accounted for at fair value and classified as loans.

Exhibit 4.6

DESCRIPTION OF SECURITIES OF JPMORGAN CHASE & CO. REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934

As of the filing date of the Annual Report on Form 10-K to which this Exhibit is attached (the “Form 10-K”), the following outstanding securities issued by JPMorgan Chase & Co. are registered pursuant to Section 12 of the Securities Exchange Act of 1934: (i) common stock; (ii) six series of preferred stock represented by depositary shares; (iii) JPMorgan Chase & Co.’s guarantee of the Alerian MLP Index ETNs due January 28, 2044 issued by JPMorgan Chase Financial Company LLC; and (iv) JPMorgan Chase & Co.’s guarantee of the Callable Fixed Rate Notes due June 10, 2032 issued by JPMorgan Chase Financial Company LLC. All references herein to “JPMorganChase,” “we” or “us” are to JPMorgan Chase & Co.

DESCRIPTION OF COMMON STOCK

The following summary is not complete. You should refer to the applicable provisions of our Restated Certificate of Incorporation and our By-laws, each of which are incorporated by reference as Exhibits to the Form 10-K, and to the Delaware General Corporation Law (“DGCL”), for a complete statement of the terms and rights of our common stock, par value $1.00 per share, which we refer to herein as common stock. We encourage you to read our Restated Certificate of Incorporation, which we refer to herein as our certificate of incorporation, By-laws and the relevant provisions of the DGCL for additional information.

Authorized Shares

We are authorized to issue up to 9,000,000,000 shares of common stock.

Dividends

Holders of common stock are entitled to receive dividends if, as and when declared by our board of directors out of funds legally available for payment, subject to the rights of holders of our preferred stock.

Voting Rights

Each holder of common stock is entitled to one vote per share. Subject to the rights, if any, of the holders of any series of preferred stock under its applicable certificate of designations and applicable law, all voting rights are vested in the holders of shares of our common stock. Holders of shares of our common stock have noncumulative voting rights, which means that the holders of more than 50% of the shares voting for the election of directors can elect 100% of the directors and the holders of the remaining shares will not be able to elect any directors.

Rights Upon Liquidation

In the event of our voluntary or involuntary liquidation, dissolution or winding-up, the holders of our common stock will be entitled to share equally in any of our assets available for distribution after we have paid in full all of our debts and after the holders of all series of our outstanding preferred stock have received their liquidation preferences in full.

Miscellaneous

The issued and outstanding shares of common stock are fully paid and nonassessable. Holders of shares of our common stock are not entitled to preemptive rights or to the benefit of any sinking funds. Our common stock is not convertible into shares of any other class of our capital stock. Computershare Inc. is the transfer agent, registrar and dividend disbursement agent for our common stock.

Listing

Our common stock is listed on the New York Stock Exchange (“NYSE”) under the trading symbol “JPM”.

DESCRIPTION OF LISTED PREFERRED STOCK

The following summary is not complete. You should refer to our certificate of incorporation and to the Certificate of Designations, Powers, Preferences and Rights relating to each series of Listed Preferred Stock (as defined below), which we refer to herein as a certificate of designations, for the complete terms of that series of preferred stock. Copies of our certificate of incorporation and the certificate of designations for each series of Listed Preferred Stock are incorporated by reference as Exhibits to the Form 10-K. We encourage you to read our certificate of incorporation and the relevant certificates of designations for additional information.

Authorized Shares

Under our certificate of incorporation, our board of directors is authorized, without further stockholder action, to issue up to 200,000,000 shares of preferred stock, $1 par value per share, which we refer herein to as preferred stock, in one or more series, and to determine the voting powers and the designations, preferences and relative, participating, optional or other special rights, and qualifications, limitations or restrictions of each series. We may amend our certificate of incorporation to increase or decrease the number of authorized shares of preferred stock in a manner permitted by our certificate of incorporation and the DGCL.

Outstanding Preferred Stock

As of the filing date of the Form 10-K, we have 11 series of preferred stock issued and outstanding. The shares of each series of our preferred stock are represented by depositary shares, with each depositary share representing a fractional interest in a share of preferred stock of the relevant series. Of the 11 series of our issued and outstanding preferred stock, depositary shares representing the following six series of preferred stock are registered pursuant to Section 12 of the Securities Exchange Act of 1934, with each depositary share representing a 1/400th interest in a share of preferred stock of the relevant series:

a. 5.75% Non-Cumulative Preferred Stock, Series DD;
b. 6.00% Non-Cumulative Preferred Stock, Series EE;
c. 4.75 Non-Cumulative Preferred Stock, Series GG;
d. 4.55% Non-Cumulative Preferred Stock, Series JJ;
e. 4.625% Non-Cumulative Preferred Stock, Series LL; and
f. 4.20% Non-Cumulative Preferred Stock, Series MM.

We refer to the above six series of preferred stock herein collectively as the "Listed Preferred Stock".

The Listed Preferred Stock is fully paid and nonassessable.

The terms of the depositary shares are summarized below under "Description of Depositary Shares".

Ranking

The Listed Preferred Stock ranks, as to payment of dividends and distribution of assets upon our liquidation, dissolution or winding-up, on a parity with any series of preferred stock ranking on a parity with the Listed Preferred Stock and senior to our common stock and to any series of preferred stock ranking junior to the Listed Preferred Stock. The Listed Preferred Stock is subordinate to our existing and future indebtedness.

Dividend Rights

Holders of the Listed Preferred Stock are entitled to receive, when, as and if declared by our board of directors or any duly authorized committee of our board, cash dividends at the rates and on the dates described below under "Specific Terms of Listed Preferred Stock". We will pay each dividend to the holders of record as they appear on our stock register on record dates determined by our board of directors or a duly authorized committee of our board. Dividends on the Listed Preferred Stock are noncumulative. If a dividend is not declared on any series of Listed Preferred Stock, because the dividends are noncumulative, then the right of holders of that series to receive that dividend will be lost, and we will have no obligation to pay the dividend for that dividend period, whether or not dividends are declared for any future dividend period.

We may not declare or pay or set aside for payment full dividends on any series of preferred stock ranking, as to dividends, equally with or junior to a series of Listed Preferred Stock unless we have previously declared and paid or set aside for payment, or we contemporaneously declare and pay or set aside for payment, full dividends on that series of Listed Preferred Stock for the most recently completed dividend period. When dividends are not paid in full on a particular series of Listed Preferred Stock and any other series of preferred stock ranking on a parity as to dividends with that series, all dividends declared and paid upon the shares of that series of Listed Preferred Stock and any other series of preferred stock ranking on a parity as to dividends with the that series will be declared and paid pro rata. For purposes of calculating the pro rata allocation of partial dividend payments, we will allocate dividend payments based on the ratio between the then-current dividends due on shares of that Listed Preferred Stock and (i) in the case of any series of non-cumulative preferred stock ranking on a parity as to dividends with that Listed Preferred Stock, the aggregate of the current and unpaid dividends due on such series of preferred stock and (ii) in the case of any series of cumulative preferred stock ranking on a parity as to dividends with that Listed Preferred Stock, the aggregate of the current and accumulated and unpaid dividends due on such series of preferred stock.

In addition, unless full dividends on all outstanding shares of the Listed Preferred Stock have been declared and paid or a sum sufficient for the payment thereof set aside for such payment in respect of the applicable most recently completed dividend period, with respect to a particular series of Listed Preferred Stock:

a. no dividend (other than a dividend in common stock or in any other capital stock ranking junior to that Listed Preferred Stock as to dividends and upon liquidation, dissolution or winding-up) will be declared or paid or a sum sufficient for the payment thereof set aside for such payment or other distribution declared or made upon our common stock or upon any other capital stock ranking junior to that Listed Preferred Stock as to dividends or upon liquidation, dissolution or winding-up, and
b. no common stock or other capital stock ranking junior or equally with that Listed Preferred Stock as to dividends or upon liquidation, dissolution or winding-up will be redeemed, purchased or otherwise acquired for any consideration (or any moneys be paid to or made available for a sinking fund for the redemption of any shares of any such capital stock) by us, except:

    i. by conversion into or exchange for capital stock ranking junior to that Listed Preferred Stock;
    ii. as a result of reclassification into capital stock ranking junior to that Listed Preferred Stock;
    iii. through the use of the proceeds of a substantially contemporaneous sale of shares of capital stock ranking junior to that Listed Preferred Stock or, in the case of capital stock ranking on a parity with that Listed Preferred Stock, through the use of the proceeds of a substantially contemporaneous sale of other shares of capital stock ranking on a parity with that Listed Preferred Stock;
    iv. in the case of capital stock ranking on a parity with that Listed Preferred Stock, pursuant to pro rata offers to purchase all or a pro rata portion of the shares of that Listed Preferred Stock and such capital stock ranking on a parity with that Listed Preferred Stock;
    v. in connection with the satisfaction of our obligations pursuant to any contract entered into in the ordinary course prior to the beginning of the most recently completed dividend period; or
    vi. any purchase, redemption or other acquisition of capital stock ranking junior to that Listed Preferred Stock pursuant to any of our or our subsidiaries' employee, consultant or director incentive or benefit plans or arrangements (including any employment, severance or consulting arrangements) adopted before or after the issuance of that Listed Preferred Stock).

However, the foregoing will not restrict our ability or the ability of any of our affiliates to engage in underwriting, stabilization, market-making or similar transactions in our capital stock in the ordinary course of business. Subject to the conditions described above, and not otherwise, dividends (payable in cash, capital stock, or otherwise), as may be determined by our board of directors or a duly authorized committee of our board, may be declared and paid on our common stock and any other capital stock ranking junior to or on a parity with the Listed Preferred Stock from time to time out of any assets legally available for such payment, and the holders of the Listed Preferred Stock will not be entitled to participate in those dividends.

As used herein, "junior to a series of Listed Preferred Stock" and like terms refer to our common stock and any other class or series of our capital stock over which the Listed Preferred Stock has preference or priority, either as to dividends or upon liquidation, dissolution or winding-up, or both, as the context may require; "parity preferred stock" and "on a parity with a series of Listed Preferred Stock" and like terms refer to any class or series of our capital stock that ranks on a parity with the shares of a particular series of Listed Preferred Stock, either as to dividends or upon liquidation, dissolution or winding-up, or both, as the context may require; and "senior to a series of Listed Preferred Stock" and like terms refer to any class or series of our capital stock that ranks senior to a particular series of Listed Preferred Stock, either as to dividends or upon liquidation, dissolution or winding-up, or both, as the context may require.

We will compute the amount of dividends payable by annualizing the applicable dividend rate and dividing by the number of dividend periods in a year, except that the amount of dividends payable for any period greater or less than a full dividend period, other than the initial dividend period, will be computed on the basis of a 360-day year consisting of twelve 30-day months and, for any period less than a full month, the actual number of days elapsed in the period. Dollar amounts resulting from that calculation will be rounded to the nearest cent, with one-half cent being rounded upward.

Rights Upon Liquidation

In the event of our voluntary or involuntary liquidation, dissolution or winding-up, holders of each series of Listed Preferred Stock will be entitled to receive and to be paid out of our assets legally available for distribution to our stockholders the amount of $10,000 per share, plus any declared and unpaid dividends, without accumulation of undeclared dividends, before we make any distribution of assets to the holders of our common stock or any other class or series of shares ranking junior to the Listed Preferred Stock of such series. After the payment to such holders of the full preferential amounts to which they are entitled, such holders will have no right or claim to any of our remaining assets.

If, upon our voluntary or involuntary liquidation, dissolution or winding-up, we fail to pay in full the amounts payable with respect to a particular series of Listed Preferred Stock, and any stock having the same rank as that series, the holders of that series and of that other stock will share ratably in any such distribution of our assets in proportion to the full respective distributions to which they are entitled. For any series of Listed Preferred Stock, neither the sale of all or substantially all of our property or business, nor our merger or consolidation into or with any other entity will be considered a liquidation, dissolution or winding-up, voluntary of or involuntary, of us.

Because we are a holding company, our rights and the rights of our creditors and our stockholders, including the holders of the Listed Preferred Stock, to participate in the assets of any of our subsidiaries upon that subsidiary's liquidation, dissolution, winding-up or recapitalization may be subject to the prior claims of that subsidiary's creditors, except to the extent that we are a creditor with recognized claims against the subsidiary.

Holders of the Listed Preferred Stock are subordinate to all of our indebtedness and to other non-equity claims on us and our assets, including in the event that we enter into a receivership, insolvency, liquidation or similar proceeding. In addition, holders of the Listed Preferred Stock may be fully subordinated to interests held by the U.S. government in the event that we enter into a receivership, insolvency, liquidation or similar proceeding.

Redemption

We may redeem each series of Listed Preferred Stock on the dates and at the redemption prices set forth below under "Specific Terms of Listed Preferred Stock". In addition, we may redeem each series of Listed Preferred Stock in whole, but not in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends, following the occurrence of a capital treatment event. For these purposes, "capital treatment event" means the good faith determination by JPMorganChase that, as a result of any:

a. amendment to, or change or any announced prospective change in, the laws or regulations of the United States or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of any shares of such series of Listed Preferred Stock;
b. proposed change in those laws or regulations that is announced or becomes effective after the initial issuance of any shares of such series of Listed Preferred Stock; or
c. official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws or regulations that is announced or becomes effective after the initial issuance of any shares of such series of Listed Preferred Stock,

there is more than an insubstantial risk that JPMorganChase will not be entitled to treat an amount equal to the full liquidation amount of all shares of such series of Listed Preferred Stock then outstanding as "additional Tier 1 capital" (or its equivalent) for purposes of the capital adequacy guidelines or regulations of the appropriate federal banking agency, as then in effect and applicable, for as long as any share of such series of Listed Preferred Stock is outstanding. Redemption of any Listed Preferred Stock may be subject to our receipt of any required approvals from the Federal Reserve Board or any other regulatory authority.

If we elect to redeem shares of a series of Listed Preferred Stock, we will provide notice by first class mail, postage prepaid, addressed to the holders of record of such shares to be redeemed. Such mailing will be at least 30 days and not more than 60 days before the date fixed for redemption. Any notice so mailed will be conclusively presumed to have been duly given, whether or not the holder receives such notice, but failure to duly give such notice by mail, or any defect in such notice or in the mailing thereof, to any holder of shares of the series designated for redemption will not affect the validity of the proceedings for the redemption of any other shares of that series. Each notice of redemption will state:

a. the redemption date;
b. the number of shares of the series of Listed Preferred Stock to be redeemed and, if fewer than all the shares held by such holder are to be redeemed, the number of such shares to be redeemed from such holder;
c. the redemption price;
d. the place or places where the certificates representing such shares are to be surrendered for payment of the redemption price; and
e. that dividends on the shares to be redeemed will cease to accrue on the redemption date.

Notwithstanding the foregoing, if the series of Listed Preferred Stock is held in book-entry form through The Depository Trust Company, or "DTC", we may give such notice in any manner permitted or required by DTC. For each series of Listed Preferred Stock, neither the holders of a series nor the holders of the related depositary shares have the right to require redemption of such series of Listed Preferred Stock.

In the case of any redemption of only part of the shares a series of Listed Preferred Stock at the time outstanding, the shares of the series to be redeemed will be selected either pro rata from the holders of record of that series in proportion to the number of shares held by such holders or by lot. From and after the redemption date, dividends will cease to accumulate on the shares of Listed Preferred Stock called for redemption up to the redemption date and all rights of the holders of those shares, except the right to receive the redemption price, will cease.

In the event that we fail to pay full dividends, including accumulated but unpaid dividends, if any, on any series of Listed Preferred Stock, we may not redeem that series in part and we may not purchase or acquire any shares of that series, except by a purchase or exchange offer made on the same terms to all holders of that series.

Preemptive and Conversion Rights

The Listed Preferred Stock is not subject to any preemptive rights and is not convertible into property or shares of any other class or series of our capital stock.

Depositary, Transfer Agent, and Registrar

Computershare Inc. is the depositary, transfer agent and registrar for each series of the Listed Preferred Stock and the related depositary shares.

Voting Rights

Except as indicated below or except as expressly required by applicable law, the holders of the Listed Preferred Stock are not entitled to vote. Each share of Listed Preferred Stock a series is entitled to one vote on matters on which holders of that series are entitled to vote. The voting power of each series of Listed Preferred Stock depends on the number of shares in that series, and not on the aggregate liquidation preference or initial offering price of the shares of that series.

If, at any time or times, the equivalent of an aggregate of six quarterly dividends, whether or not consecutive, for any series of Listed Preferred Stock has not been paid, the number of directors constituting our board of directors will be automatically increased by two and the holders of each outstanding series of Listed Preferred Stock with such voting rights, together with holders of such other shares of any other class or series of parity preferred stock outstanding at the time upon which like voting rights have been conferred and are exercisable, which we refer to as “voting parity stock,” voting together as a class, will be entitled to elect those additional two directors, which we refer to as “preferred directors,” at that annual meeting and at each subsequent annual meeting of stockholders until full dividends have been paid for at least four quarterly consecutive dividend periods. At that time such right will terminate, except as expressly provided in the applicable certificate of designations or by law, subject to revesting. Upon any termination of the right of the holders of the Listed Preferred Stock and voting parity stock as a class to vote for directors as provided above, the preferred directors will cease to be qualified as directors, the term of office of all preferred directors then in office will terminate immediately and the authorized number of directors will be reduced by the number of preferred directors elected. Any preferred director may be removed and replaced at any time, with cause as provided by law or without cause by the affirmative vote of the holders of shares of the Listed Preferred Stock, voting together as a class with the holders of shares of voting parity stock, to the extent the voting rights of such holders described above are then exercisable. Any vacancy created by removal with or without cause may be filled only as described in the preceding sentence. If the office of any preferred director becomes vacant for any reason other than removal, the remaining preferred director may choose a successor who will hold office for the unexpired term in respect of which such vacancy occurred.

So long as any shares of a particular series of Listed Preferred Stock remains outstanding, we will not, without the affirmative vote of the holders of at least 66 2/3% in voting power of that series and any voting parity stock, voting together as a class, authorize, create or issue any capital stock ranking senior to that series as to dividends or upon liquidation, dissolution or winding-up, or reclassify any authorized capital stock into any such shares of such capital stock or issue any obligation or security convertible into or evidencing the right to purchase any such shares of capital stock. So long as any shares of a particular series of Listed Preferred Stock remain outstanding, we will not, without the affirmative vote of the holders of at least 66 2/3% in voting power of that series, amend, alter or repeal any provision of the applicable certificate of designations or our certificate of incorporation, including by merger, consolidation or otherwise, so as to adversely affect the powers, preferences or special rights of that series.

Notwithstanding the foregoing, none of the following will be deemed to adversely affect the powers, preferences or special rights of any series of Listed Preferred Stock:

a. any increase in the amount of authorized common stock or authorized preferred stock, or any increase or decrease in the number of shares of any series of preferred stock, or the authorization, creation and issuance of other classes or series of capital stock, in each case ranking on a parity with or junior to that series of Listed Preferred Stock as to dividends or upon liquidation, dissolution or winding-up;
b. a merger or consolidation of JPMorganChase with or into another entity in which the shares of that series remain outstanding; and
c. a merger or consolidation of JPMorganChase with or into another entity in which the shares of the that series are converted into or exchanged for preference securities of the surviving entity or any entity, directly or indirectly,

controlling such surviving entity and such new preference securities have powers, preferences and special rights that are not materially less favorable than that series;

provided that if the amendment would adversely affect such series but not any other series of preferred stock outstanding, then the amendment will only need to be approved by holders of at least two-thirds of the shares of the series of Listed Preferred Stock adversely affected.

In exercising the voting rights described above or when otherwise granted voting rights by operation of law or by us, each share of Listed Preferred Stock with respect to a series will be entitled to one vote (equivalent to $1/400^{th}$ of a vote per relevant depositary share).

If we redeem or call for redemption all outstanding shares of a series of Listed Preferred Stock and irrevocably deposit in trust sufficient funds to effect such redemption, at or prior to the time when the act with respect to which such vote would otherwise be required or upon which the holders of such series will be entitled to vote will be effected, the voting provisions described above will not apply.

Our board of directors may also from time to time, without notice to or consent of holders of a series of Listed Preferred Stock, issue additional shares of such series. Delaware law provides that the holders of preferred stock will have the right to vote separately as a class on any amendment to our certificate of incorporation (including any certificate of designations) that would increase or decrease the aggregate number of authorized shares of such class, increase or decrease the par value of such class or adversely affect the powers, preferences and special rights of the shares of preferred stock. Notwithstanding the foregoing, as permitted by law, our certificate of incorporation provides that any increase or decrease in our authorized capital stock may be adopted by the affirmative vote of holders of capital stock representing not less than a majority of the voting power represented by the outstanding shares of our capital stock entitled to vote. If any proposed amendment would alter or change the powers, preferences or special rights of one or more series of preferred stock so as to affect them adversely, but would not so affect the entire class of preferred stock, only the shares of the series so affected will be considered a separate class for purposes of this vote on the amendment. This right is in addition to any voting rights that may be provided for in our certificate of incorporation (including any certificate of designations).

Under regulations adopted by the Federal Reserve Board, if the holders of any series of our preferred stock become entitled to vote for the election of directors because dividends on that series are in arrears, that series may then be deemed a “class of voting securities.” In such a case, a holder of 25% or more of the series, or a holder of 5% or more if that holder would also be considered to exercise a “controlling influence” over JPMorganChase, may then be subject to regulation as a bank holding company in accordance with the Bank Holding Company Act. In addition, (1) any other bank holding company may be required to obtain the prior approval of the Federal Reserve Board to acquire or retain 5% or more of that series, and (2) any person other than a bank holding company may be required to provide notice to the Federal Reserve Board prior to acquiring or retaining 10% or more of that series.

Description of Depositary Shares

The following summary of the terms of the depositary shares representing each series of the Listed Preferred Stock is not complete. You should refer to each of the deposit agreements among us, the depositary, and the holders from time to time of the depositary receipts evidencing the depositary shares relating to each series of the Listed Preferred Stock for the complete terms of those depositary shares. Each of those deposit agreements has been filed as an exhibit to a Current Report on Form 8-K filed in connection with the issuance of the depositary shares representing each series of the Listed Preferred Stock.

General. Each depositary share represents a $1/400^{th}$ interest in a share of the relevant series of Listed Preferred Stock, and is evidenced by depositary receipts. In connection with the issuance of each series of Listed Preferred Stock, we deposited shares of that series of Listed Preferred Stock with Computershare Inc., as depositary under the deposit agreement relating to that series of Listed Preferred Stock. Subject to the terms of each deposit agreement, the depositary shares are entitled to all the powers, preferences and special rights of the relevant series of Listed Preferred Stock, as applicable, in proportion to the applicable fraction of a share of Listed Preferred Stock those depositary shares represent.

Dividends and Other Distributions. Each dividend payable on a depositary share will be in an amount equal to $1/400^{th}$ of the dividend declared and payable on the related share of the Listed Preferred Stock.

The depositary will distribute all dividends and other cash distributions received on the relevant series of Listed Preferred Stock to the holders of record of the related depositary receipts in proportion to the number of depositary shares held by each holder. In the event of a distribution other than in cash, the depositary will distribute property received by it to the holders of record of the depositary receipts as nearly as practicable in proportion to the number of depositary shares held by each holder, unless the depositary determines that this distribution is not feasible, in which case the depositary may, with our approval, adopt a method of distribution that it deems practicable, including the sale of the property and distribution of the net proceeds of that sale to the holders of the depositary receipts.

Record dates for the payment of dividends and other matters relating to the depositary shares will be the same as the corresponding record dates for the related shares of Listed Preferred Stock.

The amount paid as dividends or otherwise distributable by the depositary with respect to the depositary shares or the underlying Listed Preferred Stock will be reduced by any amounts required to be withheld by us or the depositary on account of taxes or other governmental charges.

Redemption of Depositary Shares. If we redeem a series of Listed Preferred Stock, in whole or from time to time in part, the corresponding depositary shares also will be redeemed with the proceeds received by the depositary from the redemption of the Listed Preferred Stock held by the depositary. The redemption price per depositary share will be $1/400^{th}$ of the redemption price per share payable with respect to the Listed Preferred Stock, plus any declared and unpaid dividends, without accumulation of undeclared dividends.

If we redeem shares of a series of Listed Preferred Stock held by the depositary, the depositary will redeem, as of the same redemption date, the number of depositary shares representing those shares of the Listed Preferred Stock so redeemed. If we redeem less than all of the outstanding depositary shares, the depositary will select pro rata or by lot those depositary shares to be redeemed. The depositary will mail notice of redemption to record holders of the depositary receipts not less than 30 and not more than 60 days prior to the date fixed for redemption of the Listed Preferred Stock and the related depositary shares.

The redemption of depositary shares that are held in book-entry form through DTC will be effected in accordance with the applicable procedures of DTC.

Voting the Listed Preferred Stock. Because each depositary share represents a $1/400^{th}$ interest in a share of Listed Preferred Stock, holders of depositary receipts will be entitled to $1/400^{th}$ of a vote per depositary share under those limited circumstances in which holders of the Listed Preferred Stock are entitled to a vote.

When the depositary receives notice of any meeting at which the holders of a series of Listed Preferred Stock are entitled to vote, the depositary will mail the information contained in the notice to the record holders of the depositary shares relating to that Listed Preferred Stock. Each record holder of the depositary shares on the record date, which will be the same date as the record date for the applicable Listed Preferred Stock, may instruct the depositary to vote the amount of the Listed Preferred Stock represented by the holder’s depositary shares. To the extent practicable, the depositary will vote the amount of the Listed Preferred Stock represented by depositary shares in accordance with the instructions it receives. We will agree to take all actions that the depositary determines are necessary to enable the depositary to vote as instructed. If the depositary does not receive specific instructions from the holders of any depositary shares representing the Listed Preferred Stock, it will abstain from voting with respect to such shares.

Withdrawal of Listed Preferred Stock. Underlying shares of Listed Preferred Stock may be withdrawn from the depositary arrangement upon surrender of depositary receipts at the depositary’s office and upon payment of the taxes, charges and fees provided for in the deposit agreement. Subject to the terms of the relevant deposit agreement, the holder of depositary receipts will receive the appropriate number of shares of Listed Preferred Stock represented by such depositary shares. Only whole shares of Listed Preferred Stock may be withdrawn; if a holder holds an amount other than a whole multiple of 400 depositary shares, the depositary will deliver along with the withdrawn shares of Listed Preferred Stock a new depositary receipt evidencing the excess number of depositary shares. Holders of withdrawn shares of Listed Preferred Stock will not be entitled to redeposit such shares or to receive depositary shares.

Form and Notices. Each series of Listed Preferred Stock was issued in registered form to the depositary, and the depositary shares representing that Listed Preferred Stock were issued in book-entry only form through DTC. The depositary will forward to the holders of depositary shares all reports, notices, and communications from us that are delivered to the depositary and that we are required to furnish to the holders of the Listed Preferred Stock.

Amendment and Termination of the Deposit Agreement. We and the depositary may amend any form of depositary receipt evidencing depositary shares and any provision of any deposit agreement at any time regarding any depositary shares. However, any amendment that materially and adversely alters the rights of the holders of depositary shares representing a particular series of Listed Preferred Stock or would be materially and adversely inconsistent with the rights granted to holders of that underlying Listed Preferred Stock pursuant to our certificate of incorporation will not be effective unless the amendment has been approved by the holders of at least a majority of the related depositary shares then outstanding. The deposit agreement relating to the depositary shares representing a particular series of Listed Preferred Stock may be terminated by us or by the depositary only if:

a. all such outstanding depositary shares have been redeemed; or

b. there has been a final distribution of the relevant underlying Listed Preferred Stock in connection with our liquidation, dissolution or winding up and the preferred stock has been distributed to the holders of depositary receipts.

Charges of Depositary. We will pay all transfer and other taxes and governmental charges arising solely from the existence of the depositary arrangements regarding any depositary shares. We also pay charges of the depositary in connection with the initial deposit of each series of Listed Preferred Stock and any redemption of the Listed Preferred Stock. Holders of depositary receipts will pay transfer and other taxes and governmental charges and other charges with respect to their depositary receipts as expressly provided in the deposit agreement.

Resignation and Removal of Depositary. With respect to the depositary shares representing each series of Listed Preferred Stock, the depositary may resign at any time by delivering a notice to us of its election to do so. We may remove the depositary at any time. Any such resignation or removal will take effect upon the appointment of a successor depositary and its acceptance of its appointment. We must appoint a successor depositary within 60 days after delivery of the notice of resignation or removal.

Miscellaneous. The depositary will forward to holders of applicable depositary receipts all reports and communications from us that we deliver to the depositary and that we are required to furnish to the holders of the relevant Listed Preferred Stock.

Neither we nor the depositary will be liable if either of us is prevented or delayed by law or any circumstance beyond our control in performing our respective obligations under any deposit agreement. Our obligations and those of the depositary will be limited to performing in good faith our respective duties under any deposit agreement. Neither we nor the depositary will be obligated to prosecute or defend any legal proceeding relating to any depositary shares or Listed Preferred Stock unless satisfactory indemnity is furnished. We and the depositary may rely upon written advice of counsel or accountants, or upon information provided by persons presenting preferred stock for deposit, holders of depositary receipts or other persons we believe to be competent, and on documents we believe to be genuine.

Specific Terms of Listed Preferred Stock

5.75% Non-Cumulative Preferred Stock, Series DD

On September 21, 2018, we issued an aggregate of 169,625 shares of 5.75% Non-Cumulative Preferred Stock, Series DD, $1 par value, with a liquidation preference of $10,000 per share (the “Series DD Preferred Stock”). Shares of the Series DD Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series DD Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 5.75% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on December 1, 2018. Dividends on the Series DD Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series DD Preferred Stock may be redeemed on any dividend payment date on or after December 1, 2023, in whole or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series DD Preferred Stock following the occurrence of a “capital treatment event,” as described above.

Listing. The depositary shares representing the Series DD Preferred Stock are listed on the NYSE under the trading symbol “JPM PR D”.

6.00% Non-Cumulative Preferred Stock, Series EE

On January 24, 2019, we issued an aggregate of 185,000 shares of 6.00% Non-Cumulative Preferred Stock, Series EE, $1 par value, with a liquidation preference of $10,000 per share (the “Series EE Preferred Stock”). Shares of the Series EE Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series EE Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 6.00% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on June 1, 2019. Dividends on the Series EE Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series EE Preferred Stock may be redeemed on any dividend payment date on or after March 1, 2024, in whole or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series EE Preferred Stock following the occurrence of a “capital treatment event,” as described above.

Listing. The depositary shares representing the Series EE Preferred Stock are listed on the NYSE under the trading symbol "JPM PR C".

4.75% Non-Cumulative Preferred Stock, Series GG

On November 7, 2019, we issued an aggregate of 90,000 shares of 4.75% Non-Cumulative Preferred Stock, Series GG, $1 par value, with a liquidation preference of $10,000 per share (the "Series GG Preferred Stock"). Shares of the Series GG Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series GG Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 4.75% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on March 1, 2020. Dividends on the Series GG Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series GG Preferred Stock may be redeemed on any dividend payment date on or after December 1, 2024, in whole or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series GG Preferred Stock following the occurrence of a "capital treatment event," as described above.

Listing. The depositary shares representing the Series GG Preferred Stock are listed on the NYSE under the trading symbol "JPM PR J".

4.55% Non-Cumulative Preferred Stock, Series JJ

On March 17, 2021, we issued an aggregate of 150,000 shares of 4.55% Non-Cumulative Preferred Stock, Series JJ, $1 par value, with a liquidation preference of $10,000 per share (the "Series JJ Preferred Stock"). Shares of the Series JJ Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series JJ Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 4.55% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on June 1, 2021. Dividends on the Series JJ Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series JJ Preferred Stock may be redeemed on any dividend payment date on or after June 1, 2026, in whole at any time or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series JJ Preferred Stock following the occurrence of a "capital treatment event," as described above.

Listing. The depositary shares representing the Series JJ Preferred Stock are listed on the NYSE under the trading symbol "JPM PR K".

4.625% Non-Cumulative Preferred Stock, Series LL

On May 20, 2021, we issued an aggregate of 185,000 shares of 4.625% Non-Cumulative Preferred Stock, Series LL, $1 par value, with a liquidation preference of $10,000 per share (the "Series LL Preferred Stock"). Shares of the Series LL Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series LL Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 4.625% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on September 1, 2021. Dividends on the Series LL Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series LL Preferred Stock may be redeemed on any dividend payment date on or after June 1, 2026, in whole at any time or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series LL Preferred Stock following the occurrence of a "capital treatment event," as described above.

Listing. The depositary shares representing the Series LL Preferred Stock are listed on the NYSE under the trading symbol "JPM PR L".

4.20% Non-Cumulative Preferred Stock, Series MM

On July 29, 2021, we issued an aggregate of 200,000 shares of 4.20% Non-Cumulative Preferred Stock, Series MM, $1 par value, with a liquidation preference of $10,000 per share (the "Series MM Preferred Stock"). Shares of the Series MM

Preferred Stock are represented by depositary shares, each representing a 1/400th interest in a share of preferred stock of the series.

Dividends. Dividends on the Series MM Preferred Stock are payable when, as, and if declared by our board of directors or a duly authorized committee of our board, at a rate of 4.20% per annum, payable quarterly in arrears, on March 1, June 1, September 1 and December 1 of each year, beginning on December 1, 2021. Dividends on the Series MM Preferred Stock are neither mandatory nor cumulative.

Redemption. The Series MM Preferred Stock may be redeemed on any dividend payment date on or after September 1, 2026, in whole at any time or from time to time in part, at a redemption price equal to $10,000 per share (equivalent to $25 per depositary share), plus any declared and unpaid dividends. We may also redeem the Series MM Preferred Stock following the occurrence of a "capital treatment event," as described above.

Listing. The depositary shares representing the Series MM Preferred Stock are listed on the NYSE under the trading symbol "JPM PR M".

DESCRIPTION OF JPMORGAN CHASE FINANCIAL COMPANY LLC'S THE ALERIAN MLP INDEX ETNS DUE JANUARY 28, 2044, FULLY AND UNCONDITIONALLY GUARANTEED BY JPMORGAN CHASE & CO.

The following description of Alerian MLP Index ETNs due January 28, 2044 (the "Alerian ETNs") is a summary and does not purport to be complete. It is subject to and qualified in its entirety by reference to the indenture dated February, 2016 (as may be amended or supplemented from time to time, the "2016 Indenture"), among JPMorgan Chase Financial Company LLC, as issuer ("JPMorgan Financial" or the "Issuer"), JPMorganChase, as guarantor (the "Guarantor"), and Deutsche Bank Trust Company Americas, as trustee (the "Trustee"), which is incorporated by reference as an Exhibit to the Form 10-K. We encourage you to read the 2016 Indenture for additional information.

General

The Alerian ETNs were originally issued on January 30, 2024 and are part of a series of JPMorgan Financial's debt securities entitled "Global Medium-Term Notes, Series A" (the "Series A Notes") that JPMorgan Financial may issue under the 2016 Indenture from time to time. For more information about the Series A Notes, please see the section titled "— Description of JPMorgan Chase Financial Company LLC's Callable Fixed Rate Notes Due June 10, 2032, Fully and Unconditionally Guaranteed by JPMorgan Chase & Co. — General Terms of the Series A Notes" below.

The Alerian ETNs are unsecured and unsubordinated obligations of JPMorgan Financial, the payment of which is fully and unconditionally guaranteed by JPMorganChase, the Guarantor. The Alerian ETNs will rank *pari passu* with all of JPMorgan Financial's other unsecured and unsubordinated obligations. JPMorgan Chase & Co.'s guarantee of the Alerian ETNs will rank *pari passu* with all of JPMorgan Chase & Co.'s other unsecured and unsubordinated obligations. The Alerian ETNs do not guarantee any return of principal at, or prior to, maturity or upon early redemption or repurchase. **Any payment on the Alerian ETNs is subject to the credit risk of JPMorgan Financial, as issuer of the Alerian ETNs, and JPMorgan Chase & Co., as guarantor of the Alerian ETNs.**

The Alerian ETNs are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or by any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Unless otherwise specified, references herein to "holders" mean those in whose names the Alerian ETNs are registered on the books that JPMorgan Financial or the Trustee, or any successor trustee, as applicable, maintains for this purpose, and not those who own beneficial interests in the Alerian ETNs (registered in street name or otherwise).

Key Terms of the Alerian ETNs

General

Principal Amount: $26 per Alerian ETN (equal to the Initial VWAP Level *divided* by ten, rounded to the nearest cent).

Index: The return on the Alerian ETNs is linked to the performance of the Alerian MLP Index® (Bloomberg ticker: AMZ), which we refer to as the Index, as measured by its VWAP level, and to cash distributions on its components. See "— Terms Relating to Closing Intrinsic Note Value — VWAP Level" below.

The Index measures the composite performance of energy-oriented Master Limited Partnerships, or MLPs, that earn the majority of their cash flows from qualified activities involving energy commodities (the "Index Components") using a capped, float-adjusted, capitalization-weighted methodology. MLPs are limited partnerships primarily engaged in the exploration, marketing, mining, processing, production, refining, storage, or transportation of any mineral or natural resource. The Index is calculated and maintained by VettaFi LLC ("VettaFi").

Coupon Payments: For each Alerian ETN a holder holds on a Coupon Record Date, the holder will receive on the immediately following Coupon Payment Date an amount in cash equal to the Coupon Amount, if any, as of the immediately preceding Coupon Valuation Date.

Coupon Amount: The Coupon Amount as of any Coupon Valuation Date will equal:

a. the Reference Distribution Amount with respect to that Coupon Valuation Date, *minus*
b. the Accrued Investor Fee with respect to that Coupon Valuation Date,

provided that the Coupon Amount will not be less than $0.

If the Reference Distribution Amount on a Coupon Valuation Date is less than the Accrued Investor Fee on that Coupon Valuation Date, an amount equal to the excess of the Accrued Investor Fee over the Reference Distribution Amount (the "Investor Fee Shortfall") will be included in the Accrued Investor Fee with respect to the next Coupon Valuation Date.

The Accrued Investor Fee will reduce each Coupon Amount. In addition, no Coupon Payment will be payable with respect to a Coupon Valuation Date if the Reference Distribution Amount is less than the Accrued Investor Fee, even if that Reference Distribution Amount is positive. The holders are not guaranteed any Coupon Payments.

The Coupon Amount is subject to adjustment in the event of a split or reverse split of the Alerian ETNs as described under "— Split or Reverse Split of the Alerian ETNs" below.

Payment at Maturity: For each Alerian ETN, unless earlier repurchased or redeemed, holders will receive at maturity a cash payment equal to the Closing Intrinsic Note Value determined over the Measurement Period with respect to the Final Valuation Date. If that amount is less than or equal to zero, the payment at maturity will be $0.

Issuer Redemption: On any Business Day on or after July 26, 2024, the Issuer may, in its sole discretion, redeem the Alerian ETNs, in whole or in part. If the Issuer exercises its right to redeem the Alerian ETNs prior to maturity, for each Alerian ETN that is redeemed, holders will receive on the Redemption Settlement Date a cash payment equal to the Closing Intrinsic Note Value determined over the Measurement Period with respect to the Redemption Valuation Date. If that amount is less than or equal to zero, the payment upon early redemption will be $0.

Weekly Repurchase: On a weekly basis, holders may request that we repurchase a minimum of 50,000 Alerian ETNs (subject to adjustment in the event of a split or reverse split of the Alerian ETNs) if holders comply with the required procedures, subject to a repurchase fee of 0.125%. For each Alerian ETN that is repurchased, holders will receive on the relevant Repurchase Date a cash payment equal to the Closing Intrinsic Note Value determined over the Measurement Period with respect to the Repurchase Valuation Date *minus* the Repurchase Fee Amount with respect to the Repurchase Valuation Date.

If the amount calculated above is less than or equal to zero, the payment upon early repurchase will be $0.

Terms Relating to Closing Intrinsic Note Value

Closing Intrinsic Note Value: As of any date of determination, an amount per Alerian ETN equal to:

a. the Principal Amount, multiplied by the Index Ratio as of that date, *plus*
b. the Coupon Amount as of that date, calculated as if that date were a Coupon Valuation Date (the "Stub Coupon Amount"), *minus*
c. any Investor Fee Shortfall determined in calculating that Stub Coupon Amount.

In addition, if the Coupon Ex-Date with respect to the Coupon Amount as of the immediately preceding Coupon Valuation Date has not yet occurred, the Closing Intrinsic Note Value will also include that Coupon Amount (an "Unpaid Coupon Amount").

For purposes of determining the Closing Intrinsic Note Value over any Measurement Period, the Index Ratio is determined based on the arithmetic average of the VWAP Levels over that Measurement Period, and the date of determination for purposes of determining the Coupon Amount, any Investor Fee Shortfall and any Unpaid Coupon Amount is the final day of that Measurement Period.

The Closing Intrinsic Note Value is not the closing price or any other trading price of the Alerian ETNs in the secondary market and is not intended as a price or quotation, or as an offer or solicitation for the purchase or sale of the Alerian ETNs or as a recommendation to transact in the Alerian ETNs at the stated price. The trading price of the Alerian ETNs at any time may vary significantly from the Closing Intrinsic Note Value due to, among other things, imbalances of supply and demand (including as a result of any decision of ours to issue, stop issuing or resume issuing additional Alerian ETNs), lack of liquidity, transaction costs, credit considerations and bid-offer spreads.

If the Reference Distribution Amount used to calculate the Stub Coupon Amount on any Index Business Day is less than the Accrued Investor Fee used to calculate that Stub Coupon Amount, the resulting Investor Fee Shortfall will be deducted in calculating the Closing Intrinsic Note Value on that Index Business Day. Accordingly, the payment at maturity or upon early repurchase or redemption will be reduced by the amount of any Investor Fee Shortfall reflected in the relevant Closing Intrinsic Note Value.

Index Ratio: As of any date of determination, the Index Ratio is equal to:

$$\frac{\text{VWAP Level}}{\text{Initial VWAP Level}}$$

provided that, solely for purposes of determining the Closing Intrinsic Note Value in connection with any payment at maturity or upon early repurchase or redemption, the Index Ratio determined over the relevant Measurement Period is equal to:

$$\frac{\text{Final VWAP Level}}{\text{Initial VWAP Level}}$$

Initial VWAP Level: 260.0267 which is the arithmetic average of the VWAP Levels determined over a period of five Index Business Days ending on the Inception Date.

Final VWAP Level: With respect to a Measurement Period, the arithmetic average of the VWAP Levels on the five Index Business Days in that Measurement Period, as calculated by the Note Calculation Agent.

Measurement Period: With respect to the Final Valuation Date or any Repurchase Valuation Date or Redemption Valuation Date, the five Index Business Days starting from and including the Final Valuation Date or that Repurchase Valuation Date or Redemption Valuation Date, as applicable (or, if that day is not an Index Business Day, the five Index Business Days immediately following that day).

The Measurement Period is subject to postponement in the event of a market disruption event and as described under "— Postponement of an Averaging Date."

VWAP Level: On any Index Business Day, as calculated by the VWAP Calculation Agent, the sum of the products for each Index Component of:

a. the VWAP of that Index Component as of that day; and

b. the Index Units of that Index Component as of that day, *divided* by the Index Divisor as of that day.

The calculation of the VWAP Level may be modified in circumstances described under "— Postponement of an Averaging Date" and "— Discontinuation of an Index; Alternation of Method of Calculation" below. The official closing level of the Index may vary significantly from the VWAP Level.

VWAP: With respect to each Index Component, as of any date of determination, the volume-weighted average price of one share of that Index Component as determined by the VWAP Calculation Agent based on the Primary Exchange for that Index Component.

Index Units: With respect to each Index Component, as of any date of determination, the number of units of that Index Component included in the Index for purposes of the calculation of the official level of the Index by the Index Calculation Agent.

Index Divisor: As of any date of determination, the divisor used in the calculation of the official level of the Index by the Index Calculation Agent.

Inception Date: January 26, 2024

Initial Issue Date: January 30, 2024

Final Valuation Date: January 20, 2044

Maturity Date: January 28, 2044. The Maturity Date is subject to postponement in the event of a market disruption event and as described under "— Postponement of a Payment Date" below.

Terms Relating to Coupon Payments

Accrued Investor Fee: The Accrued Investor Fee accrues at a rate of 0.85% per annum each day. In addition, the Accrued Investor Fee carries forward any shortfall if the Reference Distribution Amount determined in connection with any Coupon Payment is less than the Accrued Investor Fee at that time.

With respect to each Coupon Valuation Date, the Accrued Investor Fee is an amount equal to:

a. the Periodic Investor Fee with respect to that Coupon Valuation Date, *plus*
b. the Investor Fee Shortfall, if any, as of the immediately preceding Coupon Valuation Date, if any.

Periodic Investor Fee: With respect to each Coupon Valuation Date, an amount equal to the product of

a. the investor fee of 0.85% per annum;
b. the Principal Amount multiplied by the Index Ratio as of the immediately preceding Index Business Day that is not a Disrupted Day for any Index Component; and
c. the day count fraction, calculated using a 30/360 day count convention as described under "— Additional Terms — Day Count Fraction" below.

Reference Distribution Amount: With respect to each Coupon Valuation Date, an amount equal to the sum of the gross cash distributions that a Reference Holder would have been entitled to receive in respect of each Index Component held by that Reference Holder on the "record date" with respect to that Index Component, for those cash distributions whose "ex-dividend date" occurs during the Coupon Accrual Period for that Coupon Valuation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index Component that are scheduled to be paid prior to the applicable Coupon Ex-Date, if the issuer of that Index Component fails to pay the distribution to holders of that Index Component by the scheduled payment date for that distribution, that distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

Reference Holder: As of any date of determination, a hypothetical holder of a number of shares of each Index Component equal to:

a. the Index Units of that Index Component as of that date, *divided* by
b. the Index Divisor as of that date *multiplied* by 10,

provided that solely for purposes of determining the Reference Distribution Amount included in any Stub Coupon Amount payable at maturity or upon early repurchase or redemption, the Reference Holder will be deemed to hold four-fifths, three-fifths, two-fifths and one-fifth of the shares of each Index Component it would otherwise hold on the second, third, fourth and fifth Index Business Days, respectively, in the relevant Measurement Period.

The Accrued Investor Fee, the Periodic Investor Fee, the Reference Distribution Amount and the Reference Holder are each subject to adjustment in the event of a split or reverse split of the Alerian ETNs as described under "— Split or Reverse Split of the Alerian ETNs" below.

Coupon Accrual Period: With respect to each Coupon Valuation Date, the period from but excluding the immediately preceding Coupon Valuation Date (or, in the case of the first Coupon Valuation Date, from but excluding November 15, 2023) to and including that Coupon Valuation Date.

Coupon Valuation Date: The first Index Business Day occurring on or after the 15th of February, May, August and November of each calendar year during the term of the Alerian ETNs, beginning on February 15, 2024.

Coupon Ex-Date: With respect to a Coupon Amount, the first Exchange Business Day on which the Alerian ETNs trade without the right to receive that Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the first Exchange Business Day immediately preceding the applicable Coupon Record Date; however, beginning May 28, 2024, under NYSE Arca practice, the Coupon Ex-Date is expected to generally be the applicable Coupon Record Date. For purposes of this paragraph, "Exchange Business Day" means any day on which the primary exchange or market for trading of the Alerian ETNs is scheduled to be open for trading.

Coupon Record Date: The 9th Index Business Day following each Coupon Valuation Date.

Coupon Payment Date: The 15th Index Business Day following each Coupon Valuation Date, subject to postponement in the event of a market disruption event as described under "— Postponement of a Payment Date" below.

Terms Relating to Issuer Redemption

Early Redemption: On any Business Day on or after July 26, 2024, the Issuer may, in its sole discretion, redeem the Alerian ETNs, in whole or in part. If the Issuer exercises its right to redeem the Alerian ETNs, the Issuer will deliver an irrevocable redemption notice (the "Redemption Notice") to DTC (the holder of the master note evidencing the Alerian ETNs) at least five Business Days prior to the Redemption Valuation Date specified in the Redemption Notice. If fewer than all the Alerian ETNs are to be redeemed, the Issuer will specify in the Redemption Notice the principal amount of the Alerian ETNs to be redeemed, and the Trustee will select the Alerian ETNs to be redeemed pro rata, by lot or in such manner as it deems appropriate and fair.

Payment upon Early Redemption: If the Issuer exercises its right to redeem any Alerian ETNs prior to maturity, for each Alerian ETNs selected for redemption by the Trustee, holders will receive on the Redemption Settlement Date a cash payment equal to the Closing Intrinsic Note Value determined over the Measurement Period with respect to the Redemption Valuation Date. If that amount is less than or equal to zero, the payment upon early redemption will be $0.

Redemption Valuation Date: The date specified as the Redemption Valuation Date in the Redemption Notice.

Redemption Settlement Date: Unless otherwise specified in the Redemption Notice, the day that follows the final day in the Measurement Period with respect to the Redemption Valuation Date by a number of Business Days corresponding to the standard settlement cycle, which is currently two Business Days and which is expected to be one Business Day beginning May 28, 2024. In no event will the Redemption Notice specify a Redemption Settlement Date that follows the final day in the Measurement Period by more than five Business Days.

Terms Relating to Weekly Repurchase Right

Early Repurchase: On a weekly basis, holders may request that we repurchase a minimum of 50,000 Alerian ETNs (subject to adjustment in the event of a split or reverse split of the Alerian ETNs) if holders comply with the procedures described under "— Repurchase Procedures" below and unless holders have delivered a Redemption Notice to DTC to redeem all of the outstanding notes. The Issuer may from time to time, in its sole discretion, reduce the minimum number of the Alerian ETNs required for an early repurchase on a consistent basis for all holders of the Alerian ETNs, but the Issuer is under no obligation to do so.

Payment upon Early Repurchase: Subject to holders' compliance with the required procedures, for each Alerian ETN that is repurchased, holders will receive on the relevant Repurchase Date a cash payment equal to the Closing Intrinsic Note Value determined over the Measurement Period with respect to the Repurchase Valuation Date *minus* the Repurchase Fee Amount with respect to the Repurchase Valuation Date. If that amount is less than or equal to zero, the payment upon early redemption will be $0.

Repurchase Fee Amount: With respect to any Repurchase Valuation Date, an amount per Alerian ETN in cash equal to 0.125% of the Closing Intrinsic Note Value with respect to that Repurchase Valuation Date (but excluding any Unpaid Coupon Amount included in that Closing Intrinsic Note Value).

Repurchase Valuation Date: The last Index Business Day of each week, generally Friday.

Repurchase Date: Unless otherwise specified in the Issuer's acknowledgement, the day that follows the final day in the Measurement Period with respect to the Repurchase Valuation Date by a number of Business Days corresponding to the standard settlement cycle, which is currently two Business Days and which is expected to be one Business Day beginning May 28, 2024. In no event will the Issuer's acknowledgement specify a Repurchase Date that follows the final day in the Measurement Period by more than five Business Days.

Repurchase Notice: A repurchase notice in the form specified by the Issuer.

Repurchase Procedures: In order to request that the Issuer repurchase a holder's Alerian ETN, holders must instruct their broker or other person through which they hold Alerian ETNs to take the following steps:

a. send a completed Repurchase Notice to the Issuer via email at ETN_Repurchase@jpmorgan.com by no later than 4:00 p.m., New York City time, on the Business Day immediately preceding the applicable Repurchase Valuation Date;
b. instruct the holder's DTC custodian to book a delivery versus payment trade with respect to that holder's Alerian ETNs on the final day in the Measurement Period with respect to the relevant Repurchase Valuation Date at a price equal to the amount payable upon early repurchase of the Alerian ETNs; and
c. cause the holder's DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m., New York City time, on the relevant Repurchase Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, holders should consult the brokerage firm through which they own their interest in the Alerian ETNs in respect of those deadlines.

Once delivered, a Repurchase Notice may not be revoked. If the Issuer does not receive a holder's Repurchase Notice by the deadline, such holder's Repurchase Notice will not be effective. The Issuer or its affiliate must acknowledge receipt of the Repurchase Notice on the same Business Day for it to be effective, such acknowledgment will be deemed to evidence its acceptance of a holder's repurchase request. The Note Calculation Agent will, in its sole discretion, resolve any questions that may arise as to the validity of a Repurchase Notice and the timing of receipt of a Repurchase Notice.

Additional Terms

Business Day: Any day other than a day on which the banking institutions in the City of New York are authorized or required by law, regulation or executive order to close or a day on which transactions in dollars are not conducted.

Index Business Day: Any day on which the Primary Exchange and the Related Exchange with respect to each Index Component are scheduled to be open for trading.

Primary Exchange: With respect to each Index Component, the primary exchange or market of trading of that Index Component.

Related Exchange: With respect to each Index Component, each exchange or quotation system where trading has a material effect (as determined by the Note Calculation Agent) on the overall market for futures or options contracts relating to that Index Component.

Disrupted Day: With respect to an Index Component, a day on which the Primary Exchange or any Related Exchange with respect to that Index Component fails to open for trading during its regular trading session or on which a market disruption event (as described under "— Market Disruption Events") with respect to that Index Component has occurred or is continuing, and, in each case, the occurrence of which is determined by the Note Calculation Agent to have a material effect on the VWAP Level.

Index Sponsor and Index Calculation Agent: VettaFi

Note Calculation Agent, VWAP Calculation Agent and Published ETN Value Calculation Agent: J.P. Morgan Securities LLC ("JPMS"), one of our and JPMorgan Financial's affiliates, will act as the Note Calculation Agent. Solactive AG will act as the VWAP Calculation Agent and the Published ETN Value Calculation Agent. We and JPMorgan Financial may appoint a different Note Calculation Agent, VWAP Calculation Agent or Published ETN Value Calculation Agent from time to time without holders' consent and without notifying holders.

The Note Calculation Agent will make all necessary calculations and determinations in connection with the Alerian ETNs, including calculations and determinations relating to any payments on the Alerian ETNs and the assumptions used to determine the pricing of the Alerian ETNs, other than determinations to be made by the VWAP Calculation Agent. The VWAP Calculation Agent will determine the VWAP Level and the VWAP of each Index Component on each Index Business Day, except as described below under "— Postponement of an Averaging Date." The Published ETN Value Calculation Agent is responsible for calculating the Daily Closing Intrinsic Note Value, the Intraday Intrinsic Note Value and the Interim Coupon or Shortfall Amount for purposes of publication. All determinations made by the Note Calculation Agent, the VWAP Calculation Agent or the Published ETN Value Calculation Agent will be at the sole discretion of the Note Calculation Agent, the VWAP Calculation Agent or the Published ETN Value Calculation Agent, as applicable, and will, in the absence of manifest error, be conclusive for all purposes and binding on holders, us and JPMorgan Financial.

The Note Calculation Agent will provide written notice to the Trustee at its New York office, on which notice the Trustee may conclusively rely, of any amount payable on the Alerian ETNs at or prior to 11:00 a.m., New York City time, on the date on which payment is to be made.

All values with respect to calculations in connection with the Alerian ETNs will be rounded to the nearest one hundred-thousandth, with five one-millionths rounded upward (e.g., 0.876545 would be rounded to 0.87655). Notwithstanding the foregoing, all dollar amounts related to determination of any payment on the Alerian ETNs per note will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., 0.76545 would be rounded up to 0.7655), and all dollar amounts payable, if any, on the aggregate principal amount of Alerian ETNs per holder will be rounded to the nearest cent, with one-half cent rounded upward.

Trustee: Deutsche Bank Trust Company Americas

Day Count Fraction: With respect to each Coupon Valuation Date, the day count fraction is calculated as follows:

$$\frac{[360 \times (Y2 - Y1) + [30 \times (M2 - M1)]] + (D2 - D1)}{360}$$

where:

a. "Y1" is the year, expressed as a number, in which the first day of the Coupon Accrual Period with respect to that Coupon Valuation Date falls;
b. "Y2" is the year, expressed as a number, in which the day immediately following the last day included in the Coupon Accrual Period with respect to that Coupon Valuation Date falls;

c. "M1" is the calendar month, expressed as a number, in which the first day of the Coupon Accrual Period with respect to that Coupon Valuation Date falls;
d. "M2" is the calendar month, expressed as a number, in which the day immediately following the last day included in the Coupon Accrual Period with respect to that Coupon Valuation Date falls;
e. "D1" is the first calendar day, expressed as a number, of the Coupon Accrual Period with respect to that Coupon Valuation Date, unless that number would be 31, in which case D1 will be 30; and
f. "D2" is the calendar day, expressed as a number, immediately following the last day included in the Coupon Accrual Period with respect to that Coupon Valuation Date, unless that number would be 31 and D1 is greater than 29, in which case D2 will be 30.

Split or Reverse Split of the Alerian ETNs

The Issuer may initiate a split or reverse split of the Alerian ETNs at any time. The Issuer will determine the ratio of such split or reverse split, as applicable, using relevant market indicia in its sole discretion. If the Issuer decides to initiate a split or reverse split, as applicable, the Issuer will issue a notice to holders of the Alerian ETNs and a press release announcing the split or reverse split and the ratio and specifying the effective date of the split or reverse split, which will be at least three Business Days after the date on which the split or reverse split, as applicable, is announced, which we refer to as the "announcement date." The record date for a share split or reverse split will be the Business Day immediately preceding the effective date.

If the Alerian ETNs undergo a split or reverse split, the Issuer will adjust the terms of the Alerian ETNs as may be necessary or desirable to effectuate that split or reverse split, as applicable, including, without limitation, the Principal Amount, any Coupon Amount, the Closing Intrinsic Note Value, the Accrued Investor Fee, the Periodic Investor Fee, the Reference Distribution Amount, the number of shares held by a Reference Holder and the minimum number of Alerian ETNs holders may request that the Issuer repurchase. For example, if the Alerian ETNs undergo a 4-for-1 split, each Alerian ETN holder who holds one Alerian ETN via DTC prior to the split will, after the split, hold four Alerian ETNs, and the Principal Amount, any Coupon Amount, the Closing Intrinsic Note Value, the Accrued Investor Fee, the Periodic Investor Fee, the Reference Distribution Amount and the number of shares held by a Reference Holder will be adjusted as may be necessary or desirable to equal 1/4 of their respective values that would have prevailed in the absence of the 4-for-1 split. In addition, the minimum number of Alerian ETNs holders may request that the Issuer repurchase will be increased to equal 4 times its prior value. These adjustments may be applied retroactively for purposes of adjusting any Coupon Amount that has been determined but not yet paid.

In the case of a reverse split, holders who hold a number of Alerian ETNs that is not evenly divisible by the relevant ratio will receive the same treatment as all other holders for the maximum number of Alerian ETNs they hold that is evenly divisible by the relevant ratio, and the Issuer will have the right to compensate holders for their remaining or "partial" Alerian ETNs in a manner determined by the Note Calculation Agent in its sole discretion. The Issuer's current intention is to provide holders with a cash payment for their partial Alerian ETNs in an amount equal to the appropriate percentage of the Closing Intrinsic Note Value (which may be calculated using an Index Ratio that reflects the average VWAP Level over a measurement period of five Index Business Days) on a specified Index Business Day no later than 20 Index Business Days following the announcement date, with payment to be made on a specified Business Day no later than five Business Days following the date on which the amount of the payment is determined.

Postponement of a Payment Date

In this section, we refer to each Coupon Payment Date and the Maturity Date as "Payment Dates." If any scheduled Payment Date is not a Business Day, then that Payment Date will be the next succeeding Business Day following the scheduled Payment Date. If, due to a market disruption event or otherwise, any Averaging Date referenced in the determination of a payment on the Alerian ETNs that will or may be payable on any Payment Date is postponed so that it falls less than three Business Days prior to that scheduled Payment Date, that Payment Date will be the third Business Day following the latest such Averaging Date, as postponed. If any Payment Date is adjusted as the result of a non-Business Day, a market disruption event or otherwise, any amount payable on that Payment Date will be made on that Payment Date as postponed, with the same force and effect as if that Payment Date had not been postponed, but no interest will accrue or be payable as a result of the delayed payment.

Postponement of an Averaging Date

The Final VWAP Level used to determine the Closing Intrinsic Note Value in connection with any payment at maturity or upon early repurchase or redemption will reflect the arithmetic average of the VWAP Levels on the five Index Business Days in the relevant Measurement Period, and the VWAP Level on each Index Business Day is calculated by reference to the VWAP and the Index Units of each Index Component, as well as the Index Divisor. In this section, we refer to each of the five Index Business Days in a Measurement Period as an "Averaging Date." As set forth below, if any Index Component is disrupted on any Averaging Date, determinations with respect to that Index Component for purposes of calculating the

VWAP Level applicable to that Averaging Date will be postponed. In addition, determinations with respect to that disrupted Index Component for purposes of calculating the VWAP Level applicable to each following Averaging Date will also be postponed so as to avoid using the same VWAP of an Index Component on a given Index Business Day to calculate the VWAP Levels for more than one Averaging Date.

If any Averaging Date is an Unavailable Day for any Index Component, the VWAP Level on that Averaging Date will be deemed to be the Adjusted VWAP Level with respect to that Averaging Date, and that Averaging Date will be postponed to the earliest date on which that Adjusted VWAP Level can be calculated as set forth below. For the avoidance of doubt, no Averaging Date will be postponed to a date that is after the applicable Final Disrupted Averaging Date.

The "Adjusted VWAP Level" with respect to an Averaging Date that is an Unavailable Day for any Index Component will be determined by the VWAP Calculation Agent and will be calculated in accordance with the formula for calculating the VWAP Level, using:

a. with respect to each Index Component for which the originally scheduled Averaging Date is not an Unavailable Day, the VWAP and the Index Units of that Index Component, and the Index Divisor, in each case as of the originally scheduled Averaging Date; and
b. with respect to each Index Component for which the originally scheduled Averaging Date is an Unavailable Day, the VWAP and the Index Units of that Index Component, and the Index Divisor, in each case, as of the first Index Business Day immediately following the originally scheduled Averaging Date that is not an Unavailable Day with respect to that Index Component, provided that, if each day from and including the originally scheduled Averaging Date to and including the applicable Final Disrupted Averaging Date is an Unavailable Day with respect to that Index Component, the VWAP of that Index Component will be determined by the VWAP Calculation Agent in good faith based on its assessment of the market value of that Index Component on that Final Disrupted Averaging Date and the Index Units of that Index Component and the Index Divisor will each be determined by the VWAP Calculation Agent based on its good faith estimate.

An Index Business Day will be an "Unavailable Day" with respect to an Index Component if it is a Disrupted Day for that Index Component or a day that is a Prior Valuation Date with respect to that Index Component and the relevant Averaging Date.

A "Disrupted Day" means, with respect to an Index Component, a day on which the Primary Exchange or any Related Exchange with respect to that Index Component fails to open for trading during its regular trading session or on which a Market Disruption Event with respect to that Index Component has occurred or is continuing, and, in each case, the occurrence of which is determined by the Note Calculation Agent to have a material effect on the VWAP Level.

An Index Business Day will be a "Prior Valuation Date" with respect to an Index Component and an Averaging Date if the VWAP and the Index Units of that Index Component, and the Index Divisor, in each case as of that Index Business Day, were used in calculating the Adjusted VWAP Level with respect to an earlier occurring originally scheduled Averaging Date within the same Measurement Period as that Averaging Date.

With respect to an Averaging Date, the "Final Disrupted Averaging Date" means the third Index Business Day after that Averaging Date, as originally scheduled.

Market Disruption Events

With respect to an Index Component, a "Market Disruption Event" means, the occurrence or existence of a condition specified below:

a. any suspension, absence or limitation of trading in that Index Component on the Primary Exchange with respect to that Index Component, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;
b. any suspension, absence or limitation of trading in futures or options contracts related to that Index Component, if available, on any Related Exchange with respect to that Index Component, whether by reason of movements in price exceeding limits permitted by that Related Exchange or otherwise;
c. any event that disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, that Index Component or futures or options contracts relating to that Index Component; or
d. the closure on any Index Business Day of the Primary Exchange or any Related Exchange with respect to that Index Component prior to its Scheduled Closing Time unless the earlier closing time is announced by the Primary Exchange or that Related Exchange, as applicable, at least one hour prior to the earlier of (a) the actual closing time for the regular trading session on the Primary Exchange or that Related Exchange, as applicable, on that Index Business Day and (b) the submission deadline for orders to be entered into the system for execution at the close of trading on that Index Business Day for the Primary Exchange or that Related Exchange, as applicable;

in each case determined by the Note Calculation Agent in its sole discretion; and

a. a determination by the Note Calculation Agent in its sole discretion that the applicable event described above materially interfered with the Issuer's ability or the ability of any of its affiliates to adjust or unwind all or a material portion of any hedge with respect to the Alerian ETNs.

For purposes of determining whether a Market Disruption Event with respect to an Index Component has occurred:

a. a limitation on the hours or number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Primary Exchange or any Related Exchange; and
b. limitations pursuant to the rules of the Primary Exchange or any Relevant Exchange similar to NYSE Rule 80B (or any applicable rule or regulation enacted or promulgated by any other self-regulatory organization or any government agency of scope similar to NYSE Rule 80B as determined by the Note Calculation Agent) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading.

"Scheduled Closing Time" means, with respect to the Primary Exchange or the Related Exchange, on any Index Business Day, the scheduled weekday closing time of the Primary Exchange or such Related Exchange on such Index Business Day, without regard to after hours or any other trading outside of the regular trading session hours.

Discontinuation of the Index; Alteration of Method of Calculation

If the Index Sponsor discontinues publication of, or otherwise fails to publish, the Index, or if the Index Sponsor does not make the Index Components, their Index Units or the Index Divisor available to the VWAP Calculation Agent, and the Index Sponsor or another entity publishes a successor or substitute index that the Note Calculation Agent determines, in its sole discretion, to be comparable to the discontinued Index and for which the index components, their Index Units and the index divisor, or equivalent information, is available to the VWAP Calculation Agent (such index being referred to in this section as a "successor index"), then the VWAP Level on any subsequent relevant date will be determined by reference to the VWAPs of the index components of that successor index, their Index Units and the index divisor of that successor index, or equivalent information, published with respect to that day and a fixed adjustment factor determined by the Note Calculation Agent upon the selection of that successor index to account for the difference in the levels of the Index and that successor index at that time for purposes of maintaining comparability between prior VWAP Levels and succeeding VWAP Levels.

Upon any selection by the Note Calculation Agent of a successor index, the Note Calculation Agent will cause written notice thereof to be promptly furnished to the Trustee, us, the Issuer and DTC, as holder of the Alerian ETNs.

Payment upon an Event of Default

In case an event of default with respect to the Alerian ETNs shall have occurred and be continuing, the amount declared due and payable per Alerian ETN upon any acceleration of the Alerian ETNs will be determined by the Note Calculation Agent and will be an amount in cash equal to the amount payable at maturity per Alerian ETN calculated as if the date of acceleration were (a) the final day of the Measurement Period with respect to the Final Valuation Date and (b) the Final Disrupted Averaging Date for the final day of the Measurement Period with respect to the Final Valuation Date (if the date of acceleration is a Disrupted Day). Under these circumstances, the Measurement Period with respect to the Final Valuation Date will consist of the date of acceleration and the four immediately preceding Index Business Days.

The amount determined as described above will constitute the final payment on the Alerian ETNs, and no additional amounts will accrue with respect to the Alerian ETNs following the date of acceleration.

If the maturity of the Alerian ETNs is accelerated because of an event of default as described above, the Issuer will, or will cause the Note Calculation Agent to, provide written notice to the Trustee at its New York office, on which notice the Trustee may conclusively rely, and to DTC, as holder of the Alerian ETNs, of the cash amount due with respect to the Alerian ETNs as promptly as possible and in no event later than two Business Days after the date of acceleration.

Listing

The Alerian ETNs have been listed on the NYSE Arca under the ticker symbol "AMJB." No assurance can be given as to the continued listing for the term of the Alerian ETNs, or the liquidity or trading market for the Alerian ETNs. The Issuer is not required to maintain a listing on NYSE Arca or any other exchange.

Book-Entry Only Issuance — The Depository Trust Company

DTC will act as securities depositary for the Alerian ETNs. The Issuer will issue Alerian ETNs only in fully registered form as book-entry notes. The Alerian ETNs will be represented by one or more permanent global notes deposited with, or on behalf of, DTC and registered in the name of DTC or its nominee. These certificates name DTC or its nominee as the owner of the Alerian ETNs. DTC maintains a computerized system that will reflect the interests held by its participants in the global notes. An investor's beneficial interest will be reflected in the records of DTC's direct or indirect participants through an account maintained by the investor with its broker/dealer, bank, trust company or other representative.

The Alerian ETNs will initially be represented by a type of global note referred to as a master note. A master note represents multiple securities that may be issued at different times and that may have different terms. Unless otherwise specified, in connection with each issuance of the Alerian ETNs, the Trustee and/or paying agent will, in accordance with instructions from the Issuer, make appropriate entries or notations in its records relating to the master note representing the Alerian ETNs to indicate that the master note evidences the Alerian ETNs of that issuance.

References to "holders" mean those who own Alerian ETNs registered in their own names, on the books that the Issuer or the paying agent maintain for this purpose, and not those who own beneficial interests in Alerian ETNs registered in street name or in Alerian ETNs issued in book-entry form through DTC.

Denominations

Book-entry interests in Alerian ETNs will be issued in minimum denominations equal to the Principal Amount and in integral multiples thereof.

Registrar, Transfer Agent and Paying Agent

Payment of amounts due at maturity on the Alerian ETNs will be payable and the transfer of the Alerian ETNs will be registrable at the principal corporate trust office of The Bank of New York Mellon in the City of New York.

The Bank of New York Mellon or one of its affiliates will act as registrar and transfer agent for the Alerian ETNs. The Bank of New York Mellon will also act as paying agent for the Alerian ETNs and may designate additional paying agents.

Registration of transfers of the Alerian ETNs will be effected without charge by or on behalf of The Bank of New York Mellon but upon payment (with the giving of such indemnity as The Bank of New York Mellon may require) in respect of any tax or other governmental charges that may be imposed in relation to it.

Reopening Issuances

In Issuer's sole discretion, and without providing holders notice or obtaining their consent, the Issuer may decide to issue and sell additional Alerian ETNs from time to time. These further issuances, if any, will be consolidated to form a single class with the originally issued Alerian ETNs, will have the same CUSIP number and will trade interchangeably with the originally issued Alerian ETNs immediately upon settlement.

However, the Issuer is under no obligation to issue or sell additional Alerian ETNs at any time, and, if the Issuer does sell additional Alerian ETNs, the Issuer may limit or restrict those sales, and the Issuer may stop and subsequently resume selling additional Alerian ETNs at any time. If the Issuer limits, restricts or stops sales of such additional Alerian ETNs, or if the Issuer subsequently resumes sales of such additional Alerian ETNs, the liquidity and trading price of the Alerian ETNs in the secondary market could be materially and adversely affected. Unless the Issuer indicates otherwise, if the Issuer suspends selling additional Alerian ETNs, the Issuer reserves the right to resume selling additional Alerian ETNs at any time, which might result in the reduction or elimination of any premium in the trading price. If holders pay a premium for the Alerian ETNs above the Closing Intrinsic Note Value and the Intraday Intrinsic Note Value, holders could incur significant losses if holders sell their Alerian ETNs at a time when the premium is no longer present in the market.

A suspension of additional issuances of the Alerian ETNs could result in a significant reduction in the number of outstanding Alerian ETNs if noteholders subsequently exercise their right to have the Alerian ETNs repurchased by the Issuer. Accordingly, the number of outstanding Alerian ETNs, and their liquidity, could vary substantially over the term of the Alerian ETNs.

The Alerian ETNs do not limit the Issuer's ability to incur other indebtedness or to issue other securities. Also, the Issuer is not subject to financial or similar restrictions by the terms of the Alerian ETNs.

The Issuer has no obligation to take holders' interests into account when deciding whether to issue additional Alerian ETNs. In addition, the Issuer is under no obligation to reopen any series of notes or to issue any additional Alerian ETNs.

General Terms of the Series A Notes

For a summary of the material provisions of the 2016 Indenture and the Series A Notes and guarantees issued thereunder, including provisions on events of defaults, modification of the 2016 Indenture and governing law, please see "— Description of JPMorgan Chase Financial Company LLC's Callable Fixed Rate Notes Due June 10, 2032, Fully and Unconditionally Guaranteed by JPMorgan Chase & Co. — General Terms of the Series A Notes" below.

DESCRIPTION OF JPMORGAN CHASE FINANCIAL COMPANY LLC'S CALLABLE FIXED RATE NOTES DUE JUNE 10, 2032, FULLY AND UNCONDITIONALLY GUARANTEED BY JPMORGAN CHASE & CO.

The following description of the Callable Fixed Rate Notes due June 10, 2032 (the "Callable Notes") is a summary and does not purport to be complete. It is subject to and qualified in its entirety by reference to the indenture dated February 19, 2016 (as may be amended or supplemented from time to time, the "2016 Indenture"), among JPMorgan Chase Financial Company LLC, as issuer ("JPMorgan Financial" or the "Issuer"), JPMorganChase, as guarantor (the "Guarantor"), and Deutsche Bank Trust Company Americas, as trustee (the "Trustee"), which is incorporated by reference as an Exhibit to the Form 10-K. We encourage you to read the 2016 Indenture for additional information.

General

As of December 31, 2024, $5,000,000 aggregate principal amount of the Callable Notes were outstanding.

The Callable Notes are unsecured and unsubordinated obligations of JPMorgan Financial, the payment of which is fully and unconditionally guaranteed by JPMorgan Chase & Co. The Callable Notes will rank *pari passu* with all of the Issuer's other unsecured and unsubordinated obligations. JPMorgan Chase & Co.'s guarantee of the Callable Notes will rank *pari passu* with all of JPMorgan Chase & Co.'s other unsecured and unsubordinated obligations. **Any payment on the Callable Notes issued by JPMorgan Financial is subject to the credit risk of JPMorgan Finance Callable Notes, and the credit risk of JPMorgan Chase & Co., as guarantor of the Callable Notes.**

The Callable Notes are part of a series of the Issuer's debt securities entitled "Global Medium-Term Notes, Series A" (the "Series A Notes") that the Issuer may issue under the 2016 Indenture from time to time. For more information about the Series A Notes, please see the section titled "— General Terms of the Series A Notes" below.

The Callable Notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or by any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Unless otherwise specified, references herein to "holders" mean those in whose names the Callable Notes are registered on the books that the Issuer or the Trustee, or any successor trustee, as applicable, maintain for this purpose, and not those who own beneficial interests in the Callable Notes (registered in street name or otherwise).

Key Terms of the Callable Notes

We issued the Callable Notes on June 10, 2021, in minimum denominations of $1,000 and in integral multiples of $1,000 thereafter. The Maturity Date of the Callable Notes is June 10, 2032. Interest on the Callable Notes is payable semiannually on June 10th and December 10th of each year, beginning on December 10, 2021 to and including the Maturity Date (each, an "Interest Payment Date"), subject to any earlier redemption, at the Interest Rate of 2.60% per annum.

On June 10, 2031 (the "Redemption Date"), the Issuer may redeem the holders' Callable Notes, in whole but not in part, at a price equal to the principal amount being redeemed *plus* any accrued and unpaid interest. Any accrued and unpaid interest on the Callable Notes redeemed will be paid to the person who is the holder of record on such Callable Notes at the close of business one (1) business day prior to the Redemption Date. To redeem the Callable Notes, the Issuer will deliver notice to DTC, as holder of the Callable Notes, at least 5 business days and not more than 15 business days prior to the Redemption Date.

Calculation Agent

JPMS (the "Calculation Agent") will make all necessary calculations and determinations in connection with the Callable Notes, including calculations and determinations relating to any payments on the Callable Notes.

Payment upon an Event of Default

In case an event of default with respect to the Callable Notes shall have occurred and be continuing, the amount declared due and payable per $1,000 principal amount note upon any acceleration of the Callable Notes will be determined by the Calculation Agent and will be an amount in cash equal to $1,000 per $1,000 principal amount note *plus* accrued and unpaid interest, calculated as if the date of acceleration were the Maturity Date. In such case, interest will be calculated on the basis of a 360-day year and the actual number of days in such adjusted Interest Period and will be based on the Interest Rate on the applicable date immediately preceding such adjusted Interest Period.

If the maturity of the Callable Notes is accelerated because of an event of default as described above, the Issuer will, or will cause the Calculation Agent to, provide written notice to the Trustee at its New York office, on which notice the Trustee may conclusively rely, and to DTC of the cash amount due with respect to the Callable Notes as promptly as possible and in no event later than two business days after the date of acceleration.

Listing

The Callable Notes are listed and admitted to trading on the NYSE under the trading symbol "JPM/32." No assurance can be given as to the continued listing for the term of the Callable Notes, or the liquidity or trading market for the Callable Notes.

Book-Entry Only Issuance — The Depository Trust Company

DTC will act as securities depositary for the Callable Notes. The Callable Notes have been issued only as fully registered securities registered in the name of Cede & Co. (DTC's nominee). One or more fully registered global note certificates, representing the total aggregate principal amount of the Callable Notes, have been issued and have been deposited with DTC. We will not issue definitive notes in exchange for the global notes except in limited circumstances.

Registrar, Transfer Agent and Paying Agent

The Bank of New York Mellon or one of its affiliates will act as registrar and transfer agent for the Callable Notes. The Bank of New York Mellon will also act as paying agent for the Callable Notes and may designate additional paying agents.

Reopening Issuances

The Issuer may, in its sole discretion, "reopen" the Callable Notes based upon market conditions at that time. These further issuances, if any, will be consolidated with, have the same CUSIP number as and trade interchangeably with the respective originally issued Callable Notes immediately upon settlement and, consequently, will increase the aggregate principal amount of such outstanding Callable Notes. The price of any additional offering will be determined at the time of pricing of that offering.

General Terms of the Series A Notes

In this "General Terms of the Series A Notes" section, all references to the "debt securities" refer to Series A Notes issued by JPMorgan Chase Financial Company LLC.

The following description of the terms of the debt securities contains certain general terms that may apply to the debt securities, including the Callable Notes and the Alerian ETNs.

We have summarized below the material provisions of the 2016 Indenture and the debt securities and guarantees issued under the 2016 Indenture.

These descriptions are only summaries, and each investor should refer to the 2016 Indenture, which describes completely the terms and definitions summarized below and contains additional information regarding the debt securities issued under it. Where appropriate, we use parentheses to refer you to the particular sections of the 2016 Indenture. Any reference to particular sections or defined terms of the 2016 Indenture in any statement under this heading qualifies the entire statement and incorporates by reference the applicable section or definition into that statement.

The debt securities will be the Issuer's direct, unsecured general obligations, the payment on which is fully and unconditionally guaranteed by the Guarantor, and will have the same rank in liquidation as all of the Issuer's other unsecured and unsubordinated debt.

The Guarantor is a holding company that holds the stock of JPMorgan Chase & Co. Bank, National Association (the "Bank"), and JPMorgan Chase & Co. Holdings LLC (the "IHC"), its "intermediate holding company." The Guarantor conducts substantially all of its operations through subsidiaries, including the Bank and the IHC. As a result, claims of the holders of the debt securities against the Guarantor under the guarantee will generally have a junior position to claims of creditors of the Guarantor's subsidiaries. Claims of the Guarantor's subsidiaries' creditors other than the Guarantor include substantial amounts of deposit liabilities, long-term debt and other liabilities. In addition, the Guarantor is obligated to contribute to the IHC substantially all the net proceeds that the Guarantor receives from the issuance of securities (including the Alerian ETNs), and the ability of the Bank and the IHC to make payments to the Guarantor is limited. As a result of these arrangements, the Guarantor's ability to make various payments is dependent on its receiving dividends from the Bank and dividends and extensions of credit from the IHC. These limitations could affect the Guarantor's ability to pay interest on its debt securities, redeem or repurchase outstanding securities and fulfill its other payment obligations, including payment obligations under the guarantees of our debt securities.

Events of Default and Waivers

An "Event of Default" with respect to a series of debt securities issued under the 2016 Indenture is defined in the 2016 Indenture as:

a. default in the payment of interest on any debt securities of that series and continuance of such default for 30 days;

b. default in the payment of principal or other amounts payable on any debt securities of that series when due, at maturity, upon redemption, by declaration, or otherwise;
c. default in the performance, or breach, of any other covenants or warranties applicable to the Issuer contained in the 2016 Indenture applicable to that series, and continuation of such default or breach for 90 days after written notice has been given by the Trustee to the Issuer and the Guarantor or given by holders of at least 25% in aggregate principal amount of the outstanding securities of all series affected thereby to the Issuer, the Guarantor and the Trustee;
d. certain events of the Issuer's bankruptcy, insolvency, receivership, winding up or liquidation, whether voluntary or involuntary;
e. the guarantee ceases to be in full force and effect, other than in accordance with the 2016 Indenture, or the Guarantor denies or disaffirms its obligations under the guarantee, *provided* that no Event of Default with respect to the guarantee will occur as a result of, or because it is related directly or indirectly to, the insolvency of the Guarantor or the commencement of proceedings under Title 11 of the United States Code, or the appointment of a receiver for the Guarantor under Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, or the Federal Deposit Insurance Corporation having separately repudiated the Guarantee in receivership, or the commencement of or certain other events of the Guarantor's bankruptcy, insolvency, resolution, receivership, winding up or liquidation; or
f. any other event of default provided in the applicable supplemental indentures to the 2016 Indenture or form of security. (Section 5.01)

If an Event of Default occurs and is continuing because of a default in the payment of principal, interest or other amounts payable on the debt securities, a failure in the performance, or breach, of any covenant or agreement applicable to the Issuer, the guarantee ceasing to be in full force and effect, or any other event of default provided in the applicable supplemental indentures to the 2016 Indenture or form of security, either the Trustee or the holders of not less than 25% in aggregate principal amount of the debt securities of such series then outstanding, treated as one class, by written notice to the Issuer and the Guarantor, may declare the principal of all outstanding debt securities of such series and any interest accrued thereon, to be due and payable immediately. If a default due to specified events of the Issuer's bankruptcy, insolvency, receivership, winding up or liquidation, occurs and is continuing, the principal of all outstanding debt securities and any interest accrued thereon will automatically, and without any declaration or other action on the part of the Trustee or any holder, become immediately due and payable. Subject to certain conditions such declarations may be annulled and past defaults may be waived by the holders of a majority in aggregate principal amount of the outstanding debt securities of the series affected. (Sections 5.01 and 5.10)

Events of bankruptcy, insolvency, resolution, receivership, winding up or liquidation relating to the Guarantor will not constitute an Event of Default with respect to any series of debt securities. In addition, failure by the Guarantor to perform any of its covenants or warranties (other than a payment default) will not constitute an Event of Default with respect to any series of debt securities. Therefore, events of bankruptcy, resolution, receivership, insolvency, winding up or liquidation relating to the Guarantor (in the absence of any such event occurring with respect to the Issuer) will not permit any of the debt securities to be declared due and payable and the Trustee is not authorized to exercise any remedy against the Issuer or the Guarantor upon the occurrence or continuation of these events with respect to the Guarantor. Instead, even if an event of bankruptcy, insolvency, resolution, receivership, winding up or liquidation relating to the Guarantor has occurred, the Trustee and the holders of debt securities of a series will not be able to declare the relevant debt securities to be immediately due and payable unless there is an Event of Default with respect to that series as described above, such as the Issuer's bankruptcy, insolvency, receivership, winding up or liquidation or a payment default by the Issuer or the Guarantor on the relevant debt securities. **The value holders receive on any series of debt securities may be significantly less than what holders would have otherwise received had the Issuer's debt securities been declared due and payable immediately or the Trustee been authorized to exercise any remedy against the Issuer or the Guarantor upon the occurrence or continuation of these events with respect to the Guarantor.**

An Event of Default with respect to one series of debt securities does not necessarily constitute an Event of Default with respect to any other series of debt securities. The 2016 Indenture requires the Trustee to provide notice of default with respect to the debt securities within 90 days, unless the default is cured, but provides that the Trustee may withhold notice to the holders of the debt securities of any default if the board of directors, the executive committee, or a trust committee of directors or Trustees and/or responsible officers of the Trustee determines in good faith that it is in the interest of the holders of the debt securities of the applicable series to do so. The Trustee may not withhold notice of a default in the payment of principal of, interest on or any other amounts due under, such debt securities. (Section 5.11)

The 2016 Indenture provides that the holders of a majority in aggregate principal amount of outstanding debt securities of each series affected, with all such series voting as a single class, may direct the time, method, and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred on the Trustee. The Trustee may decline to act if the direction is contrary to law and in certain other circumstances set forth in the 2016

Indenture. (Section 5.09) The Trustee is not obligated to exercise any of its rights or powers under the 2016 Indenture at the request or direction of the holders of debt securities unless the holders offer the Trustee security or indemnity satisfactory to it against the costs, expenses and liabilities incurred therein or thereby. (Section 6.02(d))

No holder of any debt security of any affected series has the right to institute any action for remedy unless such holder has previously given to the Trustee written notice of default, the Trustee has failed to take action for 60 days after the holders of not less than 25% in aggregate principal amount of the debt securities of each affected series make written request upon the Trustee to institute such action and have offered reasonable indemnity in connection with the same and the holders of a majority in aggregate principal amount of the debt securities of each affected series (voting as a single class) have not given direction to the Trustee that is inconsistent with the written request referred to above. (Section 5.06)

However, the right of any holder of a debt security or coupon to receive payment of the principal of and interest on that debt security or coupon on or after its due date, or to institute suit for the enforcement of any such payment, may not be impaired or affected without the consent of that holder. (Section 5.07)

The 2016 Indenture requires the Issuer and the Guarantor to file annually with the Trustee a written statement as to whether or not the Issuer or the Guarantor, as the case may be, has knowledge of a default. (Section 3.05)

The Issuer, the Guarantor and certain of their affiliates have a wide range of banking relationships with Deutsche Bank Trust Company Americas and The Bank of New York Mellon. If an actual or potential event of default occurs with respect to any debt securities, the Trustee may be considered to have a conflicting interest for purposes of the Trust Indenture Act of 1939, as amended. In that case, the Trustee may be required to resign under the 2016 Indenture, and the Issuer would be required to appoint a successor trustee. For this purpose, a “potential” event of default means an event that would be an event of default if the requirements for giving the Issuer default notice or for the default having to exist for a specific period of time were disregarded.

Modification of the 2016 Indenture

The 2016 Indenture contains provisions permitting the Issuer, the Guarantor and the Trustee to modify the 2016 Indenture or the rights of the holders of debt securities with the consent of the holders of not less than a majority in aggregate principal amount of each outstanding series of debt securities affected by the modification. Each holder of an affected debt security must consent to a modification that would:

a. extend the final maturity date of the principal of, or of any interest on, or other amounts payable under any debt security;
b. reduce the principal amount of, rate of interest on, or any other amounts due under any debt security;
c. change the currency or currency unit of payment of any debt security or certain provisions of the 2016 Indenture applicable to debt securities in foreign currencies;
d. change the method in which amounts of payments of principal, interest or other amounts are determined on any debt security;
e. reduce any amount payable upon redemption of any debt security;
f. impair the right of a holder to institute suit for the payment of a debt security or, if the debt securities provide, any right of repurchase at the option of the holder of a debt security;
g. reduce the percentage of debt securities of any series, the consent of the holders of which is required for any modification; or
h. make any change in the guarantee that would adversely affect the holders of the debt securities of such series or release the Guarantor from the guarantee other than pursuant to the terms of the 2016 Indenture. (Section 8.02)

The 2016 Indenture also permits the Issuer, the Guarantor and the Trustee to amend the 2016 Indenture in certain circumstances without the consent of the holders of debt securities to evidence the Issuer’s or the Guarantor’s merger or the replacement of the Trustee, to cure any ambiguity or to correct or supplement any defective or inconsistent provision, to make any change to the 2016 Indenture or the Issuer’s debt securities that the Issuer deems necessary or desirable and that does not materially and adversely affect the interests of holders of the debt securities and for certain other purposes. (Section 8.01)

Consolidations, Mergers, Sales and Transfers of Assets

Neither the Issuer nor the Guarantor may merge or consolidate with any other entity or sell, convey or transfer all or substantially all of their respective assets to any other entity, unless:

a. with respect to the Issuer:
    i. either the Issuer is the continuing company in the case of a merger or consolidation or the successor entity in the case of a merger or consolidation (including an affiliate of the Guarantor) or the entity to whom those assets are sold, conveyed or transferred in the case of a sale, conveyance or transfer is a

United States corporation or limited liability company that expressly assumes the due and punctual payment of the principal of, any interest on, or any other amounts due under the debt securities and the due and punctual performance and observance of all the covenants and conditions of the 2016 Indenture binding upon the Issuer, and

ii. no Event of Default and no event which, with notice or lapse of time or both, would become an Event of Default has occurred or would be continuing, immediately after the merger or consolidation, or the sale, conveyance or transfer, and

a. with respect to the Guarantor:

   i. either the Guarantor is the continuing corporation in the case of a merger or consolidation or the successor corporation in the case of a merger or consolidation or the entity to whom those assets are sold, conveyed or transferred in the case of a sale, conveyance or transfer is a United States corporation that expressly assumes the full and unconditional guarantee of the full and punctual payment of the principal of, any interest on, or any other amounts due under the debt securities and the due and punctual performance and observance of all the covenants and conditions of the 2016 Indenture binding upon the Guarantor, and
   ii. no Event of Default and no event which, with notice or lapse of time or both, would become an Event of Default has occurred or would be continuing, immediately after the merger or consolidation, or the sale, conveyance or transfer. (Sections 9.01 and 9.02)

Any transfer of material assets of the Guarantor to any other entity that occurs as a result of, or because it is related directly or indirectly to, any proceedings relative to the Guarantor under Title 11 of the United States Code or under a receivership under Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 or under any other applicable federal or state bankruptcy, insolvency, resolution or other similar law will be deemed to be a sale, conveyance or transfer of all or substantially all of the Guarantor's assets.

There are no covenants or other provisions in the 2016 Indenture that would afford holders of debt securities additional protection in the event of a recapitalization transaction involving the Issuer or the Guarantor, a change of control of the Issuer or the Guarantor or a highly leveraged transaction involving the Issuer or the Guarantor. The merger covenant described above would apply only if the recapitalization transaction, change of control or highly leveraged transaction were structured to include a merger or consolidation of the Issuer or the Guarantor or a sale or conveyance of all or substantially all of the Issuer's or the Guarantor's assets. However, the Issuer may provide specific protections, such as a put right or increased interest, for particular debt securities, which the Issuer would describe in the applicable prospectus supplement.

JPMorganChase Guarantee

The Guarantor will fully and unconditionally guarantee the full and punctual payment of the principal of, interest on, and all other amounts payable under the debt securities when the same becomes due and payable, whether at maturity, upon redemption, repurchase at the option of the holders of the applicable debt securities or upon acceleration. If for any reason the Issuer does not make any required payment in respect of the Issuer's debt securities when due, the Guarantor will on demand pay the unpaid amount at the same place and in the same manner that applies to payments made by the Issuer under the 2016 Indenture. The guarantee is of payment and not of collection. (Section 14.01)

The Guarantor's obligations under the guarantee are unconditional and absolute. However, (1) the Guarantor will not be liable for any amount of payment that the Issuer is excused from making or any amount in excess of the amount actually due and owing by the Issuer, and (2) any defense or counterclaims available to the Issuer (except those resulting solely from, or on account of, the Issuer's insolvency or the Issuer's status as debtor or subject of a bankruptcy or insolvency proceeding) will also be available to the Guarantor to the same extent as these defense or counterclaims are available to the Issuer, whether or not asserted by the Issuer. (Section 14.02)

Concerning the Trustee, Paying Agent, Registrar and Transfer Agent

We, the Guarantor and certain of their affiliates have a wide range of banking relationships with Deutsche Bank Trust Company Americas, The Bank of New York Mellon and The Bank of New York Mellon, London Branch. The Bank of New York Mellon and, for notes settled through Euroclear Bank SA/NV or Clearstream Banking, S.A., Luxembourg, The Bank of New York Mellon, London Branch, will be the paying agents, authenticating agents, registrars and transfer agents for debt securities issued under the 2016 Indenture.

Deutsche Bank Trust Company Americas is initially serving as the Trustee for the debt securities issued under our 2016 Indenture, to which JPMorganChase acts as a guarantor, the warrants issued under our warrant indenture, to which JPMorganChase acts as a guarantor, and the debt securities issued under JPMorganChase's indenture.

Governing Law and Judgments

The debt securities and the 2016 Indenture, including the guarantee, will be governed by, and construed in accordance with, the laws of the State of New York. (Section 11.08)

Exhibit 10.19

JPMORGAN CHASE & CO. LONG-TERM INCENTIVE PLAN
TERMS AND CONDITIONS OF JANUARY 21, 2025
RESTRICTED STOCK UNIT AWARD
OPERATING COMMITTEE

Award Agreement

These terms and conditions are made part of the Award Agreement dated as of January 21, 2025 ("Grant Date") awarding Restricted Stock Units ("RSUs") pursuant to the terms of the JPMorgan Chase & Co. Long-Term Incentive Plan ("Plan"). To the extent the terms of the Award Agreement (all references to which will include these terms and conditions) conflict with the Plan, the Plan will govern. The Award Agreement, the Plan and Prospectus supersede any other agreement, whether written or oral, that may have been entered into by the Firm and you relating to this award.

This award was granted on the Grant Date subject to the Award Agreement. **Unless you decline by the deadline and in the manner specified in the Award Agreement, you will have agreed to be bound by these terms and conditions, effective as of the Grant Date.** If you decline the award, it will be cancelled as of the Grant Date.

Capitalized terms that are not defined in "Definitions" below or elsewhere in the Award Agreement will have the same meaning as set forth in the Plan.

JPMorgan Chase & Co. will be referred to throughout the Award Agreement as "JPMorgan Chase" and together with its subsidiaries as the "Firm".

Form and Purpose of Award

Each RSU represents a non-transferable right to receive one share of Common Stock as of the applicable vesting date as set forth in your Award Agreement.

The purpose of this award is to motivate your future performance for services to be provided during the vesting period and to align your interests with those of the Firm and its shareholders.

Dividend Equivalents

If dividends are paid on Common Stock while RSUs under this award are outstanding, you will be paid an amount equal to the dividend paid on one share of Common Stock, multiplied by the number of RSUs outstanding under this award as of the dividend record date.

Vesting Period

The period from the Grant Date to the last vesting date is the "vesting period" (see subsections captioned "--Amendment" pursuant to which the Firm may extend the vesting period and "--No Ownership Rights/Other Limitations" pursuant to which the Firm may place restrictions on delivered shares of Common Stock following a vesting date).

Protection-Based Vesting

This award is intended and expected to vest on the vesting date(s), provided that you are continuously employed by the Firm through such vesting date, or you meet the requirements for continued vesting described under the subsections "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability". However, vesting and the number of RSUs in which you vest are subject to these terms and conditions (including, but not limited to, the section captioned "Remedies" and the following protection-based vesting provision).

Up to a total of fifty percent of your award that would otherwise be distributable to you during the vesting period ("At Risk RSUs") may be cancelled if the Chief Executive Officer of JPMorgan Chase ("CEO") determines in his or her sole discretion that cancellation of all or portion of the At Risk RSUs is appropriate in light of any one or a combination of the following factors:

- Your performance in relation to the priorities for your position, or the Firm's performance in relation to the priorities for which you share responsibility as a member of the Operating Committee, have been unsatisfactory for a sustained period of time. Among the factors the CEO may consider in assessing performance are net income, total net revenue, return on equity, earnings per share and capital ratios of the Firm, both on an absolute basis and, as appropriate, relative to peer firms.

- For any calendar year ending during the vesting period, JPMorgan Chase's annual pre-tax pre-provision income at the Firm level is negative.
- Awards granted to participants in a Line of Business for which you exercise, or during the vesting period exercised, direct or indirect responsibility, were in whole or in part cancelled because the Line of Business did not meet its annual Line of Business Financial Threshold.
- The Firm does not meet the Firmwide Financial Threshold.

In the event that your employment terminates due to "Job Elimination", "Full Career Eligibility", "Government Office" or "Disability" thereby entitling you to continued vesting in your award (or potentially acceleration due to satisfaction of the Government Office Requirements), the cancellation circumstances described above will continue to apply to your At Risk RSUs pursuant to the subsection captioned "Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity".

Any determination above with respect to protection-based vesting provisions is subject to ratification by the Compensation and Management Development Committee of the Board of Directors of JPMorgan Chase ("Committee"). In the case of an award to the CEO, all such determinations shall be made by the Committee and ratified by the Board.

Bonus Recoupment

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Bonus Recoupment Policy (or successor policy) as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 2024 and to this award. You can access this policy as currently in effect by clicking the following link to the JPMorgan Chase & Co. Corporate Governance Principles web page and scrolling to the Bonus Recoupment Policy located under the section titled "Other Matters":

https://about.jpmorganchase.com/about/governance/corporate-governance-principles

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Bonus Recoupment Policy (or successor policy).

Termination of Employment

Except as explicitly set forth below under the subsections captioned "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability" or under the section captioned "Death", any RSUs outstanding under this award will be cancelled effective on the date your employment with the Firm terminates for any reason.

Subject to these terms and conditions (including, but not limited to, sections captioned "Protection-Based Vesting", "Bonus Recoupment", "Your Obligations" and "Remedies"), you will be eligible to continue to vest (as you otherwise would vest if you were still employed by JPMorgan Chase) with respect to your award in accordance with its terms and conditions following the termination of your employment if one of the following circumstances applies to you:

- **Job Elimination**
  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that
  - the Firm terminated your employment because your job was eliminated, and
  - after you are notified that your job will be eliminated, you provided such services as requested by the Firm in a cooperative and professional manner, and
  - you satisfied the Release/Certification Requirements set forth below.

- **Full Career Eligibility**
  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that
  - (i) you voluntarily terminated your employment with the Firm, and (ii) had completed at least five years of Recognized Service (as defined below) on your date of termination with at least three years of continuous service with the Firm immediately preceding your termination date or if you are over 60 years of age with at least three years of continuous service with the Firm immediately preceding your termination date, and
  - the sum of your age and Recognized Service (as defined below) on your date of termination equaled or exceeded 60 and
  - you provided at least 180 days advance written notice to the Firm of your intention to voluntarily terminate your employment under this provision, during which notice period you provided such services as requested by the Firm in a cooperative and professional manner and you did not perform any services for any other employer, and
  - continued vesting shall be appropriate, which determination shall be made prior to your termination and will be based on your performance and conduct (before and after providing notice), and

- you satisfied the Release/Certification Requirements set forth below, and
- for 36 months from the date of grant of this award you do not either perform services in any capacity (such as an employee, contractor, consultant, advisor, or self-employed individual, whether paid or unpaid) for a Financial Services Company (as defined below) or work in your profession (whether or not for a Financial Services Company); provided that you may do one or more of the following:
  - work in a government, education or Not-for-Profit Organization (as defined below),
  - subject to disclosure and confirmation of the following, serve on the board of directors of a public or non-public company that is not a Financial Services Company.

After receipt of such advance written notice, the Firm may choose to have you continue to provide services during such 180-day period as a condition to continued vesting or shorten the length of the 180-day period at the Firm's sole discretion, but to a date no earlier than the date you would otherwise meet the age and service requirements.

Additional advance notice requirements may apply for employees subject to notice period policies (see "Notice Period" below).

- **Government Office**
  In the event that you voluntarily terminate your employment with the Firm to accept a Government Office or become a candidate for an elective Government Office, as described at the end of these terms and conditions under the section captioned "Government Office Requirements". See also definition of Government Office in the section captioned "Definitions".

- **Disability**
  In the event that
  - your employment with the Firm terminates because (i) you are unable to return to work while you are receiving benefits under the JPMorgan Chase Long Term Disability Plan, or for non-U.S. employees, under the equivalent JPMorgan Chase sponsored local country plan (in either case, "LTD Plan"), or (ii) if you are not covered by a LTD Plan, you are unable to return to work due to a long-term disability that would qualify for benefits under the applicable LTD Plan, as determined by the Firm or a third-party designated by the Firm; provided that you (x) request in writing continued vesting due to such disability within 30 days of the date your employment terminates, and (y) provide any requested supporting documentation and (z) receive the Firm's written consent to such treatment, and
  - you satisfied the Release/Certification Requirements set forth below.

Release/Certification

To qualify for continued vesting after termination of your employment under any of the foregoing circumstances:

- you must timely execute and deliver a release of claims in favor of the Firm, having such form and terms as the Firm shall specify,
- with respect to "Full Career Eligibility", prior to the termination of your employment, you must confirm with management that you meet the eligibility criteria (including providing at least 180 days advance written notification), advise that you are seeking to be treated as an individual eligible for "Full Career Eligibility", and receive written consent to such continued vesting,
- with respect to "Full Career Eligibility" and "Government Office", it is your responsibility to (i) notify the Firm within 15 days after the date you are no longer in compliance with the employment restrictions (as described herein) or (ii) take the appropriate steps to certify to the Firm prior to each vesting date while the employment restrictions are outstanding, on the authorized form of, and by the due date set by, the Firm, that you have complied with the employment restrictions applicable to you (as described herein) from your date of termination of employment through the applicable vesting date,
- with respect to "Disability", you must satisfy the notice and documentation described above and receive written consent to such continued vesting, and
- in all cases, complied with all other terms of the Award Agreement. (See section captioned "Your Obligations".)

Death

If you die while you are eligible to vest in RSUs under this award, the RSUs will immediately vest and will be distributed in shares of Common Stock (after applicable tax withholding) to your designated beneficiary on file with the Firm's Stock Administration Department, or if no beneficiary has been designated or survives you or if beneficiary designation is not recognized locally, then to your estate unless otherwise required by local legislation. Any shares will be distributed no later than the end of the calendar year immediately following the calendar year which contains your date of death; however, our administrative practice is to register such shares in the name of your beneficiary or estate within 60 days of the Firm's receipt of any required documentation.

Your Obligations

In consideration of the grant of this award, you agree to comply with and be bound by the obligations set forth below next to the subsections captioned "--Confidentiality & Non-Solicitation", "--False Statements", "--Cooperation", "--Compliance with Award Agreement" and "--Notice Period."

- **Confidentiality & Non-Solicitation**

  During your employment by the Firm and for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, you will not directly or indirectly, whether on your own behalf or on behalf of any other party, without the prior written consent of the Director of Human Resources: (A) solicit, induce or encourage any of the Firm's then current employees to leave the Firm or to apply for employment elsewhere, unless such current employee has received official, written notice that his or her employment will be terminated due to job elimination, (B) hire any employee or former employee who was employed by the Firm at the date your employment terminated, unless the individual's employment terminated because his or her job was eliminated, or the individual's employment with the Firm has been terminated for more than six months, (C) to the fullest extent enforceable under applicable law, solicit or induce or attempt to induce to leave the Firm, or divert or attempt to divert from doing business with the Firm, any then current customers, suppliers or other persons or entities that were serviced by you or whose names became known to you by virtue of your employment with the Firm, or otherwise interfere with the relationship between the Firm and such customers, suppliers or other persons or entities. This does not apply to publicly known institutional customers that you service after your employment with the Firm without the use of the Firm's confidential or proprietary information.

  These restrictions do not apply to authorized actions you take in the normal course of your employment with the Firm, such as employment decisions with respect to employees you supervise or business referrals in accordance with the Firm's policies.

  You will not, either during your employment with the Firm or thereafter, directly or indirectly use or disclose to anyone any Confidential Information (as defined herein) related to the Firm's business or its customers except as explicitly permitted by the JPMorgan Chase Code of Conduct and applicable policies or law or legal process. "Confidential Information" includes but is not limited to: (i) information received by the Firm from third parties under confidential conditions; (ii) intellectual property and trade secrets, technical, product, business, financial, or development information from the Firm, the use or disclosure of which reasonably might be construed to be contrary to the interest of the Firm; or (iii) other proprietary information or data, including, but not limited to, customer lists. In addition, following your termination of employment, you will not, without prior written authorization, access the Firm's private and internal information through telephonic, intranet or internet means.

  For Employees with a Work Location in California, you agree that the restrictions in the first paragraph of this "Confidentiality and Non-Solicitation" provision shall not apply to you. However, you agree that, as a condition of receipt of this award, you will not, for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, use "Confidential Information" in order to solicit or otherwise interfere in the relationship between the Firm and any current Firm customers, suppliers, or other persons or entities whose names become known to you by virtue of your employment with the Firm and in connection with your access to Confidential Information.

  Nothing in this award precludes you from reporting to the Firm's management or directors, the government, a regulator, a self-regulatory agency, your attorneys or a court, conduct you believe to be in violation of the law or concerns of any known or suspected Code of Conduct violation. It is also not intended to prevent you from responding truthfully to questions or requests from the government, a regulator or in a court of law.

  If you are required by law or requested to provide information to any private party, including the news media, related to your or anyone else's employment with the Firm, you will, in advance of providing any response (to the extent lawfully permitted), and within five days of receiving any such legal demand or request, provide written notice to the Firm. Additionally, you agree to cooperate with the Firm in connection with the request for such information to the extent lawfully permitted.

- **False Statements**

You will not, either during your employment with the Firm or thereafter, make any untrue statements, such that they are made with knowledge of their falsity or with reckless disregard for their truth or falsity, about the Firm, its employees, officers, directors or shareholders as a group in verbal, written, electronic or any other form. This shall not preclude you from reporting to the Firm's management or directors regarding conduct you believe to be in violation of the law or from providing information to or cooperating with any government, regulator or law enforcement agency.

- **Cooperation**
  You will cooperate with any Firm investigation, inquiry, or litigation, and provide full and accurate information to the Firm and its counsel with respect to any matter that relates to issues or events about which you may have knowledge or information, subject to reimbursement for actual, appropriate and reasonable out-of-pocket expenses incurred by you. This Agreement does not restrict you from communicating with any federal, state, or local government, regulatory, or law enforcement agency or otherwise participating in any investigation or proceeding that may be conducted by any such agency, including providing documents or other information without notice to the Firm.

- **Compliance with Award Agreement**
  You will provide the Firm with any information reasonably requested to determine compliance with the Award Agreement, and you authorize the Firm to disclose the terms of the Award Agreement to any third party who might be affected thereby, including your prospective employer.

- **Notice Period**
  If you are subject to a notice period or become subject to a notice period after the Grant Date, whether by contract or by policy, that requires you to provide advance written notice of your intention to terminate your employment ("Notice Period"), then as consideration for this award and continued employment, you will provide the Firm with the necessary advance written notice that applies to you, as specified by such contract or policy.

  After receipt of your notice, the Firm may choose to have you continue to provide services during the applicable Notice Period or may place you on a paid leave for all or part of the applicable Notice Period. During the Notice Period, you shall continue to devote your full time and loyalty to the Firm by providing services in a cooperative and professional manner and not perform any services for any other employer and shall receive your base salary and certain benefits until your employment terminates. You and the Firm may mutually agree to waive or modify the length of the Notice Period.

  Regardless of whether a Notice Period applies to you, you must comply with the 180-day advance notice period described under the subsection captioned "--Full Career Eligibility" in the event you wish to terminate employment under that same subsection.

Remedies

- **Detrimental Conduct, Risk Related and Other Cancellation/Recapture**
  In addition to the cancellation provisions described under the sections captioned "Protection-Based Vesting", "Bonus Recoupment", and "Termination of Employment", up to 100% of your outstanding RSUs under this award may be cancelled if the Firm in its sole discretion determines that:
  - Any of the following detrimental and risk-related conduct has occurred:
    - you engaged in conduct detrimental to the Firm insofar as it causes material financial or reputational harm to the Firm or its business activities, or
    - this award was based on materially inaccurate performance metrics, whether or not you were responsible for the inaccuracy, or
    - this award was based on a material misrepresentation by you, or
    - you improperly or with gross negligence failed to identify, raise or assess, in a timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the Firm or its business activities, or
    - your employment was terminated for Cause (see section captioned "Definitions" below) or, in the case of a determination after the termination of your employment, that your employment could have been terminated for Cause.
  - you have failed to comply with any of the advance notice/cooperation requirements or employment restrictions applicable to your termination of employment, or
  - you have failed to return the required forms specified under the section captioned "Release/Certification" by the specified deadline, or
  - you have violated any of the provisions as set forth above in the section captioned "Your Obligations".

To the extent provided under the subsection captioned "--Amendment" below, JPMorgan Chase reserves the right to suspend vesting of this award and/or distribution of shares under this award, including, without limitation, during any period that JPMorgan Chase is evaluating whether this award is subject to cancellation and/or recovery and/or whether the conditions for distributions of shares under this award are satisfied. JPMorgan Chase is not responsible for any price fluctuations during any period of suspension and, if applicable, suspended units will be reinstated consistent with Plan administration procedures. See also subsection captioned "--No Ownership Rights/Other Limitations".

- **Recovery**
  In addition, you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares of Common Stock previously distributed under this award as follows:
  - Payment may be required with respect to any shares distributed within the three year period prior to a notice-of-recovery under this section, if the Firm in its sole discretion determines that:
    - you committed a fraudulent act, or engaged in knowing and willful misconduct related to your employment, or
    - you violated any of the provisions as set forth above in the section captioned "Your Obligations", or
    - you violated the employment restrictions set forth in the subsection "--Full Career Eligibility" or "--Government Office" following the termination of your employment.
  - In addition, payment may be required with respect to any shares distributed within the one year period prior to notice-of-recovery under this section, if the Firm in its sole discretion determines appropriate as a result of the detrimental and risk-related conduct listed in the above "Detrimental Conduct, Risk Related and Other Cancellation/Recapture" subsection.

  Notice-of-recovery under this subsection is a written (including electronic) notice from the Firm to you either requiring payment under this subsection or stating that JPMorgan Chase is evaluating requiring payment under this subsection. Without limiting the foregoing, notice-of-recovery will be deemed provided if the Firm makes a good faith attempt to provide written (including electronic) notice at your last known address maintained in the Firm's employment records. For the avoidance of doubt, a notice-of-recovery that the Firm is evaluating requiring payment under this subsection shall preserve JPMorgan Chase's rights to require payment as set forth above in all respects and the Firm shall be under no obligation to complete its evaluation other than as the Firm may determine in its sole discretion.

  For purposes of this subsection, shares distributed under this award include shares withheld for tax purposes. However, it is the Firm's intention that you only be required to pay the amounts under this subsection with respect to shares that are or may be retained by you following a determination of tax liability and that you will not be required to pay amounts with respect to shares representing irrevocable tax withholdings or tax payments previously made (whether by you or the Firm) that you will not be able to recover, recapture or reclaim (including as a tax credit, refund or other benefit). Accordingly, JPMorgan Chase will not require you to pay any amount that the Firm or its nominee in his or her sole discretion determines is represented by such withholdings or tax payments.

  Payment may be made in shares of Common Stock or in cash. You agree that any repayment will be a lawful recovery under the terms and conditions of your Award Agreement and is not to be construed in any manner as a penalty.

  Nothing in the section in any way limits your obligations under "Bonus Recoupment".

- **Right to an Injunction**
  You acknowledge that a violation or attempted violation of any of the provisions set forth in "Your Obligations" herein will cause immediate and irreparable damage to the Firm, and therefore agree that the Firm shall be entitled as a matter of right to an injunction, from any court of competent jurisdiction, restraining any violation or further violation of any of the provisions set forth in "Your Obligations"; such right to an injunction, however, shall be cumulative and in addition to whatever other remedies the Firm may have under law or equity.

Administrative Provisions

Withholding Taxes: As a result of legal and/or tax obligations the Firm, in its sole discretion, may (i) retain from each distribution the number of shares of Common Stock required to satisfy applicable tax obligations or (ii) implement any other desirable or necessary procedures, so that appropriate withholding and other taxes are paid to the competent authorities with respect to the vested shares, dividend equivalents and the award. This may include but is not limited to (i) a market sale of a number of such shares on your behalf substantially equal to the withholding or other taxes, (ii) to the extent required by law, withhold from cash compensation, an amount equal to any withholding obligation with respect to the award, shares that vest under this award, and/or dividend equivalents, and (iii) retaining shares that vest under this award or dividend equivalents until you pay any taxes associated with the award, vested shares and/or the dividend equivalents directly to the competent authorities.

Right to Set Off: Although the Firm expects to settle this award in share(s) of Common Stock as of the applicable vesting date, as set forth in your Award Agreement, the Firm may, to the maximum extent permitted by applicable law (including Section 409A of the Code to the extent it is applicable to you), retain for itself funds or the Common Stock resulting from any vesting of this award to satisfy any obligation or debt that you owe to the Firm. Notwithstanding any account agreement with the Firm to the contrary, the Firm will not recoup or recover any amount owed from any funds or unrestricted securities held in your name and maintained at the Firm pursuant to such account agreement to satisfy any obligation or debt owed by you under this award without your consent. This restriction on the Firm does not apply to accounts described and authorized in "No Ownership Rights/Other Limitations" described below.

No Ownership Rights/Other Limitations: RSUs do not convey the rights of ownership of Common Stock and do not carry voting rights. No shares of Common Stock will be issued to you until after the RSUs have vested. Shares will be issued in accordance with JPMorgan Chase's procedures for issuing stock. By accepting this award, you authorize the Firm, in its sole discretion, to establish on your behalf a brokerage account in your name with the Firm or book-entry account with our stock plan administrator and/or transfer agent and deliver to that account any vested shares derived from the award. You also acknowledge that should there be a determination that the cancellation provisions of this award apply during the period when the vesting of any outstanding RSUs has been suspended, then you agree that such RSUs may be cancelled in whole or part. (See Sections captioned "Protection-Based Vesting", "Bonus Recoupment", "Termination of Employment" and "Remedies", as well as the subsection captioned "--Amendment" permitting suspension of vesting.)

With respect to any applicable vesting date, JPMorgan Chase may impose for any reason, as of such vesting date for such period as it may specify in its sole discretion, such restrictions on the Common Stock to be issued to you as it may deem appropriate, including, but not limited to, restricting the sale, transfer, pledging, assignment, hedging or encumbrance of such shares of Common Stock. Such restrictions described in the last sentence shall not impact your right to vote or receive dividends with respect to the Common Stock. By accepting this award, you acknowledge that during such specified period should there be a determination that the recovery provisions of this award apply, then you agree that you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares subject to such restrictions (notwithstanding the limitation set forth in the "Right to Set Off" subsection above). (See Sections captioned "Bonus Recoupment" and "Remedies".)

Binding Agreement: The Award Agreement will be binding upon any successor in interest to JPMorgan Chase, by merger or otherwise.

Not a Contract of Employment: Nothing contained in the Award Agreement constitutes a contract of employment or continued employment. Employment is "at-will" and may be terminated by either you or JPMorgan Chase for any reason at any time. This award does not confer any right or entitlement to, nor does the award impose any obligation on the Firm to provide, the same or any similar award in the future and its value is not compensation for purposes of determining severance.

Section 409A Compliance: To the extent that Section 409A of the Code is applicable to this award, distributions of shares and cash hereunder are intended to comply with Section 409A of the Code, and the Award Agreement, including these terms and conditions, shall be interpreted in a manner consistent with such intent.

Notwithstanding anything herein to the contrary, if you (i) are subject to taxation under the Code, (ii) are a specified employee as defined in the JPMorgan Chase 2005 Deferred Compensation Plan and (iii) have incurred a separation from service (as defined in that Plan with the exception of death) and if any units/shares under this award represent deferred compensation as defined in Section 409A and such shares are distributable (under the terms of this award) within six months following, and as a result of your separation from service, then those shares will be delivered to you during the first calendar month after the expiration of six full months from date of your separation from service. Further, if your award is not subject to a substantial risk of forfeiture as defined by regulations issued under Section 409A of the Code, then the remainder of each calendar year immediately following (i) each applicable vesting date set forth in your Award Agreement shall be a payment date for purposes of distributing the vested portion of the award and (ii) each date that JPMorgan

Chase specifies for payment of dividends declared on its Common Stock, shall be the payment date(s) for purposes of distributing dividend equivalent payments.

Change in Outstanding Shares: In the event of any change in the outstanding shares of Common Stock by reason of any stock dividend or split, recapitalization, issuance of a new class of common stock, merger, consolidation, spin-off, combination or exchange of shares or other similar corporate change, or any distributions to stockholders of Common Stock other than regular cash dividends, the Committee will make an equitable substitution or proportionate adjustment, in the number or kind of shares of Common Stock or other securities issued or reserved for issuance pursuant to the Plan and to any RSUs outstanding under this award for such corporate events.

Interpretation/Administration: The Committee or its nominee has sole and complete authority to interpret and administer this Award Agreement, including, without limitation, the power to (i) interpret the Plan and the terms of this Award Agreement; (ii) determine the reason for termination of employment; (iii) determine application of the post-employment obligations and cancellation and recovery provisions; (iv) decide all claims arising with respect to this award; and (v) delegate such authority as it deems appropriate. Any determination contemplated hereunder by the Committee, the Firm, the Director of Human Resources or their respective nominees shall be binding on all parties.

Notwithstanding anything herein to the contrary, the determinations of the Director of Human Resources, the Firm, the Committee and their respective nominees under the Plan and the Award Agreements are not required to be uniform. By way of clarification, the Committee, the Firm, the Director of Human Resources and their respective nominees shall be entitled to make non-uniform and selective determinations and modifications under Award Agreements and the Plan.

Amendment: The Committee or its nominee reserves the right to amend this Award Agreement in any manner, at any time and for any reason; provided, however, that no such amendment shall materially adversely affect your rights under this Award Agreement without your consent except to the extent that the Committee or its nominee considers advisable to (x) comply with applicable laws or changes in or interpretation of applicable laws, regulatory requirements and accounting rules or standards and/or (y) make a change in a scheduled vesting date or impose the restrictions described above under "No Ownership Rights/Other Limitations", in either case, to the extent permitted by Section 409A of the Code if it is applicable to you. This Award Agreement may not be amended except in writing signed by the Director of Human Resources of JPMorgan Chase.

Severability: If any portion of the Award Agreement is determined by the Firm to be unenforceable in any jurisdiction, any court or arbitrator of competent jurisdiction or the Director of Human Resources may reform the relevant provisions (e.g., as to length of service, time, geographical area or scope) to the extent the Firm (or court/arbitrator) considers necessary to make the provision enforceable under applicable law.

Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity: Upon receipt of satisfactory evidence that applicable United States federal, state, local, foreign or supranational ethics or conflict of interest laws or regulations require you to divest your interest in JPMorgan Chase RSUs, the Firm may accelerate the distribution of all or part of your outstanding award effective on or before the required divestiture date; provided that no accelerated distribution shall occur if the Firm determines that such acceleration will violate Section 409A of the Code. Accelerated distribution under this paragraph does not impact the dates as set forth in the "Remedies" section above. The time period for recovery shall be determined by the originally scheduled vesting date or distribution date prior to any acceleration event.

If you have voluntarily terminated your employment and have satisfied the requirements of the section captioned "Government Office Requirements", acceleration shall apply (to extent required) to the percentage of your outstanding award that would continue to vest under that section. In the case of a termination of employment where the award is outstanding as a result of the subsections entitled "--Job Elimination" or "--Full Career Eligibility", then acceleration shall apply, to the extent required, to the full outstanding award.

Notwithstanding accelerated distribution pursuant to the foregoing, you will remain subject to the applicable terms of your Award Agreement as if your award had remained outstanding for the duration of the original vesting period and shares had been distributed as scheduled as of each applicable vesting date, including, but not limited to, repayment obligations set forth in the section captioned "Remedies" and the employment restrictions in the sections captioned "Protection-Based Vesting" and "Government Office Requirements" and the subsection "--Full Career Eligibility".

Use of Personal Data: By accepting this award, you acknowledge that the Firm may process your personal data for the purposes of providing you this award (to include registration of shares and units or establishing a brokerage account on your behalf) and disclosing to third parties, such as service providers or tax and regulatory authorities (e.g., for compensation reporting and payroll tax withholding purposes).   Additionally, you agree that the Firm may transfer your personal data to jurisdictions that do not afford protections equivalent to the protections in the country in which we collected your data. Where applicable law provides a right to terminate the foregoing authorization, you may do so at any time, except with respect to tax and regulatory reporting and the Firm's legal and regulatory obligations. In the event you terminate this authorization, your award will be cancelled.

Governing Law: This award shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law principles.

Choice of Forum: By accepting this award under the Plan, you agree (and have agreed) that to the extent not otherwise subject to arbitration under an arbitration agreement between you and the Firm, any dispute arising directly or indirectly in connection with this award or the Plan shall be submitted to arbitration in accordance with the rules of the American Arbitration Association if so elected by the Firm in its sole discretion. In the event such a dispute is not subject to arbitration for any reason, you agree to accept the exclusive jurisdiction and venue of the United States District Court for the Southern District of New York with respect to any judicial proceeding in connection with this award or the Plan. You waive, to the fullest extent permitted by law, any objection to personal jurisdiction or to the laying of venue of such dispute and further agree not to commence any action arising out of or relating to this award or the Plan in any other forum.

Waiver of Jury Trial/Class Claims: By accepting this award, you agree, with respect to any claim brought in connection with your employment with the Firm in any forum (i) to waive the right to a jury trial and (ii) that any judicial proceeding or arbitration claim will be brought on an individual basis, and you hereby waive any right to submit, initiate, or participate in a representative capacity or as a plaintiff, claimant or member in a class action, collective action, or other representative or joint action.

Litigation: By accepting any award under the Plan, you agree (and have agreed) that in any action or proceeding by the Firm (other than a derivative suit in the right of the Firm) to enforce the terms and conditions of this Award Agreement or any other Award Agreement where the Firm is the prevailing party, the Firm shall be entitled to recover from you its reasonable attorney fees and expenses incurred in such action or proceeding. In addition, you agree that you are not entitled to, and agree not to seek, advancement of attorney fees and indemnification under the Firm's By-Laws in the event of such a suit by the Firm.

Non-transferability: Neither this award or any other outstanding awards of RSUs, nor your interests or rights in any such awards, shall be assigned, pledged, transferred, hedged, hypothecated or subject to any lien. An award may be transferred following your death by will, the laws of descent or by a beneficiary designation on file with the Firm.

Outstanding Awards: The Administrative provisions set forth above shall apply to any award of RSUs outstanding as of the date hereof, and such awards are hereby amended.

Definitions

"**Cause**" means a determination by the Firm that your employment terminated as a result of your (i) violation of any law, rule or regulation (including rules of self-regulatory bodies) related to the Firm's business, (ii) indictment or conviction of a felony, (iii) commission of a fraudulent act, (iv) violation of the JPMorgan Chase Code of Conduct or other Firm policies or misconduct related to your duties to the Firm (other than immaterial and inadvertent violations or misconduct), (v) grossly inadequate performance of the duties associated with your position or job function or failure to follow reasonable directives of your manager, or (vi) any act or failure to act that is injurious to the interests of the Firm or its relationship with a customer, client or an employee.

"**Financial Services Company**" means a business enterprise that engages in any of the following services (itself or through an affiliate or subsidiary), regardless of whether such services are the principle strategy or revenue-generating activity:

- commercial or retail banking, including, but not limited to, commercial, institutional and personal trust, custody and/or lending and processing services, internet banking, originating and servicing mortgages, issuing and servicing credit cards, payment servicing or processing or merchant services,
- insurance, including but not limited to, guaranteeing against loss, harm, damage, illness, disability or death, providing and issuing annuities, acting as principal, agent or broker for purpose of the forgoing,
- financial, investment or economic advisory services, including but not limited to, investment banking services (such as advising on mergers or dispositions, underwriting, dealing in, or making a market in securities or other

similar activities), brokerage services, investment management services, asset management services, foreign exchange services, interbank networks and hedge funds,

- issuing, trading or selling instruments representing interests in pools of assets or in derivatives instruments,
- financial technology companies, such as those selling blockchain services, or offering or selling financial products/services,
- advising on, or investing in, private equity or real estate funds or ventures, or
- any similar activities that the Director of Human Resources or nominee determines in his or her sole discretion constitute financial services,

- however, subject to disclosure and confirmation of the following, it shall not be considered a "Financial Services Company" for the purpose of this Award Agreement if such family office is solely funded by you and/or your family's own personal funds without external investors directly or indirectly.

"Firmwide Financial Threshold" means a cumulative return on tangible common equity for calendar years 2025, 2026 and 2027 of not less than 15%. Cumulative return on tangible common equity means (i) the sum of the Firm's reported net income for all three calendar years, divided by (ii) reported year-end tangible equity averaged over the three years.

"Government Office" means (i) a full-time position in an elected or appointed office in local, state, or federal government (including equivalent positions outside the U.S. or in a supranational organization), not reasonably anticipated to be a full-career position, or (ii) conducting a bona fide full-time campaign for such an elective public office after formally filing for candidacy, where it is customary and reasonably necessary to campaign full-time for the office.

"Line of Business" means a business unit of the Firm (or one or more business units designated below under the definition "Line of Business Financial Threshold" of the Commercial & Investment Bank). All Corporate Functions (including the functions of the Chief Investment Office) are considered a single Line of Business.

"Line of Business Financial Threshold" means the financial threshold set forth below for the following Lines of Business based on the Firm's management reporting system:

Asset & Wealth Management	Annual negative pre-tax pre-provision income[1]
Card and Auto	Annual negative pre-tax pre-loan loss reserve income[2]
Commercial & Investment Bank	Annual negative pre-tax pre-provision income[1] for CIB overall or annual negative allocated product revenues (excluding XVA) for: • Fixed Income • Equities • Securities Services • Global Investment Banking • Payments
Consumer Banking, J.P. Morgan Wealth Management and Business Banking	Annual negative pre-tax pre-loan loss reserve income[2]
Corporate Functions (including Chief Investment Office)	Annual negative pre-tax pre-provision income[1] at the Firm level
Home Lending	Annual negative pre-tax pre-loan loss reserve income[2]
[1]Pre-tax pre-provision income means Revenue less Expenses [2]Pre-tax pre-loan loss reserve income means Revenue less (Expenses plus Net Charge-offs)	

"Not-for-Profit Organization" means an entity exempt from tax under state law and under Section 501(c)(3) of the Code. Section 501(c)(3) only includes entities organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals. Not-for-Profit Organization shall also mean entities outside the United States exempt from local and national tax laws because they are organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals.

"Recognized Service" means the period of service as an employee set forth in the Firm's applicable service-related policies.

Government Office Requirements

You may be eligible to continue vesting in all or part of your award if you voluntarily resign to accept a Government Office (as defined above) or to become a candidate for an elective Government Office.

Full Career Eligibility:
"Government Office Requirements" does not apply to you if you satisfy the subsection captioned "--Full Career Eligibility" as of the date that you voluntarily terminate your employment with the Firm.

Eligibility:
Eligibility for continued vesting is conditioned on your providing the Firm:

- At least 60 days' advance written notice of your intention to resign to accept or pursue a Government Office (see section captioned "Definitions"), during which period you must perform in a cooperative and professional manner services requested by the Firm and not provide services for any other employer. The Firm may elect to shorten this notice period at the Firm's sole discretion.
- Confirmation, in a form of satisfactory to the firm, that vesting in this award pursuant to this provision would not violate any applicable law, regulation or rule.
- Documentation in a form satisfactory to the Firm that your resignation is for the purpose of accepting a Government Office or becoming a candidate for a Government Office. (See Section captioned "Definitions".)

Portion of Your Awards Subject to Continued Vesting:
Subject to the conditions below, the percentage of your outstanding awards that will continue to vest in accordance with this award's original schedule will be based on your years of continuous service completed with the Firm immediately preceding your termination date, as follows:

- 50% if you have at least 3 but less than 4 years of continuous service,
- 75% if you have at least 4 but less than 5 years of continuous service, or
- 100% if you have 5 or more years of continuous service.

The portion of each award subject to continued vesting above is referred to as the "CV Award" and the portion not subject to continued vesting will be cancelled on the date your employment terminates.

Conditions for Continued Vesting of Awards:

- You must remain in a non-elective Government Office for two or more years after your employment with the Firm terminates to receive in full your CV Award; provided that if your non-elective Government Office is for a period less than two years, you will be entitled to retain any portion of the CV Award with a vesting date during your period of Government Service; or
- In the case of resignation from the Firm to campaign for an elective Government Office, your name must be on the primary or final public ballot for the election. (If you are not elected, see below for employment restrictions.)

Satisfaction of Conditions:
If your service in a Government Office ends two years or more after your employment with the Firm terminates, or in the case of resignation from the Firm to campaign for a Government Office, your name is on the primary or final public ballot for the election and you are not elected, any CV Awards then outstanding and any such awards that would have then been outstanding but for an accelerated distribution of shares (as described in the subsection captioned "Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity") will be subject for the remainder of the applicable vesting period to the same terms and conditions of this Award Agreement, including employment restrictions during the vesting period, as if you had resigned from the Firm having met the requirements for Full Career Eligibility.

Failure to Satisfy Conditions:
If you do not satisfy the above "Conditions for Continued Vesting of Awards", any outstanding RSUs under each CV Award will be cancelled. You also will be required to repay the Fair Market Value of the number of shares (before tax and other withholdings) of Common Stock distributed to you that would have been outstanding as RSUs on the date you failed to satisfy the "Condition for Continued Vesting of Awards" but for their accelerated distribution (as described in the subsection captioned "Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity"). Fair Market Value for this purpose will be determined as the date that the shares were distributed.

JPMORGAN CHASE & CO. LONG-TERM INCENTIVE PLAN
TERMS AND CONDITIONS OF JANUARY 21, 2025
RESTRICTED STOCK UNIT AWARD
OPERATING COMMITTEE

Award Agreement

These terms and conditions are made part of the Award Agreement dated as of January 21, 2025 ("Grant Date") awarding Restricted Stock Units ("RSUs") pursuant to the terms of the JPMorgan Chase & Co. Long-Term Incentive Plan ("Plan"). To the extent the terms of the Award Agreement (all references to which will include these terms and conditions) conflict with the Plan, the Plan will govern. The Award Agreement, the Plan and Prospectus supersede any other agreement, whether written or oral, that may have been entered into by the Firm and you relating to this award.

This award was granted on the Grant Date subject to the Award Agreement. **Unless you decline by the deadline and in the manner specified in the Award Agreement, you will have agreed to be bound by these terms and conditions, effective as of the Grant Date.** If you decline the award, it will be cancelled as of the Grant Date.

Capitalized terms that are not defined in "Definitions" below or elsewhere in the Award Agreement will have the same meaning as set forth in the Plan.

JPMorgan Chase & Co. will be referred to throughout the Award Agreement as "JPMorgan Chase" and together with its subsidiaries as the "Firm".

Form and Purpose of Award

Each RSU represents a non-transferable right to receive one share of Common Stock as of the applicable vesting date as set forth in your Award Agreement.

The purpose of this award is to motivate your future performance for services to be provided during the vesting period and to align your interests with those of the Firm and its shareholders.

Dividend Equivalents

This award is not eligible for dividend equivalent payments.

Vesting Period

The period from the Grant Date to the last vesting date is the "vesting period" (see subsections captioned "--Amendment" pursuant to which the Firm may extend the vesting period and "--No Ownership Rights/Other Limitations" pursuant to which the Firm may place restrictions on delivered shares of Common Stock following a vesting date).

Protection-Based Vesting

This award is intended and expected to vest on the vesting date(s), provided that you are continuously employed by the Firm through such vesting date, or you meet the requirements for continued vesting described under the subsections "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability". However, vesting and the number of RSUs in which you vest are subject to these terms and conditions (including, but not limited to, the section captioned "Remedies" and the following protection-based vesting provision).

Up to a total of fifty percent of your award that would otherwise be distributable to you during the vesting period ("At Risk RSUs") may be cancelled if the Chief Executive Officer of JPMorgan Chase ("CEO") determines in his or her sole discretion that cancellation of all or portion of the At Risk RSUs is appropriate in light of any one or a combination of the following factors:

- Your performance in relation to the priorities for your position, or the Firm's performance in relation to the priorities for which you share responsibility as a member of the Operating Committee, have been unsatisfactory for a sustained period of time. Among the factors the CEO may consider in assessing performance are net income, total net revenue, return on equity, earnings per share and capital ratios of the Firm, both on an absolute basis and, as appropriate, relative to peer firms.
- For any calendar year ending during the vesting period, JPMorgan Chase's annual pre-tax pre-provision income at the Firm level is negative.
- Awards granted to participants in a Line of Business for which you exercise, or during the vesting period exercised, direct or indirect responsibility, were in whole or in part cancelled because the Line of Business did not meet its annual Line of Business Financial Threshold.
- The Firm does not meet the Firmwide Financial Threshold.

In the event that your employment terminates due to “Job Elimination”, ”Full Career Eligibility”, “Government Office” or “Disability” thereby entitling you to continued vesting in your award (or potentially acceleration due to satisfaction of the Government Office Requirements), the cancellation circumstances described above will continue to apply to your At Risk RSUs pursuant to the subsection captioned “Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity”.

Any determination above with respect to protection-based vesting provisions is subject to ratification by the Compensation and Management Development Committee of the Board of Directors of JPMorgan Chase (“Committee”). In the case of an award to the CEO, all such determinations shall be made by the Committee and ratified by the Board.

Holding Requirement

As of each vesting date, you shall be entitled to a distribution equal to the Fair Market Value of the number of RSUs vesting on such date, less the number being withheld to satisfy tax withholding obligations. You agree that the distribution made to you will be held in an account in your name with restrictions preventing you from transferring, assigning, hedging, selling, pledging, or otherwise encumbering such distribution for a twelve-month period commencing with the vesting date. Such restrictions shall lapse in event of your death.

Bonus Recoupment

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Bonus Recoupment Policy (or successor policy) as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 2024 and to this award. You can access this policy as currently in effect by clicking the following link to the JPMorgan Chase & Co. Corporate Governance Principles web page and scrolling to the Bonus Recoupment Policy located under the section titled “Other Matters”:

https://about.jpmorganchase.com/about/governance/corporate-governance-principles

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Bonus Recoupment Policy (or successor policy).

EMEA Malus and Clawback Policy – Identified Staff

In consideration of grant of this award, and without prejudice to any other provision of this Award Agreement, you agree that you are subject to the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff (and any applicable supplement(s) to that policy) or successor policy as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 2024 and to this award. You can access this policy as currently in effect in My Rewards through the following link: https://myrewards.jpmorganchase.com

The provisions of the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff set out the terms and conditions applying to the grant of this award which ensure that the Firm is able to meet its regulatory obligations to operate malus (reduce) and/or clawback (recover) to awards in certain circumstances. These include, but are not limited to, where (i) there is a material downturn in the Firm’s financial performance or (ii) where the Firm is required to hold more capital. The circumstances in which the events at (i) and (ii) would occur are analogous to some of the circumstances considered under the existing Firmwide terms and conditions, in particular the Bonus Recoupment Policy and the Protection Based Vesting provisions.

Termination of Employment

Except as explicitly set forth below under the subsections captioned “--Job Elimination”, “--Full Career Eligibility”, “--Government Office” or “--Disability” or under the section captioned “Death”, any RSUs outstanding under this award will be cancelled effective on the date your employment with the Firm terminates for any reason.

Subject to these terms and conditions (including, but not limited to, sections captioned “Protection-Based Vesting”, “Bonus Recoupment”, “EMEA Malus and Clawback Policy – Identified Staff”, “Your Obligations” and “Remedies”), you will be eligible to continue to vest (as you otherwise would vest if you were still employed by JPMorgan Chase) with respect to your award in accordance with its terms and conditions following the termination of your employment if one of the following circumstances applies to you:

- **Job Elimination**

  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that
  - the Firm terminated your employment because your job was eliminated, and
  - after you are notified that your job will be eliminated, you provided such services as requested by the Firm in a cooperative and professional manner, and

  - you satisfied the Release/Certification Requirements set forth below.

- **Full Career Eligibility**
  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that
  - (i) you voluntarily terminated your employment with the Firm, and (ii) had completed at least five years of Recognized Service (as defined below) on your date of termination with at least three years of continuous service with the Firm immediately preceding your termination date or if you are over 60 years of age with at least three years of continuous service with the Firm immediately preceding your termination date, and
  - your Recognized Service (as defined below) on your date of termination equaled or exceeded 15 years, or your combined Recognized Service with the Firm and external professional experience (as attested by you to the Firm) equaled or exceeded 30 years, and
  - you provided at least 180 days advance written notice to the Firm of your intention to voluntarily terminate your employment under this provision, during which notice period you provided such services as requested by the Firm in a cooperative and professional manner and you did not perform any services for any other employer, and
  - continued vesting shall be appropriate, which determination shall be made prior to your termination and will be based on your performance and conduct (before and after providing notice), and
  - you satisfied the Release/Certification Requirements set forth below, and
  - for 36 months from the date of grant of this award you do not either perform services in any capacity (such as an employee, contractor, consultant, advisor, or self-employed individual, whether paid or unpaid) for a Financial Services Company (as defined below) or work in your profession (whether or not for a Financial Services Company); provided that you may do one or more of the following:
    - work in a government, education or Not-for-Profit Organization (as defined below),
    - subject to disclosure and confirmation of the following, serve on the board of directors of a public or non-public company that is not a Financial Services Company.

  After receipt of such advance written notice, the Firm may choose to have you continue to provide services during such 180-day period as a condition to continued vesting or shorten the length of the 180-day period at the Firm's sole discretion, but to a date no earlier than the date you would otherwise meet the service requirement.

  Additional advance notice requirements may apply for employees subject to notice period policies (see "Notice Period" below).

- **Government Office**
  In the event that you voluntarily terminate your employment with the Firm to accept a Government Office or become a candidate for an elective Government Office, as described at the end of these terms and conditions under the section captioned "Government Office Requirements". See also definition of Government Office in the section captioned "Definitions".

- **Disability**
  In the event that
  - your employment with the Firm terminates because (i) you are unable to return to work while you are receiving benefits under the JPMorgan Chase Long Term Disability Plan, or for non-U.S. employees, under the equivalent JPMorgan Chase sponsored local country plan (in either case, "LTD Plan"), or (ii) if you are not covered by a LTD Plan, you are unable to return to work due to a long-term disability that would qualify for benefits under the applicable LTD Plan, as determined by the Firm or a third party designated by the Firm; provided that you (x) request in writing continued vesting due to such disability within 30 days of the date your employment terminates, and (y) provide any requested supporting documentation and (z) receive the Firm's written consent to such treatment, and
  - you satisfied the Release/Certification Requirements set forth below.

Release/Certification

To qualify for continued vesting after termination of your employment under any of the foregoing circumstances:
- you must timely execute and deliver a release of claims in favor of the Firm, having such form and terms as the Firm shall specify,
- with respect to "Full Career Eligibility", prior to the termination of your employment, you must confirm with management that you meet the eligibility criteria (including providing at least 180 days advance written

notification), advise that you are seeking to be treated as an individual eligible for "Full Career Eligibility", and receive written consent to such continued vesting,
- with respect to "Full Career Eligibility" and "Government Office", it is your responsibility to (i) notify the Firm within 15 days after the date you are no longer in compliance with the employment restrictions (as described herein) or (ii) take the appropriate steps to certify to the Firm prior to each vesting date while the employment restrictions are outstanding, on the authorized form of, and by the due date set by, the Firm, that you have complied with the employment restrictions applicable to you (as described herein) from your date of termination of employment through the applicable vesting date,
- with respect to "Disability", you must satisfy the notice and documentation described above and receive written consent to such continued vesting, and
- in all cases, complied with all other terms of the Award Agreement. (See section captioned "Your Obligations".)

Death
If you die while you are eligible to vest in RSUs under this award, the RSUs will immediately vest and will be distributed in shares of Common Stock (after applicable tax withholding) to your designated beneficiary on file with the Firm's Stock Administration Department, or if no beneficiary has been designated or survives you or if beneficiary designation is not recognized locally, then to your estate unless otherwise required by local legislation. Any shares will be distributed no later than the end of the calendar year immediately following the calendar year which contains your date of death; however, our administrative practice is to register such shares in the name of your beneficiary or estate within 60 days of the Firm's receipt of any required documentation.

Your Obligations
In consideration of the grant of this award, you agree to comply with and be bound by the obligations set forth below next to the subsections captioned "—Confidentiality & Non-Solicitation", "—False Statements", "--Cooperation", "--Compliance with Award Agreement" and "--Notice Period."

- **Confidentiality & Non-Solicitation**

  During your employment by the Firm and for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, you will not directly or indirectly, whether on your own behalf or on behalf of any other party, without the prior written consent of the Director of Human Resources: (A) solicit, induce or encourage any of the Firm's then current employees to leave the Firm or to apply for employment elsewhere, unless such current employee has received official, written notice that his or her employment will be terminated due to job elimination, (B) hire any employee or former employee who was employed by the Firm at the date your employment terminated, unless the individual's employment terminated because his or her job was eliminated, or the individual's employment with the Firm has been terminated for more than six months, (C) to the fullest extent enforceable under applicable law, solicit or induce or attempt to induce to leave the Firm, or divert or attempt to divert from doing business with the Firm, any then current customers, suppliers or other persons or entities that were serviced by you or whose names became known to you by virtue of your employment with the Firm, or otherwise interfere with the relationship between the Firm and such customers, suppliers or other persons or entities. This does not apply to publicly known institutional customers that you service after your employment with the Firm without the use of the Firm's confidential or proprietary information.

  These restrictions do not apply to authorized actions you take in the normal course of your employment with the Firm, such as employment decisions with respect to employees you supervise or business referrals in accordance with the Firm's policies.

  You will not, either during your employment with the Firm or thereafter, directly or indirectly use or disclose to anyone any Confidential Information (as defined herein) related to the Firm's business or its customers except as explicitly permitted by the JPMorgan Chase Code of Conduct and applicable policies or law or legal process. "Confidential Information" includes but is not limited to: (i) information received by the Firm from third parties under confidential conditions; (ii) intellectual property and trade secrets, technical, product, business, financial, or development information from the Firm, the use or disclosure of which reasonably might be construed to be contrary to the interest of the Firm; or (iii) other proprietary information or data, including, but not limited to, customer lists. In addition, following your termination of employment, you will not, without prior written authorization, access the Firm's private and internal information through telephonic, intranet or internet means.

  For Employees with a Work Location in California, you agree that the restrictions in the first paragraph of this "Confidentiality and Non-Solicitation" provision shall not apply to you. However, you agree that, as a condition of receipt of this award, you will not, for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, use "Confidential Information" in order to solicit or otherwise interfere in the relationship between the Firm and any current Firm customers, suppliers, or other persons or entities whose names become known to you by virtue of your employment with the Firm and in connection with your access to Confidential Information.

Nothing in this award precludes you from reporting to the Firm's management or directors, the government, a regulator, a self-regulatory agency, your attorneys, or a court conduct you believe to be in violation of the law or concerns of any known or suspected Code of Conduct violation. It is also not intended to prevent you from responding truthfully to questions or requests from the government, a regulator or in a court of law.

If you are required by law or requested to provide information to any private party, including the news media, related to your or anyone else's employment with the Firm, you will, in advance of providing any response (to the extent lawfully permitted), and within five days of receiving any such legal demand or request, provide written notice to the Firm. Additionally, you agree to cooperate with the Firm in connection with the request for such information to the extent lawfully permitted.

- **False Statements**
  You will not, either during your employment with the Firm or thereafter, make any untrue statements, such that they are made with knowledge of their falsity or with reckless disregard for their truth or falsity, about the Firm, its employees, officers, directors or shareholders as a group in verbal, written, electronic or any other form. This shall not preclude you from reporting to the Firm's management or directors regarding conduct you believe to be in violation of the law or from providing information to or cooperating with any government, regulator or law enforcement agency.

- **Cooperation**
  You will cooperate with any Firm investigation, inquiry, or litigation, and provide full and accurate information to the Firm and its counsel with respect to any matter that relates to issues or events about which you may have knowledge or information, subject to reimbursement for actual, appropriate, and reasonable out-of-pocket expenses incurred by you. This Agreement does not restrict you from communicating with any federal, state, or local government, regulatory, or law enforcement agency or otherwise participating in any investigation or proceeding that may be conducted by any such agency, including providing documents or other information without notice to the Firm.

- **Compliance with Award Agreement**
  You will provide the Firm with any information reasonably requested to determine compliance with the Award Agreement, and you authorize the Firm to disclose the terms of the Award Agreement to any third party who might be affected thereby, including your prospective employer.

- **Notice Period**
  If you are subject to a notice period or become subject to a notice period after the Grant Date, whether by contract or by policy, that requires you to provide advance written notice of your intention to terminate your employment ("Notice Period"), then as consideration for this award and continued employment, you will provide the Firm with the necessary advance written notice that applies to you, as specified by such contract or policy.

  After receipt of your notice, the Firm may choose to have you continue to provide services during the applicable Notice Period or may place you on a paid leave for all or part of the applicable Notice Period. During the Notice Period, you shall continue to devote your full time and loyalty to the Firm by providing services in a cooperative and professional manner and not perform any services for any other employer and shall receive your base salary and certain benefits until your employment terminates. You and the Firm may mutually agree to waive or modify the length of the Notice Period.

  Regardless of whether a Notice Period applies to you, you must comply with the 180-day advance notice period described under the subsection captioned "--Full Career Eligibility" in the event you wish to terminate employment under that same subsection.

Remedies

- **Detrimental Conduct, Risk Related and Other Cancellation/Recapture**
  In addition to the cancellation provisions described under the sections captioned "Protection-Based Vesting", "Bonus Recoupment", "EMEA Malus and Clawback Policy - Identified Staff", and "Termination of Employment", up to 100% of your outstanding RSUs under this award may be cancelled if the Firm in its sole discretion determines that:
  - Any of the following detrimental and risk-related conduct has occurred:

    - you engaged in conduct detrimental to the Firm insofar as it causes material financial or reputational harm to the Firm or its business activities, or
    - this award was based on materially inaccurate performance metrics, whether or not you were responsible for the inaccuracy, or
    - this award was based on a material misrepresentation by you, or
    - you improperly or with gross negligence failed to identify, raise or assess, in a timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the Firm or its business activities, or
    - your employment was terminated for Cause (see section captioned "Definitions" below) or, in the case of a determination after the termination of your employment, that your employment could have been terminated for Cause.
- you have failed to comply with any of the advance notice/cooperation requirements or employment restrictions applicable to your termination of employment, or
- you have failed to return the required forms specified under the section captioned "Release/Certification" by the specified deadline, or
- you have violated any of the provisions as set forth above in the section captioned "Your Obligations".

To the extent provided under the subsection captioned "--Amendment" below, JPMorgan Chase reserves the right to suspend vesting of this award and/or distribution of shares under this award, including, without limitation, during any period that JPMorgan Chase is evaluating whether this award is subject to cancellation and/or recovery and/or whether the conditions for distributions of shares under this award are satisfied. JPMorgan Chase is not responsible for any price fluctuations during any period of suspension and, if applicable, suspended units will be reinstated consistent with Plan administration procedures. See also subsection captioned "--No Ownership Rights/Other Limitations".

- **Recovery**

In addition, you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares of Common Stock previously distributed under this award as follows:

- Payment may be required with respect to any shares distributed within the three-year period prior to a notice-of-recovery under this section, if the Firm in its sole discretion determines that:
    - you committed a fraudulent act, or engaged in knowing and willful misconduct related to your employment, or
    - you violated any of the provisions as set forth above in the section captioned "Your Obligations", or
    - you violated the employment restrictions set forth in the subsection "--Full Career Eligibility" or "--Government Office" following the termination of your employment.
- In addition, payment may be required with respect to any shares distributed within the one-year period prior to notice-of-recovery under this section, if the Firm in its sole discretion determines appropriate as a result of the detrimental and risk-related conduct listed in the above "Detrimental Conduct, Risk Related and Other Cancellation/Recapture" subsection.

Notice-of-recovery under this subsection is a written (including electronic) notice from the Firm to you either requiring payment under this subsection or stating that JPMorgan Chase is evaluating requiring payment under this subsection. Without limiting the foregoing, notice-of-recovery will be deemed provided if the Firm makes a good faith attempt to provide written (including electronic) notice at your last known address maintained in the Firm's employment records. For the avoidance of doubt, a notice-of-recovery that the Firm is evaluating requiring payment under this subsection shall preserve JPMorgan Chase's rights to require payment as set forth above in all respects and the Firm shall be under no obligation to complete its evaluation other than as the Firm may determine in its sole discretion.

For purposes of this subsection, shares distributed under this award include shares withheld for tax purposes. However, it is the Firm's intention that you only be required to pay the amounts under this subsection with respect to shares that are or may be retained by you following a determination of tax liability and that you will not be required to pay amounts with respect to shares representing irrevocable tax withholdings or tax payments previously made (whether by you or the Firm) that you will not be able to recover, recapture or reclaim (including as a tax credit, refund or other benefit). Accordingly, JPMorgan Chase will not require you to pay any amount that the Firm or its nominee in his or her sole discretion determines is represented by such withholdings or tax payments.

Payment may be made in shares of Common Stock or in cash. You agree that any repayment will be a lawful recovery under the terms and conditions of your Award Agreement and is not to be construed in any manner as a penalty.

Nothing in the section in any way limits your obligations under "Bonus Recoupment" and "EMEA Malus and Clawback Policy - Identified Staff".

- **Right to an Injunction**
  You acknowledge that a violation or attempted violation of any of the provisions set forth in "Your Obligations" herein will cause immediate and irreparable damage to the Firm, and therefore agree that the Firm shall be entitled as a matter of right to an injunction, from any court of competent jurisdiction, restraining any violation or further violation of any of the provisions set forth in "Your Obligations"; such right to an injunction, however, shall be cumulative and in addition to whatever other remedies the Firm may have under law or equity.

Administrative Provisions

Withholding Taxes: As a result of legal and/or tax obligations the Firm, in its sole discretion, may (i) retain from each distribution the number of shares of Common Stock required to satisfy applicable tax obligations or (ii) implement any other desirable or necessary procedures, so that appropriate withholding and other taxes are paid to the competent authorities with respect to the vested shares and the award. This may include but is not limited to (i) a market sale of a number of such shares on your behalf substantially equal to the withholding or other taxes, (ii) to the extent required by law, withhold from cash compensation, an amount equal to any withholding obligation with respect to the award and shares that vest under this award, and (iii) retaining shares that vest under this award until you pay any taxes associated with the award and/or vested shares directly to the competent authorities.

Right to Set Off: Although the Firm expects to settle this award in share(s) of Common Stock as of the applicable vesting date, as set forth in your Award Agreement, the Firm may, to the maximum extent permitted by applicable law (including Section 409A of the Code to the extent it is applicable to you), retain for itself funds or the Common Stock resulting from any vesting of this award to satisfy any obligation or debt that you owe to the Firm. Notwithstanding any account agreement with the Firm to the contrary, the Firm will not recoup or recover any amount owed from any funds or unrestricted securities held in your name and maintained at the Firm pursuant to such account agreement to satisfy any obligation or debt owed by you under this award without your consent. This restriction on the Firm does not apply to accounts described and authorized in "No Ownership Rights/Other Limitations" described below.

No Ownership Rights/Other Limitations: RSUs do not convey the rights of ownership of Common Stock and do not carry voting rights. No shares of Common Stock will be issued to you until after the RSUs have vested. Shares will be issued in accordance with JPMorgan Chase's procedures for issuing stock. By accepting this award, you authorize the Firm, in its sole discretion, to establish on your behalf a brokerage account in your name with the Firm or book-entry account with our stock plan administrator and/or transfer agent and deliver to that account any vested shares derived from the award. You also acknowledge that should there be a determination that the cancellation provisions of this award apply during the period when the vesting of any outstanding RSUs has been suspended, then you agree that such RSUs may be cancelled in whole or part. (See Sections captioned "Protection-Based Vesting", "Bonus Recoupment", "EMEA Malus and Clawback Policy - Identified Staff", "Termination of Employment" and "Remedies", as well as the subsection captioned "--Amendment" permitting suspension of vesting.)

With respect to any applicable vesting date, JPMorgan Chase may impose for any reason, as of such vesting date for such period as it may specify in its sole discretion, such restrictions on the Common Stock to be issued to you as it may deem appropriate, including, but not limited to, restricting the sale, transfer, pledging, assignment, hedging or encumbrance of such shares of Common Stock. Such restrictions described in the last sentence shall not impact your right to vote or receive dividends with respect to the Common Stock. By accepting this award, you acknowledge that during such specified period should there be a determination that the recovery provisions of this award apply, then you agree that you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares subject to such restrictions (notwithstanding the limitation set forth in the "Right to Set Off" subsection above). (See Sections captioned "Bonus Recoupment" and "Remedies".)

Binding Agreement: The Award Agreement will be binding upon any successor in interest to JPMorgan Chase, by merger or otherwise.

Not a Contract of Employment: Nothing contained in the Award Agreement constitutes a contract of employment or continued employment. Employment is "at-will" and may be terminated by either you or JPMorgan Chase for any reason at any time. This award does not confer any right or entitlement to, nor does the award impose any obligation on the Firm to provide, the same or any similar award in the future and its value is not compensation for purposes of determining severance.

Section 409A Compliance: To the extent that Section 409A of the Code is applicable to this award, distributions of shares hereunder are intended to comply with Section 409A of the Code, and the Award Agreement, including these terms and conditions, shall be interpreted in a manner consistent with such intent.

Notwithstanding anything herein to the contrary, if you (i) are subject to taxation under the Code, (ii) are a specified employee as defined in the JPMorgan Chase 2005 Deferred Compensation Plan and (iii) have incurred a separation from service (as defined in that Plan with the exception of death) and if any units/shares under this award represent deferred compensation as defined in Section 409A and such shares are distributable (under the terms of this award) within six months following, and as a result of your separation from service, then those shares will be delivered to you during the first calendar month after the expiration of six full months from date of your separation from service. Further, if your award is not subject to a substantial risk of forfeiture as defined by regulations issued under Section 409A of the Code, then the remainder of each calendar year immediately following each applicable vesting date set forth in your Award Agreement shall be a payment date for purposes of distributing the vested portion of the award.

Change in Outstanding Shares: In the event of any change in the outstanding shares of Common Stock by reason of any stock dividend or split, recapitalization, issuance of a new class of common stock, merger, consolidation, spin-off, combination or exchange of shares or other similar corporate change, or any distributions to stockholders of Common Stock other than regular cash dividends, the Committee will make an equitable substitution or proportionate adjustment, in the number or kind of shares of Common Stock or other securities issued or reserved for issuance pursuant to the Plan and to any RSUs outstanding under this award for such corporate events.

Interpretation/Administration: The Committee or its nominee has sole and complete authority to interpret and administer this Award Agreement, including, without limitation, the power to (i) interpret the Plan and the terms of this Award Agreement; (ii) determine the reason for termination of employment; (iii) determine application of the post-employment obligations and cancellation and recovery provisions; (iv) decide all claims arising with respect to this award; and (v) delegate such authority as it deems appropriate. Any determination contemplated hereunder by the Committee, the Firm, the Director of Human Resources or their respective nominees shall be binding on all parties.

Notwithstanding anything herein to the contrary, the determinations of the Director of Human Resources, the Firm, the Committee and their respective nominees under the Plan and the Award Agreements are not required to be uniform. By way of clarification, the Committee, the Firm, the Director of Human Resources and their respective nominees shall be entitled to make non-uniform and selective determinations and modifications under Award Agreements and the Plan.

Amendment: The Committee or its nominee reserves the right to amend this Award Agreement in any manner, at any time and for any reason; provided, however, that no such amendment shall materially adversely affect your rights under this Award Agreement without your consent except to the extent that the Committee or its nominee considers advisable to (x) comply with applicable laws or changes in or interpretation of applicable laws, regulatory requirements and accounting rules or standards and/or (y) make a change in a scheduled vesting date or impose the restrictions described above under "No Ownership Rights/Other Limitations", in either case, to the extent permitted by Section 409A of the Code if it is applicable to you. This Award Agreement may not be amended except in writing signed by the Director of Human Resources of JPMorgan Chase.

Severability: If any portion of the Award Agreement is determined by the Firm to be unenforceable in any jurisdiction, any court or arbitrator of competent jurisdiction or the Director of Human Resources may reform the relevant provisions (e.g., as to length of service, time, geographical area, or scope) to the extent the Firm (or court/arbitrator) considers necessary to make the provision enforceable under applicable law.

Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity: Upon receipt of satisfactory evidence that applicable United States federal, state, local, foreign or supranational ethics or conflict of interest laws or regulations require you to divest your interest in JPMorgan Chase RSUs, the Firm may accelerate the distribution of all or part of your outstanding award effective on or before the required divestiture date; provided that no accelerated distribution shall occur if the Firm determines that such acceleration will violate Section 409A of the Code. Accelerated distribution under this paragraph does not impact the dates as set forth in the "Remedies" section above. The time period for recovery shall be determined by the originally scheduled vesting date or distribution date prior to any acceleration event.

If you have voluntarily terminated your employment and have satisfied the requirements of the section captioned "Government Office Requirements", acceleration shall apply (to extent required) to the percentage of your outstanding award that would continue to vest under that section. In the case of a termination of employment where the award is outstanding as a result of the subsections entitled "--Job Elimination" or "--Full Career Eligibility", then acceleration shall apply, to the extent required, to the full outstanding award.

Notwithstanding accelerated distribution pursuant to the foregoing, you will remain subject to the applicable terms of your Award Agreement as if your award had remained outstanding for the duration of the original vesting period and shares had been distributed as scheduled as of each applicable vesting date, including, but not limited to, repayment obligations set forth in the section captioned "Remedies" and the employment restrictions in the sections captioned "Protection-Based Vesting" and "Government Office Requirements" and the subsection "--Full Career Eligibility".

Use of Personal Data: By accepting this award, you acknowledge that the Firm may process your personal data for the purposes of providing you this award (to include registration of shares and units or establishing a brokerage account on your behalf) and disclosing to third parties, such as service providers or tax and regulatory authorities (e.g., for compensation reporting and payroll tax withholding purposes). Additionally, you agree that the Firm may transfer your personal data to jurisdictions that do not afford protections equivalent to the protections in the country in which we collected your data. Where applicable law provides a right to terminate the foregoing authorization, you may do so at any time, except with respect to tax and regulatory reporting and the Firm's legal and regulatory obligations. In the event you terminate this authorization, your award will be cancelled.

Governing Law: This award shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law principles.

Choice of Forum: By accepting this award under the Plan, you agree (and have agreed) that to the extent not otherwise subject to arbitration under an arbitration agreement between you and the Firm, any dispute arising directly or indirectly in connection with this award or the Plan shall be submitted to arbitration in accordance with the rules of the American Arbitration Association if so elected by the Firm in its sole discretion. In the event such a dispute is not subject to arbitration for any reason, you agree to accept the exclusive jurisdiction and venue of the United States District Court for the Southern District of New York with respect to any judicial proceeding in connection with this award or the Plan. You waive, to the fullest extent permitted by law, any objection to personal jurisdiction or to the laying of venue of such dispute and further agree not to commence any action arising out of or relating to this award or the Plan in any other forum.

Waiver of Jury Trial/Class Claims: By accepting this award, you agree, with respect to any claim brought in connection with your employment with the Firm in any forum (i) to waive the right to a jury trial and (ii) that any judicial proceeding or arbitration claim will be brought on an individual basis, and you hereby waive any right to submit, initiate, or participate in a representative capacity or as a plaintiff, claimant or member in a class action, collective action, or other representative or joint action.

Litigation: By accepting any award under the Plan, you agree (and have agreed) that in any action or proceeding by the Firm (other than a derivative suit in the right of the Firm) to enforce the terms and conditions of this Award Agreement or any other Award Agreement where the Firm is the prevailing party, the Firm shall be entitled to recover from you its reasonable attorney fees and expenses incurred in such action or proceeding. In addition, you agree that you are not entitled to, and agree not to seek, advancement of attorney fees and indemnification under the Firm's By-Laws in the event of such a suit by the Firm.

Non-transferability: Neither this award or any other outstanding awards of RSUs, nor your interests or rights in any such awards, shall be assigned, pledged, transferred, hedged, hypothecated or subject to any lien. An award may be transferred following your death by will, the laws of descent or by a beneficiary designation on file with the Firm.

Outstanding Awards: The Administrative provisions set forth above shall apply to any award of RSUs outstanding as of the date hereof, and such awards are hereby amended.

Definitions

"**Cause**" means a determination by the Firm that your employment terminated as a result of your (i) violation of any law, rule or regulation (including rules of self-regulatory bodies) related to the Firm's business, (ii) indictment or conviction of a felony, (iii) commission of a fraudulent act, (iv) violation of the JPMorgan Chase Code of Conduct or other Firm policies or misconduct related to your duties to the Firm (other than immaterial and inadvertent violations or misconduct), (v) grossly inadequate performance of the duties associated with your position or job function or failure to follow reasonable directives of your manager, or (vi) any act or failure to act that is injurious to the interests of the Firm or its relationship with a customer, client or an employee.

“**Financial Services Company**” means a business enterprise that engages in any of the following services (itself or through an affiliate or subsidiary), regardless of whether such services are the principle strategy or revenue-generating activity:

- commercial or retail banking, including, but not limited to, commercial, institutional and personal trust, custody and/or lending and processing services, internet banking, originating and servicing mortgages, issuing and servicing credit cards, payment servicing or processing or merchant services,
- insurance, including but not limited to, guaranteeing against loss, harm, damage, illness, disability, or death, providing and issuing annuities, acting as principal, agent or broker for purpose of the forgoing,
- financial, investment or economic advisory services, including but not limited to, investment banking services (such as advising on mergers or dispositions, underwriting, dealing in, or making a market in securities or other similar activities), brokerage services, investment management services, asset management services, foreign exchange services, interbank networks, and hedge funds,
- issuing, trading, or selling instruments representing interests in pools of assets or in derivatives instruments,
- financial technology companies, such as those selling blockchain services, or offering or selling financial products/services,
- advising on, or investing in, private equity or real estate funds or ventures, or
- any similar activities that the Director of Human Resources or nominee determines in his or her sole discretion constitute financial services.

- however, subject to disclosure and confirmation of the following, it shall not be considered a “Financial Services Company” for the purpose of this Award Agreement if such family office is solely funded by you and/or your family’s own personal funds without external investors directly or indirectly.

“Firmwide Financial Threshold” means a cumulative return on tangible common equity for calendar years 2025, 2026 and 2027 of not less than 15%. Cumulative return on tangible common equity means (i) the sum of the Firm’s reported net income for all three calendar years, divided by (ii) reported year-end tangible equity averaged over the three years.

“Government Office” means (i) a full-time position in an elected or appointed office in local, state, or federal government (including equivalent positions outside the U.S. or in a supranational organization), not reasonably anticipated to be a full-career position, or (ii) conducting a bona fide full-time campaign for such an elective public office after formally filing for candidacy, where it is customary and reasonably necessary to campaign full-time for the office.

“Line of Business” means a business unit of the Firm (or one or more business units designated below under the definition “Line of Business Financial Threshold” of the Commercial & Investment Bank). All Corporate Functions (including the functions of the Chief Investment Office) are considered a single Line of Business.

“Line of Business Financial Threshold” means the financial threshold set forth below for the following Lines of Business based on the Firm’s management reporting system:

Asset & Wealth Management	Annual negative pre-tax pre-provision income[1]
Card and Auto	Annual negative pre-tax pre-loan loss reserve income[2]
Commercial & Investment Bank	Annual negative pre-tax pre-provision income[1] for CIB overall or annual negative allocated product revenues (excluding XVA) for: • Fixed Income • Equities • Securities Services • Global Investment Banking • Payments
Consumer Banking, J.P. Morgan Wealth Management and Business Banking	Annual negative pre-tax pre-loan loss reserve income[2]
Corporate Functions (including Chief Investment Office)	Annual negative pre-tax pre-provision income[1] at the Firm level
Home Lending	Annual negative pre-tax pre-loan loss reserve income[2]
[1]Pre-tax pre-provision income means Revenue less Expenses [2]Pre-tax pre-loan loss reserve income means Revenue less (Expenses plus Net Charge-offs)	

“Not-for-Profit Organization” means an entity exempt from tax under state law and under Section 501(c)(3) of the Code. Section 501(c)(3) only includes entities organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals. Not-for-Profit Organization shall also mean entities outside the United States exempt from local and national tax laws because they are organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals.

"Recognized Service" means the period of service as an employee set forth in the Firm's applicable service-related policies.

Government Office Requirements

You may be eligible to continue vesting in all or part of your award if you voluntarily resign to accept a Government Office (as defined above) or to become a candidate for an elective Government Office.

Full Career Eligibility:
"Government Office Requirements" does not apply to you if you satisfy the subsection captioned "--Full Career Eligibility" as of the date that you voluntarily terminate your employment with the Firm.

Eligibility:
Eligibility for continued vesting is conditioned on your providing the Firm:

- At least 60 days' advance written notice of your intention to resign to accept or pursue a Government Office (see section captioned "Definitions"), during which period you must perform in a cooperative and professional manner services requested by the Firm and not provide services for any other employer. The Firm may elect to shorten this notice period at the Firm's sole discretion.
- Confirmation, in a form of satisfactory to the firm, that vesting in this award pursuant to this provision would not violate any applicable law, regulation or rule.
- Documentation in a form satisfactory to the Firm that your resignation is for the purpose of accepting a Government Office or becoming a candidate for a Government Office. (See Section captioned "Definitions".)

Portion of Your Awards Subject to Continued Vesting:
Subject to the conditions below, the percentage of your outstanding awards that will continue to vest in accordance with this award's original schedule will be based on your years of continuous service completed with the Firm immediately preceding your termination date, as follows:

- 50% if you have at least 3 but less than 4 years of continuous service,
- 75% if you have at least 4 but less than 5 years of continuous service, or
- 100% if you have 5 or more years of continuous service.

The portion of each award subject to continued vesting above is referred to as the "CV Award" and the portion not subject to continued vesting will be cancelled on the date your employment terminates.

Conditions for Continued Vesting of Awards:

- You must remain in a non-elective Government Office for two or more years after your employment with the Firm terminates to receive in full your CV Award; provided that if your non-elective Government Office is for a period less than two years, you will be entitled to retain any portion of the CV Award with a vesting date during your period of Government Service; or
- In the case of resignation from the Firm to campaign for an elective Government Office, your name must be on the primary or final public ballot for the election. (If you are not elected, see below for employment restrictions.)

Satisfaction of Conditions:
If your service in a Government Office ends two years or more after your employment with the Firm terminates, or in the case of resignation from the Firm to campaign for a Government Office, your name is on the primary or final public ballot for the election and you are not elected, any CV Awards then outstanding and any such awards that would have then been outstanding but for an accelerated distribution of shares (as described in the subsection captioned "Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity") will be subject for the remainder of the applicable vesting period to the same terms and conditions of this Award Agreement, including employment restrictions during the vesting period, as if you had resigned from the Firm having met the requirements for Full Career Eligibility.

Failure to Satisfy Conditions:

If you do not satisfy the above “Conditions for Continued Vesting of Awards”, any outstanding RSUs under each CV Award will be cancelled. You also will be required to repay the Fair Market Value of the number of shares (before tax and other withholdings) of Common Stock distributed to you that would have been outstanding as RSUs on the date you failed to satisfy the “Condition for Continued Vesting of Awards” but for their accelerated distribution (as described in the subsection captioned “Accelerated Distribution for Ethics or Conflict Reasons Resulting from Employment by a Government Entity”). Fair Market Value for this purpose will be determined as the date that the shares were distributed.

JPMORGAN CHASE & CO. LONG-TERM INCENTIVE PLAN
TERMS AND CONDITIONS OF ________________, 20___

PERFORMANCE SHARE UNIT AWARD

OPERATING COMMITTEE

(Protection-Based Vesting Provisions)

Award Agreement

These terms and conditions are made part of the Award Agreement dated as of ___________________ ("Grant Date") awarding performance share units ("PSUs") pursuant to the terms of the JPMorgan Chase & Co. Long-Term Incentive Plan ("Plan"). To the extent the terms of the Award Agreement (all references to which will include these terms and conditions) conflict with the Plan, the Plan will govern. The Award Agreement, the Plan and Prospectus supersede any other agreement, whether written or oral, that may have been entered into by the Firm and you relating to this award.

This award was granted on the Grant Date subject to the Award Agreement and Plan. **Unless you decline by the deadline and in the manner specified in the Award Agreement, you will have agreed to be bound by these terms and conditions, effective as of the Grant Date.** If you decline the award, it will be cancelled as of the Grant Date.

Capitalized terms that are not defined in "Definitions" below or elsewhere in the Award Agreement will have the same meaning as set forth in the Plan.

JPMorgan Chase & Co. will be referred to throughout the Award Agreement as "JPMorgan Chase", and together with its subsidiaries as the "Firm".

Form and Purpose of Award

Each PSU represents a non-transferable right to receive one share of Common Stock as of the vesting date as set forth in your Award Agreement.
The purpose of this award is to further emphasize sustained long-term performance and to align your interests with those of the Firm and its shareholders.

Number to Vest on the Vesting Date

Subject to any cancellation in whole or part of your award pursuant to these terms and conditions:

Performance calculation: On the vesting date set forth in your Award Agreement, you will vest in a number of PSUs derived by multiplying the Target Award Number by the Award Payout Percentage determined using the Performance Table. See sections captioned "Calculation of Performance Ranking" and "Definitions".

You will also vest in additional shares of Common Stock as calculated under the section captioned, "Reinvested Dividend Equivalent Share Units". Delivery of vested shares to your account will be made not later than the date specified in the last sentence of the subsection captioned "Section 409A Compliance".

Reinvested Dividend Equivalent Share Units

If dividends are paid on Common Stock during the Vesting Period while the award is outstanding, you will receive on the vesting date additional units representing shares of Common Stock as calculated in this section. The number, if any, will be based on the dividends that would have been paid during the Vesting Period as of each dividend payment date on the actual number of shares of Common Stock distributable to you resulting from the vesting of the PSUs, if any, and treated as reinvested in additional shares of Common Stock on each dividend payment based on the Fair Market Value of one share of Common Stock on each dividend payment date ("Reinvested Dividend Equivalent Share Units").

Holding Requirement

As of the vesting date set forth in your Award Agreement, you shall be entitled to be issued a number of shares of the Common Stock of JPMorgan Chase equal to the number of PSUs, if any, plus any additional Reinvested Dividend Equivalent Share Units, vesting on such date, less the number withheld to satisfy tax withholding obligations. The net number of shares issued to you will be held in an account in your name with restrictions preventing you from transferring, assigning, hedging, selling, pledging, or otherwise encumbering such shares for a two-year period commencing as of the vesting date and ending as of the second anniversary of the vesting date. Such restrictions shall only lapse, prior to the expiration of the two-year holding period, in the event of your death or for an accelerated distribution for ethics or conflict reasons. See section captioned, "Death" and subsection captioned, "Accelerated Distribution for Ethics or Conflict Reasons Resulting from Employment by a Government Entity".

Calculation of Performance Ranking

For purposes of the Performance Ranking, the ranking of the Firm and of each Performance Company for the Performance Period shall be determined and calculated by the Calculation Agent, using the definitions of "Average Tangible Common Equity" (if otherwise applicable), "Calculated PSUs", "Firm Reported ROTCE", "Performance Table" and "ROTCE" as set forth in the "Definitions" section of these terms and conditions. See section captioned "Definitions". Except for Firm's externally published Reported ROTCE, calculations will be expressed as a decimal to the second place (i.e. xx.yy%), rounded to the nearest hundredth. See section captioned, "Definitions--Performance Table" in the event of a tie. All performance-based calculations as set forth herein are binding and conclusive on you and your successors.

Capital Ratio Performance Threshold

Unvested PSUs are subject to reduction if the Firm's Common Equity Tier 1 (CET1) capital ratio at any year end falls below a predetermined threshold of _______%.

If the Firm's CET1 capital ratio at any year end during the Performance Period is below this predetermined threshold, up to one-third of the Target Award Number of PSUs will be subject to downward adjustment by the Compensation & Management Development Committee of the Board of Directors of JPMorgan Chase ("Committee") for each such year.

Vesting Period

The period from the Grant Date to the vesting date is the "Vesting Period". (See "Administrative Provision--Amendment" pursuant to which the Firm may extend the vesting period and "No Ownership Rights/Other Limitations" pursuant to which the Firm may place restrictions on delivered shares of Common Stock following the vesting date and section captioned, "Holding Period" above.)

Protection-Based Vesting

This award is intended and expected to vest on the vesting date, provided that you are continuously employed by the Firm through such vesting date, or you meet the requirements for continued vesting described under the subsections "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability". However, vesting and the number of PSUs that will vest are subject to these terms and conditions (including, but not limited to, sections captioned "Number to Vest on the Vesting Date", "Capital Ratio Performance Threshold", "Remedies", and the following protection-based vesting provision).

Up to a total of fifty percent of your award (including any associated Reinvested Dividend Equivalent Share Units) that would otherwise be distributable to you on the vesting date ("At Risk PSUs") may be cancelled if the Chief Executive Officer of JPMorgan Chase ("CEO") determines in his or her sole discretion that cancellation of all or portion of the At Risk PSUs is appropriate in light of any one or a combination of the following factors:

- Your performance in relation to the priorities for your position, or the Firm's performance in relation to the priorities for which you share responsibility as a member of the Operating Committee, have been unsatisfactory for a sustained period of time. Among the factors the CEO may consider in assessing performance are: net income, total net revenue, earnings per share and capital ratios of the Firm, both on an absolute basis and, as appropriate, relative to peer firms.
- For any calendar year ending during the vesting period, JPMorgan Chase's annual pre-tax pre-provision income at the Firm level is negative.
- RSU awards granted to participants in a Line of Business for which you exercise, or during the vesting period exercised, direct or indirect responsibility, were in whole or in part cancelled because the Line of Business did not meet its annual Line of Business Financial Threshold.
- The Firm does not meet the Firmwide Financial Threshold.

For avoidance of doubt, cancellation of the At Risk PSUs, in whole or part, for one or more of the above factors may occur prior to the end of the Performance Period and the maximum number of At Risk PSUs subject to cancellation prior to the end of the Performance Period will be up to fifty percent of the Target Award Number.

In the event that your employment terminates due to "Job Elimination", "Full Career Eligibility", "Government Office" or "Disability" thereby entitling you to continued vesting in your award, (or potentially acceleration due to satisfaction of the Government Office Requirements), the cancellation circumstances described above will continue to apply.

Any determination above with respect to protection-based vesting provisions is subject to ratification by the Committee. In the case of an award to any current or former CEO, all such determinations shall be made by the Committee and ratified by the Board.

Bonus Recoupment

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Bonus Recoupment Policy (or successor policy) as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 20XX and to this award. You can access this policy as currently in effect by clicking the following link to the JPMorgan Chase & Co. Corporate Governance Principles web page and scrolling to the Bonus Recoupment Policy located under the section titled "Other Matters":

https://about.jpmorganchase.com/about/governance/corporate-governance-principles

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Bonus Recoupment Policy (or successor policy).

Recovery of Erroneously Awarded Incentive-Based Compensation

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Policy for the Recovery of Erroneously Awarded Incentive-Based Compensation (or successor policy) as in effect from time to time as it applies to this award. You can access this policy as currently in effect by clicking the following link to the Firmwide Policy & Standard Portal, or alternatively typing go/dogma then searching for the Policy for the Recovery of Erroneously Awarded Incentive-Based Compensation.

Firmwide Policy & Standard Portal > Recovery of Erroneously Awarded Incentive-Based Compensation Policy

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Policy for the Recovery of Erroneously Awarded Incentive-Based Compensation (or successor policy).

Termination of Employment

Except as explicitly set forth below under the subsections captioned "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability" or under the section captioned "Death", this award (for avoidance of doubt, including any associated Reinvested Dividend Equivalent Share Units) will be cancelled in full effective on the date your employment with the Firm terminates for any reason.

Subject to these terms and conditions (including, but not limited to, sections captioned "Protection-Based Vesting", "Number to Vest on the Vesting Date", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation", "Your Obligations" and "Remedies") you will be eligible to continue to vest (as you otherwise would vest if you were still employed by JPMorgan Chase) with respect to your award in accordance with its terms and conditions following the termination of your employment if one of the following circumstances applies to you:

- **Job Elimination**

  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that

  - the Firm terminated your employment because your job was eliminated, and
  - after you are notified that your job will be eliminated, you provided such services as requested by the Firm in a cooperative and professional manner, and
  - you satisfied the Release/Certification Requirements set forth below.

- **Full Career Eligibility**

  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that

  - (i) you voluntarily terminated your employment with the Firm, and (ii) had completed at least five years of Recognized Service (as defined below) on your date of termination with at least three years of continuous service with the Firm immediately preceding your termination date or if you are over 60 years of age with at least three years of continuous service with the Firm immediately preceding your termination date, and
  - the sum of your age and Recognized Service (as defined below) on your date of termination equaled or exceeded 60 and
  - you provided at least 180 days advance written notice to the Firm of your intention to voluntarily terminate your employment under this provision, during which notice period you provided such services as requested by the Firm in a cooperative and professional manner and you did not perform any services for any other employer, and
  - continued vesting shall be appropriate, which determination shall be made prior to your termination and will be based on your performance and conduct (before and after providing notice), and
  - you satisfied the Release/Certification Requirements set forth below, and

- for 36 months from the date of grant of this award you do not either perform services in any capacity (such as an employee, contractor, consultant, advisor, or self-employed individual, whether paid or unpaid) for a Financial Services Company (as defined below) or work in your profession (whether or not for a Financial Services Company); provided that you may do one or more of the following:
    - work in a government, education or Not-for-Profit Organization (as defined below),
    - subject to disclosure and confirmation of the following, serve on the board of directors of a public or non-public company that is not a Financial Services Company.

After receipt of such advance written notice, the Firm may choose to have you continue to provide services during such 180-day period as a condition to continued vesting or shorten the length of the 180-day period at the Firm's sole discretion, but to a date no earlier than the date you would otherwise meet the age and service requirements.

Additional advance notice requirements may apply for employees subject to notice period policies (see "Notice Period" below.)

- **Government Office**

  In the event that you voluntarily terminate your employment with the Firm to accept a Government Office or become a candidate for an elective Government Office, as described at the end of these terms and conditions under the section captioned "Government Office Requirements". See also definition of Government Office in the section captioned "Definitions".

- **Disability**

  In the event that

  - your employment with the Firm terminates because (i) you are unable to return to work while you are receiving benefits under the JPMorgan Chase Long Term Disability Plan, or for non-U.S. employees, under the equivalent JPMorgan Chase-sponsored local country plan (in either case, "LTD Plan"), or (ii) if you are not covered by a LTD Plan, you are unable to return to work due to a long-term disability that would qualify for benefits under the applicable LTD Plan, as determined by the Firm or a third party designated by the Firm; provided that you (x) request in writing continued vesting due to such disability within 30 days of the date your employment terminates, and (y) provide any requested supporting documentation and (z) receive the Firm's written consent to such treatment, and
  - you satisfied the Release/Certification Requirements set forth below.

Release/Certification

To qualify for continued vesting after termination of your employment under any of the foregoing circumstances:

- you must timely execute and deliver a release of claims in favor of the Firm, having such form and terms as the Firm shall specify,
- with respect to "Full Career Eligibility", prior to the termination of your employment, you must confirm with management that you meet the eligibility criteria (including providing at least 180 days advance written notification), advise that you are seeking to be treated as an individual eligible for Full Career Eligibility, and receive written consent to such continued vesting,
- with respect to "Full Career Eligibility" and "Government Office", it is your responsibility to (i) notify the Firm within 15 days after the date you are no longer in compliance with the employment restrictions (as described herein) or (ii) take the appropriate steps to certify to the Firm prior to the vesting date while the employment restrictions are outstanding, on the authorized form of, and by the due date set by, the Firm that you have complied with the employment restrictions applicable to you (as described herein) from your date of termination of employment through the applicable vesting date,
- with respect to "Disability", you must satisfy the notice and documentation described above and receive written consent to such continued vesting, and
- in all cases, otherwise complied with all other terms of the Award Agreement. (See section captioned "Your Obligations" below.)

Death

If you die while you are eligible to vest in this award, your designated beneficiary on file with the Firm's Stock Administration Department, or if no beneficiary has been designated or survives you or if beneficiary designation is not recognized locally, then to your estate unless otherwise required by local legislation, may be entitled to receive a distribution of a number of shares of Common Stock associated with your award. The Award Payout Percentage in the case of death is based on the "Number to Vest on the Vesting Date" calculation described above using the average performance of all completed calendar years, multiplied by one-third of the Target Award Number of PSUs for each completed calendar year in the Performance Period, and using the Award Payout Percentage equal to 100 percent for any remaining calendar years in the Performance Period.

In addition, your beneficiary or your estate shall receive additional shares of Common Stock, i.e., Reinvested Dividend Equivalent Share Units, as set forth in the section captioned, "Reinvested Dividend Equivalent Share Units" but based on dividend equivalents up to the date of your death.

Any shares will be distributed no later than the end of the calendar year immediately following the calendar year which contains your date of death; however, our administrative practice is to register such shares in the name of your beneficiary or estate within 60 days of the Firm's receipt of any required documentation.

Your Obligations

In consideration of the grant of this award, you agree to comply with and be bound by the obligations set forth below next to the subsections captioned "--Confidentiality & Non-Solicitation", "--False Statements", "--Cooperation", "--Compliance with Award Agreement", and "--Notice Period".

- **Confidentiality & Non-Solicitation**
  During your employment by the Firm and for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, you will not directly or indirectly, whether on your own behalf or on behalf of any other party, without the prior written consent of the Director of Human Resources: (A) solicit, induce or encourage any of the Firm's then current employees to leave the Firm or to apply for employment elsewhere, unless such current employee has received official, written notice that his or her employment will be terminated due to job elimination, (B) hire any employee or former employee who was employed by the Firm at the date your employment terminated, unless the individual's employment terminated because his or her job was eliminated, or the individual's employment with the Firm has been terminated for more than six months, (C) to the fullest extent enforceable under applicable law, solicit or induce or attempt to induce to leave the Firm, or divert or attempt to divert from doing business with the Firm, any then current customers, suppliers or other persons or entities that were serviced by you or whose names became known to you by virtue of your employment with the Firm, or otherwise interfere with the relationship between the Firm and such customers, suppliers or other persons or entities. This does not apply to publicly known institutional customers that you service after your employment with the Firm without the use of the Firm's confidential or proprietary information.

  These restrictions do not apply to authorized actions you take in the normal course of your employment with the Firm, such as employment decisions with respect to employees you supervise or business referrals in accordance with the Firm's policies.

  You will not, either during your employment with the Firm or thereafter, directly or indirectly use or disclose to anyone any Confidential Information (as defined herein) related to the Firm's business or its customers except as explicitly permitted by the JPMorgan Chase Code of Conduct and applicable policies or law or legal process. "Confidential Information" includes but is not limited to: (i) information received by the Firm from third parties under confidential conditions; (ii) intellectual property and trade secrets, technical, product, business, financial, or development information from the Firm, the use or disclosure of which reasonably might be construed to be contrary to the interest of the Firm; or (iii) other proprietary information or data, including, but not limited to, customer lists. In addition, following your termination of employment, you will not, without prior written authorization, access the Firm's private and internal information through telephonic, intranet or internet means.

  For Employees with a Work location in California, you agree that the restrictions in the first paragraph of the "Confidentiality and Non-Solicitation" provision shall not apply to you. However, you agree that, as a condition of receipt of this award, you will not, for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, use "Confidential Information" in order to solicit or otherwise interfere in the relationship between the Firm and any current Firm customers, suppliers, or other persons or entities whose names become known to you by virtue of your employment with the Firm and in connection with your access to Confidential Information.

  Nothing in this award precludes you from reporting to the Firm's management or directors, the government, a regulator, a self-regulatory agency, your attorneys, or a court, conduct you believe to be in violation of the law or concerns of any known or suspected Code of Conduct violation. It is also not intended to prevent you from responding truthfully to questions or requests from the government, a regulator or in a court of law.

If you are required by law or requested to provide information to any private party, including the news media, related to your or anyone else's employment with the Firm, you will, in advance of providing any response (to the extent lawfully permitted), and within five days of receiving any such legal demand or request, provide written notice to the Firm. Additionally, you agree to cooperate with the Firm in connection with the request for such information to the extent lawfully permitted.

- **False Statements**
  You will not, either during your employment with the Firm or thereafter, make any untrue statements, such that they are made with knowledge of their falsity or with reckless disregard for their truth or falsity, about the Firm, its employees, officers, directors or shareholders as a group in verbal, written, electronic or any other form. This shall not preclude you from reporting to the Firm's management or directors regarding conduct you believe to be in violation of the law or from providing information to or cooperating with any government, regulator or law enforcement agency.

- **Cooperation**
  You will cooperate with any Firm investigation, inquiry, or litigation, and provide full and accurate information to the Firm and its counsel with respect to any matter that relates to issues or events about which you may have knowledge or information, subject to reimbursement for actual, appropriate, and reasonable out-of-pocket expenses incurred by you. This Agreement does not restrict you from communicating with any federal, state, or local government, regulatory, or law enforcement agency or otherwise participating in any investigation or proceeding that may be conducted by any such agency, including providing documents or other information without notice to the Firm.

- **Compliance with Award Agreement**
  You will provide the Firm with any information reasonably requested to determine compliance with the Award Agreement, and you authorize the Firm to disclose the terms of the Award Agreement to any third party who might be affected thereby, including your prospective employer.

- **Notice Period**
  If you are subject to a notice period or become subject to a notice period after the Grant Date, whether by contract or by policy, that requires you to provide advance written notice of your intention to terminate your employment ("Notice Period"), then as consideration for this award and continued employment, you will provide the Firm with the necessary advance written notice that applies to you, as specified by such contract or policy.

  After receipt of your notice, the Firm may choose to have you continue to provide services during the applicable Notice Period or may place you on a paid leave for all or part of the applicable Notice Period. During the Notice Period, you shall continue to devote your full time and loyalty to the Firm by providing services in a cooperative and professional manner and not perform any services for any other employer and shall receive your base salary and certain benefits until your employment terminates. You and the Firm may mutually agree to waive or modify the length of the Notice Period.

  Regardless of whether a Notice Period applies to you, you must comply with the 180-day advance notice period described under the subsection captioned "-- Full Career Eligibility" in the event you wish to terminate employment under that same subsection.

Remedies

- **Detrimental Conduct, Risk Related and Other Cancellation/Recapture**

  In addition to the cancellation provisions described under the sections captioned "Protection-Based Vesting", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation" and "Termination of Employment", up to 100% of your outstanding PSUs under this award (for the avoidance of doubt, including any associated Reinvested Dividend Equivalent Share Units as well as the Calculated PSUs) may be cancelled if the Firm in its sole discretion determines that:

  - Any of the following detrimental and risk-related conduct has occurred:
    - you engaged in conduct detrimental to the Firm insofar as it causes material financial or reputational harm to the Firm or its business activities, or
    - this award was based on materially inaccurate performance metrics, whether or not you were responsible for the inaccuracy, or
    - this award was based on a material misrepresentation by you, or

    - you improperly or with gross negligence failed to identify, raise or assess, in a timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the Firm or its business activities, or
    - your employment was terminated for Cause (see section captioned "Definitions" below) or, in the case of a determination after the termination of your employment, that your employment could have been terminated for Cause.
- you have failed to comply with any of the advance notice/cooperation requirements or employment restrictions applicable to your termination of employment, or
- you have failed to return the required forms specified under the section captioned "Release/Certification" by the specified deadline, or
- you have violated any of the provisions as set forth above in the section captioned "Your Obligations".

To the extent provided under the subsection captioned "--Amendment" below, JPMorgan Chase reserves the right to suspend vesting of this award and/or distribution of shares under this award, including, without limitation, during any period that JPMorgan Chase is evaluating whether this award is subject to cancellation and/or recovery and/or whether the conditions for distributions of shares under this award are satisfied. The Firm is not responsible for any price fluctuations during any period of suspension and, if applicable, suspended units will be reinstated consistent with Plan administration procedures. See also "Administrative Provisions—No Ownership Rights/Other Limitations".

In addition, you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date or acceleration date) of the gross number of shares previously distributed, including vested shares subject to the Holding Requirements, under this award as follows:
- Payment may be required with respect to any shares of Common Stock distributed within the three-year period prior to a notice-of-recovery under this section, if the Firm in its sole discretion determines that:
  - you committed a fraudulent act, or engaged in knowing and willful misconduct related to your employment;
  - you violated any of the provisions as set forth above in the section captioned "Your Obligations;" or
  - you violated the employment restrictions set forth in the subsection "Full Career Eligibility" or "Government Office" following the termination of your employment.
- In addition, payment may be required with respect to any shares distributed within the one year period prior to notice-of-recovery under this section, if the Firm in its sole discretion determines appropriate as a result of the detrimental and risk-related conduct listed in the above "Detrimental Conduct, Risk Related and Other Cancellation/Recapture" subsection.

Notice-of-recovery under this subsection is a written (including electronic) notice from the Firm to you either requiring payment under this subsection or stating that JPMorgan Chase is evaluating requiring payment under this subsection. Without limiting the foregoing, notice-of-recovery will be deemed provided if the Firm makes a good faith attempt to provide written (including electronic) notice at your last known address maintained in the Firm's employment records. For the avoidance of doubt, a notice-of-recovery that the Firm is evaluating requiring payment under this subsection shall preserve JPMorgan Chase's rights to require payment as set forth above in all respects and the Firm shall be under no obligation to complete its evaluation other than as the Firm may determine in its sole discretion.

For purposes of this subsection, shares distributed under this award include shares withheld for tax purposes. However, it is the Firm's intention that you only be required to pay the amounts under this subsection with respect to shares that are or may be retained by you following a determination of tax liability and that you will not be required to pay amounts with respect to shares representing irrevocable tax withholdings or tax payments previously made (whether by you or the Firm) that you will not be able to recover, recapture or reclaim (including as a tax credit, refund or other benefit). Accordingly, JPMorgan Chase will not require you to pay any amount that the Firm or its nominee in his or her sole discretion determines is represented by such withholdings or tax payments.

Payment may be made in shares of Common Stock or in cash. You agree that any repayment will be a lawful recovery under the terms and conditions of your Award Agreement and is not to be construed in any manner as a penalty.

Nothing in the section in any way limits your obligations under "Bonus Recoupment" or "Recovery of Erroneously Awarded Incentive-Based Compensation".

- **Right to an Injunction**

You acknowledge that a violation or attempted violation of any of the provisions set forth in "Your Obligations" herein will cause immediate and irreparable damage to the Firm, and therefore agree that the Firm shall be entitled as a matter of right to an injunction, from any court of competent jurisdiction, restraining any violation or further violation of any of the provisions set forth in "Your Obligations"; such right to an injunction, however, shall be cumulative and in addition to whatever other remedies the Firm may have under law or equity.

Administrative Provisions

Withholding Taxes: As a result of legal and/or tax obligations the Firm, in its sole discretion, may (i) retain from each distribution the number of shares of Common Stock required to satisfy applicable tax obligations or (ii) implement any other desirable or necessary procedures, so that appropriate withholding and other taxes are paid to the competent authorities with respect to the vested shares and the award. This may include but is not limited to (i) a market sale of a number of such shares on your behalf substantially equal to the withholding or other taxes, (ii) to the extent required by law, withhold from cash compensation, an amount equal to any withholding obligation with respect to the award and shares that vest under this award, and (iii) retaining shares that vest under this award until you pay any taxes associated with the award and vested shares directly to the competent authorities.

Right to Set Off: Although the Firm expects to settle this award in share(s) of Common Stock as of the applicable vesting date, as set forth in your Award Agreement, the Firm may, to the maximum extent permitted by applicable law (including Section 409A of the Code to the extent it is applicable to you), retain for itself funds or the Common Stock resulting from any vesting of this award to satisfy any obligation or debt that you owe to the Firm. Notwithstanding any account agreement with the Firm to the contrary, the Firm will not recoup or recover any amount owed from any funds or unrestricted securities held in your name and maintained at the Firm pursuant to such account agreement to satisfy any obligation or debt or obligation owed by you under this award without your consent. This restriction on the Firm does not apply to accounts described and authorized in "No Ownership Rights/Other Limitations" described below.

No Ownership Rights/Other Limitations: PSUs do not convey the rights of ownership of Common Stock and do not carry voting rights. No shares of Common Stock will be issued to you until after the number of PSUs have been determined, if any, and have vested. Shares will be issued in accordance with JPMorgan Chase's procedures for issuing stock. By accepting this award, you authorize the Firm, in its sole discretion, to establish on your behalf a brokerage account in your name with the Firm or book-entry account with our stock plan administrator and/or transfer agent and deliver to that account any vested shares derived from the award. You also acknowledge that should there be a determination that the cancellation provisions of this award apply during the period when the vesting of any outstanding PSUs has been suspended, then you agree that such PSUs may be cancelled in whole or part. (See Sections captioned "Protection-Based Vesting", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation", "Termination of Employment" and "Remedies", as well as the subsection captioned "—Amendment" permitting suspension of vesting.)

With respect to any applicable vesting date, JPMorgan Chase may impose for any reason, as of such vesting date for such period as it may specify in its sole discretion, such restrictions on the Common Stock to be issued to you as it may deem appropriate, including, but not limited to, restricting the sale, transfer, pledging, assignment, hedging or encumbrance of such shares of Common Stock. Such restrictions described in the last sentence shall not impact your right to vote or receive dividends with respect to the Common Stock. By accepting this award, you acknowledge that during such specified period should there be a determination that the recovery provisions of this award apply, then you agree that you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares subject to such restrictions (notwithstanding the limitation set forth in the "Right to Set Off" subsection above). (See sections captioned "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation" and "Remedies".)

Binding Agreement: The Award Agreement will be binding upon any successor in interest to JPMorgan Chase, by merger or otherwise.

Not a Contract of Employment: Nothing contained in the Award Agreement constitutes a contract of employment or continued employment. Employment is "at-will" and may be terminated by either you or JPMorgan Chase for any reason at any time. This award does not confer any right or entitlement to, nor does the award impose any obligation on the Firm to provide, the same or any similar award in the future and its value is not compensation for purposes of determining severance.

Section 409A Compliance: To the extent that Section 409A of the Code is applicable to this award, distributions of shares hereunder are intended to comply with Section 409A of the Code, and the Award Agreement, including these terms and conditions, shall be interpreted in a manner consistent with such intent.

Notwithstanding anything herein to the contrary, if you (i) are subject to taxation under the Code, (ii) are a specified employee as defined in the JPMorgan Chase 2005 Deferred Compensation Plan and (iii) have incurred a separation from service (as defined in that Plan with the exception of death) and if any units/shares under this award represent deferred compensation as defined in Section 409A and such shares are distributable (under the terms of this award) within six months following, and as a result of your separation from service, then those shares will be delivered during the first calendar month after the expiration of six full months from date of your separation from service. Further, if your award is not subject to a substantial risk of forfeiture as defined by regulations issued under Section 409A of the Code, then the remainder of each calendar year immediately following the vesting date set forth in your Award Agreement shall be a payment date for purposes of distributing the vested portion of the award.

Change in Outstanding Shares: In the event of any change in the outstanding shares of Common Stock by reason of any stock dividend or split, recapitalization, issuance of a new class of common stock, merger, consolidation, spin-off, combination or exchange of shares or other similar corporate change, or any distributions to stockholders of Common Stock other than regular cash dividends, the Committee will make an equitable substitution or proportionate adjustment, in the number or kind of shares of Common Stock or other securities issued or reserved for issuance pursuant to the Plan and to any PSUs outstanding under this award for such corporate events.

Other Equitable Adjustments: The Committee may make adjustments (up or down) to the award as it deems to be equitable, to maintain the intended economics of the award in light of changed circumstances, which may include unusual or non-recurring events affecting the Firm (or the Performance Companies) or its financial statements in each case resulting from changes in accounting methods, practices or policies, changes in capital structure by reason of legal or regulatory requirements and such other changed circumstances, as the Committee may deem appropriate.

Interpretation/Administration: The Committee or its nominee has sole and complete authority to interpret and administer this Award Agreement, including, without limitation, the power to (i) interpret the Plan and the terms of this Award Agreement; (ii) determine the reason for termination of employment; (iii) determine application of the post-employment obligations and cancellation and recovery provisions; (iv) decide all claims arising with respect to this award; and (v) delegate such authority as it deems appropriate. Any determination contemplated hereunder by the Committee, the Firm, the Director of Human Resources or their respective nominees shall be binding on all parties.

Notwithstanding anything herein to the contrary, the determinations of the Director of Human Resources, the Firm, the Committee and their respective nominees under the Plan and the Award Agreements are not required to be uniform. By way of clarification, the Committee, the Firm, the Director of Human Resources and their respective nominees shall be entitled to make non-uniform and selective determinations and modifications under Award Agreements and the Plan.

Amendment: The Committee or its nominee reserves the right to amend this Award Agreement in any manner, at any time and for any reason; provided, however, that no such amendment shall materially adversely affect your rights under this Award Agreement without your consent except to the extent that the Committee or its nominee considers advisable to (x) comply with applicable laws or changes in or interpretation of applicable laws, regulatory requirements and accounting rules or standards and/or (y) make a change in a scheduled vesting date or impose the restrictions described above under "No Ownership Rights/Other Limitations", in either case, to the extent permitted by Section 409A of the Code if it is applicable to you. This Award Agreement may not be amended except in writing signed by the Director of Human Resources of JPMorgan Chase.

Severability: If any portion of the Award Agreement is determined by the Firm to be unenforceable in any jurisdiction, any court or arbitrator of competent jurisdiction or the Director of Human Resources may reform the relevant provisions (e.g., as to length of service, time, geographical area, or scope) to the extent the Firm (or court/arbitrator) considers necessary to make the provision enforceable under applicable law.

Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity: Upon receipt of satisfactory evidence that applicable United States federal, state, local, foreign or supranational ethics or conflict of interest laws or regulations require you to divest your interest in JPMorgan Chase PSUs, the Firm may accelerate the distribution of all or part of your outstanding award, including Reinvested Dividend Equivalent Share Units, effective on or before the required divestiture date and waive the Holding Requirement; provided that no accelerated distribution shall occur if the Firm determines that such acceleration will violate Section 409A of the Code. Accelerated distribution under this paragraph does not impact the dates as set forth in the "Remedies" section above. The time period for recovery shall be determined by the originally scheduled vesting date or distribution date prior to any acceleration event.

If you have voluntarily terminated your employment and have satisfied the requirements of the section captioned "Government Office Requirements", acceleration shall apply (to extent required) to the percentage of your outstanding award that would continue to vest under that section. In the case of a termination of employment where the award is outstanding as a result of the subsections entitled "Job Elimination" or "Full Career Eligibility", then acceleration shall apply, to the extent required, to the full outstanding award. Subject to the two foregoing sections, the number of shares of

Common Stock to be received on acceleration shall be determined using the methodology set forth under the section captioned "Death".

To the extent you have vested shares under this award subject to the Holding Requirement and become subject to divestiture requirement as forth herein, the Firm may waive the holding period to the extent required.

Notwithstanding an accelerated distribution or waiver of the Holding Requirement pursuant to the foregoing, you will remain subject to the applicable terms of your Award Agreement as if your award had remained outstanding for the duration of the original vesting period and shares had been distributed as scheduled as of the vesting date, including, but not limited to, repayment obligations set forth in the section captioned "Remedies" and the employment restrictions in the sections captioned "Protection-Based Vesting" and "Government Office Requirements" and the subsection "Full Career Eligibility".

Use of Personal Data: By accepting this award, you acknowledge that the Firm may process your personal data for the purposes of providing you this award (to include registration of shares and units or establishing a brokerage account on your behalf) and disclosing to third parties, such as service providers or tax and regulatory authorities (e.g., for compensation reporting and payroll tax withholding purposes). Additionally, you agree that the Firm may transfer your personal data to jurisdictions that do not afford protections equivalent to the protections in the country in which we collected your data. Where applicable law provides a right to terminate the foregoing authorization, you may do so at any time, except with respect to tax and regulatory reporting and the Firm's legal and regulatory obligations. In the event you terminate this authorization, your award will be cancelled.

Governing Law: This award shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law principles.

Choice of Forum: By accepting this award under the Plan, you agree (and have agreed) that to the extent not otherwise subject to arbitration under an arbitration agreement between you and the Firm, any dispute arising directly or indirectly in connection with this award or the Plan shall be submitted to arbitration in accordance with the rules of the American Arbitration Association if so elected by the Firm in its sole discretion. In the event such a dispute is not subject to arbitration for any reason, you agree to accept the exclusive jurisdiction and venue of the United States District Court for the Southern District of New York with respect to any judicial proceeding in connection with this award or the Plan. You waive, to the fullest extent permitted by law, any objection to personal jurisdiction or to the laying of venue of such dispute and further agree not to commence any action arising out of or relating to this award or the Plan in any other forum.

Waiver of Jury Trial/Class Claims: By accepting this award, you agree, with respect to any claim brought in connection with your employment with the Firm in any forum (i) to waive the right to a jury trial and (ii) that any judicial proceeding or arbitration claim will be brought on an individual basis, and you hereby waive any right to submit, initiate, or participate in a representative capacity or as a plaintiff, claimant or member in a class action, collective action, or other representative or joint action.

Litigation: By accepting any award under the Plan, you agree (and have agreed) that in any action or proceeding by the Firm (other than a derivative suit in the right of the Firm) to enforce the terms and conditions of this Award Agreement or any other Award Agreement where the Firm is the prevailing party, the Firm shall be entitled to recover from you its reasonable attorney fees and expenses incurred in such action or proceeding. In addition, you agree that you are not entitled to, and agree not to seek, advancement of attorney fees and indemnification under the Firm's By-Laws in the event of such a suit by the Firm.

Non-transferability: Neither this award or any other outstanding awards of restricted stock units or of performance-based share units, nor your interests or rights in any such awards, shall be assigned, pledged, transferred, hedged, hypothecated or subject to any lien. An award may be transferred following your death by will, the laws of descent or by a beneficiary designation on file with the Firm.

Definitions

"Average Tangible Common Equity" means annual average common stockholders' equity less annual average goodwill and annual average identifiable intangible assets. Annual averages of the components of Average Tangible Common Equity will be calculated using quarterly balances as reported in publicly available financial disclosures. In the event that quarterly balances are not available, annual year end balances will be used. This calculation is used solely for purposes of the Performance Ranking.

"Award Payout Percentage" means the applicable percentage specified in the Performance Table.

"Calculated PSUs" means the number of PSUs determined by multiplying the Target Award Number (after giving effect to any cancellation thereof, in whole or in part) by the Award Payout Percentage corresponding to the Firm's Performance Ranking based on the three-year average performance for the Performance Period (both percentage and ranking, as set forth in the Performance Table); provided that if the average of the Firm's Reported ROTCE, expressed as a decimal rounded to the nearest hundredth, for the Performance Period either equals or exceeds ______% or is less than ______%, ______ percent or _______, respectively as the case may be, shall be substituted for the Performance Period's Award Payout Percentage in calculating the number of PSUs to distribute. For avoidance of doubt, any cancellation of this award (in whole or in part) during the Performance Period will reduce the Target Award Number.

"Calculation Agent" means a third party entity not owned or controlled by the Firm, such as an accounting or consulting firm, retained from time to time by the Director of Human Resources or his/her delegate.

"Cause" means a determination by the Firm that your employment terminated as a result of your (i) violation of any law, rule or regulation (including rules of self-regulatory bodies) related to the Firm's business, (ii) indictment or conviction of a felony, (iii) commission of a fraudulent act, (iv) violation of the JPMorgan Chase Code of Conduct or other Firm policies or misconduct related to your duties to the Firm (other than immaterial and inadvertent violations or misconduct), (v) grossly inadequate performance of the duties associated with your position or job function or failure to follow reasonable directives of your manager, or (vi) any act or failure to act that is injurious to the interests of the Firm or its relationship with a customer, client or an employee.

"Financial Services Company" means a business enterprise that engages in any of the following services (itself or through an affiliate or subsidiary), regardless of whether such services are the principle strategy or revenue-generating activity:

- commercial or retail banking, including, but not limited to, commercial, institutional and personal trust, custody and/or lending and processing services, internet banking, originating and servicing mortgages, issuing and servicing credit cards, payment servicing or processing or merchant services,
- insurance, including but not limited to, guaranteeing against loss, harm, damage, illness, disability, or death, providing and issuing annuities, acting as principal, agent or broker for purpose of the forgoing,
- financial, investment or economic advisory services, including but not limited to, investment banking services (such as advising on mergers or dispositions, underwriting, dealing in, or making a market in securities or other similar activities), brokerage services, investment management services, asset management services, foreign exchange services, interbank networks and hedge funds,
- issuing, trading or selling instruments representing interests in pools of assets or in derivatives instruments,
- financial technology companies, such as those selling blockchain services, or offering or selling financial products/ services,
- advising on, or investing in, private equity or real estate funds or ventures, or
- any similar activities that the Director of Human Resources or nominee determines in his or her sole discretion constitute financial services,
- however, subject to disclosure and confirmation of the following, it shall not be considered a "Financial Services Company" for the purpose of this Award Agreement if such family office is solely funded by you and/or your family's own personal funds without external investors directly or indirectly.

"Firm Reported ROTCE" means the Firm's percentage return on tangible common equity for each year in the Performance Period.

"Firmwide Financial Threshold" means a cumulative return on tangible common equity for calendar years 20XX, 20XX and 20XX of not less than _______%. Cumulative return on tangible common equity means (i) the sum of the Firm's reported net income for all three calendar years, divided by (ii) reported year-end tangible equity averaged over the three years.

"Government Office" means (i) a full-time position in an elected or appointed office in local, state, or federal government (including equivalent positions outside the U.S. or in a supranational organization), not reasonably anticipated to be a full-career position, or (ii) conducting a bona fide full-time campaign for such an elective public office after formally filing for candidacy, where it is customary and reasonably necessary to campaign full-time for the office.

"Line of Business" means a business unit of the Firm (or one or more business units designated below under the definition "Line of Business Financial Threshold" of the Commercial & Investment Bank). All Corporate Functions (including the functions of the Chief Investment Office) are considered a single Line of Business.

"Line of Business Financial Threshold" means the financial threshold set forth below: for the following Lines of Business based on the Firm's management reporting system:

Asset & Wealth Management	Annual negative pre-tax pre-provision income[1]
Card and Auto	Annual negative pre-tax pre-loan loss reserve income[2]
Commercial & Investment Bank	Annual negative pre-tax pre-provision income[1] for CIB overall or annual negative allocated product revenues (excluding XVA) for: • Fixed Income • Equities • Securities Services • Global Investment Banking • Payments
Consumer Banking, J.P. Morgan Wealth Management and Business Banking	Annual negative pre-tax pre-loan loss reserve income[2]
Corporate Functions (including Chief Investment Office)	Annual negative pre-tax pre-provision income[1] at the Firm level
Home Lending	Annual negative pre-tax pre-loan loss reserve income[2]
[1]Pre-tax pre-provision income means Revenue less Expenses [2]Pre-tax pre-loan loss reserve income means Revenue less (Expenses plus Net Charge-offs)	

"Not-for-Profit Organization" means an entity exempt from tax under state law and under Section 501(c)(3) of the Code. Section 501(c)(3) only includes entities organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals. Not-for-Profit Organization shall also mean entities outside the United States exempt from local and national tax laws because they are organized and operated exclusively for purposes identical to those applicable to Section 501(c)(3) organization.

"Performance Companies" mean the following institutions which have business activities that overlap with a significant portion of the Firm's revenue mix: ____, and ________________.

If, during the Performance Period, one or more Performance Companies shall merge, engage in a spin-off or otherwise experience a material change in its revenue mix or business activities or its existence or its primary businesses shall terminate or cease due to receivership, bankruptcy, sale, or otherwise, then the Committee may eliminate such institution from the list of Performance Companies or make such other equitable adjustments, such as adding an acquirer or a new company to the list of Performance Companies, as it deems appropriate, with any such changes having effect for purposes of all calculations hereunder on a prospective basis from the date the applicable change is made.

"Performance Period" means calendar years 20XX, 20XX and 20XX.

"Performance Ranking" means the ranking of the average ROTCE of the Firm as compared to the ranking of the average ROTCE of the Performance Companies as specified in the Performance Table for the Performance Period.

"Performance Table" means the table used in the calculation of PSUs for the Performance Period as set forth below:

Firm Reported ROTCE (average performance)	Award Payout Percentage
>=________%	______%
______% to ______%	Pay by relative ROTCE scale
<______%	_____%

Firm Performance Ranking (average performance)	Award Payout Percentage
#1	_______%
#2	_______%
#3	_______%
#4	_______%
#5	_______%
#6	_______%
#7	_______%
#8	_______%
#9	_______%
#10 +	_______%

If, after the calculation of the Performance Ranking, there is a tie, the tie shall be disregarded for purposes of determining the Award Payout Percentage. For example, in the case of a tie for the fourth ranking between the Firm and a Performance Company, the Firm shall be treated as having satisfied that ranking. In the case of that same tie among Performance Companies, the fourth and fifth rankings will be deemed to have been satisfied.

"Recognized Service" means the period of service as an employee set forth in the Firm's applicable service-related policies.

"ROTCE" means for the Firm and each of the Performance Companies a percentage derived by, for each year in the Performance Period, dividing (i) annual earnings from continuing operations less dividends on preferred stock as set forth in published financial disclosures by (ii) the Average Tangible Common Equity for the year**.** If, prior to the end of the vesting period, the Firm or any Performance Company restates its published financial statements for any year in the Performance Period, ROTCE for that year shall be recalculated for the Firm or Performance Company with the Performance Ranking adjusted, if necessary. This calculation is used solely for purposes of the Performance Ranking.

"Target Award Number" means the number of PSUs designated as such in the Award Agreement.

Government Office Requirements

You may be eligible to continue vesting in all or part of your award if you voluntarily resign to accept a Government Office (as defined above) or to become a candidate for an elective Government Office.

Full Career Eligibility:
"Government Office Requirements" does not apply to you if you satisfy the subsection captioned "--Full Career Eligibility" as of the date that you voluntarily terminate your employment with the Firm.

Eligibility:
Eligibility for continued vesting is conditioned on your providing the Firm:

- At least 60 days' advance written notice of your intention to resign to accept or pursue a Government Office (see section captioned "Definitions"), during which period you must perform in a cooperative and professional manner services requested by the Firm and not provide services for any other employer. The Firm may elect to shorten this notice period at the Firm's sole discretion.
- Confirmation, in a form satisfactory to the Firm, that vesting in this award pursuant to this provision would not violate any applicable law, regulation or rule.
- Documentation in a form satisfactory to the Firm that your resignation is for the purpose of accepting a Government Office or becoming a candidate for a Government Office. (See section captioned "Definitions".)

Portion of Your Award Subject to Continued Vesting:
Subject to the conditions below, the percentage of this award that will continue to vest in accordance with this award's original schedule will be based on your years of continuous service completed with the Firm immediately preceding your termination date, as follows:

- 50% if you have at least 3 but less than 4 years of continuous service,
- 75% if you have at least 4 but less than 5 years of continuous service, or
- 100% if you have 5 or more years of continuous service.

The portion of this award subject to continued vesting above is referred to as the “CV Award” and the portion not subject to continued vesting will be cancelled as of the date your employment terminates.

Conditions for Continued Vesting of Award:

- You must remain in a non-elective Government Office for two or more years after your employment with the Firm terminates to be eligible to receive the CV Award; provided that if your non-elective Government Office is for a period less than two years, you will be eligible to receive the CV Award if it has a vesting date during your period of Government Service; or
- In the case of resignation from the Firm to campaign for an elective Government Office, your name must be on the primary or final public ballot for the election. (If you are not elected, see below for employment restrictions.)

For avoidance of doubt, the performance criteria and protection-based vesting set forth in these terms and conditions continue to apply to a CV Award.

Satisfaction of Conditions:

If your service in a Government Office ends two years or more after your employment with the Firm terminates, or in the case of resignation from the Firm to campaign for a Government Office, your name is on the primary or final public ballot for the election and you are not elected, any CV Awards then outstanding and any such awards that would have then been outstanding but for an accelerated distribution of shares (as described in the subsection captioned “--Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity”) will be subject for the remainder of the applicable vesting period to the same terms and conditions of this Award Agreement, including employment restrictions during the vesting period, as if you had resigned from the Firm having met the requirements for Full Career Eligibility.

Failure to Satisfy Conditions:

If you do not satisfy the above “Conditions for Continued Vesting of Awards”, any outstanding PSUs under the CV Award will be cancelled. You also will be required to repay the Fair Market Value of the number of shares (before tax and other withholdings) of Common Stock distributed to you that would have been outstanding as PSUs on the date you failed to satisfy the “Conditions for Continued Vesting of Award” but for their accelerated distribution (as described in subsection captioned, “Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity”). Fair Market Value for this purpose will be determined as the date that the shares were distributed.

JPMORGAN CHASE & CO. LONG-TERM INCENTIVE PLAN
TERMS AND CONDITIONS OF ________________, 20___
PERFORMANCE SHARE UNIT AWARD
OPERATING COMMITTEE
(Protection-Based Vesting Provisions)

Award Agreement

These terms and conditions are made part of the Award Agreement dated as of ___________________ ("Grant Date") awarding performance share units ("PSUs") pursuant to the terms of the JPMorgan Chase & Co. Long-Term Incentive Plan ("Plan"). To the extent the terms of the Award Agreement (all references to which will include these terms and conditions) conflict with the Plan, the Plan will govern. The Award Agreement, the Plan and Prospectus supersede any other agreement, whether written or oral, that may have been entered into by the Firm and you relating to this award.

This award was granted on the Grant Date subject to the Award Agreement and Plan. **Unless you decline by the deadline and in the manner specified in the Award Agreement, you will have agreed to be bound by these terms and conditions, effective as of the Grant Date.** If you decline the award, it will be cancelled as of the Grant Date.

Capitalized terms that are not defined in "Definitions" below or elsewhere in the Award Agreement will have the same meaning as set forth in the Plan.

JPMorgan Chase & Co. will be referred to throughout the Award Agreement as "JPMorgan Chase", and together with its subsidiaries as the "Firm".

Form and Purpose of Award

Each PSU represents a non-transferable right to receive one share of Common Stock following each vesting date as set forth in your Award Agreement.

The purpose of this award is to further emphasize sustained long-term performance and to align your interests with those of the Firm and its shareholders.

Number of Performance Share Units at End of Performance Period

Subject to any cancellation in whole or part of your award pursuant to these terms and conditions:

Performance calculation: The number of PSUs at the end of the Performance Period will be derived by multiplying the Target Award Number by the Award Payout Percentage determined using the Performance Table.

The number of PSUs determined above will be subject to the Qualitative Performance Factor (as detailed below), which if the Committee determines that such an adjustment is appropriate, will be applied following the end of each year during the Performance Period, to adjust downward one-third of the Target Award Number of PSUs for each calendar year in the Performance Period. Additionally, the Committee, in its discretion, may make a qualitative performance assessment based on the entire three-year Performance Period and apply the Qualitative Performance Factor to the entire number of PSUs determined above.

See sections captioned "Calculation of Performance Ranking" and "Definitions".

Delivery of vested shares of common stock to your account will be made not later than the date specified in the last sentence of the subsection captioned "Section 409A Compliance".

Reinvested Dividend Equivalent Share Units

This award is not eligible for reinvested dividend equivalent share units.

Holding Requirement

The net number of shares of Common Stock (after tax and all other lawful withholdings) in which you have vested, if any, as of the vesting date set forth in your Award Agreement will be held in an account in your name with restrictions preventing you from transferring, assigning, hedging, selling, pledging or otherwise encumbering such shares for (i) a twelve month period measured from each vesting date; and (ii) a two-year period for such shares vesting on ______________, with the holding periods running concurrently. Such restrictions shall only lapse, prior to the expiration of the two-year holding period, in the event of your death or for an accelerated distribution for ethics or conflict reasons. See section captioned, "Death" and subsection captioned, "Accelerated Distribution for Ethics or Conflict Reasons Resulting from Employment by a Government Entity".

Calculation of Performance Ranking

For purposes of the Performance Ranking, the ranking of the Firm and of each Performance Company for the Performance Period shall be determined and calculated by the Calculation Agent, using the definitions of "Average Tangible Common Equity" (if otherwise applicable), "Calculated PSUs", "Firm Reported ROTCE", "Performance Table" and "ROTCE" as set forth in the "Definitions" section of these terms and conditions. See section captioned "Definitions". Except for Firm's externally published Reported ROTCE, calculations will be expressed as a decimal to the second place (i.e. xx.yy%), rounded to the nearest hundredth. See section captioned, "Definitions--Performance Table" in the event of a tie. All performance-based calculations as set forth herein are binding and conclusive on you and your successors.

Capital Ratio Performance Threshold

Unvested PSUs are subject to reduction if the Firm's Common Equity Tier 1 (CET1) capital ratio at any year end falls below a predetermined threshold of ______%.

If the Firm's CET1 capital ratio at any year end during the Performance Period is below this predetermined threshold, up to one-third of the Target Award Number of PSUs will be subject to downward adjustment by the Compensation & Management Development Committee of the Board of Directors of JPMorgan Chase ("Committee") for each such year.

Qualitative Performance

Determination of Qualitative Performance Factor. Annually during the Performance Period, the Committee will formally assess your qualitative performance based on four broad categories: (1) Client/Customer Focus; (2) Risk, Controls & Conduct; (3) Teamwork & Leadership; and (4) Business Results. If the Committee determines that your performance "Meets" expectations, no downward adjustment to one-third of the Target Award Number of PSUs for that year shall take place (and the Qualitative Performance Factor shall be 100%). If the Committee determines that your performance did "Not Meet" expectations, the Committee shall determine whether a downward adjustment is appropriate, and if so, to what extent. A downward adjustment could result in a Qualitative Performance Factor of between 0% and 99%, depending on the circumstances. During the Performance Period, a 0% Performance Factor for each year in the Performance Period would reduce your Target Award Number of PSUs to zero, resulting in the cancellation of award with no shares vesting.

Additionally, the Committee may, in its sole discretion, make such assessment of your qualitative performance based on your performance during the entire three-year Performance Period and apply the Qualitative Performance Factor to the entire number of PSUs determined under section captioned "Number of Performance Share Units at the end of the Performance Period". In the case of a Qualitative Performance Factor of 0%, the award would be cancelled.

The assessment will have regard to feedback solicited from the Chair of the UK Remuneration Committee to incorporate qualitative performance against local regulatory responsibilities as a "Senior Manager" of the relevant UK-regulated entities.

The Qualitative Performance Factor shall only be applied, if applicable, in respect of a period of your employment with the Firm, or as soon as administratively practical.

Protection-Based Vesting

This award is intended and expected to vest on each vesting date set forth in your Award Agreement, provided that you are continuously employed by the Firm through such vesting date, or you meet the requirements for continued vesting described under the subsections "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability". However, vesting and the number of PSUs that will vest are subject to these terms and conditions (including, but not limited to, sections captioned "Number of Performance Share Units at End of Performance Period", "Capital Ratio Performance Threshold", "Remedies", and the following protection-based vesting provision).

Up to a total of fifty percent of your award that would otherwise be distributable to you as of any vesting date ("At Risk PSUs") may be cancelled if the Chief Executive Officer of JPMorgan Chase ("CEO") determines in his or her sole discretion that cancellation of all or portion of the At Risk PSUs is appropriate in light of any one or a combination of the following factors:

- Your performance in relation to the priorities for your position, or the Firm's performance in relation to the priorities for which you share responsibility as a member of the Operating Committee, have been unsatisfactory for a sustained period of time. Among the factors the CEO may consider in assessing performance are: net income, total net revenue, earnings per share and capital ratios of the Firm, both on an absolute basis and, as appropriate, relative to peer firms.
- For any calendar year ending during the vesting period, JPMorgan Chase's annual pre-tax pre-provision income at the Firm level is negative.

- RSU awards granted to participants in a Line of Business for which you exercise, or during the vesting period exercised, direct or indirect responsibility, were in whole or in part cancelled because the Line of Business did not meet its annual Line of Business Financial Threshold.
- The Firm does not meet the Firmwide Financial Threshold.

For avoidance of doubt, cancellation of the At Risk PSUs, in whole or part, for one or more of the above factors may occur prior to the end of the Performance Period and the maximum number of At Risk PSUs subject to cancellation prior to the end of the Performance Period will be up to fifty percent of the Target Award Number.

In the event that your employment terminates due to "Job Elimination", "Full Career Eligibility", "Government Office" or "Disability" thereby entitling you to continued vesting in your award, (or potentially acceleration due to satisfaction of the Government Office Requirements), the cancellation circumstances described above will continue to apply.

Any determination above with respect to protection-based vesting provisions is subject to ratification by the Committee. In the case of an award to any current or former CEO, all such determinations shall be made by the Committee and ratified by the Board.

Bonus Recoupment

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Bonus Recoupment Policy (or successor policy) as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 20______ and to this award. You can access this policy as currently in effect by clicking the following link to the JPMorgan Chase & Co. Corporate Governance Principles web page and scrolling to the Bonus Recoupment Policy located under the section titled "Other Matters":

https://about.jpmorganchase.com/about/governance/corporate-governance-principles

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Bonus Recoupment Policy (or successor policy).

Recovery of Erroneously Awarded Incentive-Based Compensation

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Recovery of Erroneously Awarded Incentive-Based Compensation Policy (or successor policy) as in effect from time to time as it applies to this award. You can access this policy as currently in effect by clicking the following link to the Firmwide Policy & Standard Portal, or alternatively typing go/dogma then searching for the Recovery of Erroneously Awarded Incentive-Based Compensation Policy.
Firmwide Policy & Standard Portal > Recovery of Erroneously Awarded Incentive-Based Compensation Policy

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Recovery of Erroneously Awarded Incentive-Based Compensation Policy (or successor policy).

EMEA Malus and Clawback Policy - Identified Staff

In consideration of grant of this award, and without prejudice to any other provision of this Award Agreement, you agree that you are subject to the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff (and any applicable supplement(s) to that policy) or successor policy as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year ______ and to this award.

The provisions of the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff set out the terms and conditions applying to the grant of this award which ensure that the Firm is able to meet its regulatory obligations to operate malus (reduce) and/or clawback (recover) to awards in certain circumstances. These include, but are not limited to, where (i) there is a material downturn in the Firm's financial performance or (ii) where the Firm is required to hold more capital. The circumstances in which the events at (i) and (ii) would occur are analogous to some of the circumstances considered under the existing Firmwide terms and conditions, in particular the Bonus Recoupment Policy and the Protection Based Vesting provisions. You can access this policy as currently in effect in My Rewards through the following link: https://myrewards.jpmorganchase.com

Termination of Employment

Except as explicitly set forth below under the subsections captioned "--Job Elimination", "--Full Career Eligibility", "--Government Office" or "--Disability" or under the section captioned "Death", this award will be cancelled in full effective on the date your employment with the Firm terminates for any reason.

Subject to these terms and conditions (including, but not limited to, sections captioned "Protection-Based Vesting", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation", "EMEA Malus and Clawback Policy – Identified Staff", "Your Obligations" and "Remedies") you will be eligible to continue to vest (as you otherwise would vest if you were still employed by JPMorgan Chase) with respect to your award in accordance with its terms and conditions following the termination of your employment if one of the following circumstances applies to you:

- **Job Elimination**

  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that

  - the Firm terminated your employment because your job was eliminated, and
  - after you are notified that your job will be eliminated, you provided such services as requested by the Firm in a cooperative and professional manner, and
  - you satisfied the Release/Certification Requirements set forth below.

- **Full Career Eligibility**

  In the event that the Director of Human Resources or nominee in his or her sole discretion determines that

  - (i) you voluntarily terminated your employment with the Firm, and (ii) had completed at least five years of Recognized Service (as defined below) on your date of termination with at least three years of continuous service with the Firm immediately preceding your termination date or if you are over 60 years of age with at least three years of continuous service with the Firm immediately preceding your termination date, and
  - the sum of your age and Recognized Service (as defined below) on your date of termination equaled or exceeded 60 and
  - you provided at least 180 days advance written notice to the Firm of your intention to voluntarily terminate your employment under this provision, during which notice period you provided such services as requested by the Firm in a cooperative and professional manner and you did not perform any services for any other employer, and
  - continued vesting shall be appropriate, which determination shall be made prior to your termination and will be based on your performance and conduct (before and after providing notice), and
  - you satisfied the Release/Certification Requirements set forth below, and
  - for 36 months from the date of grant of this award you do not either perform services in any capacity (such as an employee, contractor, consultant, advisor, or self-employed individual, whether paid or unpaid) for a Financial Services Company (as defined below) or work in your profession (whether or not for a Financial Services Company); provided that you may do one or more of the following:
    - work in a government, education or Not-for-Profit Organization (as defined below),
    - subject to disclosure and confirmation of the following, serve on the board of directors of a public or non-public company that is not a Financial Services Company.

  After receipt of such advance written notice, the Firm may choose to have you continue to provide services during such 180-day period as a condition to continued vesting or shorten the length of the 180-day period at the Firm's sole discretion, but to a date no earlier than the date you would otherwise meet the age and service requirements.

  Additional advance notice requirements may apply for employees subject to notice period policies (see "Notice Period" below.)

- **Government Office**

  In the event that you voluntarily terminate your employment with the Firm to accept a Government Office or become a candidate for an elective Government Office, as described at the end of these terms and conditions under the section captioned "Government Office Requirements". See also definition of Government Office in the section captioned "Definitions".

- **Disability**

  In the event that

- your employment with the Firm terminates because (i) you are unable to return to work while you are receiving benefits under the JPMorgan Chase Long Term Disability Plan, or for non-U.S. employees, under the equivalent JPMorgan Chase-sponsored local country plan (in either case, "LTD Plan"), or (ii) if you are not covered by a LTD Plan, you are unable to return to work due to a long-term disability that would qualify for benefits under the applicable LTD Plan, as determined by the Firm or a third party designated by the Firm; provided that you (x) request in writing continued vesting due to such disability within 30 days of the date your employment terminates, and (y) provide any requested supporting documentation and (z) receive the Firm's written consent to such treatment, and
- you satisfied the Release/Certification Requirements set forth below.

Release/Certification

To qualify for continued vesting after termination of your employment under any of the foregoing circumstances:

- you must timely execute and deliver a release of claims in favor of the Firm, having such form and terms as the Firm shall specify,
- with respect to "Full Career Eligibility", prior to the termination of your employment, you must confirm with management that you meet the eligibility criteria (including providing at least 180 days advance written notification), advise that you are seeking to be treated as an individual eligible for Full Career Eligibility, and receive written consent to such continued vesting,
- with respect to "Full Career Eligibility" and "Government Office", it is your responsibility to (i) notify the Firm within 15 days after the date you are no longer in compliance with the employment restrictions (as described herein) or (ii) take the appropriate steps to certify to the Firm prior to each vesting date while the employment restrictions are outstanding, on the authorized form of, and by the due date set by, the Firm that you have complied with the employment restrictions applicable to you (as described herein) from your date of termination of employment through the applicable vesting date,
- with respect to "Disability", you must satisfy the notice and documentation described above and receive written consent to such continued vesting, and
- in all cases, otherwise complied with all other terms of the Award Agreement. (See section captioned "Your Obligations" below.)

Death

If you die while you are eligible to vest in this award, your designated beneficiary on file with the Firm's Stock Administration Department (or your estate or if no beneficiary has been designated or survives you or if beneficiary designation is not recognized locally) may be entitled to receive a distribution of a number of shares of Common Stock associated with your award.

Should you die after the end of the Performance Period, your beneficiary will receive shares of Common Stock equal to any outstanding PSUs.

Should you die during the Performance Period, your Beneficiary will receive shares of Common Stock based on the average performance of all completed calendar years, multiplied by one-third of the Target Award Number of PSUs for each completed calendar year in the Performance Period, and using the Award Payout Percentage equal to 100 percent for any remaining calendar years in the Performance Period.

Any shares will be distributed no later than the end of the calendar year immediately following the calendar year which contains your date of death; however, our administrative practice is to register such shares in the name of your beneficiary or estate within 60 days of the Firm's receipt of any required documentation.

Your Obligations

In consideration of the grant of this award, you agree to comply with and be bound by the obligations set forth below next to the subsections captioned "--Confidentiality & Non-Solicitation", "--False Statements", "--Cooperation", "--Compliance with Award Agreement", and "--Notice Period".

- **Confidentiality & Non-Solicitation**

  During your employment by the Firm and for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, you will not directly or indirectly, whether on your own behalf or on behalf of any other party, without the prior written consent of the Director of Human Resources: (A) solicit, induce or encourage any of the Firm's then current employees to leave the Firm or to apply for employment elsewhere, unless such current employee has received official, written notice that his or her employment will be terminated due to job elimination, (B) hire any employee or former employee who was employed by the Firm at the date your employment terminated, unless the individual's employment terminated because his or her job was eliminated, or the individual's employment with the Firm has been terminated for more than six months, (C) to the fullest extent enforceable under applicable law, solicit or induce or attempt to induce to leave the Firm, or divert or attempt to divert from doing business with the Firm, any then current customers, suppliers or other persons or entities that were serviced by you or whose names became known to you by virtue of your employment with the Firm, or otherwise interfere with the relationship between the Firm and such customers, suppliers or other persons or entities. This does not apply to publicly known institutional customers that you service after your employment with the Firm without the use of the Firm's confidential or proprietary information.

These restrictions do not apply to authorized actions you take in the normal course of your employment with the Firm, such as employment decisions with respect to employees you supervise or business referrals in accordance with the Firm's policies.

You will not, either during your employment with the Firm or thereafter, directly or indirectly use or disclose to anyone any Confidential Information (as defined herein) related to the Firm's business or its customers except as explicitly permitted by the JPMorgan Chase Code of Conduct and applicable policies or law or legal process. "Confidential Information" includes but is not limited to: (i) information received by the Firm from third parties under confidential conditions; (ii) intellectual property and trade secrets, technical, product, business, financial, or development information from the Firm, the use or disclosure of which reasonably might be construed to be contrary to the interest of the Firm; or (iii) other proprietary information or data, including, but not limited to, customer lists. In addition, following your termination of employment, you will not, without prior written authorization, access the Firm's private and internal information through telephonic, intranet or internet means. .

For Employees with a Work location in California, you agree that the restrictions in the first paragraph of the "Confidentiality and Non-Solicitation" provision shall not apply to you. However, you agree that, as a condition of receipt of this award, you will not, for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, use "Confidential Information" in order to solicit or otherwise interfere in the relationship between the Firm and any current Firm customers, suppliers, or other persons or entities whose names become known to you by virtue of your employment with the Firm and in connection with your access to Confidential Information.

Nothing in this award precludes you from reporting to the Firm's management or directors, the government, a regulator, a self-regulatory agency, your attorneys, or a court, conduct you believe to be in violation of the law or concerns of any known or suspected Code of Conduct violation. It is also not intended to prevent you from responding truthfully to questions or requests from the government, a regulator or in a court of law.

If you are required by law or requested to provide information to any private party, including the news media, related to your or anyone else's employment with the Firm, you will, in advance of providing any response (to the extent lawfully permitted), and within five days of receiving any such legal demand or request, provide written notice to the Firm. Additionally, you agree to cooperate with the Firm in connection with the request for such information to the extent lawfully permitted.

- **False Statements**

You will not, either during your employment with the Firm or thereafter, make any untrue statements, such that they are made with knowledge of their falsity or with reckless disregard for their truth or falsity, about the Firm, its employees, officers, directors or shareholders as a group in verbal, written, electronic or any other form. This shall not preclude you from reporting to the Firm's management or directors regarding conduct you believe to be in violation of the law or from providing information to or cooperating with any government, regulator or law enforcement agency.

- **Cooperation**

You will cooperate with any Firm investigation, inquiry, or litigation, and provide full and accurate information to the Firm and its counsel with respect to any matter that relates to issues or events about which you may have knowledge or information, subject to reimbursement for actual, appropriate, and reasonable out-of-pocket expenses incurred by you. This Agreement does not restrict you from communicating with any federal, state, or local government, regulatory, or law enforcement agency or otherwise participating in any investigation or proceeding that may be conducted by any such agency, including providing documents or other information without notice to the Firm.

- **Compliance with Award Agreement**

  You will provide the Firm with any information reasonably requested to determine compliance with the Award Agreement, and you authorize the Firm to disclose the terms of the Award Agreement to any third party who might be affected thereby, including your prospective employer.

- **Notice Period**

  If you are subject to a notice period or become subject to a notice period after the Grant Date, whether by contract or by policy, that requires you to provide advance written notice of your intention to terminate your employment ("Notice Period"), then as consideration for this award and continued employment, you will provide the Firm with the necessary advance written notice that applies to you, as specified by such contract or policy.

  After receipt of your notice, the Firm may choose to have you continue to provide services during the applicable Notice Period or may place you on a paid leave for all or part of the applicable Notice Period. During the Notice Period, you shall continue to devote your full time and loyalty to the Firm by providing services in a cooperative and professional manner and not perform any services for any other employer and shall receive your base salary and certain benefits until your employment terminates. You and the Firm may mutually agree to waive or modify the length of the Notice Period.

  Regardless of whether a Notice Period applies to you, you must comply with the 180-day advance notice period described under the subsection captioned "-- Full Career Eligibility" in the event you wish to terminate employment under that same subsection.

Remedies

- **Detrimental Conduct, Risk Related and Other Cancellation/Recapture**

  In addition to the cancellation provisions described under the sections captioned "Protection-Based Vesting", "Qualitative Performance Factor", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation", "EMEA Malus and Clawback Policy – Identified Staff" and "Termination of Employment", up to 100% of your outstanding PSUs under this award (for the avoidance of doubt, including any associated Reinvested Dividend Equivalent Share Units as well as the Calculated PSUs) may be cancelled if the Firm in its sole discretion determines that:

  - Any of the following detrimental and risk-related conduct has occurred:
    - you engaged in conduct detrimental to the Firm insofar as it causes material financial or reputational harm to the Firm or its business activities, or
    - this award was based on materially inaccurate performance metrics, whether or not you were responsible for the inaccuracy, or
    - this award was based on a material misrepresentation by you, or
    - you improperly or with gross negligence failed to identify, raise or assess, in a timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the Firm or its business activities, or
    - your employment was terminated for Cause (see section captioned "Definitions" below) or, in the case of a determination after the termination of your employment, that your employment could have been terminated for Cause.
  - you have failed to comply with any of the advance notice/cooperation requirements or employment restrictions applicable to your termination of employment, or
  - you have failed to return the required forms specified under the section captioned "Release/Certification" by the specified deadline, or
  - you have violated any of the provisions as set forth above in the section captioned "Your Obligations".

  To the extent provided under the subsection captioned "--Amendment" below, JPMorgan Chase reserves the right to suspend vesting of this award and/or distribution of shares under this award, including, without limitation, during any period that JPMorgan Chase is evaluating whether this award is subject to cancellation and/or recovery and/or whether the conditions for distributions of shares under this award are satisfied. The Firm is not responsible for any price fluctuations during any period of suspension and, if applicable, suspended units will be reinstated consistent with Plan administration procedures. See also "Administrative Provisions—No Ownership Rights/Other Limitations".

In addition, you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date or acceleration date) of the gross number of shares of Common Stock previously distributed, including vested shares subject to the Holding Requirements, under this award as follows:

- Payment may be required with respect to any shares of Common Stock distributed within the three-year period prior to a notice-of-recovery under this section, if the Firm in its sole discretion determines that:
  - you committed a fraudulent act, or engaged in knowing and willful misconduct related to your employment;
  - you violated any of the provisions as set forth above in the section captioned "Your Obligations"; or
  - you violated the employment restrictions set forth in the subsection "Full Career Eligibility" or "Government Office" following the termination of your employment.
- In addition, payment may be required with respect to any shares distributed within the one-year period prior to notice-of-recovery under this section, if the Firm in its sole discretion determines appropriate as a result of the detrimental and risk-related conduct listed in the above "Detrimental Conduct, Risk Related and Other Cancellation/Recapture" subsection.

Notice-of-recovery under this subsection is a written (including electronic) notice from the Firm to you either requiring payment under this subsection or stating that JPMorgan Chase is evaluating requiring payment under this subsection. Without limiting the foregoing, notice-of-recovery will be deemed provided if the Firm makes a good faith attempt to provide written (including electronic) notice at your last known address maintained in the Firm's employment records. For the avoidance of doubt, a notice-of-recovery that the Firm is evaluating requiring payment under this subsection shall preserve JPMorgan Chase's rights to require payment as set forth above in all respects and the Firm shall be under no obligation to complete its evaluation other than as the Firm may determine in its sole discretion.

For purposes of this subsection, shares distributed under this award include shares withheld for tax purposes. However, it is the Firm's intention that you only be required to pay the amounts under this subsection with respect to shares that are or may be retained by you following a determination of tax liability and that you will not be required to pay amounts with respect to shares representing irrevocable tax withholdings or tax payments previously made (whether by you or the Firm) that you will not be able to recover, recapture or reclaim (including as a tax credit, refund or other benefit). Accordingly, JPMorgan Chase will not require you to pay any amount that the Firm or its nominee in his or her sole discretion determines is represented by such withholdings or tax payments.

Payment may be made in shares of Common Stock or in cash. You agree that any repayment will be a lawful recovery under the terms and conditions of your Award Agreement and is not to be construed in any manner as a penalty.

Nothing in the section in any way limits your obligations under "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation" or "EMEA Malus and Clawback Policy – Identified Staff".

- **Right to an Injunction**
  You acknowledge that a violation or attempted violation of any of the provisions set forth in "Your Obligations" herein will cause immediate and irreparable damage to the Firm, and therefore agree that the Firm shall be entitled as a matter of right to an injunction, from any court of competent jurisdiction, restraining any violation or further violation of any of the provisions set forth in "Your Obligations"; such right to an injunction, however, shall be cumulative and in addition to whatever other remedies the Firm may have under law or equity.

Administrative Provisions

Withholding Taxes: As a result of legal and/or tax obligations the Firm, in its sole discretion, may (i) retain from each distribution the number of shares of Common Stock required to satisfy applicable tax obligations or (ii) implement any other desirable or necessary procedures, so that appropriate withholding and other taxes are paid to the competent authorities with respect to the vested shares and the award. This may include but is not limited to (i) a market sale of a number of such shares on your behalf substantially equal to the withholding or other taxes, (ii) to the extent required by law, withhold from cash compensation, an amount equal to any withholding obligation with respect to the award and shares that vest under this award, and (iii) retaining shares that vest under this award until you pay any taxes associated with the award and vested shares directly to the competent authorities.

Right to Set Off: Although the Firm expects to settle this award in share(s) of Common Stock as of the applicable vesting date, as set forth in your Award Agreement, the Firm may, to the maximum extent permitted by applicable law (including Section 409A of the Code to the extent it is applicable to you), retain for itself funds or the Common Stock resulting from any vesting of this award to satisfy any obligation or debt that you owe to the Firm. Notwithstanding any account agreement with the Firm to the contrary, the Firm will not recoup or recover any amount owed from any funds or unrestricted securities held in your name and maintained at the Firm pursuant to such account agreement to satisfy any obligation or debt or obligation owed by you under this award without your consent. This restriction on the Firm does not apply to accounts described and authorized in "No Ownership Rights/Other Limitations" described below.

No Ownership Rights/Other Limitations: PSUs do not convey the rights of ownership of Common Stock and do not carry voting rights. No shares of Common Stock will be issued to you until after the number of PSUs have been determined, if any, and have vested. Shares will be issued in accordance with JPMorgan Chase's procedures for issuing stock. By accepting this award, you authorize the Firm, in its sole discretion, to establish on your behalf a brokerage account in your name with the Firm or book-entry account with our stock plan administrator and/or transfer agent and deliver to that account any vested shares derived from the award. You also acknowledge that should there be a determination that the cancellation provisions of this award apply during the period when the vesting of any outstanding PSUs has been suspended, then you agree that such PSUs may be cancelled in whole or part. (See Sections captioned "Protection-Based Vesting", "Qualitative Performance Factor", "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation", "EMEA Malus and Clawback Policy – Identified Staff", "Termination of Employment" and "Remedies", as well as the subsection captioned "—Amendment" permitting suspension of vesting.)

With respect to any applicable vesting date, JPMorgan Chase may impose for any reason, as of such vesting date for such period as it may specify in its sole discretion, such restrictions on the Common Stock to be issued to you as it may deem appropriate, including, but not limited to, restricting the sale, transfer, pledging, assignment, hedging or encumbrance of such shares of Common Stock. Such restrictions described in the last sentence shall not impact your right to vote or receive dividends with respect to the Common Stock. By accepting this award, you acknowledge that during such specified period should there be a determination that the recovery provisions of this award apply, then you agree that you may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares subject to such restrictions (notwithstanding the limitation set forth in the "Right to Set Off" subsection above). (See sections captioned "Bonus Recoupment", "Recovery of Erroneously Awarded Incentive-Based Compensation" and "Remedies".)

Binding Agreement: The Award Agreement will be binding upon any successor in interest to JPMorgan Chase, by merger or otherwise.

Not a Contract of Employment: Nothing contained in the Award Agreement constitutes a contract of employment or continued employment. Employment is "at-will" and may be terminated by either you or JPMorgan Chase for any reason at any time. This award does not confer any right or entitlement to, nor does the award impose any obligation on the Firm to provide, the same or any similar award in the future and its value is not compensation for purposes of determining severance.

Section 409A Compliance: To the extent that Section 409A of the Code is applicable to this award, distributions of shares hereunder are intended to comply with Section 409A of the Code, and the Award Agreement, including these terms and conditions, shall be interpreted in a manner consistent with such intent.

Notwithstanding anything herein to the contrary, if you (i) are subject to taxation under the Code, (ii) are a specified employee as defined in the JPMorgan Chase 2005 Deferred Compensation Plan and (iii) have incurred a separation from service (as defined in that Plan with the exception of death) and if any units/shares under this award represent deferred compensation as defined in Section 409A and such shares are distributable (under the terms of this award) within six months following, and as a result of your separation from service, then those shares will be delivered during the first calendar month after the expiration of six full months from date of your separation from service. Further, if your award is not subject to a substantial risk of forfeiture as defined by regulations issued under Section 409A of the Code, then the remainder of each calendar year immediately following each vesting date set forth in your Award Agreement shall be a payment date for purposes of distributing the vested portion of the award.

Change in Outstanding Shares: In the event of any change in the outstanding shares of Common Stock by reason of any stock dividend or split, recapitalization, issuance of a new class of common stock, merger, consolidation, spin-off, combination or exchange of shares or other similar corporate change, or any distributions to stockholders of Common Stock other than regular cash dividends, the Committee will make an equitable substitution or proportionate adjustment, in the number or kind of shares of Common Stock or other securities issued or reserved for issuance pursuant to the Plan and to any PSUs outstanding under this award for such corporate events.

Other Equitable Adjustments: Except for the "Qualitative Performance Factor", the Committee may make adjustments (up or down) to the award as it deems to be equitable, to maintain the intended economics of the award in light of changed circumstances, which may include unusual or non-recurring events affecting the Firm (or the Performance Companies) or its financial statements in each case resulting from changes in accounting methods, practices or policies, changes in capital structure by reason of legal or regulatory requirements and such other changed circumstances, as the Committee may deem appropriate.

Interpretation/Administration: The Committee or its nominee has sole and complete authority to interpret and administer this Award Agreement, including, without limitation, the power to (i) interpret the Plan and the terms of this Award Agreement; (ii) determine the reason for termination of employment; (iii) determine application of the post-employment obligations and cancellation and recovery provisions; (iv) decide all claims arising with respect to this award; and (v) delegate such authority as it deems appropriate. Any determination contemplated hereunder by the Committee, the Firm, the Director of Human Resources or their respective nominees shall be binding on all parties.

Notwithstanding anything herein to the contrary, the determinations of the Director of Human Resources, the Firm, the Committee and their respective nominees under the Plan and the Award Agreements are not required to be uniform. By way of clarification, the Committee, the Firm, the Director of Human Resources and their respective nominees shall be entitled to make non-uniform and selective determinations and modifications under Award Agreements and the Plan.

Amendment: The Committee or its nominee reserves the right to amend this Award Agreement in any manner, at any time and for any reason; provided, however, that no such amendment shall materially adversely affect your rights under this Award Agreement without your consent except to the extent that the Committee or its nominee considers advisable to (x) comply with applicable laws or changes in or interpretation of applicable laws, regulatory requirements and accounting rules or standards and/or (y) make a change in a scheduled vesting date or impose the restrictions described above under "No Ownership Rights/Other Limitations", in either case, to the extent permitted by Section 409A of the Code if it is applicable to you. This Award Agreement may not be amended except in writing signed by the Director of Human Resources of JPMorgan Chase.

Severability: If any portion of the Award Agreement is determined by the Firm to be unenforceable in any jurisdiction, any court or arbitrator of competent jurisdiction or the Director of Human Resources may reform the relevant provisions (e.g., as to length of service, time, geographical area, or scope) to the extent the Firm (or court/arbitrator) considers necessary to make the provision enforceable under applicable law.

Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity: Upon receipt of satisfactory evidence that applicable United States federal, state, local, foreign or supranational ethics or conflict of interest laws or regulations require you to divest your interest in JPMorgan Chase PSUs, the Firm may accelerate the distribution of all or part of your outstanding award, effective on or before the required divestiture date and waive the Holding Requirement; provided that no accelerated distribution shall occur if the Firm determines that such acceleration will violate Section 409A of the Code. Accelerated distribution under this paragraph does not impact the dates as set forth in the "Remedies" section above. The time period for recovery shall be determined by the originally scheduled vesting date set forth in your Award Agreement or distribution date prior to any acceleration event.

If you have voluntarily terminated your employment and have satisfied the requirements of the section captioned "Government Office Requirements", acceleration shall apply (to extent required) to the percentage of your outstanding award that would continue to vest under that section. In the case of a termination of employment where the award is outstanding as a result of the subsections entitled "Job Elimination" or "Full Career Eligibility", then acceleration shall apply, to the extent required, to the full outstanding award. Subject to the two foregoing sections, the number of shares of Common Stock to be received on acceleration shall be determined using the methodology set forth under the section captioned "Death".

To the extent you have vested shares under this award subject to the Holding Requirement and become subject to divestiture requirement as forth herein, the Firm may waive the holding period to the extent required.

Notwithstanding an accelerated distribution or waiver of the Holding Requirement pursuant to the foregoing, you will remain subject to the applicable terms of your Award Agreement as if your award had remained outstanding for the duration of the vesting period and shares had been distributed as scheduled as of each vesting date, including, but not limited to, repayment obligations set forth in the section captioned "Remedies" and the employment restrictions in the sections captioned "Protection-Based Vesting" and "Government Office Requirements" and the subsection "Full Career Eligibility".

Use of Personal Data: By accepting this award, you acknowledge that the Firm may process your personal data for the purposes of providing you this award (to include registration of shares and units or establishing a brokerage account on your behalf) and disclosing to third parties, such as service providers or tax and regulatory authorities (e.g., for compensation reporting and payroll tax withholding purposes). Additionally, you agree that the Firm may transfer your personal data to jurisdictions that do not afford protections equivalent to the protections in the country in which we collected your data. Where applicable law provides a right to terminate the foregoing authorization, you may do so at any time, except with respect to tax and regulatory reporting and the Firm's legal and regulatory obligations. In the event you terminate this authorization, your award will be cancelled.

Governing Law: This award shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law principles.

Choice of Forum: By accepting this award under the Plan, you agree (and have agreed) that to the extent not otherwise subject to arbitration under an arbitration agreement between you and the Firm, any dispute arising directly or indirectly in connection with this award or the Plan shall be submitted to arbitration in accordance with the rules of the American Arbitration Association if so elected by the Firm in its sole discretion. In the event such a dispute is not subject to arbitration for any reason, you agree to accept the exclusive jurisdiction and venue of the United States District Court for the Southern District of New York with respect to any judicial proceeding in connection with this award or the Plan. You waive, to the fullest extent permitted by law, any objection to personal jurisdiction or to the laying of venue of such dispute and further agree not to commence any action arising out of or relating to this award or the Plan in any other forum.

Waiver of Jury Trial/Class Claims: By accepting this award, you agree, with respect to any claim brought in connection with your employment with the Firm in any forum (i) to waive the right to a jury trial and (ii) that any judicial proceeding or arbitration claim will be brought on an individual basis, and you hereby waive any right to submit, initiate, or participate in a representative capacity or as a plaintiff, claimant or member in a class action, collective action, or other representative or joint action.

Litigation: By accepting any award under the Plan, you agree (and have agreed) that in any action or proceeding by the Firm (other than a derivative suit in the right of the Firm) to enforce the terms and conditions of this Award Agreement or any other Award Agreement where the Firm is the prevailing party, the Firm shall be entitled to recover from you its reasonable attorney fees and expenses incurred in such action or proceeding. In addition, you agree that you are not entitled to, and agree not to seek, advancement of attorney fees and indemnification under the Firm's By-Laws in the event of such a suit by the Firm.

Non-transferability: Neither this award or any other outstanding awards of restricted stock units or of performance-based share units, nor your interests or rights in any such awards, shall be assigned, pledged, transferred, hedged, hypothecated or subject to any lien. An award may be transferred following your death by will, the laws of descent or by a beneficiary designation on file with the Firm.

Definitions

"Average Tangible Common Equity" means annual average common stockholders' equity less annual average goodwill and annual average identifiable intangible assets. Annual averages of the components of Average Tangible Common Equity will be calculated using quarterly balances as reported in publicly available financial disclosures. In the event that quarterly balances are not available, annual year end balances will be used. This calculation is used solely for purposes of the Performance Ranking.

"Award Payout Percentage" means the applicable percentage specified in the Performance Table.

"Calculated PSUs" means the number of PSUs determined by multiplying the Target Award Number (after giving effect to any cancellation thereof, in whole or in part) by the Award Payout Percentage corresponding to the Firm's Performance Ranking based on the three-year average performance for the Performance Period (both percentage and ranking, as set forth in the Performance Table); provided that if the average of the Firm's Reported ROTCE, expressed as a decimal rounded to the nearest hundredth, for the Performance Period either equals or exceeds ______% or is less than ______%, _______ percent or ________, respectively as the case may be, shall be substituted for the Performance Period's Award Payout Percentage in calculating the number of PSUs to distribute. For avoidance of doubt, any cancellation of this award (in whole or in part) during the Performance Period will reduce the Target Award Number.

"Calculation Agent" means a third-party entity not owned or controlled by the Firm, such as an accounting or consulting firm, retained from time to time by the Director of Human Resources or his/her delegate.

"Cause" means a determination by the Firm that your employment terminated as a result of your (i) violation of any law, rule or regulation (including rules of self-regulatory bodies) related to the Firm's business, (ii) indictment or conviction of a felony, (iii) commission of a fraudulent act, (iv) violation of the JPMorgan Chase Code of Conduct or other Firm policies or misconduct related to your duties to the Firm (other than immaterial and inadvertent violations or misconduct), (v) grossly inadequate performance of the duties associated with your position or job function or failure to follow reasonable directives of your manager, or (vi) any act or failure to act that is injurious to the interests of the Firm or its relationship with a customer, client or an employee.

"Financial Services Company" means a business enterprise that engages in any of the following services (itself or through an affiliate or subsidiary), regardless of whether such services are the principle strategy or revenue-generating activity:

- commercial or retail banking, including, but not limited to, commercial, institutional and personal trust, custody and/or lending and processing services, internet banking, originating and servicing mortgages, issuing and servicing credit cards, payment servicing or processing or merchant services,
- insurance, including but not limited to, guaranteeing against loss, harm, damage, illness, disability, or death, providing and issuing annuities, acting as principal, agent or broker for purpose of the forgoing,
- financial, investment or economic advisory services, including but not limited to, investment banking services (such as advising on mergers or dispositions, underwriting, dealing in, or making a market in securities or other similar activities), brokerage services, investment management services, asset management services, foreign exchange services, interbank networks and hedge funds,
- issuing, trading or selling instruments representing interests in pools of assets or in derivatives instruments,
- financial technology companies, such as those selling blockchain services, or offering or selling financial products/ services,
- advising on, or investing in, private equity or real estate funds or ventures, or
- any similar activities that the Director of Human Resources or nominee determines in his or her sole discretion constitute financial services,
- however, subject to disclosure and confirmation of the following, it shall not be considered a "Financial Services Company" for the purpose of this Award Agreement if such family office is solely funded by you and/or your family's own personal funds without external investors directly or indirectly.

"Firm Reported ROTCE" means the Firm's percentage return on tangible common equity for each year in the Performance Period.

"Firmwide Financial Threshold" means a cumulative return on tangible common equity for calendar years 20XX, 20XX and 20XX of not less than ______%. Cumulative return on tangible common equity means (i) the sum of the Firm's reported net income for all three calendar years, divided by (ii) reported year-end tangible equity averaged over the three years.

"Government Office" means (i) a full-time position in an elected or appointed office in local, state, or federal government (including equivalent positions outside the U.S. or in a supranational organization), not reasonably anticipated to be a full-career position, or (ii) conducting a bona fide full-time campaign for such an elective public office after formally filing for candidacy, where it is customary and reasonably necessary to campaign full-time for the office.

"Line of Business" means a business unit of the Firm (or one or more business units designated below under the definition "Line of Business Financial Threshold" of the Commercial & Investment Bank). All Corporate Functions (including the functions of the Chief Investment Office) are considered a single Line of Business.

"Line of Business Financial Threshold" means the financial threshold set forth below: for the following Lines of Business based on the Firm's management reporting system:

Asset & Wealth Management	Annual negative pre-tax pre-provision income[1]
Card and Auto	Annual negative pre-tax pre-loan loss reserve income[2]
Commercial & Investment Bank	Annual negative pre-tax pre-provision income[1] for CIB overall or annual negative allocated product revenues (excluding XVA) for: • Fixed Income • Equities • Securities Services • Global Investment Banking • Payments
Consumer Banking, J.P. Morgan Wealth Management and Business Banking	Annual negative pre-tax pre-loan loss reserve income[2]
Corporate Functions (including Chief Investment Office)	Annual negative pre-tax pre-provision income[1] at the Firm level
Home Lending	Annual negative pre-tax pre-loan loss reserve income[2]
[1]Pre-tax pre-provision income means Revenue less Expenses [2]Pre-tax pre-loan loss reserve income means Revenue less (Expenses plus Net Charge-offs)	

"Not-for-Profit Organization" means an entity exempt from tax under state law and under Section 501(c)(3) of the Code. Section 501(c)(3) only includes entities organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition or for the prevention of cruelty to children or animals. Not-for-Profit Organization shall also mean entities outside the United States exempt from local and national tax laws because they are organized and operated exclusively for purposes identical to those applicable to Section 501(c)(3) organization.

"Performance Companies" mean the following institutions which have business activities that overlap with a significant portion of the Firm's revenue mix: ____, and ________________.

If, during the Performance Period, one or more Performance Companies shall merge, engage in a spin-off or otherwise experience a material change in its revenue mix or business activities or its existence or its primary businesses shall terminate or cease due to receivership, bankruptcy, sale, or otherwise, then the Committee may eliminate such institution from the list of Performance Companies or make such other equitable adjustments, such as adding an acquirer or a new company to the list of Performance Companies, as it deems appropriate, with any such changes having effect for purposes of all calculations hereunder on a prospective basis from the date the applicable change is made.

"Performance Period" means calendar years 20XX, 20XX and 20XX.

"Performance Ranking" means the ranking of the average ROTCE of the Firm as compared to the ranking of the average ROTCE of the Performance Companies as specified in the Performance Table for the Performance Period.

"Performance Table" means the table used in the calculation of PSUs for the Performance Period as set forth below:

Firm Reported ROTCE (average performance)	Award Payout Percentage
>=________%	______%
______% to ______%	Pay by relative ROTCE scale
<______%	_____%

Firm Performance Ranking (average performance)	Award Payout Percentage
#1	_______%
#2	_______%
#3	_______%
#4	_______%
#5	_______%
#6	_______%
#7	_______%
#8	_______%
#9	_______%
#10 +	_______%

If, after the calculation of the Performance Ranking, there is a tie, the tie shall be disregarded for purposes of determining the Award Payout Percentage. For example, in the case of a tie for the fourth ranking between the Firm and a Performance Company, the Firm shall be treated as having satisfied that ranking. In the case of that same tie among Performance Companies, the fourth and fifth rankings will be deemed to have been satisfied.

"Recognized Service" means the period of service as an employee set forth in the Firm's applicable service-related policies.

"ROTCE" means for the Firm and each of the Performance Companies a percentage derived by, for each year in the Performance Period, dividing (i) annual earnings from continuing operations less dividends on preferred stock as set forth in published financial disclosures by (ii) the Average Tangible Common Equity for the year. If, prior to the end of the vesting period, the Firm or any Performance Company restates its published financial statements for any year in the Performance Period, ROTCE for that year shall be recalculated for the Firm or Performance Company with the Performance Ranking adjusted, if necessary. This calculation is used solely for purposes of the Performance Ranking.

"Target Award Number" means the number of PSUs designated as such in the Award Agreement.

Government Office Requirements

You may be eligible to continue vesting in all or part of your award if you voluntarily resign to accept a Government Office (as defined above) or to become a candidate for an elective Government Office.

Full Career Eligibility:
"Government Office Requirements" does not apply to you if you satisfy the subsection captioned "--Full Career Eligibility" as of the date that you voluntarily terminate your employment with the Firm.

Eligibility:
Eligibility for continued vesting is conditioned on your providing the Firm:

- At least 60 days' advance written notice of your intention to resign to accept or pursue a Government Office (see section captioned "Definitions"), during which period you must perform in a cooperative and professional manner services requested by the Firm and not provide services for any other employer. The Firm may elect to shorten this notice period at the Firm's sole discretion.
- Confirmation, in a form satisfactory to the Firm, that vesting in this award pursuant to this provision would not violate any applicable law, regulation or rule.
- Documentation in a form satisfactory to the Firm that your resignation is for the purpose of accepting a Government Office or becoming a candidate for a Government Office. (See section captioned "Definitions".)

Portion of Your Award Subject to Continued Vesting:
Subject to the conditions below, the percentage of this award that will continue to vest in accordance with this award's original schedule will be based on your years of continuous service completed with the Firm immediately preceding your termination date, as follows:

- 50% if you have at least 3 but less than 4 years of continuous service,
- 75% if you have at least 4 but less than 5 years of continuous service, or
- 100% if you have 5 or more years of continuous service.

The portion of this award subject to continued vesting above is referred to as the "CV Award" and the portion not subject to continued vesting will be cancelled as of the date your employment terminates.

Conditions for Continued Vesting of Award:

- You must remain in a non-elective Government Office for two or more years after your employment with the Firm terminates to be eligible to receive the CV Award; provided that if your non-elective Government Office is for a period less than two years, you will be eligible to receive the CV Award if it has a vesting date during your period of Government Service; or
- In the case of resignation from the Firm to campaign for an elective Government Office, your name must be on the primary or final public ballot for the election. (If you are not elected, see below for employment restrictions.)

For avoidance of doubt, the performance criteria and protection-based vesting set forth in these terms and conditions continue to apply to a CV Award.

Satisfaction of Conditions:
If your service in a Government Office ends two years or more after your employment with the Firm terminates, or in the case of resignation from the Firm to campaign for a Government Office, your name is on the primary or final public ballot for the election and you are not elected, any CV Awards then outstanding and any such awards that would have then been outstanding but for an accelerated distribution of shares (as described in the subsection captioned "--Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity") will be subject for the remainder of the applicable vesting period to the same terms and conditions of this Award Agreement, including employment restrictions during the vesting period, as if you had resigned from the Firm having met the requirements for Full Career Eligibility.

Failure to Satisfy Conditions:
If you do not satisfy the above "Conditions for Continued Vesting of Awards", any outstanding PSUs under the CV Award will be cancelled. You also will be required to repay the Fair Market Value of the number of shares (before tax and other withholdings) of Common Stock distributed to you that would have been outstanding as PSUs on the date you failed to satisfy the "Conditions for Continued Vesting of Award" but for their accelerated distribution (as described in subsection

captioned, “Accelerated Distribution for Ethics or Conflict Reasons Resulting From Employment by a Government Entity”). Fair Market Value for this purpose will be determined as the date that the shares were distributed.

JPMORGAN CHASE & CO. LONG-TERM INCENTIVE PLAN
TERMS AND CONDITIONS OF JANUARY 21, 2025
RESTRICTED STOCK UNIT AWARD
Identified Staff – Retained Award

Award Agreement

These terms and conditions are made part of the Award Agreement dated as of January 21, 2025 ("Grant Date") awarding Restricted Stock Units ("RSUs") pursuant to the terms of the JPMorgan Chase & Co. Long-Term Incentive Plan ("Plan"). To the extent the terms of the Award Agreement (all references to which will include these terms and conditions) conflict with the Plan, the Plan will govern. The Award Agreement, the Plan and Prospectus supersede any other agreement, whether written or oral, that may have been entered into by the Firm and you relating to this award.

This award was granted on the Grant Date subject to the Award Agreement. **Unless you decline by the deadline and in the manner specified in the Award Agreement, you will have agreed to be bound by these terms and conditions, effective as of the Grant Date.** If you decline the award, it will be cancelled as of the Grant Date.

Capitalized terms that are not defined in the Award Agreement will have the same meaning as set forth in the Plan.

JPMorgan Chase & Co. will be referred to throughout the Award Agreement as "JPMorgan Chase" and together with its subsidiaries as the "Firm".

Form of Award

Each RSU represents a non-transferable right to receive one share of Common Stock as of the applicable vesting date as set forth in your Award Agreement.

Holding Requirement

As of the vesting date, you shall be entitled to a distribution equal to the Fair Market Value of the number of RSUs vesting on such date, less the number being withheld to satisfy tax withholding obligations. You agree that the distribution made to you will be held in an account in your name with restrictions preventing you from transferring, assigning, hedging, selling, pledging, or otherwise encumbering such distribution for a twelve-month period commencing with the vesting date. Such restrictions shall lapse in event of your death.

Bonus Recoupment

In consideration of the grant of this award, you agree that you are subject to the JPMorgan Chase Bonus Recoupment Policy (or successor policy) as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 2024 and to this award. You can access this policy as currently in effect by clicking the following link to the JPMorgan Chase & Co. Corporate Governance Principles web page and scrolling to the Bonus Recoupment Policy located under the section titled "Other Matters":

https://about.jpmorganchase.com/about/governance/corporate-governance-principles

For the avoidance of doubt, nothing in these terms and conditions in any way limits the rights of the Firm under the JPMorgan Chase Bonus Recoupment Policy (or successor policy).

EMEA Malus and Clawback Policy – Identified Staff

In consideration of grant of this award, and without prejudice to any other provision of this Award Agreement, you agree that you are subject to the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff (and any applicable supplement(s) to that policy) or successor policy as in effect from time to time as it applies both to the cash incentive compensation awarded to you for performance year 2024 and to this award.

The provisions of the JPMorgan Chase EMEA Malus and Clawback Policy - Identified Staff set out the terms and conditions applying to the grant of this award which ensure that the Firm is able to meet its regulatory obligations to operate malus (reduce) and/or clawback (recover) to awards in certain circumstances. These include, but are not limited to, where (i) there is a material downturn in the Firm's financial performance or (ii) where the Firm is required to hold more capital. The circumstances in which the events at (i) and (ii) would occur are analogous to some of the circumstances considered under the existing Firmwide terms and conditions, in particular the Bonus Recoupment Policy and the Protection Based Vesting provisions. You can access this policy as currently in effect in My Rewards through the following link: https://myrewards.jpmorganchase.com

Your Obligations

In consideration of the grant of this award, you agree to comply with and be bound by the obligations set forth below next to the subsections captioned "--Confidentiality & Non-Solicitation", "--False Statements", "--Cooperation", "--Compliance with Award Agreement" and "--Notice Period."

- **Confidentiality & Non-Solicitation**

  During your employment by the Firm and for the one year period following the termination of your employment, you will not directly or indirectly, whether on your own behalf or on behalf of any other party, without the prior written consent of the Director of Human Resources: (A) solicit, induce or encourage any of the Firm's then current employees to leave the Firm or to apply for employment elsewhere, unless such current employee has received official, written notice that his or her employment will be terminated due to job elimination, (B) hire any employee or former employee who was employed by the Firm at the date your employment terminated, unless the individual's employment terminated because his or her job was eliminated, or the individual's employment with the Firm has been terminated for more than six months, (C) to the fullest extent enforceable under applicable law, solicit or induce or attempt to induce to leave the Firm, or divert or attempt to divert from doing business with the Firm, any then current customers, suppliers or other persons or entities that were serviced by you or whose names became known to you by virtue of your employment with the Firm, or otherwise interfere with the relationship between the Firm and such customers, suppliers or other persons or entities. This does not apply to publicly known institutional customers that you service after your employment with the Firm without the use of the Firm's confidential or proprietary information.

  These restrictions do not apply to authorized actions you take in the normal course of your employment with the Firm, such as employment decisions with respect to employees you supervise or business referrals in accordance with the Firm's policies.

  You will not, either during your employment with the Firm or thereafter, directly or indirectly use or disclose to anyone any Confidential Information (as defined herein) related to the Firm's business or its customers, except as explicitly permitted by the JPMorgan Chase Code of Conduct and applicable policies or law or legal process. "Confidential Information" includes but is not limited to: (i) information received by the Firm from third parties under confidential conditions; (ii) intellectual property and trade secrets, technical, product, business, financial, or development information from the Firm, the use or disclosure of which reasonably might be construed to be contrary to the interest of the Firm; or (iii) other proprietary information or data, including, but not limited to, customer lists. In addition, following your termination of employment, you will not, without prior written authorization, access the Firm's private and internal information through telephonic, intranet or internet means.

  For Employees with a Work Location in California, you agree that the restrictions in the first paragraph of this "Confidentiality and Non-Solicitation" provision shall not apply to you. However, you agree that, as a condition of receipt of this award, you will not, for the longer of the (i) one year period following the termination of your employment or, (ii) if your award is not cancelled as of your termination date, the three year period from Grant Date, use "Confidential Information" in order to solicit or otherwise interfere in the relationship between the Firm and any current Firm customers, suppliers, or other persons or entities whose names become known to you by virtue of your employment with the Firm and in connection with your access to Confidential Information.

  Nothing in this award precludes you from reporting to the Firm's management or directors, the government, a regulator, a self-regulatory agency, your attorneys or a court, conduct you believe to be in violation of the law or concerns of any known or suspected Code of Conduct violation. It is also not intended to prevent you from responding truthfully to questions or requests from the government, a regulator or in a court of law.

  If you are required by law or requested to provide information to any private party, including the news media, related to your or anyone else's employment with the Firm, you will, in advance of providing any response (to the extent lawfully permitted), and within five days of receiving any such legal demand or request, provide written notice to the Firm. Additionally, you agree to cooperate with the Firm in connection with the request for such information to the extent lawfully permitted.

- **False Statements**

  You will not, either during your employment with the Firm or thereafter, make any untrue statements, such that they are made with knowledge of their falsity or with reckless disregard for their truth or falsity, about the Firm, its employees, officers, directors or shareholders as a group in verbal, written, electronic or any other form. This shall not preclude you from reporting to the Firm's management or directors regarding conduct you believe to be in violation of the law or preclude you from providing information to or cooperating with any government, regulator or law enforcement agency.

- **Cooperation**
  You will cooperate with any Firm investigation, inquiry, or litigation, and provide full and accurate information to the Firm and its counsel with respect to any matter that relates to issues or events about which you may have knowledge or information, subject to reimbursement for actual, appropriate and reasonable out-of-pocket expenses incurred by you. This Agreement does not restrict you from communicating with any federal, state, or local government, regulatory, or law enforcement agency or otherwise participating in any investigation or proceeding that may be conducted by any such agency, including providing documents or other information without notice to the Firm.

- **Compliance with Award Agreement**
  You will provide the Firm with any information reasonably requested to determine compliance with the Award Agreement, and you authorize the Firm to disclose the terms of the Award Agreement to any third-party who might be affected thereby, including your prospective employer.

Remedies

- **Detrimental Conduct, Risk Related and Other Cancellation/Recapture**
  Notwithstanding any terms of this Award Agreement to the contrary, JPMorgan Chase reserves the right to recover from you up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares of Common Stock previously distributed (including shares withheld for tax purposes) under this award if the Firm in its sole discretion determines that:
  - Any of the following detrimental and risk-related conduct has occurred:
    - you engaged in conduct detrimental to the Firm insofar as it causes material financial or reputational harm to the Firm or its business activities, or
    - this award was based on materially inaccurate performance metrics, whether or not you were responsible for the inaccuracy, or
    - this award was based on a material misrepresentation by you, or
    - you improperly or with gross negligence failed to identify, raise, or assess, in a timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the Firm or its business activities, or
    - your employment was terminated for Cause (see section captioned "Definitions" below) or, in the case of a determination after the termination of your employment, that your employment could have been terminated for Cause.
- **Recovery**
  You may be required to pay the Firm up to an amount equal to the Fair Market Value (determined as of the applicable vesting date) of the gross number of shares of Common Stock previously distributed under this award as follows:
  - Payment may be required with respect to any shares distributed within the three-year period prior to a notice-of-recovery under this section, if the Firm in its sole discretion determines that:
    - you committed a fraudulent act, or engaged in knowing and willful misconduct related to your employment, or
    - you violated any of the provisions as set forth above in the section captioned "Your Obligations", or
  - In addition, payment may be required with respect to any shares distributed within the one-year period prior to notice-of-recovery under this section, if the Firm in its sole discretion determines appropriate as a result of the detrimental and risk-related conduct listed in the above "Detrimental Conduct, Risk Related and Other Cancellation/Recapture" subsection.

  Notice-of-recovery under this subsection is a written (including electronic) notice from the Firm to you either requiring payment under this subsection or stating that JPMorgan Chase is evaluating requiring payment under this subsection. Without limiting the foregoing, notice-of-recovery will be deemed provided if the Firm makes a good faith attempt to provide written (including electronic) notice at your last known address maintained in the Firm's employment records. For the avoidance of doubt, a notice-of-recovery that the Firm is evaluating requiring payment under this subsection shall preserve JPMorgan Chase's rights to require payment as set forth above in all respects and the Firm shall be under no obligation to complete its evaluation other than as the Firm may determine in its sole discretion.

  For purposes of this subsection, shares distributed under this award include shares withheld for tax purposes. However, it is the Firm's intention that you only be required to pay the amounts under this subsection with respect to shares that are or may be retained by you following a determination of tax liability and that you will not be required to pay amounts with respect to shares representing irrevocable tax withholdings or tax payments previously made (whether by you or the Firm) that you will not be able to recover, recapture or reclaim (including as a tax credit, refund or other benefit). Accordingly, JPMorgan Chase will not require you to pay any amount that the Firm or its nominee in his or her sole discretion determines is represented by such withholdings or tax payments.

Payment may be made in shares of Common Stock or in cash. You agree that any repayment will be a lawful recovery under the terms and conditions of your Award Agreement and is not to be construed in any manner as a penalty.

Nothing in the section in any way limits your obligations under "Bonus Recoupment" and "EMEA Malus and Clawback Policy - Identified Staff".

- **Right to an Injunction**
  You acknowledge that a violation or attempted violation of any of the provisions set forth in "Your Obligations" herein will cause immediate and irreparable damage to the Firm, and therefore agree that the Firm shall be entitled as a matter of right to an injunction, from any court of competent jurisdiction, restraining any violation or further violation of any of the provisions set forth in "Your Obligations"; such right to an injunction, however, shall be cumulative and in addition to whatever other remedies the Firm may have under law or equity.

Administrative Provisions

Withholding Taxes: As a result of legal and/or tax obligations the Firm, in its sole discretion, may (i) retain from each distribution the number of shares of Common Stock required to satisfy applicable tax obligations or (ii) implement any other desirable or necessary procedures, so that appropriate withholding and other taxes are paid to the competent authorities with respect to the vested shares and the award. This may include but is not limited to (i) a market sale of a number of such shares on your behalf substantially equal to the withholding or other taxes, (ii) to the extent required by law, withhold from cash compensation, an amount equal to any withholding obligation with respect to the award and shares that vest under this award, and (iii) retaining shares that vest under this award until you pay any taxes associated with the award and/or vested shares directly to the competent authorities.

Right to Set Off: Although the Firm expects to settle this award in share(s) of Common Stock as of the applicable vesting date, as set forth in your Award Agreement, the Firm may, to the maximum extent permitted by applicable law (including Section 409A of the Code to the extent it is applicable to you), retain for itself funds or the Common Stock resulting from any vesting of this award to satisfy any obligation or debt that you owe to the Firm. Notwithstanding any account agreement with the Firm to the contrary, the Firm will not recoup or recover any amount owed from any funds or unrestricted securities held in your name and maintained at the Firm pursuant to such account agreement to satisfy any obligation or debt owed by you under this award without your consent.

Binding Agreement: The Award Agreement will be binding upon any successor in interest to JPMorgan Chase, by merger or otherwise.

Not a Contract of Employment: Nothing contained in the Award Agreement constitutes a contract of employment or continued employment. Employment is "at-will" and may be terminated by either you or JPMorgan Chase for any reason at any time. This award does not confer any right or entitlement to, nor does the award impose any obligation on the Firm to provide, the same or any similar award in the future and its value is not compensation for purposes of determining severance.

Section 409A Compliance: To the extent that Section 409A of the Code is applicable to this award, distributions of shares hereunder are intended to comply with Section 409A of the Code, and the Award Agreement, including these terms and conditions, shall be interpreted in a manner consistent with such intent.

Interpretation/Administration: The Committee or its nominee has sole and complete authority to interpret and administer this Award Agreement, including, without limitation, the power to (i) interpret the Plan and the terms of this Award Agreement; (ii) determine the reason for termination of employment; (iii) determine application of the post-employment obligations and cancellation and recovery provisions; (iv) decide all claims arising with respect to this award; and (v) delegate such authority as it deems appropriate. Any determination contemplated hereunder by the Committee, the Firm, the Director of Human Resources or their respective nominees shall be binding on all parties.

Notwithstanding anything herein to the contrary, the determinations of the Director of Human Resources, the Firm, the Committee and their respective nominees under the Plan and the Award Agreements are not required to be uniform. By way of clarification, the Committee, the Firm, the Director of Human Resources and their respective nominees shall be entitled to make non-uniform and selective determinations and modifications under Award Agreements and the Plan.

Amendment: The Committee or its nominee reserves the right to amend this Award Agreement in any manner, at any time and for any reason; provided, however, that no such amendment shall materially adversely affect your rights under this Award Agreement without your consent except to the extent that the Committee or its nominee considers advisable to (x) comply with applicable laws or changes in or interpretation of applicable laws, regulatory requirements and accounting rules or standards and/or (y) make a change in a scheduled vesting date or impose the restrictions described above under "No Ownership Rights/Other Limitations", in either case, to the extent permitted by Section 409A of the Code if it is applicable to you. This Award Agreement may not be amended except in writing signed by the Director of Human Resources of JPMorgan Chase.

Severability: If any portion of the Award Agreement is determined by the Firm to be unenforceable in any jurisdiction, any court or arbitrator of competent jurisdiction or the Director of Human Resources may reform the relevant provisions (e.g., as to length of service, time, geographical area, or scope) to the extent the Firm (or court/arbitrator) considers necessary to make the provision enforceable under applicable law.

Use of Personal Data: By accepting this award, you acknowledge that the Firm may process your personal data for the purposes of providing you this award (to include registration of shares and units or establishing a brokerage account on your behalf) and disclosing to third parties, such as service providers or tax and regulatory authorities (e.g., for compensation reporting and payroll tax withholding purposes). Additionally, you agree that the Firm may transfer your personal data to jurisdictions that do not afford protections equivalent to the protections in the country in which we collected your data. Where applicable law provides a right to terminate the foregoing authorization, you may do so at any time, except with respect to tax and regulatory reporting and the Firm's legal and regulatory obligations. In the event you terminate this authorization, your award will be cancelled.

Governing Law: This award shall be governed by and construed in accordance with the laws of the State of New York, without regard to conflicts of law principles.

Choice of Forum: By accepting this award under the Plan, you agree (and have agreed) that to the extent not otherwise subject to arbitration under an arbitration agreement between you and the Firm, any dispute arising directly or indirectly in connection with this award or the Plan shall be submitted to arbitration in accordance with the rules of the American Arbitration Association if so elected by the Firm in its sole discretion. In the event such a dispute is not subject to arbitration for any reason, you agree to accept the exclusive jurisdiction and venue of the United States District Court for the Southern District of New York with respect to any judicial proceeding in connection with this award or the Plan. You waive, to the fullest extent permitted by law, any objection to personal jurisdiction or to the laying of venue of such dispute and further agree not to commence any action arising out of or relating to this award or the Plan in any other forum.

Waiver of Jury Trial/Class Claims: By accepting this award, you agree, with respect to any claim brought in connection with your employment with the Firm in any forum (i) to waive the right to a jury trial and (ii) that any judicial proceeding or arbitration claim will be brought on an individual basis, and you hereby waive any right to submit, initiate, or participate in a representative capacity or as a plaintiff, claimant or member in a class action, collective action, or other representative or joint action.

Litigation: By accepting any award under the Plan, you agree (and have agreed) that in any action or proceeding by the Firm (other than a derivative suit in the right of the Firm) to enforce the terms and conditions of this Award Agreement or any other Award Agreement where the Firm is the prevailing party, the Firm shall be entitled to recover from you its reasonable attorney fees and expenses incurred in such action or proceeding. In addition, you agree that you are not entitled to, and agree not to seek, advancement of attorney fees and indemnification under the Firm's By-Laws in the event of such a suit by the Firm.

Exhibit 19

Insider Trading Policy – Firmwide

Effective Date: January 31, 2025

1. Summary or Rationale

This Insider Trading Policy – Firmwide (“Policy”) provides guidelines to promote compliance by Firm Personnel and their Connected Persons with the provisions of the U.S. federal securities laws that prohibit persons who are in possession of Firm Material Nonpublic Information from: (i) trading in Firm Securities; or (ii) impermissibly providing Firm Material Nonpublic Information to other persons who may trade on the basis of that information (i.e., “tipping”).

This Policy applies to Directors, Employees and Non-Employees (each, a “Firm Person” and, collectively, "Firm Personnel"), as well as their Connected Persons, and extends to the securities accounts of such persons and any other securities account that such persons could be expected to influence or control.

This Policy applies to all Firm Personnel and their Connected Persons in all jurisdictions in accordance with and subject to Firm policies, even if the activities prohibited in this Policy are not illegal in the jurisdiction where any particular Firm Person or Connected Person is located.

In addition, neither JPMC nor any Firm subsidiary may trade in Firm Securities while in possession of Firm Material Nonpublic Information, consistent with applicable law.

2. Defined Terms

CEO	The Chief Executive Officer of JPMC
CFO	The Chief Financial Officer of JPMC
Closed Window Period	Any period outside of an Open Window Period
Connected Persons	The following individuals and entities who, based on their relationship with a Firm Person, are subject to provisions of this Policy: • The spouse, domestic partner or minor children (even if financially independent) of a Firm Person • Anyone to whom a Firm Person provides significant financial support or for whom a Firm Person, or anyone listed above, has or shares the power, directly or indirectly, to make investment decisions • Any corporations, partnerships, trusts or other entities that are controlled by a Firm Person and/or anyone listed above

Corporate Officers	Members of the JPMC Operating Committee and the Firmwide Controller
ESPP	JPMorgan Chase Employee Stock Purchase Plan
Exchange Act	The Securities Exchange Act of 1934, as amended
Firm	JPMC and its direct and indirect subsidiaries
Firm MNPI	Material Nonpublic Information relating to the Firm or Firm Securities
Firm Personnel	The following persons are Firm Personnel (each a Firm Person) within the meaning of this Policy: • Directors: Any member of the Board of Directors of JPMC • Employees: Any person directly employed by the Firm • Non-Employees: Contingent workers and other types of non-employee personnel (including any director of a Firm subsidiary) who are not directly employed by the Firm but have access to JPMC facilities and/or internal JPMC systems
Firm Securities	Firm Securities means: • Securities and other financial instruments (such as common stock, preferred stock and bonds) issued by JPMC or any Firm subsidiary • Options, put or call options, forward contracts, warrants, swaps (including credit default swaps) and other derivative securities tied to any of the above Baskets, indices and exchange traded funds that (i) consist of 30 or fewer components and (ii) are comprised of a considerable portion (greater than 3%) of the above are also deemed to be Firm Securities for purposes of this Policy
GC	The General Counsel of JPMC
GRAT	Grantor Retained Annuity Trust
JPMC	JPMorgan Chase & Co.
Material Nonpublic Information or MNPI	Information about an issuer of financial instruments (including private companies that issue publicly traded financial instruments) that is not known by the public, but if it were, is reasonably likely to affect the market price of the financial instruments to which the information relates or is likely to influence a reasonable investor to buy or sell those financial instruments, or would be likely to be used as part their investment decision regarding those financial instruments, as applicable

Open Window Period	Generally, each period beginning the day after public release of JPMC's quarterly earnings and ending on the 15th day of the following month, provided that an Open Window Period may be closed or suspended at any time if circumstances require such action with respect to some or all Window List Personnel
Policy	This Insider Trading Policy – Firmwide
SAR	Stock Appreciation Right
Trading or Transactions	For purposes of this Policy, the terms "trading" or "transactions" (and variations thereof) include any self-directed (i) purchases or sales of, or any other transactions in, Firm Securities; (ii) making or modifying any instructions or investment options relating to any transaction in Firm Securities; and (iii) gifts of Firm Securities
Window List Personnel	Firm Personnel whose position, the nature of their work or their access to information at the Firm indicates that they have or may have access to Firm MNPI Firm Personnel are notified when they become Window List Personnel.
10b5-1 Plan	A plan that meets the requirements set forth in Rule 10b5-1(c)(1) under the Exchange Act

3. Prohibition on Insider Trading

Insider trading is illegal and strictly prohibited by the Firm. Firm Personnel and their Connected Persons must never trade or engage in any transaction in Firm Securities while in possession of Firm MNPI. In addition, neither JPMC nor any Firm subsidiary may trade in Firm Securities when in possession of Firm MNPI, consistent with applicable law. When JPMC possesses or may be deemed to possess Firm MNPI, it will generally observe a "blackout period" during which it will not trade in Firm Securities. However, the Firm may repurchase its common stock under a 10b5-1 Plan during the blackout period preceding each quarterly earnings announcement.

4. Prohibition on Unauthorized Disclosure

Firm Personnel and their Connected Persons must not impermissibly provide Firm MNPI to any person who may trade on the basis of that information (i.e., "tipping"). In addition, Firm MNPI must not be shared with any person unless the disclosure complies with the Firm's policies concerning the safeguarding of confidential information, including the Code of Conduct.

5. Policies Applicable to Window List Personnel

5.1 Window List Personnel

Firm Personnel who have or may have access to Firm MNPI are designated as Window List Personnel. Firm Personnel are notified via email when they become Window List Personnel.

Window List Personnel and their Connected Persons are prohibited from trading in Firm Securities during any Closed Window Period. During any Open Window Period, Window List Personnel and their Connected Persons are permitted to trade in Firm Securities after obtaining preapproval from the Compliance Department. Any such approval is valid for the length indicated on the approval notification which is generally the end of the next business day, unless otherwise stipulated. An Open Window Period may be closed or suspended at any time if circumstances require such action with respect to some or all persons designated as Window List Personnel. If preapproval for a transaction is requested during a Closed Window Period, the Window List Person making the request will receive a denial notification from Compliance and will not be authorized to execute the trade. In extremely rare circumstances, an exception may be granted in consultation with the Window List Person's manager, Compliance and Legal.

Non-Window List Personnel are not subject to the preapproval requirements described in this Section 5.1 and in Section 6.2 or the minimum holding period requirements described in Section 7.3, but regional or line of business-specific restrictions may apply.

For additional requirements for Corporate Officers and Directors, see Section 6.

5.2 Window Covered Transactions

Window List Personnel and their Connected Persons may only engage in the following types of transactions in Firm Securities, subject to compliance with preapproval requirements and the requirement that the transaction be conducted during an Open Window Period:

- Direct purchases, sales and gifts of JPMC common stock or other Firm Securities, including self-directed sales to meet a margin call;
- Liquidating holdings of Firm Securities under the ESPP or the Firm's deferred compensation plan;
- Placing, cancelling or amending limit orders (i.e., an order to buy or sell a stock at a specific price or better) with respect to Firm Securities;
- Entering into, amending or terminating 10b5-1 Plans with respect to Firm Securities; and

- Use of previously-owned JPMC shares or share withholding for option exercises, unless as part of a 10b5-1 Plan entered into during an Open Window Period.

Additional restrictions apply to JPMC Employee Stock Options and JPMC Stock Appreciation Rights.

The following transactions are not considered to be restricted transactions for Window List Personnel and their Connected Persons and are not required to be preapproved:

- Dividend reinvestments and automatic purchases of JPMC common stock in accordance with previously made employee benefit elections (e.g., the ESPP) entered into (or amended) and preapproved during an Open Window Period;
- Transactions under a 10b5-1 Plan entered into (or amended) and preapproved during an Open Window Period; and
- Limit orders and derivatives that are executed during a Closed Window Period that were placed during an Open Window Period.

6. Policies Applicable to Corporate Officers and Directors

6.1 Transactions that are Required to be Pursuant to a 10b5-1 Plan

When a Corporate Officer or Director wishes to engage in an open market sale of Firm Securities, the transaction must be made pursuant to a 10b5-1 Plan.

When a Corporate Officer or Director wishes to (i) exercise and hold a SAR or option, (ii) make a charitable gift of Firm Securities, (iii) create a GRAT relating to Firm Securities or (iv) transfer Firm Securities to or from a GRAT or another trust, the transaction requires pre-approval under this Policy but is not required to be pursuant to a 10b5-1 Plan.

A Corporate Officer or Director may enter into a 10b5-1 Plan subject to compliance with the Firm's other share retention policies. To enter into a 10b5-1 Plan, a Corporate Officer or Director must comply with the preapproval requirements described in Section 6.2 of this Policy.

All 10b5-1 Plans must comply with all of the requirements set forth in Rule 10b5-1(c) and may be entered into, amended or terminated only during an Open Window Period.

6.2 Pre-approval for Firm Securities Transactions and Entry into 10b5-1 Plans

During an Open Window Period, Corporate Officers and Directors are permitted to trade in Firm Securities after obtaining the preapprovals described below.

- Corporate Officers and Directors must receive preapproval from the CEO and the GC for any transactions in Firm Securities that require preapproval under Section 5 and for entry into, amendment of or termination of a 10b5-1 Plan under Section 6.1.

- In the case of transactions or 10b5-1 Plans entered into by the GC, preapproval is required from the CEO,
- in the case of transactions or 10b5-1 Plans entered into by the Firmwide Controller, approval is required from the GC and the CFO, and
- in the case of transactions or 10b5-1 Plans entered into by the CEO, approval is required from the GC.

The preapprovals described above for Corporate Officers are submitted to the Compliance Department for its preapproval, which is valid for the length indicated on the approval notification which is generally the end of the next business day, unless otherwise stipulated.

7. Other Prohibitions

Other restrictions that are applicable to transactions in Firm Securities are described below.

7.1 Prohibited Trading Activity

Trading with respect to Firm Securities is prohibited for Window List Personnel and all other Firm Personnel who are subject to personal account dealing restrictions under Firm policies in the following:

- Forwards and futures (all asset classes)
- Swaps (all asset classes)
- Uncovered option strategies except Long-Term Equity Anticipation Securities (LEAPS)
- Short sales

Except as set forth in Section 7.2, direct hedging strategies (e.g., covered calls) with respect to Firm Securities are permitted but must be proportionate to the risk (i.e., fully covered with underlying shares).

All Employees are prohibited from hedging or pledging unvested shares of JPMC common stock received as compensation.

7.2 Anti-Hedging/Anti-Pledging

Shares of JPMC common stock owned outright or through deferred compensation by a member of the JPMC Operating Committee or Director may not be held in margin accounts or otherwise pledged as collateral, nor may the economic risk of such shares be hedged.

7.3 Minimum Holding Period

Window List Personnel and their Connected Persons are required to hold Firm Securities for a minimum holding period (specific to each region and/or line of business) prior to transacting in those Firm Securities.

Vested shares of JPMC common stock or shares of JPMC common stock received in connection with purchases under the ESPP are deemed to have satisfied the minimum holding period requirement.

8. Post-termination Transactions

If a Firm Person is aware of Firm MNPI when their employment, directorship or other service relationship with the Firm terminates, that Firm Person and their Connected Persons may not trade in Firm Securities or disclose any Firm Material Nonpublic Information until such information has become public or is no longer material.

9. Personal Responsibility for Compliance with this Policy and Potential Disciplinary Action

This Policy is designed to reduce the risk of violations of the insider trading provisions of the U.S. federal securities laws, but compliance with this Policy is not an assurance that an insider trading violation will not be found to have occurred. The ultimate responsibility for adhering to this Policy and avoiding improper trading rests exclusively with Firm Personnel and their Connected Persons. Any action on the part of Firm Personnel and their Connected Persons pursuant to this Policy (or otherwise) does not insulate an individual from liability under applicable securities laws and this Policy does not constitute legal advice in any way. The existence of a personal financial emergency does not excuse anyone subject to this Policy from compliance with this Policy and the laws prohibiting insider trading.

In addition to potential criminal and civil liability, failure to comply with the requirements of this Policy may result in the receipt of Policy reminders or violations which may lead to disciplinary action, up to and including termination of employment (subject to local laws and regulations). The Firm also reserves the right to instruct an individual to cancel any trade at his or her expense.

For further information or questions regarding this Policy, Firm Personnel may reach out to the Compliance Department or Office of the Secretary. Firm Personnel should also refer to the Code of Conduct and other related Firm policies.

Exhibit 21

JPMorgan Chase & Co.

List of subsidiaries

While there are a number of subsidiaries that are required to be reported for various purposes to bank regulators, the following is a list of JPMorgan Chase & Co.'s significant legal entity subsidiaries as of December 31, 2024, as defined by SEC rules. The list includes the parent company of significant subsidiaries even if the parent company did not meet the definition of a significant subsidiary. Excluded from the list are subsidiaries that, if considered in the aggregate, would not constitute a significant subsidiary under SEC rules as of December 31, 2024.

Also included in the list are certain subsidiaries that have been designated as material legal entities for resolution planning purposes under the Dodd-Frank Act that did not meet the definition of a significant subsidiary under SEC rules.

December 31, 2024 Name	Organized Under The Laws Of
JPMorgan Chase Bank, National Association	United States

Exhibit 31.1

JPMorgan Chase & Co.

CERTIFICATION

I, James Dimon, certify that:

1. I have reviewed this Annual Report on Form 10-K of JPMorgan Chase & Co.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

JPMorgan Chase & Co.

CERTIFICATION

I, Jeremy Barnum, certify that:

1. I have reviewed this Annual Report on Form 10-K of JPMorgan Chase & Co.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 32

JPMorgan Chase & Co.

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report of JPMorgan Chase & Co. on Form 10-K for the period ended December 31, 2024 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned officers of JPMorgan Chase & Co., certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of JPMorgan Chase & Co.

Jeremy Barnum
Executive Vice President and Chief Financial Officer

This certification accompanies this Annual Report and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that Section.

A signed original of this written statement required by Section 906 has been provided to, and will be retained by, JPMorgan Chase & Co. and furnished to the Securities and Exchange Commission or its staff upon request.

Exhibit 97

Policy for the Recovery of Erroneously Awarded Incentive-Based Compensation

Effective Date: October 2, 2023

1. Summary or Rationale

In accordance with the applicable rules of The New York Stock Exchange (the "NYSE") Listed Company Manual, Section 10D of the Securities Exchange Act of 1934, as amended ("Exchange Act") and Rule 10D-1 thereunder ("Rule 10D-1"), JPMorganChase (the "Firm") has adopted this policy (this "Policy") to provide for the recovery of Erroneously Awarded Incentive-Based Compensation from Executive Officers in the event of a Restatement. All capitalized terms used and not otherwise defined herein shall have the meanings set forth in Section 5, below.

2. Scope

	Subject to	Role to Play
Lines of Business	• All	
Corporate Functions	• All	• Human Resources
Locations	• All	
Legal Entities	• All	

2.1. Included in Scope

This Policy applies to Incentive-Based Compensation received by a person:

- after beginning service as an Executive Officer,
- who served as an Executive Officer at any time during the performance period for that Incentive-Based Compensation,
- while the Firm has a class of securities listed on a national securities exchange, and
- during the Recovery Period.

Notwithstanding the look-back requirement, the Firm is only required to apply this Policy to Incentive-Based Compensation received on or after October 2, 2023. This Policy will continue to apply after an employee has terminated.

For purposes of this Policy, Incentive-Based Compensation shall be deemed "received" in the Firm's fiscal period during which the Financial Reporting Measure specified in the Incentive-Based Compensation award is attained, even if the payment or grant of the Incentive-Based Compensation occurs after the end of that period.

3. Changes from Previous Version

This is the first version of this Policy.

4. Policy Statement

The Firm shall recover reasonably promptly the Erroneously Awarded Incentive-Based Compensation in the event that the Firm is required to prepare a Restatement.

For clarity, the Firm's obligation to recover Erroneously Awarded Incentive-Based Compensation under this Policy is not dependent on if or when a Restatement is filed.

The Firm shall recover Erroneously Awarded Incentive-Based Compensation in compliance with this Policy except to the extent provided under Section 4.1.2 below.

4.1 Recovery of Erroneously Awarded Incentive-Based Compensation

4.1.1 In the event of a Restatement, the Firm will reasonably promptly recover the Erroneously Awarded Incentive-Based Compensation received in accordance with the NYSE rules and Rule 10D-1 as follows:

- For purposes of determining the relevant Recovery Period, the date that the Firm is required to prepare the Restatement ("Restatement Date") is the earlier to occur of:
  - the date the Board of Directors of the Firm (the "Board"), a committee of the Board, or the officer or officers of the Firm authorized to take such action if Board action is not required, concludes, or reasonably should have concluded, that the Firm is required to prepare a Restatement, or
  - the date a court, regulator, or other legally authorized body directs the Firm to prepare a Restatement.
- The Compensation & Management Development Committee of the Board (the "Committee") composed of independent directors responsible for executive compensation, or in the absence of such committee, a majority of the independent directors serving on the Board, shall determine the Erroneously Awarded Incentive-Based Compensation received by each Executive Officer during the relevant Recovery Period.
- The amount of Incentive-Based Compensation subject to recovery under this Policy is the amount of Incentive-Based Compensation received that exceeds the amount of Incentive-Based Compensation that otherwise would have been received had it been determined based on the restated amounts, computed without regard to any taxes paid (the "Erroneously Awarded Incentive-Based Compensation").
- For Incentive-Based Compensation based on (or derived from) the Firm's stock price or total shareholder return, where the Erroneously Awarded Incentive-Based Compensation is not subject to mathematical recalculation directly from the information in the applicable Restatement:
  - The amount to be recovered shall be based on a reasonable estimate of the effect of the Restatement on the Firm's stock price or total shareholder return upon which the Incentive-Based Compensation was received; and
  - The Firm shall maintain documentation of the determination of such reasonable estimate and provide such documentation to the NYSE.
- The Committee shall have discretion to determine the appropriate means of recovering Erroneously Awarded Incentive-Based Compensation based on the

particular facts and circumstances. Notwithstanding the foregoing, except as set forth in 4.1.2 below, in no event may the Firm settle for an amount that is less than the Erroneously Awarded Incentive-Based Compensation that is subject to recovery under this Policy.

- To the extent that the Executive Officer has already reimbursed the Firm for any Erroneously Awarded Incentive-Based Compensation received under any duplicative recovery obligations established by the Firm or applicable law, it shall be appropriate for any such reimbursed amount to be credited to the Erroneously Awarded Incentive-Based Compensation that is subject to recovery under this Policy.

1. **Notwithstanding anything herein to the contrary, the Firm shall not be required to take the actions contemplated by Section 4.1.1 above if it is determined by the Committee that recovery would be impracticable and any of the following conditions are met:**

- The direct expenses paid to a third party to assist in enforcing this Policy would exceed the amount to be recovered. Before making this determination, the Firm shall make a reasonable attempt to recover the Erroneously Awarded Incentive-Based Compensation, document such attempt(s) and provide such documentation to the NYSE;
- Recovery would violate home country law where that law was adopted prior to November 28, 2022, provided that, before determining that it would be impracticable to recover any Erroneously Awarded Incentive-Based Compensation based on violation of home country law, the Firm shall obtain an opinion of home country counsel, acceptable to the NYSE, that recovery would result in such a violation and a copy of the opinion shall be provided to the NYSE; or
- Recovery would likely cause an otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of the Firm, to fail to meet the requirements of Section 401(a)(13) or Section 411(a) of the Internal Revenue Code of 1986, as amended, and regulations thereunder.

4.2 Disclosure Requirements

The Firm shall file all disclosures with respect to this Policy and recoveries under this Policy in accordance with the requirements of the U.S. Federal securities laws, including the disclosure required by the applicable Securities and Exchange Commission ("SEC") filings.

4.3 Prohibition of Indemnification

Notwithstanding the terms of any indemnification arrangement or insurance policy with any individual covered by this Policy, the Firm shall not indemnify any Executive Officer or former Executive Officer against the loss of Erroneously Awarded Incentive-Based Compensation, including any payment or reimbursement for the cost of insurance obtained by any such covered individual to fund amounts recoverable under this Policy.

4.4 Administration; Amendment; Termination

All determinations under this Policy shall be made by the Committee, including determinations regarding how any recovery under this Policy is effected. Any determinations of the Committee shall be final, binding and conclusive and need not be uniform with respect to each individual covered by this Policy.

The Committee may amend this Policy from time to time and may terminate this Policy at any time, in its discretion.

4.5 Other Recovery Rights

Any right of recovery under this Policy is in addition to, and not in lieu of, any other remedies or rights of recovery that may be available to the Firm under applicable law, regulation or rule or pursuant to the terms of any policy of the Firm or any provision in any employment agreement, equity award agreement, compensation plan, or any other agreement or arrangement.

5. Defined Terms

Executive Officer	An Executive Officer is the Firm's president, principal financial officer, principal accounting officer (or if there is no such accounting officer, the controller), any vice-president of the Firm in charge of a principal business unit, division, or function (such as sales, administration, or finance), any other officer who performs a policy-making function, or any other person who performs similar policy-making functions for the Firm. Policy-making function is not intended to include policy-making functions that are not significant. Identification of an Executive Officer for purposes of this Policy will include at a minimum executive officers identified pursuant to 17 CFR 229.401(b).
Financial Reporting Measure	Any measure that is determined and presented in accordance with the accounting principles used in preparing the Firm's financial statements, and any measures that are derived wholly or in part from such measure. Stock price and total shareholder return are also Financial Reporting Measures. A Financial Reporting Measure need not be presented within the Firm's financial statements or included in a filing with the SEC.
Incentive-Based Compensation	Any compensation that is granted, earned or vested based wholly or in part upon the attainment of a Financial Reporting Measure.
Recovery Period	With respect to any accounting restatement, the three completed fiscal years immediately preceding the Restatement Date, and if the Firm changes its fiscal year, any transition period of less than nine months within or immediately following those three completed fiscal years.
Restatement	An accounting restatement due to the material noncompliance of the Firm with any financial reporting requirement under the securities laws, including any required accounting restatement to correct an error in previously issued financial statements that is material to the previously issued financial statements (a "Big R" restatement), or that would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period (a "little r" restatement).

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically, every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐	Smaller reporting company	☐
		Emerging growth company	☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant’s executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of June 30, 2024 the aggregate market value of voting stock held by non-affiliates of the registrant, based upon the closing sales price for the registrant’s common stock, as reported in the NASDAQ Global Select Market System, was $287,180,927,160. Shares of common stock beneficially owned by each executive officer and director of the registrant and by each person known by the registrant to beneficially own 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for any other purpose.

As of December 31, 2024, there were 427,757,100 shares of the registrant’s common stock, par value $0.001, outstanding.

TABLE OF CONTENTS

PART I

Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the federal securities laws. These forward-looking statements include, but are not limited to, statements regarding: our core strategy; our ability to improve our content offerings and service; our future financial performance, including expectations regarding revenues, deferred revenue, operating income and margin, net income, expenses, and profitability; liquidity, including the sufficiency of our capital resources, net cash provided by (used in) operating activities, access to financing sources, and free cash flows; capital allocation strategies, including any stock repurchases or repurchase programs; seasonality; stock price volatility; impact of foreign exchange rate fluctuations; expectations regarding hedging activity; impact of interest rate fluctuations; adequacy of existing facilities; future regulatory changes and their impact on our business; intellectual property; cybersecurity; price changes and testing; accounting treatment for changes related to content assets; acquisitions; actions by competitors; membership growth, including impact of content and pricing changes on membership growth; partnerships; advertising; multi-household usage; member viewing patterns; dividends; future contractual obligations, including unknown content obligations and timing of payments; our global content and marketing investments, including investments in original programming, consumer products and live experiences; impact of work stoppages; content amortization; resolutions of tax examinations; tax expense; unrecognized tax benefits; deferred tax assets; resolutions of disputes and other proceedings; our ability to effectively manage change and growth; our company culture; and our ability to attract and retain qualified employees and key personnel. These forward-looking statements are subject to risks and uncertainties that could cause actual results and events to differ. A detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements is included throughout this filing and particularly in Item 1A: "Risk Factors" section set forth in this Annual Report on Form 10-K. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to revise or publicly release any revision to any such forward-looking statement, except as may otherwise be required by law.

Item 1. Business

ABOUT US

Netflix, Inc. (“Netflix”, “the Company”, “registrant”, “we”, or “us”) is one of the world’s leading entertainment services with approximately 302 million paid memberships in over 190 countries enjoying TV series, films and games across a wide variety of genres and languages. Members can play, pause and resume watching as much as they want, anytime, anywhere, and can change their plans at any time.

Our core strategy is to grow our business globally within the parameters of our operating margin target. We strive to continuously improve our members' experience by offering compelling content that delights them and attracts new members. We aim to offer a range of pricing plans, including our ad-supported subscription plan, to meet a variety of consumer needs. We seek to drive conversation around our content to further enhance member joy, and we are continuously enhancing our user interface to help our members more easily choose content that they will find enjoyable.

BUSINESS SEGMENTS

We operate as one operating segment. Our revenues are primarily derived from monthly membership fees for services related to streaming content to our members. See Note 12, *Segment and Geographic Information*, in the accompanying notes to our consolidated financial statements for further detail.

COMPETITION

The market for entertainment video is intensely competitive and subject to rapid change. We compete with a broad set of activities for consumers’ leisure time, including other entertainment video providers, such as linear television, streaming entertainment providers (including those that provide pirated content), video gaming providers, as well as user-generated content, some of which are by professional content creators, and more broadly against other sources of entertainment, such as social media, that our members could choose in their moments of free time. We also compete against entertainment video providers and content producers in obtaining content for our service, both for licensed content and for original content projects.

While consumers may maintain simultaneous relationships with multiple entertainment sources, we strive for consumers to choose us in their moments of free time. We have often referred to this choice as our objective of "winning moments of truth." In attempting to win these moments of truth with our members, we seek to continually improve our service, including both our technology and our content offerings.

SEASONALITY

Our membership growth exhibits a seasonal pattern that reflects variations when consumers buy internet-connected screens and when they tend to increase their viewing. Historically, the fourth quarter represents our greatest streaming membership growth. In addition, our membership growth can be impacted by our content release schedule and changes to pricing and plans.

INTELLECTUAL PROPERTY

We regard our trademarks, service marks, copyrights, patents, domain names, trade dress, trade secrets, proprietary technologies and similar intellectual property as important to our success. We use a combination of patent, trademark, copyright and trade secret laws and confidentiality agreements to protect our proprietary intellectual property. Our intellectual property rights extend to our technology, business processes, the content we produce and distribute through our service, and the consumer products and experiences based thereon. We use the intellectual property of third parties in creating some of our content, merchandising our products and marketing our service. Our ability to provide our members with content they can watch depends on studios, content providers and other rights holders licensing rights, including distribution rights, to such content and certain related elements thereof, such as the public performance of music contained within the content we distribute. The license periods and the terms and conditions of such licenses vary. Our ability to protect and enforce our intellectual property rights is subject to certain risks and from time to time we encounter disputes over rights and obligations concerning intellectual property. We cannot provide assurance that we will prevail in any intellectual property disputes.

REGULATION

The media landscape and the internet delivery of content have seen growing regulatory action. Historically, media has been highly regulated in many countries. We are seeing some of these legacy regulatory frameworks be updated and expanded to address services like ours. In particular, we are seeing some countries update their cultural support legislation to include services like Netflix. This includes content quotas, levies and investment obligations. Some even restrict the extent of ownership rights we can have both in our service and in our content. In certain countries, regulators are also looking at restrictions that could require formal reviews of and/or adjustments to content that appears on our service in their country. In general these regulations impact all services and may make operating in certain jurisdictions more expensive or restrictive as to the content offerings we may provide.

HUMAN CAPITAL

We view our employees and our culture as key to our success. As of December 31, 2024, we had approximately 14,000 full-time employees. Of these, approximately 9,600 (69%) were located in the United States and Canada, 2,200 (16%) in Europe, Middle East, and Africa, 600 (4%) in Latin America and 1,600 (11%) in Asia-Pacific. We also have a number of employees engaged in content production, some of whom are part-time or temporary, and whose numbers fluctuate throughout the year and may be covered by collective bargaining agreements. We believe an important component of our success is our company culture. This culture, which is detailed in a "Culture Memo" located on our website, is often described as providing a unique environment for our employees to perform the best work of their lives in pursuit of excellence. We aim to attract and retain great people - representing a diverse array of perspectives and skills - to work together as a dream team. As our business grows and changes, we seek to improve our culture to meet the new needs of our business. We believe our dynamic culture helps us create a better experience for our members, employees, creators and partners.

As we have expanded our offices globally, our company culture remains an important aspect of our operations. We are mindful of cultural differences across and within regions. Fostering a work environment that is culturally diverse, inclusive and equitable is a major focus for us. We work to build diversity, inclusion and equity into all aspects of our operations globally, with the goal of having diversity and inclusion function as a critical lens through which each Netflix employee carries out their role. We want more people and cultures to see themselves reflected on screen - so it’s important that our employee base is diverse and represents the communities we serve. We look to help increase representation by educating our people leaders and recruiters on how to hire more inclusively, and to help the company and senior leaders diversify their networks. We also support numerous employee resource groups (ERGs), representing employees and allies from a broad array of historically underrepresented and/or marginalized communities. We publish annually an update on our inclusion initiatives and progress, which further highlights our approach to diversity and inclusion, and publish our EEO-1 reports on our website.

We believe in fostering great leaders. We offer various experiences and training to inform our employees about our culture and other context that we believe is important for success at Netflix. We aim to equip our people leaders (officers, VPs, directors, and manager-level employees) to lead the business and our teams in alignment with our expectations and strategic objectives.

We aim generally to pay our employees at their personal top of market, and they generally are able to choose the form of their compensation between cash and stock options. This permits employee compensation to be highly personalized and reflective of each employee's individual needs and preferences. We conduct pay equity analyses at least annually, and have adopted practices to help ensure that employees from underrepresented groups are not being underpaid based on gender identity (globally) and race or ethnicity (U.S.) relative to others doing the same or similar work under comparable circumstances. We aim to rectify any pay gaps that we find through this analysis.

We care about the health and well-being of our employees and their families and provide a variety of benefit programs based on region, including health benefits. In the U.S., employees generally receive an annual cash health benefit allowance that they may allocate to medical, dental and vision premiums in a way that makes sense for them. Employees have access to a host of other benefits, including mental health, childcare, family planning and a company match for charitable donations.

We believe that our approach to human capital resources has been instrumental in our growth, and has made Netflix a desirable destination for employees.

OTHER INFORMATION

We maintain a website at *www.netflix.com.* The contents of our website are not incorporated in, or otherwise to be regarded as part of, this Annual Report on Form 10-K. We make available, free of charge on our website, access to our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as soon as reasonably practicable after we file or furnish them electronically with the Securities and Exchange Commission ("SEC").

Investors and others should note that we announce material financial and other information to our investors using our investor relations website (*ir.netflix.net*), SEC filings, press releases, public conference calls and webcasts. We use these channels as well as social media and blogs to communicate with our members and the public about our company, our services and other issues. It is possible that the information we post on social media and blogs could be deemed to be material information. Therefore, we encourage investors, the media, and others interested in our company to review the information we post on the social media channels and blogs listed on our investor relations website.

Item 1A. Risk Factors

If any of the following risks actually occur, our business, financial condition and results of operations could be harmed. In that case, the trading price of our common stock could decline, and you could lose all or part of your investment.

Risks Related to Our Business

If our efforts to attract and retain members are not successful, our business will be adversely affected.

We must continually add new members both to replace canceled memberships and to grow our business beyond our current membership base. Our ability to continue to attract and retain members will depend in part on our ability to consistently provide our members in countries around the globe with compelling content choices that keep our members engaged with our service, effectively drive conversation around our content and service, as well as provide a quality experience for choosing and enjoying TV series, films and games. Our penetration and growth rates have fluctuated and vary across the jurisdictions where we provide our service. In countries where we have been operating for many years or where we are highly penetrated, our membership growth is slower than in newer or less penetrated countries. Furthermore, the relative service levels, content offerings, pricing and related features of competitors to our service may adversely impact our ability to attract and retain members. Competitors include other entertainment video providers, such as linear television, and streaming entertainment providers (including those that provide pirated content), video gaming providers, as well as user-generated content, some of which are by professional content creators, and more broadly other sources of entertainment, such as social media, that our members could choose in their moments of free time.

Members cancel our service for many reasons, including a perception that they do not use the service sufficiently, that they need to cut household expenses, dissatisfaction with content, a preference for competitive services and customer service issues that they believe are not satisfactorily resolved. Membership growth is also impacted by seasonality, with the fourth quarter historically representing our greatest growth, as well as the timing of our content release schedules. Adverse macroeconomic conditions, including inflation, may also adversely impact our ability to attract and retain members. If we do not grow as expected, given, in particular, that our content costs are largely fixed in nature, we may not be able to adjust our expenditures or increase our (per membership) revenues, including by adjusting membership pricing, commensurate with the lowered growth rate such that our margins, liquidity and results of operations may be adversely impacted. If we are unable to successfully compete with current and new competitors in providing compelling content, retaining our existing members and attracting new members, our business will be adversely affected.

If we do not continuously provide value to our members, including making improvements to our service in a manner that is favorably received by them, our revenue, results of operations and business will be adversely affected.

If consumers do not perceive our service offering to be of value, including if we introduce new or adjust existing features, adjust pricing or service offerings, or change the mix of content in a manner that is not favorably received by them, we may not be able to attract and retain members, and accordingly, our revenue and results of operations may be adversely affected. We expanded our entertainment video offering to include games and, more recently, live programming. If our efforts to sustain and improve our existing TV and film offering, as well as develop and expand our video entertainment options, are not done in a manner valued by our current and future members, our ability to attract and retain members may be negatively impacted. We may also seek to extend our business into new products and services to help drive growth. For example, we continue to expand our offering of consumer products and live experiences. To the extent we cannot successfully find and develop new products, experiences and services to help drive growth, or we do not realize the expected benefits or generate additional revenue from such new products, experiences, and services, our future results of operations and growth may be adversely impacted.

We have and may, from time to time, adjust our membership pricing, our membership plans, or our pricing model itself, including for example, the lower-priced ad-supported subscription plan. Similarly, we have increased enforcement of and will continue to enforce our terms of use to limit multi-household usage and shared viewing outside of a household. These and other adjustments we make may not be well-received by consumers, and could negatively impact our ability to attract and retain members, revenue and our results of operations. In addition, many of our members rejoin our service or originate from word-of-mouth advertising from existing members. If our efforts to satisfy our existing members or adjustments to our service are not successful, we may not be able to attract or retain members, and as a result, our ability to maintain and/or grow our business will be adversely affected.

Changes in competitive offerings for entertainment video could adversely impact our business.

The market for entertainment is intensely competitive and subject to rapid change. Through new and existing distribution channels, consumers have increasing options to access entertainment video. The various economic models underlying these channels include subscription, transactional, ad-supported and piracy-based models. All of these have the potential to capture meaningful segments of the entertainment video market. We face competition from traditional providers of entertainment video, including broadcasters and cable network operators, as well as internet based e-commerce or entertainment video providers and platforms. Several of these competitors have long operating histories, large customer bases, strong brand recognition, exclusive rights to certain content, large content libraries, and significant financial, marketing and other resources. They may offer more compelling content or secure better terms from suppliers, adopt more aggressive pricing and devote more resources to product development, technology, infrastructure, content acquisitions and marketing. New entrants may enter the market or existing providers may adjust their services with unique offerings or approaches to providing entertainment video. In addition, new technological developments, including the development and use of generative artificial intelligence, are rapidly evolving. If our competitors gain an advantage by using such technologies more effectively to satisfy consumer demand, our ability to compete successfully and our results of operations could be adversely impacted. Companies also may enter into business combinations or alliances that strengthen their competitive positions. Piracy also threatens to damage our business, as its fundamental proposition to consumers is so compelling and difficult to compete against: virtually all content for free. In light of the compelling consumer proposition, piracy services are subject to rapid global growth, and our efforts to prevent that growth may be insufficient. If we are unable to successfully or profitably compete with current and new competitors and win moments of truth, our business will be adversely affected, and we may not be able to increase or maintain market share, revenues or profitability.

We face risks, such as unforeseen costs and potential liability in connection with content we acquire, produce, license and/or distribute through our service.

As a producer and distributor of content, we face potential liability for negligence, copyright and trademark infringement, or other claims based on the nature and content of materials that we acquire, produce, license and/or distribute. We also may face potential liability for content used in promoting our service, including marketing materials. We devote significant resources toward the development, production, marketing and distribution of original programming. We believe that original and exclusive programming can help differentiate our service from other offerings, enhance our brand and otherwise attract and retain members. To the extent our programming does not meet our expectations, in particular, in terms of costs, viewing and popularity, our business, including our brand and results of operations may be adversely impacted. As a content producer, we are responsible for production costs and other expenses, such as ongoing guild payments, and take on risks associated with production, such as completion and key talent risk. Further, negotiations or renewals related to entertainment industry collective bargaining agreements have, and in the future, could negatively impact timing and costs associated with our productions. We contract with third parties related to the development, production, marketing and distribution of our original programming. We may face potential liability or may suffer significant losses in connection with these arrangements, including but not limited to if such third parties violate applicable law, become insolvent or engage in fraudulent behavior. To the extent we create and sell physical or digital merchandise relating to our programming, and/or license such rights to third parties, we could become subject to product liability, intellectual property or other claims related to such merchandise. We may decide to remove content from our service, not to place licensed or produced content on our service or discontinue or alter production of original content if we believe such content might not be well received by our members, is prohibited by law, or could be damaging to our brand or business.

To the extent we do not accurately anticipate costs or mitigate risks, including for content that we obtain but ultimately does not appear on or is removed from our service, or if we become liable for content we acquire, produce, license and/or distribute, our business may suffer. Litigation to defend these claims could be costly and the expenses and damages arising from any liability or unforeseen production risks could harm our results of operations. We may not be indemnified against claims or costs of these types and we may not have insurance coverage for these types of claims.

If we are not able to manage change and growth, our business could be adversely affected.

We are expanding our operations, scaling our streaming service to effectively and reliably handle anticipated growth in both members and features related to our services, such as introducing games and advertising on our service, as well as offering live programming and expanding our consumer products and experiences. We are also scaling our own studio operations to produce original content. As our international offering evolves, we are managing and adjusting our business to address varied content offerings, consumer customs and practices, in particular those dealing with e-commerce and streaming video, as well as differing legal and regulatory environments. As we scale our streaming service and introduce new features such as our ad-supported subscription plan and live programming, we are developing technology and utilizing third-party “cloud” computing, technology and other services. As we scale our content production, including games, and introduce new features and expand our consumer products and experience offerings, we are building out expertise in a number of disciplines, including creative, marketing, legal, finance, licensing, merchandising and other resources, which requires significant resources and management attention. Further, we may expand our content and service offerings in a manner that is not well received by consumers. As we grow our operations, we may face integration and operational challenges as well as potential unknown liabilities and reputational concerns in connection with partners we work with or companies we may acquire or control. If we are not able to manage the growing complexity of our business, including improving, refining or evolving our corporate culture, as well as our systems and operational practices related to our streaming operations and original content, our business may be adversely affected.

If we fail to maintain a positive reputation concerning our service and the content we offer, we may not be able to attract or retain members, we may face regulatory scrutiny and our operating results may be adversely affected.

We believe that a positive reputation concerning our service is important in attracting and retaining members. To the extent our content is perceived as low quality, offensive or otherwise not compelling to consumers, our ability to establish and maintain a positive reputation may be adversely impacted. To the extent our content is deemed controversial or offensive by government regulators, we may face direct or indirect retaliatory action or behavior, including being required to remove such content from our service, our entire service could be banned and/or become subject to heightened regulatory scrutiny across our business and operations. We could also face boycotts which could adversely affect our business. Furthermore, to the extent our response to government action or our marketing, customer service and public relations efforts are not effective or result in negative reaction, our ability to establish and maintain a positive reputation may likewise be adversely impacted. There is an increasing focus from regulators, investors, members and other stakeholders on environmental, social, and governance (“ESG”) matters, both in the United States and internationally, including the adoption of new disclosure and regulatory frameworks. To the extent we are unable to meet regulatory or industry standards or investor expectations on ESG issues or the content we distribute and the manner in which we produce content creates ESG related concerns, our reputation may be harmed.

Our business could be adversely impacted by costs and challenges associated with strategic acquisitions and investments.

From time to time, we acquire or invest in businesses, content, and technologies that support our business. The risks associated with such acquisitions or investments (some of which may be unforeseen) include the difficulty of integrating solutions, operations, and personnel; inheriting liabilities and exposure to litigation; failure to realize anticipated benefits and expected synergies; and diversion of management’s time and attention, among other acquisition-related risks.

We may not be successful in overcoming such risks, and such acquisitions and investments may negatively impact our business. In addition, if we do not complete an announced acquisition transaction or integrate an acquired business successfully and in a timely manner, we may not realize the benefits of the acquisition to the extent anticipated. Acquisitions and investments may contribute to fluctuations in our quarterly financial results. These fluctuations could arise from transaction-related costs and charges associated with eliminating redundant expenses or write-offs of impaired assets recorded in connection with acquisitions and investments, and could negatively impact our financial results.

We rely upon a number of partners to make our service available on their devices.

We currently offer members the ability to receive streaming content through a host of internet-connected devices, including TVs, digital video players, TV set-top boxes and mobile devices. We have agreements with various cable, satellite and telecommunications operators to make our service available through the TV set-top boxes of these service providers, some of which compete directly with us or have investments in competing streaming content providers. In many instances, our agreements also include provisions by which the partner bills consumers directly for the Netflix service or otherwise offers services or products in connection with offering our service. If partners or other providers do a better job of connecting consumers with content they want to watch, for example through multi-service discovery interfaces, our service may be adversely impacted. We intend to continue to broaden our relationships with existing partners and to increase our capability to stream content and offer games to other platforms and partners over time. If we are not successful in maintaining existing and creating new relationships, or if we encounter technological, content licensing, regulatory, business or other impediments to delivering our streaming content to our members via these devices, our ability to retain members and grow our business could be adversely impacted.

Our agreements with our partners are typically between one and three years in duration and our business could be adversely affected if, upon expiration, a number of our partners do not continue to provide access to our service or are unwilling to do so on terms acceptable to us, which terms may include the degree of accessibility and prominence of our service. Furthermore, devices are manufactured and sold by entities other than Netflix and while these entities should be responsible for the devices’ performance, the connection between these devices and our service may nonetheless result in consumer dissatisfaction toward us and such dissatisfaction could result in claims against us or otherwise adversely impact our business. In addition, technology changes to our streaming functionality may require that partners update their devices, and from time to time, lead to us to stop supporting the delivery of our service on certain legacy devices. If partners do not update or otherwise modify their devices, or if we discontinue support for certain devices, our service and our members' use and enjoyment could be negatively impacted.

We are subject to payment processing risk.

Our members pay for our service using a variety of different payment methods, including credit and debit cards, gift cards, prepaid cards, direct debit, online wallets and direct carrier and partner billing. We rely on internal systems and those of third parties to process payment. Acceptance and processing of these payment methods are subject to certain rules, regulations, and industry standards, including data storage requirements, additional authentication requirements for certain payment methods, and require payment of interchange and other fees. To the extent there are increases in payment processing fees, material changes in the payment ecosystem, such as large re-issuances of payment cards, delays in receiving payments from payment processors, changes to rules, regulations or industry standards concerning payments, loss of payment partners and/or disruptions or failures in our payment processing systems, partner systems or payment products, including products we use to update payment information, our revenue, operating expenses and results of operations could be adversely impacted. In certain instances, we leverage third parties such as our cable and other partners to bill members on our behalf. If these third parties become unwilling or unable to continue processing payments on our behalf, we would have to transition members or otherwise find alternative methods of collecting payments, which could adversely impact member acquisition and retention. In addition, from time to time, we encounter fraudulent use of payment methods, which could impact our results of operations and if not adequately controlled and managed could create negative consumer perceptions of our service. If we are unable to maintain our fraud and chargeback rate at acceptable levels, card networks may impose fines, our card approval rate may be impacted and we may be subject to additional card authentication requirements. The termination of our ability to process payments on any major payment method would significantly impair our ability to operate our business.

If government regulations relating to the internet or other areas of our business change, we may need to alter the manner in which we conduct our business, or incur greater operating expenses.

The adoption or modification of laws or regulations relating to the internet or other areas of our business could limit or otherwise adversely affect the manner in which we currently conduct our business. As our service and others like us gain traction in international markets, governments are increasingly looking to introduce new or extend legacy regulations to these services, in particular those related to broadcast media and tax. For example, European law enables individual member states to impose levies and other financial obligations on media operators that provide services in their jurisdiction. Several European Union (EU) Member States have and others may, over time, impose financial and regulatory obligations on us. In addition, the continued growth and development of the market for online commerce may lead to more stringent consumer protection laws, which may impose additional burdens on us. Rules governing new technological developments, including generative artificial intelligence, are nascent and rapidly evolving such that the impact on areas related to our business remains uncertain. For example, in Europe, the Digital Markets Act remains subject to non-compliance investigations, the result of which could change how we interact with digital gatekeepers like Apple and Google. If we are required to comply with new regulations or legislation or new interpretations of existing regulations or legislation, this compliance could cause us to incur additional expenses or alter our business model.

Changes in laws or regulations that adversely affect the growth, popularity or use of the internet, including laws impacting net neutrality, requiring payment of network access fees or payment of network support taxes, could decrease the demand for our service and increase our cost of doing business. Certain laws intended to prevent network operators from discriminating against the legal traffic that traverse their networks have been implemented in many countries, including across the EU and several U.S. states. In others, the laws may be nascent, evolving or non-existent. For example, a U.S. federal appeals court recently overturned the Federal Communications Commission's net neutrality rules. Given uncertainty around these rules, including changing interpretations, amendments or repeal, coupled with potentially significant political and economic power of local network operators, we could experience discriminatory or anti-competitive practices that could impede our growth, cause us to incur additional expense or otherwise negatively affect our business.

We are engaged in legal proceedings that could cause us to incur unforeseen expenses and could occupy a significant amount of our management's time and attention.

From time to time, we are subject to litigation or claims that could negatively affect our business operations and financial position. As we have grown, we have seen a rise in the number of litigation matters against us. These matters have included copyright and other claims related to our content, products, patent infringement claims, tax litigation, employment related litigation, as well as consumer and securities class actions, each of which are typically expensive to defend. Litigation disputes could cause us to incur unforeseen expenses, result in content unavailability, service disruptions, and otherwise occupy a significant amount of our management's time and attention, any of which could negatively affect our business operations and financial position. We also receive inquiries and subpoenas and other types of information requests from government authorities, and we may become subject to related claims and other actions related to our business activities. While the ultimate outcome of investigations, inquiries, information requests and related legal proceedings is difficult to predict, such matters can be expensive, time-consuming and distracting, and adverse resolutions or settlements of those matters may result in, among other things, modification of our business practices, reputational harm or costs and significant payments, any of which could negatively affect our business operations and financial position.

Our advertising offering is new and subject to various risks and uncertainties, which may adversely affect our business.

We have limited experience and operating history offering advertising on our service, and our advertising revenue may not grow as we expect. Our ability to generate advertising revenue is subject to various risks and will depend on a number of factors, including:

- our ability to attract and retain advertisers;
- fluctuations in memberships, including those selecting the ad-supported subscription plan, and member engagement;
- the quantity or quality of ads shown to our members;
- our ability to compete effectively for advertising spend;
- the impact of seasonal, cyclical or other shifts in advertising spend, including the impact of macroeconomic conditions;
- the availability, accuracy, utility, and security of analytics and measurement solutions offered by us or third parties that demonstrate the value of our ads to marketers, or our ability to further improve such tools;
- changes in the way advertising on devices, connected TVs or on personal computers is measured or priced;
- adverse legal developments relating to advertising or measurement tools;
- changes in third-party policies, which may negatively impact the ability to measure, deliver and select ads to be served;
- regulatory, legislative and industry developments relating to the collection and use of information and other privacy considerations, including regulations related to ad targeting and measurement tools;
- any liability or reputational harm from advertisements shown on our service;

- our relationship with third-party service providers for the management, operation, sale and technology to support advertisements on our service;
- our ability to develop and expand an advertising sales and advertising technology organization team;
- our ability to develop the technology and related infrastructure to support advertising and drive value to advertisers;
- the impact of our content and reputation on advertisers' willingness to spend with us; and
- any member dissatisfaction due to advertisements.

Risks Related to Intellectual Property

If studios, content providers or other rights holders refuse to license streaming content or other rights upon terms acceptable to us, our business could be adversely affected.

Our ability to provide our members with content they can enjoy depends on obtaining various rights from third parties upon terms acceptable to us, including necessary distribution rights, to such content and certain related elements thereof, such as the public performance of music contained within the content we distribute. The license periods and the terms and conditions of such rights vary. As content providers develop their own streaming services, they may be unwilling to provide us with access to certain content, including popular series or movies. If the studios, content providers and other rights holders are not or are no longer willing or able to license us content upon terms acceptable to us, our ability to stream content to our members may be adversely affected and/or our costs could increase. Certain licenses for content provide for the studios or other content providers to withdraw content from our service relatively quickly. Because of these provisions and other actions we may take, content available through our service can be withdrawn on short notice. As competition increases, we see the cost of certain programming increase. As we seek to differentiate our service, we are often focused on securing certain exclusive rights when obtaining content, including original content. We are also focused on programming an overall mix of content that delights our members in a cost efficient manner. Within this context, we are selective about the titles we add and renew to our service. If we do not maintain a compelling mix of content, our member acquisition and retention may be adversely affected.

Music and certain authors' performances contained within content we distribute may require us to obtain licenses for such distribution. In this regard, we engage in negotiations with collection management organizations ("CMOs") and similar entities that hold certain rights to music and/or other interests in intellectual property (e.g., remuneration rights) in connection with streaming content into various territories. If we are unable to reach mutually acceptable terms with these organizations, we could become involved in litigation and/or could be enjoined from distributing certain content, which could adversely impact our business. Additionally, pending and ongoing litigation and negotiations between certain CMOs and other third parties in various territories could adversely impact our negotiations with CMOs, or result in music publishers represented by certain CMOs unilaterally withdrawing rights, and thereby adversely impact our ability to reach licensing agreements reasonably acceptable to us. Failure to reach such licensing agreements could expose us to potential liability for copyright infringement or otherwise increase our costs. Additionally, as the market for the digital distribution of content grows, a broader role for CMOs in the remuneration of authors, performers and other beneficiaries of neighboring rights is likely to expose us to greater distribution expenses in certain markets.

If our trademarks and other proprietary rights are not adequately protected to prevent use or appropriation by third parties, the value of our brand and other intangible assets may be diminished, and our business may be adversely affected.

We rely and expect to continue to rely on a combination of confidentiality and license agreements with our employees, consultants and third parties with whom we have relationships, as well as trademark, copyright, patent and trade secret protection laws, to protect our proprietary rights. We may also seek to enforce our proprietary rights through court proceedings or other legal actions. We have filed and we expect to file from time to time for trademark, copyright, and patent applications. Nevertheless, these applications may not be approved, third parties may challenge any copyrights, patents or trademarks issued to or held by us, third parties may knowingly or unknowingly infringe our intellectual property rights, and we may not be able to prevent infringement or misappropriation without substantial expense to us. If the protection of our intellectual property rights is inadequate to prevent use or misappropriation by third parties, the value of our brand, content, and other intangible assets may be diminished, competitors may be able to more effectively mimic our service and methods of operations, the perception of our business and service to members and potential members may become confused in the marketplace, and our ability to attract members may be adversely affected.

We currently hold various domain names relating to our brand, including Netflix.com. Failure to protect our domain names could adversely affect our reputation and brand and make it more difficult for users to find our website and our service. We may be unable, without significant cost or at all, to prevent third parties from acquiring domain names that are similar to, infringe upon or otherwise decrease the value of our trademarks and other proprietary rights.

Intellectual property claims against us could be costly and result in the loss of significant rights related to, among other things, our technology, business processes, and content.

Trademark, copyright, patent and other intellectual property rights are important to us and other companies. Our intellectual property rights extend to our technology, business processes, the content we produce and distribute through our service, and consumer products, experiences, and marketing assets based thereon. We use the intellectual property of third parties in creating some of our content, merchandising our products and experiences, and marketing our service. From time to time, third parties allege that we have infringed or otherwise violated their intellectual property rights. If we are unable to obtain sufficient rights, successfully defend our use, or develop non-infringing technology or otherwise alter our business practices on a timely basis in response to claims against us for infringement, misappropriation, misuse or other violation of third-party intellectual property rights, our business and competitive position may be adversely affected. In addition, the use or adoption of new and emerging technologies may increase our exposure to intellectual property claims, and the availability of copyright and other intellectual property protection for AI-generated material is uncertain. Many companies are devoting significant resources to developing patents that could potentially affect many aspects of our business. There are numerous patents that broadly claim means and methods of conducting business on the internet. We have not searched for patents relative to our technology. Defending ourselves against intellectual property claims, whether they are with or without merit or are determined in our favor, results in costly litigation and diversion of technical and management personnel. It also may result in our inability to use our current technology and products, our recommendation and merchandising technology or inability to market our service or merchandise our products. We may also have to remove content from our service, or remove consumer products or marketing materials from the marketplace. As a result of a dispute, we may have to develop non-infringing technology, enter into royalty or licensing agreements, adjust our content, merchandising or marketing activities or take other actions to resolve the claims. These actions, if required, may be costly or unavailable on terms acceptable to us.

Risks Related to Information Technology

Any significant disruption in or unauthorized access to our computer systems or those of third parties that we utilize in our operations, including those relating to cybersecurity or arising from cyber-attacks, could result in a loss or degradation of service, unauthorized access, disclosure or destruction of data, including member and corporate information, or theft of intellectual property, including digital content assets, which could adversely impact our business.

Our reputation and ability to attract, retain and serve our members is dependent upon the reliable performance and security of our computer systems and those of third parties that we utilize in our operations. These systems may be subject to damage or interruption from, among other things, earthquakes, adverse weather conditions, other natural disasters, public health issues such as pandemics or epidemics, terrorist attacks, rogue employees, power loss, telecommunications failures, cybersecurity risks and incidents, and other interruptions beyond our control. Interruptions in these systems, or with the internet in general, could make our service unavailable or degraded or otherwise hinder our ability to deliver our service. Service interruptions, errors in our software or the unavailability of computer systems or data used in our operations could diminish the overall attractiveness of our service to existing and potential members.

Our computer systems and those of third parties we use in our operations are subject to constantly evolving cybersecurity threats, including cyber-attacks such as computer viruses, malware, ransomware, denial of service attacks, physical or electronic break-ins, or insider threats, as well as misconfigurations in information systems, networks, software or hardware, and similar disruptions or errors. These systems and those of third parties with which we do business have experienced and may continue to experience directed attacks intended to lead to interruptions and delays in our service and operations as well as loss, misuse or theft of personal information (of third parties, employees, and our members) and other data, confidential information or intellectual property. We and many of the third parties we work with rely on open source software and libraries that are integrated into a variety of applications, tools and systems, which may increase our exposure to vulnerabilities. The addition of new features or upgrades also increases our exposure to vulnerabilities, and generative artificial intelligence could intensify these cybersecurity risks. Additionally, outside parties may attempt to induce employees, vendors, partners, or users to disclose sensitive or confidential information in order to gain access to data. Any attempt by hackers to obtain our data (including member and corporate information) or intellectual property (including digital content assets), disrupt our service, or otherwise access our systems, or those of third parties we use, if successful, could harm our business, be expensive to remedy and damage our reputation. We have implemented certain systems and processes to thwart hackers and protect our data and systems. However, the techniques used to gain unauthorized access to data and software are constantly evolving, and we may be unable to anticipate, detect or prevent unauthorized access or address all cybersecurity incidents that occur. Because of our prominence, we (and/or third parties we use) have been and may continue to be a particularly attractive target for such attacks, and from time to time, we have experienced unauthorized releases of certain digital content assets and unintended disclosure of personal information due to incidents related to third parties. However, to date these unauthorized releases have not had a material impact on our service, systems or business. There is no assurance that hackers may not have a material impact on our service or systems in the future. We do not carry insurance to cover expenses related to such disruptions or unauthorized access. Efforts to prevent hackers from disrupting our service or otherwise accessing our systems are expensive to develop, implement and maintain. These efforts require ongoing monitoring and updating as technologies change and efforts to overcome security measures become more sophisticated, and may limit the functionality of or otherwise negatively impact our service offering and systems. Any significant disruption to our service or access to our systems could result in a loss of members, damage our reputation, and adversely affect our business and results of operations. Further, a penetration of our systems or a third-party's systems or other misappropriation or misuse of personal information could subject us to business, regulatory, litigation and reputation risk, which could have a negative effect on our business, financial condition and results of operations.

We utilize our own communications and computer hardware systems located either in our facilities or in that of a third-party provider. In addition, we utilize third-party "cloud" computing services in connection with our business operations. We also utilize our own and third-party content delivery networks ("CDN") to help us stream content and offer games in high volume to Netflix members over the internet. Problems faced by us or our third-party “cloud” computing or other network providers, including technological or business-related disruptions, as well as cybersecurity threats and regulatory interference, could adversely impact the experience of our members.

We rely upon Amazon Web Services to operate certain aspects of our service and any disruption of or interference with our use of the Amazon Web Services operation would impact our operations and our business would be adversely impacted.

Amazon Web Services (“AWS”) provides a distributed computing infrastructure platform for business operations, or what is commonly referred to as a "cloud" computing service. We have architected our software and computer systems so as to utilize data processing, storage capabilities and other services provided by AWS. Currently, we run the vast majority of our computing on AWS. Given this, along with the fact that we cannot easily switch our AWS operations to another cloud provider, any commercial disputes related to, disruption of or interference with our use of AWS would impact our operations and our business would be adversely impacted. While the retail side of Amazon competes with us, we do not believe that Amazon will use the AWS operation in such a manner as to gain competitive advantage against our service, although if it were to do so it could harm our business.

If the technology we use in operating our business fails, is unavailable, or does not operate to expectations, our business and results of operations could be adversely impacted.

We utilize a combination of proprietary and third-party technology to operate our business. This includes the technology that we have developed to recommend and merchandise content to our consumers as well as enable fast and efficient delivery of content to our members and their various consumer electronic devices. For example, we have built and deployed our own CDN. To the extent Internet Service Providers (“ISPs”) do not interconnect with our CDN or charge us to access their networks, or if we experience difficulties in our CDN’s operation, our ability to efficiently and effectively deliver our streaming content to our members could be adversely impacted and our business and results of operations could be adversely affected. Likewise, if our recommendation and merchandising technology does not enable us to predict and recommend titles that our members will enjoy, our ability to attract and retain members may be adversely affected. We also utilize third-party technology to help market our service, process payments, and otherwise manage the daily operations of our business. If our technology or that of third-parties we utilize in our operations fails or otherwise operates improperly, including as a result of “bugs” or other errors in our development and deployment of software, our ability to operate our service, retain existing members and add new members may be impaired. Any harm to our members’ devices caused by software used in our operations could have an adverse effect on our business, results of operations and financial condition.

Changes in how network operators handle and charge for access to data that travel across their networks could adversely impact our business.

We rely upon the ability of consumers to access our service through the internet. If network operators block, restrict or otherwise impair access to our service over their networks, our service and business could be negatively affected. To the extent that network operators implement usage based pricing, including meaningful bandwidth caps, or otherwise try to monetize access to their networks by data providers, we could incur greater operating expenses and our member acquisition and retention could be negatively impacted. Furthermore, to the extent network operators create tiers of internet access service and either charge us for or prohibit us from being available through these tiers, our business could be negatively impacted.

Most network operators that provide consumers with access to the internet also provide these consumers with multichannel video programming. As such, many network operators have an incentive to use their network infrastructure in a manner adverse to our continued growth and success. While we believe that consumer demand, regulatory oversight and competition will help counterbalance these incentives, to the extent that network operators are able to provide preferential treatment to their data as opposed to ours or otherwise implement discriminatory network management practices, our business could be negatively impacted. The extent to which these incentives limit operator behavior differs across markets.

Risks Related to Privacy

Privacy concerns could limit our ability to collect and leverage member personal information and disclosure of member personal information could adversely impact our business and reputation.

In the ordinary course of business and in particular in connection with content acquisition, merchandising our service to our members and our advertising offering, we collect and utilize information supplied by our members and third parties, which may include personal information and other data. We are subject to laws, rules and regulations relating to privacy and the collection, use and security of personal information, including but not limited to Regulation (EU) 2016/679 (also known as the General Data Protection Regulation or “GDPR”) and the California Privacy Rights Act ("CPRA"). Any actual or perceived failure to comply with the GDPR, the California Consumer Privacy Act/CPRA, other data privacy laws or regulations, or related contractual or other obligations, or any perceived privacy rights violation, have and could in the future lead to investigations, claims, and proceedings by governmental entities and private parties, which to date have not been material but may result in significant damages for contract breach, and other significant costs, penalties, and other liabilities, as well as harm to our reputation and market position.

Other businesses have been criticized by privacy groups and governmental bodies for attempts to link personal identities and other information to data collected on the internet regarding users' browsing and other habits. Increased regulation of data utilization practices, including self-regulation or findings under existing laws that limit our ability to collect, transfer and use personal information, could have an adverse effect on our business. In addition, if we were to disclose personal information about our members in a manner that was objectionable to them, our business reputation could be adversely affected, and we could face potential legal claims that could impact our operating results. Internationally, we may become subject to additional and/or more stringent legal obligations concerning our treatment of member and other personal information, such as laws regarding data localization, data transfer and/or restrictions on data export. Failure to comply with these obligations could subject us to liability, and to the extent that we need to alter our business model or practices to adapt to these obligations, we could incur additional expenses.

Our reputation and relationships with members would be harmed if member personal information, particularly billing data, were to be accessed by unauthorized persons.

We maintain personal information regarding our members, including names, age, gender and billing information. This personal information is maintained on our own systems as well as that of third parties we use in our operations. With respect to billing information, such as credit card numbers, we rely on encryption and authentication technology to secure such information. We take measures to protect against unauthorized intrusion into our members' information. Despite these measures and technologies we, our payment processing services or other third-party services we use such as AWS, could experience an unauthorized intrusion into our members' information. In the event of such a breach, current and potential members may become unwilling to provide the information to us necessary for them to remain or become members. We have notified and may in the future be required to notify regulators about any actual or perceived data breach (including various state Attorneys General, one or more EU data protection authorities, or other data protection authorities) as well as the individuals who are affected by the incident within strict time periods. Additionally, we could face legal claims or regulatory fines or penalties for such a breach. The costs relating to any data breach could be material, and we currently do not carry insurance against the risk of a data breach. We also maintain personal information concerning our employees, as well as personal information of others working on our productions. Should an unauthorized intrusion into our members' or employees' personal information and/or production personal information occur, our business could be adversely affected and our larger reputation with respect to data protection could be negatively impacted.

Risks Related to Liquidity

The long-term and largely fixed cost nature of our content commitments may limit our operating flexibility and could adversely affect our liquidity and results of operations.

In connection with licensing streaming content, we typically enter into multi-year commitments with studios and other content providers. We also enter into multi-year commitments for content that we produce, either directly or through third parties, including elements associated with these productions such as non-cancelable commitments under talent agreements. The payment terms of these agreements are not tied to member usage or the size of our membership base ("fixed cost") but may be determined by costs of production or tied to such factors as titles licensed and/or theatrical exhibition receipts. Such commitments, to the extent estimable under accounting standards, are included in the Contractual Obligations section of Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 8, Commitments and Contingencies in the accompanying notes to our consolidated financial statements included in Part II, Item 8, "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K. Given the multiple-year duration and largely fixed cost nature of content commitments, if business performance does not meet our expectations, our margins may be adversely impacted. Further, we may be unable to react to any reduction in our cash flows from operations, including those caused by a downturn in the economy, by reducing our streaming content obligations in the near-term. Payment terms for certain content commitments, such as content we directly produce, will typically require more up-front cash payments than other content licenses or arrangements whereby we do not fund the production of such content. To the extent revenue growth does not meet our expectations, our liquidity and results of operations could be adversely affected as a result of content commitments and accelerated payment requirements of certain agreements. In addition, the long-term and largely fixed cost nature of our content commitments may limit our flexibility in planning for, or reacting to changes in our business and the market segments in which we operate. If we license and/or produce content that is not favorably received by consumers in a territory, or is unable to be shown in a territory, acquisition and retention may be adversely impacted and given the long-term and fixed cost nature of our content commitments, we may not be able to adjust our content offerings quickly and our results of operations may be adversely impacted.

We may seek additional capital that may result in stockholder dilution or that may have rights senior to those of our common stockholders.

From time to time, we may seek to obtain additional capital, either through equity, equity-linked or debt securities. The decision to obtain additional capital will depend on, among other things, our business plans, operating performance and condition of the capital markets. Rising interest rates or any disruption in the capital markets could make it more difficult and expensive for us to raise additional capital or refinance our existing indebtedness. If we raise additional funds through the issuance of equity, equity-linked or debt securities, those securities may have rights, preferences or privileges senior to the rights of our common stock, and our stockholders may experience dilution. Any large equity or equity-linked offering could also negatively impact our stock price.

We have a substantial amount of indebtedness and other obligations, including streaming content obligations, which could adversely affect our financial position, and we may not be able to generate sufficient cash to service our debt and other obligations.

We have a substantial amount of indebtedness and other obligations, including streaming content obligations. Moreover, we may incur additional indebtedness in the future and incur other obligations, including additional streaming content obligations. Our ability to make payments on our debt and other obligations will depend on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business and other factors beyond our control. If we are unable to service our debt and other obligations from cash flows, we may need to refinance or restructure all or a portion of such obligations prior to maturity. If the financial markets become difficult or costly to access, including due to rising interest rates, fluctuations in foreign currency exchange rates or other changes in economic conditions, our ability to raise additional capital may be negatively impacted, and any refinancing or restructuring could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations.

As of December 31, 2024, we had the equivalent of $15.7 billion aggregate principal amount of senior notes outstanding (“Notes”), some of which is denominated in currencies other than the U.S. dollar. In addition, we have entered into a revolving credit agreement that provides for a $3 billion unsecured revolving credit facility. As of December 31, 2024, we have not borrowed any amount under this revolving credit facility. As of December 31, 2024, we had approximately $6.2 billion of total content liabilities as reflected on our consolidated balance sheet, some of which is denominated in currencies other than the U.S. dollar. Such amount does not include streaming content commitments that do not meet the criteria for liability recognition, the amounts of which are significant. Our substantial indebtedness and other obligations, including streaming content obligations, may require us to use a substantial portion of our cash flow from operations to make debt service payments and pay our other obligations when due, limit our ability to borrow additional funds, limit our flexibility to plan for, or react to, changes in our business and industry and place us at a competitive disadvantage compared to our less leveraged competitors. For more information on our streaming content obligations, including those not on our consolidated balance sheet, see Note 8, *Commitments and Contingencies,* in the accompanying notes to our consolidated financial statements included in Part II, Item 8, "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

Risks Related to International Operations

We could be subject to economic, political, regulatory and other risks arising from our international operations.

Operating in international markets requires significant resources and management attention and will subject us to economic, political, regulatory and other risks that may be different from or incremental to those in the U.S. In addition to the risks that we face in the U.S., our international operations involve risks that could adversely affect our business, including:

- the need to adapt our content and user interfaces for specific cultural and language differences;
- difficulties and costs associated with staffing and managing foreign operations;
- political or social unrest, global hostilities, and economic instability;
- compliance with laws such as the Foreign Corrupt Practices Act, UK Bribery Act and other anti-corruption laws, export controls and economic sanctions, and local laws prohibiting corrupt payments to government officials;
- difficulties in understanding and complying with local laws, regulations and customs in foreign jurisdictions;
- regulatory requirements or government action, whether in response to enforcement of actual or purported legal and regulatory requirements or otherwise, that results in disruption or non-availability of our service or particular content, administrative enforcement actions, fines, and civil and criminal liability, or increased operating costs in the applicable jurisdiction;
- application of foreign intellectual property laws, which requires the business to adapt to bespoke compliance rules, or changes to such laws, among other issues, may impact the economics of creating or distributing content, anti-piracy efforts, or our ability to protect or exploit intellectual property rights;
- adverse tax consequences such as those related to changes in tax laws or tax rates or their interpretations, and the related application of judgment in determining our global provision for income taxes, deferred tax assets or liabilities or other tax liabilities given the ultimate tax determination is uncertain;
- fluctuations in currency exchange rates, which have and may continue to impact revenues and expenses of our international operations and expose us to foreign currency exchange rate risk, and while we use derivative and non-derivative instruments to hedge certain exposures to fluctuations in exchange rates, the use of such hedging activities may not be effective in offsetting an adverse financial impact and may introduce or heighten counterparty risk and we may choose not to hedge certain exposures;
- rates of inflation;
- profit repatriation, currency control regulations and other restrictions on the transfer of funds;
- differing payment processing systems as well as consumer use and acceptance of electronic payment methods, such as payment cards;
- new and different sources of competition;

- censorship requirements that cause us to remove or edit popular content, leading to consumer disappointment, brand tarnishment or dissatisfaction with our service;
- low usage and/or penetration of internet-connected consumer electronic devices;
- different and more stringent user protection, data protection, privacy and other laws, including data localization and/or restrictions on data export, and local ownership requirements;
- availability of reliable broadband connectivity and wide area networks in targeted areas for expansion;
- differing laws and consumer understanding/attitudes regarding the illegality of piracy;
- negative impacts from trade disputes; and
- implementation of regulations designed to stimulate the local production of film and TV series in order to promote and preserve local culture and economic activity, including local content quotas, investment obligations, and levies to support local film funds. For example, the EU revised its Audio Visual Media Services Directive in 2018 to require that European works comprise at least thirty percent (30%) of media service providers' catalogs, and to require prominence of those works, and certain EU Member States have imposed additional investment obligations and levies.

These and other factors may cause us to adjust our business plans, including expanding or ceasing certain operations in certain countries, and the execution of our strategies. Our failure to manage any of these risks successfully could harm our international operations and our overall business, and results of our operations.

We are subject to taxation related risks in multiple jurisdictions.

We are a U.S.-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. Significant judgment is required in determining our global provision for income taxes, deferred taxes and other tax liabilities and receivables, and in evaluating our tax positions and other tax attributes on a worldwide basis. We are subject to the periodic examination of our domestic and foreign tax returns by the Internal Revenue Service, state, local, and foreign tax authorities, some of whom are challenging our tax positions. We regularly assess the likelihood of adverse outcomes from these examinations in determining the adequacy of our provision for income taxes and other tax liabilities. We consider many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and may not accurately forecast actual tax audit outcomes. If the ultimate determination of income and other tax liabilities differ from the amounts recorded or accrued, our business, financial condition or results of operations may be adversely impacted.

Tax laws are regularly being re-examined and evaluated globally. New laws and interpretations of the law are taken into account for financial statement purposes in the quarter or year that they become applicable. Tax authorities are increasingly scrutinizing the tax positions of companies and we have tax audits pending in several jurisdictions. The U.S. federal and state governments, countries in the EU, as well as a number of other countries and organizations such as the Organization for Economic Cooperation and Development, are actively considering changes to existing tax laws that, if enacted, could increase our tax obligations in jurisdictions where we do business. If U.S. or other tax authorities change applicable tax laws or successfully challenge how or where our profits are currently recognized, our overall taxes could increase, and our business, financial condition or results of operations may be adversely impacted.

Risks Related to Human Resources

We may lose key employees or may be unable to hire qualified employees, and the failure to maintain and improve our company culture may adversely affect our business.

We rely on the continued service of our senior management, including our Co-Chief Executive Officers, Ted Sarandos and Greg Peters, members of our executive team and other key employees. In our industry, there is substantial and continuous competition for highly-skilled business, product development, technical, creative and other personnel. If we experience high executive turnover, fail to adapt our business practices to industry expectations, fail to maintain a positive reputation, fail to implement succession plans for key employees, encounter difficulties associated with the transition of members of our management team, are not successful in recruiting new personnel or in retaining and motivating existing personnel, in instilling our culture in new employees, or maintaining and improving our culture as we grow, our operations may be disrupted, which could adversely affect our results of operations.

Labor disputes may have an adverse effect on the Company's business.

We and our partners, suppliers, and vendors engage writers, directors, actors, other talent, trade employees and others who are subject to collective bargaining agreements in the motion picture industry, both in the U.S. and internationally. Expiring collective bargaining agreements may be renewed on terms that are unfavorable to us. If expiring collective bargaining agreements cannot be renewed, affected unions have, and could in the future, take action in the form of strikes or work stoppages. Such work stoppages have resulted, and may in the future result, in halted productions and delays in our ability to provide new content to our members. Such actions, as well as higher costs or operating complexities in connection with these collective bargaining agreements or a significant labor dispute, could have an adverse effect on our business by causing delays in production, added costs or by reducing profit margins, and our ability to provide new content to our members could likewise be delayed or dropped.

Risks Related to Our Stock Ownership

Provisions in our charter documents and under Delaware law could discourage a takeover that stockholders may consider favorable, although we have announced plans to modify some of these provisions over time.

Our charter documents in their current form may discourage, delay or prevent a merger or acquisition that a stockholder may consider favorable because they:

- authorize our board of directors, without stockholder approval, to issue up to 10,000,000 shares of undesignated preferred stock;
- provide for a classified board of directors until our annual meeting of stockholders to be held in 2025;
- prohibit our stockholders from acting by written consent; and
- establish advance notice requirements for proposing matters to be approved by stockholders at stockholder meetings.

As a Delaware corporation, we are also subject to certain Delaware anti-takeover provisions. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction. Our board of directors could rely on Delaware law to prevent or delay an acquisition of us.

In addition, a merger or acquisition may trigger retention payments to certain executive employees under the terms of our Amended and Restated Executive Severance and Retention Incentive Plan, thereby increasing the cost of such a transaction.

Our stock price is volatile.

The price at which our common stock has traded has fluctuated significantly. The price may continue to be volatile due to a number of factors including the following, some of which are beyond our control:

- variations in our operating results, including our membership acquisition and retention, revenues, operating income, net income, net cash provided by operating activities and free cash flow;
- variations between our actual operating results and the expectations of securities analysts, investors and the financial community;
- announcements of developments affecting our business, systems or expansion plans by us or others;
- competition, including the introduction of new competitors, their pricing strategies and services;
- market volatility in general;
- the level of demand for our stock, including the amount of short interest in our stock;
- the impact of our current stock repurchase program and any future stock repurchase program we may adopt;
- the operating results of our competitors; and
- other risks and uncertainties described in these risk factors.

As a result of these and other factors, investors in our common stock may not be able to resell their shares at or above their original purchase price.

Following certain periods of volatility in the market price of our securities, we became the subject of securities litigation. We may experience more such litigation following future periods of volatility. This type of litigation may result in substantial costs and a diversion of management's attention and resources.

Preparing and forecasting our financial results requires us to make judgments and estimates which may differ materially from actual results.

Given the dynamic nature of our business, and the inherent limitations in predicting the future, forecasts of our revenues, operating margins, net income and other financial and operating data may differ materially from actual results. Also, predicting consumer adoption of various pricing strategies, such as the ad-supported subscription plan or efforts to limit multi-household usage, and new revenue streams, such as advertising revenue, is inherently difficult given the lack of operating history with respect to such offerings, and actual results may differ significantly from the expectations of our management, securities analysts or investors. Such discrepancies could cause a decline in the trading price of our common stock. In addition, the preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America also requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported periods. We base such estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, but actual results may differ from these estimates. For example, we estimate the content amortization pattern, beginning with the month of first availability, of any particular licensed or produced television series, documentary or feature film based upon various factors including historical and estimated viewing patterns. If actual viewing patterns differ from these estimates, the pattern and/or period of amortization would be changed and could affect the timing or recognition of content amortization. If we revise such estimates it could result in greater in-period expenses, which could cause us to miss our earnings guidance or negatively impact the results we report which could negatively impact our stock price. Further, events outside of our control may cause actual results to differ from our forecast.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

We have an enterprise-wide information security program designed to identify, protect, detect and respond to and manage reasonably foreseeable cybersecurity risks and threats. To protect our information systems from cybersecurity threats, we use various security tools that help prevent, identify, escalate, investigate, resolve and recover from identified vulnerabilities and security incidents in a timely manner. These include, but are not limited to, internal reporting, monitoring and detection tools, and a bug bounty program to allow security researchers to assist us in identifying vulnerabilities in our products before they are exploited by malicious threat actors. We also maintain a third party security program to identify, prioritize, assess, mitigate and remediate third party risks; however, we rely on the third parties we use to implement security programs commensurate with their risk, and we cannot ensure in all circumstances that their efforts will be successful.

We regularly assess risks from cybersecurity and technology threats and monitor our information systems for potential vulnerabilities. We use a widely-adopted risk quantification model to identify, measure and prioritize cybersecurity and technology risks and develop related security controls and safeguards. We conduct regular reviews and tests of our information security program and also leverage audits by our internal audit team, tabletop exercises, penetration and vulnerability testing, red team exercises, simulations, and other exercises to evaluate the effectiveness of our information security program and improve our security measures and planning. We also engage an external auditor to conduct an annual payment card industry data security standard review of our security controls protecting payment information, as well as third-party penetration testing of our cardholder environment and related systems. The results of these assessments are reported to the Audit Committee.

Our systems and those of third parties with which we do business have experienced and may continue to experience directed attacks intended to lead to interruptions and delays in our service and operations as well as loss, misuse or theft of personal information (of third parties, employees, and our members) and other data, confidential information or intellectual property, and we have experienced unauthorized releases of certain digital content assets and unintended disclosure of personal information due to incidents related to third parties. However, to date these incidents have not had a material impact on our service, systems or business. Any significant disruption to our service or access to our systems could result in a loss of members and adversely affect our business and results of operation. Further, a penetration of our systems or a third-party's systems or other misappropriation or misuse of personal information could subject us to business, regulatory, litigation and reputation risk, which could have a negative effect on our business, financial condition and results of operations. See "Risk Factors - Any significant disruption in or unauthorized access to our computer systems or those of third parties that we utilize in our operations, including those relating to cybersecurity or arising from cyber-attacks, could result in a loss or degradation of service, unauthorized access, disclosure or destruction of data, including member and corporate information, or theft of intellectual property, including digital content assets, which could adversely impact our business."

The Vice President of Security and Privacy Engineering leads our global information security organization responsible for overseeing the Netflix information security program. Our VP of Security and Privacy Engineering has over 30 years of industry experience, including serving in similar roles leading and overseeing cybersecurity programs at other public companies. Team members who support our information security program have relevant educational and industry experience, including holding similar positions at large technology companies. The teams provide regular reports to senior management and other relevant teams on various cybersecurity threats, assessments and findings.

The Board oversees our annual enterprise risk assessment, where we assess key risks within the company, including security and technology risks and cybersecurity threats. The Audit Committee of the Board oversees our cybersecurity risk and receives regular reports from our VP of Security and Privacy Engineering on various cybersecurity matters, including risk assessments, mitigation strategies, areas of emerging risks, incidents and industry trends, and other areas of importance.

Item 2. Properties

We have leased principal properties in both Los Gatos, California, which is the location of our corporate headquarters, and in Los Angeles, California. In addition, we own and lease various office and production space throughout the world.

We believe that our existing facilities are adequate to meet current requirements, and that suitable additional or substitute space will be available as needed to accommodate any further physical expansion of operations and for any additional offices.

Item 3. Legal Proceedings

Information with respect to this item may be found in Note 8 *Commitments and Contingencies* in the accompanying notes to our consolidated financial statements included in Part II, Item 8, "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K, under the caption "Legal Proceedings" which information is incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is traded on the NASDAQ Global Select Market under the symbol "NFLX".

Holders

As of December 31, 2024, there were approximately 2,752 stockholders of record of our common stock, although there is a significantly larger number of beneficial owners of our common stock.

Dividend Policy

We have never declared or paid any cash dividends on our capital stock, and we do not currently anticipate paying any cash dividends in the foreseeable future.

Company Purchases of Equity Securities

Stock repurchases during the three months ended December 31, 2024 were as follows:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share (2)	Total Number of Shares Purchased as Part of Publicly Announced Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (1)
				(in thousands)
October 1 - 31, 2024	519,883	$ 724.15	519,883	$ 2,678,384
November 1 - 30, 2024	457,732	$ 792.49	457,732	$ 2,315,637
December 1 - 31, 2024	188,212	$ 913.13	188,212	$ 17,143,775
Total	1,165,827		1,165,827	

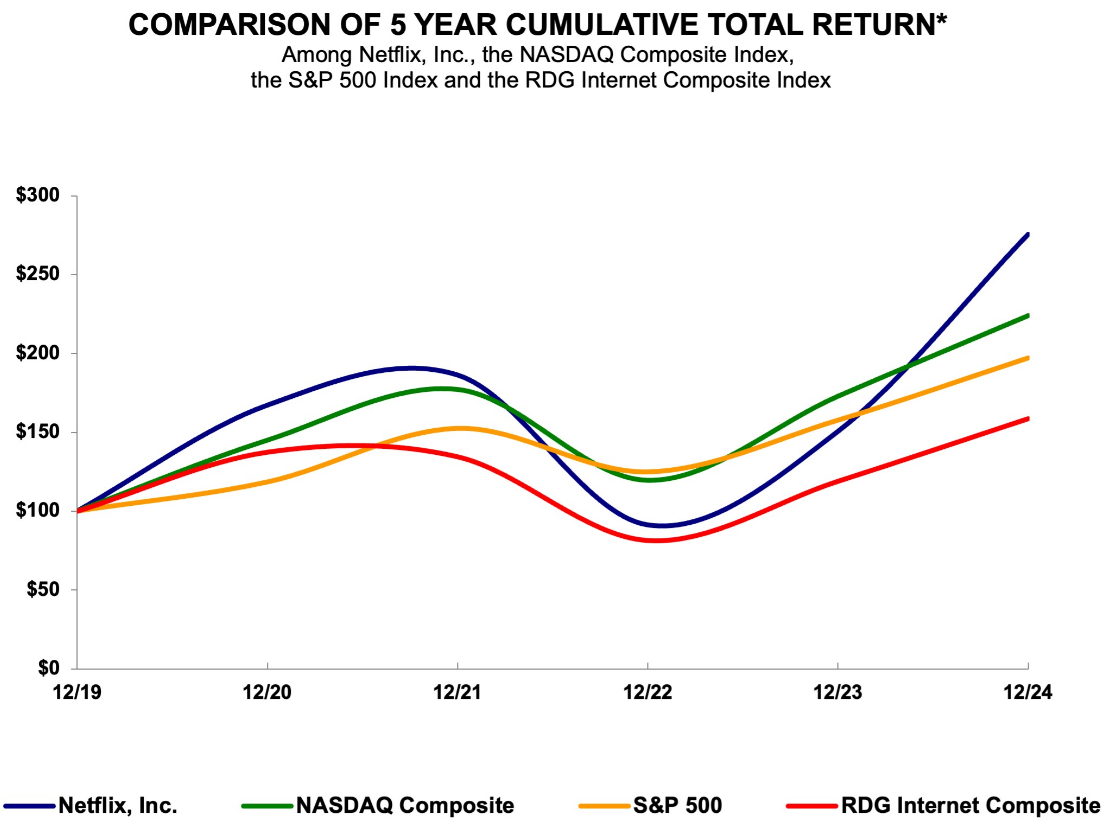
(1) In September 2023, the Board of Directors authorized the repurchase of up to $10 billion of its common stock, with no expiration date, and in December 2024, the Board of Directors increased the share repurchase authorization by an additional $15 billion, also with no expiration date. For further information regarding stock repurchase activity, see Note 9 *Stockholders' Equity* to the consolidated financial statements in this Annual Report.

(2) Average price paid per share includes costs associated with the repurchases but excludes the 1% excise tax on stock repurchases imposed by the Inflation Reduction Act of 2022.

Stock Performance Graph

Notwithstanding any statement to the contrary in any of our previous or future filings with the Securities and Exchange Commission, the following information relating to the price performance of our common stock shall not be deemed "filed" with the Commission or "soliciting material" under the Exchange Act and shall not be incorporated by reference into any such filings.

The following graph compares, for the five year period ended December 31, 2024, the total cumulative stockholder return on the Company's common stock with the total cumulative return of the NASDAQ Composite Index, the S&P 500 Index and the RDG Internet Composite Index. Measurement points are the last trading day of each of the Company's fiscal years ended December 31, 2019, December 31, 2020, December 31, 2021, December 31, 2022, December 31, 2023 and December 31, 2024. Total cumulative stockholder return assumes $100 invested at the beginning of the period in the Company's common stock, the stocks represented in the NASDAQ Composite Index, the stocks represented in the S&P 500 Index and the stocks represented in the RDG Internet Composite Index, respectively, and reinvestment of any dividends. Historical stock price performance should not be relied upon as an indication of future stock price performance.



*$100 invested on 12/31/19 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section of this Form 10-K generally discusses 2024 and 2023 items and year-to-year comparisons between 2024 and 2023. Discussions of 2022 items and year-to-year comparisons between 2023 and 2022 that are not included in this Form 10-K can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2023.

Results of Operations

The following represents our consolidated performance highlights:

	As of/Year Ended December 31,			Change
	2024	2023	2022	2024 vs. 2023
	(in thousands, except revenue per membership and percentages)			
Financial Results:				
Streaming revenues	$ 39,000,966	$ 33,640,458	$ 31,469,852	16 %
DVD revenues (1)	—	82,839	145,698	(100)%
Total revenues	**$ 39,000,966**	**$ 33,723,297**	**$ 31,615,550**	16 %
Operating income	$ 10,417,614	$ 6,954,003	$ 5,632,831	50 %
Operating margin	27 %	21 %	18 %	
Global Streaming Memberships:				
Paid net membership additions	41,350	29,529	8,903	40 %
Paid memberships at end of period (2)	301,626	260,276	230,747	16 %
Average paying memberships	277,730	240,889	222,924	15 %
Average monthly revenue per paying membership	$ 11.70	$ 11.64	$ 11.76	1 %
Constant currency change (3)				4 %

(1) We discontinued our DVD-by-mail service in the year ended December 31, 2023. The discontinuance of our DVD business had an immaterial impact on our operations and financial results.

(2) A paid membership (also referred to as a paid subscription) is defined as a membership that has the right to receive Netflix service following sign-up and a method of payment being provided, and that is not part of a free trial or certain other promotions that may be offered by the Company to new or rejoining members. Certain members have the option to add extra member sub accounts. These extra member sub accounts are not included in paid memberships. A membership is canceled and ceases to be reflected in the above metrics as of the effective cancellation date. Voluntary cancellations generally become effective at the end of the prepaid membership period. Involuntary cancellations, as a result of a failed method of payment, become effective immediately. Memberships are assigned to territories based on the geographic location used at time of sign-up as determined by the Company's internal systems, which utilize industry standard geo-location technology.

(3) We believe the non-GAAP financial measure of constant currency revenue is useful in analyzing the underlying trends in average monthly revenue per paying membership ("ARM") absent foreign currency fluctuations. However, this non-GAAP financial measure should be considered in addition to, not as a substitute for, or superior to other financial measures prepared in accordance with GAAP.

In order to exclude the effect of foreign currency rate fluctuations on ARM, we calculate current period revenue assuming foreign exchange rates had remained constant with foreign exchange rates from each of the corresponding months of the prior-year period and exclude the impact of hedging gains or losses realized as revenues. Constant currency percentage change in ARM is calculated as the percentage change between current period constant currency ARM and the prior comparative period ARM. The impact of hedging gains or losses is excluded from both the current and prior periods. For the year ended December 31, 2024, our revenues would have been approximately $1,424 million higher, excluding the impact of hedging and had foreign currency exchange rates remained constant with those for the year ended December 31, 2023. The unfavorable foreign exchange rate impacts in the year ended December 31, 2024 were primarily driven by the devaluation of the Argentine peso relative to the U.S. dollar coupled with significant price increases in the local currency in this jurisdiction.

Operating margin for the year ended December 31, 2024 increased six percentage points as compared to the prior comparative period, primarily due to revenues growing at a faster rate as compared to the growth in cost of revenues, sales and marketing, and technology and development expenses, coupled with lower general and administrative expenses.

Streaming Revenues

We primarily derive revenues from monthly membership fees for services related to streaming content to our members. We offer a variety of streaming membership plans, the price of which varies by country and the features of the plan. As of December 31, 2024, pricing on our paid plans ranged from the U.S. dollar equivalent of $1 to $32 per month, and pricing on our extra member sub accounts ranged from the U.S. dollar equivalent of $2 to $8 per month. We expect that from time to time the prices of our membership plans in each country may change and we may test other plan and price variations.

We also earn revenue from advertisements presented on our streaming service, consumer products, live events and various other sources. Revenues earned from sources other than monthly membership fees were not a material component of streaming revenues for the years ended December 31, 2024, 2023, and 2022.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Streaming revenues	$ 39,000,966	$ 33,640,458	$ 31,469,852	$ 5,360,508	16 %

Streaming revenues for the year ended December 31, 2024 increased 16% as compared to the year ended December 31, 2023, primarily due to the growth in average paying memberships and price increases, partially offset by unfavorable changes in foreign exchange rates.

The following tables summarize streaming revenues and other streaming membership information by region for the years ended December 31, 2024, 2023 and 2022. Hedging gains of $124 million are included in "Streaming revenues" for the year ended December 31, 2024. No hedging gains and losses were recognized as "Streaming revenues" in the comparative prior year periods. See Note 7 *Derivative Financial Instruments and Hedging Activities* to the consolidated financial statements for further information regarding the Company's derivative and non-derivative financial instruments.

United States and Canada (UCAN)

	As of/Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except revenue per membership and percentages)				
Streaming revenues	$ 17,359,369	$ 14,873,783	$ 14,084,643	$ 2,485,586	17 %
Paid net membership additions (losses)	9,497	5,832	(919)	3,665	63 %
Paid memberships at end of period	89,625	80,128	74,296	9,497	12 %
Average paying memberships	84,112	76,126	74,001	7,986	10 %
Average monthly revenue per paying membership	$ 17.20	$ 16.28	$ 15.86	$ 0.92	6 %
Constant currency change					6 %

Europe, Middle East, and Africa (EMEA)

	As of/Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except revenue per membership and percentages)				
Streaming revenues	$ 12,387,035	$ 10,556,487	$ 9,745,015	$ 1,830,548	17 %
Paid net membership additions	12,320	12,084	2,693	236	2 %
Paid memberships at end of period	101,133	88,813	76,729	12,320	14 %

Cost of Revenues

Cost of revenues primarily consists of the amortization of content assets. Other costs of revenues include expenses associated with the acquisition, licensing and production of content, streaming delivery costs, and other operating costs.

Expenses related to the acquisition, licensing and production of content not included in content amortization may include payroll, stock-based compensation, facilities, and other personnel-related expenses, costs associated with obtaining rights to music included in our content, overall deals with talent, miscellaneous production-related costs and participations and residuals. Streaming delivery costs are primarily related to our global content delivery network ("Open Connect"). We have built our own Open Connect network to help us efficiently stream a high volume of content to our members over the internet. Delivery expenses, therefore, include equipment costs related to Open Connect, payroll and related personnel expenses and all third-party costs, such as cloud computing costs, associated with delivering content over the internet. Other operating costs include customer service and payment processing fees, including those we pay to our integrated payment partners, as well as other costs directly incurred in making our content available to members.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Cost of revenues	$ 21,038,464	$ 19,715,368	$ 19,168,285	$ 1,323,096	7 %
As a percentage of revenues	54 %	58 %	61 %		

The increase in cost of revenues for the year ended December 31, 2024 as compared to the year ended December 31, 2023 was due to a $1,104 million increase in content amortization relating to our existing and new content.

Sales and Marketing

Sales and marketing expenses consist primarily of advertising expenses and certain payments made to marketing and advertising sales partners, including consumer electronics ("CE") manufacturers, multichannel video programming distributors ("MVPDs"), mobile operators, and ISPs. Marketing expenses include promotional activities such as digital and television advertising. Sales and marketing expenses also include payroll, stock-based compensation, facilities, and other related expenses for personnel that support advertising sales and marketing activities.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Sales and marketing	$ 2,917,554	$ 2,657,883	$ 2,530,502	$ 259,671	10 %
As a percentage of revenues	7 %	8 %	8 %		

The increase in sales and marketing expenses for the year ended December 31, 2024 as compared to the year ended December 31, 2023 was primarily driven by a $131 million increase in personnel-related costs due to the growth in advertising sales headcount. Other sales and marketing expenses increased $129 million primarily due to a $54 million increase in marketing expenses due to the timing of marketing spend on our content slate, coupled with an increase in expenses incurred in connection with our advertising offering, including increased payments to advertising sales partners and other advertising distribution expenses.

Technology and Development

Technology and development expenses consist primarily of payroll, stock-based compensation, facilities, and other related expenses for technology personnel responsible for making improvements to our service offerings, including testing, maintaining and modifying our user interface, our recommendations, merchandising and infrastructure. Technology and development expenses also include costs associated with general use computer hardware and software.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Technology and development	$ 2,925,295	$ 2,675,758	$ 2,711,041	$ 249,537	9 %
As a percentage of revenues	8 %	8 %	9 %		

The increase in technology and development expenses for the year ended December 31, 2024 as compared to the year ended December 31, 2023 was primarily due to a $224 million increase in personnel-related costs.

General and Administrative

General and administrative expenses consist of payroll, stock-based compensation, facilities, and other related expenses for corporate personnel. General and administrative expenses also include professional fees and other general corporate expenses.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
General and administrative	$ 1,702,039	$ 1,720,285	$ 1,572,891	$ (18,246)	(1)%
As a percentage of revenues	4 %	5 %	5 %		

General and administrative expenses for the year ended December 31, 2024 as compared to the year ended December 31, 2023 remained relatively flat.

Interest Expense

Interest expense consists primarily of the interest associated with our outstanding debt obligations, including the amortization of debt issuance costs. See Note 6 *Debt* in the accompanying notes to our consolidated financial statements for further detail on our debt obligations.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Interest expense	$ 718,733	$ 699,826	$ 706,212	$ 18,907	3 %
As a percentage of revenues	2 %	2 %	2 %		

Interest expense primarily consists of interest on our Notes of $718 million for the year ended December 31, 2024. The increase in interest expense for the year ended December 31, 2024 as compared to the year ended December 31, 2023 was due to the increase in debt.

Interest and Other Income (Expense)

Interest and other income (expense) consists primarily of foreign exchange gains and losses on foreign currency denominated balances, gains and losses on certain derivative instruments, and interest earned on cash, cash equivalents and short-term investments.

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Interest and other income (expense)	$ 266,776	$ (48,772)	$ 337,310	$ 315,548	647 %
As a percentage of revenues	1 %	— %	1 %		

Interest and other income (expense) increased for the year ended December 31, 2024 primarily due to foreign exchange losses of $18 million, net of the impacts of derivatives and hedging, compared to the losses of $293 million for the corresponding period in 2023. In the year ended December 31, 2024, the foreign exchange losses were primarily driven by the remeasurement of cash and content liability positions in currencies other than the functional currencies, partially offset by a non-cash gain of $122 million, net of hedging impacts, from the remeasurement of our €5,170 million Senior Notes. The foreign exchange loss in the year ended December 31, 2023 was primarily driven by a non-cash loss of $176 million from the remeasurement of our Senior Notes denominated in euros, coupled with the remeasurement of cash and content liability positions in currencies other than the functional currencies.

Provision for Income Taxes

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands, except percentages)				
Provision for income taxes	$ 1,254,026	$ 797,415	$ 772,005	$ 456,611	57 %
Effective tax rate	13 %	13 %	15 %		

The effective tax rate for the year ended December 31, 2024 remained relatively flat as compared to the year ended December 31, 2023. See Note 10 *Income Taxes* to the consolidated financial statements for further information regarding income taxes.

Liquidity and Capital Resources

	As of December 31,		Change	
	2024	2023	2024 vs. 2023	
	(in thousands, except percentages)			
Cash, cash equivalents, restricted cash and short-term investments	$ 9,586,343	$ 7,139,488	$ 2,446,855	34 %
Short-term and long-term debt	15,582,804	14,543,261	1,039,543	7 %

Cash, cash equivalents, restricted cash and short-term investments increased $2,447 million in the year ended December 31, 2024 primarily due to cash provided by operations, issuance of debt, and proceeds from issuance of common stock, partially offset by the repurchase of stock and repayment of debt.

Debt, net of debt issuance costs and discounts, increased $1,040 million primarily due to the issuance of $1,800 million in additional Senior Notes, partially offset by the repayment upon maturity of the $400 million aggregate principal amount of our 5.750% Senior Notes and the remeasurement of our euro-denominated notes in the year ended December 31, 2024. The amount of principal and interest due in the next twelve months is $2,487 million. As of December 31, 2024, no amounts had been borrowed under our $3 billion Revolving Credit Agreement. See Note 6 *Debt* in the accompanying notes to our consolidated financial statements.

We anticipate that we may periodically raise additional debt capital. Our ability to obtain this or any additional financing that we may choose or need, including for the refinancing of upcoming maturities or potential strategic acquisitions and investments, will depend on, among other things, our development efforts, business plans, operating performance, and the condition of the capital markets at the time we seek financing. We may not be able to obtain such financing on terms acceptable to us or at all. If we raise additional funds through the issuance of equity or debt securities, those securities may have rights, preferences or privileges senior to the rights of our common stock, and our stockholders may experience dilution.

In September 2023, the Board of Directors authorized the repurchase of up to $10 billion of our common stock, with no expiration date, and in December 2024, the Board of Directors increased the share repurchase authorization by an additional $15 billion, also with no expiration date. Stock repurchases may be effected through open market repurchases in compliance with Rule 10b-18 under the Exchange Act, including through the use of trading plans intended to qualify under Rule 10b5-1 under the Exchange Act, privately-negotiated transactions, accelerated stock repurchase plans, block purchases, or other similar purchase techniques and in such amounts as management deems appropriate. We are not obligated to repurchase any specific number of shares, and the timing and actual number of shares repurchased will depend on a variety of factors, including our stock price, general economic, business and market conditions, and alternative investment opportunities. We may discontinue any repurchases of our common stock at any time without prior notice. In the fiscal year ended December 31, 2024, the Company repurchased 9,861,935 shares of common stock for an aggregate amount of $6,211 million (excluding the 1% excise tax on stock repurchases as a result of the Inflation Reduction Act of 2022). As of December 31, 2024, $17.1 billion remains available for repurchases.

Our primary uses of cash include the acquisition, licensing and production of content, marketing programs, streaming delivery and personnel-related costs, as well as strategic acquisitions and investments. Cash payment terms for non-original content have historically been in line with the amortization period. Investments in original content, and in particular content that we produce and own, require more cash upfront relative to licensed content. For example, production costs are paid as the content is created, well in advance of when the content is available on the service and amortized. We expect to continue to significantly invest in global content, particularly in original content, which will impact our liquidity. We currently anticipate that cash flows from operations, available funds and access to financing sources, including our revolving credit facility, will continue to be sufficient to meet our cash needs for the next twelve months and beyond.

Our material cash requirements from known contractual and other obligations primarily relate to our content, debt and lease obligations. As of December 31, 2024, the expected timing of those payments are as follows:

Contractual obligations (in thousands):	Total	Next 12 Months	Beyond 12 Months
Content obligations (1)	$ 23,248,931	$ 11,424,696	$ 11,824,235
Debt (2)	19,841,462	2,486,945	17,354,517
Operating lease obligations (3)	2,761,120	514,625	2,246,495
Total	$ 45,851,513	$ 14,426,266	$ 31,425,247

(1) As of December 31, 2024, content obligations were comprised of $4.4 billion included in "Current content liabilities" and $1.8 billion of "Non-current content liabilities" on the Consolidated Balance Sheets and $17.0 billion of obligations that are not reflected on the Consolidated Balance Sheets as they did not then meet the criteria for recognition.

Content obligations include amounts related to the acquisition, licensing and production of content. An obligation for the production of content includes non-cancelable commitments under creative talent and employment agreements and other production related commitments. An obligation for the acquisition and licensing of content is incurred at the time we enter into an agreement to obtain future titles. Once a title becomes available, a content liability is recorded on the Consolidated Balance Sheets. Certain agreements include the obligation to license rights for unknown future titles, the ultimate quantity and/or fees for which are not yet determinable as of the reporting date. Traditional film output deals, or certain TV series license agreements where the number of seasons to be aired is unknown, are examples of these types of agreements. The contractual obligations table above does not include any estimated obligation for the unknown future titles, payment for which could range from less than one year to more than five years. However, these unknown obligations are expected to be significant and we believe could include approximately $1 billion to $4 billion over the next three years, with the payments for the vast majority of such amounts expected to occur after the next twelve months. The foregoing range is based on considerable management judgments and the actual amounts may differ. Once we know the title that we will receive and the license fees, we include the amount in the contractual obligations table above.

(2) Debt obligations include our Notes consisting of principal and interest payments. See Note 6 *Debt* in the accompanying notes to our consolidated financial statements for further details.

(3) Operating lease obligations are comprised of operating lease liabilities included in "Accrued expenses and other liabilities" and "Other non-current liabilities" on the Consolidated Balance Sheets, inclusive of imputed interest. Operating lease obligations also include additional obligations that are not reflected on the Consolidated Balance Sheets as they did not meet the criteria for recognition. As of December 31, 2024, the Company has additional operating leases for real estate that have not yet commenced of $38 million which has been included above. See Note 5 *Balance Sheet Components* in the accompanying notes to our consolidated financial statements for further details regarding leases.

As of December 31, 2024, we had gross unrecognized tax benefits of $432 million, of which $302 million was classified in “Other non-current liabilities" in the Consolidated Balance Sheets. At this time, an estimate of the range of reasonably possible adjustments to the balance of unrecognized tax benefits cannot be made. In addition, we may be required to pay deposits of approximately $800 million related to certain direct and indirect taxes in the next twelve months, which are in excess of our typical annual obligations.

Cash Flows

The following table summarizes our cash flows:

	Year Ended December 31,			Change	
	2024	2023	2022	2024 vs. 2023	
	(in thousands)				
Net cash provided by operating activities	$ 7,361,364	$ 7,274,301	$ 2,026,257	$ 87,063	1 %
Net cash provided by (used in) investing activities	(2,181,784)	541,751	(2,076,392)	(2,723,535)	(503)%
Net cash used in financing activities	(4,074,427)	(5,950,803)	(664,254)	(1,876,376)	(32)%

Net cash provided by operating activities for the year ended December 31, 2024 increased $87 million as compared to the year ended December 31, 2023, primarily driven by a $3,304 million or 61% increase in net income, an increase in adjustments for non-cash expenses, and favorable changes in working capital, partially offset by an increase in payments for content assets. The payments for content assets increased $3,862 million, from $13,140 million to $17,003 million, or 29%.

Net cash provided by (used in) investing activities for the year ended December 31, 2024 decreased $2,724 million as compared to the year ended December 31, 2023, primarily due to there being no maturities of investments in the year ended December 31, 2024, as compared to maturities of investments of $1,395 million in the year ended December 31, 2023, coupled with an increase in purchases of investments of $1,237 million and an increase in purchases of property and equipment of $91 million.

Net cash used in financing activities for the year ended December 31, 2024 decreased $1,876 million as compared to the year ended December 31, 2023, primarily due to proceeds from the issuance of debt of $1,794 million in the year ended December 31, 2024 and a $663 million increase in the proceeds from the issuance of common stock. These cash inflows were partially offset by the repayment upon maturity of the $400 million aggregate principal amount of our 5.750% Senior Notes in the year ended December 31, 2024 as compared to no repayments of debt in the corresponding period in 2023, coupled with a $218 million increase in the repurchases of common stock.

Indemnifications

The information set forth under Note 8 *Commitments and Contingencies* in the accompanying notes to our consolidated financial statements included in Part II, Item 8, "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K is incorporated herein by reference.

Critical Accounting Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported periods. The Securities and Exchange Commission ("SEC") has defined a company’s critical accounting policies as the ones that are most important to the portrayal of a company’s financial condition and results of operations, and which require a company to make its most difficult and subjective judgments. Based on this definition, we have identified the critical accounting policies and judgments addressed below. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates.

Content

We acquire, license and produce content, including original programming, in order to offer our members unlimited viewing of video entertainment. The content licenses are for a fixed fee and specific windows of availability. Payment terms for certain content licenses and the production of content require more upfront cash payments relative to the amortization expense. Payments for content, including additions to content assets and the changes in related liabilities, are classified within "Net cash provided by operating activities" on the Consolidated Statements of Cash Flows.

We recognize content assets (licensed and produced) as "Content assets, net" on the Consolidated Balance Sheets. For licensed content, we capitalize the fee per title and record a corresponding liability at the gross amount of the liability when the license period begins, the cost of the title is known and the title is accepted and available for streaming. For produced content, we capitalize costs associated with the production, including development costs, direct costs and production overhead.

Based on factors including historical and estimated viewing patterns, we amortize the content assets (licensed and produced) in “Cost of revenues” on the Consolidated Statements of Operations over the shorter of each title's contractual window of availability or estimated period of use or ten years, beginning with the month of first availability. The amortization is on an accelerated basis, as we typically expect more upfront viewing, and film amortization is more accelerated than TV series amortization. On average, over 90% of a licensed or produced content asset is expected to be amortized within four years after its month of first availability. We review factors that impact the amortization of the content assets on a regular basis. Our estimates related to these factors require considerable management judgment.

In the normal course of business, we, or a third-party producing content on our behalf, may qualify for tax incentives through eligible spend on productions. The accounting for tax incentives is dependent on the particular type of incentive, including the nature of the benefit and the location the incentive is earned. In general, tax incentives are realized as cash receipts and may be received prior to or after a title launches on our service. Upon a title’s launch, any amounts we are eligible for through qualified production spend but have not received, are recognized in “Other current assets” or “Other non-current assets” on the Consolidated Balance Sheets as receivables. Tax incentives are generally accounted for as a reduction to the cost basis of content assets (presented in “Content assets, net”) and reduce content amortization over the life of the title (as presented in “Cost of revenues”) on the Consolidated Statements of Operations.

Our business model is subscription based as opposed to a model generating revenues at a specific title level. Content assets (licensed and produced) are predominantly monetized as a group and therefore are reviewed at a group level when an event or change in circumstances indicates a change in the expected usefulness of the content or that the fair value may be less than unamortized cost. To date, we have not identified any such event or changes in circumstances. If such changes are identified in the future, these aggregated content assets will be stated at the lower of unamortized cost or fair value. In addition, unamortized costs for assets that have been, or are expected to be, abandoned are written off.

Income Taxes

We record a provision for income taxes for the anticipated tax consequences of our reported results of operations using the asset and liability method. Deferred income taxes are recognized by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as net operating loss and tax credit carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The measurement of deferred tax assets is reduced, if necessary, by a valuation allowance when it is more likely than not they will not be realized.

Although we believe our assumptions, judgments and estimates are reasonable, changes in tax laws or our interpretation of tax laws and the resolution of any tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements.

In evaluating our ability to recover our deferred tax assets, in full or in part, we consider all available positive and negative evidence, including our past operating results, our forecast of future earnings and future taxable income, and prudent and feasible tax planning strategies. The assumptions utilized in determining future taxable income require significant judgment and are consistent with the plans and estimates we are using to manage the underlying business. Actual operating results in future years could differ from our current assumptions, judgments and estimates.

We do not recognize certain tax benefits from uncertain tax positions within the provision for income taxes. We may recognize a tax benefit only if it is more likely than not the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. Due to uncertainties in any tax audit outcome, our estimates of the ultimate settlement of our unrecognized tax positions may change and the actual tax benefits may differ significantly from the estimates.

See Note 10 *Income Taxes* to the consolidated financial statements for further information regarding income taxes.

Recent Accounting Pronouncements

The information set forth under Note 1 to the consolidated financial statements under the caption “Basis of Presentation and Summary of Significant Accounting Policies” is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risks related to interest rate changes and the corresponding changes in the market values of our debt and foreign currency fluctuations.

Interest Rate Risk

At December 31, 2024, our cash equivalents were generally invested in money market funds and time deposits. Interest paid on such funds fluctuates with the prevailing interest rate. Our short-term investments are primarily comprised of investments in government securities. These securities are classified as available-for-sale and are recorded at fair value with unrealized gains and losses, net of tax, included in accumulated other comprehensive income (“AOCI”) within Stockholders' equity in the Consolidated Balance Sheets. Changes in interest rates could adversely affect the market value of these securities.

As of December 31, 2024, we had $15.7 billion of debt, consisting of fixed rate unsecured debt in fifteen tranches due between 2025 and 2054. Refer to Note 6 *Debt* to the consolidated financial statements for details about all issuances. The fair value of our debt will fluctuate with movements of interest rates, increasing in periods of declining rates of interest and declining in periods of increasing rates of interest. The fair value of our debt will also fluctuate based on changes in foreign currency rates, as discussed below.

Foreign Currency Risk

We operate our business globally and transact in multiple currencies. Currencies denominated in other than the U.S. dollar accounted for 56% of revenue and 29% of operating expenses for the year ended December 31, 2024. We therefore have foreign currency risk related to these currencies, which are primarily the euro, the British pound, the Brazilian real, Argentine peso, and the Mexican peso.

Accordingly, volatility in exchange rates, and in particular a weakening of foreign currencies relative to the U.S. dollar may negatively affect our revenue and operating income as expressed in U.S. dollars. Excluding the impact of hedging gains or losses realized as revenues, our revenues for the year ended December 31, 2024 would have been approximately $1,424 million higher had foreign currency exchange rates remained constant with those in the same period of 2023. The unfavorable foreign exchange rate impact in the year ended December 31, 2024 was primarily driven by the devaluation of the Argentine peso relative to the U.S. dollar coupled with significant price increases in the local currency in this jurisdiction. See Part II, Item 7, "Management’s Discussion and Analysis of Financial Condition and Results of Operations" for further information regarding our non-GAAP financial measure of constant currency.

We enter into foreign exchange forward contracts to mitigate fluctuations in forecasted U.S. dollar-equivalent revenues from changes in foreign currency exchange rates. These contracts may reduce, but do not entirely eliminate, the effect of foreign currency exchange fluctuations, and we may choose not to hedge certain exposures. We designate these contracts as cash flow hedges of forecasted foreign currency revenue and initially record the gains or losses on these derivative instruments as a component of AOCI and reclassify the amounts into “Revenues” on the Consolidated Statements of Operations in the same period the forecasted transaction affects earnings. If the U.S dollar weakened by 10% as of December 31, 2024 and December 31, 2023, the amount recorded in AOCI related to our foreign exchange contracts, before taxes, would have been approximately $1.9 billion and $958 million lower, respectively. This adverse change in AOCI would be expected to offset a corresponding favorable foreign currency change in the underlying forecasted revenues when recognized in earnings.

We enter into foreign exchange forward contracts to mitigate fluctuations in forecasted and firmly committed U.S. dollar-equivalent transactions related to the licensing and production of content assets from changes in foreign currency exchange rates. These contracts may reduce, but do not entirely eliminate, the effect of foreign currency exchange fluctuations, and we may choose not to hedge certain exposures. We designate these contracts as cash flow hedges and initially record the gains or losses on these derivative instruments as a component of AOCI and reclassify the amounts into “Cost of Revenues” to offset the hedged exposures as they affect earnings, which occurs as the underlying hedged content assets are amortized. If the U.S dollar strengthened by 10% as of December 31, 2024 and December 31, 2023, the amount recorded in AOCI related to our foreign exchange contracts, before taxes, would have been approximately $187 million and $71 million lower, respectively. This adverse change in AOCI would be expected to offset a corresponding favorable foreign currency change in the underlying exposures when recognized in earnings.

We use non-derivative instruments to mitigate foreign exchange risk related to our net investments in certain foreign subsidiaries. These non-derivative instruments may reduce, but do not entirely eliminate, the effect of foreign currency exchange fluctuations, and we may choose not to hedge certain exposures. We designate a portion of our foreign currency-denominated Senior Notes in euros as net investment hedges and the gains or losses on these non-derivative instruments are reported as a component of AOCI and remain in AOCI until the hedged net investment is sold or liquidated, at which point the amounts recognized in AOCI are reclassified into earnings.

We have also experienced and will continue to experience fluctuations in our net income as a result of gains (losses) on the settlement and the remeasurement of monetary assets and liabilities denominated in currencies that are not the functional currency. In the year ended December 31, 2024, we began entering into foreign exchange forward contracts to mitigate the foreign exchange risk on intercompany transactions and monetary assets and liabilities that are not denominated in the functional currencies of the Company and its subsidiaries. These contracts may reduce, but do not entirely eliminate, the effect of foreign currency exchange fluctuations, and we may choose not to hedge certain exposures. Certain contracts are not designated as hedging instruments and the gains or losses on these derivative instruments are recorded in “Interest and other income (expense)” in the Consolidated Statements of Operations. We also designate certain contracts as fair value hedges to mitigate the foreign exchange risk on the remeasurement of our foreign-currency denominated debt. The gains or losses on these derivative instruments included in the assessment of hedge effectiveness are recorded in “Interest and other income (expense),” net with the offsetting foreign currency remeasurement gains and losses on the hedged items. If an adverse change in exchange rates of 10% was applied to our monetary assets and liabilities denominated in currencies other than the functional currencies as of December 31, 2024 and December 31, 2023, income before income taxes would have been approximately $38 million and $516 million lower, respectively, after considering the offsetting impact of the foreign currency exchange contracts and our net investment hedges. The decrease in the hypothetical adverse change in income before taxes from $516 million as of December 31, 2023 to $38 million as of December 31, 2024 is primarily driven by our use of non-derivative and derivative instruments to mitigate foreign exchange risk related to the remeasurement of foreign-currency denominated balances during the year ended December 31, 2024.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements and accompanying notes listed in Part IV, Item 15(a)(1) of this Annual Report on Form 10-K are included immediately following Part IV hereof and incorporated by reference herein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our co-Chief Executive Officers and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, our co-Chief Executive Officers and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K were effective in providing reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our co-Chief Executive Officers and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Our management, including our co-Chief Executive Officers and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Netflix have been detected.

(b) Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act). Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2024. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control—Integrated Framework* (2013 framework). Based on our assessment under the framework in *Internal Control—Integrated Framework* (2013 framework), our management concluded that our internal control over financial reporting was effective as of December 31, 2024. The effectiveness of our internal control over financial reporting as of December 31, 2024 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report that is included herein.

(c) Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended December 31, 2024 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Netflix, Inc.

Opinion on Internal Control Over Financial Reporting

We have audited Netflix, Inc.'s internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Netflix, Inc. (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2024, and the related notes and our report dated January 27, 2025 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 9B. Other Information

Rule 10b5-1 Trading Plans

The adoption or termination of contracts, instructions or written plans for the purchase or sale of our securities by our Section 16 officers and directors for the three months ended December 31, 2024, each of which is intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) under the Exchange Act ("Rule 10b5-1 Plan"), were as follows:

Name	Title	Action	Date Adopted	Expiration Date	Aggregate # of Securities to be Purchased/Sold
Greg Peters (1)	Co-CEO and Director	Termination	10/30/2024	N/A	187,913
Greg Peters (2)	Co-CEO and Director	Adoption	10/30/2024	11/1/2027	158,583
David Hyman (3)	Chief Legal Officer	Adoption	10/29/2024	1/30/2026	104,154
Ted Sarandos (4)	Co-CEO and Director	Adoption	10/25/2024	2/27/2026	199,063
Spencer Neumann (5)	Chief Financial Officer	Adoption	10/29/2024	12/31/2025	33,406
Ann Mather (6)	Director	Adoption	10/31/2024	12/31/2025	2,682
Strive Masiyiwa (7)	Director	Adoption	11/7/2024	12/31/2025	2,813
Jeffrey Karbowski (8)	Chief Accounting Officer	Adoption	10/29/2024	1/31/2026	3,820

(1) On October 30, 2024, Greg Peters, Co-CEO and a member of the Board of Directors, terminated a pre-arranged stock trading plan pursuant to Rule 10b5-1, which was adopted on July 26, 2023 and provided for the potential exercise of vested stock options and the associated sale of up to 187,913 shares of Netflix common stock until November 1, 2027 or the earlier completion of all authorized transactions under the plan.

(2) Upon termination of Mr. Peters' prior plan (described in footnote 1), on October 30, 2024, Mr. Peters entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 that provides for the potential exercise of vested stock options and the associated sale of up to 158,583 shares of Netflix common stock. This figure includes a grant of 31,112 Performance Share Units (PSUs) that are expected to vest during the term of the 10b5-1 plan, which are assumed to vest at 100% of the target award amount. The actual number of PSUs that may vest can vary between 0% - 200% of the target award of PSUs, subject to the achievement of certain performance conditions as set forth in the PSU award agreement, less shares to be withheld for tax withholding obligations. The plan expires on November 1, 2027, or upon the earlier completion of all authorized transactions under the plan.

(3) David Hyman, Chief Legal Officer, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on October 29, 2024. Mr. Hyman's plan provides for the potential exercise of vested stock options and the associated sale of up to 104,154 shares of Netflix common stock. This figure includes 2,174 PSUs that are expected to vest during the term of the 10b5-1 plan, which are assumed to vest at 100% of the target award amount. The actual number of PSUs that may vest can vary between 0% - 200% of the target award of PSUs, subject to the achievement of certain performance conditions as set forth in the PSU award agreement, less shares to be withheld for tax withholding obligations. The plan expires on January 30, 2026, or upon the earlier completion of all authorized transactions under the plan.

(4) Ted Sarandos, co-CEO and a member of the Board of Directors, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on October 25, 2024. Mr. Sarandos' plan provides for the potential exercise of vested stock options and the associated sale of up to 199,063 shares of Netflix common stock. The plan expires on February 27, 2026, or upon the earlier completion of all authorized transactions under the plan.

(5) Spencer Neumann, Chief Financial Officer, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on October 29, 2024. Mr. Neumann's plan provides for the potential exercise of vested stock options and the associated sale of up to 33,406 shares of Netflix common stock. The plan expires on December 31, 2025, or upon the earlier completion of all authorized transactions under the plan.

(6) Ann Mather, a member of the Board of Directors, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on October 31, 2024. Ms. Mather's plan provides for the potential exercise of vested stock options and the associated sale of up to 2,682 shares of Netflix common stock. The plan expires on December 31, 2025, or upon the earlier completion of all authorized transactions under the plan.

(7) Strive Masiyiwa, a member of the Board of Directors, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on November 7, 2024. Mr. Masiyiwa's plan provides for the potential exercise of vested stock options and the associated sale of up to 2,813 shares of Netflix common stock. The plan expires on December 31, 2025, or upon the earlier completion of all authorized transactions under the plan.

(8) Jeffrey Karbowski, Chief Accounting Officer, entered into a pre-arranged stock trading plan pursuant to Rule 10b5-1 on October 29, 2024. Mr. Karbowski's plan provides for the potential exercise of vested stock options and the associated sale of up to 3,820 shares of Netflix common stock. The plan expires on January 31, 2026, or upon the earlier completion of all authorized transactions under the plan.

Other than those disclosed above, none of our directors or officers adopted or terminated a "non-Rule 10b5-1 trading arrangement" as defined in Item 408 of Regulation S-K.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information regarding our directors and executive officers is incorporated by reference from the information contained under the sections “Proposal One: Election of Directors,” and “Code of Ethics” in our Proxy Statement for the Annual Meeting of Stockholders.

The Company has adopted an insider trading policy which governs transactions in our securities by the Company and its directors, officers, employees, consultants, and contractors and is designed to promote compliance with insider trading laws, rules and regulations applicable to the Company. A copy of our insider trading policy is filed with this Annual Report on Form 10-K as Exhibit 19.1.

Item 11. Executive Compensation

Information required by this item is incorporated by reference from information contained under the sections “Compensation Discussion and Analysis” and “Compensation of Named Executive Officers and Other Matters” in our Proxy Statement for the Annual Meeting of Stockholders.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this item is incorporated by reference from information contained under the sections “Security Ownership of Certain Beneficial Owners and Management” and “Equity Compensation Plan Information” in our Proxy Statement for the Annual Meeting of Stockholders.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information required by this item is incorporated by reference from information contained under the section “Certain Relationships and Related Transactions” and “Director Independence” in our Proxy Statement for the Annual Meeting of Stockholders.

Item 14. Principal Accountant Fees and Services

Information with respect to principal independent registered public accounting firm fees and services is incorporated by reference from the information under the caption “Proposal Two: Ratification of Appointment of Independent Registered Public Accounting Firm” in our Proxy Statement for the Annual Meeting of Stockholders.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) The following documents are filed as part of this Annual Report on Form 10-K:

(1) Financial Statements:

The financial statements are filed as part of this Annual Report on Form 10-K under “Item 8. Financial Statements and Supplementary Data.”

(2) Financial Statement Schedules:

The financial statement schedules are omitted as they are either not applicable or the information required is presented in the financial statements and notes thereto under “Item 8. Financial Statements and Supplementary Data.”

(3) Exhibits:

See Exhibit Index immediately following the signature page of this Annual Report on Form 10-K.

Item 16. Form 10–K Summary

None.

NETFLIX, INC.

INDEX TO FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

To the Stockholders and the Board of Directors of Netflix, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Netflix, Inc. (the Company) as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated January 27, 2025 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

	Content Amortization
Description of the Matter	As disclosed in Note 1 to the consolidated financial statements “Organization and Summary of Significant Accounting Policies”, the Company acquires, licenses and produces content, including original programming (“Content”). The Company amortizes Content based on factors including historical and estimated viewing patterns. Auditing the amortization of the Company’s Content is complex and subjective due to the judgmental nature of amortization which is based on an estimate of future viewing patterns. Estimated viewing patterns are based on historical and forecasted viewing. If actual viewing patterns differ from these estimates, the pattern and/or period of amortization would be changed and could affect the timing of recognition of content amortization.
How We Addressed the Matter in Our Audit	We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the content amortization process. For example, we tested controls over management’s review of the content amortization method and the significant assumptions, including the historical and forecasted viewing hour consumption, used to develop estimated viewing patterns. We also tested management’s controls to determine that the data used in the model was complete and accurate. To test content amortization, our audit procedures included, among others, evaluating the content amortization method, testing the significant assumptions used to develop the estimated viewing patterns and testing the completeness and accuracy of the underlying data. For example, we assessed management’s assumptions by comparing them to current viewing trends and current operating information including comparing previous estimates of viewing patterns to actual results. We also performed sensitivity analyses to evaluate the potential changes in the content amortization recorded that could result from changes in the assumptions.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2012.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Summary of Significant Accounting Policies

Description of Business

Netflix, Inc. (the “Company”) was incorporated on August 29, 1997 and began operations on April 14, 1998. The Company is one of the world’s leading entertainment services with approximately 302 million paid memberships in over 190 countries enjoying TV series, films and games across a wide variety of genres and languages. Members can play, pause and resume watching as much as they want, anytime, anywhere, and can change their plans at any time.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles ("GAAP") in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant items subject to such estimates and assumptions include the content asset amortization policy and the recognition and measurement of income tax assets and liabilities. The Company bases its estimates on historical experience and on various other assumptions that the Company believes to be reasonable under the circumstances. On an ongoing basis, the Company evaluates these assumptions, judgments and estimates. Actual results may differ from these estimates.

Recently issued accounting pronouncements not yet adopted

In December 2023, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*, which requires public entities, on an annual basis, to provide disclosure of specific categories in the rate reconciliation, as well as disclosure of income taxes paid disaggregated by jurisdiction. ASU 2023-09 is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company is currently evaluating the impact of adopting ASU 2023-09.

In November 2024, the FASB issued ASU 2024-03, *Income Statement-Reporting Comprehensive Income-Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses*, requiring public entities to disclose additional information about specific expense categories in the notes to the financial statements on an interim and annual basis. ASU 2024-03 is effective for fiscal years beginning after December 15, 2026, and for interim periods beginning after December 15, 2027, with early adoption permitted. The Company is currently evaluating the impact of adopting ASU 2024-03.

Recently adopted accounting pronouncements

In November 2023, the FASB issued ASU 2023-07, *Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures*, requiring public entities to disclose information about their reportable segments’ significant expenses and other segment items on an interim and annual basis. Public entities with a single reportable segment are required to apply the disclosure requirements in ASU 2023-07, as well as all existing segment disclosures and reconciliation requirements in ASC 280 on an interim and annual basis. The Company adopted ASU 2023-07 during the year ended December 31, 2024. See Note 12 *Segment and Geographic Information* in the accompanying notes to the consolidated financial statements for further detail.

Cash Equivalents and Short-term Investments

The Company considers investments in instruments purchased with an original maturity of 90 days or less to be cash equivalents. The Company also classifies amounts in transit from payment processors for customer credit card and debit card transactions that it expects to settle within several days as cash equivalents.

The Company classifies short-term investments, which consist of marketable securities with original maturities in excess of 90 days as available-for-sale. Short-term investments are reported at fair value, with allowances for credit losses included in “Interest and other income (expense)” in the Consolidated Statements of Operations and unrealized gains and losses included in “Accumulated other comprehensive income (loss)” within Stockholders’ equity in the Consolidated Balance Sheets. The Company uses the specific identification method to determine cost in calculating realized gains and losses upon the sale of short-term investments.

Short-term investments are reviewed periodically for allowances for credit losses and impairment. When evaluating the investments, the Company reviews factors such as the extent to which the fair value of the security is less than the amortized cost basis, adverse conditions specifically related to the security, the financial condition of the issuer, the Company’s intent to sell, and whether it would be more likely than not that the Company would be required to sell the investments before the recovery of their amortized cost basis.

Content

The Company acquires, licenses and produces content, including original programming, in order to offer members unlimited viewing of video entertainment. The content licenses are for a fixed fee and specific windows of availability. Payment terms for certain content licenses and the production of content require more upfront cash payments relative to the amortization expense. Payments for content, including additions to content assets and the changes in related liabilities, are classified within "Net cash provided by operating activities" on the Consolidated Statements of Cash Flows.

The Company recognizes content assets (licensed and produced) as “Content assets, net” on the Consolidated Balance Sheets. For licensed content, the Company capitalizes the fee per title and records a corresponding liability at the gross amount of the liability when the license period begins, the cost of the title is known and the title is accepted and available for streaming. For produced content, the Company capitalizes costs associated with the production, including development costs, direct costs and production overhead.

Based on factors including historical and estimated viewing patterns, the Company amortizes the content assets (licensed and produced) in “Cost of revenues” on the Consolidated Statements of Operations over the shorter of each title's contractual window of availability or estimated period of use over ten years, beginning with the month of first availability. The amortization is on an accelerated basis, as the Company typically expects more upfront viewing, and film amortization is more accelerated than TV series amortization. On average, over 90% of a licensed or produced content asset is expected to be amortized within four years after its month of first availability. The Company reviews factors impacting the amortization of the content assets on a regular basis. The Company's estimates related to these factors require considerable management judgment.

In the normal course of business, the Company, or a third-party producing content on the Company's behalf, may qualify for tax incentives through eligible spend on productions. The accounting for tax incentives is dependent on the particular type of incentive, including the nature of the benefit and the location the incentive is earned. In general, tax incentives are realized as cash receipts and may be received prior to or after a title launches on the Company’s service. Upon a title’s launch, any amounts the Company is eligible for through qualified production spend but has not received, are recognized in “Other current assets” or “Other non-current assets” on the Company’s Consolidated Balance Sheets as receivables. Tax incentives are generally accounted for as a reduction to the cost basis of the Company’s content assets (presented in “Content assets, net”) and reduce content amortization over the life of the title (as presented in “Cost of revenues”) on the Consolidated Statements of Operations.

The Company's business model is subscription based as opposed to a model generating revenues at a specific title level. Content assets (licensed and produced) are predominantly monetized as a group and therefore are reviewed in aggregate at a group level when an event or change in circumstances indicates a change in the expected usefulness of the content or that the fair value may be less than unamortized cost. To date, the Company has not identified any such event or changes in circumstances. If such changes are identified in the future, these aggregated content assets will be stated at the lower of unamortized cost or fair value. In addition, unamortized costs for assets that have been, or are expected to be, abandoned are written off.

Acquisitions

The Company uses its best estimates and assumptions to assign fair value to the tangible and intangible assets acquired and liabilities assumed at the acquisition date. In addition, uncertain tax positions, tax-related valuation allowances and pre-acquisition contingencies are initially recorded in connection with a business combination as of the acquisition date.

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Depreciation is calculated using the straight-line method over the shorter of the estimated useful lives of the respective assets, generally up to 30 years, or the expected lease term for leasehold improvements, if applicable.

Trade Receivables

Trade receivables primarily consist of membership and advertising fees due to the Company. The Company evaluates the need for an allowance for credit losses based on historical collection trends, the financial condition of its payment partners, and external market factors.

Revenue Recognition

The Company's primary source of revenues is from monthly membership fees. Members are billed in advance of the start of their monthly membership and revenues are recognized ratably over each monthly membership period. Revenues are presented net of the taxes that are collected from members and remitted to governmental authorities. The Company is the principal in all its relationships where partners, including consumer electronics ("CE") manufacturers, multichannel video programming distributors ("MVPDs"), mobile operators and internet service providers ("ISPs"), provide access to the service as the Company retains control over service delivery to its members. In circumstances in which the price that the member pays is established by a partner and there is no standalone price for the Netflix service (for instance, in a bundle), the net amount collected from the partner is recognized as revenue.

The Company also earns revenue from advertisements presented on its streaming service, consumer products, live events and various other sources. Revenues earned from sources other than monthly membership fees were not a material component of revenues for the years ended December 31, 2024, 2023, and 2022. See Note 2 *Revenue Recognition* to the consolidated financial statements for further information regarding revenues.

Sales and Marketing

Sales and marketing expenses consist primarily of advertising expenses and certain payments made to marketing and advertising sales partners, including CE manufacturers, MVPDs, mobile operators and ISPs. Sales and marketing expenses also include payroll, stock-based compensation, facilities, and other related expenses for personnel that support the Company's advertising sales and marketing activities. Marketing expenses are expensed as incurred and include promotional activities such as digital and television advertising. Advertising expenses were $1,779 million, $1,732 million and $1,586 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Income Taxes

The Company records a provision for income taxes for the anticipated tax consequences of the reported results of operations using the asset and liability method. Deferred income taxes are recognized by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as net operating loss and tax credit carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The measurement of deferred tax assets is reduced, if necessary, by a valuation allowance for any tax benefits for which future realization is uncertain. The Company accounts for the tax effects of global intangible low tax income as a current period expense.

The Company does not recognize certain tax benefits from uncertain tax positions within the provision for income taxes. The Company may recognize a tax benefit only if it is more likely than not the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. See Note 10 *Income Taxes* to the consolidated financial statements for further information regarding income taxes.

Foreign Currency

The functional currency for the Company's subsidiaries is determined based on the primary economic environment in which the subsidiary operates. The Company translates the assets and liabilities of its non-U.S. dollar functional currency subsidiaries into U.S. dollars using exchange rates in effect at the end of each period. Revenues and expenses for these subsidiaries are translated using rates that approximate those in effect during the period. Gains and losses from these translations are recognized in cumulative translation adjustment included in "Accumulated other comprehensive income" in Stockholders' equity on the Consolidated Balance Sheets.

The Company remeasures monetary assets and liabilities that are not denominated in the functional currency at exchange rates in effect at the end of each period. Gains and losses from these remeasurements are recognized in "Interest and other income (expense)" in the Consolidated Statements of Operations. Foreign exchange gains (losses) were $(18) million, $(293) million, and $282 million for the years ended December 31, 2024, 2023, and 2022, respectively. These gains and losses were primarily due to the non-cash remeasurement of our Senior Notes denominated in euros and the remeasurement of cash and content liability positions denominated in currencies other than functional currencies. Foreign exchange gains (losses) for the year ended December 31, 2024 were net of hedging impacts. No hedging gains or losses were recognized in the Consolidated Statements of Operations in the years ended December 31, 2023 and 2022. See Note 7 *Derivative Financial Instruments and Hedging Activities* for further information.

Derivative Financial Instruments and Hedging Activities

The Company uses derivative and non-derivative instruments to manage foreign exchange risk related to its ongoing business operations with the primary objective of reducing earnings and cash flow volatility associated with fluctuations in foreign exchange rates.

The Company recognizes derivative instruments at fair value as either assets (presented in "Other current assets" and "Other non-current assets") or liabilities (presented in "Accrued expenses and other liabilities" and "Other non-current liabilities") on the Company's Consolidated Balance Sheets. The Company classifies derivative instruments in the Level 2 category within the fair value hierarchy.

Cash flow hedges

The Company enters into forward contracts to manage the foreign exchange risk on forecasted revenue transactions denominated in currencies other than the U.S. dollar, as well as the foreign exchange risk on forecasted transactions and firm commitments related to the licensing and production of foreign currency-denominated content assets. These forward contracts are designated as cash flow hedges of foreign currency firm commitments and forecasted transactions and generally have maturities of 36 months or less. The hedging contracts may reduce, but do not entirely eliminate, the effect of foreign currency exchange movements, and the Company may choose not to hedge certain exposures.

The gain or loss on derivative instruments designated as cash flow hedges of forecasted foreign currency revenue is initially reported as a component of accumulated other comprehensive income ("AOCI") and reclassified into "Revenues" on the Consolidated Statements of Operations in the same period the forecasted transaction affects earnings. The gain or loss on derivative instruments designated as cash flow hedges of firmly committed or forecasted transactions related to the licensing and production of content assets is initially reported as a component of AOCI and reclassified into "Cost of Revenues" on the Consolidated Statements of Operations in the same period the hedged transaction affects earnings, which occurs as the underlying hedged content assets are amortized. Cash flows from hedging activities are classified in the same category as the cash flows for the underlying item being hedged within "Net cash provided by operating activities" on the Consolidated Statements of Cash Flows.

In the event that the likelihood of occurrence of the underlying forecasted transactions is determined to be probable not to occur, the gains or losses on the related cash flow hedges are reclassified from AOCI to "Interest and other income (expense)" in the Consolidated Statements of Operations in the period of dedesignation.

Fair value hedges

The Company designates forward contracts as fair value hedges to manage the foreign exchange risk on its foreign-currency denominated debt. These hedges may reduce, but do not entirely eliminate, the effect of foreign currency exchange movements, and the Company may choose not to hedge the full amount of its exposure. The gain or loss on derivative instruments designated as fair value hedges included in the assessment of hedge effectiveness is recognized in "Interest and other income (expense)," net with the offsetting foreign currency remeasurement gains and losses on the hedged items. The Company excludes forward points from the assessment of hedge effectiveness and recognizes the initial value of the excluded component over the life of the hedging instrument in "Interest and other income (expense)" on the Consolidated Statements of Operations. The difference between changes in fair value of the excluded component and the amount recognized in earnings is recognized as a component in AOCI. Cash flows from hedging activities are classified in the same category as the cash flows for the underlying item being hedged within "Net cash provided by (used in) financing activities" on the Consolidated Statements of Cash Flows.

Net investment hedges

The Company designates a portion of its foreign currency-denominated debt as net investment hedges to manage the foreign exchange risk on its investment in certain foreign subsidiaries. These hedges may reduce, but do not entirely eliminate, the effect of foreign currency exchange movements, and the Company may choose not to hedge certain exposures. The gains or losses on these non-derivative instruments are reported as a component of AOCI as part of the cumulative translation adjustment on the Company's Consolidated Balance Sheets. The accumulated gains and losses remain in AOCI until the hedged net investment is sold or liquidated, at which point the amounts recognized in AOCI are reclassified into earnings.

Derivative instruments not designated as hedging instruments

The Company enters into forward contracts to manage the foreign exchange risk on intercompany transactions and monetary assets and liabilities that are not denominated in the functional currencies of the Company and its subsidiaries. These derivative instruments are not designated as hedging instruments and may reduce, but do not entirely eliminate, the effect of foreign currency exchange movements. The gains or losses on derivative instruments not designated as hedging instruments are recorded in "Interest and other income (expense)" in the Consolidated Statements of Operations. Cash flows related to these derivative instruments are classified within "Net cash provided by operating activities" on the Consolidated Statements of Cash Flows.

See Note 7 *Derivative Financial Instruments and Hedging Activities* to the consolidated financial statements for further information regarding the Company's derivative and non-derivative financial instruments.

Stock-Based Compensation

The Company grants non-qualified stock options to its employees on a monthly basis. For certain executive officers, the Company grants restricted stock units ("RSUs") and performance-based restricted stock units ("PSUs"). Stock-based compensation expense is based on the fair value of the stock awards at the grant date and is recognized, net of forfeitures, over the requisite service period. See Note 9 *Stockholders' Equity* to the consolidated financial statements for further information regarding stock-based compensation.

2. Revenue Recognition

The following tables summarize streaming revenues, paid net membership additions (losses), and ending paid memberships by region for the years ended December 31, 2024, 2023 and 2022, respectively. Hedging gains of $124 million are included in "Streaming revenues" for the year ended December 31, 2024. No hedging gains and losses were recognized as "Streaming revenues" in the comparative prior year periods. See Note 7 *Derivative Financial Instruments and Hedging Activities* for further information.

United States and Canada (UCAN)

	As of/Year Ended December 31,		
	2024	2023	2022
		(in thousands)	
Streaming revenues	$ 17,359,369	$ 14,873,783	$ 14,084,643

Paid net membership additions	12,320	12,084	2,693
Paid memberships at end of period (1)	101,133	88,813	76,729

Latin America (LATAM)

	As of/Year Ended December 31,		
	2024	2023	2022
		(in thousands)	
Streaming revenues	$ 4,839,816	$ 4,446,461	$ 4,069,973
Paid net membership additions	7,330	4,298	1,738
Paid memberships at end of period (1)	53,327	45,997	41,699

Asia-Pacific (APAC)

	As of/Year Ended December 31,		
	2024	2023	2022
		(in thousands)	
Streaming revenues	$ 4,414,746	$ 3,763,727	$ 3,570,221
Paid net membership additions	12,203	7,315	5,391
Paid memberships at end of period (1)	57,541	45,338	38,023

(1) A paid membership (also referred to as a paid subscription) is defined as a membership that has the right to receive Netflix service following sign-up and a method of payment being provided, and that is not part of a free trial or certain other promotions that may be offered by the Company to new or rejoining members. Certain members have the option to add extra member sub accounts. These extra member sub accounts are not included in paid memberships. A membership is canceled and ceases to be reflected in the above metrics as of the effective cancellation date. Voluntary cancellations generally become effective at the end of the prepaid membership period. Involuntary cancellations, as a result of a failed method of payment, become effective immediately. Memberships are assigned to territories based on the geographic location used at time of sign-up as determined by the Company's internal systems, which utilize industry standard geo-location technology.

Deferred revenue primarily consists of membership fees billed that have not been recognized, as well as gift and other prepaid memberships that have not been fully redeemed. As of December 31, 2024, total deferred revenue was $1,521 million, the vast majority of which was related to membership fees billed that are expected to be recognized as revenue within the next month. The remaining deferred revenue balance, which is related to gift cards and other prepaid memberships, will be recognized as revenue over the period of service after redemption, which is expected to occur over the next 12 months. The $78 million increase in deferred revenue as compared to the balance of $1,443 million for the year ended December 31, 2023, is a result of the increase in membership fees billed due to increased memberships and price increases.

3. Earnings per Share

Basic earnings per share is computed using the weighted-average number of outstanding shares of common stock during the period. Diluted earnings per share is computed using the weighted-average number of outstanding shares of common stock and, when dilutive, potential outstanding shares of common stock during the period. Potential outstanding shares of common stock are calculated using the treasury-stock method and consist of incremental shares issuable upon the assumed exercise of stock options and vesting of time-based and performance-based restricted stock units. The computation of earnings per share is as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands, except per share data)		
Basic earnings per share:			
Net income	$ 8,711,631	$ 5,407,990	$ 4,491,924
Shares used in computation:			
Weighted-average shares of common stock outstanding	429,519	441,571	444,698
Basic earnings per share	$ 20.28	$ 12.25	$ 10.10
Diluted earnings per share:			
Net income	$ 8,711,631	$ 5,407,990	$ 4,491,924
Shares used in computation:			
Weighted-average shares of common stock outstanding	429,519	441,571	444,698
Effect of dilutive stock-based awards	9,742	7,927	6,592
Weighted-average number of shares	439,261	449,498	451,290
Diluted earnings per share	$ 19.83	$ 12.03	$ 9.95

The following table summarizes the potential shares of common stock excluded from the diluted calculation as their inclusion would have been anti-dilutive:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Stock-based awards	243	4,109	6,790

4. Cash, Cash Equivalents, Restricted Cash, and Short-term Investments

The Company classifies short-term investments, which consist of marketable securities with original maturities in excess of 90 days as available-for-sale ("AFS"). The Company does not buy and hold securities principally for the purpose of selling them in the near future. The Company's policy is focused on the preservation of capital, liquidity and return. From time to time, the Company may sell certain securities but the objectives are generally not to generate profits on short-term differences in price.

The following tables summarize the Company's cash, cash equivalents, restricted cash and short-term investments as of December 31, 2024 and 2023:

	As of December 31, 2024							
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Cash and cash equivalents	Short-term investments	Other Current Assets	Non-current Assets
	(in thousands)							
Cash	$ 4,866,753	$ —	$ —	$ 4,866,753	$ 4,864,207	$ —	$ 2,472	$ 74
Level 1 securities:								
Money market funds	2,676,314	—	—	2,676,314	2,676,256	—	—	58
Level 2 securities:								
Time Deposits (1)	301,374	—	—	301,374	264,270	37,104	—	—
Government securities (2)	1,738,642	3,260	—	1,741,902	—	1,741,902	—	—
	$ 9,583,083	$ 3,260	$ —	$ 9,586,343	$ 7,804,733	$ 1,779,006	$ 2,472	$ 132

	As of December 31, 2023							
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Cash and cash equivalents	Short-term investments	Other Current Assets	Non-current Assets
	(in thousands)							
Cash	$ 5,988,176	$ —	$ —	$ 5,988,176	$ 5,986,629	$ —	$ 1,466	$ 81
Level 1 securities:								
Money market funds	925,707	—	—	925,707	925,652	—	—	55
Level 2 securities:								
Time Deposits (1)	225,605	—	—	225,605	204,632	20,973	—	—
	$ 7,139,488	$ —	$ —	$ 7,139,488	$ 7,116,913	$ 20,973	$ 1,466	$ 136

(1) The majority of the Company's time deposits are international deposits, which mature within one year.

(2) The Company's government securities mature within one year.

Other current assets include restricted cash for deposits related to self-insurance. Non-current assets include restricted cash related to letter of credit agreements. The fair value of AFS securities, cash equivalents and short-term investments included in the Level 2 category is based on observable inputs, such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly.

See Note 6 *Debt* and Note 7 *Derivative Financial Instruments and Hedging Activities* to the consolidated financial statements for further information regarding the fair value of the Company's senior notes and derivative financial instruments.

5. Balance Sheet Components

Content Assets, Net

Content assets consisted of the following:

	As of December 31,	
	2024	2023
	(in thousands)	
Licensed content, net	$ 12,422,309	$ 12,722,701
Produced content, net		
Released, less amortization	10,151,543	9,843,150
In production	9,317,367	8,247,578
In development and pre-production	561,243	844,627
	20,030,153	18,935,355
Content assets, net	$ 32,452,462	$ 31,658,056

As of December 31, 2024, approximately $6,409 million, $2,465 million, and $1,431 million of the $12,422 million unamortized cost of the licensed content is expected to be amortized in each of the next three years. As of December 31, 2024, approximately $3,954 million, $2,767 million, and $1,718 million of the $10,152 million unamortized cost of the produced content that has been released is expected to be amortized in each of the next three years.

The following table summarizes the amortization of content assets:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Licensed content	$ 7,689,014	$ 7,145,446	$ 7,681,978
Produced content (1)	7,612,503	7,051,991	6,344,154
Total	$ 15,301,517	$ 14,197,437	$ 14,026,132

(1) Tax incentives earned on qualified production spend generally reduce the cost-basis of content assets and result in lower content amortization over the life of the title. For the years ended December 31, 2024, 2023 and 2022, tax incentives resulted in lower content amortization on produced content of approximately $899 million, $835 million and $719 million, respectively.

Property and Equipment, Net

Property and equipment and accumulated depreciation consisted of the following:

	As of December 31,		Estimated Useful Lives (in Years)
	2024	2023	
	(in thousands)		
Land	$ 85,000	$ 85,000	
Buildings and improvements	475,684	154,165	30 years

Furniture and fixtures	134,987	144,737	3 years
Information technology	446,419	414,092	3 years
Corporate aircraft	99,175	99,175	8-10 years
Machinery and equipment	15,135	10,334	3-5 years
Capital work-in-progress	228,300	406,492	
Property and equipment, gross	2,511,293	2,346,487	
Less: Accumulated depreciation	(917,537)	(855,043)	
Property and equipment, net	$ 1,593,756	$ 1,491,444	

Leases

The Company has entered into operating leases primarily for real estate. These leases generally have terms which range from 1 year to 15 years, and often include one or more options to renew. These renewal terms can extend the lease term from 1 year to 20 years, and are included in the lease term when it is reasonably certain that the Company will exercise the option. These operating leases are included in "Other non-current assets" on the Company's Consolidated Balance Sheets, and represent the Company's right to use the underlying asset for the lease term. The Company's obligations to make lease payments are included in "Accrued expenses and other liabilities" and "Other non-current liabilities" on the Company's Consolidated Balance Sheets. Operating lease right-of-use assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. The Company has entered into various short-term operating leases with an initial term of twelve months or less. These leases are not recorded on the Company's Consolidated Balance Sheets. All operating lease expense is recognized on a straight-line basis over the lease term. Because the rate implicit in each lease is not readily determinable, the Company uses its incremental borrowing rate to determine the present value of the lease payments. The Company has certain contracts for real estate which may contain lease and non-lease components which it has elected to treat as a single lease component.

The components of lease costs for the years ended December 31, 2024, 2023 and 2022 were as follows:

	Year ended December 31,		
	2024	2023	2022
	(in thousands)		
Operating lease cost	$ 468,282	$ 430,856	$ 413,664
Short-term lease cost	197,691	207,822	194,764
Total lease cost	$ 665,973	$ 638,678	$ 608,428

Information related to the Company's operating right-of-use assets and related operating lease liabilities were as follows:

	Year ended December 31,		
	2024	2023	2022
	(in thousands)		
Cash paid for operating lease liabilities	$ 509,296	$ 451,525	$ 413,034
Right-of-use assets obtained in exchange for new operating lease obligations	442,391	196,639	252,393

	As of December 31,	
	2024	2023
	(in thousands, except lease term and discount rate)	
Operating lease right-of-use assets, net	$ 2,102,310	$ 2,076,899
Current operating lease liabilities	$ 428,482	$ 383,312
Non-current operating lease liabilities	1,983,688	2,046,801
Total operating lease liabilities	$ 2,412,170	$ 2,430,113
Weighted-average remaining lease term	6.9 years	7.5 years
Weighted-average discount rate	3.5 %	3.3 %

Maturities of operating lease liabilities as of December 31, 2024 were as follows (in thousands):

Due in 12 month period ended December 31,		
2025	$	505,201
2026		477,256
2027		415,983
2028		345,912
2029		276,109
Thereafter		696,367
		2,716,828
Less imputed interest		(304,658)
Total operating lease liabilities	$	2,412,170

The Company has additional operating leases for real estate of $38 million which have not commenced as of December 31, 2024, and as such, have not been recognized on the Company's Consolidated Balance Sheets. These operating leases are expected to commence in 2025 with lease terms between 3 and 7 years.

Other Current Assets

Other current assets consisted of the following:

	As of	
	December 31, 2024	**December 31, 2023**
	(in thousands)	
Trade receivables	$ 1,335,304	$ 1,287,054
Prepaid expenses	431,924	408,936
Other (1)	1,749,412	1,084,257
Total other current assets	$ 3,516,640	$ 2,780,247

(1) $653 million and $555 million of receivables related to tax incentives earned on production spend are included in Other as of December 31, 2024 and 2023, respectively.

6. Debt

As of December 31, 2024, the Company had aggregate outstanding notes of $15,583 million, net of $70 million of issuance costs and discounts, with varying maturities (the "Notes"). Of the outstanding balance, $1,784 million, net of issuance costs, is classified as short-term debt on the Consolidated Balance Sheets. As of December 31, 2023, the Company had aggregate outstanding notes of $14,543 million, net of $65 million of issuance costs. Each of the Notes are senior unsecured obligations of the Company. Interest is payable semi-annually at fixed rates.

A portion of the outstanding Notes is denominated in foreign currency (comprised of €5,170 million) and is remeasured into U.S. dollars at each balance sheet date (with remeasurement gain, net of hedging impacts, totaling $122 million for the year ended December 31, 2024). See Note 7 *Derivative Financial Instruments and Hedging Activities* to the consolidated financial statements for further information regarding the Company’s derivative and non-derivative financial instruments.

The following table provides a summary of the Company's outstanding debt and the fair values based on quoted market prices in less active markets as of December 31, 2024 and December 31, 2023:

	Principal Amount at Par				Level 2 Fair Value as of	
	December 31, 2024	December 31, 2023	Issuance Date	Maturity	December 31, 2024	December 31, 2023
	(in millions)				(in millions)	
5.750% Senior Notes	$ —	$ 400	February 2014	March 2024	$ —	$ 400
5.875% Senior Notes	800	800	February 2015	February 2025	801	807
3.000% Senior Notes (1)	487	519	April 2020	June 2025	487	516
3.625% Senior Notes	500	500	April 2020	June 2025	497	491
4.375% Senior Notes	1,000	1,000	October 2016	November 2026	998	996
3.625% Senior Notes (1)	1,346	1,434	May 2017	May 2027	1,375	1,454
4.875% Senior Notes	1,600	1,600	October 2017	April 2028	1,607	1,621
5.875% Senior Notes	1,900	1,900	April 2018	November 2028	1,970	2,009
4.625% Senior Notes (1)	1,139	1,215	October 2018	May 2029	1,220	1,300
6.375% Senior Notes	800	800	October 2018	May 2029	848	872
3.875% Senior Notes (1)	1,242	1,325	April 2019	November 2029	1,293	1,372
5.375% Senior Notes	900	900	April 2019	November 2029	918	931
3.625% Senior Notes (1)	1,139	1,215	October 2019	June 2030	1,174	1,237
4.875% Senior Notes	1,000	1,000	October 2019	June 2030	996	1,012
4.900% Senior Notes	1,000	—	August 2024	August 2034	982	—
5.400% Senior Notes	800	—	August 2024	August 2054	782	—
	$ 15,653	$ 14,608			$ 15,948	$ 15,018

(1) The following Senior Notes have a principal amount denominated in euros: 3.000% Senior Notes for €470 million, 3.625% Senior Notes for €1,300 million, 4.625% Senior Notes for €1,100 million, 3.875% Senior Notes for €1,200 million, and 3.625% Senior Notes for €1,100 million.

In the year ended December 31, 2024, the Company repaid upon maturity the $400 million aggregate principal amount of its 5.750% Senior Notes.

Each of the Notes are repayable in whole or in part upon the occurrence of a change of control, at the option of the holders, at a purchase price in cash equal to 101% of the principal plus accrued interest. The Company may redeem the Notes prior to maturity in whole or in part at an amount equal to the principal amount thereof plus accrued and unpaid interest and an applicable premium. The Notes include, among other terms and conditions, limitations on the Company's ability to create, incur or allow certain liens, and consolidate or merge with, or convey, transfer or lease all or substantially all of the Company's and its subsidiaries assets, to another person. Certain of the Notes additionally limit the ability to enter into sale and lease-back transactions and create, assume, incur or guarantee additional indebtedness of certain of the Company's subsidiaries. As of December 31, 2024 and December 31, 2023, the Company was in compliance with all related covenants.

Revolving Credit Facility

On April 12, 2024, the Company entered into a five-year, $3 billion unsecured revolving credit facility that matures on April 12, 2029 (the "Revolving Credit Agreement"), to replace its previous $1 billion unsecured revolving credit facility. As of December 31, 2024, no amounts have been borrowed under the Revolving Credit Agreement.

The borrowings under the Revolving Credit Agreement bear interest, at the Company's option, of either (i) a floating rate per annum equal to a base rate (the "Alternate Base Rate") plus an applicable margin or (ii) a per annum rate equal to an adjusted term SOFR rate (the "Adjusted Term SOFR Rate") plus an applicable margin. The applicable margin for Alternate Base Rate loans will range from 0.00% to 0.25%, and the applicable margin for Adjusted Term SOFR Rate loans will range from 0.75% to 1.25%, each based on the Company's credit ratings.

The Revolving Credit Agreement contains customary affirmative covenants and negative covenants (and customary baskets and exceptions with respect thereto) for a credit facility of this size and type and requires the Company to maintain a minimum ratio of consolidated EBITDA to consolidated interest expense of 3.0 to 1.0 as of the last day of each fiscal quarter. As of December 31, 2024 and December 31, 2023, the Company was in compliance with all related covenants and ratios.

7. Derivative Financial Instruments and Hedging Activities

The Company uses derivative and non-derivative instruments to manage foreign exchange risk related to its ongoing business operations with the primary objective of reducing earnings and cash flow volatility associated with fluctuations in foreign exchange rates. The Company did not use any derivative instruments prior to the fiscal year ended December 31, 2023.

Notional Amount of Derivative Contracts

The net notional amounts of the Company's outstanding derivative instruments were as follows:

	As of December 31,	
	2024	2023
	(in thousands)	
Derivatives designated as hedging instruments:		
Foreign exchange contracts		
Cash flow hedges	$ 18,508,390	$ 8,783,273
Fair value hedges	3,819,817	—
Derivatives not designated as hedging instruments:		
Foreign exchange contracts	1,432,136	—
Total	$ 23,760,343	$ 8,783,273

As of December 31, 2024, approximately $1.0 billion of the Company's euro–denominated Senior Notes was designated as a hedge of the foreign exchange risk of the Company's net investment in certain foreign subsidiaries. No amounts were designated as net investment hedges as of December 31, 2023.

As of December 31, 2024, the carrying amount of the Company's euro-denominated Senior Notes (included in "Long-term debt" on the Company's Consolidated Balance Sheets) which were designated as the hedged items in fair value hedges was approximately $3.6 billion. No amounts were designated as fair value hedges as of December 31, 2023.

See Note 6 *Debt* for further information on the Company's debt obligations.

Fair Value of Derivative Contracts

The fair value of the Company's outstanding derivative instruments was as follows:

	As of December 31, 2024			
	Derivative Assets		Derivative Liabilities	
	Other current assets	Other non-current assets	Accrued expenses and other liabilities	Other non-current liabilities
	(in thousands)			
Derivatives designated as hedging instruments:				
Foreign exchange contracts	$ 580,065	$ 406,677	$ 303,425	$ 83
Derivatives not designated as hedging instruments:				
Foreign exchange contracts	16,211	—	14,492	—
Total	$ 596,276	$ 406,677	$ 317,917	$ 83

	As of December 31, 2023			
	Derivative Assets		Derivative Liabilities	
	Other current assets	Other non-current assets	Accrued expenses and other liabilities	Other non-current liabilities
	(in thousands)			
Derivatives designated as hedging instruments:				
Foreign exchange contracts	$ 26,416	$ 4,518	$ 140,089	$ 46,575
Derivatives not designated as hedging instruments:				
Foreign exchange contracts	—	—	—	—
Total	$ 26,416	$ 4,518	$ 140,089	$ 46,575

The Company classifies derivative instruments in the Level 2 category within the fair value hierarchy. These instruments are valued using industry standard valuation models that use observable inputs such as interest rate yield curves, and forward and spot prices for currencies.

As of December 31, 2024, the pre-tax net accumulated gain on our foreign currency cash flow hedges included in AOCI on the Consolidated Balance Sheets expected to be recognized in earnings within the next 12 months is $564 million.

Master Netting Agreements

In order to mitigate counterparty credit risk, the Company enters into master netting agreements with its counterparties for its foreign currency exchange contracts which permit the parties to settle amounts on a net basis under certain conditions. The Company has elected to present its derivative assets and liabilities on a gross basis on its Consolidated Balance Sheets.

The Company also enters into collateral security arrangements with its counterparties that require the parties to post cash collateral when certain contractual thresholds are met. Cash collateral received is presented in “Accrued expenses and other liabilities” representing the Company’s obligation to return counterparty cash collateral. Cash collateral posted is presented in “Other current assets” representing the Company’s right to reclaim the cash collateral. The Company does not offset the fair value of its derivative instruments against the fair value of cash collateral posted or received.

The potential offsetting effect to the Company’s derivative assets and liabilities under its master netting agreements and collateral security agreements were as follows:

	As of December 31, 2024					
				Gross Amount Not Offset in the Consolidated Balance Sheets		
	Gross Amount Recognized in the Consolidated Balance Sheets	Gross Amount Offset in the Consolidated Balance Sheets	Net Amount Presented in the Consolidated Balance Sheets	Financial Instruments	Collateral Received and Posted	Net Amount
	(in thousands)					
Derivative assets	$ 1,002,953	$ —	$ 1,002,953	$ (316,320)	$ (1,800)	$ 684,833
Derivative liabilities	318,000	—	318,000	(316,320)	—	$ 1,680

	As of December 31, 2023					
				Gross Amount Not Offset in the Consolidated Balance Sheets		
	Gross Amount Recognized in the Consolidated Balance Sheets	Gross Amount Offset in the Consolidated Balance Sheets	Net Amount Presented in the Consolidated Balance Sheets	Financial Instruments	Collateral Received and Posted	Net Amount
	(in thousands)					
Derivative assets	$ 30,934	$ —	$ 30,934	$ (27,246)	$ —	$ 3,688
Derivative liabilities	186,664	—	186,664	(27,246)	—	159,418

Effect of Derivative and Non-Derivative Instruments on Consolidated Financial Statements

The pre-tax gains (losses) on the Company's cash flow hedges, fair value hedges, and net investment hedges recognized in AOCI were as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Cash flow hedges:			
Foreign exchange contracts			
Amount included in the assessment of effectiveness	$ 1,195,738	$ (155,730)	$ —
Fair value hedges:			
Foreign exchange contracts			
Amount excluded from the assessment of effectiveness	(14,334)	—	—
Net investment hedges:			
Foreign currency-denominated debt			
Amount included in the assessment of effectiveness	32,400	—	—
Total	$ 1,213,804	$ (155,730)	$ —

The gains (losses) on hedged items and derivative instruments recognized in the Consolidated Statement of Operations were as follows:

	Year Ended December 31,		
	2024		
	Revenues	Cost of Revenues	Interest and other income (expense)
	(in thousands)		
Total amounts presented in the Consolidated Statements of Operations	$ 39,000,966	$ 21,038,464	$ 266,776
Gains on derivatives in cash flow hedging relationship			
Foreign exchange contracts			
Amount of gains reclassified from AOCI	124,010	1,629	—
Gains (losses) on derivatives in fair value hedging relationship			
Foreign exchange contracts			
Hedged items	—	—	196,660
Derivatives designated as hedging instruments	—	—	(201,239)
Amount excluded from assessment of effectiveness and recognized in earnings based on amortization approach	—	—	(23,567)
Gains on derivatives not designated as hedging instruments			
Foreign exchange contracts	—	—	63,291

No gains or losses on derivative instruments were reclassified from AOCI into the Consolidated Statements of Operations in the years ended December 31, 2023 and December 31, 2022.

8. Commitments and Contingencies

Content

At December 31, 2024, the Company had $23.2 billion of obligations comprised of $4.4 billion included in "Current content liabilities" and $1.8 billion of "Non-current content liabilities" on the Consolidated Balance Sheets and $17.0 billion of obligations that are not reflected on the Consolidated Balance Sheets as they did not yet meet the criteria for recognition.

At December 31, 2023, the Company had $21.7 billion of obligations comprised of $4.5 billion included in "Current content liabilities" and $2.6 billion of "Non-current content liabilities" on the Consolidated Balance Sheets and $14.6 billion of obligations that are not reflected on the Consolidated Balance Sheets as they did not yet meet the criteria for recognition.

The expected timing of payments for these content obligations is as follows:

	As of December 31,	
	2024	2023
	(in thousands)	
Less than one year	$ 11,424,696	$ 10,328,923
Due after one year and through three years	8,113,910	8,784,302
Due after three years and through five years	2,809,834	2,016,358
Due after five years	900,491	583,766
Total content obligations	$ 23,248,931	$ 21,713,349

Content obligations include amounts related to the acquisition, licensing and production of content. Obligations that are in non-U.S. dollar currencies are translated to the U.S. dollar at period end rates. An obligation for the production of content includes non-cancelable commitments under creative talent and employment agreements as well as other production related commitments. An obligation for the acquisition and licensing of content is incurred at the time the Company enters into an agreement to obtain future titles. Once a title becomes available, a content liability is recorded on the Consolidated Balance Sheets. Certain agreements include the obligation to license rights for unknown future titles, the ultimate quantity and/or fees for which are not yet determinable as of the reporting date. Traditional film output deals, or certain TV series license agreements where the number of seasons to be aired is unknown, are examples of such license agreements. The Company does not include any estimated obligation for these future titles beyond the known minimum amount. However, the unknown obligations are expected to be significant.

Legal Proceedings

From time to time, in the normal course of its operations, the Company is subject to litigation matters and claims, including claims relating to employee relations, business practices and patent infringement. Litigation can be expensive and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict and the Company's view of these matters may change in the future as the litigation and events related thereto unfold. The Company expenses legal fees as incurred. The Company records a provision for contingent losses when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. An unfavorable outcome to any legal matter, if material, could have an adverse effect on the Company's operations or its financial position, liquidity or results of operations.

The Company is involved in litigation matters not listed herein but does not consider the matters to be material either individually or in the aggregate at this time. The Company's view of the matters not listed may change in the future as the litigation and events related thereto unfold.

Non-Income Taxes

The Company is routinely under audit by various tax authorities with regard to non-income tax matters. The subject matter of non-income tax audits primarily arises from disputes on the tax treatment and tax rate applied to our revenue in certain jurisdictions. We accrue non-income taxes that may result from examinations by, or any negotiated agreements with, these tax authorities when a loss is probable and reasonably estimable.

Similar to other U.S. companies doing business in Brazil, the Company is involved in a number of matters with Brazilian tax authorities regarding non-income tax assessments. Although the Company believes it has meritorious defenses to these matters, there is inherent complexity and uncertainty with respect to these matters, and the final outcome may be materially different from our expectations. The current potential exposure with respect to the various issues with Brazilian tax authorities regarding non-income tax assessments is estimated to be approximately $400 million, which is expected to increase over time.

Guarantees—Indemnification Obligations

In the ordinary course of business, the Company has entered into contractual arrangements under which it has agreed to provide indemnification of varying scope and terms to business partners and other parties with respect to certain matters, including, but not limited to, losses arising out of the Company's breach of such agreements and out of intellectual property infringement claims made by third parties. In these circumstances, payment may be conditional on the other party making a claim pursuant to the procedures specified in the particular contract.

The Company's obligations under these agreements may be limited in terms of time or amount, and in some instances, the Company may have recourse against third parties for certain payments. In addition, the Company has entered into indemnification agreements with its directors and certain of its officers that will require it, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. The terms of such obligations vary.

It is not possible to make a reasonable estimate of the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each particular agreement. No amount has been accrued in the accompanying consolidated financial statements with respect to these indemnification guarantees.

9. Stockholders' Equity

Voting Rights

The holders of each share of common stock shall be entitled to one vote per share on all matters to be voted upon by the Company's stockholders.

Stock Option Plan

The Netflix, Inc. 2020 Stock Plan is a stockholder-approved plan that provides for the grant of incentive stock options to employees and for the grant of non-statutory stock options, stock appreciation rights, restricted stock and restricted stock units to employees, directors and consultants.

Restricted Stock Unit Awards

The Company grants time-based restricted stock unit ("RSU") awards and performance-based restricted stock unit ("PSU") awards to certain executive officers. RSU awards vest quarterly over a three-year period subject to the executive's continued employment or service with the Company through the vesting date. PSU awards have performance periods ranging from one to three years and vest depending on the Company's achievement of predetermined market-based performance targets.

Stock Option Activity

The following table summarizes the activities related to the Company's stock options:

	Options Outstanding			
	Number of Shares	Weighted- Average Exercise Price (per share)	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Balances as of December 31, 2021	17,595,851	$ 219.83		
Granted	3,691,257	267.94		
Exercised	(1,383,669)	27.19		
Expired	(6,578)	11.10		
Balances as of December 31, 2022	19,896,861	$ 242.22		
Granted	1,729,218	372.49		
Exercised	(1,926,598)	87.30		
Expired	(4,372)	36.39		
Balances as of December 31, 2023	19,695,109	$ 268.86		
Granted	575,856	620.92		
Exercised	(4,846,048)	172.17		
Expired	(5,915)	56.05		
Balances as of December 31, 2024	15,419,002	$ 312.48	5.16	$ 8,925,315
Vested and expected to vest as of December 31, 2024	15,419,002	$ 312.48	5.16	$ 8,925,315
Exercisable as of December 31, 2024	15,401,292	$ 312.30	5.16	$ 8,917,827

The aggregate intrinsic value in the table above represents the total pretax intrinsic value (the difference between the Company's closing stock price on the last trading day of 2024 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on the last trading day of 2024. This amount changes based on the fair market value of the Company's common stock.

A summary of the amounts related to option exercises, is as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Total intrinsic value of options exercised	$ 2,352,829	$ 610,594	$ 345,839
Cash received from options exercised	832,887	169,990	35,746

The total fair value of stock options that vested during the years ended December 31, 2024 and 2023 was $242 million and $311 million, respectively. The Company did not grant any stock options subject to vesting conditions in the year ended December 31, 2022.

Restricted Stock Unit Activity

The following table summarizes the activities related to the Company's unvested RSUs and PSUs:

	Unvested Restricted Stock Units	
	Number of Shares	Weighted-Average Grant-Date Fair Value (per share)
Balances as of December 31, 2023	—	$ —
Granted (1)	159,978	686.36
Vested (1)	(26,660)	562.00
Forfeited	—	—
Balances as of December 31, 2024	133,318	$ 711.23

(1) Amounts exclude 26,660 incremental PSU awards that will be granted and 53,320 incremental PSU awards that will vest based on the achievement of market-based performance targets during the period presented, but have not been settled as of December 31, 2024.

The total fair value of RSUs that vested during the year ended December 31, 2024 was $15 million. No RSUs or PSUs were granted in the years ended December 31, 2023 and December 31, 2022.

Stock-Based Compensation

The following table summarizes total stock-based compensation expense and the related income tax impact:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Total stock-based compensation expense	$ 272,588	$ 339,368	$ 575,452
Total income tax impact on provision	43,876	61,588	127,289

As of December 31, 2024, $46 million of total unrecognized compensation cost related to unvested stock options and RSUs is expected to be recognized over a weighted-average period of 1.4 years.

Stock Repurchases

In September 2023, the Board of Directors authorized the repurchase of up to $10 billion, with no expiration date, and in December 2024, the Board of Directors increased the share repurchase authorization by an additional $15 billion, also with no expiration date. Stock repurchases may be effected through open market repurchases in compliance with Rule 10b-18 under the Exchange Act, including through the use of trading plans intended to qualify under Rule 10b5-1 under the Exchange Act, privately-negotiated transactions, accelerated stock repurchase plans, block purchases, or other similar purchase techniques and in such amounts as management deems appropriate. The Company is not obligated to repurchase any specific number of shares, and the timing and actual number of shares repurchased will depend on a variety of factors, including the Company's stock price, general economic, business and market conditions, and alternative investment opportunities. The Company may discontinue any repurchases of its common stock at any time without prior notice. During the year ended December 31, 2024, the Company repurchased 9,861,935 shares for an aggregate amount of $6,211 million (excluding the 1% excise tax on stock repurchases as a result of the Inflation Reduction Act of 2022). As of December 31, 2024, $17.1 billion remains available for repurchases. Shares repurchased by the Company are accounted for when the transaction is settled. As of December 31, 2024, there were no unsettled share repurchases. Direct costs incurred to acquire the shares are included in the total cost of the shares.

Accumulated Other Comprehensive Income (Loss)

The following table summarizes the changes in accumulated balances of other comprehensive income (loss):

	Foreign Currency Translation Adjustments	Net Investment Hedge Gains (Losses)	Change in Unrealized Gains (Losses) on Cash Flow Hedges	Change in Unrealized Gains (Losses) on Excluded Component of Fair Value Hedges	Change in Unrealized Gains (Losses) on AFS Securities	Tax (Expense) Benefit	Total
				(in thousands)

The following table summarizes the amounts reclassified from AOCI to the Consolidated Statement of Operations:

	Year Ended December 31, 2024				
	Revenues	Cost of Revenues	Interest and other income (expense)	Provision for Income Taxes	Total Reclassifications
			(in thousands)		
Gains (losses) on derivatives in cash flow hedging relationship					
Foreign exchange contracts					
Amount of gains (losses) reclassified from AOCI	$ 124,010	$ 1,629	$ —	$ (28,844)	$ 96,795
Gains (losses) on derivatives in fair value hedging relationship					
Foreign exchange contracts					
Amount excluded from assessment of effectiveness and recognized in earnings based on amortization approach	—	—	(23,567)	5,410	(18,157)
Total	$ 124,010	$ 1,629	$ (23,567)	$ (23,434)	$ 78,638

No amounts were reclassified from AOCI into the Consolidated Statements of Operations in the years ended December 31, 2023 and 2022.

10. Income Taxes

Income before provision for income taxes was as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
United States	$ 9,101,391	$ 5,602,762	$ 4,623,218
Foreign	864,266	602,643	640,711
Income before income taxes	$ 9,965,657	$ 6,205,405	$ 5,263,929

The components of provision for income taxes for all periods presented were as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Current tax provision:			
Federal	$ 1,093,667	$ 854,170	$ 109,910
State	214,814	181,684	119,795
Foreign	536,915	304,539	676,827
Total current	1,845,396	1,340,393	906,532
Deferred tax provision:			
Federal	(520,510)	(412,760)	(52,434)
State	(41,700)	(55,475)	(30,691)
Foreign	(29,160)	(74,743)	(51,402)
Total deferred	(591,370)	(542,978)	(134,527)
Provision for income taxes	$ 1,254,026	$ 797,415	$ 772,005

A reconciliation of the provision for income taxes to the amount computed by applying the 21% statutory Federal income tax rate to income before income taxes is as follows:

	Year Ended December 31,		
	2024	2023	2022
	(in thousands)		
Expected tax expense at U.S. Federal statutory tax rate	$ 2,092,710	$ 1,303,123	$ 1,105,428
State income taxes, net of Federal income tax effect	166,311	104,717	92,084
Foreign earnings at other than U.S. rates	13,909	(32,292)	104,665
Research and development tax credit	(185,312)	(87,036)	(146,615)
Excess tax benefits on stock-based compensation	(435,909)	(119,043)	(75,211)
Foreign-derived intangible income deduction	(502,968)	(426,597)	(361,013)
Nontaxable and nondeductible items	70,386	41,782	44,046
Other	34,899	12,761	8,621
Provision for income taxes	$ 1,254,026	$ 797,415	$ 772,005
Effective Tax Rate	13 %	13 %	15 %

The components of deferred tax assets and liabilities were as follows:

	As of December 31, 2024	2023
	(in thousands)	
Deferred tax assets:		
Stock-based compensation	$ 440,889	$ 486,876
Tax credits and net operating loss carryforwards	834,402	544,431
Capitalized research expenses	1,075,474	593,439
Accruals and reserves	152,142	137,251
Operating lease liabilities	522,489	516,574
OCI hedging losses	—	35,707
Unrealized losses	12,157	26,506
Other	18,197	11,615
Total deferred tax assets	3,055,750	2,352,399
Valuation allowance	(540,272)	(442,293)
Net deferred tax assets	2,515,478	1,910,106
Deferred tax liabilities:		
Depreciation & amortization	(370,709)	(357,477)
Operating right-of-use lease assets	(449,661)	(435,216)
OCI hedging gains	(220,009)	—
Acquired intangibles	(282,187)	(233,433)
Other	(15,354)	(9,430)
Total deferred tax liabilities	(1,337,920)	(1,035,556)
Net deferred tax assets	$ 1,177,558	$ 874,550

The following table shows the deferred tax assets and liabilities within our Consolidated Balance Sheets:

	As of December 31, 2024	2023
	(in thousands)	
Total deferred tax assets:		
Other non-current assets	$ 1,290,160	$ 1,000,760
Total deferred tax liabilities:		
Other non-current liabilities	(112,602)	(126,210)
Net deferred tax assets	$ 1,177,558	$ 874,550

As of December 31, 2024, for tax return purposes, the Company had $694 million of California R&D tax credit carryforwards which can be carried forward indefinitely, $943 million of state net operating loss carryforwards which will begin to expire in 2026, $41 million of foreign tax credit carryforwards which will begin to expire in 2033, and $420 million of foreign net operating loss carryforwards which will begin to expire in 2025.

In evaluating its ability to realize the net deferred tax assets, the Company considered all available positive and negative evidence, including its past operating results and the forecast of future market growth, forecasted earnings, future taxable income, and prudent and feasible tax planning strategies. As of December 31, 2024, the valuation allowance of $540 million was primarily related to California R&D tax credits, state net operating loss carryforwards, and foreign tax credits that the Company does not expect to realize.

At December 31, 2024, we have not provided for applicable U.S. income and foreign withholding taxes on an immaterial amount of undistributed foreign earnings that we intend to indefinitely reinvest. For the balance of undistributed earnings for which we are not indefinitely reinvested, we have provided the appropriate taxes.

The unrecognized tax benefits that are not expected to result in payment or receipt of cash within one year are classified as “Other non-current liabilities” and a reduction of deferred tax assets which is classified as "Other non-current assets" in the Consolidated Balance Sheets. As of December 31, 2024 and 2023, the total amount of gross unrecognized tax benefits was $432 million and $327 million, respectively, of which $251 million and $188 million, respectively, if recognized, would favorably impact the Company's effective tax rate. The aggregate changes in the Company's total gross amount of unrecognized tax benefits are summarized as follows:

	As of December 31,		
	2024	2023	2022
	(in thousands)		
Balance at the beginning of the year	$ 327,105	$ 226,977	$ 202,557
Increases related to tax positions taken during the current period	93,325	65,630	26,865
Increases related to tax positions taken during prior periods	15,751	76,794	—
Decreases related to tax positions taken during prior periods	(3,901)	(10,117)	(2,445)
Decreases related to settlements with taxing authorities	—	(32,179)	—
Decreases related to expiration of statute of limitations	—	—	—
Balance at the end of the year	$ 432,280	$ 327,105	$ 226,977

The Company includes interest and penalties related to unrecognized tax benefits within the provision for income taxes and in "Other non-current liabilities" in the Consolidated Balance Sheets. During the years ended December 31, 2024, 2023 and 2022, the Company recorded $16 million, $25 million, and $2 million, respectively, net of interest and penalties in the provision for income taxes. The amount of interest and penalties accrued at December 31, 2024 and 2023 was $44 million and $28 million, respectively.

The Company files U.S. Federal, state and foreign tax returns. The Company is currently under examination by the IRS for years 2016 through 2018 and is subject to examination for 2019 through 2023. The Company is also generally subject to examination by various state and foreign jurisdictions for years 2017 through 2023. While the Company is in various stages of inquiry and examination with certain taxing authorities and believes that its tax positions will more likely than not be sustained, it is nonetheless possible that future obligations related to these matters could arise. The Company believes that adequate amounts have been reserved for any adjustments that may ultimately result from an examination.

Given the potential outcome of current examinations, it is reasonably possible that the balance of unrecognized tax benefits could significantly change within the next twelve months. However, an estimate of the range of reasonably possible adjustments cannot be made at this time.

11. Employee Benefit Plan

The Company maintains a 401(k) savings plan covering substantially all of its employees. Eligible employees may contribute up to 80% of their annual salary through payroll deductions, but not more than the statutory limits set by the Internal Revenue Service. The Company matches employee contributions at the discretion of the Board. During the years ended December 31, 2024, 2023 and 2022, the Company's matching contributions totaled $128 million, $114 million and $102 million, respectively.

Multiemployer Benefit Plans

The Company contributes to various multiemployer defined pension plans under the terms of collective bargaining agreements that cover our union-represented employees. The risks of participating in multiemployer pension plans are different from single-employer plans such that (i) contributions made by the Company to the multiemployer pension plans may be used to provide benefits to employees of other participating employers; (ii) if the Company chooses to stop participating in the multiemployer pension plans, it may be required to pay those plans an amount based on the underfunded status of the plan; and (iii) if a company stops contributing to the multiemployer pension plan, the unfunded obligations of the plan may become the obligation of the remaining participating employers. The Company also contributes to various other multiemployer benefit plans that provide health and welfare benefits to both active and retired participants. The Company does not participate in any multiemployer benefit plans that are individually significant to the Company.

The following table summarizes the Company's contributions to multiemployer pension and health plans for the years ended December 31, 2024, 2023 and 2022, respectively:

	Year Ended December 31,		
	2024	2023	2022
		(in thousands)	
Pension benefits	$ 89,707	$ 57,285	$ 127,885
Health benefits	134,079	85,157	96,285
Total contributions	$ 223,786	$ 142,442	$ 224,170

12. Segment and Geographic Information

The Company operates as one operating segment. The Company's chief operating decision maker ("CODM") is its co-chief executive officers, who review financial information presented on a consolidated basis. The CODM uses consolidated operating margin and net income to assess financial performance and allocate resources. These financial metrics are used by the CODM to make key operating decisions, such as the determination of the rate at which the Company seeks to grow global operating margin and the allocation of budget between cost of revenues, sales and marketing, technology and development, and general and administrative expenses.

The following table presents selected financial information with respect to the Company’s single operating segment for the years ended December 31, 2024, 2023 and 2022:

	Year Ended December 31,		
	2024	2023	2022
		(in thousands)	
Revenues	$ 39,000,966	$ 33,723,297	$ 31,615,550
Less:			
Content amortization	15,301,517	14,197,437	14,026,132
Other cost of revenues	5,736,947	5,517,931	5,142,153
Sales and marketing	2,917,554	2,657,883	2,530,502
Technology and development	2,925,295	2,675,758	2,711,041
General and administrative	1,702,039	1,720,285	1,572,891
Operating income	10,417,614	6,954,003	5,632,831
Operating margin	27 %	21 %	18 %
Other income (expense)			
Interest expense	(718,733)	(699,826)	(706,212)
Interest and other income (expense) (1)	266,776	(48,772)	337,310
Income before income taxes	9,965,657	6,205,405	5,263,929
Provision for income taxes	(1,254,026)	(797,415)	(772,005)
Net income	$ 8,711,631	$ 5,407,990	$ 4,491,924

(1) Includes interest income of $294 million, $281 million and $60 million for the years ended December 31, 2024, 2023 and 2022, respectively.

See the consolidated financial statements for other financial information regarding the Company’s operating segment.

Total U.S. revenues were $16.1 billion, $13.8 billion and $13.0 billion for the years ended December 31, 2024, 2023 and 2022, respectively. See Note 2 *Revenue Recognition* for additional information about streaming revenue by region.

The Company's long-lived tangible assets, as well as the Company's operating lease right-of-use assets recognized on the Consolidated Balance Sheets were located as follows:

	As of December 31,	
	2024	2023
	(in thousands)	
United States	$ 2,769,828	$ 2,724,710
International	926,238	843,633

Insider Trading Policy

In order to take an active role in the prevention of insider trading violations by executive officers, directors, employees and other related individuals of Netflix, Inc. (the "Company") and its subsidiaries, the Company has adopted this Insider Trading Policy (the "Policy").

Statement of Intent

The Company opposes the misuse of material nonpublic information in the trading of securities and it is the intent of this Policy to implement procedures designed to prevent trading based on material nonpublic information regarding the Company, including any of its subsidiaries. The Company also wishes to discourage certain trading in its securities by its executive officers, directors, employees and other related individuals that may be contrary to the interests of our shareholders. The term "executive officer" herein shall have the same meaning as the term "officer" as defined under Rule 16a-1(f) of the Securities Exchange Act of 1934, as amended (the "Exchange Act").

It is also Company policy to comply with applicable securities laws concerning trading in Company securities on the Company's behalf.

Definition of Material Nonpublic Information

It is not possible to define all categories of material information. However, information should be regarded as material if there is a substantial likelihood that it would be considered important to a reasonable investor in making an investment decision regarding transactions of the Company's securities. Put another way, there must be a substantial likelihood that the information would be viewed by the reasonable investor as having significantly altered the total mix of information available in the market concerning the Company. Either positive or negative information may be material.

Questions concerning whether nonpublic information is material can be directed to the Compliance Officer.

Covered Parties

The Policy covers executive officers, directors and all employees of, or consultants or contractors to, the Company or its subsidiaries, as well as their immediate family members who reside with them, anyone else who lives in their household, and any other individuals who do not live in their household but whose transactions in Company securities are directed by them or are subject to their influence or control (such as parents or children who consult with them before trading in Company securities) ("Insiders"). This Policy applies to trades of Company securities in which an Insider has any "beneficial" or other interest, or over which they exercise investment control.

Covered Transactions

This Policy applies to all transactions in the Company's securities, including common stock, options for common stock and any other securities the Company may issue from time to time, such as preferred stock, warrants and convertible debentures, as well as to derivative securities relating to the Company's securities, whether or not issued by the Company, such as publicly-traded options. Transactions subject to this Policy include purchases, sales and bona fide gifts of the Company's securities (which may include gifts to trusts for estate planning purposes, as well as donations to a charitable organization).

Prohibited Transactions

No Insider shall engage in any transaction involving the Company's securities, including any offer to purchase or offer to sell, during any period commencing with the date that the Insider possesses material nonpublic information concerning the Company or its subsidiaries, and ending at the beginning of the trading day following the date of public disclosure of that information, or at such time as such nonpublic information is no longer material.

No Insider shall disclose ("tip") material nonpublic information about the Company or its subsidiaries to any other person where such information may be used by such person to their profit by trading in the securities of companies to which such information relates, nor shall such Insider or related person make recommendations or express opinions on the basis of material nonpublic information as to trading in the Company's securities.

No Insider shall engage in any transaction involving another company's securities while in possession of material nonpublic information about such company when that information is obtained in the course of employment with, or the performance of services on behalf of, the Company and the other company is a business partner of the Company such as one with which the Company is discussing a proposed transaction, collaborator, customer, distributor, vendor or supplier.

Except for participation in the Company's stock option program, no executive officer or director shall, at any time, engage in any transactions involving any hedging or derivatives of Company securities, including trading in futures and derivative securities and engaging in hedging activities relating to our securities, including exchange traded options, puts, calls, collars, forward sale contracts, equity swaps, exchange funds or other arrangements or instruments designed to hedge or offset decreases in the market value of our securities, provided that it shall not be a violation of this Policy for an executive officer or director to engage in any such transaction initiated prior to March 4, 2020.

Except as may otherwise be authorized under this Policy, executive officers and directors shall not initiate any transactions subsequent to March 4, 2020 that involve pledging any Company securities as collateral for a loan or holding them as security in a margin account.

Problematic Transactions

While employees (other than executive officers, except as otherwise provided) are not prohibited by this Policy from using Company securities as collateral for loans or in margin accounts with respect to the Company's securities or engaging in transactions involving hedging or derivatives of Company securities, including by means of exchange traded options, puts, calls, collars, forward sale contracts, equity swaps, exchange funds or other arrangements or instruments designed to hedge or offset decreases in the market value of our securities, the Company discourages employees from such activity because, among other problems, these types of transactions may result in transactions in Company securities occurring outside the Open Window (defined below). Limit orders with brokers should not extend beyond any Open Window and be cancellable upon an imposition of a black-out period. Employees interested in trading outside of the Open Window should look into adopting a 10b5-1 trading plan, as described below. Exercising stock options issued pursuant to the Company's stock option plan, as otherwise permitted under this Policy, is not considered problematic.

The Company's Trading Window

The Company has determined that all executive officers, directors, and those other persons identified on Attachment 1 (as may be amended from time to time by the Compliance Officer), shall be prohibited from buying, selling or otherwise effecting transactions in any stock or other securities of the Company or derivative securities thereof EXCEPT during the following trading window:

Beginning at the open of market on the trading day following the date of public disclosure of the Company's financial results for a preceding calendar quarter or year and ending at the close of market on the 10th day of the second calendar month of the current calendar quarter (the "Open Window").

In addition, the Company, through the Compliance Officer, may authorize longer or additional trading windows in which buying, selling, gifting or otherwise effecting transactions in the Company's securities would be permitted pursuant to this Policy as if it were the "Open Window." Similarly, the Company, through the Compliance Officer, may impose special black-out periods during which certain persons will be prohibited from buying, selling or otherwise effecting transactions in the Company's securities, even though the trading window would otherwise be open. If a special black-out period is imposed, the Company will notify affected individuals, who should thereafter not engage in any transaction involving the Company's securities and should not disclose to others the fact of such suspension of trading.

It should be noted that even during the Open Window, any person possessing material nonpublic information should not engage in any transactions in the Company's securities until the beginning of the trading day following the date of public disclosure of such information, whether or not the Company has recommended a suspension of trading to that person.

Pre-Clearance of Trades and Other Transactions

All executive officers and directors of the Company and other persons designated by the Compliance Officer as being subject to pre-clearance requirements must refrain from trading in or gifting the Company's securities, even during the Open Window, without first contacting the Company's Compliance Officer and obtaining pre-clearance to commence trading in the Company's securities.

In addition, all executive officers and directors are required to comply with Section 16 of the Exchange Act and related rules and regulations, which set forth reporting obligations as well as limitations on "short swing" transactions. The Company is available to assist in filing Section 16 reporting; however, the obligation to comply with Section 16 is personal. Please direct any inquiries concerning compliance to the Compliance Officer. Executive officers and directors who wish to pledge the Company's stock as collateral after March 4, 2020 must first contact the Company's Compliance Officer to request an exemption and pre-clearance to enter into the transaction.

Adoption and Effect of 10b5-1 Trading Plans

The Company permits all directors, executive officers and employees to adopt trading plans in accordance with Rule 10b5-1(c) under the Exchange Act ("10b5-1 trading plans"). A 10b5-1 trading plan must comply with the requirements of Rule 10b5-1 and may only be adopted or amended in an Open Window and when the person adopting the plan is not otherwise in possession of material nonpublic information about the Company, its subsidiaries or its securities. All 10b5-1 trading plans must be pre-approved by the Compliance Officer or his delegate. The restrictions on trading set forth in this Policy shall not apply to trades made pursuant to a 10b5-1 trading plan. More information concerning trading plans is available from the Compliance Officer.

Exemptions from this Policy

The exercise of stock options under the Company's stock option plan with a cash payment of the exercise price is exempt from this Policy, since the other party to these transactions is the Company itself and the price does not vary with the market, but is fixed by the terms of the option agreement, or the Company withholding a portion of the shares underlying the options to satisfy exercise price or tax withholding requirements. This exemption does not apply to the sale of any shares issued upon such exercise and it does not apply to a cashless exercise of options, which is accomplished by a sale of a portion of the shares issued upon exercise of an option.

Post-Termination Transactions

If a person is in possession of material nonpublic information when their service terminates, that individual should not trade in Company securities until that information has become public or is no longer material.

Consequences for Violation

Directors and employees who violate this Policy shall also be subject to disciplinary action by the Company, which may include ineligibility for future participation in the Company's equity stock option and other incentive plans or termination of employment or service.

Pursuant to U.S. federal and state securities laws, Insiders may be subject to criminal and civil fines and penalties as well as imprisonment for engaging in transactions in the Company's securities at a time when they are in possession of material nonpublic information regarding the Company or its subsidiaries. In addition, Insiders may be liable for improper transactions by any person (commonly referred to as a "tippee") to whom they have disclosed material nonpublic information regarding the Company or its subsidiaries or to whom they have made recommendations or expressed opinions on the basis of such information as to trading in the Company's securities.

Individual Responsibility

Every executive officer, director and employee, consultant and contractor has the individual responsibility to comply with this Policy, and the applicable laws of their jurisdiction. An Insider may, from time to time, have to forego a proposed transaction in the Company's securities even if he or she planned to make the transaction before learning of the material nonpublic information and even though the Insider believes he or she may suffer an economic loss or forego anticipated profit by waiting. **Trading in the Company's securities during the trading window (including with pre-clearance) should not be considered a "safe harbor," and all directors, executive officers and other persons should use good judgment at all times.**

Compliance Officer

- The Company's Chief Legal Officer shall serve as the Insider Trading Compliance Officer (the "Compliance Officer"). The duties of the Compliance Officer shall include, but not be limited to, the following:
- Pre-clearing transactions as required under this Policy.
- Assisting, as requested, in the preparation and filing of Section 16 reports (Forms 3, 4 and 5) for Section 16 reporting persons.
- Serving as the designated recipient at the Company of copies of reports filed with the Securities and Exchange Commission by Section 16 reporting persons under Section 16 of the Exchange Act.
- Circulating the Policy (and/or a summary thereof) to all employees, including Section 16 reporting persons, on an annual basis.
- Assisting the Company in implementation of the Policy.
- Coordinating with Company counsel regarding compliance activities with respect to Rule 144 requirements and regarding changing requirements and recommendations for compliance with Section 16 of the Exchange Act and insider trading laws to ensure that the Policy is amended as necessary to comply with such requirements.

The duties may be delegated by the Compliance Officer to such other individuals as the Compliance Officer deems appropriate.

* * * * *

Attachment 1

Persons subject to trading window restrictions

Insiders, as defined in the Company’s Insider Trading Policy, except for the following:

- Employees, contractors and consultants who are employed or retained through a direct or indirect subsidiary of the Company that is specifically and solely engaged in the production of original content and not otherwise included as a matter of business practice in the distribution of corporate information about the Company and its financial performance, unless such person has been notified in writing by the Compliance Officer that the trading window applies to them.
- Employees of subsidiaries that are not integrated into the Company's email systems and/or who do not have access to consolidated financial data.

CERTIFICATION OF CO-CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Ted Sarandos, certify that:

1. I have reviewed this Annual Report on Form 10-K of Netflix, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
    a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
    b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
    c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
    d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
    a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
    b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

BlackRock, Inc.
(Exact name of registrant as specified in its charter)

Delaware	**99-1116001**
(State or Other Jurisdiction of Incorporation or Organization)	**(I.R.S. Employer Identification No.)**

50 Hudson Yards, New York, NY 10001
(Address of Principal Executive Offices)

(212) 810-5800
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, $.01 par value	**BLK**	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known, seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒	Accelerated filer ☐
Non-accelerated filer ☐	Smaller reporting company ☐
	Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting common stock held by nonaffiliates of the registrant as of June 30, 2024 was approximately $118 billion.

As of January 31, 2025, there were 155,253,443 shares of the registrant's common stock outstanding.

Portions of the definitive Proxy Statement of BlackRock, Inc. to be filed pursuant to Regulation 14A of the general rules and regulations under the Securities Exchange Act of 1934, as amended, for the 2025 annual meeting of stockholders ("Proxy Statement") are incorporated by reference into Part III of this Form 10-K.

BlackRock, Inc.
Table of Contents

PART I

Item 1. Business

OVERVIEW

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, “BlackRock” or the “Company”) is a leading publicly traded investment management firm with $11.6 trillion of assets under management (“AUM”) at December 31, 2024. With approximately 21,100 employees in more than 30 countries who serve clients in over 100 countries across the globe, BlackRock provides a broad range of investment management and technology services to institutional and retail clients worldwide. On October 1, 2024, BlackRock completed the acquisition of 100% of the issued and outstanding limited liability company interests of Global Infrastructure Management, LLC ("GIP" or the "GIP Transaction"). As a result of the closing of the GIP Transaction, BlackRock, Inc. (formerly known as BlackRock Funding, Inc. ("BlackRock Funding")) (“New BlackRock”) became the ultimate parent company of BlackRock Finance, Inc. (formerly known as BlackRock, Inc.) (“Old BlackRock”), GIP and their respective subsidiaries. See Note 1, *Business Overview* and Note 3, *Acquisitions,* in the notes to the consolidated financial statements contained in Part II, Item 8 for additional information.

BlackRock’s diverse platform of alpha-seeking active, private markets, index and cash management investment strategies across asset classes enables the Company to offer choice and tailor investment and asset allocation solutions for clients. Product offerings include single- and multi-asset portfolios investing in equities, fixed income, private markets, liquid alternatives and money market instruments. Products are offered directly and through intermediaries in a variety of vehicles, including open-end and closed-end mutual funds, iShares® exchange-traded funds (“ETFs”), separate accounts, collective trust funds and other pooled investment vehicles. BlackRock also offers technology services, including the investment and risk management technology platform, Aladdin®, Aladdin Wealth™, eFront®, and Cachematrix®, as well as advisory services and solutions to a broad base of institutional and wealth management clients. The Company is highly regulated and manages its clients’ assets as a fiduciary. The Company does not engage in proprietary trading activities that could conflict with the interests of its clients.

BlackRock serves a diverse mix of institutional and retail clients across the globe. Clients include tax-exempt institutions, such as defined benefit and defined contribution pension plans, charities, foundations and endowments; official institutions, such as central banks, sovereign wealth funds, supranationals and other government entities; taxable institutions, including insurance companies, financial institutions, corporations and third-party fund sponsors, and retail intermediaries.

BlackRock maintains a significant global sales and marketing presence that is focused on establishing and maintaining retail and institutional investment management and technology service relationships by marketing its services to investors directly and through third-party distribution relationships, including financial professionals and pension consultants.

BlackRock is an independent, publicly traded company, with no single majority shareholder and over 80% of its Board of Directors consisting of independent directors.

Management seeks to deliver value for stockholders over time by, among other things, capitalizing on BlackRock’s differentiated competitive position, including:

- the Company’s longstanding model of client choice, through which it offers a wide range of index, active, private markets, and whole portfolio solutions across broad markets, themes, regions, and investment styles;
- the Company's focus on strong investment performance, seeking the best risk-adjusted returns for client portfolios, within the mandates given by clients, to help them meet their investment objectives;
- the Company's research, data and analytics, which are at the center of BlackRock's investment approach and processes. They inform BlackRock's pursuit of the best risk-adjusted returns, and underpin product creation and innovation;
- the Company’s global reach and commitment to best practices around the world, with approximately 59% of employees outside the United States (“US”) serving clients locally and supporting local investment capabilities. Approximately 35% of total AUM is managed for clients domiciled outside the US;
- the Company’s differentiated client relationships and fiduciary focus, which enable effective positioning toward changing client needs and industry trends including the secular shift to ETFs; growing allocations to private markets, such as infrastructure and private credit; increasing demand for outsourcing and whole portfolio solutions using index, active and private markets products; anticipated re-allocations to fixed income; demand for high-performing active strategies; interest in sustainable investment strategies; and a continued focus on income and retirement; and
- the Company’s longstanding commitment to innovation, technology services and the continued development of, and increased interest in, BlackRock technology products and solutions, including Aladdin, Aladdin Wealth, eFront, and Cachematrix. This commitment is further extended by minority investments in financial technology and digital distribution providers, data and whole portfolio capabilities including Securitize, Upvest, Avaloq, Human Interest, Circle, Clarity AI, Envestnet, Acorns, Scalable Capital and iCapital.

BlackRock operates in a global marketplace impacted by changing market dynamics and economic uncertainty, factors that can significantly affect earnings and stockholder returns in any given period.

The Company’s ability to increase revenue, earnings and stockholder value over time is predicated on its ability to generate new business, including business in Aladdin and other technology products and services. New business efforts depend on BlackRock’s ability to achieve clients’ investment objectives, in a manner consistent with their risk preferences, to deliver excellent client service and to innovate in technology to serve clients’ evolving needs. All of these efforts require the commitment and contributions of BlackRock employees. Accordingly, the ability to attract, develop and retain qualified professionals is critical to the Company’s long-term success.

FINANCIAL HIGHLIGHTS

(in millions, except per share data) GAAP:	2024	2023	2022	2021	2020

Diluted earnings per common share	**$ 43.61**	$ 37.77	$ 35.36	$ 40.51	$ 34.57

(1) Net of net income (loss) attributable to noncontrolling interests (redeemable and nonredeemable).

(2) BlackRock reports its financial results in accordance with accounting principles generally accepted in the United States ("GAAP"); however, management believes evaluating the Company's ongoing operating results may be enhanced if investors have additional non-GAAP financial measures.

Beginning in the first quarter of 2022, BlackRock updated the definitions of operating income, as adjusted, operating margin, as adjusted, and net income attributable to BlackRock, Inc., as adjusted, to include new adjustments. Such measures have been recast for all prior periods to reflect the inclusion of such new adjustments. In addition, beginning in the first quarter of 2023, BlackRock updated the definitions of its non-GAAP financial measures to exclude the impact of market valuation changes on certain deferred cash compensation plans which the Company began economically hedging in 2023. For further information on non-GAAP financial measures and for as adjusted items for 2024 and 2023, see Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations — Non-GAAP Financial Measures*. For further information on non-GAAP financial measures and for as adjusted items for 2022, 2021 and 2020, see Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations — Non-GAAP Financial Measures*, of the Company's Annual Report on Form 10-K for the year ended December 31, 2022.

ASSETS UNDER MANAGEMENT

The Company's AUM by product type for the years 2020 through 2024 is presented below.

	December 31,					
(in millions)	2024	2023	2022	2021	2020	5-Year CAGR(1)

(1) Percentage represents compound annual growth rate ("CAGR") over a five-year period (December 31, 2019 – December 31, 2024).

Component changes in AUM by product type for the five years ended December 31, 2024 are presented below.

(in millions)	December 31, 2019	Net inflows (outflows)	Acquisitions(1)	Market change	FX impact	December 31, 2024
Equity	$ 3,820,329	$ 469,857	$ 45,398	$ 2,134,992	$ (160,385)	**$ 6,310,191**
Fixed income	2,315,392	944,834	—	(220,628)	(133,929)	**2,905,669**
Multi-asset	568,121	276,730	—	180,410	(32,340)	**992,921**
Alternatives	178,072	116,114	72,051	60,258	(4,688)	**421,807**
Long-term	**6,881,914**	**1,807,535**	**117,449**	**2,155,032**	**(331,342)**	**10,630,588**
Cash management	545,949	361,995	—	19,205	(6,486)	**920,663**
Advisory	1,770	(2,423)	—	636	17	**—**
Total	**$ 7,429,633**	**$ 2,167,107**	**$ 117,449**	**$ 2,174,873**	**$ (337,811)**	**$ 11,551,251**

(1) Amounts include the following: (a) net AUM from the acquisition of Aperio Group, LLC ("Aperio Transaction") in February 2021, (b) net AUM from the acquisition of Kreos Capital (the "Kreos Transaction") in August 2023, (c) net AUM from the acquisition of SpiderRock Advisors (the "SpiderRock Transaction") in May 2024 and (d) net AUM from the GIP Transaction in October 2024.

AUM represents the broad range of financial assets managed for clients on a discretionary basis pursuant to investment management and trust agreements that are expected to continue for at least 12 months. In general, reported AUM reflects the valuation methodology that corresponds to the basis used for determining revenue (for example, net asset value). Reported AUM does not include assets for which BlackRock provides risk management or other forms of nondiscretionary advice, or assets that the Company is retained to manage on a short-term, temporary basis.

Investment management fees are typically earned as a percentage of AUM. BlackRock also earns performance fees on certain portfolios relative to an agreed-upon benchmark or return hurdle. On some products, the Company also may earn securities lending revenue. In addition, BlackRock offers its proprietary Aladdin investment system as well as risk management, outsourcing, advisory and other technology services, to institutional investors and wealth management intermediaries. Revenue for these services may be based on several criteria including value of positions, number of users, implementation go-lives and software solution delivery and support.

At December 31, 2024, total AUM was $11.6 trillion, representing a CAGR of 9% over the last five years. AUM growth during the period was achieved through the combination of net market valuation gains, net inflows and acquisitions, including the net AUM impact from the Aperio Transaction, which added $41 billion of AUM in February 2021, the Kreos Transaction, which added $2 billion of AUM in August 2023, the SpiderRock Transaction, which added $4 billion of AUM in May 2024, and the GIP Transaction, which added $70 billion of AUM in October 2024. BlackRock's AUM mix encompasses a broadly diversified product range, as described below.

The Company considers the categorization of its AUM by client type, product type, investment style, and client region useful to understanding its business. The following discussion of the Company's AUM will be organized as follows:

Client Type	Product Type	Investment Style	Client Region
• Retail	• Equity	• Active	• Americas
• ETFs	• Fixed Income	• Index and ETFs	• Europe, the Middle East and Africa ("EMEA")
• Institutional	• Multi-asset		• Asia-Pacific
	• Alternatives		
	• Cash Management		

CLIENT TYPE

BlackRock serves a diverse mix of institutional and retail clients across the globe, with a regionally focused business model. BlackRock leverages the benefits of scale across global investment, risk and technology platforms while at the same time using local distribution presence to deliver solutions for clients. Furthermore, the Company's structure facilitates strong teamwork globally across both functions and regions in order to enhance BlackRock's ability to leverage best practices to serve our clients and continue to develop our talent.

Clients include tax-exempt institutions, such as defined benefit and defined contribution pension plans, charities, foundations and endowments; official institutions, such as central banks, sovereign wealth funds, supranationals and other government entities; taxable institutions, including insurance companies, financial institutions, corporations and third-party fund sponsors, and retail intermediaries.

ETFs are a growing component of both institutional and retail client portfolios. However, as ETFs are traded on exchanges, complete transparency on the ultimate end-investor is unavailable. Therefore, ETFs are presented as a separate client type below, with investments in ETFs by institutions and retail clients excluded from figures and discussions in their respective sections.

AUM by investment style and client type at December 31, 2024 is presented below.

(in millions)	Retail	ETFs	Institutional	Total
Active	$ 733,907	$ —	$ 2,136,749	$ 2,870,656
Non-ETF index	281,920	—	3,247,637	3,529,557
ETFs	—	4,230,375	—	4,230,375
Long-term	**1,015,827**	**4,230,375**	**5,384,386**	**10,630,588**
Cash management	12,247	—	908,416	920,663
Total	**$ 1,028,074**	**$ 4,230,375**	**$ 6,292,802**	**$ 11,551,251**

Retail

BlackRock serves retail investors globally through a wide array of products across the investment spectrum, including separate accounts, open-end and closed-end funds, unit trusts and private investment funds. Retail investors are served principally through intermediaries, including broker-dealers, banks, trust companies, insurance companies and independent financial advisors. Technology solutions, digital distribution tools and a shift toward portfolio construction are increasing the number of financial advisors and end-retail investors using BlackRock products.

Retail represented 10% of long-term AUM at December 31, 2024 and 28% of long-term investment advisory and administration fees (collectively "base fees") and securities lending revenue for 2024.

ETFs have a significant retail component but are shown separately below. With the exclusion of ETFs, the majority of retail AUM is comprised of active mutual funds. In the aggregate, active and index mutual funds totaled $738 billion, or approximately 75%, of retail long-term AUM at year-end, with the remainder invested in private investment funds and separately managed accounts. Approximately 70% of retail long-term AUM is invested in active products.

Component changes in retail long-term AUM for 2024 are presented below.

(in millions)	December 31, 2023	Net inflows (outflows)	Acquisitions(1)	Market change	FX impact	December 31, 2024
Equity	$ 435,734	$ 15,285	$ 4,074	$ 54,257	$ (4,232)	**$ 505,118**
Fixed income	312,799	11,671	—	1,483	(7,312)	**318,641**
Multi-asset	139,537	(2,328)	—	14,420	(651)	**150,978**
Alternatives	41,627	(261)	—	69	(345)	**41,090**
Total	**$ 929,697**	**$ 24,367**	**$ 4,074**	**$ 70,229**	**$ (12,540)**	**$ 1,015,827**

(1) Amounts include AUM attributable to the SpiderRock Transaction.

The retail client base is diversified geographically, with 70% of long-term AUM managed for investors based in the Americas, 25% in EMEA and 5% in Asia-Pacific at year-end 2024.

- *US retail* long-term net inflows of $19 billion were driven by $9 billion of net inflows into both fixed income and equity. Fixed income net inflows were primarily into active mutual funds, while equity net inflows reflected demand for Aperio, BlackRock's customized index equity solution.
- *International retail* long-term net inflows of $6 billion reflected equity and fixed income net inflows of $6 billion and $2 billion, respectively. Equity net inflows were driven by wealth outsourcing solutions, and fixed income inflows were led by active mutual funds.

ETFs

BlackRock is the leading ETF provider in the world with $4.2 trillion of iShares ETF AUM as of December 31, 2024. BlackRock generated ETF net inflows of $390 billion in 2024. The Company offers both index-tracking ETFs, which seek to replicate the performance of a specific index, and active ETFs. Active ETFs are managed by professional portfolio managers who actively select and adjust the fund's holdings in an effort to outperform the market, deliver a specific outcome or gain exposure to hard-to-index markets.

Equity ETF net inflows of $236 billion were driven by flows into core ETFs, as well as continued client use of BlackRock's broad-based precision exposure ETFs to express risk preferences and make tactical allocation changes. Fixed income ETF net inflows of $112 billion were diversified across exposures, led by flows into treasury, core and corporate credit ETFs. Alternative ETFs had net inflows of $41 billion, driven by the launch of cryptocurrency exchange-traded products ("ETPs") in the year.

ETFs represented 40% of long-term AUM at December 31, 2024 and 45% of long-term base fees and securities lending revenue for 2024.

Component changes in ETFs AUM for 2024 are presented below.

(in millions)	December 31, 2023	Net inflows (outflows)	Market change	FX impact	December 31, 2024
Equity	$ 2,532,631	$ 236,357	$ 359,322	$ (21,912)	**$ 3,106,398**
Fixed income	898,403	112,341	(16,291)	(8,801)	**985,652**
Multi-asset	9,140	1,025	841	(272)	**10,734**
Alternatives(1)	59,125	40,710	27,919	(163)	**127,591**
Total	**$ 3,499,299**	**$ 390,433**	**$ 371,791**	**$ (31,148)**	**$ 4,230,375**

(1) Amounts include cryptocurrency and commodity ETFs and ETPs.

BlackRock's ETF product range offers investors a precise, transparent and efficient way to gain exposure to a full range of asset classes and global markets that have been difficult for many investors to access, as well as the liquidity required to make adjustments to their exposures quickly and cost-efficiently.

- *US ETF** AUM ended 2024 at $3.1 trillion with $280 billion of net inflows, led by net inflows into core equity, fixed income, cryptocurrency and other precision exposure ETFs.
- *International ETF** AUM ended 2024 at $1.1 trillion with $110 billion of net inflows, diversified across product categories, and led by net inflows into core equity, fixed income and precision exposure ETFs.

* Regional ETF amounts based on jurisdiction of product, not underlying client.

Institutional

BlackRock serves institutional investors on six continents in sub-categories including: pensions, endowments and foundations, official institutions, and financial institutions; institutional AUM is diversified across product and region.

Component changes in institutional long-term AUM for 2024 are presented below.

(in millions)	December 31, 2023	Net inflows (outflows)	Acquisition(1)	Market change	FX impact	December 31, 2024

(1) Amounts include AUM attributable to the GIP Transaction.

Institutional active AUM ended 2024 at $2.1 trillion, reflecting $64 billion of net inflows, driven by the funding of several significant outsourcing mandates and continued growth in BlackRock's *LifePath®* target-date and private markets platforms.

Multi-asset net inflows of $55 billion reflected continued growth from significant pension outsourcing mandates and *LifePath* target-date offerings. Fixed income net outflows of $3 billion were impacted by an approximately $20 billion active fixed income redemption in the second quarter from a large insurance client linked to M&A activity. Equity net inflows of $5 billion were primarily into quantitative equity strategies.

Alternatives net inflows of $7 billion were led by infrastructure, private credit and private equity. Excluding return of capital and investment of $13 billion, alternatives net inflows were $20 billion. At year-end, BlackRock had approximately $45 billion of non-fee paying, unfunded, uninvested commitments to deploy for institutional clients, which is not included in AUM.

Institutional active represented 20% of long-term AUM and 21% of long-term base fees and securities lending revenue for 2024.

Institutional index AUM totaled $3.2 trillion at December 31, 2024, reflecting $9 billion of net inflows, driven by fixed income.

Institutional index represented 30% of long-term AUM and 6% of long-term base fees and securities lending revenue for 2024.

The Company’s institutional clients consist of the following:

- Pensions, Foundations and Endowments BlackRock is among the world’s largest managers of pension plan assets with $3.4 trillion, or 63%, of long-term institutional AUM managed for defined benefit, defined contribution and other pension plans for corporations, governments and unions at December 31, 2024. The market landscape continues to shift from defined benefit to defined contribution, and BlackRock's defined contribution channel represented $1.7 trillion of total pension AUM. BlackRock remains well positioned for the ongoing evolution of the defined contribution market and demand for outcome-oriented investments. An additional $90 billion, or 2%, of long-term institutional AUM was managed for other tax-exempt investors, including charities, foundations and endowments.
- Official Institutions BlackRock managed $294 billion, or 5%, of long-term institutional AUM for official institutions, including central banks, sovereign wealth funds, supranationals, multilateral entities and government ministries and agencies at year-end 2024.
- Financial and Other Institutions BlackRock is a top independent manager of assets for insurance companies, which accounted for $695 billion, or 13%, of long-term institutional AUM at year-end 2024. Assets managed for other taxable institutions, including corporations, banks and third-party fund sponsors for which the Company provides sub-advisory services, totaled $890 billion, or 17%, of long-term institutional AUM at year-end.

CLIENT TYPE AND PRODUCT TYPE

Component changes in AUM by client type and product type for 2024 are presented below.

(1) Amounts include AUM attributable to the GIP Transaction and the SpiderRock Transaction.

Long-term product offerings include active and index strategies. BlackRock's active strategies seek to earn attractive returns in excess of a market benchmark or performance hurdle while maintaining an appropriate risk profile and leverage fundamental research and quantitative models to drive portfolio construction. In contrast, index strategies seek to closely track the returns of a corresponding index, generally by investing in substantially the same underlying securities within the index or in a subset of those securities selected to approximate a similar risk and return profile of the index. Index products include both BlackRock's non-ETF index products and iShares ETFs.

Although many clients use both active and index strategies, the application of these strategies may differ. For example, clients may use index products to gain exposure to a market or asset class or may use a combination of index strategies to target active returns. In addition, institutional non-ETF index assignments tend to be very large (multi-billion dollars) and typically reflect low fee rates. Net flows in institutional index products generally have a small impact on BlackRock’s revenues and earnings.

Equity

Year-end 2024 equity AUM totaled $6.3 trillion, reflecting net inflows of $226 billion. Net inflows included ETF net inflows of $236 billion, partially offset by net outflows of $6 billion and $4 billion from active and non-ETF index, respectively.

BlackRock’s effective fee rates fluctuate due to changes in AUM mix. Approximately half of BlackRock’s equity AUM is tied to international market strategies, including emerging markets, which tend to have higher fee rates than US equity strategies. Accordingly, fluctuations in international equity markets, which may not consistently move in tandem with US markets, have a greater impact on BlackRock’s equity revenues and effective fee rate.

Equity represented 60% of long-term AUM and 54% of long-term base fees and securities lending revenue for 2024.

Fixed Income

Fixed income AUM ended 2024 at $2.9 trillion, reflecting net inflows of $164 billion. Net inflows included $112 billion, $42 billion and $9 billion into ETFs, non-ETF index and active, respectively. Fixed income ETF net inflows of $112 billion reflected the benefit of BlackRock's diverse product offering and included strong flows into treasury, core and corporate credit ETFs.

Fixed income represented 27% of long-term AUM and 25% of long-term base fees and securities lending revenue for 2024.

Multi-Asset

BlackRock manages a variety of multi-asset funds and bespoke mandates for a diversified client base that leverages the Company's broad investment expertise in global equities, bonds, and private markets, and the Company's extensive risk management capabilities. Investment solutions may include a combination of long-only portfolios and private markets investments as well as tactical asset allocation overlays.

Multi-asset represented 9% of long-term AUM and 8% of long-term base fees and securities lending revenue for 2024.

Component changes in multi-asset AUM for 2024 are presented below.

(in millions)	December 31, 2023	Net inflows (outflows)	Market change	FX impact	December 31, 2024
Target date/risk	$ 489,136	$ 30,388	$ 66,679	$ (4,661)	$ 581,542
Asset allocation and balanced	246,127	21,494	16,428	(6,920)	277,129
Fiduciary	135,541	(204)	5,156	(6,243)	134,250
Total	**$ 870,804**	**$ 51,678**	**$ 88,263**	**$ (17,824)**	**$ 992,921**

Multi-asset net inflows reflected ongoing institutional demand for BlackRock's solutions-based advice with $53 billion of net inflows coming from institutional clients, including the funding of several significant outsourcing mandates. Defined contribution plans remained a significant driver of flows and contributed $24 billion to institutional multi-asset net inflows in 2024, primarily into target date and target risk product offerings.

The Company’s multi-asset strategies include the following:

- *Target date and target risk strategies* generated net inflows of $30 billion. Institutional investors represented 90% of target date and target risk AUM, with defined contribution plans representing 81% of AUM. Flows were driven by defined contribution investments across BlackRock's *LifePath* franchise, including BlackRock's *LifePath Paycheck* offering launched in 2024. *LifePath* products utilize a proprietary active asset allocation model that seeks to balance risk and return over an investment horizon based on the investor’s expected retirement timing. Underlying investments are primarily index products.
- *Asset allocation and balanced strategies* generated $21 billion of net inflows. These strategies combine equity, fixed income and private markets components for investors seeking a tailored solution relative to a specific benchmark and within a risk budget. In certain cases, these strategies seek to minimize downside risk through diversification, derivatives strategies and tactical asset allocation decisions. Flows in this category included pension outsourcing mandates that funded during the year. Flagship products also include BlackRock's Global Allocation and Multi-Asset Income fund families.
- *Fiduciary management services* are complex mandates in which pension plan sponsors or endowments and foundations retain BlackRock to assume responsibility for some or all aspects of investment management, often with BlackRock acting as outsourced chief investment officer. These customized services require strong partnership with the clients’ investment staff and trustees in order to tailor investment strategies to meet client-specific risk budgets and return objectives.

Alternatives

BlackRock alternatives focus on sourcing and managing high-alpha investments with lower correlation to public markets and developing a holistic approach to address client needs in alternatives investing. The Company's alternatives products fall into three main categories — (1) private markets, (2) liquid alternatives, and (3) currency (including cryptocurrency) and commodities. Private markets include offerings in infrastructure, private credit, private equity, real estate and multi-alternative solutions. Liquid alternatives include offerings in direct hedge funds and hedge fund solutions (funds of funds).

In 2024, private markets generated $9 billion of net inflows, or $22 billion excluding return of capital / return on investment of $13 billion. The largest contributors to return of capital / return on investment were private equity, private credit and infrastructure. Net inflows were driven by infrastructure, private credit and private equity. At year-end, BlackRock had approximately $45 billion of non-fee paying, unfunded, uninvested commitments, which are expected to be deployed in future years; these commitments are not included in AUM or flows until they are fee-paying. Liquid alternatives saw net outflows of $3 billion driven by hedge fund solutions. Currency and commodities saw $41 billion of net inflows, primarily into cryptocurrency ETPs.

Private markets continue to see increasing allocations from institutional and wealth investors, and BlackRock’s highly diversified franchise is well positioned to continue to meet growing demand. The closing of the GIP transaction added $116 billion of client AUM and $70 billion of fee-paying AUM in October. In addition to GIP, the Company’s planned acquisitions of Preqin and HPS Investment Partners ("HPS"), each position its platform ahead of evolving client needs and structural industry trends. The private markets capabilities the Company expects to add through these transactions will allow it to serve clients even more comprehensively and position the Company to raise significant private capital.

Alternatives represented 4% of long-term AUM and 13% of long-term base fees and securities lending revenue for 2024.

Component changes in alternatives AUM for 2024 are presented in the table below.

(in millions)	December 31, 2023	Net inflows (outflows)	Acquisition[1]	Market change	FX impact	December 31, 2024	Memo: return of capital/ investment[2]	Memo: committed capital[3]

(1) Amounts include AUM attributable to the GIP Transaction.
(2) Return of capital/investment is included in outflows.
(3) Amount represents client assets that are uninvested commitments, which are currently non-fee paying and are not included in AUM. These commitments are expected to generate fees and will be counted in AUM and flows as the capital is deployed over time.
(4) Amounts include cryptocurrency and commodity ETFs and ETPs.

Private Markets

The Company's private markets strategies include the following:

- Infrastructure includes offerings across equity, debt and solutions, which totaled $110 billion in AUM. Net inflows were $6 billion, or $9 billion excluding return of capital / return on investment. In 2024, the GIP transaction added $70 billion to AUM.
- Private Equity AUM of $36 billion included AUM of $28 billion in private equity solutions, and $8 billion in a direct private equity strategy. Private equity net inflows were $1 billion, or $6 billion excluding return of capital / return on investment.
- Private Credit primarily represents direct lending, opportunistic and venture debt strategies, with AUM of $32 billion at December 31, 2024. Net inflows were $3 billion, or $6 billion excluding return of capital / return on investment. Private credit does not include private credit assets included in infrastructure and real estate debt, as well as assets in private placements and multi-strategy credit funds, which are reported within fixed income and multi-asset.
- Real Estate had $26 billion in AUM at December 31, 2024.
- Multi-Alternatives represents highly customized portfolios of alternative investments, with $7 billion in AUM at December 31, 2024.

Liquid Alternatives

The Company's liquid alternatives products' net outflows of $3 billion reflected redemptions from hedge fund solutions. Direct hedge fund strategies includes a variety of single- and multi-strategy offerings.

In addition, the Company manages $90 billion in liquid credit strategies which is included in active fixed income.

Currency and Commodities

The Company's currency and commodities products include a range of active and index products, including cryptocurrency ETPs.

Currency and commodities products had $41 billion of net inflows, primarily from ETPs. Cryptocurrency and commodities ETPs represented $55 billion and $73 billion of AUM, respectively, and are not eligible for performance fees.

Cash Management

Cash management AUM totaled a record $921 billion at December 31, 2024, reflecting $153 billion of net inflows. Cash management products include taxable and tax-exempt money market funds, short-term investment funds and customized separate accounts. Portfolios are denominated in US dollars, Canadian dollars, Australian dollars, euros, Swiss francs, New Zealand dollars or British pounds.

CLIENT REGION

BlackRock's footprints in the Americas, EMEA and Asia-Pacific regions reflect strong relationships with intermediaries and an established ability to deliver the Company's global investment expertise in funds and other products tailored to local regulations and requirements.

AUM by product type and client region at December 31, 2024 is presented below.

(in millions)	Americas	EMEA	Asia-Pacific	Total
Equity	$ 4,377,383	$ 1,490,961	$ 441,847	$ 6,310,191
Fixed income	1,835,652	756,127	313,890	2,905,669

Cash management	645,638	259,850	15,175	920,663
Total	**$ 7,861,846**	**$ 2,819,058**	**$ 870,347**	**$ 11,551,251**

Component changes in AUM by client region for 2024 are presented below.

(in millions)	December 31, 2023	Net inflows (outflows)	Acquisition[1]	Market change	FX impact	December 31, 2024
Americas	$ 6,728,310	$ 406,091	$ 71,308	$ 685,291	$ (29,154)	**$ 7,861,846**
EMEA	2,478,810	207,459	112	203,851	(71,174)	**2,819,058**
Asia-Pacific	801,875	27,801	2,529	103,822	(65,680)	**870,347**
Total	**$ 10,008,995**	**$ 641,351**	**$ 73,949**	**$ 992,964**	**$ (166,008)**	**$ 11,551,251**

(1) Amounts include AUM attributable to the GIP Transaction and the SpiderRock Transaction.

Americas

Americas net inflows of $406 billion were driven by net inflows into equity, fixed income, cash, multi-asset, and cryptocurrency products of $139 billion, $108 billion, $90 billion, $23 billion, and $41 billion, respectively. During the year, BlackRock served clients through offices across the US as well as in Mexico, Canada, Brazil, Colombia, Chile, the Dominican Republic, and Peru.

The Americas represented 68% of total AUM and 65% of total base fees and securities lending revenue for 2024.

EMEA

EMEA net inflows of $207 billion were driven by equity, cash, fixed income, and multi-asset net inflows of $102 billion, $59 billion, $37 billion, and $9 billion, respectively, while alternatives added modest inflows. Offerings include fund families in the United Kingdom ("UK"), the Netherlands, Luxembourg and Dublin and ETFs listed on stock exchanges throughout Europe, as well as separate accounts and pooled investment products.

EMEA represented 24% of total AUM and 29% of total base fees and securities lending revenue for 2024.

Asia-Pacific

Asia-Pacific net inflows of $28 billion were driven by fixed income and multi-asset net inflows of $20 billion and $19 billion, respectively. These were partially offset by equity net outflows of $16 billion. Clients in the Asia-Pacific region are served through offices in India, Singapore, Hong Kong, Japan, Australia, China, Taiwan, Korea and New Zealand.

Asia-Pacific represented 8% of total AUM and 6% of total base fees and securities lending revenue for 2024.

INVESTMENT PERFORMANCE

Investment performance across active and index products as of December 31, 2024 was as follows:

	One-year period	Three-year period	Five-year period
Fixed income:			
Actively managed AUM above benchmark or peer median			
Taxable	69%	79%	82%
Tax-exempt	69%	42%	45%
Index AUM within or above applicable tolerance	97%	99%	98%
Equity:			
Actively managed AUM above benchmark or peer median			
Fundamental	47%	44%	64%
Systematic	93%	89%	93%
Index AUM within or above applicable tolerance	94%	99%	100%

Performance Notes

Past performance is not indicative of future results. Except as specified, the performance information shown is as of December 31, 2024 and is based on preliminary data available at that time. The performance data shown reflects information for all actively and passively managed equity and fixed income accounts, including US registered investment companies, European-domiciled retail funds and separate accounts for which performance data is available, including performance data for high net worth accounts available as of November 30, 2024. The performance data does not include accounts terminated prior to December 31, 2024 and accounts for which data has not yet been verified. If such accounts had been included, the performance data provided may have substantially differed from that shown.

Performance comparisons shown are gross-of-fees for institutional and high net worth separate accounts, and net-of-fees for retail funds. The performance tracking shown for index accounts is based on gross-of-fees performance and includes all institutional accounts and all iShares funds globally using an index strategy. AUM information is based on AUM available as of December 31, 2024 for each account or fund in the asset class shown without adjustment for overlapping management of the same account or fund. Fund performance reflects the reinvestment of dividends and distributions.

Performance shown is derived from applicable benchmarks or peer median information, as selected by BlackRock. Peer medians are based in part on data either from Lipper, Inc. or Morningstar, Inc. for each included product.

TECHNOLOGY SERVICES

BlackRock offers investment management technology systems, risk management services, and wealth management and digital distribution tools on a fee basis. Aladdin is the Company's proprietary technology platform, providing an end-to-end, SaaS solution for investment and risk management for both BlackRock and a growing number of institutional and retail investors around the world. BlackRock offers risk reporting capabilities via Aladdin Risk, as well as investment accounting capabilities. Aladdin Provider is a tool used by asset servicers, connecting them to the platform used by asset managers and owners to add operational efficiency. In 2019, BlackRock acquired eFront, a leading end-to-end alternative investment management software and solutions provider to enable clients to manage portfolios and risk across public and private asset classes on a single platform. eFront is offered to clients both as a standalone offering and as part of an integrated “Whole Portfolio” solution that provides transparency across clients’ public and private assets. Through the Company's Cachematrix platform, BlackRock is also a leading provider of financial technology which simplifies the cash management process for banks and their corporate clients in a streamlined, open-architecture platform.

BlackRock offers a number of wealth management technology tools offering personalized digital advice, portfolio construction capabilities and risk analytics for retail distributors. These tools include Aladdin Wealth, which provides wealth management firms and their financial professionals with institutional-quality business management, portfolio construction, modeling and risk analytics capabilities.

At year-end, BlackRock technology services clients included banks, insurance companies, official institutions, pension funds, asset managers, asset servicers, retail distributors and other investors across North America, South America, Europe, the Middle East, Asia, Africa and Australia.

Technology services revenue of $1.6 billion was up 8% year-over-year, and annual contract value (“ACV”) increased 12% year-over-year. ACV growth was driven by strong net sales of Aladdin in 2024, with over half of new client mandates spanning multiple Aladdin products. Aladdin assignments are typically long-term contracts that provide recurring revenue. At the end of any period, BlackRock generally has recurring revenue contracts in place for a large portion of total annual revenue. BlackRock measures the fees related to these agreements and refers to this as ACV. For further information on ACV, see Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations — Non-GAAP Financial Measures*.

Aladdin, which represented the majority of technology services revenue for the year, continues to benefit from trends favoring global platform and multi-asset risk solutions across public and private markets. Approximately 25% of Aladdin’s revenue was denominated in non-US currencies. In addition, while Aladdin is a multi-asset system, the majority of positions managed on the platform are fixed income. Revenue growth in 2024 reflected the successful onboarding of a number of new clients and expanding relationships with existing clients. 2024 revenue growth also reflects the prior year revenue impact of several clients’ renewals of eFront “on-premises” licenses.

BlackRock is focused on enhancing Aladdin, with continued investment into areas such as whole portfolio, private markets, wealth and sustainable investing solutions. BlackRock continues to evolve and enable clients to further simplify their operating infrastructure with Aladdin. Clients increasingly want to tailor how they use Aladdin to meet their specific needs, and BlackRock is providing them with choice and flexibility. BlackRock is empowering clients with data and opening Aladdin by creating connectivity with ecosystem providers and third-party technology solutions, which include asset servicers, cloud providers, digital asset platforms, trading systems and others. This connectivity helps clients work in their Aladdin environments with a more customized and seamless end-to-end experience.

In addition, BlackRock has made minority investments in financial technology and digital distribution providers, data and whole portfolio capabilities including Securitize, Upvest, Avaloq, Human Interest, Circle, Clarity AI, Envestnet, Acorns, Scalable Capital and iCapital. BlackRock records its share of income related to certain minority investments accounted for under the equity method within nonoperating income (expense) beginning in the first quarter of 2024 and within other revenue in 2023. In addition, BlackRock records gains and losses related to changes in value of other minority investments in nonoperating income (expense).

In June 2024, BlackRock announced that it had entered into a definitive agreement to acquire Preqin, a leading independent provider of private markets data, for £2.55 billion (or approximately $3.2 billion based on the GBP/USD foreign exchange rate at December 31, 2024) in cash. The Company believes bringing together Preqin's data and research tools with the complementary workflows of Aladdin and eFront in a unified platform will create a preeminent private markets technology and data provider. The Preqin Transaction is anticipated to close in the first quarter of 2025, subject to customary closing conditions.

SECURITIES LENDING

Securities lending is managed by a dedicated team, supported by quantitative analysis, proprietary technology and disciplined risk management. BlackRock receives both cash (primarily for US domiciled portfolios) and noncash collateral under securities lending arrangements. The cash management team invests the cash received as collateral for securities on loan in other portfolios. Fees for securities lending for US domiciled portfolios can be structured as a share of earnings, or as a management fee based on a percentage of the value of the cash collateral or both. The value of the securities on loan and the revenue earned are captured in the corresponding asset class being managed. The value of the collateral is not included in AUM.

Outstanding loan balances ended the year at approximately $412 billion, up from $359 billion at year-end 2023. More demand for general collateral securities resulted in higher balances year-over-year. Intrinsic lending spreads decreased, and cash reinvestment spreads increased year-over-year.

BlackRock employs a conservative investment style for cash and securities lending collateral that emphasizes quality, liquidity, and interest rate risk management. Disciplined risk management, including a rigorous credit surveillance process, is an integral part of the investment process. BlackRock’s Cash Management Credit Committee has established risk limits, such as aggregate issuer exposure limits and maturity limits, across many of the products BlackRock manages, including over all of its cash management products. In the ordinary course of BlackRock's business, there may be instances when a portfolio may exceed an internal risk limit or when an internal risk limit may be changed. No such instances, individually or in the aggregate, have been material to the Company. To the extent that daily evaluation and reporting of the profile of the portfolios identify that a limit has been exceeded, the relevant portfolio will be adjusted. To the extent a portfolio manager would like to obtain a temporary waiver of a risk limit, the portfolio manager must obtain approval from the credit research team, which is independent from the cash management portfolio managers. While a risk limit may be waived temporarily, such waivers are infrequent.

RISK AND QUANTITATIVE ANALYSIS

Across all asset classes, in addition to the efforts of the portfolio management teams, the Risk and Quantitative Analysis ("RQA") group at BlackRock draws on extensive analytical systems and proprietary and third-party data to identify, measure and manage a wide range of risks. RQA provides risk management advice and independent risk oversight of the investment management processes, identifies and helps manage counterparty and enterprise risks, coordinates standards for firm wide investment performance measurement and determines risk management-related analytical and information requirements. Where appropriate, RQA will work with portfolio managers and developers to facilitate the development or improvement of risk models and analytics.

COMPETITION

BlackRock competes with investment management firms, mutual fund complexes, insurance companies, banks, brokerage firms, financial technology providers and other financial institutions that offer products that are similar to, or alternatives to, those offered by BlackRock. In order to grow its business, BlackRock must be able to compete effectively for AUM. Key competitive factors include investment performance track records, the efficient delivery of beta for index products, investment style and discipline, price, client service and brand name recognition. Historically, the Company has competed principally on the basis of its long-term investment performance track record, its investment process, its risk management and analytic capabilities and the quality of its client service.

HUMAN CAPITAL

With approximately 21,100 employees in more than 30 countries as of December 31, 2024, BlackRock provides a broad range of investment management and technology services to institutional and retail clients in more than 100 countries across the globe. As an asset manager, BlackRock's long-term success depends on its people and how it manages its workforce.

Culture and Principles

BlackRock believes that maintaining a strong corporate culture is an important component of its human capital management practices and critical to the firm's long-term success. BlackRock's culture is underpinned by five core principles that unify its workforce and guide how it interacts with its employees, its clients, the communities in which it operates and its other stakeholders: (1) We are a fiduciary to our clients; (2) We are One BlackRock (1BLK); (3) We are passionate about performance; (4) We take emotional ownership; and (5) We are committed to a better future.

Connectivity and Inclusivity

BlackRock's approach to building a connected and inclusive culture is aligned with the firm's business priorities and long-term objectives. Delivering for the firm's clients requires attracting the best people from across the world. BlackRock is committed to creating an environment that supports top talent and fosters diverse perspectives to avoid groupthink. Creating a connected and inclusive culture where people with new ideas and fresh perspectives can thrive is core to our 1BLK principle. These values have been fundamental to BlackRock since its founding 37 years ago.

In 2024, BlackRock continued to focus on (1) supporting its talent and culture across the globe, (2) expanding investment choices and business partnership opportunities for interested clients, and (3) helping more and more people experience financial wellbeing through BlackRock philanthropy and employee-led volunteer efforts. Last year also marked the start of a significant period at BlackRock as the firm prepared to welcome thousands of new colleagues through acquisitions. These employees will play a crucial role in driving the firm's success forward, and a connected and inclusive culture is imperative to enabling that objective.

Since 2020, BlackRock has published annual SASB-aligned disclosure and EEO-1 reports, which provide information about the firm's workforce, including workforce composition. Of the Company's approximately 21,100 employees as of December 31, 2024, 43% were based in the Americas, 31% were based in EMEA, and 26% were based in the Asia-Pacific region.

Board Oversight of Human Capital Management

BlackRock's Board of Directors (the "Board") plays an important role in the oversight of human capital management and devotes one Board meeting annually to an in-depth review of BlackRock's culture, talent development, retention and recruiting initiatives, human capital management strategy, leadership and succession planning and employee feedback. Moreover, the Board's Management Development and Compensation Committee periodically reviews efforts and developments related to the firm's human capital management strategy.

Succession planning for BlackRock's Chief Executive Officer and other senior executives is a key part of the Board's annual review of human capital management issues. As part of this review, the Board focuses on whether BlackRock has the right people in place to execute the Company's long-term strategic plans, and on BlackRock's ability to identify, attract, develop, promote and retain future senior executives. An important element of the succession planning across the organization is a commitment to building leadership from within.

Employee Engagement

BlackRock values continuous dialogue with its employees to better understand their experiences at the firm and assess the efficacy of its human capital management practices. The Company uses several employee engagement mechanisms, including: (1) global employee opinion surveys; (2) interactive events and communications; (3) the sponsorship of employee networks; and (4) local community involvement. The employee opinion pulse surveys, which BlackRock conducts throughout the year, provide the Company with actionable feedback for its teams and for the Company as a whole. Additionally, BlackRock uses ongoing lifecycle surveys to collect feedback at various points along the employee journey. BlackRock works to keep employees informed and engaged through a regular cadence of communications and events, including newsletters, global and local townhalls and messages from leaders with timely business and organizational updates and culture-building opportunities.

BlackRock believes that employees value opportunities to give back to their communities. Through local, employee-led BlackRock Gives committees, the Company supports nonprofit organizations nominated by employees in the communities where it operates. In addition, the Company has a matching gifts program that matches an employee's donations to IRS qualified charitable organizations for up to $10,000 a year. BlackRock also matches volunteer time with eligible charities and full-time employees may take up to two paid volunteer days.

Compensation, Wellness and Benefits

BlackRock is committed to responsible business practices and believes that investing in the physical, emotional, mental and financial well-being of its employees is a critical component of the firm's human capital management strategy. To that end, the Company designs its compensation and benefits practices to: (1) attract, motivate and retain talented employees; (2) align employee incentives and risk-taking with that of the firm and the interests of its clients; and (3) support employees and their families across many aspects of their lives. The Company has a strong pay-for-performance culture and an annual compensation process that takes into consideration firmwide results, individual business results and employee performance, as well as market benchmarks. BlackRock also offers a wide range of benefits that it regularly reviews in accordance with market practices and the local requirements of its offices, including, where applicable, retirement savings plans, a Flexible Time Off ("FTO") policy and flexible working arrangements, parental leave and family forming benefits, such as fertility benefits, adoption and surrogacy assistance, and backup elder and childcare benefits. The Company provides comprehensive healthcare and mental-health benefits to eligible employees, including medical, dental and vision coverage, health savings and spending accounts, counseling services, an employee assistance program and access to telemedicine services, where available. The Company also offers a Mental Health Ambassador program that is comprised of global volunteers across office locations who are trained in empathetic listening skills and direct interested colleagues to benefits, tools and resources to support mental health.

BlackRock prioritizes protecting the rights of its workforce. The Company has implemented policies related to harassment prevention and compliance with applicable equal employment opportunity and overtime regulations. BlackRock is also committed to providing a safe and healthy work environment for its workforce. To do this, it designs global programs, including environmental and occupational health and safety programs, to meet or exceed local requirements. Moreover, BlackRock encourages all of its employees to raise issues of concern and assures employees that they may do so without fear of retaliation.

Recruiting, Training and Development

BlackRock recognizes that, like all companies, it is operating in an increasingly competitive environment. As such, the Company engages in efforts to reach top talent. In the spirit of attracting talent from broad backgrounds, BlackRock also provides formal recruiting programs for Veterans (former service members transitioning to civilian careers) and Returners (individuals who have taken a career break of 18 months or more).

BlackRock is also committed to innovation, learning and reinvention in all areas of its business and believes that developing the capabilities of its employees is integral to delivering long-term value. To that end, the Company's human capital management practices are designed to provide opportunities for employees to learn, innovate and enhance their skillsets at every stage of their career. One example is the BlackRock Academies, the firm's online suite of interactive resources and courses, which enable employees to build skills in specific facets of BlackRock's business and purpose. The Company believes these opportunities play an important role in engaging BlackRock's employees.

In addition, BlackRock believes that a critical driver of its future success is its ability to grow strong leaders and people managers. The Company invests in leadership development programs designed to foster career growth. People managers have access to coaching and the Managing at BlackRock program to assist in building foundational skills.

REGULATION

Virtually all aspects of BlackRock's business are subject to various laws and regulations around the world, some of which are summarized below. These laws and regulations are primarily intended to protect investment advisory clients, investors in registered and unregistered investment companies, and trust and other fiduciary clients of BlackRock Institutional Trust Company, N.A. ("BTC"). Under these laws and regulations, agencies that regulate investment advisers, investment funds and trust banks and other individuals and entities have broad administrative powers, including the power to limit, restrict or prohibit the regulated entity or person from carrying on business if it fails to comply with such laws and regulations. Possible sanctions for significant compliance failures include the suspension of individual employees, limitations on engaging in certain lines of business for specified periods of time, revocation of investment adviser and other registrations or bank charters, censures and fines both for individuals and BlackRock. The rules governing the regulation of financial institutions and their holding companies and subsidiaries are very detailed and technical. Accordingly, the discussion below is general in nature, does not purport to be complete and is current only as of the date of this report.

BlackRock's business may be impacted by numerous regulatory reform initiatives occurring around the world. Any such initiative, or any new laws or regulations or changes to, or in the enforcement of, existing laws or regulations, could materially and adversely impact the scope or profitability of BlackRock's business activities, lead to business disruptions, require BlackRock to alter its business or operating activities and expose BlackRock to additional costs (including compliance and legal costs) as well as reputational harm. BlackRock's profitability also could be materially and adversely affected by modification of the rules and regulations that impact the business and financial communities in general, including changes to the laws governing banking, securities, taxation, antitrust regulation and electronic commerce.

GLOBAL REGULATORY REFORM

Policymaking workstreams focused on the financial services sector led by global standard setters, such as the Financial Stability Board ("FSB") and International Organization of Securities Commissions ("IOSCO"), may lead to or inform new regulations in multiple jurisdictions in which BlackRock operates. Such workstreams have focused on areas such as money market funds ("MMFs"), open-ended funds ("OEFs") and sustainability regulations.

Macroprudential Policies for Asset Managers

Concerns about liquidity and leverage risks in the asset management industry and wider market-based finance sector have prompted a broad review of existing regulations globally, including an assessment of the adequacy of certain structural market components in mitigating risks, by the FSB, IOSCO, the US Securities and Exchange Commission (the “SEC”) and the Financial Stability Oversight Council (“FSOC”). In November 2022, the SEC proposed amendments to rules governing OEF liquidity risk management. The EU launched a consultation on macroprudential policies in 2024, including enhanced requirements for liquidity management tools, which may lead to new restrictions on management of OEFs. The UK proposed introducing liquidity facilities to certain asset owners, which could result in regulatory burdens on asset managers. If any of these regulatory or policy actions result in broad application of macroprudential tools to OEFs or require changes to structural features of certain OEFs, it could limit BlackRock’s ability to offer products to certain clients and/or result in clients altering their investment strategies or allocations in a manner that is adverse to BlackRock.

Global MMF Reforms

Following the market events of March 2020, US, UK and EU authorities initiated a review of existing regulatory frameworks with the aim of improving the resilience of MMFs in market downturns. In the US, the SEC adopted changes to Rule 2a-7, the primary rule under the Investment Company Act of 1940 governing MMFs, including changes to required liquidity levels and requiring mandatory liquidity fees under certain circumstances. The UK released a consultation in December 2023 indicating their intent to change regulatory requirements for MMFs domiciled in the UK, including material increases in required liquidity levels. The EU consultation on macroprudential policies mentioned above may also result in changes to the regulations of EU-domiciled MMFs. Depending on the terms of the final UK and EU reforms, certain of BlackRock’s MMF products could be adversely impacted.

Sustainability

Sustainability has been the subject of regulatory focus across jurisdictions. Disclosure standards aligned with the International Sustainability Standards Board's (“ISSB”) inaugural disclosure standards have been adopted by several national regulators, including in Hong Kong, Singapore and Australia, while others are expected to propose ISSB-aligned standards, such as the UK, Canada and Japan. However, in the US, final rules issued by the SEC requiring corporate issuers to make climate-related disclosures in their periodic reports are pending litigation, and as of February 2025, the SEC was revisiting its litigation position. The SEC has previously proposed rules requiring enhanced ESG disclosures by investment companies and investment advisers in fund and adviser filings, including disclosures on ESG strategies and how ESG factors are considered and GHG emissions disclosure by certain environmentally focused funds. It also increased scrutiny of disclosure and compliance issues relating to investment advisers’ and funds’ ESG strategies, policies and procedures. In addition, the US Department of Labor (“DOL”) issued final rules clarifying that Employee Retirement Income Security Act of 1974, as amended (“ERISA”) plan fiduciaries can consider the economic effects of ESG factors for purposes of investing ERISA plan assets and exercising voting rights with respect to plan investments. In 2023, California passed several laws requiring certain companies doing business in California to publish certain types of climate-related disclosures, and other states may adopt similar laws.

The EU has enacted numerous sustainability regulations, including (1) the Sustainable Finance Disclosure Regulation, requiring sustainability-related disclosures by financial market participants; (2) the EU Taxonomy Regulation, requiring asset managers to report against an EU-wide taxonomy of environmentally sustainable activities and make detailed disclosures relating to ESG characteristics of funds and portfolios; (3) the Corporate Sustainability Reporting Directive ("CSRD"), requiring enhanced sustainability reporting for EU-based and EU-listed companies, and from 2028, for a wider group of global companies; and (4) the Corporate Sustainability Due Diligence Directive ("CSDDD"), requiring in-scope EU companies and certain non-EU companies to manage actual or potential adverse impacts of their activities and their supply chains on human rights and environmental matters. The European Commission (“EC”) is reviewing and may amend aspects of the CSRD, CSDDD and EU Taxonomy Regulation. Meanwhile, the UK continues to work on implementation of its Sustainability Disclosure Requirements.

The EU and the UK Financial Conduct Authority (“FCA”) have issued rules and guidelines on the use of ESG or sustainability related terms in fund names. In addition, the EU adopted regulations on ESG rating providers applicable in mid-2026 while the UK is expected to propose new legislation on ESG rating providers. Japan and Singapore have published codes of conduct for ESG data and rating providers, with Hong Kong considering a similar approach, while India introduced a regulatory framework for ESG rating providers in July 2023.

As jurisdictions continue to develop and implement sustainability regulations and litigation challenging such regulations increases, BlackRock faces greater fragmentation risk related to local application of regulations, resulting in complex and conflicting compliance obligations and legal and regulatory uncertainty.

Taxation

BlackRock’s businesses may be directly or indirectly affected by tax legislation and regulation, or the modification of existing tax laws, by US or non-US tax authorities. Legislation at both the US federal and state level has been previously proposed to enact a financial transaction tax (“FTT”) on stocks, bonds and a broad range of financial instruments and derivative transactions. In the EU, certain Member States have also enacted similar FTTs and the European Commission (“EC”) has proposed legislation to harmonize these taxes and provide for the adoption of EU-level legislation applicable to some (but not all) EU Member States. If enacted as proposed, FTTs could have an adverse effect on BlackRock’s financial results and clients’ performance results.

The Organisation for Economic Cooperation and Development (“OECD”) has proposed certain international tax reforms, which, among other things, would (1) shift taxing rights to the jurisdiction of the consumer (“Pillar One”) and (2) establish a global minimum tax for multinational companies of 15% (“Pillar Two”). In response, EU member states and several other countries, including the UK, have since adopted laws implementing the OECD’s minimum tax rules under Pillar Two, effective starting in 2024. As a result of these developments, the tax laws of certain countries in which BlackRock does business have changed and may continue to change, and any such changes could increase its tax liabilities. The Company is continuing to monitor legislative developments and evaluate the potential impact of the Pillar Two Framework on future periods.

The application of tax regulations involves numerous uncertainties and, in the normal course of business, US and non-US tax authorities may review and challenge tax positions adopted by BlackRock. These challenges may result in adjustments to, or impact the timing or amount of, taxable income, deductions or other tax allocations, which may adversely affect BlackRock’s effective tax rate and overall financial condition. Similarly, the Company manages assets in products and accounts that have investment objectives which may conform to tax positions adopted by BlackRock or to specific tax rules. To the extent there are changes in tax law or policy, or regulatory challenges to tax positions adopted by BlackRock, the value or attractiveness of such investments may be diminished and BlackRock may suffer financial or reputational harm.

US REGULATORY REFORM

Antitrust Rules and Guidance

In October 2024, the Federal Trade Commission ("FTC"), with concurrence from the Antitrust Division of the Department of Justice (the "DOJ") approved amendments to rules enacted under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 ("HSR") that require parties in certain transactions to provide the FTC and DOJ prior notice and observe a waiting period before consummation of such transactions. The final amendments significantly expanded the information required to be reported and documents to be submitted in connection with an HSR filing, which will likely substantially increase any pre-merger notification expenses and may delay transactions. In December 2023, the FTC and DOJ also jointly issued new merger guidelines, which could impact (1) the ability of the Company to expand its services through strategic investments or acquisitions and (2) funds that engage in transactions reportable under HSR.

Designation as a Systemically Important Financial Institution ("SIFI")

The FSOC has the authority to designate nonbank financial institutions as SIFIs in the US under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"). In November 2023, the FSOC finalized amendments to its existing interpretive guidance to remove the prioritization of an activities-based approach over an entity-specific approach to designation in connection with addressing potential risks to financial stability, although the amendment clarified that the FSOC retained the ability to use an activities-based approach when appropriate. If BlackRock is designated as a SIFI, it could become subject to enhanced regulatory and capital requirements and direct supervision by the Federal Reserve.

SEC Rules Governing Security-Based Swaps

In 2021, the SEC proposed rules in connection with security-based swaps ("SBS") transactions to require public reporting of large SBS positions, which, if adopted as proposed, may affect the types of transactions BlackRock may choose to execute in SBS or other SBS-related assets, introduce or increase costs relating to such transactions, and impact the liquidity in the SBS markets in which BlackRock transacts.

SEC Rules on Form PF

In 2023 and 2024, the SEC adopted new rules and amendments to Form PF for registered investment advisers requiring new disclosures, filing obligations and enhanced reporting. Implementing these rules and amendments may significantly increase BlackRock's reporting, disclosure and compliance obligations and create operational complexity for BlackRock's alternatives products.

US DOL Fiduciary Rule

The US DOL adopted new regulation redefining the meaning of "investment advice fiduciary" under ERISA as well as amendments to several prohibited transaction exemptions applicable to investment advice fiduciaries, which would substantially expand when a person would be considered a fiduciary subject to ERISA and could require BlackRock to revise a number of its distribution relationships, create compliance and operational challenges for BlackRock and its distribution partners, and limit BlackRock's ability to provide certain services to applicable clients. In July 2024, federal courts issued stays on the regulation and implementation has been postponed pending further notice.

SEC US Treasury Clearing Mandate

In December 2023, the SEC adopted rules mandating central clearing of US Treasury repurchases and certain other Treasury transactions. The rules require many market participants, including a large number of BlackRock funds and accounts, to clear Treasury repurchase transactions and potentially certain cash Treasury securities transactions through a clearing agency registered with the SEC, which could increase transaction costs for BlackRock's clients.

Proposed Rules on Equity Market Structure

In 2023, the SEC proposed equity market structure reforms that would significantly change how national market system ("NMS") stock orders are priced, executed and reported. The reforms include: (1) a requirement for certain retail orders to be subject to order-by-order competition, (2) a best execution rule and (3) an adjustment to the tick sizes at which NMS stocks can be quoted or traded. In 2024, the SEC adopted the rule adjusting NMS tick sizes. If the other proposed rules are enacted as proposed, their collective impact may adversely affect market efficiency and execution costs, which would result in negative effects for BlackRock's business and clients.

SEC Rules on Short Sales and Reporting of Securities Loans

In 2023, the SEC adopted a new rule requiring certain institutional managers to report short positions and activity to the SEC for publication on an aggregate basis, which could impact investment strategies and result in greater operational burdens and cost for BlackRock. The SEC also adopted a new rule requiring certain persons to report information on securities loan transactions to a registered national securities association which will then publish certain information. The rule may increase BlackRock's operational burdens and costs.

SEC Predictive Data Analytics Rules

The SEC proposed new rules in 2023 that would require broker-dealers and investment advisers, when engaging or communicating with investors using predictive data analytics ("PDA") and PDA-like technologies, to evaluate such technologies for conflicts of interest and, where identified, eliminate or neutralize the conflict of interest. If adopted as proposed, the rules could encompass a wide range of forward-looking uses of technology applications and impose significant operational burdens and costs.

Financial Crimes Enforcement Network Rule for Registered Investment Advisers

In August 2024, the Financial Crime Enforcement Network ("FinCEN") issued a final rule which will require registered investment advisers to adopt new anti-money laundering requirements beginning in 2026. Under the rule, registered investment advisers will be required to establish written risk-based anti-money laundering programs and report suspicious activity to FinCEN under the Bank Secrecy Act of 1970 (the "Bank Secrecy Act"), as well as comply with Bank Secrecy Act reporting and recordkeeping requirements, which may increase BlackRock's compliance burdens and costs.

SEC Rulemakings for US Registered Funds and Investment Advisers

The SEC has engaged in various initiatives and reviews impacting regulatory structure governing the asset management industry and registered investment companies. For example, the SEC adopted rules requiring certain funds to provide tailored fund shareholder reports, adopted final amendments to the rule governing fund names, expanding the scope of the rule to fund names including growth, value, ESG or similar terms, and proposed rules governing outsourcing of certain functions by investment advisers to service providers.

INTERNATIONAL REGULATORY REFORM

Enhanced Regulatory Scrutiny of Technology Service Providers to Financial Services Firms

The EU's Digital Operational Resilience Act ("DORA"), which focuses on direct regulation of providers and users of technology and data services, became applicable beginning in January 2025. DORA, among other things: (1) introduces additional governance, risk management, incident reporting, resilience testing and information sharing requirements to several of BlackRock's European entities and certain Aladdin clients; and (2) may potentially subject Aladdin to additional oversight. The European Supervisory Authorities will use data collected under DORA to assess which third party suppliers should be designated as critical to the EU financial system and become subject to further regulatory oversight. In 2024, the UK issued final policies regulating services provided by certain third parties designated by HMT as "critical" to the financial sector, which became effective in January 2025. Entities designated as "critical" will be required to provide additional information to financial regulators, engage in resilience testing and report major incidents like cyber-attacks, natural disasters and power outages.

Retail Investment Strategy

The EU continues to consider a proposed Retail Investment Strategy package of amendments intended to enhance protections for retail investors. When enacted, these changes could impact clients' product preferences and may increase costs for BlackRock in European markets due to additional requirements on distributors and product providers.

EMIR 3.0

The EU legislative package known as "EMIR 3.0" introduces key changes to clearing, margining and reporting requirements in the European Market Infrastructure Regulation (EMIR), including: (1) a requirement to hold an "active account" with an EU central counterparty for clearing certain euro-denominated instruments; (2) new reporting requirements for cleared trades; (3) revised clearing thresholds for financial and non-financial counterparties; and (4) amendments related to clearing to the UCITS directive. EMIR 3.0 is expected to impact EU counterparties as well as UK and non-EU entities trading with EU firms, and the collective impact of the package may increase operational complexity, necessitate a reassessment of clearing and trading strategies, and lead to higher transaction costs for BlackRock and its clients.

FSMA 2023

The Financial Services and Markets Act 2023 ("FSMA") reflects significant changes to the UK framework for financial services regulation, including changes that: (1) revoke, amend or retain EU law on financial services regulation, (2) amend the UK Markets in Financial Instruments Directive and Markets in Financial Instruments Regulation frameworks, (3) establish a new designated activities regime and (4) reform the financial promotion regime for unauthorized firms. Other reforms building upon the FSMA and potentially impacting the asset management sector include: (1) replacement of the packaged retail and insurance based investment products ("PRIIPs") Regulation; (2) review of the UK's green finance strategy, including regulation of ESG data providers, UK taxonomy and disclosure requirements; (3) review of governance through the Senior Managers and Certification Regime; (4) repeal of EU legislation on the European Long-Term Investment Fund; (5) market infrastructure reforms, including transition to T+1 settlement; (6) reassessment of the boundary between investment advice and financial guidance; (7) a new UK cryptoasset regime; and (8) continuing reforms to the UK listing regime.

Overseas Fund Regime ("OFR")

OFR, the simplified regime through which non-UK funds can register with the FCA to be marketed to UK retail investors, was enacted in February 2022 and continues to be implemented through 2025. For certain types of funds, OFR requires consumer protection regimes in EU countries where such BlackRock funds are domiciled to be found equivalent to the UK's regime in order to market the funds in the UK.

Conduct Regulation

The FCA continues to focus on conduct regulation, including the implementation of the Consumer Duty by all asset management firms, including BlackRock's UK subsidiaries. The Consumer Duty rules require firms to act to deliver good outcomes for retail customers in their manufacture and distribution of products and services, in respect of price and value, consumer understanding and consumer support. Any failure to meet the FCA's regulatory expectations could expose BlackRock to regulatory sanctions and increased reputational risk.

UK Stewardship Code Review

In 2024, the UK Financial Reporting Council released a consultation on reforms to the UK Stewardship Code, including tailored reporting requirements for proxy advisers and investment consultants, which may impact BlackRock's activities on behalf of its clients.

Regulatory Environment in China

The Company's operations in China are subject to a number of regulatory risks, including an evolving regulatory environment and complex data security and data transfer regulations. These factors may increase compliance risk and costs, limit the Company's ability to source and execute new investment opportunities and lead to impairment losses on its investments. Restrictions on transfers of certain types of onshore data of the Company's Chinese entities to offshore entities also may limit BlackRock's ability to aggregate, report and monitor such data on its global platform. In addition, a number of regulators in China have jurisdiction over BlackRock's business operations, increasing operational and regulatory engagement complexity. These risks may be further heightened by additional scrutiny by Chinese regulators of certain sectors, such as technology and other industries that might be deemed to be of national importance.

EXISTING US REGULATION — OVERVIEW

BlackRock and certain of its US subsidiaries are currently subject to extensive regulation, primarily at the federal level, by the SEC, the DOL, the Federal Reserve, the Office of the Comptroller of the Currency ("OCC"), the Financial Industry Regulatory Authority ("FINRA"), the National Futures Association ("NFA"), the FTC, the Department of Justice, the CFTC and other federal government agencies and regulatory bodies. In addition, BlackRock's interactions with government entities, public officials, and candidates for public office are subject to federal, state, and local laws and rules.

Certain of BlackRock's US subsidiaries are also subject to various anti-terrorist financing, privacy, anti-money laundering and economic sanctions laws and regulations established by various agencies. In addition, the Investment Advisers Act of 1940 (the "Advisers Act") imposes numerous obligations on registered investment advisers such as certain BlackRock subsidiaries, including record-keeping, operational and marketing requirements, disclosure obligations and prohibitions on fraudulent activities. State level oversight and regulation through attorneys general, insurance commissioners and other state level agencies also applies to certain BlackRock activities.

The Investment Company Act of 1940 (the "Investment Company Act") imposes stringent governance, compliance, operational, disclosure and related obligations on registered investment companies and their investment advisers and distributors, such as certain BlackRock subsidiaries and affiliates. The SEC is authorized to institute proceedings and impose sanctions for violations of the Advisers Act and the Investment Company Act, ranging from fines and censure to termination of an investment adviser's registration. Investment advisers also are subject to certain state securities laws and regulations. Non-compliance with the Advisers Act, the Investment Company Act or other federal or state securities laws and regulations could result in investigations, sanctions, disgorgement, fines and reputational damage.

BlackRock's trading and investment activities for client accounts are regulated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Securities Act of 1933, as amended and the Commodity Exchange Act, as well as the rules of various securities exchanges and self-regulatory organizations, including laws governing trading on inside information, market manipulation and a broad number of technical requirements (e.g., short sale limits, volume limitations and reporting obligations) and market regulation policies. Violation of any of these laws and regulations could result in fines or sanctions, as well as restrictions on BlackRock's activities and damage to its reputation. Furthermore, the Dodd-Frank Act requires one of BlackRock's subsidiaries, BTC, to register as a municipal advisor (as that term is defined in the Exchange Act) with the SEC and Municipal Securities Rulemaking Board ("MSRB"). BTC's registration as a municipal advisor subjects BTC to additional regulation by the SEC and MSRB.

BlackRock and its subsidiaries are more broadly subject to comprehensive regulation of their derivatives businesses, including regulations promulgated by US regulators such as the CFTC, the NFA and the SEC that, among other things, impose margin requirements, public and regulatory reporting, central clearing and mandatory trading on regulated exchanges or execution facilities for certain types of swaps and security-based swaps.

BlackRock manages a variety of private pools of capital, including hedge funds, funds of hedge funds, private equity funds, collateralized debt obligations, collateralized loan obligations, real estate funds, collective trust funds, managed futures funds and hybrid funds. Congress, regulators, tax authorities and others continue to explore, on their own and in response to demands from the investment community and the public, increased regulation related to private pools of capital, including changes with respect to investor eligibility, certain limitations on trading activities, record-keeping and reporting, the scope of anti-fraud protections, safekeeping of client assets and a variety of other matters. BlackRock may be materially and adversely affected by new legislation, rulemaking or changes in the interpretation or enforcement of existing rules and regulations imposed by various regulators in this area.

The activities of certain BlackRock subsidiaries are subject to ERISA, and to regulations promulgated thereunder by the DOL, insofar as they act as a "fiduciary" under ERISA with respect to benefit plan clients that are subject to ERISA. ERISA and applicable provisions of the Internal Revenue Code, including applicable related regulations, impose certain duties on persons who are fiduciaries under ERISA, prohibit certain transactions involving ERISA plan clients (clients subject to the prohibited transaction rules under Section 975 of the Code), and, among other things, mandate certain required periodic reporting and disclosures and require certain BlackRock entities to carry bonds insuring against losses caused by fraud or dishonesty. ERISA and other applicable regulations also impose additional compliance, reporting and operational requirements on BlackRock that otherwise are not applicable to clients that are not subject to ERISA. Excise taxes and other potential penalties could apply as a result of violations of the above-described prohibitions and requirements.

BlackRock has eight subsidiaries that are registered as commodity pool operators and/or commodity trading advisors with the CFTC and are members of the NFA. The CFTC and NFA each administer a comparable regulatory system covering futures contracts and various other financial instruments, including swaps as a result of the Dodd-Frank Act, in which certain BlackRock clients may invest. In addition, two of BlackRock's subsidiaries are registered with the SEC as broker-dealers and are member-firms of FINRA. Each broker-dealer has a membership agreement with FINRA that limits the scope of such broker-dealer's permitted activities. The broker-dealers are also members of the MSRB and are subject to MSRB rules.

BlackRock's business activity in California that involves the processing of personal information is subject to the California Consumer Privacy Act ("CCPA") and the California Privacy Rights Act ("CPRA"), which provide for enhanced consumer protections for California residents. The CCPA and CPRA impose obligations on BlackRock for the handling, disclosure and deletion of personal information for California residents. In addition, several other US states have proposed or adopted similar privacy laws. Any failure by BlackRock to comply with the CCPA, CPRA or similar state privacy laws may result in fines, heightened regulatory scrutiny, litigation and/or reputational harm.

US Banking Regulation

One of BlackRock's subsidiaries, BTC, is organized as a nationally-chartered limited purpose trust company that does not accept deposits or make commercial loans. Accordingly, BTC is examined and supervised by the OCC and is subject to various banking laws and regulations enforced by the OCC, such as laws and regulations governing capital adequacy, fiduciary activities, conflicts of interest, self-dealing, and the prevention of financial crime, including money laundering. BTC is also a member of the Federal Reserve System and is subject to various Federal Reserve regulations applicable to member institutions, such as regulations restricting transactions with affiliates. Many of these laws and regulations are meant for the protection of BTC and/or BTC's customers rather than BlackRock, its affiliates or stockholders.

EXISTING INTERNATIONAL REGULATION — OVERVIEW

BlackRock's international operations are subject to the laws and regulations of a number of international jurisdictions, as well as oversight by numerous regulatory agencies and bodies in those jurisdictions. In some instances, these operations are also affected by US laws and regulations that have extra-territorial application.

Below is a summary of certain international regulatory standards to which BlackRock is subject. It is not meant to be comprehensive as there are parallel legal and regulatory arrangements in force in many jurisdictions where BlackRock's subsidiaries conduct business.

Of note among the various other international regulations to which BlackRock is subject, are the extensive and complex regulatory reporting requirements that necessitate the monitoring and reporting of issuer exposure levels (thresholds) across the holdings of managed funds and accounts and those of the Company.

Regulation in EMEA

The FCA currently regulates certain BlackRock subsidiaries in the UK. It is also responsible for the conduct of business regulation of the UK branch of one of BlackRock's US subsidiaries. In addition, the Prudential Regulation Authority ("PRA") regulates one BlackRock UK insurance subsidiary. Authorization by the FCA and (where relevant) the PRA is required to conduct certain financial services-related business in the UK under the Financial Services and Markets Act 2000 (the "FSMA"). The FCA's rules adopted under the FSMA govern the majority of a firm's capital and liquidity resources requirements, senior management arrangements, conduct of business and client assets requirements, interaction with clients, and systems and controls, whereas the rules of the PRA focus solely on the prudential requirements that apply to BlackRock's UK-based insurance subsidiary. The FCA supervises BlackRock's UK-regulated subsidiaries through a combination of proactive engagement, event-driven and reactive supervision and thematic reviews in order to monitor BlackRock's compliance with regulatory requirements. Breaches of the FCA's rules may result in a wide range of disciplinary actions against BlackRock's UK-regulated subsidiaries and/or its employees. The FCA's Consumer Duty requires BlackRock's UK authorized firms to act to deliver good outcomes for retail customers taking into account products and services, price and value and consumer understanding and support.

In addition, BlackRock has regulated entities in France, Germany, Ireland, Jersey, Luxembourg, the Netherlands and Switzerland. Each of these entities is required to comply with regulatory rules in the country in which it has been established, including the branches of the Netherlands entity which operate across the EU.

BlackRock's EU subsidiaries and branches must comply with the EU regulatory regime set out in MiFID II. BlackRock's UK-regulated subsidiaries and branches must comply with the UK version of MiFID II, which regulates the provision of investment services and activities in the UK. MiFID II, and the UK equivalent of MiFID II, set out detailed requirements governing the organization and conduct of business of investment firms and regulated markets. The legislation also includes pre- and post-trade transparency requirements for equity and non-equity markets and extensive transaction reporting requirements. BlackRock's UK insurance subsidiary must also comply with the UK regulation which implemented Solvency II and the Insurance Distribution Directive. In addition, relevant entities must comply with revised obligations on capital resources for certain investment firms arising out of the Investment Firms Prudential Review. These include requirements to ensure capital adequacy, as well as matters of liquidity, governance and remuneration. Relevant BlackRock entities must also comply with the requirements of the UCITS Directive and the AIFMD, as implemented in the relevant EU Member States and in the UK, which impose obligations on the authorization and capital, conduct of business, organization, transparency and marketing of retail and alternative investment funds respectively that are sold in, or marketed to, the EU. The obligations introduced through these regulations and directives (and the UK implementation and onshoring of the same) will affect certain of BlackRock's European and UK operations. Compliance with the UCITS Directives and the AIFMD (and the UK implementation and onshoring of the same) may subject BlackRock to additional expenses associated with depositary oversight and other organizational requirements. The UK Government and the FCA have also enacted the new OFR providing a fast-track framework for non-UK funds to be recognized and registered for marketing to retail investors in the UK after Brexit.

The EU has seen an increase in Common Supervisory Actions by ESMA to coordinate supervisory action by national EU regulators, most notably in areas such as sustainability-related product features and disclosures, product governance, liquidity management and fund costs and charges. BlackRock's EU operations may be affected to the extent this initiative results in formal legislation or action.

EU Member States, the UK and many other non-US jurisdictions have adopted statutes and/or regulations concerning privacy and data protection and requiring notification of personal data security breaches if certain thresholds are met. For example, the EU adopted the General Data Protection Regulation ("GDPR"), which became effective in 2018. Following Brexit, the UK onshored the GDPR into national law ("UK GDPR"), which became effective in 2021. In June 2021, the EC published a new set of standard contractual clauses, which only apply to the transfer of personal data outside of the EU to a country not approved by the EU as providing an adequate level of protection for the processing of personal data. The EU's adequacy decision with respect to the UK, which allows the continued flow of personal data from the EU to the UK, will be regularly reviewed and may be revoked if the UK diverges from its current adequate data protection laws. The UK has developed its own international data transfer agreement, which was implemented in March 2022. In June 2023, the EU-US Data Protection Framework came into force, which allows organizations to self-certify their compliance under the framework for data transfers from the EU, UK and Switzerland to the US. Saudi Arabia and Dubai have also adopted privacy and data protection regulations aligned with GDPR. GDPR and UK GDPR, as well as other statutes and/or regulations concerning privacy and data protection, increase compliance obligations, affect BlackRock's collection, processing, retention and transfer of personal data and reporting of personal data security breaches, and provide for increased penalties for non-compliance.

BlackRock also maintains two offices in the Middle East, one in Dubai, which is regulated by the Dubai Financial Services Authority, and one in Riyadh, Saudi Arabia, which is regulated by the Saudi Capital Markets Authority. Both offices are authorized to provide certain investment services and support BlackRock's provision of investment products and services in their countries of domicile. Other countries across the Middle Eastern region are serviced on a cross-border basis.

Regulation in the Asia-Pacific Region

In Japan, a BlackRock subsidiary is subject to the Financial Instruments and Exchange Act ("FIEA") and the Act on Investment Trusts and Investment Corporations. These laws are administered and enforced by the Japanese Financial Services Agency ("JFSA"), which establishes standards for compliance, including capital adequacy and financial soundness requirements, customer protection requirements and conduct of business rules. The JFSA is empowered to conduct administrative proceedings that can result in censure, fines, cease and desist orders or the suspension or revocation of registrations and licenses granted under the FIEA. This Japanese subsidiary also holds a license for real estate brokerage activities which subjects it to the regulations set forth in the Real Estate Brokerage Act.

In Australia, BlackRock's main operating entities are principally regulated under the Corporations Act 2001 (Cth) by the Australian Securities and Investments Commission ("ASIC"), which includes holding an Australian financial services license and operating registered managed investment schemes. ASIC is Australia's integrated corporate, markets, financial services and consumer credit regulator.

In New Zealand, certain BlackRock subsidiaries are primarily regulated by the Financial Markets Authority ("FMA"). The FMA is responsible for overseeing and enforcing financial markets legislation including the licensing of firms to provide certain financial products and services in New Zealand and administering anti-money laundering and terrorism financing legislation, amongst other functions.

The activities of certain BlackRock subsidiaries in Hong Kong are subject to the Securities and Futures Ordinance ("SFO"), which governs the securities and futures markets, and regulates, among others, offers of investments to the public, and provides for the licensing of intermediaries. The SFO is administered by the Securities & Futures Commission ("SFC"). The SFC is also empowered to establish standards for compliance as well as codes and guidelines. The relevant BlackRock subsidiaries and the employees conducting any of the regulated activities specified in the SFO are required to be licensed with the SFC, and are subject to the rules, codes and guidelines issued by the SFC.

BlackRock's operations in Taiwan are subject to the Securities Investment Trust and Consulting Act and other regulations, rules or guidelines thereunder (collectively, "SITE and SICE Requirements"). BlackRock's subsidiary in Taiwan is governed and regulated by the Securities & Futures Bureau ("SFB") under the Taiwan Financial Supervisory Commission, which is responsible for regulating securities markets (including the Taiwan Stock Exchange, the Taipei Exchange and the Taiwan Futures Exchange), the asset management industry, the broker and futures commission merchant sector, the banking industry and the insurance sector. The relevant BlackRock subsidiary and employees conducting regulated activities are required to be licensed with the SFB and subject to the SITE and SICE Requirements.

BlackRock's Fund Management Company in China ("BlackRock FMC") is regulated by the China Securities Regulatory Commission and is subject to the Securities Investment Fund Law and Measures for the Supervision and Administration of Mutual Fund Managers for the overall oversight from incorporation to the corporate governance and operations of fund managers and funds. BlackRock FMC is also subject to the China Securities Law and various other financial laws and regulations. BlackRock CCB Wealth Management Limited, which is BlackRock's wealth management joint venture company with CCB Wealth Management Co., Ltd. and Fullerton Management Pte Ltd. in China, is regulated by the National Financial Regulatory Administration ("NFRA", formerly known as the China Banking and Insurance Regulatory Commission). They have enacted Bank Wealth Management Supervision and Management Measures and Management Measures of Bank Wealth Management Subsidiaries and other relevant rules to regulate the setup, conduct of business and risk management of bank wealth management companies.

In Singapore, a BlackRock subsidiary is regulated by the Monetary Authority of Singapore ("MAS") and its business activities are subject to the Securities and Futures Act 2001 ("SFA"). The SFA governs the regulation of activities and institutions in the securities and derivatives industry, including fund management, dealing in capital markets products and leveraged foreign exchange trading. The MAS is Singapore's central bank and integrated financial regulator, which regulates the financial services sector in Singapore and conducts integrated supervision of financial services and financial stability surveillance. This BlackRock subsidiary and the employees conducting any of the regulated activities specified in the SFA are required to be licensed with the MAS, and are subject to the SFA and the regulations, rules, codes, notices and guidelines issued by the MAS.

In India, the Jio BlackRock joint venture entities, Jio BlackRock Asset Management Private Limited, Jio BlackRock Investment Advisers Private Limited and Jio BlackRock Trustee Private Limited, are governed by the Companies Act, 2013 and regulated by the Ministry of Corporate Affairs in India. Following approval to act as sponsors, Jio Financial Services and BlackRock through their Jio BlackRock joint venture entities have made applications to the Securities and Exchange Board of India seeking to manage and operate a licensed asset management company.

Other financial regulators oversee BlackRock subsidiaries, branches and representative offices across the Asia-Pacific region, including in South Korea. Regulators in all of these jurisdictions have authority with respect to financial services including, among other things, the authority to grant, suspend or cancel required licenses or registrations. In addition, these regulators may subject certain BlackRock subsidiaries to net capital requirements.

AVAILABLE INFORMATION

BlackRock files annual, quarterly and current reports, proxy statements and all amendments to these reports and other information with the SEC. BlackRock makes available free-of-charge, on or through its website at https://www.blackrock.com, the Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and all amendments to those filings, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The Company also makes available on its website the charters for the Audit Committee, Management Development and Compensation Committee, Nominating, Governance and Sustainability Committee and Risk Committee of the Board of Directors, its Code of Business Conduct and Ethics, its Code of Ethics for Chief Executive and Senior Financial Officers and its Corporate Governance Guidelines. Further, BlackRock will provide, without charge, upon written request, a copy of the Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and all amendments to those filings as well as the committee charters, its Code of Business Conduct and Ethics, its Code of Ethics for Chief Executive and Senior Financial Officers and its Corporate Governance Guidelines. Requests for copies should be addressed to Investor Relations, BlackRock, Inc., 50 Hudson Yards, New York, New York 10001. Reports, proxy statements and other information regarding issuers that file electronically with the SEC, including BlackRock's filings, are also available to the public from the SEC's website at https://www.sec.gov.

Item 1A. Risk Factors

As a global investment management firm, risk is an inherent part of BlackRock's business. Global markets, by their nature, are prone to uncertainty and subject participants to a variety of risks. While BlackRock devotes significant resources across all of its operations to identify, measure, monitor, manage and analyze market, operating, legal, compliance, reputational, fiduciary and investment risks, BlackRock's business, financial condition, operating results and nonoperating results could be materially adversely affected and the Company's stock price could decline as a result of any of these risks and uncertainties, including the ones discussed below.

RISKS RELATED TO MARKET AND COMPETITION

Changes in the value levels of equity, debt, real assets, commodities, foreign exchange or other asset markets, including from the impact of global trade policies and tariffs, may cause assets under management ("AUM"), revenue and earnings to decline.

BlackRock's investment management revenue is primarily comprised of fees based on a percentage of the value of AUM and, in some cases, performance fees which are normally expressed as a percentage of returns to the client. Numerous factors, including price movements in the equity, debt or currency markets, or movements in the price of real assets, commodities, digital assets or other alternative investments in which BlackRock invests on behalf of its clients, including from the impact of global fiscal, monetary and trade policies, could cause:

- the value of AUM, or BlackRock's returns on AUM, to decrease;
- client redemptions from BlackRock's products;
- client rebalancing or reallocating of assets into BlackRock products that yield lower fees;
- an impairment to the value of intangible assets and goodwill; or
- a decrease in the value of seed or co-investment capital.

These risks may also be heightened by market volatility, illiquid market conditions or other market disruptions. The occurrence of any of the above events may cause the Company's AUM, revenue and earnings to decline.

Changes in interest or foreign exchange rates and/or divergent beta may cause BlackRock's AUM and base fees to fluctuate and introduce volatility to the Company's net income and operating cash flows.

BlackRock's business is directly and indirectly affected by changes in global interest rates, as well as changes in global markets, which have experienced substantial volatility in recent years. Similarly, due to the global nature of BlackRock's operations, a portion of its business is conducted in currencies other than the United States ("US") dollar. Fluctuations in BlackRock's AUM related to its exposure to foreign exchange rates relative to the US dollar and interest rates may introduce volatility to the Company's base fees, net income and operating cash flows.

In addition, beta divergence between equity markets, where certain markets perform differently than others, may lead to an increase in the proportion of BlackRock AUM weighted toward lower fee equity products, resulting in a decline in BlackRock's effective fee rate. Divergent market factors may also erode the correlation between the growth rates of AUM and base fees.

BlackRock's investment advisory contracts may be terminated or may not be renewed by clients and fund boards on favorable terms and the liquidation of certain funds may be accelerated at the option of investors.

BlackRock derives a substantial portion of its revenue from providing investment advisory services. The advisory or management contracts BlackRock has entered into with its clients, including the agreements that govern many of BlackRock's investment funds, provide investors or, in some cases, the independent directors of applicable investment funds, with significant latitude to terminate such contracts, withdraw funds or liquidate funds, or to remove BlackRock as a fund's investment advisor (or equivalent). BlackRock also manages its US mutual funds, closed-end and exchange-traded funds under management contracts that must be renewed and approved annually by the funds' respective boards of directors, a majority of whom are independent from the Company. BlackRock's fee arrangements under any of its advisory or management contracts may be reduced (including at the behest of a fund's board of directors). In addition, shareholder activism involving closed-end funds has increased, including public campaigns to demand that a fund consider significant transactions such as a tender offer, merger or liquidation or seek other actions such as the termination of the fund's management contract. If a number of BlackRock's clients terminate their contracts, or otherwise remove BlackRock from its advisory roles, liquidate funds or fail to renew management contracts on similar terms, the fees or carried interest BlackRock earns could be reduced, which may cause BlackRock's AUM, revenue and earnings to decline.

The failure or negative performance of products offered by competitors may cause AUM in similar BlackRock products to decline irrespective of BlackRock's performance.

Many competitors offer similar products to those offered by BlackRock and the failure or negative performance of competitors' products could lead to a loss of confidence in similar BlackRock products, irrespective of the performance of such BlackRock products. Any loss of confidence in a product type could lead to withdrawals, redemptions and liquidity issues in such products, which may cause the Company's AUM, revenue and earnings to decline.

Increased competition may cause BlackRock's AUM, revenue and earnings to decline.

The investment management industry is highly competitive, and BlackRock competes based on a number of factors including: investment performance, liquidity, its technology and portfolio construction offerings, the level of fees charged, the quality and breadth of services and products provided, name recognition and reputation, and its ability to develop new investment strategies and products to meet the changing needs of investors. In addition, over the past several years, the asset management industry has continued to evolve as investors increasingly seek out firms that have the capacity to deliver broad multi-asset investment capabilities and technological expertise, including in a manner that is responsive to ever more localized needs. This evolution, together with the introduction of new technologies, as well as regulatory changes, continues to alter the competitive landscape for investment managers, which may lead to additional fee compression or require BlackRock to invest more to modify or adapt its product offerings to attract and retain customers and remain competitive with the products, services and geographic diversity offered by other financial institutions, technology companies, advisory or asset management firms. Increased competition on the basis of any of these factors, including competition leading to fee reductions on existing or new business, may cause the Company's AUM, revenue and earnings to decline.

Failure to maintain Aladdin's competitive position in a dynamic market could lead to a loss of clients and could impede BlackRock's productivity and growth.

The sophisticated risk analytics, portfolio management, trade execution and investment operations that BlackRock provides via its technology platform to support investment advisory and Aladdin clients are important elements of BlackRock's competitive success. Aladdin's competitive position is based in part on its ability to combine risk analytics with portfolio management, trading and operations tools on a single platform. Increased competition from risk analytics and investment management technology providers, including from competitors with increasingly sophisticated and comprehensive product offerings, or a shift in client demand toward standalone or internally developed solutions, whether due to price competition, perceived client market share, platform offerings or flexibility, or market-based or regulatory factors, may weaken Aladdin's competitive position and may cause the Company's revenue and earnings to decline. In addition, to the extent that Aladdin competitors are able to innovate more effectively than BlackRock or leverage delivery models that provide clients faster time to market, lower costs or the ability to more seamlessly combine or bundle with other service offerings, BlackRock may lose existing clients or fail to capture future market share, which may impede its productivity and growth. Moreover, although BlackRock takes steps to safeguard against infringements of its intellectual property ("IP"), there can be no assurance that the Company will be able to effectively protect and enforce its IP rights in Aladdin.

BlackRock may be unable to develop new products and services and the development of new products and services may expose BlackRock to reputational harm, additional costs or operational risk.

BlackRock's financial performance depends, in part, on its ability to react to changes in the asset management industry, respond to evolving client demands and technological advances, and develop, market and manage new investment products and services. The development and introduction of new products and services, including the creation of increasingly customizable products, requires continued innovative effort on the part of BlackRock and may require significant time and resources as well as ongoing support and investment. Substantial risk and uncertainties are associated with the introduction of new products and services, including the implementation of new and appropriate operational controls and procedures, shifting client and market preferences, the introduction of competing products or services, constraints on BlackRock's ability to manage growth within client mandates, compliance with regulatory and disclosure requirements and IP-related lawsuits or claims, which may not be fully evident or identified prior to the introduction of any such product or service. A growing number of BlackRock's products and services also depend on data provided by third parties as analytical inputs and are subject to additional risks, including with respect to data quality, cost, availability and provider relationships. Data sets for certain developing analytics, such as those in the sustainability space, continue to evolve and difficulties approximating gaps in the data, sourcing data from reliable sources, or validating the data could adversely impact the accuracy and effectiveness of such analytics. There can be no assurance that BlackRock will be able to innovate effectively in order to develop new products or services that address the needs of its clients on the timeline they require. Any failure to successfully develop and support new products and services, or effectively manage associated operational risks, could have an adverse impact on BlackRock's growth, harm BlackRock's reputation and expose the Company to additional costs, which may cause its AUM, revenue and earnings to decline.

Changes in the value of seed and co-investments that BlackRock owns could affect its income and could increase the volatility of its earnings.

At December 31, 2024, BlackRock's net economic investment exposure of approximately $3.9 billion in its investments (see Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations – Investments*) primarily resulted from co-investments and seed investments in its sponsored investment funds. Movements in the equity, debt or currency markets, or in the price of real assets, commodities or other alternative investments, could lower the value of these investments, increase the volatility of BlackRock's earnings and cause earnings to decline.

BlackRock indemnifies certain securities lending clients for specified losses as a result of a borrower default.

BlackRock provides borrower default indemnification to certain of its securities lending clients. In the event of a borrower default, BlackRock may use the collateral provided by the defaulting borrower to repurchase securities out on loan to such borrower in order to replace them in a client's account. Borrower default indemnification is limited to the shortfall that occurs in the event the collateral available at the time of the borrower's default is insufficient to repurchase those securities out on loan. BlackRock requires all borrowers to mark to market their posted collateral daily to levels in excess of the value of the securities out on loan which mitigates the likelihood of the indemnity being triggered. Where the collateral is in the form of cash, the borrower default indemnification BlackRock provides does not guarantee, assume or otherwise insure the investment performance or return of any cash collateral vehicle into which that cash collateral is invested. The amount of securities on loan as of December 31, 2024 and subject to this type of indemnification was approximately $305 billion. In the Company's capacity as lending agent, cash and securities totaling approximately $324 billion was held as collateral for indemnified securities on loan at December 31, 2024. Significant borrower defaults occurring simultaneously with rapid declines in the value of collateral and/or increases in the value of the securities loaned may create collateral shortfalls, which could result in material liabilities under these indemnities and may cause the Company's revenue and earnings to decline.

BlackRock's decision on whether to provide support to particular investment products from time to time, or the inability to provide support, may cause AUM, revenue and earnings to decline.

While not legally mandated, BlackRock, at its option and from time to time, has and may in the future choose to seed, warehouse or otherwise support investment products through capital or credit support for commercial or other reasons. Any decision by BlackRock on whether to support products may utilize capital and liquidity that would otherwise be available for other corporate purposes. BlackRock's ability to seed, warehouse or otherwise support certain products may be restricted by regulation or by the Company's failure to have or make available sufficient capital or liquidity. Moreover, inherent constraints arising from the business models of certain asset managers, including BlackRock, may during periods of market volatility result in BlackRock having fewer options for accessing liquidity than asset managers with alternate business models, which may adversely impact its ability to support certain products. Any decision by BlackRock to support particular investment products, or its inability or unwillingness to provide such support, may result in losses or affect BlackRock's capital or liquidity, which may cause AUM, revenue and earnings to decline.

Geopolitical unrest and other events outside of BlackRock's control could adversely affect the global economy or specific international, regional and domestic markets, which may cause BlackRock's AUM, revenue and earnings to decline.

Geopolitical risks, including those arising from trade tension and/or the imposition of trade tariffs, terrorist activity or acts of civil or international hostility, could have an adverse impact on BlackRock. For instance, the Ukraine-Russia and Middle East conflicts have and may continue to result in geopolitical instability and adversely affect the global economy, supply chains, specific markets and operations. Strategic competition between the US and China and resulting tensions and heightened levels of political polarization have also contributed to uncertainty in the geopolitical and regulatory landscapes. Similarly, other events outside of BlackRock's control, including the impact of natural disasters, climate-related events, pandemics or health crises may arise from time to time and be accompanied by governmental actions that may increase international tension or impact the US or global economy in ways that are uncertain. Any such events and responses, including regulatory developments, may cause significant volatility and declines in the global markets, disproportionate impacts to certain industries or sectors, disruptions to commerce (including to economic activity, travel and supply chains), loss of life and property damage, and may adversely affect the global economy or capital markets, as well as the Company's products, operations, clients, vendors and employees, which may cause BlackRock's AUM, revenue and earnings to decline. BlackRock's exposure to geopolitical risks may be heightened to the extent such risks arise in countries in which BlackRock currently operates or seeks to expand its presence.

Climate-related risks could adversely affect BlackRock's business, products, operations and clients, which may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's business and those of its clients could be impacted by climate-related risks. Climate-related risks may impact BlackRock through changes in the physical climate or from the process of transitioning to a low-carbon economy. Climate-related physical risks arise from the direct impacts of a changing climate in the short- and long-term. Such risks may include the risks of extreme weather events and changes in temperature, which may damage infrastructure and facilities, including BlackRock's physical assets, as well as disrupt connectivity or supply chains. Climate-related transition risks arise from exposure to the transition to a low-carbon economy through policy, regulatory, technology and market changes. For instance, divergent existing and future climate regulations or guidance, as well as differing perspectives of stakeholders regarding climate impacts, have affected and may continue to affect BlackRock's business activities and reputation, increase scrutiny and complicate compliance requirements.

Climate-related physical and transition risks could also impact BlackRock's business both directly and indirectly through adverse impacts to its clients' investments, including as a result of declines in asset values, changes in client preferences, increased regulatory and compliance costs and significant business disruptions. Any of these risks may cause the Company's AUM, revenue and earnings to decline.

RISKS RELATED TO INVESTMENT PERFORMANCE

Poor investment performance could lead to the loss of clients and may cause AUM, revenue and earnings to decline.

The Company's management believes that investment performance, including the efficient delivery of beta, is one of the most important factors for the growth and retention of AUM. Poor investment performance relative to applicable portfolio benchmarks, aggregate fee levels or competitors may cause AUM, revenue and earnings to decline as a result of:

- client withdrawals in favor of better performing products offered by competitors;
- client shifts to products that charge lower fees;
- the diminishing ability to attract additional funds from existing and new clients;
- reduced, minimal or no performance fees;
- an impairment to the value of intangible assets and goodwill; or
- a decrease in the valuations of seed and co-investment capital.

Performance fees may increase volatility of both revenue and earnings.

A portion of BlackRock's revenue is derived from performance fees on investment advisory assignments. Performance fees represented $1.2 billion, or 6%, of total revenue for the year ended December 31, 2024. Generally, the Company is entitled to a performance fee only if the agreement under which it is managing the assets provides for one and if returns on the related portfolio exceed agreed-upon periodic or cumulative return targets. If these targets are not exceeded, a performance fee for that period will not be earned and, if targets are based on cumulative returns, the Company may not earn performance fees in future periods. The volatility of the Company's future revenue and earnings may also be affected due to private markets becoming an increasing component of the overall composition of the Company's performance fee generating assets, including from the Company's acquisition of GIP (the "GIP Acquisition") and its proposed acquisition of HPS (the "HPS Acquisition"). In particular, the Company expects that as it manages more private markets products, its performance fees will generally be recognized over substantially longer multi-year periods than those associated with more liquid products.

Failure to identify errors in the quantitative models BlackRock utilizes to manage its business could adversely affect product performance and client relationships.

BlackRock employs various quantitative models to support its investment processes, including those related to risk assessment, portfolio management, trading and hedging activities and product valuations. Any errors or limitations in the underlying models, model inputs or assumptions, including those from third-party sources, as well as any failure of BlackRock's governance, approval, testing, validation and monitoring standards in respect of such models, model inputs or assumptions, the failure to timely update such models, model inputs or assumptions or errors in how such models are used, could have adverse effects on BlackRock's business and reputation. These risks may be heightened by the rapid growth and complexity of new models, evolving data sets and standards, and market volatility.

TECHNOLOGY AND OPERATIONAL RISKS

A failure in, or disruption to, BlackRock's operations, systems or infrastructure, including business continuity plans, could adversely affect operations, damage the Company's reputation and cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's infrastructure, including its technological capacity, data centers and office space, is vital to the competitiveness of its business. Moreover, a significant portion of BlackRock's critical business operations is concentrated in a limited number of geographic areas, including San Francisco, New York, London, Edinburgh, Budapest, Atlanta, Gurgaon, Mumbai and Belgrade. The failure to maintain an infrastructure commensurate with the size and scope of BlackRock's business, or the occurrence of a business outage or event outside BlackRock's control, including a major earthquake, hurricane, fire, terrorist act, pandemic, health crisis or other catastrophic event, or the actions of individuals or groups seeking to disrupt BlackRock's operations in any location at which BlackRock maintains a major presence, could materially impact operations, result in business disruption or impede the Company's growth.

Despite BlackRock's efforts to ensure business continuity, if it fails to keep business continuity plans up-to-date or if such plans, including secure back-up facilities and systems and the availability of back-up employees, are improperly implemented or deployed during a disruption, the Company's ability to operate could be adversely impacted which may cause AUM, revenue and earnings to decline or impact the Company's ability to comply with regulatory obligations or contractual obligations leading to reputational harm, legal liability, regulatory fines and/or sanctions.

A cyber-attack or a failure to implement effective information and cybersecurity policies, procedures and capabilities could disrupt operations and lead to financial losses and reputational harm, which may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock is dependent on the effectiveness of the information and cybersecurity policies, procedures and capabilities it maintains to protect its computer and telecommunications systems and the data that resides on or is transmitted through them, including data provided by third parties that is significant to portions of BlackRock's business and products. An information security incident or disruption, such as a cyber-attack including social engineering, deepfakes, phishing scams, business email compromise, malware, denial-of-service or ransomware attacks, or failures to control access to sensitive systems, could materially interrupt business operations or cause disclosure or modification of sensitive or confidential client or competitive information. Moreover, developments in BlackRock's use of process automation and artificial intelligence ("AI"), as well as the use of remote access by employees and mobile and cloud technologies, heightens these and other operational risks, as certain aspects of the security of such technologies may be complex, unpredictable or beyond BlackRock's control. BlackRock's growing exposure to the public Internet, as well as reliance on mobile or cloud technology or any failure by mobile technology and cloud service providers to adequately safeguard their systems and prevent cyber-attacks, could disrupt BlackRock's operations and result in misappropriation, corruption or loss of personal, confidential or proprietary information or third-party data. In addition, there is a risk that encryption and other protective measures may be circumvented, particularly to the extent that new computing technologies including quantum computing increase the speed and computing power available.

The financial services industry has been the subject of cyber-attacks involving the dissemination, theft and destruction of corporate information or other assets, as a result of failure to follow procedures by employees or contractors or as a result of actions by third parties, including nation state actors, terrorist organizations, cyber criminals and hacktivists. BlackRock has been and continues to be the target of cyber-attacks, as well as the co-opting of its brand, and continues to monitor and develop its systems to protect its technology infrastructure and data from misappropriation or corruption, as the failure to do so could disrupt BlackRock's operations and cause financial losses. Advances in technology, including generative AI, and use of such technology by malicious actors heightens these risks. Although BlackRock has implemented policies and controls, and takes protective measures involving significant expense, to help prevent and address potential data breaches, inadvertent disclosures, increasingly sophisticated cyber-attacks and cyber-related fraud, there can be no assurance that any of these measures proves fully effective. In addition, given the evolving nature of cyber threat actors and the increasing sophistication of cyber-attack methodology, a successful cyber-attack may persist for an extended period of time before being detected, and it may take a considerable amount of time for an investigation to be completed and the severity and potential impact to be known. Moreover, due to the complexity and interconnectedness of BlackRock's systems, the process of upgrading or patching the Company's protective measures could itself create a risk of security issues or system disruptions for the Company, as well as for clients who rely upon, or have exposure to, BlackRock's systems.

In addition, due to BlackRock's interconnectivity with third-party vendors, advisors, central agents, exchanges, clearing houses and other financial institutions, BlackRock or any such third-party may be adversely affected if any of them (or their service providers) is subject to a successful cyber-attack or other information security event, including those arising due to the use of mobile technology or a third-party cloud environment. BlackRock also routinely transmits and receives personal, confidential or proprietary information by email and other electronic means. The Company collaborates with clients, vendors and other third parties to develop secure transmission capabilities and protect against cyber-attacks. However, BlackRock or such third parties may not have all appropriate controls in place to protect the confidentiality of such information.

Any information security incident or cyber-attack against BlackRock or third parties with whom it is connected, including any interception, mishandling or misuse of personal, confidential or proprietary information or failure to disclose or communicate a cybersecurity incident appropriately, could result in material financial loss, loss of competitive position, regulatory fines and/or sanctions, breach of client contracts, reputational harm or legal liability, which, in turn, may cause BlackRock's AUM, revenue and earnings to decline. In addition, BlackRock's cybersecurity insurance may not cover all losses and damages from such events and BlackRock's ability to maintain or obtain sufficient insurance coverage in the future may be limited.

Failure or unavailability of third-party dependencies may adversely affect Aladdin operations, which could cause reputational harm, lead to a loss of clients and impede BlackRock's productivity and growth.

BlackRock must maintain effective infrastructure, including a robust and secure technological framework, in order to maximize the benefit of the Aladdin platform. In so doing, it relies in part on certain third-party service providers, including for cloud hosting and technologies supporting cloud-based operations. For example, Aladdin's data architecture depends on third-party providers of technology solutions, including the ability of such parties to scale and perform in response to Aladdin's growth. In addition, the analytical capabilities of Aladdin depend on the ability of a number of third parties to provide data and other information as inputs into Aladdin's analytical calculations. Although BlackRock has implemented internal controls and procedures and maintains a robust vendor management program designed to perform diligence and monitor third parties that support the Aladdin platform, there can be no assurance that these measures will prove effective. Any failure by third parties to maintain infrastructure that is commensurate with Aladdin's size and growth, or provide the data or information required to support its varying capabilities, could compromise Aladdin's resilience, result in operational difficulties, cause reputational harm and adversely impact BlackRock's ability to provide services to its investment advisory and Aladdin clients.

Continuing enhancements to Aladdin's capabilities, as well as the expansion of the Aladdin platform into new markets and geographies, have led to significant growth in Aladdin's processing scale, which may expose BlackRock to reputational harm, increased regulatory scrutiny and heightened operational, data management, cyber- and information-security risks.

The operation of BlackRock's Aladdin platform routinely involves updating existing capabilities, configuration change management, developing, testing and rolling out new functionalities and expanding coverage into new markets and geographies, including in connection with inorganic transactions or to address client or regulatory requirements. These updates and expansion initiatives, which have led to significant growth in Aladdin*'s* processing scale, frequently occur on accelerated time frames and may expose BlackRock to additional cyber- and information-security risks, as well as increased execution, operational and data management risks. If BlackRock is unable to manage the pace of, or provide the operational resiliency and stability for, the expansion of Aladdin and associated growth of its processing scale, BlackRock may experience client attrition, reduced business, increased costs, reputational harm or regulatory fines and/or sanctions, which may cause BlackRock's AUM, revenue and earnings to decline.

In addition, the highly regulated business activities of many Aladdin clients may expose BlackRock to heightened regulatory scrutiny. For example, the changing political and regulatory environment in certain jurisdictions in which Aladdin clients are based has required BlackRock to open new data centers in those jurisdictions in order to host client data in the client's home location. Operating new data centers in foreign jurisdictions may expose BlackRock to increased operational complexity, as well as additional regulatory risks associated with the compliance requirements of such jurisdictions. In addition, there has been increased regulatory scrutiny globally on technology and information providers, which may impact Aladdin and certain functionalities and tools.

A failure to effectively manage the development and use of AI, combined with an evolving regulatory environment, could have an adverse effect on BlackRock's growth, reputation or business.

BlackRock uses machine learning and AI in its business and expects to continue to expand its AI capabilities, including through generative AI. AI methods are complex and rapidly evolving, and the introduction of AI into new or existing processes may result in new or enhanced governmental or regulatory scrutiny, IP or other litigation, data protection, confidentiality or information security risks, social or ethical concerns, competitive harm or other complications. For example, the use of datasets to develop and test AI models, the content generated by AI systems, or the application of AI systems may be found to be insufficient, biased or harmful, or lead to adverse business decisions or operating errors. AI technologies, including generative AI, may create content that appears correct but is factually inaccurate or flawed. In addition, IP ownership and license rights, including copyright, surrounding AI technologies are still being developed and have not been fully addressed by US courts or federal, state or non-US laws or regulation. Furthermore, regulatory scrutiny of AI technologies and controls continues to evolve globally with new and forthcoming laws and regulations. Efforts around use of these technologies require additional investment in operational controls and procedures, development and implementation of appropriate protections and safeguards for handling the use of data with AI, including with respect to data leakage, fraud prevention and regulatory compliance costs. AI technologies may also disrupt the competitive landscape for investment management and technology services, including in commercial and operational areas such as data aggregation and quantitative models. Any failure to successfully integrate AI technologies, respond to client or market demands, accurately communicate AI initiatives, comply with AI-related regulations, identify or address any legal or regulatory issues associated with AI or effectively manage the related risks could harm BlackRock's growth and reputation, adversely impact product offerings, client interactions or business initiatives, and expose the Company to legal and regulatory liabilities and additional costs, including regulatory fines or sanctions, which may cause its AUM, revenue and earnings to decline.

Failure to maintain adequate corporate and contingent liquidity may cause BlackRock's AUM, liquidity and earnings to decline, as well as harm its prospects for growth.

BlackRock's ability to meet anticipated cash needs depends upon a number of factors, including its creditworthiness and ability to generate operating cash flows. In addition, while BlackRock, Inc. is not subject to regulatory capital or liquidity requirements, certain of its subsidiaries are subject to regulatory capital and liquidity frameworks as well as certain other prudential requirements and standards, which require them to maintain certain levels of capital and liquidity. Failure to maintain adequate liquidity could lead to unanticipated costs and force BlackRock to revise existing or future strategic and business initiatives. BlackRock's access to equity and debt markets and its ability to issue public or private debt, or obtain lines of credit or commercial paper back-up lines, on reasonable terms may be limited by adverse market conditions, a reduction in its long- or short-term credit ratings, or changes in government regulations, including tax and interest rates. Failure to obtain funds and/or financing, or any adverse change to the cost of obtaining such funds and/or financing, may cause BlackRock's AUM, liquidity and earnings to decline, curtail its operations and limit or impede its prospects for growth.

Operating risks associated with BlackRock's securities lending program may result in client losses.

BlackRock lends securities to banks and broker-dealers as agent on behalf of certain of its clients. In these securities lending transactions, the borrower is required to provide and maintain collateral at or above regulatory minimums. Securities on loan are marked to market daily to determine if the borrower is required to provide additional collateral. BlackRock must manage this process and is charged with mitigating the associated operational risks. The failure of BlackRock's controls to mitigate such operational risks could result in financial losses for the Company's clients that participate in its securities lending programs (separate from any losses related to the risks of collateral investments), and BlackRock may be held liable for any failure to manage such risks.

Inorganic transactions may harm the Company's competitive or financial position if they are not successful.

BlackRock employs a variety of organic and inorganic strategies intended to enhance earnings, increase product offerings, deliver whole-portfolio solutions, access new clients, leverage advances in technology and expand into new geographies. Inorganic strategies have included hiring smaller-sized investment teams, making minority investments in early- to mid-stage technological and other ventures, entering into strategic joint ventures and acquiring investment management and technology businesses, analytics, models and other IP. Inorganic transactions involve a number of financial, accounting, tax, regulatory, geographical and operational challenges and uncertainties, including in some cases, the assumption of pre-existing liabilities, which must be managed in order for BlackRock to realize the benefit of such transactions, and such transactions may be the subject of unanticipated liabilities arising from commercial, client or other disputes, information security vulnerabilities or breaches and IP or other legal claims.

The success of BlackRock's inorganic strategy also depends in large part on its ability to integrate the workforce, operations, strategies, technologies and other components of a target business following the completion of an acquisition. BlackRock may be required to commit significant management time, as well as create new, or grow existing, operational and support functions, to facilitate the integration of acquired businesses, manage combined future growth and maintain a cohesive corporate culture. There can be no assurance that BlackRock will be able to successfully integrate acquired businesses, retain associated talent, scale support functions, effectively manage growth or realize other intended benefits of its inorganic strategy in the timeframe BlackRock expects, or at all. Moreover, the challenges associated with BlackRock's inorganic strategy may be heightened when inorganic transactions are in new geographic locations, involve new markets, products, business lines or early stage investments or are delivered via technology and systems that differ from those employed by BlackRock or that overlap with existing BlackRock businesses. In addition, in the case of minority investments and joint ventures, including BlackRock's joint venture to provide investment solutions in India, BlackRock may be subject to risks due to reputational harm, liability or loss resulting from, or relating to operating systems, risk management controls, and employees that are outside of BlackRock's control, risks related to the jurisdictions or markets in which such investees or joint ventures operate and risks related to the joint venture partners and investees. Any failure to identify and mitigate the risks associated with acquisitions, joint ventures or minority investments through due diligence, governance or oversight rights, indemnification provisions and/or operational expertise, or to manage the integration of acquisitions effectively, could result in losses or impairments related to such transactions and have an adverse effect on BlackRock's reputation or cause its AUM, revenue and earnings to decline, which may harm the Company's competitive position in the investment management industry.

BlackRock is subject to risks associated with its recent and proposed acquisitions, including completion of proposed acquisitions in the anticipated timeframes or at all, and any failure to realize anticipated benefits of such acquisitions.

In October 2024, BlackRock completed the GIP Acquisition. BlackRock also previously announced (1) its proposed acquisition of Preqin (the "Preqin Acquisition") which is currently expected to close in the first quarter of 2025, subject to customary closing conditions and (2) the HPS Acquisition (together with the Preqin Acquisition, the "Proposed Acquisitions") which is currently expected to close in mid-2025, subject to regulatory approvals and customary closing conditions. BlackRock is subject to risks and uncertainties associated with the Proposed Acquisitions, including the risk that a condition to closing may not be satisfied or waived, the possibility of failure to obtain any outstanding necessary regulatory approvals, which may be outside the control of BlackRock or the acquired company, or the possibility that a Proposed Acquisition does not close in the anticipated timeframe or at all. BlackRock may not be able to realize the anticipated benefits of GIP Acquisition or the Proposed Acquisitions, including synergies, value creation or other benefits of such acquisition, fully or at all, or on the timeline BlackRock expects. At times, the resources of BlackRock and the acquired companies or the attention of certain members of their management may be focused on completion and integration of the acquisition and diverted from day-to-day business operations, which may disrupt ongoing business. In addition, the process of integrating each acquired company may have an adverse impact on the Company, including from risks related to significant transaction and integration costs, unknown liabilities, employee turnover, divergence of management attention, litigation and/or regulatory actions related to the acquisition or if the acquired business does not perform as expected, which may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's alternatives products include investments in early-stage companies, private equity portfolio companies and real assets, such as real estate, infrastructure and energy assets, which expose BlackRock and its funds and accounts to new or increased risks and liabilities, as well as reputational harm.

BlackRock's alternatives products include investments in early-stage companies, private equity portfolio companies and real assets, including real estate, infrastructure and energy assets, which expose BlackRock and its funds and accounts to increased risks and liabilities that are inherent in the ownership and management of such investments and portfolio companies. These include:

- risks related to the potential illiquidity, valuation and disposition of such investments;
- risks related to emerging and less established companies that have, among other things, short operating histories, new technologies and products, nascent control functions, quickly evolving markets and limited financial resources;
- construction risks, including as a result of force majeure, labor disputes or work stoppages, shortages of material or interruptions to the availability of necessary equipment;
- accidents, pandemics, health crises or catastrophic events, such as explosions, fires or terrorist activity beyond BlackRock's control;
- climate-related risks, including greater frequency or intensity of adverse weather and natural disasters;
- personal injury or property damage;
- failures on the part of third-party servicers and operators, including managers and contractors, appointed in connection with investments or projects to adequately perform their contractual duties or operate in accordance with applicable laws;
- risks related to investments in emerging markets, including economic and political risks and differences in legal or regulatory environments, which may make enforcement of legal obligations more difficult;
- exposure to stringent and complex non-US, federal, state and local laws, ordinances and regulations, including those related to financial crime, permits, government contracting, conservation, exploration and production, tenancy, occupational health and safety, foreign investment and environmental protection;
- environmental hazards, such as natural gas leaks, product and waste spills, pipeline and tank ruptures, and unauthorized discharges of products, wastes and other pollutants;
- changes to the supply and demand for properties and/or tenancies or fluctuations in the price of commodities;
- risks related to the availability, cost, coverage and other limitations on insurance;
- risks related to governance and oversight, including board oversight, of portfolio companies;
- the financial resources of tenants; and
- contingent liabilities on disposition of investments.

The above risks may expose BlackRock's funds and accounts to additional expenses and liabilities, including costs associated with delays or remediation, and increased legal or regulatory costs, all of which could impact the returns earned by BlackRock's clients. These risks could also result in direct liability for BlackRock by exposing BlackRock to losses, regulatory sanctions or litigation, including claims for compensatory or punitive damages. Similarly, market conditions may change during the course of developments or projects in which BlackRock invests and those changes may make such developments or projects less attractive than at the time they were commenced and potentially harm the investment returns of BlackRock's clients. These risks may be heightened as the Company expands its alternative products, including through the GIP Acquisition. The occurrence of any such events may expose BlackRock to reputational harm, divert management's attention away from BlackRock's other business activities or cause its AUM, revenue and earnings to decline.

Operating in international markets increases BlackRock's operational, political, regulatory and other risks.

As a result of BlackRock's extensive international operations, the Company faces associated operational, regulatory, reputational, political and foreign exchange rate risks, many of which are outside of the Company's control. Operating outside the US may also expose BlackRock to increased compliance risks, as well as higher costs to comply with US and non-US anti-corruption, anti-money laundering and sanctions laws and regulations. Similarly, certain jurisdictions in which BlackRock operates may not have comparable levels of protection for corporate assets, such as IP, and client information and records, to the US. As a result, there may also be heightened information security or privacy risks in those jurisdictions. Any theft or unauthorized use of data, technology or IP may negatively impact BlackRock's business operations and reputation. In addition, changes to the political or regulatory environment in a jurisdiction in which BlackRock operates, including increased restrictions or scrutiny, may adversely impact BlackRock's business or operating activities. The failure of the Company's systems of internal control to mitigate such risks, or of its operating infrastructure to support its global activities, could result in operational failures and regulatory fines and/or sanctions and impede the Company's growth, which may cause the Company's AUM, revenue and earnings to decline.

RISKS RELATED TO HUMAN CAPITAL

The potential for human error in connection with BlackRock's operational systems could disrupt operations, cause losses, lead to regulatory fines or damage the Company's reputation and may cause BlackRock's AUM, revenue and earnings to decline.

Many of BlackRock's operations are highly complex and are dependent on the Company's ability to process and monitor a large number of transactions, many of which occur across numerous markets and currencies at high volumes and frequencies. Although BlackRock expends considerable resources on systemic controls, supervision, technology and training in an effort to ensure that such transactions do not violate client guidelines, applicable rules and regulations or information barriers, or adversely affect clients, counterparties or the Company, BlackRock's operations are dependent on its employees. From time-to-time, employees make mistakes that are not always immediately detected by systems, controls, policies and procedures intended to prevent and detect such errors. These can include calculation errors, errors in software implementation or development, failure to ensure data security, follow processes, patch systems or timely report issues, or errors in judgment. Such risks may be exacerbated in times of increased market volatility, high trading volumes, significant changes in operation or business offerings, and workforce turnover (including turnover related to acquisitions). Human errors, even if promptly discovered and remediated, may disrupt operations or result in regulatory fines and/or sanctions, breach of client contracts, reputational harm or legal liability, which, in turn, may cause BlackRock's AUM, revenue and earnings to decline.

Fraud, the circumvention of controls or the violation of risk management and workplace policies could have an adverse effect on BlackRock's reputation, which may cause the Company's AUM, revenue and earnings to decline.

BlackRock seeks to foster a positive workplace culture, has adopted a comprehensive risk management framework and continues to enhance various controls, procedures, policies and systems to monitor and manage risks. Notwithstanding these measures, BlackRock cannot ensure that its workplace culture or such controls, procedures, policies and systems will successfully identify and manage internal and external risks, and BlackRock employees have in the past engaged in improper conduct. In addition, BlackRock is subject to the risk that its employees, contractors or other third parties may in the future deliberately or recklessly seek to circumvent established controls to commit fraud, pay or solicit bribes or otherwise act in ways that are inconsistent with the Company's controls, policies, procedures, workplace culture or principles. This risk may be heightened as BlackRock expands into new markets, increases the breadth of its business offerings and integrates acquisitions, all of which introduce additional complexity to its risk management program. The changing nature of the office environment, such as return to office arrangements and remote and alternative work models, could cause employees to become disconnected with corporate culture and policies, which may increase operational issues. Persistent attempts to circumvent policies and controls or repeated incidents involving fraud, conflicts of interests or transgressions of policies and controls could have an adverse effect on BlackRock's reputation, cause adverse publicity, and result in litigation, regulatory inquiries, fines and/or sanctions, which may cause the Company's AUM, revenue and earnings to decline.

The failure to recruit, train and retain employees and develop and implement effective executive succession could lead to the loss of clients and may cause AUM, revenue and earnings to decline.

BlackRock's success is largely dependent on the talents and efforts of its highly skilled workforce and the Company's ability to plan for the future long-term growth of the business by identifying and developing those employees who can ultimately transition into key roles within BlackRock. The global market for qualified fund managers, investment analysts, technology and risk specialists and other professionals is highly competitive. Factors that affect BlackRock's ability to attract, train and retain highly qualified employees include the Company's reputation and workplace culture, the immigration and public health policies in the jurisdictions in which BlackRock has offices, its approach to remote and alternative work models, the compensation and benefits it provides, the impact of acquisitions and its commitment to effectively managing executive succession, including the development and training of qualified individuals.

In addition, BlackRock pays certain of its employees in deferred compensation that is tied to the Company's share price or through incentive fees and carried interest related to certain investment funds. As such, decreases in BlackRock's share price or poor performance of the investment funds related to the incentive fees and carried interest could impair the retention value of such deferred compensation. There can be no assurance that the Company will continue to be successful in its efforts to recruit and retain employees and effectively manage executive succession. If BlackRock is unable to offer competitive compensation or otherwise attract, develop and retain talented individuals, or if it fails to effectively manage executive succession, the Company's ability to compete effectively and retain its existing clients may be materially impacted.

RISKS RELATED TO KEY THIRD-PARTY RELATIONSHIPS

The impairment or failure of third parties may negatively impact the performance of products and accounts that BlackRock manages, which may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock's investment management activities expose the products and accounts it manages for its clients to many different industries and counterparties, including distributors, brokers and dealers, commercial and investment banks, clearing organizations, mutual and hedge funds, and other institutional clients. Transactions with counterparties expose BlackRock's clients to credit risk in the event the applicable counterparty defaults. Although BlackRock regularly assesses risks posed by its counterparties, such counterparties may be subject to sudden swings in the financial and credit markets that may impair their ability to perform or they may fail to meet their obligations. Counterparties may also experience lapses in their internal controls or risk management systems or expose BlackRock and/or its clients to losses resulting from employee malfeasance, negligence or human error. In addition, the concentration of certain financial institutions that BlackRock uses to facilitate securities and derivatives transactions for its clients, including clearing organizations, exchanges and central agents, increases the risk that a technical or operational issue at, or default by, one such institution could introduce operational issues or delays impacting multiple BlackRock clients. Any such operational issue, impairment or failure could negatively impact the performance of products that BlackRock manages for its clients, which may lead to client attrition and, in turn, cause BlackRock's AUM, revenue and earnings to decline.

The failure of key third-party providers to BlackRock to fulfill their obligations or a failure by BlackRock to maintain its relationships with key third-party providers could have a material adverse effect on BlackRock's growth, reputation or business, which may cause the Company's AUM, revenue and earnings to decline.

BlackRock depends on a number of key third-party providers for various fund administration, accounting, custody, market and environmental, social and governance ("ESG") data, market indices, insurance, technology and AI, cloud hosting and transfer agent roles and other distribution and operational needs. Further, BlackRock relies upon a relatively concentrated group of third-party index providers to deliver services that are integral to its clients' investment decisions. The index provider industry is characterized by large vendors and the use of long-term contracts remains the market standard. This industry structure may limit BlackRock's ability to renegotiate its index provider contracts on favorable terms or at all. While BlackRock performs focused diligence on its vendors in an effort to ensure they operate in accordance with expectations and required obligations, to the extent any significant deficiencies are uncovered, there may be few, or no, alternative vendors available. In addition, BlackRock's operations and processes rely on commercially available data provided by third parties as well as providers of services, including technology services, and operating errors, process delays and failures or failures to comply with data usage requirements with respect to these service providers may adversely impact BlackRock. Data providers commonly disclaim the accuracy and completeness of data and BlackRock does not have the ability to validate or verify the accuracy and completeness of commercially sourced datasets. Moreover, in situations where BlackRock has limited access to alternative vendors, or where the nature of BlackRock's arrangement with a vendor requires a long term-commitment, BlackRock may be dependent on such vendor for continuous operational reliability and may incur additional costs if such vendor introduces required upgrades to its services.

BlackRock may from time to time transfer key contracts from one third-party provider to another. Key contract transfers may be costly and complex and expose BlackRock to heightened operational and legal risks. Any failure to mitigate such risks could result in reputational harm as well as financial losses to BlackRock and its clients. The failure or inability of BlackRock to diversify its sources for key services or the failure of any key third-party provider to fulfill its obligations could result in activities inconsistent with clients' investment management or other agreements, have an adverse financial impact on BlackRock products or lead to operational, legal and regulatory issues for the Company, which could result in reputational harm or legal liability, fines and/or sanctions and may cause BlackRock's AUM, revenue and earnings to decline.

Any disruption to the Company's distribution channels may cause BlackRock's AUM, revenue and earnings to decline.

BlackRock relies on a number of third parties to provide distribution, portfolio administration and servicing for certain BlackRock investment management products and services through their various distribution channels. BlackRock's ability to maintain strong relationships with its distributors may impact the Company's future performance, and its relationships with distributors are subject to periodic renegotiation that may result in increased distribution costs and/or reductions in the amount of BlackRock products and services being marketed or distributed. Moreover, new fiduciary regulations could lead to significant shifts in distributors' business models and more limited product offerings, potentially resulting in reduced distribution and/or marketing of certain of the Company's products and services and fee compression. If BlackRock is unable to distribute its products and services successfully or if it is unable to replace or renew existing distribution arrangements, BlackRock's AUM, revenue and earnings may decline. In addition, improper activities, as well as inadequate anti-money laundering and sanctions diligence conducted by third-party distributors, could create reputational and regulatory harm to BlackRock.

Key technology partnerships may expose BlackRock to increased regulatory oversight, as well as migration, execution, technology and operational risks.

BlackRock has a number of key strategic partnerships, including with Microsoft. For instance, the Aladdin infrastructure and environment for BlackRock and its external Aladdin clients are hosted on Microsoft Azure. BlackRock has also migrated certain systems that support its corporate functions to cloud-based platforms. The benefits of cloud-based platforms are significant and BlackRock has adopted a robust risk-based approach to its migration strategies. However, these partnerships also introduce new risks, including: (1) risks associated with relying on third-parties for aspects of infrastructure reliability and stability; (2) software and information security risks arising from the use of cloud technology; (3) operational and execution risks; and (4) risks related to increased regulatory oversight and new compliance obligations, which risks may be further exacerbated as BlackRock and the Aladdin platform continue to grow. A prolonged global failure of cloud services could also impact BlackRock's other systems. Failures by BlackRock to manage these risks, and/or risks associated with future technology partnerships, may result in escalating costs, financial loss, client dissatisfaction or attrition, regulatory fines and/or sanctions, reputational harm or legal liability, which, in turn, may cause BlackRock's AUM, revenue and earnings to decline.

Disruption to the operations of third parties whose functions are integral to BlackRock's exchange-traded fund ("ETF") platform may adversely affect the prices at which ETFs trade, particularly during periods of market volatility.

BlackRock is the largest provider of ETFs globally. Shares of ETFs trade on stock exchanges at prices at, above or below the ETF's most recent net asset value ("NAV"). The NAV of an ETF is calculated at least once daily, generally at the end of each business day, and fluctuates with changes in the market value of the ETF's holdings. The trading price of the ETF's shares fluctuates continuously throughout trading hours. The creation/redemption feature and arbitrage mechanism of an ETF are designed to make it more likely that the ETF's shares normally will trade at prices close to the NAV. Notwithstanding these features, exchange prices have in the past deviated measurably from the NAV of certain ETFs and may under certain circumstances do so in the future. ETF market prices are subject to numerous potential risks, including trading halts invoked by a stock exchange, and the inability or unwillingness of market makers, authorized participants, settlement systems or other market participants to perform functions necessary for an ETF's arbitrage mechanism to function effectively. These risks may be heightened as a result of significant market volatility, the growth of the ETF industry combined with increased market activity, as well as the complexity associated with certain products or asset classes, such as digital assets. Moreover, if market events lead to incidents where ETFs trade at prices that deviate meaningfully from an ETF's NAV, or trading halts are invoked by the relevant stock exchange or market, investors may lose confidence in ETF products and redeem their holdings, which may cause BlackRock's AUM, revenue and earnings to decline.

LEGAL, REGULATORY AND REPUTATIONAL RISKS

BlackRock is subject to extensive regulation around the world, which increases its cost of doing business.

BlackRock's business is subject to extensive regulation around the world. These regulations subject BlackRock's business activities to an array of increasingly detailed operational requirements, compliance with which is costly and complex.

In addition, many of BlackRock's legal entities are subject to laws and regulations aimed at preventing corruption, money laundering, inappropriate employment practices, illegal payments and engaging in business activities with certain individuals, countries or groups, including but not limited to the US Foreign Corrupt Practices Act, the USA PATRIOT Act, the Bank Secrecy Act, the EU Anti-Money Laundering Directives, the Money Laundering, Terrorist Financing and Transfer of Funds Regulations 2017, the UK Bribery Act, sanctions imposed by the US Treasury's Office of Foreign Assets Control, the United Nations and the EU and its member states, as well as those imposed by other countries in which BlackRock operates, such as His Majesty's Treasury's ("HMT") Office of Financial Sanctions Implementation.

BlackRock is also subject to certain risk retention rules and regulation, as well as regulatory capital requirements, which require the Company to maintain capital to support certain of its businesses. Furthermore, many jurisdictions in which BlackRock operates have laws and regulations relating to data privacy, cybersecurity and protection of personal information, including the GDPR and UK GDPR, which impose stringent data protection rules for individuals within the European Economic Area ("EEA") and UK, respectively, and for personal data exported outside the EEA and UK.

BlackRock is additionally subject to scrutiny from various government agencies that focus on antitrust and competition laws and regulations within the US and internationally, including in connection with merger control proceedings and proposed investments. Any determination of a failure to comply with any such laws or regulations could result in fines and/or sanctions against the Company, as well as reputational harm. Moreover, to the extent that these laws and regulations become more stringent, or if BlackRock is required to hold increased levels of capital to support its businesses, the Company's financial performance or plans for growth may be adversely impacted.

BlackRock may also be adversely affected by a failure to comply with existing laws and regulations or by changes in the interpretation or enforcement of such laws and regulations, including those discussed above. Challenges associated with interpreting regulations issued in numerous countries in a globally consistent manner may add to such risks if regulators in different jurisdictions have inconsistent views or provide only limited regulatory guidance. In particular, violation of applicable laws or regulations could result in fines and/or sanctions, temporary or permanent prohibition of certain activities, reputational harm and related client terminations, suspensions of employees or revocation of their licenses, suspension or termination of investment adviser, broker-dealer or other registrations, or suspension or termination of BTC's bank charter or other sanctions, which could have a material adverse effect on BlackRock's reputation or business and may cause the Company's AUM, revenue and earnings to decline. For a more extensive discussion of the laws, regulations and regulators to which BlackRock is subject and regulated by, see Item 1, *Business – Regulation*.

New regulations informed by global standard setters and/or developed by various national authorities may expose BlackRock to increasing regulatory scrutiny and compliance costs in the jurisdictions in which it operates.

Policymaking workstreams focused on the financial services sector led by global standard setters, such as the Financial Stability Board ("FSB") and International Organization of Securities Commissions ("IOSCO"), may lead to or inform new regulations in multiple jurisdictions in which BlackRock operates. Such workstreams have focused on areas such as money market funds ("MMFs"), open-ended funds ("OEFs") and sustainability regulations. BlackRock is, and may become, subject to increasing regulation in these areas, see Item 1, *Business – Regulation*, including:

- *Macroprudential Policies for Asset Managers:* Concerns about liquidity and leverage risks in the asset management industry and wider market-based finance sector have prompted a broad review of existing regulations globally, including an assessment of the adequacy of certain structural market components in mitigating risks, by the FSB, IOSCO, the US Securities and Exchange Commission (the "SEC") and the Financial Stability Oversight Council ("FSOC"). In November 2022, the SEC proposed amendments to rules governing OEF liquidity risk management. The EU launched a consultation on macroprudential policies in 2024, including enhanced requirements for liquidity management tools, which may lead to new restrictions on management of OEFs. The UK proposed introducing liquidity facilities to certain asset owners, which could result in regulatory burdens on asset managers. If any of these regulatory or policy actions result in broad application of macroprudential tools to OEFs or require changes to structural features of certain OEFs, it could limit BlackRock's ability to offer products to certain clients and/or result in clients altering their investment strategies or allocations in a manner that is adverse to BlackRock.

- *Global MMF Reforms:* Following the market events of March 2020, US, UK and EU authorities initiated a review of existing regulatory frameworks with the aim of improving the resilience of MMFs in market downturns. In the US, the SEC adopted changes to Rule 2a-7, the primary rule under the Investment Company Act of 1940 governing MMFs, including changes to required liquidity levels and requiring mandatory liquidity fees under certain circumstances. The UK released a consultation in December 2023 indicating their intent to change regulatory requirements for MMFs domiciled in the UK, including material increases in required liquidity levels. The EU consultation on macroprudential policies mentioned above may also result in changes to the regulations of EU-domiciled MMFs. Depending on the terms of the final UK and EU reforms, certain of BlackRock's MMF products could be adversely impacted.
- *Sustainability:* Sustainability has been the subject of regulatory focus across jurisdictions. Disclosure standards aligned with the International Sustainability Standards Board's ("ISSB") inaugural disclosure standards have been adopted by several national regulators, including in Hong Kong, Singapore and Australia, while others are expected to propose ISSB-aligned standards, such as the UK, Canada and Japan. However in the US, final rules issued by the SEC requiring corporate issuers to make climate-related disclosures in their periodic reports are pending litigation, and as of February 2025, the SEC was revisiting its litigation position. The SEC has previously proposed rules requiring enhanced ESG disclosures by investment companies and investment advisers in fund and adviser filings, including disclosures on ESG strategies and how ESG factors are considered and GHG emissions disclosure by certain environmentally focused funds. It also increased scrutiny of disclosure and compliance issues relating to investment advisers' and funds' ESG strategies, policies and procedures. In addition, the US Department of Labor ("DOL") issued final rules clarifying that Employee Retirement Income Security Act of 1974, as amended ("ERISA") plan fiduciaries can consider the economic effects of ESG factors for purposes of investing ERISA plan assets and exercising voting rights with respect to plan investments. In 2023, California passed several laws requiring certain companies doing business in California to publish certain types of climate-related disclosures, and other states may adopt similar laws.

  The EU has enacted numerous sustainability regulations, including (1) the Sustainable Finance Disclosure Regulation, requiring sustainability-related disclosures by financial market participants; (2) the EU Taxonomy Regulation, requiring asset managers to report against an EU-wide taxonomy of environmentally sustainable activities and make detailed disclosures relating to ESG characteristics of funds and portfolios; (3) the Corporate Sustainability Reporting Directive ("CSRD"), requiring enhanced sustainability reporting for EU-based and EU-listed companies, and from 2028, for a wider group of global companies; and (4) the Corporate Sustainability Due Diligence Directive ("CSDDD"), requiring in-scope EU companies and certain non-EU companies to manage actual or potential adverse impacts of their activities and their supply chains on human rights and environmental matters. The European Commission ("EC") is reviewing and may amend aspects of the CSRD, CSDDD and EU Taxonomy Regulation. Meanwhile, the UK continues to work on implementation of its Sustainability Disclosure Requirements.

  The EU and the UK Financial Conduct Authority ("FCA") have issued rules and guidelines on the use of ESG or sustainability related terms in fund names. In addition, the EU adopted regulations on ESG rating providers applicable in mid-2026 while the UK is expected to propose new legislation on ESG rating providers. Japan and Singapore have published codes of conduct for ESG data and rating providers, with Hong Kong considering a similar approach, while India introduced a regulatory framework for ESG rating providers in July 2023.

  As jurisdictions continue to develop and implement sustainability regulations and litigation challenging such regulations increases, BlackRock faces greater fragmentation risk related to local application of regulations, resulting in complex and conflicting compliance obligations and legal and regulatory uncertainty.

Global regulatory reforms could require BlackRock to alter its future business or operating activities, which could be time-consuming and increase costs, including costs related to regulatory compliance, result in litigation, impede the Company's growth and cause its AUM, revenue and earnings to decline. Regulatory reform may also impact BlackRock's clients, which could cause them to change their investment strategies or allocations in manners that may be adverse to BlackRock.

Regulatory reforms in the US expose BlackRock to increasing regulatory scrutiny, as well as regulatory uncertainty.

In recent years, a number of regulatory reforms have been proposed or fully or partially implemented in the US, and the level of regulatory scrutiny to which BlackRock is subject has increased. BlackRock, as well as its clients, vendors and distributors, have expended resources and altered certain of their business or operating activities to prepare for, address and meet the requirements that such regulatory reforms impose. New or proposed changes to laws, regulations, policies, initiatives and other government actions may be difficult to anticipate, which provides additional uncertainty and may heighten the Company's risks related to such actions. While BlackRock is, and may become, subject to numerous reform initiatives in the US, see Item 1, *Business – Regulation*, key regulatory reforms that may impact the Company include:

- *Antitrust Rules and Guidance:* In October 2024, the Federal Trade Commission ("FTC"), with concurrence from the Antitrust Division of the Department of Justice (the "DOJ") approved amendments to rules enacted under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 ("HSR") that require parties in certain transactions to provide the FTC and DOJ prior notice and observe a waiting period before consummation of such transactions. The final amendments significantly expanded the information required to be reported and documents to be submitted in connection with an HSR filing, which will likely substantially increase any pre-merger notification expenses and may delay transactions. In December 2023, the FTC and DOJ also jointly issued new merger guidelines, which could impact (1) the ability of the Company to expand its services through strategic investments or acquisitions and (2) funds that engage in transactions reportable under HSR.
- *Designation as a Systemically Important Financial Institution ("SIFI"):* The FSOC has the authority to designate nonbank financial institutions as SIFIs in the US under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. In November 2023, the FSOC finalized amendments to its existing interpretive guidance to remove the prioritization of an activities-based approach over an entity-specific approach to designation in connection with addressing potential risks to financial stability, although the amendment clarified that the FSOC retained the ability to use an activities-based approach when appropriate. If BlackRock is designated as a SIFI, it could become subject to enhanced regulatory and capital requirements and direct supervision by the Federal Reserve.
- *SEC Rules Governing Security-Based Swaps:* In 2021, the SEC proposed rules in connection with security-based swaps ("SBS") transactions to require public reporting of large SBS positions, which, if adopted as proposed, may affect the types of transactions BlackRock may choose to execute in SBS or other SBS-related assets, introduce or increase costs relating to such transactions, and impact the liquidity in the SBS markets in which BlackRock transacts.

- *SEC Rules on Form PF*: In 2023 and 2024, the SEC adopted new rules and amendments to Form PF for registered investment advisers requiring new disclosures, filing obligations and enhanced reporting. Implementing these rules and amendments may significantly increase BlackRock's reporting, disclosure and compliance obligations and create operational complexity for BlackRock's alternatives products.
- *US DOL Fiduciary Rule:* The US DOL adopted new regulation redefining the meaning of "investment advice fiduciary" under ERISA as well as amendments to several prohibited transaction exemptions applicable to investment advice fiduciaries, which would substantially expand when a person would be considered a fiduciary subject to ERISA and could require BlackRock to revise a number of its distribution relationships, create compliance and operational challenges for BlackRock and its distribution partners, and limit BlackRock's ability to provide certain services to applicable clients. In July 2024, federal courts issued stays on the regulation and implementation has been postponed pending further notice.
- *SEC US Treasury Clearing Mandate:* In December 2023, the SEC adopted rules mandating central clearing of US Treasury repurchases and certain other Treasury transactions. The rules require many market participants, including a large number of BlackRock funds and accounts, to clear Treasury repurchase transactions and potentially certain cash Treasury securities transactions through a clearing agency registered with the SEC, which could increase transaction costs for BlackRock's clients.
- *Proposed Rules on Equity Market Structure:* In 2023, the SEC proposed equity market structure reforms that would significantly change how national market system ("NMS") stock orders are priced, executed and reported. The reforms include: (1) a requirement for certain retail orders to be subject to order-by-order competition, (2) a best execution rule and (3) an adjustment to the tick sizes at which NMS stocks can be quoted or traded. In 2024, the SEC adopted the rule adjusting NMS tick sizes. If the other proposed rules are enacted as proposed, their collective impact may adversely affect market efficiency and execution costs, which would result in negative effects for BlackRock's business and clients.
- *SEC Rules on Short Sales and Reporting of Securities Loans:* In 2023, the SEC adopted a new rule requiring certain institutional managers to report short positions and activity to the SEC for publication on an aggregate basis, which could impact investment strategies and result in greater operational burdens and cost for BlackRock. The SEC also adopted a new rule requiring certain persons to report information on securities loan transactions to a registered national securities association which will then publish certain information. The rule may increase BlackRock's operational burdens and costs.
- *SEC Predictive Data Analytics Rules:* The SEC proposed new rules in 2023 that would require broker-dealers and investment advisers, when engaging or communicating with investors using predictive data analytics ("PDA") and PDA-like technologies, to evaluate such technologies for conflicts of interest and, where identified, eliminate or neutralize the conflict of interest. If adopted as proposed, the rules could encompass a wide range of forward-looking uses of technology applications and impose significant operational burdens and costs.
- *Financial Crimes Enforcement Network Rule for Registered Investment Advisers:* In August 2024, the Financial Crime Enforcement Network ("FinCEN") issued a final rule which will require registered investment advisers to adopt new anti-money laundering requirements beginning in 2026. Under the rule, registered investment advisers will be required to establish written risk-based anti-money laundering programs and report suspicious activity to FinCEN under the Bank Secrecy Act of 1970 (the "Bank Secrecy Act"), as well as comply with Bank Secrecy Act reporting and recordkeeping requirements, which may increase BlackRock's compliance burdens and costs.
- *SEC Rulemakings for US Registered Funds and Investment Advisers:* The SEC has engaged in various initiatives and reviews impacting regulatory structure governing the asset management industry and registered investment companies. For example, the SEC adopted rules requiring certain funds to provide tailored fund shareholder reports, adopted final amendments to the rule governing fund names, expanding the scope of the rule to fund names including growth, value, ESG or similar terms, and proposed rules governing outsourcing of certain functions by investment advisers to service providers.

Regulatory reforms in the US could require BlackRock to alter its future business or operating activities, which could be time-consuming and costly, increase regulatory compliance costs, result in litigation, impede the Company's growth and cause its AUM, revenue and earnings to decline. Regulatory reform may also impact BlackRock's clients, which could cause them to change their investment strategies or allocations in manners that may be adverse to BlackRock.

International regulatory reforms expose BlackRock to increasing regulatory scrutiny, as well as regulatory uncertainty.

BlackRock's business and operating activities are subject to increasing regulatory oversight outside of the US and the Company may be affected by several proposed or implemented reform initiatives in the EMEA and the Asia-Pacific regions, as well as volatility associated with international regulatory uncertainty. While BlackRock is, and may become, subject to numerous reform initiatives internationally, see Item 1, *Business – Regulation*, key reforms in these regions include:

European Union

- *Enhanced Regulatory Scrutiny of Technology Service Providers to Financial Services Firms:* The EU's Digital Operational Resilience Act ("DORA"), which focuses on direct regulation of providers and users of technology and data services, became applicable beginning in January 2025. DORA, among other things: (1) introduces additional governance, risk management, incident reporting, resilience testing and information sharing requirements to several of BlackRock's European entities and certain Aladdin clients; and (2) may potentially subject Aladdin to additional oversight. The European Supervisory Authorities will use data collected under DORA to assess which third party suppliers should be designated as critical to the EU financial system and become subject to further regulatory oversight. In 2024, the UK issued final policies regulating services provided by certain third parties designated by HMT as "critical" to the financial sector, which became effective in January 2025. Entities designated as "critical" will be required to provide additional information to financial regulators, engage in resilience testing and report major incidents like cyber-attacks, natural disasters and power outages.
- *Retail Investment Strategy:* The EU continues to consider a proposed Retail Investment Strategy package of amendments intended to enhance protections for retail investors. When enacted, these changes could impact clients' product preferences and may increase costs for BlackRock in European markets due to additional requirements on distributors and product providers.

- *EMIR 3.0:* The EU legislative package known as "EMIR 3.0" introduces key changes to clearing, margining and reporting requirements in the European Market Infrastructure Regulation (EMIR), including: (1) a requirement to hold an "active account" with an EU central counterparty for clearing certain euro-denominated instruments; (2) new reporting requirements for cleared trades; (3) revised clearing thresholds for financial and non-financial counterparties; and (4) amendments related to clearing to the UCITS directive. EMIR 3.0 is expected to impact EU counterparties as well as UK and non-EU entities trading with EU firms, and the collective impact of the package may increase operational complexity, necessitate a reassessment of clearing and trading strategies, and lead to higher transaction costs for BlackRock and its clients.

United Kingdom

- *FSMA 2023:* The Financial Services and Markets Act 2023 ("FSMA") reflects significant changes to the UK framework for financial services regulation, including changes that: (1) revoke, amend or retain EU law on financial services regulation, (2) amend the UK Markets in Financial Instruments Directive and Markets in Financial Instruments Regulation frameworks, (3) establish a new designated activities regime and (4) reform the financial promotion regime for unauthorized firms. Other reforms building upon the FSMA and potentially impacting the asset management sector include: (1) replacement of the packaged retail and insurance based investment products ("PRIIPs") Regulation; (2) review of the UK's green finance strategy, including regulation of ESG data providers, UK taxonomy and disclosure requirements; (3) review of governance through the Senior Managers and Certification Regime; (4) repeal of EU legislation on the European Long-Term Investment Fund; (5) market infrastructure reforms, including transition to T+1 settlement; (6) reassessment of the boundary between investment advice and financial guidance; (7) a new UK cryptoasset regime; and (8) continuing reforms to the UK listing regime.
- *Overseas Fund Regime ("OFR"):* OFR, the simplified regime through which non-UK funds can register with the FCA to be marketed to UK retail investors, was enacted in February 2022 and continues to be implemented through 2025. For certain types of funds, OFR requires consumer protection regimes in EU countries where such BlackRock funds are domiciled to be found equivalent to the UK's regime in order to market the funds in the UK.
- *Conduct Regulation:* The FCA continues to focus on conduct regulation, including the implementation of the Consumer Duty by all asset management firms, including BlackRock's UK subsidiaries. The Consumer Duty rules require firms to act to deliver good outcomes for retail customers in their manufacture and distribution of products and services, in respect of price and value, consumer understanding and consumer support. Any failure to meet the FCA's regulatory expectations could expose BlackRock to regulatory sanctions and increased reputational risk.
- *UK Stewardship Code Review:* In 2024, the UK Financial Reporting Council released a consultation on reforms to the UK Stewardship Code, including tailored reporting requirements for proxy advisers and investment consultants, which may impact BlackRock's activities on behalf of its clients.

Asia-Pacific

- *Regulatory Environment in China:* The Company's operations in China are subject to a number of regulatory risks, including an evolving regulatory environment and complex data security and data transfer regulations. These factors may increase compliance risk and costs, limit the Company's ability to source and execute new investment opportunities and lead to impairment losses on its investments. Restrictions on transfers of certain types of onshore data of the Company's Chinese entities to offshore entities also may limit BlackRock's ability to aggregate, report and monitor such data on its global platform. In addition, a number of regulators in China have jurisdiction over BlackRock's business operations, increasing operational and regulatory engagement complexity. These risks may be further heightened by additional scrutiny by Chinese regulators of certain sectors, such as technology and other industries that might be deemed to be of national importance.

International regulatory reforms could require BlackRock to alter its future business or operating activities, which could be time-consuming and costly, increase regulatory compliance costs, result in litigation, impede the Company's growth and cause its AUM, revenue and earnings to decline. Regulatory reform may also impact BlackRock's clients, which could cause them to change their investment strategies or allocations in manners that may be adverse to BlackRock.

Legal proceedings may cause the Company's AUM, revenue and earnings to decline.

BlackRock is subject to a number of sources of potential legal liability and the Company, certain of the investment funds it manages and certain of its subsidiaries and employees have been named as defendants in various legal actions, including arbitrations, class actions and other litigation arising in connection with BlackRock's activities. Certain of BlackRock's subsidiaries and employees are also subject to periodic examination, special inquiries and potential proceedings by regulatory authorities, including the SEC, Office of the Comptroller of the Currency ("OCC"), DOL, Commodity Futures Trading Commission, the FCA, Commission de Surveillance du Secteur Financial and Federal Reserve. Similarly, from time to time, BlackRock receives subpoenas or other requests for information from various US state and federal as well as non-US governmental and regulatory authorities in connection with certain industry-wide, company-specific or other investigations, proceedings or litigations. Governmental or regulatory authorities have and could in the future institute proceedings and/or seek to impose sanctions for violations. Any such action may also result in litigation by investors in BlackRock's funds, other BlackRock clients or BlackRock's shareholders. Such legal proceedings could harm the Company's reputation and may cause its AUM, revenue and earnings to decline, potentially harm the investment returns of the applicable fund, or result in the Company being liable for damages.

In addition, when clients retain BlackRock to manage their assets or provide them with products or services, they typically specify contractual requirements or guidelines that BlackRock must observe in the provision of its services. A failure to comply with these guidelines or requirements could expose BlackRock to lawsuits, harm its reputation or cause clients to withdraw assets or terminate contracts.

BlackRock faces increasing focus from regulators, officials, clients and other stakeholders regarding environmental and social-related matters, which may adversely impact its reputation and business.

BlackRock faces increasing focus from regulators, officials, clients and other stakeholders regarding environmental and social-related matters. BlackRock offers choice to its clients who have a variety of goals and preferences, including those who want to increase their exposure to the low-carbon transition and those who choose not to invest in products or strategies with sustainable investment objectives. BlackRock is subject to competing demands from different stakeholder groups with divergent views on environmental and social-related matters, including in countries in which BlackRock operates and invests, as well as in countries, states and localities where BlackRock serves public sector clients. This divergence has and continues to increase the risk that any perceived or actual action or lack thereof by BlackRock on such matters on behalf of its clients will be viewed differently by various stakeholders and adversely impact BlackRock's reputation and business, including through withdrawals, redemptions, terminations or decisions not to commit or invest new capital by clients, as well as legal and governmental action and scrutiny. Some US states and state officials have adopted or proposed legislation or otherwise raised concerns about BlackRock's business practices. In certain instances, this has led them to take official positions restricting or prohibiting state government entities from doing certain business with entities identified by the state as "boycotting" or "discriminating" against particular industries or considering environmental and social factors in their investment processes and proxy voting. Other states and localities may adopt similar legislation or other environmental and social-related laws and positions that adversely impact BlackRock's business. BlackRock has previously communicated and may communicate certain initiatives and goals for its corporate activities related to the environment, human capital management, and other environmental and social-related matters. BlackRock faces criticism for the scope or nature of certain initiatives or goals and may face additional criticism for revisions thereto. If BlackRock is not able to successfully manage environmental and social-related expectations across varied stakeholder interests, it may adversely affect BlackRock's reputation, ability to attract and retain clients, employees, shareholders and business partners or result in litigation, legal or governmental action, which may cause its AUM, revenue and earnings to decline.

Damage to BlackRock's reputation may harm its business.

BlackRock's reputation is critical to its relationships with its clients, employees, shareholders and business partners. BlackRock's reputation may be harmed by, among other factors, regulatory, enforcement or other governmental actions, technology or operational failures, poor investment performance, ineffective management or monitoring of key third-party relationships, ransomware or other cybersecurity incidents, privacy incidents, employee errors or misconduct, failures to manage risks or conflicts of interest, or legal actions related to BlackRock or its products and services. In addition, BlackRock's business, scale and investments subject it to significant media coverage and increasing attention from a broad range of stakeholders. This heightened scrutiny has resulted in negative publicity and adverse actions for BlackRock and may continue to do so in the future. Any perceived or actual action or lack thereof, or perceived lack of transparency, by BlackRock on matters subject to scrutiny, such as environmental and social matters, may be viewed differently by various stakeholders and adversely impact BlackRock's reputation and business, including through redemptions or terminations by clients, and legal and governmental action and scrutiny. BlackRock's global presence and investments on behalf of its clients around the world could also lead to heightened scrutiny and criticism in an increasingly fragmented geopolitical landscape. For example, BlackRock has received criticism from some stakeholders because of its operations and investments in certain countries on behalf of clients, including China. These criticisms could adversely impact BlackRock's reputation and business. In addition, the increasing popularity of social media and non-mainstream Internet news sources may lead to faster and wider dissemination of adverse publicity, inaccurate information or disinformation campaigns about BlackRock, making effective remediation more difficult. Damage to BlackRock's reputation may impact BlackRock's ability to attract and retain clients, employees, shareholders and business partners, which may cause its AUM, revenue and earnings to decline.

A failure to effectively manage potential conflicts of interest could result in litigation or enforcement actions and/or adversely affect BlackRock's business and reputation, which may cause BlackRock's AUM, revenue and earnings to decline.

As a global investment management firm that provides investment and technology services to a diverse range of clients, the Company must routinely address and manage conflicts of interest, as well as the perception of conflicts of interest, between itself and its clients, employees or vendors. While BlackRock has policies, controls and disclosure protocols in place to manage and address potential conflicts of interest, identifying and mitigating conflicts of interest can be complex and is the subject of increasing regulatory and media scrutiny. It is possible that actual, potential or perceived conflicts could give rise to investor or client dissatisfaction, adverse publicity, litigation or enforcement actions. In particular, BlackRock's broad range of investment, advisory and technology offerings, and its focus on providing clients with whole portfolio solutions, may result in clients working with multiple BlackRock businesses and/or BlackRock being engaged by institutions that have a nexus to industries or jurisdictions in which BlackRock operates, which may increase the potential for actual or perceived conflicts of interest and improper information sharing. To the extent that BlackRock fails, or appears to fail, to deal appropriately with any conflict of interest, it may face adverse publicity, reputational damage, litigation, regulatory proceedings, client attrition, penalties, fines and/or sanctions, any of which may cause BlackRock's AUM, revenue and earnings to decline.

A subsidiary of BlackRock is subject to US banking regulations that may limit its business activities.

BlackRock's trust bank subsidiary, which is a national banking association chartered by the OCC, is subject to OCC regulation and capital requirements that may limit its business activities. The OCC has broad supervisory and enforcement authority over BlackRock's trust bank. Having a subsidiary subject to banking regulation may put BlackRock at a competitive disadvantage because certain of its competitors are not subject to the limitations imposed by such regulation.

The implications of complying with threshold limits and/or any failure to comply with ownership reporting requirements could result in harm to BlackRock's reputation, impact the performance of certain BlackRock funds and may cause its AUM, revenue and earnings to decline.

Of note among the various regulations to which BlackRock is subject are the extensive and increasingly stringent regulatory reporting requirements that necessitate the monitoring and reporting of issuer exposure levels (thresholds) across the holdings of managed funds and accounts and those of the Company. The specific triggers and the reporting methods that these threshold filings entail vary significantly by regulator and across jurisdictions. BlackRock continues to invest in technology, training and its employees to further enhance its monitoring and reporting functions. Despite these investments, the complexity of the various threshold reporting requirements combined with the breadth of the assets managed by the Company and high volume of securities trading have caused errors and omissions to occur in the past and pose a risk that errors or omissions may occur in the future. Any such errors may expose BlackRock to monetary penalties or other sanctions, which could have an adverse effect on BlackRock's reputation and may cause its AUM, revenue and earnings to decline.

Moreover, as BlackRock's business grows it is becoming subject to a greater number of regulatory, industry-level or issuer-specific threshold limits and scrutiny that may prevent BlackRock from holding positions in certain equity securities, securities convertible into equity securities or futures contracts in excess of certain thresholds. In addition, regulators are reviewing and considering changes to their regulatory frameworks on threshold limits and ownership reporting requirements. These changes may result in significant operational impacts and costs to BlackRock and its products depending on their scope. Although BlackRock is actively engaged in regulatory, issuer-specific and structural initiatives to create additional investment capacity, threshold limits may nonetheless prevent the purchase of certain securities which may, in turn, impact the performance of certain BlackRock index funds by increasing tracking error relative to the funds' benchmarks, impact the performance of certain BlackRock actively managed funds by preventing them from taking advantage of alpha generating opportunities, and impede the Company's growth.

BlackRock has been the subject of commentary citing concerns about the scale of its index investing business, as well as purported competition issues relating to the common ownership theory.

As a leader in the index investing and asset management industry, BlackRock has been the subject of commentary citing concerns about the growth of index investing and concentrated proxy voting power. Some commentators have argued that continued growth of index funds has the potential to impact stock market competitiveness by exacerbating stock price moves and market volatility. Some commentators, regulators and lawmakers have also argued that index managers have accumulated outsized influence through the proxy voting power their clients have assigned them. Some have proposed limitations on the ability of index fund managers to vote or engage on behalf of their clients, or indicated that voting and engagement on certain topics should trigger changes in regulatory status. Additional commentary focuses on the common ownership theory, an academic theory stating that minority ownership of multiple companies within a single industry by the same investor leads to anticompetitive effects. This theory purports to link aggregated equity positions in certain industries with higher consumer prices and executive compensation and lower wages and employment rates, among other things. In 2021, the FTC identified common ownership as a key enforcement area and passed a resolution empowering individual commissioners to investigate shareholder conduct in connection with common ownership. In 2023, the FTC and DOJ released new merger guidelines recognizing that common ownership may reduce competitive incentives and in 2024, the FTC and DOJ submitted a joint comment letter to the Federal Energy Regulatory Commission ("FERC") encouraging FERC to consider common ownership as a relevant factor in updating regulatory relief available to asset managers. Common ownership may be given greater consideration in regulatory investigations, studies, rule proposals, policy decisions and/or the scrutiny of mergers and acquisitions. The debate on common ownership has been on the agenda of lawmakers, policymakers and competition regulators globally, and common ownership may continue to be a consideration for the EC and European Parliament, among others. There is substantial literature casting doubt on the assumptions, data, methodology and conclusions associated with the common ownership theory, including research conducted by staff of regulatory agencies. Competition regulators, including at the FTC and UK Competition & Markets Authority ("CMA"), have acknowledged that the debate around the theory remains unsettled. Nevertheless, some commentators have proposed remedies, including limits on the ownership stakes of common owners that, if enacted into policy, could have a negative impact on the capital markets, as well as increase costs and limit the availability of products for investors. Such policy solutions could, in turn, adversely affect BlackRock.

New tax legislation or changes to existing US and non-US tax laws, treaties and regulations or challenges to BlackRock's historical taxation practices may adversely affect BlackRock's effective tax rate, business and overall financial condition.

BlackRock's businesses may be directly or indirectly affected by tax legislation and regulation, or the modification of existing tax laws, by US or non-US tax authorities. Legislation at both the US federal and state level has been previously proposed to enact a financial transaction tax ("FTT") on stocks, bonds and a broad range of financial instruments and derivative transactions. In the EU, certain Member States have also enacted similar FTTs and the EC has proposed legislation to harmonize these taxes and provide for the adoption of EU-level legislation applicable to some (but not all) EU Member States. If enacted as proposed, FTTs could have an adverse effect on BlackRock's financial results and clients' performance results.

The Organisation for Economic Cooperation and Development ("OECD") has proposed certain international tax reforms, which, among other things, would (1) shift taxing rights to the jurisdiction of the consumer ("Pillar One") and (2) establish a global minimum tax for multinational companies of 15% ("Pillar Two"). In response, EU member states and several other countries, including the UK, have since adopted laws implementing the OECD's minimum tax rules under Pillar Two, effective starting in 2024. As a result of these developments, the tax laws of certain countries in which BlackRock does business have changed and may continue to change, and any such changes could increase its tax liabilities. The Company is continuing to monitor legislative developments and evaluate the potential impact of the Pillar Two Framework on future periods.

The application of tax regulations involves numerous uncertainties, and in the normal course of business US and non-US tax authorities may review and challenge tax positions adopted by BlackRock. These challenges may result in adjustments to, or impact the timing or amount of, taxable income, deductions or other tax allocations, which may adversely affect BlackRock's effective tax rate and overall financial condition. Similarly, the Company manages assets in products and accounts that have investment objectives which may conform to tax positions adopted by BlackRock or to specific tax rules. To the extent there are changes in tax law or policy, or regulatory challenges to tax positions adopted by BlackRock, the value or attractiveness of such investments may be diminished and BlackRock may suffer financial or reputational harm.

Item 1B. Unresolved Staff Comments

The Company has no unresolved comments from the Securities and Exchange Commission ("SEC") staff relating to BlackRock's periodic or current reports filed with the SEC pursuant to the Exchange Act.

Item 1C. Cybersecurity

CYBERSECURITY RISK MANAGEMENT AND STRATEGY

BlackRock recognizes the importance of identifying, assessing, and managing material risks associated with cybersecurity threats. Cybersecurity represents an important component of the Company's approach to enterprise risk management ("ERM"). The Company leverages a multi-lines-of-defense model with cybersecurity operational processes executed by global information security and other teams across the firm and dedicated internal audit technology and technology risk management ("TRM") teams that independently review technology risks. The Company's cybersecurity program is fully integrated into its ERM framework and is aligned with recognized frameworks, such as NIST CSF, FFIEC CAT, FedRAMP, SOC 1/2, ISO 27001/2 and others. BlackRock aims to inform and continuously improve its cybersecurity program through engagement with regulatory, client, insurer, vendor, partner, peer, government and industry organizations and associations, as well as external audit, technology risk, information security and other assessments.

BlackRock seeks to address cybersecurity risks through a global, multilayered strategy of control programs that are designed to preserve the confidentiality, integrity and availability of the information that BlackRock collects and stores by identifying, preventing and mitigating cybersecurity threats and incidents. As one of the critical elements of the Company's overall ERM framework, BlackRock's cybersecurity program is focused on the following key areas:

- **Governance:** As discussed in more detail under the heading "Cybersecurity Governance" below, the Board's oversight of cybersecurity risk management is supported by the Risk Committee, which regularly interacts with the Company's risk management function, the Company's Chief Risk Officer ("CRO") and Chief Information Security Officer ("CISO"), along with other members of management. In addition, technology and cybersecurity risks are formally overseen by a dedicated management risk governance committee, the Technology Risk and Cybersecurity Committee ("TRCC"), which is a sub-committee of the firmwide Enterprise Risk Committee ("ERC").
- **Cross-Functional Approach:** The Company has implemented a global, cross-functional approach to identifying, preventing, and mitigating cybersecurity threats and incidents, while also implementing layered preventative, detective, reactive and recovery controls to identify and manage cybersecurity risks.
- **Safeguards:** The Company deploys a range of people, process and technical controls that are designed to protect the Company's information systems from cybersecurity threats, which may include, among others: physical security controls, perimeter controls, technical assessments, firewalls, network segregation, intrusion detection and prevention, tabletop exercises, ongoing vulnerability and patch management, vendor due diligence, multi-factor authentication, device encryption, application security, code testing and penetration testing; endpoint security, including anti-malware protection, threat intel and response, managed detection and response, security configuration management, portable storage device lockdown, and restricted administrative privileges, employee awareness, training, and phishing testing, data loss prevention program and monitoring, information security incident reporting and monitoring; and layered and comprehensive access controls.
- **Incident Response and Recovery Planning:** The Company maintains incident response and recovery plans that address the Company's response to a cybersecurity incident, including processes designed to assess, escalate, contain, investigate and remediate an incident, as well as to comply with applicable legal obligations and mitigate potential reputational damage. These plans are evaluated on a periodic basis.
- **Third-Party Risk Management:** The Company maintains a risk-based approach to identifying and overseeing cybersecurity risks presented by third parties, including vendors, service providers, counterparties and clients, as well as the systems of third parties that could significantly and adversely impact the Company's business in the event of a cybersecurity incident affecting those third-party systems. Operational incidents can arise as a result of failures by third parties with which the Company does business, such as failures by internet, communication technology and cloud service providers or other vendors to adequately follow processes and procedures, safeguard their systems, or prevent system disruptions or cyber-attacks. Third-party risks are included within BlackRock's ERM framework, and risk identification and mitigation are supported by the Company's cybersecurity program. BlackRock also performs due diligence on certain third parties and monitors cybersecurity threats and risks identified through such diligence.
- **Education and Awareness:** The Company's employees and contractors are required to complete annual information security training to equip them with effective tools to address cybersecurity threats, and receive communications on the Company's evolving information security policies and procedures.

The Company's global information security team, in collaboration with the technology risk and internal audit teams, engages in the periodic assessment and testing of the Company's cyber risks and cybersecurity program. These efforts may include a wide range of activities, including audits, assessments, wargames and "tabletop" exercises, threat modeling, vulnerability testing and other exercises focused on evaluating the effectiveness of the Company's cybersecurity measures and planning. BlackRock also participates in financial services industry and government forums in an effort to improve both internal and sector cybersecurity defense. The Company regularly engages third parties and advisors to assess its cybersecurity control environment. The results of certain program and control assessments are reported to the Risk Committee, and BlackRock adjusts its cybersecurity program as appropriate based on the information provided by these assessments.

As of December 31, 2024, BlackRock is not aware of any cybersecurity risks that have materially affected or are reasonably likely to materially affect BlackRock's business strategy, results of operations, or financial condition. For additional information on whether and how risks from cybersecurity threats are reasonably likely to materially affect BlackRock, see "A cyber-attack or a failure to implement effective information and cybersecurity policies, procedures and capabilities could disrupt operations and lead to financial losses and reputational harm, which may cause BlackRock's AUM, revenue and earnings to decline." under Part I, Item 1A, *Risk Factors* herein.

CYBERSECURITY GOVERNANCE

BlackRock's Board of Directors is actively engaged in the oversight of BlackRock's risk management program. The Risk Committee assists the Board with its oversight of the Company's levels of risk, risk assessment, risk management and related policies and processes, including risks arising from cybersecurity threats. The Risk Committee receives regular reports on the Company's cybersecurity program, technology resilience risk management and related developments from members of the Company's information security team, including the CISO. The Board and the Risk Committee also receive information regarding cybersecurity incidents that meet certain reporting thresholds. On an annual basis, senior members of BlackRock's technology, risk and information security teams provide a comprehensive overview of BlackRock's cyber risk and related programs to a joint session of the Board's Risk and Audit Committees.

Technology and cybersecurity risks at BlackRock are also overseen by the TRCC, a dedicated management risk governance committee and sub-committee of the firmwide ERC. The chair of the TRCC is appointed by the head of Enterprise Risk Management at the Company and its members include the CISO as well as a broad range of senior business stakeholders across BlackRock. The TRCC is responsible for oversight of BlackRock's technology and cybersecurity risk management practices and helps ensure that technology and cybersecurity risks remain within firmwide risk tolerances and technology and cybersecurity risk issues are escalated as appropriate to the ERC and other committees.

BlackRock's cybersecurity risk management and strategy processes, which are discussed in greater detail above, are led by the Company's CISO. As of December 31, 2024, the CISO had over 30 years of experience in information technology with a 26-year concentration in information security, including previously serving as the CISO at several global financial institutions. He also holds the Certified Information Systems Security Professional certification. The CISO works closely with the leadership team and other subject matter experts in the global cybersecurity group, who collectively have extensive prior work experience in various roles involving managing information security, developing cybersecurity strategy, implementing effective information and cybersecurity programs and overseeing cybersecurity controls in technology risk and audit functions, as well as having relevant degrees and industry-leading certifications.

The CISO and members of the TRCC monitor the prevention, detection, mitigation and remediation of cybersecurity incidents through their management of, and participation in, the cybersecurity risk management processes described above, including the operation of BlackRock's incident response plan.

Item 2. Properties

BlackRock's principal office, which is leased, is located at 50 Hudson Yards, New York, New York. BlackRock leases additional office space throughout the world, including Atlanta, Belgrade (Serbia), Budapest, Edinburgh, Gurgaon (India), Hong Kong, London, Mumbai (India), Princeton (New Jersey), San Francisco and Singapore. The Company also owns an 84,500 square foot office building in Wilmington, Delaware and a 43,000 square foot data center in Amherst, New York.

Item 3. Legal Proceedings

For a discussion of the Company's legal proceedings, see Note 16, *Commitments and Contingencies*, in the notes to the consolidated financial statements contained in Part II, Item 8.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

BlackRock’s common stock is listed on the NYSE and is traded under the symbol “BLK”. At the close of business on January 31, 2025, there were 203 common stockholders of record. Common stockholders include institutional or omnibus accounts that hold common stock for many underlying investors.

The following table sets forth for the periods indicated the dividends declared per share for the common stock as reported on the NYSE:

	Cash Dividend Declared
2024	
First Quarter	**$ 5.10**
Second Quarter	**$ 5.10**
Third Quarter	**$ 5.10**
Fourth Quarter	**$ 5.10**
2023	
First Quarter	**$ 5.00**
Second Quarter	**$ 5.00**
Third Quarter	**$ 5.00**
Fourth Quarter	**$ 5.00**

The closing price of BlackRock’s common stock as of February 24, 2025 was $952.80.

DIVIDENDS

On January 29, 2025, the Board of Directors approved BlackRock’s quarterly dividend of $5.21 per share to be paid on March 24, 2025 to stockholders of record at the close of business on March 7, 2025.

ISSUER PURCHASES OF EQUITY SECURITIES

During the three months ended December 31, 2024, the Company made the following purchases of its common stock, which is registered pursuant to Section 12(b) of the Exchange Act.

	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs(1)
October 1, 2024 through October 31, 2024	**5,489**	**$ 942.62**	**—**	**4,180,939**
November 1, 2024 through November 30, 2024	**2,246**	**$ 979.87**	**—**	**4,180,939**
December 1, 2024 through December 31, 2024	**362,622**	**$ 1,046.61**	**358,288**	**3,822,651**
Total	**370,357**	**$ 1,044.67**	**358,288**	

(1) Consists of purchases made by the Company primarily to satisfy income tax withholding obligations of employees and members of the Company’s Board of Directors related to the vesting of certain restricted stock or restricted stock unit awards and purchases made by the Company as part of the share repurchase program that the Company announced in July 2010, which initially authorized the repurchase of 5.1 million shares with no stated expiration. In January 2023, the Company announced that the Board of Directors authorized the repurchase of an additional seven million shares under the Company’s existing share repurchase program, for a total of up to approximately 7.9 million shares of BlackRock common stock.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This report, and other statements that BlackRock may make, may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act, with respect to BlackRock's future financial or business performance, strategies or expectations. Forward-looking statements are typically identified by words or phrases such as "trend," "potential," "opportunity," "pipeline," "believe," "comfortable," "expect," "anticipate," "current," "intention," "estimate," "position," "assume," "outlook," "continue," "remain," "maintain," "sustain," "seek," "achieve," and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "may" and similar expressions.

BlackRock cautions that forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time and may contain information that is not purely historical in nature. Such information may include, among other things, projections and forecasts. There is no guarantee that any forecasts made will come to pass. Forward-looking statements speak only as of the date they are made, and BlackRock assumes no duty to and does not undertake to update forward-looking statements. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

BlackRock has previously disclosed risk factors in its Securities and Exchange Commission ("SEC") reports. These risk factors and those identified elsewhere in this report, among others, could cause actual results to differ materially from forward-looking statements or historical performance and include: (1) the introduction, withdrawal, success and timing of business initiatives and strategies; (2) changes and volatility in political, economic or industry conditions, the interest rate environment, foreign exchange rates or financial and capital markets, which could result in changes in demand for products or services or in the value of assets under management ("AUM"); (3) the relative and absolute investment performance of BlackRock's investment products; (4) BlackRock's ability to develop new products and services that address client preferences; (5) the impact of increased competition; (6) the impact of recent or future acquisitions or divestitures, including the planned acquisitions of HPS Investment Partners ("HPS" or the "HPS Transaction") and Preqin Holdings Limited ("Preqin" or the "Preqin Transaction"), and the acquisition of Global Infrastructure Management, LLC ("GIP" or the "GIP Transaction" and together with the HPS Transaction and the Preqin Transaction, the "Transactions"); (7) BlackRock's ability to integrate acquired businesses successfully, including the Transactions; (8) risks related to the HPS Transaction and the Preqin Transaction, including delays in the expected closing date of the HPS Transaction or the Preqin Transaction, the possibility that either or both of the HPS Transaction or the Preqin Transaction do not close, including, but not limited to, due to the failure to satisfy the closing conditions; the possibility that expected synergies and value creation from the HPS Transaction or the Preqin Transaction will not be realized, or will not be realized within the expected time period; and the risk of impacts to business and operational relationships related to disruptions from the HPS Transaction or the Preqin Transaction; (9) the unfavorable resolution of legal proceedings; (10) the extent and timing of any share repurchases; (11) the impact, extent and timing of technological changes and the adequacy of intellectual property, data, information and cybersecurity protection; (12) the failure to effectively manage the development and use of artificial intelligence; (13) attempts to circumvent BlackRock's operational control environment or the potential for human error in connection with BlackRock's operational systems; (14) the impact of legislative and regulatory actions and reforms, regulatory, supervisory or enforcement actions of government agencies and governmental scrutiny relating to BlackRock; (15) changes in law and policy and uncertainty pending any such changes; (16) any failure to effectively manage conflicts of interest; (17) damage to BlackRock's reputation; (18) increasing focus from stakeholders regarding environmental and social matters; (19) geopolitical unrest, terrorist activities, civil or international hostilities, and other events outside BlackRock's control, including wars, natural disasters and health crises, which may adversely affect the general economy, domestic and local financial and capital markets, specific industries or BlackRock; (20) climate-related risks to BlackRock's business, products, operations and clients; (21) the ability to attract, train and retain highly qualified professionals; (22) fluctuations in the carrying value of BlackRock's economic investments; (23) the impact of changes to tax legislation, including income, payroll and transaction taxes, and taxation on products, which could affect the value proposition to clients and, generally, the tax position of BlackRock; (24) BlackRock's success in negotiating distribution arrangements and maintaining distribution channels for its products; (25) the failure by key third-party providers to fulfill their obligations to BlackRock; (26) operational, technological and regulatory risks associated with BlackRock's major technology partnerships; (27) any disruption to the operations of third parties whose functions are integral to BlackRock's exchange-traded funds ("ETFs") platform; (28) the impact of BlackRock electing to provide support to its products from time to time and any potential liabilities related to securities lending or other indemnification obligations; and (29) the impact of problems, instability or failure of other financial institutions or the failure or negative performance of products offered by other financial institutions.

OVERVIEW

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, "BlackRock" or the "Company") is a leading publicly traded investment management firm with $11.6 trillion of AUM at December 31, 2024. With approximately 21,100 employees in more than 30 countries, BlackRock provides a broad range of investment management and technology services to institutional and retail clients in more than 100 countries across the globe. For further information see Note 1, *Business Overview*, and Note 27, *Segment Information*, in the notes to the consolidated financial statements contained in Part II, Item 8.

On October 1, 2024, BlackRock completed the acquisition of 100% of the issued and outstanding limited liability company interests of GIP for a total consideration, at close, of approximately $3 billion in cash and 6.9 million shares, valued at $5.9 billion. The remaining deferred consideration, all in stock, initially valued at $4.2 billion, is subject to the satisfaction of certain post-closing events. As a result of the closing of the GIP Transaction, BlackRock, Inc. (formerly known as BlackRock Funding, Inc.) ("New BlackRock") became the ultimate parent company of BlackRock Finance, Inc. (formerly known as BlackRock, Inc.) ("Old BlackRock"), GIP and their respective subsidiaries. In addition, New BlackRock became the publicly listed company and retained the ticker symbol "BLK". References herein to BlackRock or the Company for any period (1) prior to the closing of the GIP Transaction on October 1, 2024 refer to Old BlackRock and (2) thereafter refer to New BlackRock. For additional information related to this reorganization, see Note 1, *Business Overview* and Note 3, *Acquisitions* in the notes to the consolidated financial statements contained in Part II, Item 8.

In May 2024, BlackRock completed the acquisition of the remaining equity interest in SpiderRock Advisors ("SRA"), a leading provider of customized option overlay strategies in the United States ("US") wealth market (the "SpiderRock Transaction"). This transaction expands on BlackRock's minority investment in SRA made in 2021 and reinforces BlackRock's commitment to personalized separately managed accounts.

In June 2024, BlackRock announced that it had entered into a definitive agreement to acquire Preqin, a leading independent provider of private markets data, for £2.55 billion (or approximately $3.2 billion based on the GBP/USD foreign exchange rate at December 31, 2024) in cash. The Company believes bringing together Preqin's data and research tools with the complementary workflows of Aladdin and eFront in a unified platform will create a preeminent private markets technology and data provider. The Preqin Transaction is anticipated to close in the first quarter of 2025, subject to customary closing conditions.

In December 2024, BlackRock announced that it had entered into a definitive agreement to acquire 100% of the business and assets of HPS, a leading global credit investment manager with 100% of the consideration paid in BlackRock equity. The equity will generally be delivered in units of a wholly-owned subsidiary of BlackRock ("SubCo Units") which will be exchangeable on a one-for-one basis (subject to certain adjustments) into BlackRock common stock (accordingly, the value of each unit delivered will be based on the price of a share of BlackRock's common stock and the specific terms of the SubCo Units). Approximately 9.2 million SubCo Units and restricted stock units ("RSUs") will be paid at closing. Approximately 2.9 million SubCo Units, will be paid in approximately five years, subject to the satisfaction of certain post-closing conditions. In addition, there is potential for additional consideration to be earned of up to 1.6 million SubCo Units that is based on financial performance milestones measured and paid in approximately five years. Of the total deal consideration, up to 0.7 million units will be used to fund an equity retention pool for HPS employees. In aggregate, inclusive of all SubCo Units paid at closing, eligible to be paid in approximately five years, and potentially earned through achievement of financial performance milestones as well as BlackRock RSUs to be issued in the transaction, the maximum amount of common stock issuable upon exchange of such SubCo Units would be approximately 13.7 million shares. The Company expects the addition of HPS will create an integrated private credit platform to provide both public and private income solutions for clients across their whole portfolios. The HPS Transaction is anticipated to close in mid-2025 subject to regulatory approvals and customary closing conditions.

The following discussion includes a comparison of BlackRock's results for 2024 and 2023. For a discussion of BlackRock's results for 2022 and a comparison of results for 2023 and 2022, see Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations,* of the Company's Annual Report on Form 10-K for the year ended December 31, 2023, which was filed with the SEC on February 23, 2024.

Business Outlook

BlackRock's strategy continues to be guided by the Company's clients' needs and focus on the long-term, which the Company believes better enables it to deliver durable returns for shareholders and create value for all of its stakeholders. BlackRock's highly diversified multi-product platform was created to meet client needs in all market environments and provide clients with choice in how they seek to achieve their unique financial goals. BlackRock is positioned to provide alpha-seeking active, private markets, index and cash management investment strategies across asset classes and geographies. In addition, BlackRock leverages its world-class risk management, analytics and technology capabilities, including the Aladdin platform, on behalf of clients. BlackRock serves a diverse mix of institutional and retail clients across the globe, as well as investors in ETFs, maintaining differentiated client relationships and a fiduciary focus. The diversity of BlackRock's platform facilitates the generation of organic growth in various market environments, and as client preferences evolve. BlackRock's long-term strategy remains to keep alpha at the heart of BlackRock; drive growth in ETFs, private markets, and technology; be the global leader in sustainable investing; and lead as a whole portfolio advisor.

BlackRock's framework for long-term shareholder value creation is predicated on generating differentiated organic growth, leveraging scale to increase operating margins over time, and returning capital to shareholders on a consistent basis. BlackRock's diversified platform, in terms of style, product, client and geography, enables it to generate more stable cash flows through market cycles, positioning BlackRock to invest for the long-term by striking an appropriate balance between investing for future growth and prudent discretionary expense management.

BlackRock has invested to serve the full breadth of client needs. Clients increasingly want to build portfolios that are seamlessly integrated across public and private markets, and that are underpinned by data, risk management and technology. The Company is differentiated in being able to deliver across public and private markets, equity and debt, and in the way that best serves each client – from broad-based ETFs to customized whole portfolio solutions. The Company also offers its Aladdin technology to support integrated public-private portfolios.

2024 was a milestone year of organic and inorganic programmatic actions grounded in client needs, investment capability expansion, technology and scale. Clients entrusted BlackRock with a record $641 billion of net inflows in 2024, led by two consecutive record flows quarters in the second half of the year. The Company's closing of the GIP transaction and planned acquisitions of HPS and Preqin are expected to expand and enhance private markets investment and data capabilities.

BlackRock expects 2025 to be a dynamic investing environment. Mega forces like artificial intelligence ("AI") and an ongoing evolution in debt financing are transforming economies and their long-term growth trajectories. Capital markets will play a key role in these transformations. Private markets assets are an increasingly vital part of capital markets, and blending both public and private markets will be critical in fully capturing growth opportunities.

BlackRock is well-positioned to capitalize on structural growth opportunities against a backdrop of economic and capital markets evolution. The Company has made coordinated investments to build the premier long-term capital partner and technology provider across public and private markets. The acquisition of GIP, and the planned acquisitions of Preqin and HPS, each position BlackRock's platform ahead of evolving client needs and structural industry trends.

BlackRock has built a broad private markets platform with $212 billion of AUM across infrastructure, private credit, real estate, private equity and multi-alternatives. As of December 31, 2024, BlackRock had approximately $45 billion of committed capital to deploy for institutional clients in a variety of private markets strategies, and remains confident in its ability to accelerate growth as a leader in private markets. BlackRock also manages $76 billion in liquid alternatives, as well as $90 billion in liquid credit strategies, included within fixed income AUM. With the close of the GIP transaction, and the planned acquisition of HPS, BlackRock's alternatives platform is expected to represent approximately $600 billion in client assets making it a top five alternatives provider.

The private markets – and clients' allocations to them – are expected to continue to grow. Standardized, transparent private markets data and analytics will be increasingly important. As with Aladdin, BlackRock believes it can add even more value to Preqin as both a user and provider of private markets data and risk analytics. Aladdin expanded into new asset classes and markets as BlackRock and its clients evolved, and it expects the same for Preqin.

In addition to private markets, BlackRock is executing on a strong opportunity set across multiple growth channels. These include ETFs, whole portfolio solutions like outsourced mandates and models, and technology.

The ETF industry has been growing rapidly, driven by structural tailwinds including the use of ETFs as active tools, the migration from commission-based to fee-based wealth management, growth in model portfolios, expansion of digital wealth platforms, and the modernization of the bond market. BlackRock's ETF growth strategy is centered on increasing scale and pursuing global growth themes in client and product segments, including Core, Strategic, which includes Fixed Income, Factors, Sustainable and Thematic ETFs, and Precision Exposures. BlackRock views ETFs as a technology that facilitates investing, and ETFs have become core to asset management. The Company believes that ETFs will continue to be a structural growth area as clients turn to ETFs as the preferred vehicle for investing strategies of all types. BlackRock has been a leader in expanding the market for ETFs by making them more accessible and by delivering new asset classes like bonds or cryptocurrency and investment strategies like active. Approximately a quarter of 2024 ETF net inflows of $390 billion were into products launched in the last five years. Active ETFs delivered $22 billion in net inflows in 2024, while BlackRock's Bitcoin exchange-traded product ("ETP") was the largest ETF launch in history, growing to over $50 billion of AUM in less than a year. BlackRock will continue to innovate at the product and portfolio level and accelerate distribution capabilities to deliver differentiated investment solutions.

As the asset management landscape shifts globally from individual product selection to a whole-portfolio approach, BlackRock's strategy is focused on creating outcome-oriented client solutions for both retail investors and institutions. This includes having a diverse platform of alpha-seeking active, index and private markets products, as well as enhanced distribution and portfolio construction technology offerings. Digital wealth tools are an important component of BlackRock's retail strategy, as BlackRock scales and customizes model portfolios, extends Aladdin Wealth and digital wealth partnerships globally, and helps advisors build better portfolios through portfolio construction and risk management, powered by Aladdin. BlackRock has also seen strong momentum in outsourcing solutions among institutional clients, including the funding of several significant mandates in 2024, and anticipates continued outsourcing opportunities in the future.

BlackRock continues to invest in technology services offerings, which enhance the ability to manage portfolios and risk, effectively serve clients and operate efficiently. Market volatility, growing cost pressures, and complexity in optimizing whole portfolios underscore the need for enterprise operating and risk management technology, and should continue to drive demand for holistic and flexible technology solutions. BlackRock continues to evolve and enable clients to further simplify their operating infrastructure with Aladdin. Clients increasingly want to tailor how they use Aladdin to meet their specific needs, and BlackRock is providing them with choice and flexibility. Through the integration of Aladdin and eFront, clients are able to better manage and analyze risk across their whole portfolio spanning public and private markets. BlackRock is empowering clients with data and opening Aladdin by creating connectivity with ecosystem providers and third-party technology solutions, which include asset servicers, cloud providers, digital asset platforms, trading systems and others. This connectivity helps clients work in their Aladdin environments with a more customized and seamless end-to-end experience. Investments in Aladdin AI copilots, enhancements in openness supporting ecosystem partnerships, and advancing whole portfolio solutions including private markets and digital assets are expected to further augment the value of using Aladdin. BlackRock's planned acquisition of Preqin is expected to expand capabilities beyond private markets investment management and technology to data.

Across BlackRock, many clients are focusing on the impact of sustainability factors on their portfolios. This shift has been driven by an increased understanding of how sustainability-related factors can affect economic growth, asset values, and financial markets as a whole. As a fiduciary, BlackRock is committed to providing clients with choice and then executing in accordance with their chosen objectives – for some clients, this includes investing in sustainable strategies. The Company aims to deliver the best risk-adjusted returns within the mandates clients choose, underpinned by research, data, and analytics.

BlackRock's investment management revenue is primarily comprised of fees earned as a percentage of AUM and, in some cases, performance fees, which are normally expressed as a percentage of fund returns to the client. Numerous factors, including price movements in the equity, debt or currency markets, or in the price of real assets, commodities or alternative investments in which BlackRock invests on behalf of clients, and BlackRock's ability to maintain strong investment performance, could impact BlackRock's AUM, revenue and earnings.

Central banks globally have taken actions to reduce or maintain interest rates, after a rapid rate hiking regime in 2022 and much of 2023, in an effort to moderate inflation. BlackRock's business is directly and indirectly affected by changes in global interest rates. Changes in global interest rates may cause BlackRock's AUM to fluctuate and introduce volatility to the Company's base fees, net income and operating cash flows. BlackRock's business may also be impacted by governmental changes, as well as potential regulations, foreign and trade policies and fiscal spending that may arise as a result of such changes. See Part I, Item 1A, *Risk Factors* herein for information on the possible future effects of changes in global interest rates and governmental changes on the Company's results.

BlackRock manages $2.9 trillion in fixed income assets, nearly two-thirds of which are owned by institutions for strategic or liability-matching purposes. BlackRock believes it is well positioned for a stabilizing rate environment due to the breadth, diversification and investment performance of its fixed income platform which encompasses active, ETFs and non-ETF index fixed income products, and a range of strategies, including unconstrained, high yield, total return and short-duration.

BlackRock manages $6.3 trillion of equity assets across markets globally. Beta divergence between equity markets, where certain markets perform differently than others, may lead to an increase in the proportion of BlackRock AUM weighted toward lower fee equity products, resulting in a decline in BlackRock's effective fee rate. Divergent market factors may also erode the correlation between the growth rates of AUM and investment advisory and administration fees (collectively "base fees") and securities lending revenue.

BlackRock believes its strategy aligns with expected future client demand and structural growth opportunities in areas including private markets, such as infrastructure and private credit; ETFs; whole portfolio solutions including outsourcing and models; and integrated public-private markets enterprise technology through Aladdin, eFront and Preqin upon the transaction's closing.

BlackRock enters 2025 with strong momentum across its franchise, including its newly enhanced private markets platform. The Company is positioned ahead of market opportunities that it believes will drive outsized growth for BlackRock in the years to come.

EXECUTIVE SUMMARY

(in millions, except per share data)	2024	2023
GAAP basis[1]:		
Total revenue	**$ 20,407**	$ 17,859
Total expense	**12,833**	11,584
Operating income	**$ 7,574**	$ 6,275
Operating margin	***37.1 %***	*35.1 %*
Nonoperating income (expense), less net income (loss) attributable to noncontrolling interests	**578**	706
Income tax expense	**1,783**	1,479
Net income attributable to BlackRock	**$ 6,369**	$ 5,502

(1) Accounting principles generally accepted in the United States ("GAAP").
(2) As adjusted items are described in more detail in *Non-GAAP Financial Measures*.
(3) Total BlackRock stockholders' equity, divided by total shares outstanding at December 31 of the respective year-end.

2024 Compared With 2023

GAAP. Operating income of $7.6 billion increased $1.3 billion and operating margin of 37.1% increased 200 bps from 2023. Increases in operating income and operating margin reflected higher base fees, driven by the positive impact of markets on average AUM, organic base fee growth and fees on AUM acquired in the GIP Transaction, as well as higher performance fees and technology services revenue, partially offset by higher employee compensation and benefits expense, sales, asset and account expense, and general and administration expense. Expense for 2024 was impacted by the GIP Transaction, including nonrecurring retention-related deferred compensation expense, acquisition-related costs and amortization of intangible assets acquired in the GIP Transaction. In addition, expense for 2024 included a $50 million noncash impairment charge related to certain indefinite-lived open-end management contracts. Expense for 2023 included a restructuring charge of $61 million in connection with initiatives to reorganize specific platforms, primarily Aladdin and private markets, to stay ahead of client needs.

Nonoperating income (expense) less net income (loss) attributable to noncontrolling interests ("NCI") decreased $128 million from 2023, driven primarily by lower mark-to-market revaluation of private equity co-investments and higher interest expense, partially offset by higher interest and dividend income, a pre-tax gain of approximately $66 million in connection with a transaction related to a minority investment in EquiLend Holdings, LLC (the "EquiLend Transaction"), and higher mark-to-market gains on unhedged seed capital investments and certain minority investments.

Income tax expense for 2024 included discrete tax benefits of $137 million recognized in connection with the reorganization and establishment of a more efficient global intellectual property and technology platform and corporate structure, $63 million related to the realization of capital losses from changes in the Company's organizational tax structure, $37 million related to vested stock-based compensation awards, and a net noncash discrete tax expense of $14 million related to the revaluation of deferred income tax liabilities. Income tax expense for 2023 included $242 million discrete tax net benefits related to the resolution of certain outstanding tax matters and stock-based compensation awards that vested in 2023.

Earnings per diluted common share increased $5.50, or 15%, from 2023, primarily reflecting higher operating income, partially offset by a higher effective tax rate and lower nonoperating income.

As Adjusted. Operating income of $8.1 billion increased $1.5 billion and operating margin of 44.5% increased 280 bps from 2023. Earnings per diluted common share increased $5.84, or 15%, from 2023, reflecting higher operating income, partially offset by a higher effective tax rate and lower nonoperating income. The acquisition related expenses and the noncash impairment charge of $50 million described above have been excluded from as adjusted results for 2024. In addition, income tax expense for 2024 excluded the $137 million of benefit and the $14 million net noncash tax expense described above. The pre-tax restructuring charge of $61 million described above has been excluded from as adjusted results for 2023.

See *Non-GAAP Financial Measures* for further information on as adjusted items and the reconciliation to GAAP.

For further discussion of BlackRock's revenue, expense, nonoperating results and income tax expense, see *Discussion of Financial Results* herein.

NON-GAAP FINANCIAL MEASURES

BlackRock reports its financial results in accordance with GAAP; however, management believes evaluating the Company's ongoing operating results may be enhanced if investors have additional non-GAAP financial measures. Adjustments to GAAP financial measures ("non-GAAP adjustments") include certain items management deems nonrecurring or that occur infrequently, transactions that ultimately will not impact BlackRock's book value or certain tax items that do not impact cash flow. Management reviews non-GAAP financial measures, in addition to GAAP financial measures, to assess ongoing operations and considers them to be helpful, for both management and investors, in evaluating BlackRock's financial performance over time. Management also uses non-GAAP financial measures as a benchmark to compare its performance with other companies and to enhance comparability for the reporting periods presented. Non-GAAP financial measures may pose limitations because they do not include all of BlackRock's revenue and expense. BlackRock's management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Non-GAAP financial measures may not be comparable to other similarly titled measures of other companies.

Computations and reconciliations for all periods are derived from the consolidated statements of income as follows:

(1) Operating income, as adjusted, and operating margin, as adjusted:

(in millions)	2024	2023
Operating income, GAAP basis	**$ 7,574**	$ 6,275
Non-GAAP expense adjustments:		
Compensation expense related to appreciation (depreciation) on deferred cash compensation plans (a)	**43**	57
Amortization and impairment of intangible assets (b)	**291**	151
Acquisition-related compensation costs (b)	**148**	17
Acquisition-related transaction costs (b)[(1)]	**90**	7
Contingent consideration fair value adjustments (b)	**(36)**	3
Lease costs - New York (c)	**—**	14
Restructuring charge (d)	**—**	61
Reduction of indemnification asset (e)[(1)]	**—**	8
Operating income, as adjusted	**$ 8,110**	$ 6,593
Revenue, GAAP basis	**$ 20,407**	$ 17,859
Non-GAAP adjustments:		
Distribution fees	**(1,273)**	(1,262)
Investment advisory fees	**(898)**	(789)
Revenue used for operating margin measurement	**$ 18,236**	$ 15,808
Operating margin, GAAP basis	**37.1 %**	35.1 %
Operating margin, as adjusted	**44.5 %**	41.7 %

(1) Amount included within general and administration expense.

(2) Nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted:

(in millions)	2024	2023
Nonoperating income (expense), GAAP basis	**$ 721**	$ 880
Less: Net income (loss) attributable to NCI	**143**	174
Nonoperating income (expense), net of NCI	**578**	706
Less: Hedge gain (loss) on deferred cash compensation plans (a)	**45**	58
Nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted	**$ 533**	$ 648

(3) Net income attributable to BlackRock, Inc., as adjusted:

(in millions, except per share data)	2024	2023
Net income attributable to BlackRock, Inc., GAAP basis	**$ 6,369**	$ 5,502
Non-GAAP adjustments[(1)]:		
Net impact of hedged deferred cash compensation plans (a)	**(1)**	(1)
Amortization and impairment of intangible assets (b)	**218**	114
Acquisition-related compensation costs (b)	**110**	12
Acquisition-related transaction costs (b)	**66**	5
Contingent consideration fair value adjustments (b)	**(27)**	3
Lease costs - New York (c)	**—**	11
Restructuring charge (d)	**—**	46
Income tax matters	**(123)**	—
Net income attributable to BlackRock, Inc., as adjusted	**$ 6,612**	$ 5,692
Diluted weighted-average common shares outstanding	**151.6**	150.7
Diluted earnings per common share, GAAP basis	**$ 42.01**	$ 36.51
Diluted earnings per common share, as adjusted	**$ 43.61**	$ 37.77

(1) Non-GAAP adjustments, excluding income tax matters, are net of tax.

(1) Operating income, as adjusted, and operating margin, as adjusted: Management believes operating income, as adjusted, and operating margin, as adjusted, are effective indicators of BlackRock's financial performance over time, and, therefore, provide useful disclosure to investors. Management believes that operating margin, as adjusted, reflects the Company's long-term ability to manage ongoing costs in relation to its revenues. The Company uses operating margin, as adjusted, to assess the Company's financial performance, to determine the long-term and annual compensation of the Company's senior-level employees and to evaluate the Company's relative performance against industry peers. Furthermore, this metric eliminates margin variability arising from the accounting of revenues and expenses related to distributing different product structures in multiple distribution channels utilized by asset managers.

- Operating income, as adjusted, includes the following non-GAAP expense adjustments:

  (a) *Compensation expense related to appreciation (depreciation) on deferred cash compensation plans*. The Company excludes compensation expense related to the market valuation changes on certain deferred cash compensation plans, which the Company hedges economically. For these deferred cash compensation plans, the final value of the deferred amount to be distributed to employees in cash upon vesting is determined based on the returns on specified investment funds. The Company recognizes compensation expense for the appreciation (depreciation) of the deferred cash compensation liability in proportion to the vested amount of the award during a respective period, while the net gain (loss) to economically hedge these plans is immediately recognized in nonoperating income (expense), which creates a timing difference impacting net income. This timing difference will reverse and offset to zero over the life of the award at the end of the multi-year vesting period. Management believes excluding market valuation changes related to the deferred cash compensation plans in the calculation of operating income, as adjusted, provides useful disclosure to both management and investors of the Company's financial performance over time as these amounts are economically hedged, while also increasing comparability with other companies.

  (b) *Acquisition-related costs*. Acquisition-related costs include adjustments related to amortization and noncash impairment of intangible assets, other acquisition-related costs, including professional services expense and compensation costs for nonrecurring retention-related deferred compensation, and contingent consideration fair value adjustments incurred in connection with certain acquisitions. Management believes excluding the impact of these expenses when calculating operating income, as adjusted, provides a helpful indication of the Company's financial performance over time, thereby providing helpful information for both management and investors while also increasing comparability with other companies.

  (c) *Lease costs – New York*. In 2023, the Company continued to recognize lease expense within general and administration expense for both its current headquarters located at 50 Hudson Yards in New York and prior headquarters until the Company's lease on its prior headquarters expired in April 2023. The Company began lease payments related to its current headquarters in May 2023, but began recording lease expense in August 2021 when it obtained access to the building to begin its tenant improvements. Prior to the Company's move to its current headquarters in February 2023, the impact of lease costs related to 50 Hudson Yards was excluded from operating income, as adjusted. In February 2023, the Company completed the majority of its move to 50 Hudson Yards and no longer excluded the impact of these lease costs. Subsequently, from February 2023 through April 2023, the Company excluded the impact of lease costs related to the Company's prior headquarters. Management believes excluding the impact of these respective New York lease costs ("Lease costs – New York") when calculating operating income, as adjusted, is useful to assess the Company's financial performance and ongoing operations, and enhances comparability among periods presented.

  (d) *Restructuring charge*. In the fourth quarter of 2023, the Company recorded a restructuring charge, comprised of severance and compensation expense for accelerated vesting of previously granted deferred compensation awards, in connection with initiatives to reorganize specific platforms, primarily Aladdin and private markets. Management believes excluding the impact of these restructuring charges when calculating operating income, as adjusted, is useful to assess the Company's financial performance and ongoing operations, and enhances comparability among periods presented.

  (e) *Reduction of indemnification asset.* In connection with a previous acquisition, BlackRock recorded an $8 million indemnification asset. Due to the resolution of certain tax matters in the third quarter of 2023, BlackRock recorded $8 million of general and administration expense to reflect the reduction of the indemnification asset and an offsetting $8 million tax benefit. The $8 million general and administrative expense and $8 million tax benefit have been excluded from as adjusted results as there was no impact on BlackRock's book value.

- Revenue used for calculating operating margin, as adjusted, is reduced to exclude all of the Company's distribution fees, which are recorded as a separate line item on the consolidated statements of income, as well as a portion of investment advisory fees received that is used to pay distribution and servicing costs. For certain products, based on distinct arrangements, distribution fees are collected by the Company and then passed-through to third-party client intermediaries. For other products, investment advisory fees are collected by the Company and a portion is passed-through to third-party client intermediaries. However, in both structures, the third-party client intermediary similarly owns the relationship with the retail client and is responsible for distributing the product and servicing the client. The amount of distribution and investment advisory fees fluctuates each period primarily based on a predetermined percentage of the value of AUM during the period. These fees also vary based on the type of investment product sold and the geographic location where it is sold. In addition, the Company may waive fees on certain products that could result in the reduction of payments to the third-party intermediaries.

(2) Nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted: Management believes nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted, is an effective measure for reviewing BlackRock’s nonoperating contribution to its results and provides comparability of this information among reporting periods. Nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted, excludes the gain (loss) on the economic hedge of certain deferred cash compensation plans. As the gain (loss) on investments and derivatives used to hedge these compensation plans over time substantially offsets the compensation expense related to the market valuation changes on these deferred cash compensation plans, which is included in operating income, GAAP basis, management believes excluding the gain (loss) on the economic hedge of the deferred cash compensation plans when calculating nonoperating income (expense), less net income (loss) attributable to NCI, as adjusted, provides a useful measure for both management and investors of BlackRock’s nonoperating results that impact book value.

(3) Net income attributable to BlackRock, Inc., as adjusted: Management believes net income attributable to BlackRock, Inc., as adjusted, and diluted earnings per common share, as adjusted, are useful measures of BlackRock’s profitability and financial performance. Net income attributable to BlackRock, Inc., as adjusted, equals net income attributable to BlackRock, Inc., GAAP basis, adjusted for certain items management deems nonrecurring or that occur infrequently, transactions that ultimately will not impact BlackRock’s book value or certain tax items that do not impact cash flow.

For each period presented, the non-GAAP adjustments were tax effected at the respective blended rates applicable to the adjustments. Amounts for income tax matters in 2024 include a discrete tax benefit of $137 million recognized in connection with the reorganization and establishment of a more efficient global intellectual property and technology platform and corporate structure. This discrete tax benefit has been excluded from as adjusted results due to the nonrecurring nature of the intellectual property reorganization. In addition, amounts for 2024 include a net noncash expense of $14 million associated with the revaluation of deferred tax liabilities related to intangible assets and goodwill as a result of tax rate changes. This discrete tax expense has been excluded from the as adjusted results as it does not have a cash flow impact as well as to ensure comparability among periods presented.

Per share amounts reflect net income attributable to BlackRock, Inc., as adjusted, divided by diluted weighted-average common shares outstanding.

(4) Annual Contract Value ("ACV"): Management believes ACV is an effective metric for reviewing BlackRock’s technology services’ ongoing contribution to its operating results and provides comparability of this information among reporting periods while also providing a useful supplemental metric for both management and investors of BlackRock’s growth in technology services revenue over time, as it is linked to the net new business in technology services. ACV represents forward-looking, annualized estimated value of the recurring subscription fees under client contracts, assuming all client contracts that come up for renewal are renewed, unless we have received a notice of termination, even though such notice may not be effective until a later date. ACV also includes the annualized estimated value of new sales, for existing and new clients, when we execute client contracts, even though the recurring fees may not be effective until a later date and excludes nonrecurring fees such as implementation and consulting fees.

ASSETS UNDER MANAGEMENT

AUM for reporting purposes generally is based upon how investment advisory and administration fees are calculated for each portfolio. Net asset values, total assets, committed assets or other measures may be used to determine portfolio AUM.

The following table presents the component changes in BlackRock's AUM for 2024 and 2023.

(in millions)	2024	2023
Beginning AUM	$ 10,008,995	$ 8,594,485
Net inflows (outflows):		
Long-term	488,621	209,450
Cash management	152,730	79,245
Total net inflows (outflows)	641,351	288,695
Acquisitions(1)	73,949	2,177
Market change	992,964	1,073,550
FX impact(2)	(166,008)	50,088
Total change	1,542,256	1,414,510
Ending AUM	$ 11,551,251	$ 10,008,995

(1) Amount for 2024 includes AUM attributable to the GIP Transaction and the SpiderRock Transaction. Amount for 2023 includes AUM attributable to the acquisition of Kreos Capital in August 2023 (the "Kreos Transaction").
(2) Foreign exchange reflects the impact of translating non-US dollar denominated AUM into US dollars for reporting purposes.

BlackRock has historically grown AUM through organic growth and acquisitions. Management believes that the Company will be able to continue to grow AUM organically by focusing on strong investment performance, efficient delivery of beta for index products, client service, developing new products and optimizing distribution capabilities.

(1) Amounts include AUM attributable to the GIP Transaction and the SpiderRock Transaction.
(2) Foreign exchange reflects the impact of translating non-US dollar denominated AUM into US dollars for reporting purposes.
(3) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.
(4) Amounts include cryptocurrency and commodity ETFs and ETPs.

AUM increased $1.5 trillion to $11.6 trillion at December 31, 2024 from $10.0 trillion at December 31, 2023, driven primarily by net market appreciation, net inflows, led by flows into equity, bond and cryptocurrency products, cash management, and significant outsourcing mandates, and AUM added from the GIP Transaction, partially offset by the negative impact of foreign exchange movements.

Net market appreciation of $993 billion was primarily driven by global equity market appreciation.

AUM decreased $166 billion due to the impact of foreign exchange movements, primarily due to the strengthening of the US dollar, largely against the euro, the Japanese yen, the Canadian dollar and the British pound.

For further discussion on AUM, see Part I, Item 1 – *Business – Assets Under Management*.

Component Changes in AUM for 2023

The following table presents the component changes in AUM by client type and product type for 2023.

(1) Amounts include AUM attributable to the Kreos Transaction.
(2) Foreign exchange reflects the impact of translating non-US dollar denominated AUM into US dollars for reporting purposes.
(3) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.
(4) Amounts include commodity ETFs and ETPs.

AUM increased $1.4 trillion to $10.0 trillion at December 31, 2023 from $8.6 trillion at December 31, 2022, driven primarily by net market appreciation, net inflows, led by flows into bond and equity ETFs, cash management, significant outsourcing mandates and growth in private markets.

Net market appreciation of $1.1 trillion was primarily driven by global equity market appreciation.

AUM increased $50 billion due to the impact of foreign exchange movements, primarily due to the weakening of the US dollar largely against the British pound and the euro, partially offset by the strengthening of the US dollar against the Japanese yen.

DISCUSSION OF FINANCIAL RESULTS

Introduction

The Company derives a substantial portion of its revenue from investment advisory and administration fees, which are recognized as the services are performed over time because the customer is receiving and consuming the benefits as they are provided by the Company. Fees are primarily based on agreed-upon percentages of AUM and recognized for services provided during the period, which are distinct from services provided in other periods. Such fees are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. Net inflows or outflows represent the sum of new client assets, additional fundings from existing clients (including dividend reinvestment), withdrawals of assets from, and termination of, client accounts and distributions to investors representing return of capital and return on investments. Market appreciation or depreciation includes current income earned on, and changes in the fair value of, securities held in client accounts. Foreign exchange translation reflects the impact of translating non-US dollar denominated AUM into US dollars for reporting purposes.

The Company also earns revenue by lending securities on behalf of clients, primarily to highly rated banks and broker-dealers. The securities loaned are secured by collateral in the form of cash or securities, with minimum collateral generally ranging from approximately 102% to 112% of the value of the loaned securities. Generally, the revenue earned is shared between the Company and the funds or accounts managed by the Company from which the securities are borrowed.

Investment advisory agreements for certain separate accounts and investment funds provide for performance fees based upon relative and/or absolute investment performance, in addition to base fees based on AUM. Investment advisory performance fees generally are earned after a given period of time when investment performance exceeds a contractual threshold, and when it is determined that the fees are no longer probable of significant reversal. As such, the timing of recognition of performance fees may increase the volatility of the Company's revenue and earnings. The magnitude of performance fees can fluctuate quarterly due to the timing of carried interest recognition on private market products and a greater number and size of liquid products with performance measurement periods that end in the third and fourth quarters.

The Company offers investment management technology systems, risk management services, wealth management and digital distribution tools, all on a fee basis. Clients include banks, insurance companies, official institutions, pension funds, asset managers, retail distributors and other investors. Fees earned for technology services are primarily recorded as services are performed over time and are generally determined using the value of positions on the Aladdin platform, or on a fixed-rate basis. Revenue derived from the sale of software licenses is recognized upon the granting of access rights.

The Company earns distribution and service fees for distributing investment products and providing support services to investment portfolios. The fees are primarily based on AUM and are recognized when the amount of fees is known.

The Company advises global financial institutions, regulators, and government entities across a range of risk, regulatory, capital markets and strategic services. Fees earned for advisory services, which are included in advisory and other revenue, are determined using fixed-rate fees and are recognized over time as the related services are completed.

The Company earns fees for transition management services primarily comprised of commissions recognized in connection with buying and selling securities on behalf of its customers. Commissions related to transition management services, which are included in advisory and other revenue, are recorded on a trade-date basis as transactions occur.

Beginning in the first quarter of 2024, BlackRock updated the presentation of the Company's expense line items within the consolidated statements of income by including a new "sales, asset and account expense" income statement caption. Such expense line items have been recast for 2023 to conform to this new presentation. For a recast of 2023 expense line items, see page 12 of Exhibit 99.1 to the Current Report on Form 8-K furnished on April 12, 2024. Operating expense reflects employee compensation and benefits, sales, asset and account expense, general and administration expense, and amortization and impairment of intangible assets.

- Employee compensation and benefits expense includes salaries, commissions, temporary help, incentive compensation, employer payroll taxes, severance and related benefit costs.
- Sales, asset and account expense includes distribution and servicing costs, direct fund expense, and sub-advisory and other expense. These expenses primarily vary over time with fluctuations in AUM, number of shareholder accounts, or other attributes directly related to volume of business.
  - Distribution and servicing costs, which are primarily AUM driven, include payments to third parties, primarily associated with distribution and servicing of client investments in certain Company products.
  - Direct fund expense primarily consists of third-party non-advisory expenses incurred by the Company related to certain funds for the use of index trademarks, reference data for indices, custodial services, fund administration, fund accounting, transfer agent services, shareholder reporting services, legal expense, audit and tax services as well as other fund-related expenses directly attributable to the non-advisory operations of the fund.
  - Sub-advisory and other expense is primarily related to the contracts where third-party advisors provide investment advisory services on the Company's behalf.
- General and administration expense includes marketing and promotional (including travel and entertainment expense), occupancy and office-related, portfolio services (including market data costs), technology, professional services, communications, contingent consideration fair value adjustments, product launch costs, the net impact of foreign currency remeasurement, and other general and administration expense.

Approximately 80% of the Company's revenue is generated in US dollars. The Company's revenue and expense generated in foreign currencies (primarily the euro and British pound) are impacted by foreign exchange rates. Any effect of foreign exchange rate change on revenue is partially offset by a change in expense driven by the Company's considerable non-dollar expense base related to its operations outside the US.

Nonoperating income (expense) includes the effect of changes in the valuations on investments and earnings on equity method investments as well as interest and dividend income and interest expense. The Company primarily holds seed and co-investments in sponsored investment products that invest in a variety of asset classes, including private equity, private credit, hedge funds and real assets. Investments generally are made for co-investment purposes, to establish a performance track record or for regulatory purposes, including Federal Reserve Bank stock. The Company does not engage in proprietary trading activities that could conflict with the interests of its clients.

In addition, nonoperating income (expense) includes the impact of changes in the valuations of consolidated sponsored investment products ("CIPs"). The portion of nonoperating income (expense) not attributable to the Company is allocated to NCI on the consolidated statements of income.

Revenue

The table below presents detail of revenue for 2024 and 2023 and includes the product type mix of base fees and securities lending revenue and performance fees.

(in millions)	2024	2023

Cash management	**7 %**	6 %	**7 %**	8 %
Total AUM	**100 %**	**100 %**	**100 %**	**100 %**

(1) Average AUM is calculated as the average of the month-end spot AUM amounts for the trailing thirteen months.
(2) Amounts include cryptocurrency and commodity ETFs and ETPs.

Revenue increased $2.5 billion, or 14%, from 2023, primarily driven by the positive impact of market beta on average AUM, organic base fee growth, and fees on AUM acquired in the GIP Transaction, as well as higher performance fees and technology services revenue.

Investment advisory, administration fees and securities lending revenue of $16.1 billion in 2024 increased $1.7 billion from $14.4 billion in 2023, primarily driven by the impact of market beta on average AUM, organic base fee growth and approximately $230 million of fees related to AUM acquired in the GIP Transaction, partially offset by lower securities lending revenue. Securities lending revenue of $615 million decreased $60 million from $675 million in 2023, primarily reflecting lower spreads, partially offset by higher average balances of securities on loan.

Investment advisory performance fees of $1.2 billion in 2024 increased $653 million from $554 million in 2023, primarily driven by higher revenue from liquid alternative products, including strong performance from a single hedge fund in 2024, and higher revenue from long-only and private market products.

Technology services revenue of $1.6 billion in 2024 increased $118 million from $1.5 billion in 2023, reflecting sustained demand for Aladdin technology offerings and the successful onboarding of a number of new clients.

Advisory and other revenue of $224 million in 2024 increased $65 million from $159 million in 2023, reflecting the impact of presenting earnings (losses) from certain equity method minority investments within nonoperating income (expense) beginning in the first quarter of 2024 and higher transition management assignments, partially offset by lower revenue from advisory assignments.

Expense

The following table presents expense for 2024 and 2023.

(in millions)	2024	2023
Expense:		
Employee compensation and benefits	**$ 6,546**	$ 5,779
Sales, asset and account expense(1):		
Distribution and servicing costs	**2,171**	2,051
Direct fund expense	**1,464**	1,331

Contingent consideration fair value adjustments	**(36)**	3
Other general and administration	**270**	252
Total general and administration expense	**2,221**	2,095
Restructuring charge	**—**	61
Amortization and impairment of intangible assets	**291**	151
Total expense	**$ 12,833**	**$ 11,584**

(1) Beginning in the first quarter of 2024, BlackRock updated the presentation of the Company's expense line items within the consolidated statements of income by including a new "sales, asset and account expense" income statement caption. Such expense line items have been recast for 2023 to conform to this new presentation. For a recast of 2023 expense line items, see page 12 of Exhibit 99.1 to the Current Report on Form 8-K furnished on April 12, 2024.

Expense increased $1.2 billion, or 11%, from 2023, reflecting higher employee compensation and benefits expense, sales, asset and account expense, amortization and impairment of intangible assets and general and administration expense. Expense for 2024 was impacted by the previously described expenses incurred in connection with the GIP Transaction and the $50 million noncash impairment charge(1). Expense for 2023 included a previously mentioned restructuring charge of $61 million(1).

Employee compensation and benefits expense of $6.5 billion in 2024 increased $767 million from $5.8 billion in 2023, reflecting higher incentive compensation, primarily as a result of higher operating income and performance fees. 2024 employee compensation and benefits expense was also impacted by the GIP Transaction, including nonrecurring retention-related deferred compensation expense(1).

Sales, asset and account expense of $3.8 billion in 2024 increased $277 million from $3.5 billion in 2023, driven by higher distribution and servicing costs and direct fund expense, primarily reflecting higher average AUM.

General and administration expense of $2.2 billion in 2024 increased $126 million from $2.1 billion in 2023, primarily associated with acquisition-related costs(1) in connection with the GIP Transaction, including transaction costs recorded in professional services expense, and higher technology expense, partially offset by lower contingent consideration fair value adjustments.

Restructuring charge(1) of $61 million, comprised of severance and compensation expense for accelerated vesting of previously granted deferred compensation awards, was recorded in 2023, as previously described.

Amortization and impairment of intangible assets(1) of $291 million in 2024 increased $140 million from $151 million in 2023, primarily due to the amortization of intangible assets acquired in the GIP Transaction and the previously described $50 million noncash impairment charge.

(1) These expenses have been excluded from the Company's as adjusted financial results under the expense adjustments for acquisition-related costs and restructuring charge, as applicable. See *Non-GAAP Financial Measures* for further information on as adjusted items. See Note 12, *Intangible Assets*, in the notes to the consolidated financial statements and *Critical Accounting Policies and Estimates* for further information on the impairment charge.

Nonoperating Results

The summary of nonoperating income (expense), less net income (loss) attributable to NCI for 2024 and 2023 was as follows:

(in millions)	2024	2023
Nonoperating income (expense), GAAP basis	**$ 721**	$ 880
Less: Net income (loss) attributable to NCI	**143**	174
Nonoperating income (expense), net of NCI	**578**	706
Less: Hedge gain (loss) on deferred cash compensation plans(1)	**45**	58
Nonoperating income (expense), net of NCI, as adjusted(2)	**$ 533**	$ 648

(in millions)	2024	2023
Net gain (loss) on investments, net of NCI		
Private equity	**$ (10)**	$ 349
Real assets	**14**	13
Other alternatives(3)	**41**	49
Other investments(4)	**127**	66
Hedge gain (loss) on deferred cash compensation plans(1)	**45**	58
Subtotal	**217**	535
Other income/gain (expense/loss)(5)	**132**	(10)
Total net gain (loss) on investments, net of NCI	**349**	525
Interest and dividend income	**767**	473
Interest expense	**(538)**	(292)
Net interest income (expense)	**229**	181
Nonoperating income (expense), net of NCI	**578**	706
Less: Hedge gain (loss) on deferred cash compensation plans(1)	**45**	58
Nonoperating income (expense), net of NCI, as adjusted(2)	**$ 533**	$ 648

(1) Amount relates to the gain (loss) from economically hedging BlackRock's deferred cash compensation plans.
(2) Management believes nonoperating income (expense), net of NCI, as adjusted, is an effective measure for reviewing BlackRock's nonoperating results, which ultimately impacts BlackRock's book value. See *Non-GAAP Financial Measures* for further information on other non-GAAP financial measures.
(3) Amounts primarily include net gains (losses) related to credit funds, direct hedge fund strategies and hedge fund solutions.
(4) Amounts primarily include net gains (losses) related to BlackRock's seed investment portfolio, net of the impact of certain hedges.
(5) Amounts for 2024 include earnings (losses) from certain equity method minority investments, which the Company recorded within nonoperating income (expense) beginning in the first quarter of 2024 and noncash pre-tax gains (losses) related to the revaluation of certain minority investments. In addition, amount for 2024 includes a pre-tax gain of approximately $66 million in connection with a transaction related to a minority investment in the EquiLend Transaction and a noncash pre-tax gain in connection with the SpiderRock Transaction of approximately $19 million.

Income Tax Expense

	GAAP		As Adjusted	
(in millions)	2024	2023	2024	2023
Operating income(1)	**$ 7,574**	$ 6,275	**$ 8,110**	$ 6,593
Total nonoperating income (expense)(1)(2)	**$ 578**	$ 706	**$ 533**	$ 648
Income before income taxes(2)	**$ 8,152**	$ 6,981	**$ 8,643**	$ 7,241
Income tax expense	**$ 1,783**	$ 1,479	**$ 2,031**	$ 1,549
Effective tax rate	**21.9 %**	21.2 %	**23.5 %**	21.4 %

(1) As adjusted items are described in more detail in *Non-GAAP Financial Measures.*
(2) Net of net income (loss) attributable to NCI.

The Company's tax rate is affected by tax rates in foreign jurisdictions and the relative amount of income earned in those jurisdictions, which the Company expects to be fairly consistent in the near term. The significant foreign jurisdictions that have different statutory tax rates than the US federal statutory rate of 21% include the UK, Germany, Canada and Ireland.

2024 Income tax expense (GAAP) reflected:

- a discrete tax benefit of $137 million recognized in connection with the reorganization and establishment of a more efficient global intellectual property and technology platform and corporate structure;
- a discrete tax benefit of $63 million related to the realization of capital losses from changes in the Company's organizational tax structure;
- a net discrete tax benefit of $37 million related to stock-based compensation awards that vested in 2024; and
- a $14 million net noncash tax expense related to the revaluation of certain deferred income tax liabilities.

The as adjusted effective tax rate of 23.5% for 2024 excluded the $137 million discrete tax benefit due to the nonrecurring nature of the intellectual property reorganization and the $14 million net noncash tax expense, as it does not have a cash flow impact as well as to ensure comparability among periods presented.

The Organisation for Economic Cooperation and Development ("OECD") has proposed certain international tax reforms, which, among other things, would (1) shift taxing rights to the jurisdiction of the consumer ("Pillar One") and (2) establish a global minimum tax for multinational companies of 15% ("Pillar Two"). In response, European Union member states and several other countries, including the United Kingdom, have since adopted laws implementing the OECD's minimum tax rules under Pillar Two, effective starting in 2024. As a result of these developments, the tax laws of certain countries in which BlackRock does business have changed and may continue to change, and any such changes could increase its tax liabilities. The Pillar Two Framework did not have a material impact on BlackRock's consolidated financial statements for 2024 and the Company is continuing to monitor legislative developments and evaluate the potential impact of the Pillar Two Framework on future periods.

2023 Income tax expense (GAAP) reflected:

- a discrete tax benefit of $201 million, related to the resolution of certain outstanding tax matters; and
- a discrete tax benefit of $41 million, related to stock-based compensation awards that vested in 2023.

STATEMENT OF FINANCIAL CONDITION OVERVIEW

As Adjusted Statement of Financial Condition

The following table presents a reconciliation of the consolidated statement of financial condition presented on a GAAP basis to the consolidated statement of financial condition, excluding the impact of separate account assets and separate account collateral held under securities lending agreements (directly related to lending separate account securities) and separate account liabilities and separate account collateral liabilities under securities lending agreements and CIPs.

The Company presents the as adjusted statement of financial condition as additional information to enable investors to exclude certain assets that have equal and offsetting liabilities or NCI that ultimately do not have an impact on stockholders' equity or cash flows. Management views the as adjusted statement of financial condition, which contains non-GAAP financial measures, as an economic presentation of the Company's total assets and liabilities; however, it does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

Separate Account Assets and Liabilities and Separate Account Collateral Held under Securities Lending Agreements

Separate account assets are maintained by BlackRock Life Limited, a wholly owned subsidiary of the Company that is a registered life insurance company in the UK, and represent segregated assets held for purposes of funding individual and group pension contracts. The Company records equal and offsetting separate account liabilities. The separate account assets are not available to creditors of the Company and the holders of the pension contracts have no recourse to the Company's assets. The net investment income attributable to separate account assets accrues directly to the contract owners and is not reported on the consolidated statements of income. While BlackRock has no economic interest in these assets or liabilities, BlackRock earns an investment advisory fee for the service of managing these assets on behalf of its clients.

In addition, the Company records on its consolidated statements of financial condition the separate account collateral obtained under BlackRock Life Limited securities lending arrangements for which it has legal title as its own asset in addition to an equal and offsetting separate account collateral liability for the obligation to return the collateral. The collateral is not available to creditors of the Company, and the borrowers under the securities lending arrangements have no recourse to the Company's assets.

Consolidated Sponsored Investment Products

The Company consolidates certain sponsored investment products accounted for as variable interest entities ("VIEs") and voting rights entities ("VREs"). See Note 2, *Significant Accounting Policies*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information on the Company's consolidation policy.

The Company cannot readily access cash and cash equivalents or other assets held by CIPs to use in its operating activities. In addition, the Company cannot readily sell investments held by CIPs in order to obtain cash for use in the Company's operations.

(in millions)	December 31, 2024 GAAP Basis	Separate Account Assets/ Collateral(1)	CIPs(2)	As Adjusted

Total liabilities and equity	$ 138,615	$ 58,870	$ 2,120	$ 77,625

(1) Amounts represent segregated client assets and related liabilities, in which BlackRock has no economic interest. BlackRock earns an investment advisory fee for the service of managing these assets on behalf of its clients.
(2) Amounts represent the impact of consolidating CIPs.
(3) Amount includes property and equipment and other assets.
(4) Amount includes approximately $4.2 billion of deferred income tax liabilities related to goodwill and intangibles. See Note 25, *Income Taxes*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information.

The following discussion summarizes the significant changes in assets and liabilities on a GAAP basis. Please see the consolidated statements of financial condition as of December 31, 2024 and 2023 contained in Part II, Item 8 of this filing. The discussion does not include changes related to assets and liabilities that are equal and offsetting and have no impact on BlackRock's stockholders' equity.

Assets. Cash and cash equivalents at December 31, 2024 included $169 million of cash held by CIPs (see *Liquidity and Capital Resources* for details on the change in cash and cash equivalents during 2024). Accounts receivable at December 31, 2024 increased $388 million from December 31, 2023, primarily due to higher base and performance fee receivables. Investments at December 31, 2024 increased $29 million from December 31, 2023 (for more information see *Investments* herein). Goodwill and intangible assets, net at December 31, 2024 increased $12.9 billion from December 31, 2023, primarily due to the GIP Transaction and the SpiderRock Transaction, partially offset by amortization of intangible assets and a $50 million noncash impairment charge related to certain indefinite-lived intangible assets. Other assets at December 31, 2024 decreased $261 million from December 31, 2023, primarily related to a decrease in unit trust receivables (substantially offset by a decrease in unit trust payables recorded within other liabilities), partially offset by an increase in certain minority investments.

Liabilities. Accrued compensation and benefits at December 31, 2024 increased $571 million from December 31, 2023, primarily due to higher 2024 incentive compensation accruals. Accounts payable and accrued liabilities at December 31, 2024 increased $296 million from December 31, 2023, primarily due to higher interest on borrowings and increased accruals, including accruals related to direct fund expense. Contingent consideration liabilities at December 31, 2024 increased $4.2 billion from December 31, 2023, primarily due to the contingent consideration liability in connection with the GIP Transaction, which will be settled all in stock, subject to the achievement of specified performance targets (See Note 3, *Acquisitions*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information). Other liabilities at December 31, 2024 decreased $343 million from December 31, 2023, primarily due to lower unit trust payables (substantially offset by a decrease in unit trust receivables recorded within other assets). Deferred income tax liabilities at December 31, 2024 decreased $172 million from December 31, 2023, primarily due to the effects of temporary differences associated with the intellectual property reorganization and the GIP Transaction.

Investments

The Company's investments were $9.8 billion and $9.7 billion at December 31, 2024 and 2023, respectively. Investments include CIPs accounted for as VIEs and VREs. Management reviews BlackRock's investments on an "economic" basis, which eliminates the portion of investments that does not impact BlackRock's book value or net income attributable to BlackRock. BlackRock's management does not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP.

The Company presents investments, as adjusted, to enable investors to understand the economic portion of investments that is owned by the Company as a gauge to measure the impact of changes in net nonoperating income (expense) on investments to net income (loss) attributable to BlackRock.

The Company further presents net "economic" investment exposure, net of deferred cash compensation investments and hedged exposures, to reflect another helpful measure for investors. The economic impact of investments held pursuant to deferred cash compensation plans is substantially offset by a change in associated compensation expense, and the impact of the portfolio of seed investments is mitigated by futures entered into as part of the Company's macro hedging strategy. Carried interest capital allocations are excluded as there is no impact to BlackRock's stockholders' equity until such amounts are realized as performance fees. Finally, the Company's regulatory investment in Federal Reserve Bank stock, which is not subject to market or interest rate risk, is excluded from the Company's net economic investment exposure.

(in millions)		December 31, 2024		December 31, 2023
Investments, GAAP	**$**	**9,769**	$	9,740
Investments held by CIPs		**(5,752)**		(5,977)
Net interest in CIPs[1]		**3,877**		4,111
Investments, as adjusted		**7,894**		7,874
Investments related to deferred cash compensation plans		**(185)**		(264)
Hedged exposures		**(1,757)**		(1,771)
Federal Reserve Bank stock		**(93)**		(92)
Carried interest		**(1,983)**		(1,975)
Total "economic" investment exposure[2]	**$**	**3,876**	$	3,772

(1) Amounts included $1.9 billion of carried interest (VIEs) at both December 31, 2024 and 2023, which has no impact on the Company's "economic" investment exposure.
(2) Amounts do not include investments in corporate minority investments included in other assets on the consolidated statements of financial condition.

The following table represents the carrying value of the Company's economic investment exposure, by asset type, at December 31, 2024 and 2023:

(in millions)		December 31, 2024		December 31, 2023
Equity/Fixed income/Multi-asset[1]	**$**	**3,025**	$	2,786
Alternatives:				
Private equity		**1,199**		1,491
Real assets		**629**		509
Other alternatives[2]		**780**		757
Alternatives subtotal		**2,608**		2,757
Hedged exposures		**(1,757)**		(1,771)
Total "economic" investment exposure	**$**	**3,876**	$	3,772

(1) Amounts include seed investments in equity, fixed income, and multi-asset mutual funds/strategies.
(2) Other alternatives primarily include co-investments in credit funds, direct hedge fund strategies, and hedge fund solutions.

As adjusted investment activity for 2024 and 2023 was as follows:

(in millions)		2024		2023
Investments, as adjusted, beginning balance	**$**	**7,874**	$	6,419
Purchases/capital contributions		**2,214**		1,403
Sales/maturities		**(1,888)**		(914)
Distributions[1]		**(466)**		(111)
Market appreciation(depreciation)/earnings from equity method investments		**220**		607
Carried interest capital allocations/(distributions)		**8**		425
Other[2]		**(68)**		45
Investments, as adjusted, ending balance	**$**	**7,894**	$	7,874

(1) Amount includes distributions representing return of capital and return on investments.
(2) Amount includes the impact of foreign exchange movements.

LIQUIDITY AND CAPITAL RESOURCES

BlackRock Cash Flows Excluding the Impact of CIPs

The consolidated statements of cash flows include the cash flows of the CIPs. The Company uses an adjusted cash flow statement, which excludes the impact of CIPs, as a supplemental non-GAAP measure to assess liquidity and capital requirements. The Company believes that its cash flows, excluding the impact of the CIPs, provide investors with useful information on the cash flows of BlackRock relating to its ability to fund additional operating, investing and financing activities. BlackRock's management does not advocate that investors consider such non-GAAP measures in isolation from, or as a substitute for, its cash flows presented in accordance with GAAP.

The following table presents a reconciliation of the consolidated statements of cash flows presented on a GAAP basis to the consolidated statements of cash flows, excluding the impact of the cash flows of CIPs:

(in millions)	GAAP Basis	Impact on Cash Flows of CIPs	Cash Flows Excluding Impact of CIPs
Cash, cash equivalents and restricted cash, December 31, 2022	$ 7,433	$ 265	$ 7,168
Net cash provided by/(used in) operating activities	4,165	(1,519)	5,684
Net cash provided by/(used in) investing activities	(959)	(26)	(933)
Net cash provided by/(used in) financing activities	(1,992)	1,568	(3,560)
Effect of exchange rate changes on cash, cash equivalents and restricted cash	106	—	106
Net increase/(decrease) in cash, cash equivalents and restricted cash	1,320	23	1,297
Cash, cash equivalents and restricted cash, December 31, 2023	$ 8,753	$ 288	$ 8,465
Net cash provided by/(used in) operating activities	**4,956**	**(2,311)**	**7,267**
Net cash provided by/(used in) investing activities	**(3,004)**	**(127)**	**(2,877)**
Net cash provided by/(used in) financing activities	**2,236**	**2,319**	**(83)**
Effect of exchange rate changes on cash, cash equivalents and restricted cash	**(162)**	**—**	**(162)**
Net increase/(decrease) in cash, cash equivalents and restricted cash	**4,026**	**(119)**	**4,145**
Cash, cash equivalents and restricted cash, December 31, 2024	**$ 12,779**	**$ 169**	**$ 12,610**

Sources of BlackRock's operating cash primarily include base fees and securities lending revenue, performance fees, technology services revenue, advisory and other revenue and distribution fees. BlackRock uses its cash to pay all operating expenses, interest and principal on borrowings, income taxes, dividends and repurchases of the Company's stock, acquisitions, capital expenditures and purchases of co-investments and seed investments.

For details of the Company's GAAP cash flows from operating, investing and financing activities, see the consolidated statements of cash flows contained in Part II, Item 8 of this filing.

Cash flows provided by/(used in) operating activities, excluding the impact of CIPs, primarily include the receipt of base fees, securities lending revenue, performance fees and technology services revenue, offset by the payment of operating expenses incurred in the normal course of business, including year-end incentive and deferred cash compensation accrued during prior years, and income tax payments.

Cash flows used in investing activities, excluding the impact of CIPs, for 2024 were $2.9 billion, primarily reflecting $2.9 billion related to the GIP Transaction, $255 million of purchases of property and equipment, $74 million related to the SpiderRock Transaction, and $52 million of net investment purchases, partially offset by $366 million of distributions of capital from equity method investees.

Cash flows used in financing activities, excluding the impact of CIPs, for 2024 were $83 million, primarily resulting from $3.1 billion of cash dividend payments, $1.9 billion of share repurchases, including $1.6 billion in open market transactions and $0.3 billion of employee tax withholdings related to employee stock transactions, and $1.0 billion of repayment of long-term borrowings, partially offset by $5.5 billion of proceeds from long-term borrowings related to the issuances of senior notes to fund a portion of the cash consideration for the GIP Transaction and the Preqin Transaction, which is anticipated to close in the first quarter of 2025, and $0.5 billion in proceeds from stock options exercised.

The Company manages its financial condition and funding to maintain appropriate liquidity for the business. Management believes that the Company's liquid assets, continuing cash flows from operations, borrowing capacity under the Company's existing revolving credit facility and uncommitted commercial paper private placement program, provide sufficient resources to meet the Company's short-term and long-term cash needs, including operating, debt and other obligations as they come due and anticipated future capital requirements. Liquidity resources at December 31, 2024 and 2023 were as follows:

(in millions)	December 31, 2024	December 31, 2023
Cash and cash equivalents(1)	**$ 12,762**	$ 8,736
Cash and cash equivalents held by CIPs(2)	**(169)**	(288)
Subtotal(3)	**12,593**	8,448
Credit facility — undrawn	**5,400**	5,000
Total liquidity resources	**$ 17,993**	$ 13,448

(1) Amounts exclude restricted cash.
(2) The Company cannot readily access such cash and cash equivalents to use in its operating activities.
(3) The percentage of cash and cash equivalents held by the Company's US subsidiaries was approximately 65% and 50% at December 31, 2024 and 2023, respectively. See *Net Capital Requirements* herein for more information on net capital requirements in certain regulated subsidiaries.

Total liquidity resources increased $4.5 billion during 2024, primarily reflecting $4.5 billion of net proceeds from long-term borrowings, a $400 million increase in the aggregate commitment amount under the credit facility, and positive cash flows from operating activities, partially offset by cash dividend payments of $3.1 billion, $2.9 billion related to the GIP Transaction, share repurchases of $1.9 billion and $74 million related to the SpiderRock Transaction.

A significant portion of the Company's $7.9 billion of investments, as adjusted, is illiquid in nature and, as such, cannot be readily convertible to cash.

Share Repurchases. During 2024, the Company repurchased 1.9 million common shares under the Company's existing share repurchase program for approximately $1.6 billion. At December 31, 2024, there were approximately 3.8 million shares still authorized to be repurchased under the program. The timing and actual number of shares repurchased will depend on a variety of factors, including legal limitations, price and market conditions.

Net Capital Requirements. The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalent investments in those subsidiaries or jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions may have adverse tax consequences that could discourage such transfers.

BlackRock Institutional Trust Company, N.A. ("BTC") is chartered as a national bank that does not accept deposits or make commercial loans and whose powers are limited to trust and other fiduciary activities. BTC provides investment management and other fiduciary services, including investment advisory and securities lending agency services, to institutional clients. BTC is subject to regulatory capital and liquid asset requirements administered by the US Office of the Comptroller of the Currency.

At both December 31, 2024 and 2023, the Company was required to maintain approximately $1.8 billion in net capital in certain regulated subsidiaries, including BTC, entities regulated by the Financial Conduct Authority and Prudential Regulation Authority in the UK, and the Company's broker-dealers. The Company was in compliance with all applicable regulatory net capital requirements.

Undistributed Earnings of Foreign Subsidiaries. As a result of the 2017 Tax Cuts and Jobs Act and the one-time mandatory deemed repatriation tax on untaxed accumulated foreign earnings, US income taxes were provided on the Company's undistributed foreign earnings. The financial statement basis in excess of tax basis of its foreign subsidiaries remains indefinitely reinvested in foreign operations. The Company will continue to evaluate its capital management plans.

Short-Term Borrowings

2024 Revolving Credit Facility. The Company maintains an unsecured revolving credit facility, which is available for working capital and general corporate purposes (the "2024 Credit Facility"). In March 2024, the 2024 Credit Facility was amended to, among other things, (1) permit the GIP Transaction and the transactions contemplated in connection with the GIP Transaction, (2) add New BlackRock as a borrower under the existing credit agreement, (3) add New BlackRock as a guarantor of the payment and performance of the obligations, liabilities and indebtedness of Old BlackRock and certain of its other subsidiaries and (4) update the sustainability-linked pricing mechanics to remove existing metrics and allow new metrics, if any, to be set following the consummation of the GIP Transaction. In May 2024, the 2024 Credit Facility was further amended to, among other things, (1) increase the aggregate commitment amount by $400 million to $5.4 billion and (2) extend the maturity date to March 2029 for lenders (other than one non-extending lender) pursuant to the Company's option to request extensions of the maturity date available under the 2024 Credit Facility (with the commitment of the non-extending lender maturing in March 2028). The 2024 Credit Facility permits the Company to request up to an additional $1.0 billion of borrowing capacity, subject to lender credit approval, which could increase the overall size of the 2024 Credit Facility to an aggregate principal amount of up to $6.4 billion. Interest on outstanding borrowings accrues at an applicable benchmark rate for the denominated currency of the loan, plus a spread. The 2024 Credit Facility requires the Company not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at December 31, 2024. At December 31, 2024, the Company had no amount outstanding under the 2024 Credit Facility.

Commercial Paper Program. On November 7, 2024, BlackRock established a commercial paper program (the "CP Program") under which the Company may issue short-term, unsecured commercial paper notes (the "CP Notes") on a private-placement basis up to a maximum aggregate amount outstanding at any time of $5 billion. The payments of the CP Notes have been unconditionally guaranteed by Old BlackRock (the "CP Notes Guarantee"). The CP Notes will rank equal in right of payment with all of BlackRock's other unsubordinated indebtedness, and the obligations of Old BlackRock under the CP Notes Guarantee will rank equal in right of payment with all of Old BlackRock's other unsubordinated indebtedness. Net proceeds of issuances of the CP Notes are expected to be used for general corporate purposes. The CP Program is currently supported by the 2024 Credit Facility. The CP Program replaced the Company's prior $4 billion commercial paper program, which was terminated concurrently with the establishment of this CP Program, and has been put into place in connection with the Company's organizational structure following the closing of the GIP Transaction. At December 31, 2024, BlackRock had no CP Notes outstanding.

Subsidiary Credit Facility. In January 2024, BlackRock Investment Management (UK) Limited ("BIM UK"), a wholly owned subsidiary of the Company, entered into a revolving credit facility (the "Subsidiary Credit Facility") in the amount of £25 million (or approximately $31 million based on the GBP/USD foreign exchange rate at December 31, 2024) with a rolling 364-day term structure. The Subsidiary Credit Facility is available for BIM UK's general corporate and working capital purposes. At December 31, 2024, there was no amount outstanding under the Subsidiary Credit Facility.

Long-Term Borrowings

The carrying value of long-term borrowings at December 31, 2024 included the following:

(in millions)	Maturity Amount	Carrying Value	Maturity
1.25% Notes[1][2]	$ 725	$ 725	May 2025
3.20% Notes[2]	700	698	March 2027
4.60% Notes	800	797	July 2027
3.25% Notes[2]	1,000	993	April 2029
4.70% Notes	500	497	March 2029
2.40% Notes[2]	1,000	997	April 2030
1.90% Notes[2]	1,250	1,243	January 2031
2.10% Notes[2]	1,000	989	February 2032
4.75% Notes[2]	1,250	1,233	May 2033
5.00% Notes	1,000	993	March 2034
4.90% Notes	500	495	January 2035
5.25% Notes	1,500	1,468	March 2054
5.35% Notes	1,200	1,186	January 2055
Total long-term borrowings	$ 12,425	$ 12,314	

(1) The carrying value of the 1.25% Notes is calculated using the EUR/USD foreign exchange rate as of December 31, 2024.
(2) Issued by Old BlackRock and guaranteed by New BlackRock.

In March 2024, New BlackRock issued $3.0 billion in aggregate principal amount of senior unsecured and unsubordinated notes. These notes were issued as three separate series of senior debt securities including $500 million of 4.70% notes maturing on March 14, 2029 (the "2029 Notes"), $1.0 billion of 5.00% notes maturing on March 14, 2034 (the "2034 Notes") and $1.5 billion of 5.25% notes maturing on March 14, 2054 (the "2054 Notes") (collectively, the "March 2024 Notes"). Net proceeds were used to fund a portion of the cash consideration for the GIP Transaction, which closed in October 2024. Interest on the March 2024 Notes of approximately $152 million per year is payable semi-annually on March 14 and September 14 of each year, which commenced on September 14, 2024. The March 2024 Notes are fully and unconditionally guaranteed (the “March 2024 Notes Guarantee”) on a senior unsecured basis by Old BlackRock. The March 2024 Notes and the March 2024 Notes Guarantee rank equally in right of payment with all of BlackRock and Old BlackRock's other unsubordinated indebtedness, respectively. The March 2024 Notes may be redeemed prior to maturity at any time in whole or in part at the option of BlackRock at the redemption prices set forth in the applicable series of March 2024 Notes.

In March 2024, the Company fully repaid $1.0 billion of 3.50% Notes at maturity.

In July 2024, New BlackRock issued $2.5 billion in aggregate principal amount of senior unsecured and unsubordinated notes. These notes were issued as three separate series of senior debt securities including $800 million of 4.60% notes maturing on July 26, 2027 (the "2027 Notes"), $500 million of 4.90% notes maturing on January 8, 2035 (the "2035 Notes") and $1.2 billion of 5.35% notes maturing on January 8, 2055 (the "2055 Notes") (collectively, the "July 2024 Notes"). Net proceeds are intended to be used to fund a portion of the cash consideration for the Preqin Transaction, which is anticipated to close in the first quarter of 2025, subject to customary closing conditions. The July 2024 Notes are fully and unconditionally guaranteed (the “July 2024 Notes Guarantee”, and together with the March 2024 Notes Guarantee "Notes Guarantees") on a senior unsecured basis by Old BlackRock. The July 2024 Notes and the July 2024 Notes Guarantee rank equally in right of payment with all of BlackRock and Old BlackRock’s other unsubordinated indebtedness, respectively. Interest on the 2027 Notes of approximately $37 million per year is payable semi-annually on January 26 and July 26 of each year, beginning January 26, 2025. Interest on the 2035 Notes and 2055 Notes of approximately $25 million and $64 million per year, respectively, is payable semi-annually on January 8 and July 8 of each year, beginning January 8, 2025. The July 2024 Notes may be redeemed prior to maturity at any time in whole or in part at the option of BlackRock at the redemption prices set forth in the applicable series of July 2024 Notes. In addition, if the Preqin Transaction is not consummated, the Company will be required to redeem all outstanding 2027 Notes (the “Special Mandatory Redemption”) at a Special Mandatory Redemption price equal to 101% of the aggregate principal amount of the applicable series of 2027 Notes, plus accrued and unpaid interest, if any, to, but excluding, the Special Mandatory Redemption date.

For more information on the Company’s borrowings, see Note 15, *Borrowings*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing.

Supplemental Guarantor Information

On October 1, 2024, in connection with the closing of the GIP Transaction, BlackRock, Inc. (formerly known as BlackRock Funding, Inc.) ("New BlackRock") became the ultimate parent company of BlackRock Finance, Inc. (formerly known as BlackRock, Inc.) ("Old BlackRock"), GIP and their respective subsidiaries. See *Overview* for additional information.

New BlackRock is the issuer of the previously described March 2024 Notes and July 2024 Notes (collectively the "2024 Notes"), which are fully and unconditionally guaranteed on a senior unsecured basis by Old BlackRock. The 2024 Notes and the Notes Guarantees rank equally in right of payment with all of New BlackRock's and Old BlackRock's other unsubordinated indebtedness, respectively. No other subsidiary of Old BlackRock or New BlackRock guarantees the 2024 Notes. The Notes Guarantees will be automatically and unconditionally released and discharged, and Old BlackRock will be released from all obligations under the indenture in its capacity as guarantor, in certain circumstances as described in the indenture governing the 2024 Notes. See Note 15, *Borrowings*, in the notes to the consolidated financial statements for further information on the 2024 Notes, Old BlackRock's senior unsecured notes and the New BlackRock Guarantee.

On October 1, 2024, in connection with the closing of the GIP Transaction, New BlackRock also entered into a guarantee (the “New BlackRock Guarantee”) pursuant to which New BlackRock fully and unconditionally guaranteed, on a senior unsecured basis, the obligations of Old BlackRock with respect to its previously issued senior unsecured notes. The New BlackRock Guarantee ranks equally in right of payment with all of New BlackRock's other unsubordinated indebtedness. In certain circumstances as described in the New BlackRock Guarantee, the New BlackRock Guarantee will be automatically and unconditionally released and discharged, and New BlackRock will be released from all obligations under the New BlackRock Guarantee.

The following presents unaudited summarized financial information of New BlackRock and Old BlackRock (together with the New BlackRock, the "Obligor Group") on a combined basis as of December 31, 2024 and for the period from October 1, 2024 to December 31, 2024. Intercompany balances and transactions between New BlackRock and Old BlackRock have been eliminated, and balances and transactions with subsidiaries, which are not part of the Obligor Group, have been separately presented, and investments in and equity in earnings related to subsidiaries of New BlackRock and Old BlackRock, which are not members of the Obligor Group, have been excluded.

Summarized Balance Sheet (unaudited)

(in millions)	**December 31, 2024**
Assets	
Receivables from non-guarantor subsidiaries	**$ 7,681**
Goodwill and intangible assets	**27,273**
Other assets	**362**
Total assets	**$ 35,316**
Liabilities	
Borrowings	**$ 12,314**
Payables to non-guarantor subsidiaries	**10,206**
Other liabilities	**3,278**
Total liabilities	**$ 25,798**

Summarized Income Statement (unaudited)

For 2024, net loss of the Obligor Group was $767 million and primarily comprised of $87 million amortization expense, a gain of $31 million related to a contingent consideration fair value adjustment, a $35 million impairment charge, $391 million of interest expense, and related taxes. Revenue during this period was not material.

Contractual Obligations, Commitments and Contingencies

The Company’s material contractual obligations, commitments and contingencies at December 31, 2024 include borrowings, operating leases, investment commitments, compensation and benefits obligations, purchase obligations, and contingent consideration liabilities.

Borrowings. At December 31, 2024, the Company had outstanding borrowings with varying maturities for an aggregate principal amount of $12.4 billion, of which $725 million is payable within 12 months. Future interest payments associated with these borrowings total $6.4 billion, of which $470 million is payable within 12 months. See Note 15, *Borrowings*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing.

Operating Leases. The Company leases its primary office locations under agreements that expire on varying dates through 2043. At December 31, 2024, the Company had operating lease payment obligations of approximately $2.3 billion, of which $198 million is payable within 12 months. See Note 13, *Leases*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing.

Investment Commitments. At December 31, 2024, the Company had $1.2 billion of various capital commitments to fund sponsored investment products, including CIPs. These products include various private market products, including private equity funds, real assets funds, and opportunistic funds. This amount excludes additional commitments made by consolidated funds of funds to underlying third-party funds as third-party noncontrolling interest holders have the legal obligation to fund the respective commitments of such funds of funds. Generally, the timing of the funding of these commitments is unknown and the commitments are callable on demand at any time prior to the expiration of the commitment. These unfunded commitments are not recorded on the consolidated statements of financial condition. These commitments do not include potential future commitments approved by the Company that are not yet legally binding. The Company intends to make additional capital commitments from time to time to fund additional investment products for, and with, its clients.

Compensation and Benefit Obligations. The Company has various compensation and benefit obligations, including bonuses, commissions and incentive payments payable, defined contribution plan matching contribution obligations, and deferred compensation arrangements. Accrued compensation and benefits at December 31, 2024 totaled $3.0 billion and included annual incentive compensation of $2.0 billion, deferred compensation of $0.4 billion and other compensation and benefits related obligations of $0.5 billion. Substantially all of the incentive compensation liability was paid in the first quarter of 2025, while the deferred compensation obligations are payable over various periods, with the majority payable over periods of up to three years.

Purchase Obligations. In the ordinary course of business, BlackRock enters into contracts or purchase obligations with third parties whereby the third parties provide services to or on behalf of BlackRock. Purchase obligations represent executory contracts, which are either noncancelable or cancelable with a penalty. At December 31, 2024, the Company's obligations primarily reflected standard service contracts for market data, technology, office-related services, marketing and promotional services, and obligations for equipment. Purchase obligations are recorded on the consolidated financial statements when services are provided and, as such, obligations for services and equipment not received are not included in the consolidated statement of financial condition at December 31, 2024. At December 31, 2024, the Company had purchase obligations of approximately $615 million, of which $260 million is payable within 12 months.

Contingent Consideration Liabilities. In connection with certain acquisitions, BlackRock is required to make contingent payments, subject to the achievement of specified performance targets or satisfaction of certain post-closing events. The fair value of this contingent consideration is estimated at the time of acquisition closing and is included in contingent consideration liabilities on the consolidated statements of financial condition. The fair value of the remaining aggregate contingent payments at December 31, 2024 totaled $4.3 billion, including $4.2 billion related to the GIP Transaction, which, if any, will be settled all in stock, for a number of shares ranging from 4.0 million to 5.2 million shares, subject to achieving certain performance targets. See Note 3, *Acquisitions*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the reporting periods. Actual results could differ significantly from those estimates. These estimates, judgments and assumptions are affected by the Company's application of accounting policies. Management considers the following accounting policies and estimates critical to understanding the consolidated financial statements. These policies and estimates are considered critical because they had a material impact, or are reasonably likely to have a material impact on the Company's consolidated financial statements and because they require management to make significant judgments, assumptions or estimates. For a summary of these and additional accounting policies see Note 2, *Significant Accounting Policies*, in the notes to the consolidated financial statements included in Part II, Item 8 of this filing.

Consolidation

The Company consolidates entities in which the Company has a controlling financial interest. The Company has a controlling financial interest when it owns a majority of the VRE or is a primary beneficiary ("PB") of a VIE. Assessing whether an entity is a VIE or a VRE involves judgment and analysis on a structure-by-structure basis. Factors considered in this assessment include the entity's legal organization, the entity's capital structure, the rights of equity investment holders, the Company's contractual involvement with and economic interest in the entity and any related party or de facto agent implications of the Company's involvement with the entity. Entities that are determined to be VREs are consolidated if the Company can exert absolute control over the financial and operating policies of the investee, which generally exists if there is greater than 50% voting interest. Entities that are determined to be VIEs are consolidated if the Company is the PB of the entity. BlackRock is deemed to be the PB of a VIE if it (1) has the power to direct the activities that most significantly impact the entities' economic performance and (2) has the obligation to absorb losses or the right to receive benefits that potentially could be significant to the VIE. There is judgment involved in assessing whether the Company is the PB of a VIE. In addition, the Company's ownership interest in VIEs is subject to variability and is impacted by actions of other investors such as ongoing redemptions and contributions. The Company generally consolidates VIEs in which it holds an economic interest of 10% or greater and deconsolidates such VIEs once its economic interest falls below 10%. As of December 31, 2024, the Company was deemed to be the PB of approximately 110 VIEs. See Note 6, *Consolidated Sponsored Investment Products*, in the notes to the consolidated financial statements contained in Part II, Item 8 of this filing for more information.

Fair Value Measurements

The Company's assessment of the significance of a particular input to the fair value measurement according to the fair value hierarchy (i.e., Level 1, 2 and 3 inputs, as defined) in its entirety requires judgment and considers factors specific to the financial instrument. See Note 2, *Significant Accounting Policies*, and Note 8, *Fair Value Disclosures*, in the consolidated financial statements contained in Part II, Item 8 of this filing for more information on fair value measurements.

Changes in Valuation. Changes in value on $7.1 billion of investments will impact the Company's nonoperating income (expense), $640 million are held at cost or amortized cost and the remaining $2.0 billion relates to carried interest, which will not impact nonoperating income (expense). At December 31, 2024, changes in fair value of $3.8 billion of CIPs will impact BlackRock's net income (loss) attributable to NCI on the consolidated statements of income. BlackRock's net exposure to changes in fair value of CIPs was $2.0 billion.

Goodwill and Intangible Assets

The Company accounts for business combinations using the acquisition method of accounting, where the purchase price is allocated to the assets acquired and liabilities assumed based on their fair values at the date of the transaction. Any excess purchase consideration over the fair value of net assets acquired is recorded as goodwill. The Company determines fair value of the tangible and identifiable intangible assets acquired and liabilities assumed, using the best available information which incorporates various estimates and assumptions, including, but not limited to, future expected cash flows, fundraising assumptions, useful lives, and discount rates. These estimates are based on historical data, internal estimates, and external sources. Unanticipated events may affect the validity of these assumptions.

During 2024, BlackRock recorded approximately $2.7 billion of finite-lived management contracts and investor relationships in connection with the GIP Transaction. The acquisition date fair values were determined using an income approach, which applied certain significant assumptions, which are inherently uncertain and unpredictable. These assumptions primarily included discounts rates ranging from 7%-11%, as well as estimated revenue projections based on AUM, AUM growth rates, revenue basis points, operating margins, and tax rates. While the Company believes these assumptions to be reasonable and appropriate, changes in these estimates could produce different fair value amounts.

Goodwill. The Company assesses its goodwill for impairment at least annually, considering qualitative factors such as entity-specific and macroeconomic factors as potential impairment indicators as well as quantitative factors such as the book value and the market capitalization of the Company. The impairment assessment performed as of July 31, 2024 indicated no impairment charge was required. The Company continues to monitor various impairment indicators as well as its book value per share compared with closing prices of its common stock for potential indicators of impairment. At December 31, 2024, the Company had $25.9 billion of goodwill, including $10.3 billion in connection with the GIP Transaction and the Company's common stock closed at $1,025, which exceeded its book value of $307 per share.

Indefinite-lived and finite-lived intangibles. Indefinite-lived intangible assets represent the value of advisory contracts acquired in business acquisitions to manage AUM in proprietary open-end investment funds, collective trust funds and certain other commingled products without a specified termination date. The assignment of indefinite lives to such contracts primarily is based upon the following: (1) the assumption that there is no foreseeable limit on the contract period to manage these products; (2) the Company expects to, and has the ability to, continue to operate these products indefinitely; (3) the products have multiple investors and are not reliant on a single investor or small group of investors for their continued operation; (4) current competitive factors and economic conditions do not indicate a finite life; and (5) there is a high likelihood of continued renewal based on historical experience. In addition, trade names/trademarks are considered indefinite-lived intangibles if they are expected to generate cash flows indefinitely. Indefinite-lived intangible assets are not amortized.

Finite-lived intangible assets represent finite-lived investor/customer relationships, technology related assets, and management contracts, which relate to acquired separate accounts and funds, that are expected to contribute to the future cash flows of the Company for a specified period of time. Finite-lived intangible assets are amortized over their remaining expected useful lives, which, at December 31, 2024 ranged from approximately 1 to 14 years with a weighted-average remaining estimated useful life of approximately 9 years.

The Company performs assessments to determine if any intangible assets are impaired at least annually, as of July 31, or more frequently if events or changes in circumstances indicate that it is more likely than not that the intangible assets might be impaired.

In evaluating whether it is more likely than not that the fair value of indefinite-lived intangibles is less than its carrying value, BlackRock performs certain quantitative assessments and assessed various significant quantitative factors including AUM, revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates. In addition, the Company considered other qualitative factors including: (1) macroeconomic conditions such as a deterioration in general economic conditions, limitations on accessing capital, fluctuations in foreign exchange rates, or other developments in equity and credit markets; (2) industry and market considerations such as a deterioration in the environment in which the Company operates, an increased competitive environment, a decline in market-dependent multiples or metrics, a change in the market for an entity's services, or regulatory, legal or political developments; and (3) Company-specific events, such as a change in management or key personnel, overall financial performance and litigation that could affect significant inputs used to determine the fair value of the indefinite-lived intangible asset. If an indefinite-lived intangible is determined to be more likely than not impaired, then the fair value of the asset, which is generally determined using an income approach, is compared with its carrying value and any excess of the carrying value over the fair value would be recognized as an expense in the period in which the impairment occurs.

For finite-lived intangible assets, if potential impairment circumstances are considered to exist, the Company will perform a recoverability test, using an undiscounted cash flow analysis. Factors included in evaluating finite-lived customer relationships, technology related assets and trade names include technology services revenue trends, customer attrition rates, obsolescence rates, and royalty rates. For finite-lived management contracts, evaluation is based on changes in assumptions including AUM, revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates. Actual results could differ from these cash flow estimates, which could materially impact the impairment conclusion. If the carrying value of the asset is determined not to be recoverable based on the undiscounted cash flow test, the difference between the book value of the asset and its current estimated fair value would be recognized as an expense in the period in which the impairment occurs.

In addition, management judgment is required to estimate the period over which finite-lived intangible assets will contribute to the Company's cash flows and the pattern in which these assets will be consumed and whether the indefinite-life and finite-life classifications are still appropriate. A change in the remaining useful life of any of these assets, or the reclassification of an indefinite-lived intangible asset to a finite-lived intangible asset, could have a significant impact on the Company's amortization expense, which was $241 million, $151 million and $151 million for 2024, 2023 and 2022, respectively.

In 2024, 2023 and 2022, the Company performed its annual impairment assessment, including evaluating various qualitative factors and performing certain quantitative assessments. In 2024, based on this assessment, the Company determined that the indefinite-lived intangible assets related to certain acquired open-end management contracts were impaired, and as a result, recorded a noncash impairment charge of $50 million, included within amortization and impairment of intangible assets expense on the consolidated statements of income. The impairment was primarily the result of a decrease in certain quantitative factors, including reduced growth expectation, lower revenue basis points and net client outflows, which caused the fair value to decline below its carrying value. While the Company believes all assumptions utilized in the analysis are reasonable and appropriate, changes in these estimates could produce different fair value amounts, which could drive additional impairment in future periods. In addition, the Company determined, that no impairment charges were required for any other intangible assets, and that the classification of indefinite-lived versus finite-lived intangibles was still appropriate and no changes were required to the expected lives of the finite-lived intangibles. In 2023 and 2022, the Company determined that no impairment charges were required and that the classification of indefinite-lived versus finite-lived intangibles was still appropriate and no changes were required to the expected lives of the finite-lived intangibles. The Company continuously monitors various factors, including AUM, for potential indicators of impairment.

Contingent Consideration Liabilities

In connection with certain acquisitions, BlackRock is required to make contingent payments, subject to the achievement of specified performance targets or satisfaction of certain post-closing events. The fair value of this contingent consideration is estimated at the time of acquisition closing and is included in contingent consideration liabilities on the consolidated statements of financial condition. The fair value of the remaining aggregate contingent payments at December 31, 2024 totaled $4.3 billion, including $4.2 billion related to the GIP Transaction, which, if any, will be settled all in stock, ranging from 4.0 million to 5.2 million shares, subject to achieving certain performance targets. The fair value of the GIP Transaction contingent consideration was estimated using the income approach, which included certain significant inputs such as a risk-free discount rate of approximately 4.3% as well as current estimates of the timing and amounts of fundraising forecasts, stock and AUM volatility, and correlation between stock price and AUM (Level 3 inputs). As the estimated fair value of the contingent consideration subsequently changes, contingent consideration liabilities are adjusted, resulting in contingent consideration fair value adjustments recorded within general and administration expense of the consolidated statements of income until the contingency is resolved. Accordingly, changes in the key inputs and assumptions described can materially impact the amount of contingent consideration expense recorded in a reporting period.

Revenue Recognition

The Company recognizes revenues when its obligations related to the services are satisfied and it is probable that a significant reversal of the revenue amount would not occur in future periods. The Company enters into contracts that can include multiple services, which are accounted for separately if they are determined to be distinct. Management judgment is required in assessing the probability of significant revenue reversal and in identification of distinct services.

The Company derives a substantial portion of its revenue from investment advisory and administration fees which are recognized as the services are performed over time because the customer is receiving and consuming the benefits as they are provided by the Company. Fees are primarily based on agreed-upon percentages of AUM and recognized for services provided during the period, which are distinct from services provided in other periods. Such fees are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. AUM represents the broad range of financial assets the Company manages for clients on a discretionary basis pursuant to investment management and trust agreements that are expected to continue for at least 12 months. In general, reported AUM reflects the valuation methodology that corresponds to the basis used for determining revenue (for example, net asset values).

The Company receives investment advisory performance fees, including incentive allocations (carried interest) from certain actively managed investment funds and certain separately managed accounts ("SMAs"). These performance fees are dependent upon exceeding specified relative or absolute investment return thresholds, which vary by product or account, and include monthly, quarterly, annual or longer measurement periods.

Performance fees, including carried interest, are generated on certain management contracts when performance hurdles are achieved. Such performance fees are recognized when the contractual performance criteria have been met and when it is determined that they are no longer probable of significant reversal. Given the unique nature of each fee arrangement, contracts with customers are evaluated on an individual basis to determine the timing of revenue recognition. Significant judgment is involved in making such determination. Performance fees typically arise from investment management services that began in prior reporting periods. Consequently, a portion of the fees the Company recognizes may be partially related to the services performed in prior periods that meet the recognition criteria in the current period. At each reporting date, the Company considers various factors in estimating performance fees to be recognized, including carried interest. These factors include but are not limited to whether: (1) the amounts are dependent on the financial markets and, thus, are highly susceptible to factors outside the Company's influence; (2) the ultimate payments have a large number and a broad range of possible amounts; and (3) the funds or SMAs have the ability to (a) invest or reinvest their sales proceeds or (b) distribute their sales proceeds, and determine the timing of such distributions.

The Company is allocated/distributed carried interest from certain alternative investment products upon exceeding performance thresholds. The Company may be required to reverse/return all, or part, of such carried interest allocations/distributions depending upon future performance of these products. Carried interest subject to such clawback provisions is recorded in investments or cash and cash equivalents to the extent that it is distributed, on the Company's consolidated statements of financial condition.

The Company records a liability for deferred carried interest to the extent it receives cash or capital allocations related to carried interest prior to meeting the revenue recognition criteria. At December 31, 2024 and 2023, the Company had $1.9 billion and $1.8 billion, respectively, of deferred carried interest recorded in other liabilities on the consolidated statements of financial condition. A portion of the deferred carried interest may also be paid to certain employees and other third parties, which may be subject to clawback. The ultimate timing of the recognition of performance fee revenue and related compensation expense, if any, is unknown. See Note 17, *Revenue*, in the notes to the consolidated financial statements for detailed changes in the deferred carried interest liability balance for 2024 and 2023.

The Company earns revenue for providing technology services. Determining the amount of revenue to recognize requires judgment and estimates. Complex arrangements with nonstandard terms and conditions may require contract interpretation to determine the appropriate accounting, including whether promised goods and services specified in an arrangement, are distinct performance obligations, and should be accounted for separately. Other judgments include determining whether performance obligations are satisfied over time or at a point in time. Fees earned for technology services are primarily recorded as services are performed over time and are generally determined using the value of positions on the Aladdin platform or on a fixed-rate basis. Revenue derived from the sale of software licenses is recognized upon the granting of access rights.

Adjustments to revenue arising from initial estimates recorded historically have been immaterial since the majority of BlackRock's investment advisory and administration revenue is calculated based on AUM, recognized when known, and given the Company does not record performance fee revenue until: (1) performance thresholds have been exceeded and (2) management determines the fees are no longer probable of significant reversal. See Note 2, *Significant Accounting Policies*, in the consolidated financial statements contained in Part II, Item 8 of this filing for more information on revenue recognition, including other revenue streams.

Income Taxes

The Company records income taxes based upon its estimated income tax liability or benefit. The Company's actual tax liability or benefit may differ from the estimated income tax liability or benefit.

Deferred income tax assets and liabilities are recognized for future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using currently enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Significant management judgment is required in estimating the ranges of possible outcomes and determining the probability of favorable or unfavorable tax outcomes and potential interest and penalties related to such unfavorable outcomes. Actual future tax consequences relating to uncertain tax positions may be materially different than the Company's current estimates. At December 31, 2024, BlackRock had $517 million of gross unrecognized tax benefits, of which $431 million, if recognized, would affect the effective tax rate.

Management is required to estimate the timing of the recognition of deferred tax assets and liabilities, make assumptions about the future deductibility of deferred income tax assets and assess deferred income tax liabilities based on enacted tax rates for the appropriate tax jurisdictions to determine the amount of such deferred income tax assets and liabilities. At December 31, 2024, the Company had deferred income tax assets of $181 million and deferred income tax liabilities of $3.3 billion on the consolidated statement of financial condition. Changes in deferred tax assets and liabilities may occur in certain circumstances, including statutory income tax rate changes, statutory tax law changes, changes in the anticipated timing of recognition of deferred tax assets and liabilities or changes in the structure or tax status of the Company.

The Company assesses whether a valuation allowance should be established against its deferred income tax assets based on consideration of all available evidence, both positive and negative, using a more likely than not standard. The assessment considers, among other matters, the nature, frequency and severity of recent losses, forecast of future profitability, the duration of statutory carry back and carry forward periods, the Company's experience with tax attributes expiring unused, and tax planning alternatives.

Accounting Developments

For accounting pronouncements that the Company adopted during 2024 and for accounting pronouncements not yet adopted by the Company, see Note 2, *Significant Accounting Policies*, in the consolidated financial statements contained in Part II, Item 8 of this filing.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

AUM Market Price Risk. BlackRock's investment advisory and administration fees are primarily comprised of fees based on a percentage of the value of AUM and, in some cases, performance fees expressed as a percentage of the returns realized on AUM. At December 31, 2024, the majority of the Company's investment advisory and administration fees were based on average or period end AUM of the applicable investment funds or separate accounts. Movements in equity market prices, interest rates/credit spreads, foreign exchange rates or all three could cause the value of AUM to decline, which would result in lower investment advisory and administration fees.

Corporate Investments Portfolio Risks. As a leading investment management firm, BlackRock devotes significant resources across all of its operations to identifying, measuring, monitoring, managing and analyzing market and operating risks, including the management and oversight of its own investment portfolio. The Board of Directors of the Company has adopted guidelines for the review of investments (or commitments to invest) to be made by the Company, requiring, among other things, that certain investments be referred to the Board of Directors, depending on the circumstances, for notification or approval.

In the normal course of its business, BlackRock is exposed to equity market price risk, interest rate/credit spread risk and foreign exchange rate risk associated with its corporate investments.

BlackRock has investments primarily in sponsored investment products that invest in a variety of asset classes, including real assets, private equity and hedge funds. Investments generally are made for co-investment purposes, to establish a performance track record, to hedge exposure to certain deferred cash compensation plans or for regulatory purposes. The Company has a seed capital hedging program in which it enters into futures to hedge market and interest rate exposure with respect to its total portfolio of seed investments in sponsored investment products. The Company had outstanding futures related to its seed capital hedging program with an aggregate notional value of approximately $1.8 billion at both December 31, 2024 and 2023.

At December 31, 2024 and 2023, approximately $5.8 billion and $6.0 billion, respectively, of BlackRock's investments were held in consolidated sponsored investment products accounted for as variable interest entities or voting rights entities. Excluding the impact of the Federal Reserve Bank stock, carried interest, investments made to hedge exposure to certain deferred cash compensation plans and certain investments that are hedged via the seed capital hedging program, the Company's economic exposure to its investment portfolio at December 31, 2024 and 2023 were $3.9 billion and $3.8 billion, respectively. See Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations – Statement of Financial Condition Overview – Investments* for further information on the Company's investments.

Equity Market Price Risk. Investments subject to market price risk include public and private equity and real assets investments, hedge funds and funds of funds as well as mutual funds. The following table provides the Company's net exposure to equity market price risk and hypothetical exposure to a 10% adverse change in market prices:

	As of December 31,			
	2024		**2023**	
(in millions)	**Net Exposure**	**Effect of -10% Change**	**Net Exposure**	**Effect of -10% Change**
Equity Market Price Risk				
Investments	**$ 1,899**	**$ 190**	$ 1,684	$ 168

Interest Rate/Credit Spread Risk. Investments subject to interest rate and credit spread risk include debt securities and sponsored investment products that invest primarily in debt securities. The following table provides the Company's exposure to interest rate risk and credit spread risk and hypothetical exposure to an adverse 100 basis point fluctuation in interest rates or credit spreads:

	As of December 31,			
	2024		**2023**	
(in millions)	**Exposure**	**Effect of -100 Basis Point Change**	**Exposure**	**Effect of -100 Basis Point Change**
Interest Rate/Credit Spread Risk				
Investments	**$ 1,977**	**$ 54**	$ 2,088	$ 53

Foreign Exchange Rate Risk. As discussed above, the Company invests in sponsored investment products that invest in a variety of asset classes. The carrying value of the total economic investment exposure denominated in foreign currencies are primarily based in the British pound and euro. The following table provides the Company's exposure to foreign currencies and hypothetical exposure to a 10% adverse change in the applicable foreign exchange rates:

	As of December 31,			
	2024		**2023**	
(in millions)	**Exposure**	**Effect of -10% Change**	**Exposure**	**Effect of -10% Change**
Foreign Exchange Rate Risk				
Investments	**$ 1,111**	**$ 111**	$ 1,125	$ 112

Other Market Risks. The Company executes forward foreign currency exchange contracts to mitigate the risk of certain foreign exchange risk movements. At December 31, 2024 and 2023, the Company had outstanding forward foreign currency exchange contracts with an aggregate notional value of approximately $3.6 billion and $3.1 billion, with expiration dates in January 2025 and 2024, respectively. In addition, the Company entered into futures to hedge economically the exposure to market movements on certain deferred cash compensation plans. At December 31, 2024 and 2023, the Company had outstanding exchange traded futures with aggregate notional values related to its deferred cash compensation hedging program of approximately $197 million and $204 million, with expiration dates during the first quarter of 2025 and 2024, respectively.

Item 8. Financial Statements and Supplemental Data

The report of the independent registered public accounting firm and financial statements listed in the accompanying index are included in Item 15 of this report. See Index to the consolidated financial statements on page F-1 of this Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There have been no disagreements on accounting and financial disclosure matters. BlackRock has not changed accountants in the two most recent fiscal years.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures. Under the direction of BlackRock's Chief Executive Officer and Chief Financial Officer, BlackRock evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this annual report on Form 10-K. Based on this evaluation, BlackRock's Chief Executive Officer and Chief Financial Officer have concluded that BlackRock's disclosure controls and procedures were effective.

Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting that occurred during the fourth quarter of the fiscal year ending December 31, 2024 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Management’s Report on Internal Control Over Financial Reporting

Management of BlackRock, Inc. (the “Company”) is responsible for establishing and maintaining effective internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended, as a process designed by, or under the supervision of, the Company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the Company’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with the authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of effectiveness of the internal control over financial reporting to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2024 based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concluded that, as of December 31, 2024, the Company’s internal control over financial reporting is effective.

The Company’s independent registered public accounting firm has issued an attestation report on the effectiveness of the Company’s internal control over financial reporting.

February 25, 2025

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of BlackRock, Inc.:

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of BlackRock, Inc. and subsidiaries (the "Company") as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2024, of the Company and our report dated February 25, 2025, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Index to Financial Statements

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of BlackRock, Inc.:

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial condition of BlackRock, Inc. and subsidiaries (the "Company") as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, changes in equity, and cash flows, for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2025, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Acquisition of Global Infrastructure Management, LLC (“GIP”) – Fair Value of intangible assets related to management contracts and contingent consideration — Refer to Notes 2 and 3 to the financial statements

Critical Audit Matter Description

On October 1, 2024, the Company completed the acquisition of GIP for consideration at close of approximately $3 billion in cash and 6.9 million shares of BlackRock common stock. In addition, as part of the purchase consideration, a contingent consideration payment, all in stock, may be due subject to achieving certain performance targets. The Company accounts for the acquisition under the acquisition method of accounting for business combinations. Accordingly, the Company allocated the purchase price to the assets acquired and liabilities assumed, based on their estimated fair values at the date of the transaction close. The Company recorded approximately $1.8 billion of intangible assets related to management contracts as of the acquisition date (the “acquired management contracts”). Additionally, the Company recorded an estimated contingent consideration liability of approximately $4.2 billion.

Acquired management contracts are valued using discounted cash flow methods based on future cash flows specific to the type of intangible asset acquired. The determination of fair value requires management to make estimates and assumptions related to forecasted revenue and cash flows, and the determination of the discount rates.

The fair value of the contingent consideration was determined using an income approach where management develops projections during the contingent consideration period utilizing various potential pay-out scenarios. The determination of fair value requires management to make estimates and assumptions related to projected assets under management (“AUM”), discount rate and common stock volatility.

Given the fair value determination of acquired management contracts and contingent consideration requires management to make significant estimates and assumptions, performing audit procedures to evaluate the reasonableness of these estimates and assumptions required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the valuation of acquired management contracts and contingent consideration included the following, among others:

- We tested the design and operating effectiveness of controls over the Company’s valuation of acquired management contracts and contingent consideration, including management’s controls over forecasts of future revenue and cash flows, projected AUM, and determination of discount rates.
- We evaluated the reasonableness of management’s forecasted revenue and cash flows and projected AUM, by comparing management’s projections to historical results, contractual revenue agreements in place, and relevant industry reports and evaluated whether the forecasted revenue and cash flows and projected AUM were consistent with evidence obtained in other areas of the audit.

- With the assistance of our fair value specialists, we evaluated the reasonableness of the Company’s valuation methodologies and valuation assumptions used in the fair value analysis by:
  - Testing the source information underlying the determination of the discount rates and the mathematical accuracy of the valuation.
  - For acquired management contracts, evaluating the reasonableness of the methodology used, and developing a range of independent estimates and comparing those to the discount rates selected by management.
  - For contingent consideration, evaluating the reasonableness of the methodology used, the acceptability of the valuation assumptions used, as well as evaluating the probability of contingent future events to calculate an independent estimate of fair value.

Impairment of indefinite-lived intangible assets related to certain management contracts — Refer to Notes 2 and 12 to the financial statements

Critical Audit Matter Description

The Company’s indefinite-lived intangible assets are comprised of management contracts, trade names/trademarks and licenses acquired in business acquisitions. The Company performs its impairment assessment of its indefinite-lived intangible assets at least annually, as of July 31st. In 2024, the annual assessment excluded indefinite-lived intangible assets related to GIP as the acquisition was finalized October 1, 2024; refer to Acquisition of Global Infrastructure Management, LLC (GIP) – fair value of intangible assets related to management contracts and contingent consideration critical audit matter for discussion of the acquisition of GIP. In evaluating whether it is more likely than not that the fair value of indefinite-lived intangibles is less than carrying value, the Company performs certain quantitative assessments and assesses various significant qualitative factors. If an indefinite-lived intangible asset is determined to be more likely than not impaired, the fair value of the asset is then compared with its carrying value. Any excess of the carrying value over the fair value would be recognized as an expense in the period in which the impairment occurs. The determination of fair value requires management to make estimates and assumptions related to revenue basis points, projected AUM growth rates, operating margins, tax rates, and discount rates.

Given the significant judgments made by management to estimate the fair value of indefinite-lived intangible assets related to certain management contracts, performing audit procedures to evaluate the reasonableness of management’s estimates and assumptions related to projected AUM growth rates, revenue basis points, operating margins, tax rates, and discount rates, required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the determination of fair value of indefinite-lived intangible assets related to certain management contracts included the following, among others:

- We tested the design and operating effectiveness of controls over the Company’s indefinite-lived intangible asset impairment analysis, including those related to management’s assessment of the factors that impact the fair value of the Company’s indefinite-lived intangible assets. This includes controls related to management’s revenue basis points, projected AUM growth rates, operating margins, tax rates, and the determination of the discount rates.
- We evaluated the reasonableness of management’s AUM, revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates by comparing management’s projections to historical amounts, internal communications to management and the Board of Directors, and forecasted information included in analyst and industry reports for the Company and certain of its peer companies.
- We evaluated management’s ability to accurately project revenue basis points, AUM growth rates, operating margins and tax rates, by comparing actual results to management’s historical forecasts.
- With the assistance of our fair value specialists, we evaluated the reasonableness of the Company’s valuation methodology and assumptions, including the determination of the discount rates by: (1) testing the source information underlying the determination of the discount rate and the mathematical accuracy of the evaluation and (2) developing a range of independent estimates and comparing those to the discount rate selected by management.
- We evaluated the impact of changes in management’s forecasts from July 31, 2024, the annual impairment assessment date, to December 31, 2024.

/s/ Deloitte & Touche LLP
New York, New York
February 25, 2025

We have served as the Company's auditor since 2002.

BlackRock, Inc.
Notes to the Consolidated Financial Statements

1. Business Overview

BlackRock, Inc. (together, with its subsidiaries, unless the context otherwise indicates, "BlackRock" or the "Company") is a leading publicly traded investment management firm providing a broad range of investment management and technology services to institutional and retail clients worldwide. On October 1, 2024, BlackRock completed the acquisition of 100% of the issued and outstanding limited liability company interests of Global Infrastructure Management, LLC ("GIP" or the "GIP Transaction"). See Note 3, *Acquisitions,* for information on the GIP Transaction. As a result of the closing of the GIP Transaction, (1) BlackRock, Inc. (formerly known as BlackRock Funding, Inc. ("BlackRock Funding")) ("New BlackRock") became the ultimate parent company of BlackRock Finance, Inc. (formerly known as BlackRock, Inc.) ("Old BlackRock"), GIP and their respective subsidiaries and (2) each share of common stock, $0.01 par value, of Old BlackRock issued and outstanding immediately prior to the closing of the GIP Transaction was converted automatically into one share of common stock, $0.01 par value, of New BlackRock. New BlackRock also changed its name from "BlackRock Funding, Inc." to "BlackRock, Inc." and Old BlackRock changed its name from "BlackRock, Inc." to "BlackRock Finance, Inc." In addition, New BlackRock became the publicly listed company and retained the ticker symbol "BLK". References herein to BlackRock or the Company for any period (1) prior to the closing of the GIP Transaction on October 1, 2024 refer to Old BlackRock and (2) thereafter refer to New BlackRock.

BlackRock's diverse platform of alpha-seeking active, private markets, index and cash management investment strategies across asset classes enables the Company to offer choice and tailor investment and asset allocation solutions for clients. Product offerings include single- and multi-asset portfolios investing in equities, fixed income, private markets, liquid alternatives and money market instruments. Products are offered directly and through intermediaries in a variety of vehicles, including open-end and closed-end mutual funds, iShares® exchange-traded funds ("ETFs"), separate accounts, collective trust funds and other pooled investment vehicles. BlackRock also offers technology services, including the investment and risk management technology platform, Aladdin®, Aladdin Wealth™, eFront®, and Cachematrix®, as well as advisory services and solutions to a broad base of institutional and wealth management clients.

2. Significant Accounting Policies

Basis of Presentation

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") and include the accounts of the Company and its controlled subsidiaries. Noncontrolling interests ("NCI") on the consolidated statements of financial condition represent the portion of consolidated sponsored investment products ("CIPs") and a consolidated affiliate in which the Company does not have direct equity ownership. Intercompany balances and transactions have been eliminated upon consolidation.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting periods. Actual results could differ from those estimates.

Certain prior period presentations were reclassified to ensure comparability with current period classifications.

Accounting Pronouncements Adopted in 2024

Segment Reporting. In November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-07, *Improvements to Reportable Segment Disclosures* ("ASU 2023-07"), which requires incremental disclosures about reportable segments but does not change the definition of a segment or the guidance for determining reportable segments. The new guidance requires disclosure of significant segment expenses that are (1) regularly provided to (or easily computed from information regularly provided to) the chief operating decision maker ("CODM") and (2) included in the reported measure of segment profit or loss. The new standard also requires companies to disclose the title and position of the individual (or the name of the committee) identified as the CODM, allows companies to disclose multiple measures of segment profit or loss if those measures are used to assess performance and allocate resources, and is applicable to companies with a single reportable segment. The Company adopted disclosure requirements of ASU 2023-07 during the year ended December 31, 2024. See Note 27, *Segment Information,* for further detail.

Recent Accounting Pronouncements Not Yet Adopted

Income Tax Disclosure Requirements. In December 2023, the FASB issued ASU 2023-09, *Improvements to Income Tax Disclosures* ("ASU 2023-09"), which enhances interim and annual income tax disclosures. The two primary enhancements disaggregate existing income tax disclosures related to the effective tax rate reconciliation and income taxes paid. The additional disclosure requirements under ASU 2023-09 are required to be applied prospectively and are effective for the Company on January 1, 2025. The Company does not expect the additional disclosure requirements under ASU 2023-09 to have a material impact on the consolidated financial statements.

Disaggregation of Income Statement Expenses. In November 2024, the FASB issued ASU 2024-03, *Disaggregation of Income Statement Expenses* ("ASU 2024-03"), which requires entities to disaggregate in a tabular presentation disclosures about specific types of expenses included in the expense captions presented on the face of the income statement, as well as disclosures about selling expenses. Specifically, ASU 2024-03 requires disaggregation of expense captions that include any of the following natural expenses: (1) purchases of inventory, (2) employee compensation, (3) depreciation, (4) intangible asset amortization, and (5) depreciation, depletion, and amortization recognized as part of oil- and gas-producing activities or other types of depletion expenses. The requirements are effective for fiscal years beginning after December 15, 2026, and interim periods within fiscal years beginning after December 15, 2027 and are required to be applied prospectively with the option for retrospective application. Early adoption is permitted. The Company does not expect the additional disclosure requirements under ASU 2024-03 to have a material impact on the consolidated financial statements.

Cash and Cash Equivalents. Cash and cash equivalents primarily consists of cash, money market funds and short-term, highly liquid investments with original maturities of three months or less. Cash and cash equivalent balances that are legally restricted from use by the Company are recorded in other assets on the consolidated statements of financial condition. Cash balances maintained by consolidated VIEs and voting rights entities ("VREs") are not considered legally restricted and are included in cash and cash equivalents on the consolidated statements of financial condition.

Investments

Investments in Debt Securities. The Company classifies debt investments as held-to-maturity or trading based on the Company's intent and ability to hold the debt security to maturity or its intent to sell the security.

Held-to-maturity securities are purchased with the positive intent and ability to be held to maturity and are recorded at amortized cost on the consolidated statements of financial condition.

Trading securities are those investments that are purchased principally for the purpose of selling them in the near term. Trading securities are carried at fair value on the consolidated statements of financial condition with changes in the fair value recorded through net income ("FVTNI") within nonoperating income (expense). Trading securities include certain investments in collateralized loan obligations ("CLOs") for which the fair value option is elected in order to reduce operational complexity of bifurcating embedded derivatives.

Investments in Equity Securities. Equity securities are generally carried at fair value on the consolidated statements of financial condition with changes in the FVTNI within nonoperating income (expense). For nonmarketable equity securities, the Company generally elects to apply the practicality exception to fair value measurement, under which such securities will be measured at cost, less impairment, plus or minus observable price changes for identical or similar securities of the same issuer with such changes recorded through net income within nonoperating income (expense). Dividends received are recorded as dividend income within nonoperating income (expense).

Equity Method. The Company applies the equity method of accounting for equity investments where the Company does not consolidate the investee, but can exert significant influence over the financial and operating policies of the investee. The evaluation of whether the Company exerts control or significant influence over the financial and operational policies of its investees is based on the facts and circumstances surrounding each individual investment and is generally considered to exist when the Company's ownership interest in the investee is between 20% and 50%, or lower for co-investments in certain sponsored investment funds generally structured as partnerships or similar vehicles. Factors considered in these evaluations may include the type of investment, the legal structure of the investee, the terms of BlackRock's contractual agreements, including investor voting or other rights, any influence BlackRock may have on the governing board of the investee, the legal rights of other investors in the entity pursuant to the entity's operating documents and the relationship between BlackRock and other investors in the entity. The Company's share of the investee's underlying net income or loss is recorded as net gain (loss) on investments within nonoperating income (expense) and as other revenue for certain strategic investments since such investees are considered to be an extension of the Company's core business. The Company's share of net income of the investee is recorded based upon the most current information available at the time, which may precede the date of the consolidated statement of financial condition. Distributions received reduce the Company's carrying value of the investment and the cost basis if deemed to be a return of capital. The Company classifies distributions in the consolidated statements of cash flows as either distributions of earnings (operating) or distributions of capital (investing) based on the nature of the distribution.

Impairments of Investments. Management periodically assesses equity method, nonmarketable investments, and held-to-maturity investments for impairment. If impairment exists, an impairment charge would be recorded for the excess of the carrying amount of the investment over its estimated fair value in the consolidated statements of income.

For equity method investments and nonmarketable investments, impairment evaluation considers qualitative factors, including the financial conditions and specific events related to an investee, that may indicate the fair value of the investment is less than its carrying value. For held-to-maturity investments, impairment is evaluated using market values, where available, or the expected future cash flows of the investment.

For the Company's investments in CLOs, the Company reviews cash flow estimates over the life of each CLO investment. On a quarterly basis, if the present value of the estimated future cash flows is lower than the carrying value of the investment and there is an adverse change in estimated cash flows, an impairment is considered to be other-than-temporary.

Consolidation. The Company performs an analysis for investment products to determine if the product is a VIE or a VRE. Factors considered in this analysis include the entity's legal organization, the entity's capital structure, the rights of equity investment holders and the Company's contractual involvement with, and economic interest in, the entity and any related party or de facto agent implications of the Company's involvement with the entity. Entities that are determined to be VIEs are consolidated if the Company is the primary beneficiary ("PB") of the entity. VREs are typically consolidated if the Company holds the majority voting interest. Upon the occurrence of certain events (such as contributions and redemptions, either by the Company, or third parties, or amendments to an entity's governing documents), management reviews and reconsiders its previous conclusion regarding the status of an entity as a VIE or a VRE.

Consolidation of Variable Interest Entities. Certain investment products for which a controlling financial interest is achieved through arrangements that do not involve or are not directly linked to voting interests are deemed consolidated VIEs. BlackRock reviews factors, including whether or not (1) the entity has equity at risk that is sufficient to permit the entity to finance its activities without additional subordinated support from other parties and (2) the equity holders at risk have the obligation to absorb losses, the right to receive residual returns, and the right to direct the activities of the entity that most significantly impact the entity's economic performance, to determine if the investment product is a VIE.

The PB of a VIE is defined as the variable interest holder that has a controlling financial interest in the VIE. A controlling financial interest is defined as (1) the power to direct the activities of the VIE that most significantly impact its economic performance and (2) the obligation to absorb losses of the entity or the right to receive benefits from the entity that potentially could be significant to the VIE. The Company generally consolidates VIEs in which it holds an economic interest of 10% or greater and deconsolidates such VIEs once economic interest falls below 10%. Management continually reconsiders whether the Company is deemed to be a VIE's PB.

Consolidation of Voting Rights Entities. BlackRock is required to consolidate an investee to the extent that BlackRock can exert absolute control over the financial and operating policies of the investee, which generally exists if there is a greater than 50% voting equity interest.

Retention of Specialized Investment Company Accounting Principles. Upon consolidation of sponsored investment products, the Company retains the specialized investment company accounting principles of the underlying funds. All of the underlying investments held by such CIPs are carried at fair value with corresponding changes in the investments' fair values reflected in net income within nonoperating income (expense). When the Company no longer controls these funds due to reduced ownership percentage or other reasons, the funds are deconsolidated and accounted for as an equity method investment or equity securities FVTNI.

Separate Account Assets and Liabilities. Separate account assets are maintained by BlackRock Life Limited, a wholly owned subsidiary of the Company, which is a registered life insurance company in the United Kingdom ("UK"), and represent segregated assets held for purposes of funding individual and group pension contracts. The life insurance company does not underwrite any insurance contracts that involve any insurance risk transfer from the insured to the life insurance company. The separate account assets primarily include equity securities, debt securities, money market funds and derivatives. The separate account assets are not subject to general claims of the creditors of BlackRock. These separate account assets and the related equal and offsetting liabilities are recorded as separate account assets and separate account liabilities on the consolidated statements of financial condition.

The net investment income attributable to separate account assets supporting individual and group pension contracts accrues directly to the contract owner and is not reported on the consolidated statements of income. While BlackRock has no economic interest in these separate account assets and liabilities, BlackRock earns policy administration and management fees associated with these products, which are included in investment advisory, administration fees and securities lending revenue on the consolidated statements of income.

Separate Account Collateral Assets Held and Liabilities Under Securities Lending Agreements. The Company facilitates securities lending arrangements whereby securities held by separate accounts maintained by BlackRock Life Limited are lent to third parties under global master securities lending agreements. In exchange, the Company receives collateral by obtaining either (1) legal title or (2) first ranking priority security interest. The minimum collateral values generally range from approximately 102% to 112% of the value of the securities lent in order to reduce counterparty risk. The required collateral value is calculated on a daily basis. The global master securities lending agreements provide the Company the right to request additional collateral or, in the event of borrower default, the right to liquidate collateral. The securities lending transactions entered into by the Company are accompanied by an agreement that entitles the Company to request the borrower to return the securities at any time; therefore, these transactions are not reported as sales.

In situations where the Company receives the legal title to collateral under these securities lending arrangements, the Company records an asset on the consolidated statements of financial condition and an equal collateral liability for the obligation to return the collateral. Additionally, in situations where the Company obtains a first ranking priority security interest in the collateral, the Company does not have the ability to pledge or resell the collateral and therefore does not record the collateral on the consolidated statements of financial condition. At December 31, 2024 and 2023, the fair value of loaned securities held by separate accounts was approximately $9.9 billion and $9.3 billion, respectively, and the fair value of the collateral under these securities lending agreements was approximately $10.6 billion and $10.1 billion, respectively, of which approximately $6.1 billion as of 2024 and $4.6 billion as of 2023 was recognized on the consolidated statements of financial condition. During 2024 and 2023, the Company had not resold or repledged any of the collateral received under these arrangements. The securities lending revenue earned from lending securities held by the separate accounts is included in investment advisory, administration fees and securities lending revenue on the consolidated statements of income.

Property and Equipment. Property and equipment are recorded at cost less accumulated depreciation. Depreciation is generally determined by cost less any estimated residual value using the straight-line method over the estimated useful lives of the various classes of property and equipment. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life or the remaining lease term.

The Company capitalizes certain costs incurred in connection with developing or obtaining software within property and equipment. Capitalized software costs are amortized, beginning when the software product is ready for its intended use, over the estimated useful life of the software of approximately three years.

Goodwill and Intangible Assets. Goodwill represents the cost of a business acquisition in excess of the fair value of the net assets acquired. The Company has determined that it has one reporting unit for goodwill impairment testing purposes, the consolidated BlackRock single operating segment, which is consistent with internal management reporting and management's oversight of operations. The Company performs an impairment assessment of its goodwill at least annually, as of July 31. In its assessment of goodwill for impairment, the Company considers such factors as the book value and market capitalization of the Company as well as other qualitative factors. See Note 11, *Goodwill*, for further information on the Company's goodwill.

Intangible assets are comprised of indefinite-lived intangible assets and finite-lived intangible assets acquired in a business acquisition. The value of contracts to manage assets in proprietary open-end funds and collective trust funds and certain other commingled products without a specified termination date is generally classified as indefinite-lived intangible assets. In addition, trade names/trademarks are considered indefinite-lived intangible assets when they are expected to generate cash flows indefinitely.

Indefinite-lived intangible assets and goodwill are not amortized. Finite-lived investor/customer relationships, technology-related assets, and management contracts, which relate to acquired separate accounts and funds, that are expected to contribute to the future cash flows of the Company for a specified period of time, are amortized over their estimated useful lives. On a quarterly basis, the Company considers whether the indefinite-lived and finite-lived classifications are still appropriate.

The Company performs assessments to determine if any intangible assets are potentially impaired at least annually, as of July 31. The carrying value of finite-lived assets and their remaining useful lives are reviewed to determine if circumstances exist which may indicate a potential impairment or revisions to the amortization period.

In evaluating whether it is more likely than not that the fair value of indefinite-lived intangibles is less than its carrying value, BlackRock assesses various significant quantitative factors, including assets under management (“AUM”), revenue basis points, projected AUM growth rates, operating margins, tax rates and discount rates. If an indefinite-lived intangible is determined to be more likely than not impaired, then the fair value of the asset is compared with its carrying value and any excess of the carrying value over the fair value would be recognized as an expense in the period in which the impairment occurs. See Note 12, *Intangible Assets*, for further information on the Company’s intangible assets.

For finite-lived intangible assets, if potential impairment circumstances are considered to exist, the Company will perform a recoverability test using an undiscounted cash flow analysis. If the carrying value of the asset is determined not to be recoverable based on the undiscounted cash flow test, the difference between the carrying value of the asset and its current fair value would be recognized as an expense in the period in which the impairment occurs.

Consolidated Affiliate. The Company owns 50.1% of an asset management company in China - BlackRock CCB Wealth Management Company Ltd. ("WMC"). The Company consolidates WMC, which it deems to be a VRE, because it exerts control over the financial and operating policies of the entity, based on the Company's 50.1% ownership and voting rights.

Noncontrolling Interests. NCI consist of third-party ownership interests in the Company's CIPs ("NCI – CIPs") and the WMC. The Company reports NCI in stockholders' equity, separate from the parent's equity, on the consolidated statements of financial condition. NCI that are redeemable at the option of the holders are classified as temporary equity at estimated redemption value and nonredeemable NCI are classified as a component of permanent equity in the consolidated statements of financial condition. In addition, the Company reports net income (loss) attributable to redeemable and nonredeemable NCI holders in net income (loss) attributable to NCI in the consolidated statements of income.

Treasury Stock. The Company records common stock purchased for treasury at cost. At the date of subsequent reissuance, the treasury stock account is reduced by the cost of such stock using the average cost method.

Revenue Recognition. Revenue is recognized upon transfer of control of promised services to customers in an amount to which the Company expects to be entitled in exchange for those services. The Company enters into contracts that can include multiple services, which are accounted for separately if they are determined to be distinct. Consideration for the Company's services is generally in the form of variable consideration because the amount of fees is subject to market conditions that are outside of the Company's influence. The Company includes variable consideration in revenue when it is no longer probable of significant reversal, i.e. when the associated uncertainty is resolved. For some contracts with customers, the Company has discretion to involve a third-party in providing services to the customer. Generally, the Company is deemed to be the principal in these arrangements because the Company controls the promised services before they are transferred to customers, and accordingly presents the revenue gross of related costs.

Investment Advisory, Administration Fees and Securities Lending Revenue. Investment advisory and administration fees are recognized as the services are performed over time because the customer is receiving and consuming the benefits as they are provided by the Company. Fees are primarily based on agreed-upon percentages of AUM and recognized for services provided during the period, which are distinct from services provided in other periods. Such fees are affected by changes in AUM, including market appreciation or depreciation, foreign exchange translation and net inflows or outflows. Investment advisory and administration fees for investment funds are shown net of fee waivers. In addition, the Company may contract with third parties to provide sub-advisory services on its behalf. The Company presents the investment advisory fees and associated costs to such third-party advisors on a gross basis where it is deemed to be the principal and on a net basis where it is deemed to be the agent. Management judgment involved in making these assessments is focused on ascertaining whether the Company is primarily responsible for fulfilling the promised service.

The Company also earns revenue by lending securities on behalf of clients, primarily to highly rated banks and broker-dealers. The securities loaned are collateralized by either cash or securities, generally ranging from 102% to 112% of the value of the loaned securities. Securities lending fees are based on (1) a percentage of the notional value of the loaned securities and (2) a spread between the interest earned on the reinvested cash collateral and the amount rebated to the borrower. Revenue is recognized over time as services are performed. Generally, the securities lending fees are shared between the Company and the funds or other third-party accounts managed by the Company from which the securities are borrowed. For 2024, 2023 and 2022, securities lending revenue earned by the Company totaled $615 million, $675 million and $599 million, respectively, and is recorded in investment advisory, administration and securities lending revenue on the consolidated statements of income. Investment advisory, administration fees and securities lending revenue are reported together as the fees for these services often are agreed upon with clients as a bundled fee.

Money Market Fee Waivers. The Company may voluntarily waive a portion of its management fees on certain money market funds to ensure that they maintain a targeted level of daily net investment income (the "Yield Support Waivers"). There were no Yield Support Waivers during 2024 and 2023. During 2022, these waivers resulted in a reduction of management fees of approximately $72 million, which was partially offset by a reduction of BlackRock's distribution and servicing costs paid to financial intermediaries. The Company may increase or decrease the level of Yield Support Waivers in future periods.

Investment Advisory Performance Fees / Carried Interest. The Company receives investment advisory performance fees, including incentive allocations (carried interest) from certain actively managed investment funds and certain separately managed accounts. These performance fees are dependent upon exceeding specified relative or absolute investment return thresholds, which vary by product or account, and include monthly, quarterly, annual or longer measurement periods.

Performance fees, including carried interest, are generated on certain management contracts when performance hurdles are achieved. Such performance fees are recognized when the contractual performance criteria have been met and when it is determined that they are no longer probable of significant reversal. Given the unique nature of each fee arrangement, contracts with customers are evaluated on an individual basis to determine the timing of revenue recognition. Significant judgment is involved in making such determination. Performance fees typically arise from investment management services that began in prior reporting periods. Consequently, a portion of the fees the Company recognizes may be partially related to the services performed in prior periods that meet the recognition criteria in the current period. At each reporting date, the Company considers various factors in estimating performance fees to be recognized, including carried interest.

The Company is allocated carried interest from certain alternative investment products upon exceeding performance thresholds. The Company may be required to reverse/return all, or part, of such carried interest allocations/distributions depending upon future performance of these funds. Carried interest subject to such clawback provisions is recorded in investments or cash and cash equivalents to the extent that it is distributed, on the Company's consolidated statements of financial condition.

The Company records a liability for deferred carried interest to the extent it receives cash or capital allocations related to carried interest prior to meeting the revenue recognition criteria. A portion of the deferred carried interest may also be paid to certain employees. The ultimate timing of the recognition of performance fee revenue and related compensation expense, if any, is unknown.

Technology services revenue. The Company offers investment management technology systems, risk management services, wealth management and digital distribution tools, all on a fee basis. Clients include banks, insurance companies, official institutions, pension funds, asset managers, retail distributors and other investors. Fees earned for technology services are primarily recorded as services are performed over time and are generally determined using the value of positions on the Aladdin platform, or on a fixed-rate basis. Revenue derived from the sale of software licenses is recognized upon the granting of access rights.

Distribution Fees. The Company earns distribution and service fees related to distributing investment products and shareholder support services for investment portfolios. Distribution fees are passed-through to third-party distributors, which perform various fund distribution services and shareholder servicing of certain funds on the Company's behalf, and are recognized as distribution and servicing costs. The Company presents distribution fees and related distribution and servicing costs incurred on a gross basis.

Distribution fees primarily consist of ongoing distribution fees, shareholder servicing fees and upfront sales commissions for serving as the principal underwriter and/or distributor for certain managed mutual funds. The service of distribution is satisfied at the point in time when an investor makes an investment in a share class of the managed mutual funds. Fees are generally considered variable consideration because they are based on the value of AUM and are uncertain on trade date. Accordingly, the Company recognizes distribution fees when the amounts become known and the portion recognized in the current period may relate to distribution services performed in prior periods. Upfront sales commissions are recognized on a trade date basis. Shareholder servicing fees are based on AUM and recognized in revenue as the services are performed.

Advisory and other revenue. Advisory and other revenue primarily includes fees earned for advisory services, fees earned for transition management services primarily comprised of commissions recognized in connection with buying and selling securities on behalf of customers, and equity method investment earnings related to certain strategic investments.

Advisory services fees are determined using fixed-rate fees and are recognized over time as the related services are completed.

Commissions related to transition management services are recorded on a trade-date basis as transactions occur.

Stock-based Compensation. The Company recognizes compensation cost for equity classified awards based on the grant-date fair value of the award. The compensation cost is recognized over the period during which an employee is required to provide service (usually the vesting period) in exchange for the stock-based award.

The Company generally measures the grant-date fair value of restricted stock units ("RSUs") using the Company's stock price on the date of grant. The grant-date fair value related to the October 2024 incentive retention RSUs granted in connection with the GIP Transaction, are reduced by the present value of the dividends expected to be paid on the shares during the vesting period discounted at the appropriate risk-free interest rate, given that they are not entitled to participate in dividends until they vest (See Note 3, *Acquisitions* and Note 18, *Stock-Based Compensation* for further information on the GIP Transaction). Stock-based awards may have performance, market and/or service conditions. For employee stock options and awards with market conditions, the Company uses pricing models. Compensation cost for awards containing performance conditions is recognized if it is probable that the conditions will be achieved. The probability of achievement is assessed on a quarterly basis. If a stock-based award is modified after the grant-date, incremental compensation cost is recognized for an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification. Awards under the Company's stock-based compensation plans vest over various periods. Compensation cost is recorded by the Company on a straight-line basis over the requisite service period for each separate vesting portion of the award as if the award is, in-substance, multiple awards and is adjusted for actual forfeitures as they occur.

The Company amortizes the grant-date fair value of stock-based compensation awards made to retirement-eligible employees over the requisite service period. Upon notification of retirement, the Company accelerates the unamortized portion of the award over the contractually required retirement notification period.

The Company recognizes all excess tax benefits and deficiencies in income tax expense on the consolidated statements of income, which results in volatility of income tax expense as a result of fluctuations in the Company's stock price. Accordingly, the Company recorded a discrete income tax benefit of $37 million, $41 million and $87 million during 2024, 2023 and 2022, respectively, for vested RSUs where the grant date stock price was lower than the vesting date stock price.

Distribution and Servicing Costs. Distribution and servicing costs include payments to third parties, primarily associated with distribution and servicing of client investments in certain BlackRock products. Distribution and servicing costs are expensed as incurred.

Direct Fund Expense. Direct fund expense, which is expensed as incurred, primarily consists of third-party non-advisory expense incurred by BlackRock related to certain investment products for the use of certain index trademarks, reference data for certain indices, custodial services, fund administration, fund accounting, transfer agent services, shareholder reporting services, audit and tax services as well as other fund-related expense directly attributable to the non-advisory operations of the fund.

Leases. The Company determines if a contract is a lease or contains a lease at inception. The Company accounts for its office facility leases as operating leases, which may include escalation clauses that are based on an index or market rate. The Company accounts for lease and non-lease components, including common areas maintenance charges, as a single component for its leases. The Company elected the short-term lease exception for leases with an initial term of 12 months or less. Consequently, such leases are not recorded on the consolidated statements of financial condition. The Company's lease terms include options to extend or terminate the lease when it is reasonably certain they will be exercised or not.

The Company recognizes operating right-of-use ("ROU") assets and operating lease liabilities on the consolidated statements of financial condition based on the present value of future lease payments over the lease term at the commencement date discounted using an incremental borrowing rate ("IBR"). The IBR for individual leases is estimated considering the Company's or a subsidiary's credit rating using various financial metrics, such as revenue, operating margin and revenue growth, and, as appropriate, performing market analysis of yields on publicly traded bonds (secured or unsecured) with similar terms of comparable companies in a similar economic environment. ROU assets are tested for impairment when there is an indication that the carrying value of an asset may not be recoverable. Fixed lease payments made over the lease term are recorded as lease expense on a straight-line basis. Variable lease payments based on usage, changes in an index or market rate are expensed as incurred.

Foreign Exchange. Foreign currency transactions are recorded at the exchange rates prevailing on the dates of the transactions. Monetary assets and liabilities that are denominated in foreign currencies are subsequently remeasured into the functional currencies of the Company's subsidiaries at the rates prevailing at each statement of financial condition date. Gains and losses arising on remeasurement are included in general and administration expense on the consolidated statements of income. Revenue and expenses are translated at average exchange rates during the period. Gains or losses resulting from translating foreign currency financial statements into United States ("US") dollars are included in accumulated other comprehensive income (loss) ("AOCI"), a separate component of stockholders' equity, on the consolidated statements of financial condition.

Income Taxes. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using currently enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized on the consolidated statements of income in the period that includes the enactment date.

Management periodically assesses the recoverability of its deferred income tax assets based upon expected future earnings, taxable income in prior carryback years, future deductibility of the asset, changes in applicable tax laws and other factors. If management determines that it is not more likely than not that the deferred tax asset will be fully recoverable in the future, a valuation allowance will be established for the difference between the asset balance and the amount expected to be recoverable in the future. This allowance will result in additional income tax expense. Further, the Company records its income taxes receivable and payable based upon its estimated income tax position.

Earnings per Share ("EPS"). Basic EPS is calculated by dividing net income applicable to common shareholders by the weighted-average number of shares outstanding during the period. Diluted EPS includes the determinants of basic EPS and common stock equivalents outstanding during the period. Diluted EPS is computed using the treasury stock method.

Business Segments. The Company's management directs BlackRock's operations as one business, the asset management business. The Company utilizes a consolidated approach to assess performance and allocate resources. As such, the Company operates in one business segment.

Fair Value Measurements

Hierarchy of Fair Value Inputs. The Company uses a fair value hierarchy that prioritizes inputs to valuation approaches used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Assets and liabilities measured and reported at fair value are classified and disclosed in one of the following categories:

<u>Level 1 Inputs:</u>

Quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date.

- Level 1 assets may include listed mutual funds, ETFs, listed equities, commodities and certain exchange-traded derivatives.

<u>Level 2 Inputs:</u>

Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; quotes from pricing services or brokers for which the Company can determine that orderly transactions took place at the quoted price or that the inputs used to arrive at the price are observable; and inputs other than quoted prices that are observable, such as models or other valuation methodologies.

- Level 2 assets may include debt securities, loans held within consolidated CLOs, short-term floating-rate notes, asset-backed securities, as well as over-the-counter derivatives, including interest rate swaps and foreign currency exchange contracts that have inputs to the valuations that generally can be corroborated by observable market data.

<u>Level 3 Inputs:</u>

Unobservable inputs for the valuation of the asset or liability, which may include nonbinding broker quotes. Level 3 assets include investments for which there is little, if any, market activity. These inputs require significant management judgment or estimation.

- Level 3 assets may include direct private equity investments, including those held within CIPs, investments in CLOs and loans held within consolidated CLOs and CIPs.
- Level 3 liabilities may include borrowings of consolidated CLOs and contingent liabilities related to acquisitions valued using the income approach based on unobservable market data, or other valuation techniques.

Significance of Inputs. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument.

Valuation Approaches. The fair values of certain Level 3 assets and liabilities were determined using various valuation approaches as appropriate, including third-party pricing vendors, broker quotes and market and income approaches.

A significant number of inputs used to value equity, debt securities, and loans held within CLOs and CIPs are sourced from third-party pricing vendors. Generally, prices obtained from pricing vendors are categorized as Level 1 inputs for identical securities traded in active markets and as Level 2 for other similar securities if the vendor uses observable inputs in determining the price.

In addition, quotes obtained from brokers generally are nonbinding and categorized as Level 3 inputs. However, if the Company is able to determine that market participants have transacted for the asset in an orderly manner near the quoted price or if the Company can determine that the inputs used by the broker are observable, the quote is classified as a Level 2 input.

Investments Measured at Net Asset Value. As a practical expedient, the Company uses net asset value (“NAV”) as the fair value for certain investments. The inputs to value these investments may include the Company’s capital accounts for its partnership interests in various alternative investments, including hedge funds, real assets and private equity funds. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair value policies at the underlying fund generally require the fund to utilize pricing/valuation information from third-party sources, including independent appraisals. However, in some instances, current valuation information for illiquid securities or securities in markets that are not active may not be available from any third-party source or fund management may conclude that the valuations that are available from third-party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that could be used as an input to value these investments.

Fair Value Assets and Liabilities of Consolidated CLO. The Company applies the fair value option provisions for eligible assets, including loans, held by a consolidated CLO. As the fair value of the financial assets of the consolidated CLO is more observable than the fair value of the borrowings of the consolidated CLO, the Company measures the fair value of the borrowings of the consolidated CLO equal to the fair value of the assets of the consolidated CLO less the fair value of the Company’s economic interest in the CLO.

Derivatives and Hedging Activities. The Company does not use derivative financial instruments for trading or speculative purposes. The Company uses derivative financial instruments primarily for purposes of hedging exposures to fluctuations in foreign currency exchange rates of certain assets and liabilities, and market price and interest rate exposures with respect to its total portfolio of seed investments in sponsored investment products. Certain CIPs also utilize derivatives as a part of their investment strategies.

In addition, the Company uses derivatives and makes investments to economically hedge market valuation changes on certain deferred cash compensation plans, for which the final value of the deferred amount distributed to employees in cash upon vesting is determined based on the returns of specified investment funds. The Company recognizes compensation expense for the appreciation (depreciation) of the deferred cash compensation liability in proportion to the vested amount of the award during a respective period, while the gain (loss) to economically hedge these plans is immediately recognized in nonoperating income (expense). See Note 5, *Investments*, and Note 9, *Derivatives and Hedging*, for further information on the Company’s investments and derivatives, respectively, used to economically hedge these deferred cash compensation plans.

The Company records all derivative financial instruments as either assets or liabilities at fair value on a gross basis in the consolidated statements of financial condition. Credit risks are managed through master netting and collateral support agreements. The amounts related to the right to reclaim or the obligation to return cash collateral may not be used to offset amounts due under the derivative instruments in the normal course of settlement. Therefore, such amounts are not offset against fair value amounts recognized for derivative instruments with the same counterparty and are included in other assets and other liabilities. Changes in the fair value of the Company’s derivative financial instruments are recognized in earnings and, where applicable, are offset by the corresponding gain or loss on the related foreign-denominated or hedged assets or liabilities, on the consolidated statements of income.

The Company may also use financial instruments designated as net investment hedges for accounting purposes to hedge net investments in international subsidiaries, the functional currency of which is not US dollars. The gain or loss from revaluing net investment hedges at the spot rate is deferred and reported within AOCI on the consolidated statements of financial condition. The Company reassesses the effectiveness of its net investment hedge at least quarterly.

3. Acquisitions

GIP

As discussed in Note 1, *Business Overview,* on October 1, 2024, BlackRock completed the acquisition of GIP, a leading independent infrastructure fund manager. BlackRock expects the combination of GIP with BlackRock’s complementary infrastructure offerings will create a broad global infrastructure franchise with differentiated origination and asset management capabilities.

Consideration at close included approximately $3 billion in cash, funded through the issuance of long-term notes in March 2024 (See Note 15, *Borrowings* for further information), and 6.9 million of unregistered shares of BlackRock common stock. The shares were valued at $5.9 billion at close, based on the price of BlackRock's common stock on September 30, 2024 of approximately $950, discounted for security-specific registration restrictions for two years after closing, resulting in a value of approximately $855 per share. In addition, as part of the purchase consideration, a contingent consideration payment, all in stock, may be due subject to achieving certain performance targets. The contingent consideration payment, if any, ranges from 4.0 million to 5.2 million shares, and will be valued based on the price of BlackRock's common stock at the time the contingency is resolved. The payment is expected to be payable no later than December 31, 2028 or based on the achievement of the agreed upon performance targets. The fair value of the contingent consideration payment, which was determined by using the income approach with the assistance of a third-party fair value specialist, was $4.2 billion at close, and is recorded within contingent consideration liabilities in the consolidated statements of financial condition. Certain significant inputs were used to determine the fair value, including assumptions on discount rates as well as estimates of the timing and amounts of fundraising forecasts, stock and AUM volatility, and correlation between stock price and AUM (Level 3 inputs). The contingent consideration payment is classified as a liability as the monetary value of the consideration to be delivered in shares is predominately based on achieving certain performance targets.

In addition, on October 1, 2024, in connection with the GIP Transaction, the Company granted incentive retention awards of approximately $415 million of cliff-vesting RSUs and approximately $178 million of performance-based RSUs recognized as compensation expense over a period of approximately five years. See Note 18, *Stock-Based Compensation*, for additional information on the incentive retention awards issued in connection with the GIP Transaction. The Company also granted approximately $100 million of deferred cash awards in connection with the GIP Transaction, which are recognized as compensation expense over a period of approximately 50% over one year and the remaining 50% over five years.

In connection with the GIP Transaction, the Company entered into several stockholder agreements with the former owners of GIP and their respective affiliates. Each agreement, among other things, (1) sets forth various restrictions, limitations and other terms concerning the transfer of equity securities of BlackRock, which includes an initial lock-up period ending on the two-year anniversary of the closing, and (2) contains customary standstill provisions such as limiting the purchase of additional shares.

The GIP Transaction was accounted for as a business combination under the acquisition method of accounting. Accordingly, the purchase price was allocated to the assets acquired and liabilities assumed based upon their estimated fair values at the date of the transaction. The goodwill recognized in connection with the acquisition includes future benefits for BlackRock as a result of scale and anticipated synergies from a combined global infrastructure franchise. The amount of goodwill expected to be deductible for tax purposes is approximately $200 million.

The following table summarizes the consideration paid for GIP and the fair values of the assets acquired and liabilities assumed recognized at the acquisition date in this acquisition:

(in millions)	Fair Value Estimate
Finite-lived intangible assets:	
Management contracts[(1)]	**$ 1,840**
Investor relationships[(1)]	**820**
Trade name[(2)]	**80**
Goodwill	**10,297**
Operating lease ROU assets[(3)]	**75**
Other assets[(3)]	**114**
Accrued compensation and benefits[(3)]	**(154)**
Operating lease liabilities[(3)]	**(96)**
Other liabilities assumed[(3)]	**(10)**
Total consideration, net of cash acquired	**$ 12,966**
Summary of consideration, net of cash acquired:	
Cash paid	**$ 2,930**
Cash acquired	**(68)**
Closing stock consideration at fair value	**5,904**
Deferred stock consideration at fair value	**4,200**
Total cash and stock consideration	**$ 12,966**

(1) The fair value for management contracts and investor relationships was determined based on a discounted cash flow analysis (Level 3 inputs), have weighted-average estimated useful lives of approximately 8 years and 14 years, respectively, and are amortized based on their pattern of economic benefit.
(2) The fair value was determined based upon a relief from royalty method (Level 3 inputs), has a weighted-average estimated useful life of approximately 10 years and is amortized based on its pattern of economic benefit.
(3) Acquired operating lease ROU assets and operating lease liabilities were determined based on current lease guidance. The acquired book values of the remaining assets and liabilities approximated their fair values.

Transaction and integration costs incurred in connection with the GIP Transaction were approximately $195 million in 2024. These costs were primarily comprised of $130 million of compensation expense, mostly for nonrecurring retention-related deferred compensation and $65 million of other acquisition-related transaction costs, largely related to advisory fees, legal fees and consulting expenses, recorded in general and administration expense.

Finite-lived intangible assets are amortized over their useful lives, which range from 3 to 14 years. Amortization expense related to the finite-lived intangible assets was $86 million for 2024. The finite-lived intangible assets had a weighted-average remaining useful life of approximately 10 years with remaining amortization expense as follows:

(in millions) **Year**	Amount
2025	**$ 281**
2026	**323**
2027	**277**
2028	**196**
2029	**228**
2030	**269**
Thereafter	**1,079**
Total	**$ 2,653**

The following unaudited pro forma information presents combined results of operations of the Company as if the GIP Transaction and related $3.0 billion in aggregate notes issuance (see Note 15, *Borrowings*, for more information) had occurred on January 1, 2023 and are not indicative of the actual results of operations that would have been achieved nor are they indicative of future results of operations of the combined Company. The pro forma combined provision for income taxes may not represent the amount that would have resulted had BlackRock and GIP filed consolidated tax returns during the years presented.

(Unaudited) (in millions)	2024[(1)]	2023
Total revenue	**$ 21,087**	$ 18,664
Net income attributable to BlackRock, Inc.	**$ 6,318**	$ 5,025

(1) Subsequent to the closing of the GIP Transaction on October 1, 2024, GIP contributed approximately $240 million of revenue and $56 million of net income.

For purposes of the pro forma financial information above, the following pro forma adjustments and related tax effects were included as if the GIP Transaction had occurred on January 1, 2023 (unaudited):

- Compensation expense included retention-related deferred compensation awards in connection with the GIP Transaction of $285 million for the year ended December 31, 2023, and $95 million for the nine months ended September 30, 2024 (see Note 18, *Stock-Based Compensation*, for further information on retention related deferred compensation issued in connection with the GIP Transaction);
- Acquisition-related transaction costs of $65 million, which were recorded in 2024 were included in 2023 results and removed from 2024 results;
- Amortization of finite-lived intangible assets of $300 million for the year ended December 31, 2023 and $240 million for the nine months ended September 30, 2024;
- Interest expense for the $3.0 billion notes, which were issued in March 2024 in connection with the GIP Transaction, of $155 million for the year ended December 31, 2023 and $115 million for the nine months ended September 30, 2024 were included as if the issuance occurred on January 1, 2023; and
- Adjustments to reflect the tax effects of the GIP Transaction, as if GIP had been included in the Company's results as of January 1, 2023.

SpiderRock Advisors

In May 2024, BlackRock completed the acquisition of the remaining equity interest in SpiderRock Advisors ("SRA"), a leading provider of customized option overlay strategies in the US wealth market (the "SpiderRock Transaction"). This transaction expands on BlackRock's minority investment in SRA made in 2021 and reinforces BlackRock's commitment to personalized separately managed accounts. Pro forma financial information for SRA has not been presented in the table above, as the effects were not material to the Company's historical consolidated financial statements.

Kreos Capital

In August 2023, BlackRock completed the acquisition of Kreos Capital, a provider of growth and venture debt financing to companies in the technology and healthcare industries (the "Kreos Transaction"). The acquisition adds to BlackRock's position as a leading global credit asset manager and advances its ambitions to provide clients with a diverse range of private market investment products and solutions. Total consideration for the transaction was approximately $250 million, which included contingent consideration. Pro forma financial information for Kreos has not been presented in the table above, as the effects were not material to the Company's historical consolidated financial statements.

4. Cash, Cash Equivalents, and Restricted Cash

The following table provides a reconciliation of cash and cash equivalents reported within the consolidated statements of financial condition to the cash, cash equivalents, and restricted cash reported within the consolidated statements of cash flows.

(in millions)	**December 31, 2024**	December 31, 2023
Cash and cash equivalents	**$ 12,762**	$ 8,736
Restricted cash included in other assets	**17**	17
Total cash, cash equivalents and restricted cash	**$ 12,779**	$ 8,753

5. Investments

A summary of the carrying value of total investments is as follows:

(in millions)	**December 31, 2024**	**December 31, 2023**
Debt securities:		
Trading securities (including $1,743 and $1,829 held by CIPs at December 31, 2024 and December 31, 2023, respectively)	**$ 1,823**	$ 1,871
Held-to-maturity investments	**547**	617
Total debt securities	**2,370**	2,488
Equity securities at FVTNI (including $1,556 and $1,429 held by CIPs at December 31, 2024 and December 31, 2023, respectively)(1)	**1,950**	1,585
Equity method investments:		
Equity method investments(2)	**2,610**	2,515
Investments related to deferred cash compensation plans(1)	**173**	241
Total equity method investments	**2,783**	2,756
Loans held by CIPs	**145**	205
Federal Reserve Bank stock(3)	**93**	92
Carried interest(4)	**1,983**	1,975
Other investments(5)	**445**	639
Total investments	**$ 9,769**	$ 9,740

(1) Amounts include investments held to economically hedge the impact of market valuation changes on certain deferred cash compensation plans comprised of equity method investments of $173 million and $241 million at December 31, 2024 and 2023, respectively. In addition, amounts related to deferred cash compensation plans include equity securities held at FVTNI of $12 million and $14 million at December 31, 2024 and 2023, respectively.
(2) Equity method investments include BlackRock's direct investments in certain BlackRock sponsored investment funds.
(3) Federal Reserve Bank stock is held for regulatory purposes and is restricted from sale.
(4) Carried interest represents allocations to BlackRock's general partner capital accounts from certain sponsored investment funds. These balances are subject to change upon cash distributions, additional allocations or reallocations back to limited partners within the respective funds.
(5) Other investments include BlackRock's investments in nonmarketable equity securities, which are measured at cost, adjusted for observable price changes, and private equity, real asset, and commodity investments held by CIPs, which are measured at fair value.

Held-to-Maturity Investments

Held-to-maturity investments included certain investments in BlackRock sponsored CLOs. The amortized cost (carrying value) of these investments approximated fair value (primarily a Level 2 input). At December 31, 2024, \$9 million of these investments mature in less than one year, \$24 million of these investments mature between one and five years, \$326 million of these investments mature between five and ten years and \$188 million of these investments mature after ten years.

Trading Debt Securities and Equity Securities at FVTNI

A summary of the cost and carrying value of trading debt securities and equity securities at FVTNI is as follows:

	December 31, 2024		December 31, 2023	
(in millions)	**Cost**	**Fair Value**	**Cost**	**Fair Value**
Trading debt securities:				
Corporate debt	**$ 1,047**	**$ 1,061**	$ 1,225	$ 1,218
Government debt	**578**	**557**	501	489
Asset/mortgage-backed debt	**222**	**205**	185	164
Total trading debt securities	**$ 1,847**	**$ 1,823**	$ 1,911	$ 1,871
Equity securities at FVTNI:				
Equity securities/mutual funds	**$ 1,843**	**$ 1,950**	$ 1,520	$ 1,585

6. Consolidated Sponsored Investment Products

In the normal course of business, the Company is the manager of various types of sponsored investment products, which may be considered VIEs or VREs. The Company consolidates certain sponsored investment funds accounted for as VREs because it is deemed to control such funds. In addition, the Company may from time to time own equity or debt securities issued by vehicles or enter into derivatives or loan arrangements with the vehicles, each of which are considered variable interests. The Company's involvement in financing the operations of the VIEs is generally limited to its economic interest in the entity. The Company's consolidated VIEs include certain sponsored investment products in which BlackRock has an economic interest and as the investment manager, is deemed to have both the power to direct the most significant activities of the products and the right to receive benefits (or the obligation to absorb losses) that could potentially be significant to these sponsored investment products. The assets of these VIEs are not available to creditors of the Company. In addition, the investors in these VIEs have no recourse to the credit of the Company.

The following table presents the balances related to these CIPs accounted for as VIEs and VREs that were recorded on the consolidated statements of financial condition, including BlackRock's net interest in these products:

	December 31, 2024			December 31, 2023		
(in millions)	**VIEs**	**VREs**	**Total**	**VIEs**	**VREs**	**Total**
Cash and cash equivalents[1]	**$ 125**	**$ 44**	**$ 169**	$ 234	$ 54	$ 288
Investments:						
Trading debt securities	**1,497**	**246**	**1,743**	1,423	406	1,829
Equity securities at FVTNI	**1,179**	**377**	**1,556**	1,059	370	1,429
Loans	**141**	**4**	**145**	195	10	205
Other investments	**370**	**33**	**403**	427	171	598
Carried interest	**1,905**	**—**	**1,905**	1,916	—	1,916
Total investments	**5,092**	**660**	**5,752**	5,020	957	5,977
Other assets	**45**	**31**	**76**	83	39	122
Other liabilities[2]	**(2,130)**	**(93)**	**(2,223)**	(2,233)	(108)	(2,341)
Noncontrolling interest - CIPs	**(1,672)**	**(130)**	**(1,802)**	(1,625)	(226)	(1,851)
BlackRock's net interest in CIPs	**$ 1,460**	**$ 512**	**$ 1,972**	$ 1,479	$ 716	$ 2,195

(1) The Company generally cannot readily access cash and cash equivalents held by CIPs to use in its operating activities.
(2) At both December 31, 2024 and 2023, other liabilities of VIEs primarily include deferred carried interest liabilities and borrowings of a consolidated CLO.

BlackRock's total exposure to CIPs represents the value of its economic interest in these CIPs. Valuation changes associated with financial instruments held at fair value by these CIPs are reflected in nonoperating income (expense) and partially offset in net income (loss) attributable to NCI for the portion not attributable to BlackRock.

Net gain (loss) related to consolidated VIEs is presented in the following table:

(in millions)	**2024**	**2023**	**2022**
Nonoperating net gain (loss) on consolidated VIEs	**$ 234**	$ 310	$ (311)
Net income (loss) attributable to NCI on consolidated VIEs	**$ 132**	$ 174	$ (161)

7. Variable Interest Entities

Nonconsolidated VIEs. At December 31, 2024 and 2023, the Company's carrying value of assets and liabilities included on the consolidated statements of financial condition pertaining to nonconsolidated VIEs and its maximum risk of loss related to VIEs for which it held a variable interest, but for which it was not the PB, was as follows:

(in millions)	Investments	Advisory Fee Receivables	Other Net Assets (Liabilities)	Maximum Risk of Loss[1]
December 31, 2024				
Sponsored investment products	**$ 2,330**	**$ 158**	**$ (11)**	**$ 2,505**
December 31, 2023				
Sponsored investment products	$ 2,377	$ 116	$ (11)	$ 2,510

(1) At both December 31, 2024 and 2023, BlackRock's maximum risk of loss associated with these VIEs primarily related to BlackRock's investments and the collection of receivables.

The net assets of sponsored investment products that are nonconsolidated VIEs approximated $46 billion and $39 billion at December 31, 2024 and 2023, respectively.

8. Fair Value Disclosures

Fair Value Hierarchy

Assets and liabilities measured at fair value on a recurring basis

December 31, 2024 *(in millions)*	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Investments Measured at NAV[1]	Other[2]	December 31, 2024

(1) Amounts are comprised of certain investments measured at fair value using NAV (or its equivalent) as a practical expedient.
(2) Amounts are comprised of investments held at amortized cost and cost, adjusted for observable price changes, and carried interest.
(3) Level 3 amount includes corporate minority private debt investments with changes in fair value recorded in AOCI, net of tax.
(4) Level 2 amount primarily includes fair value of derivatives (See Note 9, *Derivatives and Hedging*, for more information). Level 3 amount primarily includes borrowings of a consolidated CLO classified based on the significance of unobservable inputs used for calculating the fair value of consolidated CLO assets.

(1) Amounts are comprised of certain investments measured at fair value using NAV (or its equivalent) as a practical expedient.
(2) Amounts are comprised of investments held at amortized cost and cost, adjusted for observable price changes, and carried interest.
(3) Level 1 amount includes a minority investment in a publicly traded company. Level 3 amount includes a corporate minority private debt investment with changes in fair value recorded in AOCI, net of tax.
(4) Level 2 amount primarily includes fair value of derivatives (See Note 9, *Derivatives and Hedging*, for more information). Level 3 amount primarily includes borrowings of a consolidated CLO classified based on the significance of unobservable inputs used for calculating the fair value of consolidated CLO assets, and contingent liabilities related to certain acquisitions.

Level 3 Assets. Level 3 assets predominantly include investments in nonconsolidated CLOs, loans of consolidated CIPs, and corporate minority private debt investments. Investments in CLOs and loans were valued based on single-broker nonbinding quotes or quotes from pricing services which use significant unobservable inputs. BlackRock's corporate minority private debt investments were primarily valued using the income approach by discounting the expected cash flows to a single present value. For investments utilizing a discounted cashflow valuation technique, an increase (decrease) in the discount rate or risk premium in isolation could have resulted in a significantly lower (higher) fair value measurement as of December 31, 2024 and 2023.

Level 3 Liabilities. Level 3 liabilities primarily include borrowings of a consolidated CLO, which were valued based on the fair value of the assets of the consolidated CLO less the fair value of the Company's economic interest in the CLO, as well as contingent consideration liabilities related to certain acquisitions, which were valued based upon discounted cash flow analyses using unobservable market data inputs or other valuation techniques.

At December 31, 2024, the contingent consideration liability related to the GIP Transaction was estimated using the income approach, with certain significant inputs including a risk-free discount rate of approximately 4.3% as well as current estimates of the timing and amounts of fundraising forecasts, stock and AUM volatility, and correlation between stock price and AUM (Level 3 inputs). Accordingly, changes in key inputs and assumptions described can materially impact the amount of contingent consideration expense recorded in a reporting period until the contingency is resolved. Changes in fair value are recorded within general and administration expense of the consolidated statements of income.

Nonrecurring Fair Value Measurements. The Company assessed its intangible assets for impairment during the annual impairment assessment as of July 31, 2024 and concluded that an impairment charge was required for indefinite-lived intangible assets related to certain open-end management contracts, which reduced the carrying value of these management contracts to $87 million. See Note 12, *Intangible Assets*, for more information. The fair value of these contracts was determined using a discounted cash flow analysis. The most sensitive assumptions used to determine present value were growth expectations, revenue / operating margin forecast, and the discount rate applied to the cash flow forecast, which are considered Level 3 inputs in the valuation hierarchy.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for 2024

(in millions)	December 31, 2023	Realized and Unrealized Gains (Losses)	Purchases	Sales and Maturities	Issuances and Other Settlements(1)	Transfers into Level 3	Transfers out of Level 3	December 31, 2024	Total Net Unrealized Gains (Losses) Included in Earnings(2)

Total assets	$ 300	$ 20	$ 197	$ (76)	$ (122)	$ 38	$ (20)	**$ 337**	$ 6
Liabilities:									
Other	$ 280	$ 1	$ —	$ —	$ —	$ —	$ —	**$ 279**	$ 1

(1) Issuances and other settlements amounts include a deconsolidation related to a previously consolidated VRE. In addition, issuances and other settlements include a contingent liability in connection with the Kreos Transaction, offset by repayments of borrowings of a consolidated CLO.
(2) Earnings attributable to the change in unrealized gains (losses) relating to assets and liabilities still held at the reporting date.

Realized and Unrealized Gains (Losses) for Level 3 Assets and Liabilities. Realized and unrealized gains (losses) recorded for Level 3 assets and liabilities are primarily reported in nonoperating income (expense) on the consolidated statements of income. A portion of net income (loss) related to securities held by CIPs is allocated to NCI to reflect net income (loss) not attributable to the Company.

Transfers in and/or out of Levels. Transfers in and/or out of levels are reflected when significant inputs, including market inputs or performance attributes, used for the fair value measurement become observable/unobservable.

Disclosures of Fair Value for Financial Instruments Not Held at Fair Value. At December 31, 2024 and 2023, the fair value of the Company's financial instruments not held at fair value are categorized in the table below.

	December 31, 2024		December 31, 2023		
(in millions)	**Carrying Amount**	**Estimated Fair Value**	**Carrying Amount**	**Estimated Fair Value**	**Fair Value Hierarchy**
Financial Assets(1):					
Cash and cash equivalents	**$ 12,762**	**$ 12,762**	$ 8,736	$ 8,736	Level 1 (2)(3)
Other assets	**86**	**86**	80	80	Level 1 (2)(4)
Financial Liabilities:					
Long-term borrowings	**$ 12,314**	**$ 11,680**	$ 7,918	$ 7,413	Level 2 (5)

(1) See Note 5*, Investments*, for further information on investments not held at fair value.
(2) Cash and cash equivalents, other than money market funds, are carried at either cost or amortized cost, which approximates fair value due to their short-term maturities.
(3) At December 31, 2024 and 2023, approximately $6.2 billion and $3.4 billion, respectively, of money market funds were recorded within cash and cash equivalents on the consolidated statements of financial condition. Money market funds are valued based on quoted market prices, or $1.00 per share, which generally is the NAV of the fund.
(4) At December 31, 2024 and 2023, other assets included cash collateral of approximately $69 million and $63 million, respectively. See Note 9, *Derivatives and Hedging* for further information on derivatives held by the Company. In addition, other assets included $17 million of restricted cash at both December 31, 2024 and 2023.
(5) Long-term borrowings are recorded at amortized cost, net of debt issuance costs. The fair value of the long-term borrowings, including the current portion of long-term borrowings, is determined using market prices and the EUR/USD foreign exchange rate at the end of December 2024 and 2023, respectively. See Note 15, *Borrowings*, for the fair value of each of the Company's long-term borrowings.

Investments in Certain Entities that Calculate NAV Per Share

As a practical expedient to value certain investments that do not have a readily determinable fair value and have attributes of an investment company, the Company uses NAV as the fair value. The following tables list information regarding all investments that use a fair value measurement to account for both their financial assets and financial liabilities in their calculation of a NAV per share (or equivalent).

December 31, 2024

(in millions)	Ref	Fair Value	Total Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Equity method[(1)]:					
Hedge funds/funds of hedge funds/other	**(a)**	**$ 552**	**$ 138**	**Daily/Monthly (2%) Quarterly (10%) N/R (88%)**	**1 – 90 days**

Total		$ 2,977	$ 725		

N/R – Not Redeemable

(1) Comprised of equity method investments, which include investment companies that account for their financial assets and most financial liabilities under fair value measures; therefore, the Company's investment in such equity method investees approximates fair value.

(a) This category includes hedge funds, funds of hedge funds, and other funds that invest primarily in equities, fixed income securities, private credit, opportunistic and mortgage instruments and other third-party hedge funds. The fair values of the investments have been estimated using the NAV of the Company's ownership interest in partners' capital. The liquidation period for the investments in the funds that are not subject to redemption is unknown at both December 31, 2024 and 2023.

(b) This category includes private equity funds that initially invest in nonmarketable securities of private companies, which ultimately may become public in the future. The fair values of these investments have been estimated using capital accounts representing the Company's ownership interest in the funds and may also include other performance inputs. The Company's investment in each fund is not subject to redemption and is normally returned through distributions as a result of the liquidation of the underlying assets of the private equity funds. The liquidation period for the investments in these funds is unknown at both December 31, 2024 and 2023.

(c) This category includes several real assets funds that invest directly and indirectly in real estate or infrastructure. The fair values of the investments have been estimated using capital accounts representing the Company's ownership interest in the funds. The Company's investments that are not subject to redemption or are not currently redeemable are normally returned through distributions and realizations of the underlying assets of the funds. The liquidation period for the investments in the funds that are not subject to redemptions is unknown at both December 31, 2024 and 2023. The total remaining unfunded commitments were $750 million and $272 million at December 31, 2024 and 2023, respectively. The Company's portion of the total remaining unfunded commitments was $736 million and $248 million at December 31, 2024 and 2023, respectively.

(d) This category includes hedge funds and funds of hedge funds that invest primarily in equities, fixed income securities, mortgage instruments and other third-party hedge funds. The fair values of the investments have been estimated using the NAV of the Company's ownership interest in partners' capital. The investments in hedge funds will be redeemed upon settlement of certain deferred cash compensation liabilities.

(e) This category includes the underlying third-party private equity funds within consolidated BlackRock sponsored private equity funds of funds. These investments are not subject to redemption or are not currently redeemable; however, for certain funds, the Company may sell or transfer its interest, which may need approval by the general partner of the underlying funds. Due to the nature of the investments in this category, the Company reduces its investment by distributions that are received through the realization of the underlying assets of the funds. The liquidation period for the underlying assets of these funds is unknown.

Fair Value Option

At December 31, 2024 and 2023, the Company elected the fair value option for certain investments in CLOs of approximately $72 million and $42 million, respectively, reported within investments.

In addition, the Company elected the fair value option for bank loans and borrowings of a consolidated CLO, recorded within investments and other liabilities, respectively. The following table summarizes the information related to these bank loans and borrowings at December 31, 2024 and 2023:

(in millions)	December 31, 2024	December 31, 2023
CLO loans:		
Aggregate principal amounts outstanding	**$ 156**	$ 203
Fair value	**141**	194
Aggregate principal balance in excess of (less than) fair value	**$ 15**	$ 9
CLO borrowings:		
Aggregate principal amounts outstanding	**$ 146**	$ 190
Fair value	**129**	180
Aggregate principal balance in excess of (less than) fair value	**$ 17**	$ 10

At December 31, 2024, the principal amounts outstanding of the borrowings issued by the consolidated CLO mature in 2030, and may be repaid prior to maturity at any time.

During the year ended December 31, 2024 and 2023, the net gains (losses) from the change in fair value of the bank loans and borrowings held by the consolidated CLO were not material and were recorded in net gain (loss) on the consolidated statements of income. The change in fair value of the assets and liabilities included interest income and expense, respectively.

9. Derivatives and Hedging

The Company maintains a program to enter into exchange traded futures as a macro hedging strategy to hedge market price and interest rate exposures with respect to its total portfolio of seed investments in sponsored investment products. The Company had outstanding exchange traded futures related to this macro hedging strategy with aggregate notional values of approximately $1.8 billion at both December 31, 2024 and 2023, with expiration dates during the first quarter of 2025 and 2024, respectively.

In addition, the Company enters into exchange traded futures to economically hedge the exposure to market movements on certain deferred cash compensation plans. The Company had outstanding exchange traded futures with aggregate notional values related to its deferred cash compensation hedging program of approximately $197 million and $204 million at December 31, 2024 and 2023, with expiration dates during the first quarter of 2025 and 2024, respectively.

Changes in the value of the futures contracts are recognized as gains or losses within nonoperating income (expense). Variation margin payments, which represent settlements of profit/loss, are generally received or made daily, and are reflected in other assets and other liabilities on the consolidated statements of financial condition. These amounts were not material as of December 31, 2024 and 2023.

The Company executes forward foreign currency exchange contracts to mitigate the risk of certain foreign exchange movements. At December 31, 2024 and 2023, the Company had outstanding forward foreign currency exchange contracts with aggregate notional values of approximately $3.6 billion, with expiration dates in January 2025, and $3.1 billion, with expiration dates in January 2024, respectively.

At both December 31, 2024 and 2023, the Company had a derivative providing credit protection with a notional amount of approximately $17 million to a counterparty, representing the Company's maximum risk of loss with respect to the derivative. The Company carries the derivative at fair value based on the expected discounted future cash outflows under the arrangement.

The following table presents the fair values of derivative instruments recognized in the consolidated statements of financial condition at December 31, 2024:

	Assets			Liabilities		
(in millions)	Statement of Financial Condition Classification	December 31, 2024	December 31, 2023	Statement of Financial Condition Classification	December 31, 2024	December 31, 2023
Derivative instruments						
Forward foreign currency exchange contracts	Other assets	**$ 7**	$ 19	Other liabilities	**$ 35**	$ 6

The following table presents realized and unrealized gains (losses) recognized in the consolidated statements of income on derivative instruments:

		Gains (Losses)		
(in millions)	Statement of Income Classification	2024	2023	2022
Derivative Instruments				
Exchange traded futures[(1)]	Net gain (loss) on investments	**$ (30)**	$ (88)	$ 36
Forward foreign currency exchange contracts	General and administration expense	**5**	98	(222)
Total return swaps	Net gain (loss) on investments	**—**	—	83
Total gain (loss) from derivative instruments		**$ (25)**	$ 10	$ (103)

(1) Amounts for 2024, 2023 and 2022 include $48 million of losses, $112 million of losses and $36 million of gains on futures used as a macro hedging strategy of seed investments, respectively. In addition, amounts for 2024 and 2023 include $18 million and $24 million of gains on futures used to economically hedge certain deferred cash compensation plans, respectively.

The Company's CIPs may utilize derivative instruments as a part of the funds' investment strategies. The change in fair value of such derivatives, which is recorded in nonoperating income (expense), was not material for 2024, 2023 and 2022.

See Note 15, *Borrowings*, for more information on the Company's net investment hedge.

10. Property and Equipment

Property and equipment consists of the following:

(in millions)	Estimated Useful Life-In Years	December 31, 2024		December 31, 2023	
Property and equipment:					
Land	N/A	**$**	**6**	$	6
Building	39		**33**		33
Building improvements	15		**32**		31
Leasehold improvements	1-15		**1,048**		1,036
Equipment and computer software	3		**1,136**		1,088
Other transportation equipment	8-10		**198**		192
Furniture and fixtures	7		**101**		99
Construction in progress	N/A		**102**		66
Total			**2,656**		2,551
Less: Accumulated depreciation and amortization			**1,553**		1,439
Property and equipment, net		**$**	**1,103**	$	1,112

N/A – Not Applicable

Qualifying software costs of approximately $105 million, $103 million and $91 million have been capitalized within equipment and computer software during 2024, 2023 and 2022, respectively, and are being amortized over an estimated useful life of three years.

Depreciation and amortization expense was $270 million, $263 million and $251 million for 2024, 2023 and 2022, respectively.

11. Goodwill

Goodwill activity during 2024 and 2023 was as follows:

(in millions)	2024		2023	
Beginning of year balance	**$**	**15,524**	$	15,341
Acquisitions[(1)]		**10,428**		184
Other		**(3)**		(1)
End of year balance	**$**	**25,949**	$	15,524

(1) 2024 amount represents goodwill of $10.3 billion related to the GIP Transaction and $131 million related to the SpiderRock Transaction. 2023 amount represents goodwill in connection with the Kreos Transaction. See Note 3, *Acquisitions*, for further information.

BlackRock assessed its goodwill for impairment as of July 31, 2024, 2023 and 2022 and considered such factors as the book value and the market capitalization of the Company. The impairment assessment indicated no impairment charges were required. The Company continues to monitor its book value per share compared with closing prices of its common stock as well as qualitative factors for potential indicators of impairment. At December 31, 2024, the Company's common stock closed at a market price of $1,025, which exceeded its book value of $307 per share.

12. Intangible Assets

Intangible assets at December 31, 2024 and 2023 consisted of the following:

(in millions)	Remaining Weighted-Average Estimated Useful Life (years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
At December 31, 2024				
Indefinite-lived intangible assets:				
Management contracts	**N/A**	**$ 16,119**	**$ —**	**$ 16,119**
Trade names/trademarks	**N/A**	**1,403**	**—**	**1,403**
License	**N/A**	**6**	**—**	**6**
Total indefinite-lived intangible assets		**17,528**	**—**	**17,528**
Finite-lived intangible assets[(1)]:				
Management contracts	**7.6**	**2,028**	**215**	**1,813**
Investor/customer relationships	**11.2**	**1,623**	**414**	**1,209**
Technology-related	**3.5**	**257**	**144**	**113**
Trade names/trademarks	**9.6**	**89**	**9**	**80**
Total finite-lived intangible assets	**8.9**	**3,997**	**782**	**3,215**
Total intangible assets		**$ 21,525**	**$ 782**	**$ 20,743**
At December 31, 2023				
Indefinite-lived intangible assets:				
Management contracts	N/A	$ 16,169	$ —	$ 16,169
Trade names/trademarks	N/A	1,403	—	1,403
License	N/A	6	—	6
Total indefinite-lived intangible assets		17,578	—	17,578
Finite-lived intangible assets[(2)]:				
Management contracts	3.7	244	156	88
Investor/customer relationships	6.0	785	338	447
Technology-related	4.6	260	118	142
Trade names/trademarks	1.8	9	6	3
Total finite-lived intangible assets	5.4	1,298	618	680
Total intangible assets		$ 18,876	$ 618	$ 18,258

N/A – Not Applicable

(1) In connection with the GIP Transaction, the Company acquired approximately $1.8 billion of finite-lived management contracts, $820 million of finite-lived investor relationships and $80 million of a finite-lived trade name (see Note 3, *Acquisitions*, for further information). In connection with the SpiderRock Transaction, the Company acquired approximately $29 million of finite-lived customer relationships and $8 million of finite-lived technology-related intangible assets with weighted-average estimated lives of approximately eleven and five years, respectively.

(2) In connection with the Kreos Transaction, the Company acquired approximately $67 million of finite-lived management contracts and $39 million of finite-lived investor relationships with weighted-average estimated lives of approximately five and ten years, respectively.

The Company assessed its intangible assets for impairment as of July 31, 2024 and concluded that an impairment charge was required for indefinite-lived intangible assets related to certain acquired open-end management contracts, primarily driven by quantitative factors, such as reduced growth expectations, a decrease in revenue basis points and net client outflows. As a result, the Company recorded a noncash impairment charge of $50 million, which is included within amortization and impairment of intangible assets expense on the consolidated statements of income for the year ended December 31, 2024. No impairment charges were required for any other intangible assets.

The impairment tests performed for intangible assets as of July 31, 2023 and 2022 indicated no impairment charges were required.

Estimated amortization expense for finite-lived intangible assets for each of the five succeeding years is as follows:

(in millions) **Year**	**Amount**
2025	$ 429
2026	457
2027	384
2028	283
2029	271

13. Leases

The following table presents components of lease cost included in general and administration expense on the consolidated statements of income:

(in millions)	2024	2023	2022
Lease cost:			
Operating lease cost[1]	**$ 183**	$ 189	$ 216
Variable lease cost[2]	**60**	49	39
Total lease cost	**$ 243**	$ 238	$ 255

(1) Amounts include short-term leases, which are immaterial for 2024, 2023 and 2022.
(2) Amounts include operating lease payments, which may be adjusted based on usage, changes in an index or market rate, as well as common area maintenance charges and other variable costs not included in the measurement of ROU assets and operating lease liabilities.

Supplemental information related to operating leases is summarized below:

(in millions)	2024	2023	2022
Supplemental cash flow information:			
Operating cash flows from operating leases included in the measurement of operating lease liabilities	**$ 183**	$ 142	$ 162
Supplemental noncash information:			
ROU assets in exchange for operating lease liabilities[1]	**$ 235**	$ 32	$ 115

(1) Amount for 2024 includes $75 million of ROU assets obtained in connection with the GIP Transaction. See Note 3, *Acquisitions,* for further information.

	December 31, 2024	December 31, 2023
Lease term and discount rate:		
Weighted-average remaining lease term	**14 years**	15 years
Weighted-average discount rate	**3 %**	3 %

(in millions) **Maturity of operating lease liabilities at December 31, 2024**	Amount
2025	**$ 198**
2026	**185**
2027	**179**
2028	**170**
2029	**156**
Thereafter	**1,439**
Total lease payments	**2,327**
Less: Imputed interest	**(419)**
Present value of lease liabilities	**$ 1,908**

14. Other Assets

The Company records certain corporate investments, which exclude seed and co-investments in the Company's sponsored investment products, within other assets on the consolidated statements of financial condition.

At December 31, 2024 and 2023, the Company had $888 million and $773 million, respectively, of corporate equity method investments, recorded within other assets. At December 31, 2024 and 2023, the Company's ownership interest in its minority investment in iCapital Network Inc. ("iCapital") was approximately 24% and 25%, respectively, and the carrying value of the Company's interest was $652 million and $641 million, respectively. In accordance with GAAP, certain equity method investees, including iCapital, do not account for both their financial assets and liabilities under fair value measures; therefore, the Company’s investment in such equity method investees may not represent fair value.

At December 31, 2024 and 2023, the Company had $438 million and $484 million, respectively, of other nonequity method corporate minority investments recorded within other assets. These investments include equity securities, generally measured at fair value or under the measurement alternative to fair value for nonmarketable securities, and corporate minority private debt investments measured at fair value. Changes in value of the equity securities are recorded in nonoperating income (expense) and changes in value of the debt securities are recorded in AOCI, net of tax. See Note 2, *Significant Accounting Policies*, for further information.

15. Borrowings

Short-Term Borrowings

2024 Revolving Credit Facility. The Company maintains an unsecured revolving credit facility, which is available for working capital and general corporate purposes (the “2024 Credit Facility”). In March 2024, the 2024 Credit Facility was amended to, among other things, (1) permit the GIP Transaction and the transactions contemplated in connection with the GIP Transaction, (2) add New BlackRock as a borrower under the existing credit agreement, (3) add New BlackRock as a guarantor of the payment and performance of the obligations, liabilities and indebtedness of Old BlackRock and certain of its other subsidiaries and (4) update the sustainability-linked pricing mechanics to remove existing metrics and allow new metrics, if any, to be set following the consummation of the GIP Transaction. In May 2024, the 2024 Credit Facility was further amended to, among other things, (1) increase the aggregate commitment amount by $400 million to $5.4 billion and (2) extend the maturity date to March 2029 for lenders (other than one non-extending lender) pursuant to the Company’s option to request extensions of the maturity date available under the 2024 Credit Facility (with the commitment of the non-extending lender maturing in March 2028). The 2024 Credit Facility permits the Company to request up to an additional $1.0 billion of borrowing capacity, subject to lender credit approval, which could increase the overall size of the 2024 Credit Facility to an aggregate principal amount of up to $6.4 billion. Interest on outstanding borrowings accrues at an applicable benchmark rate for the denominated currency of the loan, plus a spread. The 2024 Credit Facility requires the Company not to exceed a maximum leverage ratio (ratio of net debt to earnings before interest, taxes, depreciation and amortization, where net debt equals total debt less unrestricted cash) of 3 to 1, which was satisfied with a ratio of less than 1 to 1 at December 31, 2024. At December 31, 2024, the Company had no amount outstanding under the 2024 Credit Facility.

Commercial Paper Program. On November 7, 2024, BlackRock established a commercial paper program (the "CP Program") under which the Company may issue short-term, unsecured commercial paper notes (the "CP Notes") on a private-placement basis up to a maximum aggregate amount outstanding at any time of $5 billion. The payments of the CP Notes have been unconditionally guaranteed by Old BlackRock (the "CP Notes Guarantee"). In addition, the CP Notes will rank at least equal in right of payment with all of New BlackRock's other unsubordinated indebtedness, and the obligations of Old BlackRock under the guarantee will rank at least equal in right of payment with all of Old BlackRock's other unsubordinated indebtedness. Net proceeds of issuances of the CP Notes are expected to be used for general corporate purposes. The CP Program is currently supported by the 2024 Credit Facility. The CP Program replaced the Company's prior $4 billion commercial paper program, which was terminated concurrently with the establishment of this CP Program, and has been put into place in connection with the Company's organizational structure following the closing of the GIP Transaction. At December 31, 2024, BlackRock had no CP Notes outstanding.

Subsidiary Credit Facility. In January 2024, BlackRock Investment Management (UK) Limited ("BIM UK"), a wholly owned subsidiary of the Company, entered into a revolving credit facility (the “Subsidiary Credit Facility”) in the amount of £25 million (or approximately $31 million based on the GBP/USD foreign exchange rate at December 31, 2024) with a rolling 364-day term structure. The Subsidiary Credit Facility is available for BIM UK's general corporate and working capital purposes. At December 31, 2024, there was no amount outstanding under the Subsidiary Credit Facility.

Long-Term Borrowings

The carrying value and fair value of long-term borrowings determined using market prices and EUR/USD foreign exchange rate at December 31, 2024 included the following:

(in millions)	Maturity Amount	Unamortized Discount and Debt Issuance Costs(1)	Carrying Value	Fair Value
1.25% Notes due 2025(2)	$ 725	$ —	$ 725	$ 720
3.20% Notes due 2027(2)	700	(2)	698	682
4.60% Notes due 2027	800	(3)	797	801
3.25% Notes due 2029(2)	1,000	(7)	993	944
4.70% Notes due 2029	500	(3)	497	500
2.40% Notes due 2030(2)	1,000	(3)	997	891
1.90% Notes due 2031(2)	1,250	(7)	1,243	1,055
2.10% Notes due 2032(2)	1,000	(11)	989	823
4.75% Notes due 2033(2)	1,250	(17)	1,233	1,224
5.00% Notes due 2034	1,000	(7)	993	986
4.90% Notes due 2035	500	(5)	495	489
5.25% Notes due 2054	1,500	(32)	1,468	1,418
5.35% Notes due 2055	1,200	(14)	1,186	1,147
Total long-term borrowings	$ 12,425	$ (111)	$ 12,314	$ 11,680

(1) The unamortized discount and debt issuance costs are being amortized over the term of the notes.
(2) Issued by Old BlackRock and guaranteed by New BlackRock.

Long-term borrowings at December 31, 2023 had a carrying value of $7.9 billion and a fair value of $7.4 billion determined using market prices at the end of December 2023.

March 2024 Notes. In March 2024, the Company issued $3.0 billion in aggregate principal amount of senior unsecured and unsubordinated notes. These notes were issued as three separate series of senior debt securities including $500 million of 4.70% notes maturing on March 14, 2029 (the "March 2029 Notes"), $1.0 billion of 5.00% notes maturing on March 14, 2034 (the "2034 Notes") and $1.5 billion of 5.25% notes maturing on March 14, 2054 (the "2054 Notes") (collectively, the "March 2024 Notes"). Net proceeds were used to fund a portion of the cash consideration for the GIP Transaction, which closed in October 2024. Interest on the March 2024 Notes of approximately $152 million per year is payable semi-annually on March 14 and September 14 of each year, which commenced on September 14, 2024. The March 2024 Notes are fully and unconditionally guaranteed (the “March 2024 Notes Guarantee”) on a senior unsecured basis by Old BlackRock. The March 2024 Notes and the March 2024 Notes Guarantee rank equally in right of payment with all of BlackRock and Old BlackRock’s other unsubordinated indebtedness, respectively. The March 2024 Notes may be redeemed prior to maturity at any time in whole or in part at the option of BlackRock at the redemption prices set forth in the applicable series of March 2024 Notes.

July 2024 Notes. In July 2024, the Company issued $2.5 billion in aggregate principal amount of senior unsecured and unsubordinated notes. These notes were issued as three separate series of senior debt securities including $800 million of 4.60% notes maturing on July 26, 2027 (the "July 2027 Notes"), $500 million of 4.90% notes maturing on January 8, 2035 (the "2035 Notes") and $1.2 billion of 5.35% notes maturing on January 8, 2055 (the "2055 Notes") (collectively, the "July 2024 Notes"). Net proceeds are intended to be used to fund a portion of the cash consideration for the acquisition of Preqin Holding Limited ("Preqin" or the "Preqin Transaction"), which is anticipated to close in the first quarter of 2025, subject to customary closing conditions. The July 2024 Notes are fully and unconditionally guaranteed (the "July 2024 Notes Guarantee") on a senior unsecured basis by Old BlackRock. The July 2024 Notes and the July 2024 Notes Guarantee rank equally in right of payment with all of BlackRock's and Old BlackRock's other unsubordinated indebtedness, respectively. Interest on the July 2027 Notes of approximately $37 million per year is payable semi-annually on January 26 and July 26 of each year, beginning January 26, 2025. Interest on the 2035 Notes and 2055 Notes of approximately $25 million and $64 million per year, respectively, is payable semi-annually on January 8 and July 8 of each year, beginning January 8, 2025. The July 2024 Notes may be redeemed prior to maturity at any time in whole or in part at the option of BlackRock at the redemption prices set forth in the applicable series of July 2024 Notes. In addition, if the Preqin Transaction is not consummated, the Company will be required to redeem all outstanding July 2027 Notes (the "Special Mandatory Redemption") at a Special Mandatory Redemption price equal to 101% of the aggregate principal amount of the applicable series of July 2027 Notes, plus accrued and unpaid interest, if any, to, but excluding, the Special Mandatory Redemption date.

2033 Notes. In May 2023, the Company issued $1.25 billion in aggregate principal amount of 4.75% senior unsecured notes maturing on May 25, 2033 (the "2033 Notes"). The net proceeds of the 2033 Notes are being used for general corporate purposes. Interest of approximately $59 million per year is payable semi-annually on May 25 and November 25 of each year, commencing on November 25, 2023. The 2033 Notes may be redeemed at the option of the Company, in whole or in part, at any time prior to February 25, 2033 at a "make-whole" redemption price, or thereafter at 100% of the principal amount of the 2033 Notes, in each case plus accrued but unpaid interest.

2032 Notes. In December 2021, the Company issued $1 billion in aggregate principal amount of 2.10% senior unsecured and unsubordinated notes maturing on February 25, 2032 (the "2032 Notes"). The net proceeds of the 2032 Notes were used for general corporate purposes, which included the repayment of the $750 million 3.375% Notes in June 2022. Interest of approximately $21 million per year is payable semi-annually on February 25 and August 25 of each year, which commenced on February 25, 2022. The 2032 Notes may be redeemed prior to November 25, 2031 in whole or in part at any time, at the option of the Company, at a "make-whole" redemption price or at 100% of the principal amount of the 2032 Notes thereafter.

2031 Notes. In April 2020, the Company issued $1.25 billion in aggregate principal amount of 1.90% senior unsecured and unsubordinated notes maturing on January 28, 2031 (the "2031 Notes"). The net proceeds of the 2031 Notes were used for general corporate purposes. Interest of approximately $24 million per year is payable semi-annually on January 28 and July 28 of each year, which commenced on July 28, 2020. The 2031 Notes may be redeemed prior to October 28, 2030 in whole or in part at any time, at the option of the Company, at a "make-whole" redemption price or at 100% of the principal amount of the 2031 Notes thereafter.

2030 Notes. In January 2020, the Company issued $1 billion in aggregate principal amount of 2.40% senior unsecured and unsubordinated notes maturing on April 30, 2030 (the "2030 Notes"). The net proceeds of the 2030 Notes were used for general corporate purposes. Interest of approximately $24 million per year is payable semi-annually on April 30 and October 30 of each year, which commenced on April 30, 2020. The 2030 Notes may be redeemed prior to January 30, 2030 in whole or in part at any time, at the option of the Company, at a "make-whole" redemption price or at 100% of the principal amount of the 2030 Notes thereafter.

2029 Notes. In April 2019, the Company issued $1 billion in aggregate principal amount of 3.25% senior unsecured and unsubordinated notes maturing on April 30, 2029 (the "2029 Notes"). The net proceeds of the 2029 Notes were used for general corporate purposes, which included a portion of the purchase price for the acquisition of eFront Holdings SAS, repayment of a portion of the $1 billion 5.00% notes in December 2019 and repayment of borrowings under its commercial paper program. Interest is payable semi-annually on April 30 and October 30 of each year, which commenced on October 30, 2019, and is approximately $33 million per year. The 2029 Notes may be redeemed prior to January 30, 2029 in whole or in part at any time, at the option of the Company, at a "make-whole" redemption price or at par thereafter.

2027 Notes. In March 2017, the Company issued $700 million in aggregate principal amount of 3.20% senior unsecured and unsubordinated notes maturing on March 15, 2027 (the "2027 Notes"). The net proceeds of the 2027 Notes were used to fully repay $700 million in aggregate principal amount outstanding of 6.25% notes in April 2017 prior to their maturity in September 2017. Interest is payable semi-annually on March 15 and September 15 of each year, and is approximately $22 million per year. The 2027 Notes may be redeemed prior to maturity at any time in whole or in part at the option of the Company at a "make-whole" redemption price.

2025 Notes. In May 2015, the Company issued €700 million of 1.25% senior unsecured notes maturing on May 6, 2025 (the "2025 Notes" and, together with the 2027 Notes, the 2029 Notes, the 2030 Notes, the 2031 Notes, the 2032 Notes and the 2033 Notes, the "Old BlackRock Notes"). The notes are listed on the Official List of The International Stock Exchange. The net proceeds of the 2025 Notes were used for general corporate purposes, including refinancing of outstanding indebtedness. Interest of approximately $11 million per year based on current exchange rates is payable annually on May 6 of each year. The 2025 Notes may be redeemed in whole or in part prior to maturity at any time at the option of the Company at a "make-whole" redemption price.

Upon conversion to US dollars the Company designated the €700 million debt offering as a net investment hedge to offset its currency exposure relating to its net investment in certain euro functional currency operations. A gain of $37 million (net of tax expense of $12 million), loss of $20 million (net of tax benefit of $6 million), and a gain of $37 million (net of tax expense of $12 million) were recognized in other comprehensive income for 2024, 2023 and 2022, respectively. No hedge ineffectiveness was recognized during 2024, 2023 and 2022.

2024 Notes. In March 2014, the Company issued $1 billion in aggregate principal amount of 3.50% senior unsecured and unsubordinated notes, which were repaid in March 2024 at maturity (the "2024 Notes"). The net proceeds of the 2024 Notes were used to refinance certain indebtedness which matured in the fourth quarter of 2014. Interest was payable semi-annually in arrears on March 18 and September 18 of each year, or approximately $35 million per year.

New BlackRock Guarantee. On October 1, 2024, in connection with the closing of the GIP Transaction, New BlackRock also entered into a guarantee (the "New BlackRock Guarantee") pursuant to which New BlackRock fully and unconditionally guaranteed, on a senior unsecured basis, the obligations of Old BlackRock with respect to the Old BlackRock Notes. The New BlackRock Guarantee ranks equally in right of payment with all of New BlackRock's other unsubordinated indebtedness. The New BlackRock Guarantee will be automatically and unconditionally released and discharged, and New BlackRock will be released from all obligations under the New BlackRock Guarantee, in certain circumstances as described in the New BlackRock Guarantee.

16. Commitments and Contingencies

Investment Commitments. At December 31, 2024, the Company had $1.2 billion of various capital commitments to fund sponsored investment products, including CIPs. These products include various private markets products, including private equity funds, real assets funds, and opportunistic funds. This amount excludes additional commitments made by consolidated funds of funds to underlying third-party funds as third-party noncontrolling interest holders have the legal obligation to fund the respective commitments of such funds of funds. Generally, the timing of the funding of these commitments is unknown and the commitments are callable on demand at any time prior to the expiration of the commitment. These unfunded commitments are not recorded on the consolidated statements of financial condition. These commitments do not include potential future commitments approved by the Company that are not yet legally binding. The Company intends to make additional capital commitments from time to time to fund additional investment products for, and with, its clients.

Contingencies

Contingent Consideration Liabilities. In connection with certain acquisitions, BlackRock is required to make contingent payments, subject to the achievement of specified performance targets or satisfaction of certain post-closing events. The fair value of this contingent consideration is estimated at the time of acquisition closing and is included in contingent consideration liabilities on the consolidated statements of financial condition. The fair value of the remaining aggregate contingent payments at December 31, 2024 totaled $4.3 billion, including $4.2 billion related to the GIP Transaction, which, if any, will be settled, all in stock, ranging from 4.0 million to 5.2 million shares, subject to achieving certain performance targets. See Note 3, *Acquisitions*, for more information.

Legal Proceedings. From time to time, BlackRock receives subpoenas or other requests for information from various US federal and state governmental and regulatory authorities and international governmental and regulatory authorities in connection with industry-wide or other investigations or proceedings. It is BlackRock's policy to cooperate fully with such matters. In 2023, BlackRock responded to requests from the SEC in connection with a publicly reported, industry-wide investigation of investment advisers' compliance with record retention requirements relating to certain types of electronic communications.

The Company, certain of its subsidiaries and employees have been named as defendants in various legal actions, including arbitrations and other litigation arising in connection with BlackRock's activities. Additionally, BlackRock-advised investment portfolios may be subject to lawsuits, any of which potentially could harm the investment returns of the applicable portfolio or result in the Company being liable to the portfolios for any resulting damages.

Management, after consultation with legal counsel, currently does not anticipate that the aggregate liability arising out of regulatory matters or lawsuits will have a material effect on BlackRock's results of operations, financial position, or cash flows. However, there is no assurance as to whether any such pending or threatened matters will have a material effect on BlackRock's results of operations, financial position or cash flows in any future reporting period. Due to uncertainties surrounding the outcome of these matters, management cannot reasonably estimate the possible loss or range of loss that may arise from these matters.

Indemnifications. In the ordinary course of business or in connection with certain acquisition agreements, BlackRock enters into contracts pursuant to which it may agree to indemnify third parties in certain circumstances. The terms of these indemnities vary from contract to contract and the amount of indemnification liability, if any, cannot be determined or the likelihood of any liability is considered remote. Consequently, no liability has been recorded on the consolidated statements of financial condition.

In connection with securities lending transactions, BlackRock has agreed to indemnify certain securities lending clients against potential loss resulting from a borrower's failure to fulfill its obligations under the securities lending agreement should the value of the collateral pledged by the borrower at the time of default be insufficient to cover the borrower's obligation under the securities lending agreement. The amount of securities on loan as of December 31, 2024 and subject to this type of indemnification was approximately $305 billion. In the Company's capacity as lending agent, cash and securities totaling approximately $324 billion were held as collateral for indemnified securities on loan at December 31, 2024. The fair value of these indemnifications was not material at December 31, 2024.

17. Revenue

The table below presents detail of revenue for 2024, 2023 and 2022 and includes the product mix of investment advisory, administration fees and securities lending revenue and performance fees.

(in millions)	2024	2023	2022

Total	**$ 16,100**	$ 14,399	$ 14,451

Investment Advisory and Administration Fees – Remaining Performance Obligation

The tables below present estimated investment advisory and administration fees expected to be recognized in the future related to the unsatisfied portion of the performance obligations at December 31, 2024 and 2023:

December 31, 2024

(in millions)	2025	2026	2027	Thereafter	Total
Investment advisory and administration fees:					
Alternatives(1)(2)	**$ 427**	**$ 381**	**$ 353**	**$ 142**	**$ 1,303**

December 31, 2023

(in millions)	2024	2025	2026	Thereafter	Total
Investment advisory and administration fees:					
Alternatives(1)(2)	$ 204	$ 174	$ 152	$ 164	$ 694

(1) Investment advisory and administration fees include management fees related to certain private markets products, which are determined based on known contractual committed capital outstanding at December 31, 2024 and 2023. Revenue attributed to future periods could be subject to change due to a change in business activities and actual amounts could differ from amounts disclosed in the table above.

(2) The Company elected practical expedients to exclude amounts related to (a) performance obligations with an original duration of one year or less, and (b) variable consideration related to future service periods.

Change in Deferred Carried Interest Liability

The table below presents changes in the deferred carried interest liability, which is included in other liabilities on the consolidated statements of financial condition, for the year ended December 31, 2024 and 2023:

(in millions)	2024	2023
Beginning balance	**$ 1,783**	$ 1,420
Net increase (decrease) in unrealized allocations	**364**	577
Performance fee revenue recognized	**(287)**	(214)
Ending balance	**$ 1,860**	$ 1,783

Technology Services Revenue – Remaining Performance Obligation

The tables below present estimated technology services revenue expected to be recognized in the future related to the unsatisfied portion of the performance obligations at December 31, 2024 and 2023:

December 31, 2024

(in millions)	2025	2026	2027	Thereafter	Total
Technology services revenue(1)(2)	**$ 134**	**$ 81**	**$ 50**	**$ 69**	**$ 334**

December 31, 2023

(in millions)	2024	2025	2026	Thereafter	Total
Technology services revenue(1)(2)	$ 131	$ 73	$ 56	$ 59	$ 319

(1) Technology services revenue primarily includes upfront payments from customers, which the Company generally recognizes as services are performed. Revenue attributed to future periods could be subject to change due to a change in business activities and actual amounts could differ from amounts disclosed in the table above.

(2) The Company elected practical expedients to exclude amounts related to (a) performance obligations with an original duration of one year or less, and (b) variable consideration related to future service periods.

In addition to amounts disclosed in the tables above, certain technology services contracts require fixed minimum fees, which are billed on a monthly or quarterly basis in arrears. The Company recognizes such revenue as services are performed. As of December 31, 2024, the estimated annual fixed minimum fees for 2025 for outstanding contracts approximated $1.2 billion. The term for these contracts, which are either in their initial or renewal period, ranges from one to five years.

The table below presents changes in the technology services deferred revenue liability for the year ended December 31, 2024 and 2023, which is included in other liabilities on the consolidated statements of financial condition:

(in millions)	2024	2023
Beginning balance	**$ 133**	$ 125
Additions(1)	**84**	92
Revenue recognized that was included in the beginning balance	**(93)**	(84)
Ending balance	**$ 124**	$ 133

(1) Amounts are net of revenue recognized.

18. Stock-Based Compensation

Prior to May 15, 2024, the Company maintained the BlackRock, Inc. Second Amended and Restated 1999 Stock Award and Incentive Plan. On May 15, 2024, the Company adopted, pursuant to shareholder approval, the BlackRock, Inc. Third Amended and Restated 1999 Stock Award and Incentive Plan (the "Award Plan"). Any awards granted on or after May 15, 2024 are granted pursuant to such plan.

The components of stock-based compensation expense are as follows:

(in millions)	2024	2023	2022
Stock-based compensation:			
RSUs(1)	**$ 718**	$ 596	$ 686
Stock options	**35**	34	22
Total stock-based compensation(2)	**$ 753**	$ 630	$ 708

(1) Amount for 2024 includes $71 million of incentive retention awards granted in connection with the GIP Transaction.

(2) Amount for 2023 and 2022 includes $14 million and $33 million of compensation expense for accelerated vesting of previously granted stock-based compensation awards, respectively, recognized as part of the restructuring charge disclosed in Note 24, *Restructuring Charge.*

Stock Award and Incentive Plan. Pursuant to the Award Plan, options to purchase shares of the Company's common stock at an exercise price not less than the market value of BlackRock's common stock on the date of grant in the form of stock options, restricted stock or RSUs may be granted to employees and nonemployee directors. A maximum of 48,500,000 shares of common stock were authorized for issuance under the Award Plan. Of this amount, 7,708,389 shares remain available for future awards at December 31, 2024. Upon exercise of employee stock options, the issuance of restricted stock or the vesting of RSUs, the Company generally issues shares out of treasury to the extent available.

RSUs

Time-Based RSUs

Pursuant to the Award Plan, RSUs may be granted to certain employees. Substantially all RSUs vest over periods ranging from one to five years and are expensed using the straight-line method over the requisite service period for each separately vesting portion of the award as if the award was, in-substance, multiple awards. RSUs are not considered participating securities for purposes of calculating EPS as the dividend equivalents are subject to forfeiture prior to vesting of the award.

RSU activity for 2024 is summarized below.

Outstanding at	RSUs	Weighted-Average Grant Date Fair Value
December 31, 2023	1,772,639	$ 757.49
Granted(1)	1,395,311	$ 817.10
Converted	(779,146)	$ 760.38
Forfeited	(91,139)	$ 748.23
December 31, 2024	**2,297,665**	**$ 793.08**

(1) During the first quarter of 2024, in connection with the GIP Transaction, the Company granted incentive retention awards of approximately 106,000 RSUs to certain employees that vest between two to five years from the grant date. Additionally, in October 2024, in connection with the GIP Transaction, the Company granted incentive retention awards of approximately 500,000 RSUs to certain employees that cliff vest 100% on October 1, 2029. The weighted-average grant date fair value of these October 2024 awards was $830.90.

The Company values RSUs at their grant-date fair value as measured by BlackRock's common stock price. The incentive retention RSUs granted in October 2024, in connection with the GIP Transaction, are not entitled to participate in dividends until they vest, hence the grant-date fair value of the awards are reduced by the present value of the dividends expected to be paid on the common shares during the vesting period, discounted at a risk-free interest rate. The total fair market value of RSUs granted to employees during 2024, 2023 and 2022 was $1.1 billion, $565 million and $662 million, respectively. The total grant-date fair market value of RSUs converted to common stock during 2024, 2023 and 2022 was $592 million, $592 million and $461 million, respectively.

RSUs granted under the Award Plan in connection with annual incentive compensation and incentive retention awards in connection with the GIP Transaction primarily related to the following:

	2024	2023	2022
Awards granted that vest ratably over three years from the date of grant	**346,831**	342,706	498,633
Awards granted that vest with varying vesting periods	**204,622**	169,764	117,169
Awards granted that cliff vest 100% on:			
January 31, 2025	**—**	—	197,817
January 31, 2026	**—**	259,465	—
January 31, 2027	**343,418**	—	—
October 1, 2029(1)	**500,440**	—	—
Total awards granted	**1,395,311**	771,935	813,619

(1) Incentive retention awards granted in October 2024, in connection with the GIP Transaction.

At December 31, 2024, the intrinsic value of outstanding RSUs was $2.4 billion, reflecting a closing stock price of $1,025.

At December 31, 2024, total unrecognized stock-based compensation expense related to unvested RSUs was $913 million. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 2.0 years.

In January 2025, pursuant to the Award Plan, the Company granted approximately:

- 332,000 RSUs to employees as part of annual incentive compensation that vest ratably over three years from the date of grant;
- 216,000 RSUs to employees that cliff vest 100% on January 31, 2028; and
- 27,000 RSUs to employees with various vesting schedules.

Performance-Based RSUs

Pursuant to the Award Plan, performance-based RSUs may be granted to certain employees. Each performance-based award consists of a "base" number of RSUs granted to the employee. The number of shares that an employee ultimately receives at vesting will be equal to the base number of performance-based RSUs granted, multiplied by a predetermined percentage determined in accordance with the level of attainment of Company performance measures during the performance period and could be higher or lower than the original RSU grant. Performance-based RSUs are not considered participating securities as the dividend equivalents are subject to forfeiture prior to vesting of the award.

In the first quarter of 2024, 2023 and 2022, the Company granted 165,631, 169,938 and 143,846, respectively, performance-based RSUs to certain employees that cliff vest 100% on January 31, 2027, 2026 and 2025, respectively. These awards are amortized over a service period of three years. In 2024, the Company reduced the number of original shares granted in 2021 by 42,579 RSUs based on the level of attainment of Company performance measures during the performance period.

In October 2024, in connection with the GIP Transaction, the Company awarded a target amount of approximately 210,000 incentive retention performance-based RSUs to certain employees subject to achievement of certain performance targets. The number of shares that an employee ultimately receives at vesting could be higher or lower than the original target amount, based on the achievement of certain performance targets.

Performance-based RSU activity for 2024 is summarized below.

Outstanding at	Performance-Based RSUs	Weighted-Average Grant Date Fair Value	Performance-Based RSUs in Connection with the GIP Transaction	Weighted-Average Grant Date Fair Value	Total Performance-Based RSUs	Weighted-Average Grant Date Fair Value
December 31, 2023	456,384	$ 767.69	—	$ —	456,384	$ 767.69
Granted	165,631	$ 798.83	210,505	$ 845.48	376,136	$ 824.94
Reduction of shares due to performance measures	(42,579)	$ 739.64	—	$ —	(42,579)	$ 739.64
Converted	(116,029)	$ 739.32	—	$ —	(116,029)	$ 739.32
Forfeited	(12,365)	$ 784.44	—	$ —	(12,365)	$ 784.44
December 31, 2024	**451,042**	**$ 788.61**	**210,505**	**$ 845.48**	**661,547**	**$ 806.71**

The Company values performance-based RSUs at their grant-date fair value as measured by BlackRock's common stock price. The incentive retention performance-based RSUs granted in October 2024 in connection with GIP Transaction mentioned above, are not entitled to participate in dividends until they vest, hence the grant-date fair value of the awards are reduced by the present value of the dividends expected to be paid on the common shares during the vesting period, discounted at a risk-free interest rate.

The total grant-date fair market value of performance-based RSUs granted (including impact due to performance measures) to employees during 2024, 2023 and 2022 was $279 million, $142 million and $164 million, respectively. At December 31, 2024, the intrinsic value of outstanding performance-based RSUs was $678 million reflecting a closing stock price of $1,025. At December 31, 2024, total unrecognized stock-based compensation expense related to unvested performance-based awards was $311 million. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 2.1 years.

In January 2025, the Company granted approximately 136,000 performance-based RSUs to certain employees that cliff vest 100% on January 31, 2028. These awards are amortized over a service period of three years. The number of shares distributed at vesting could be higher or lower than the original grant based on the level of attainment of predetermined Company performance measures.

Stock Options

Stock option activity and ending balance for year-end December 31, 2024 is summarized below.

	2017 Performance-based Options		2023 Performance-based Options		2023 Time-based Options	
	Shares Under Option	Weighted Average Exercise Price	Shares Under Option	Weighted Average Exercise Price	Shares Under Option	Weighted Average Exercise Price
Outstanding at December 31, 2023	1,549,080	$ 513.50	807,695	$ 673.58	326,391	$ 673.58
Exercised	(905,219)	$ 513.50	—	$ —	—	$ —
Forfeited	(18,036)	$ 513.50	(40,725)	$ 673.58	(26,705)	$ 673.58
Outstanding at December 31, 2024	**625,825**	**$ 513.50**	**766,970**	**$ 673.58**	**299,686**	**$ 673.58**

	Options Outstanding				Options Exercisable			
Option Type	Exercise Prices	Options Outstanding	Weighted Average Remaining Life (years)	Aggregate Intrinsic Value (in millions)	Exercise Prices	Options Exercisable	Weighted Average Remaining Life (years)	Aggregate Intrinsic Value (in millions)
2017 Performance-based	**$ 513.50**	**625,825**	**1.9**	**$ 320**	**$ 513.50**	**625,825**	**1.9**	**$ 320**
2023 Performance-based	**$ 673.58**	**766,970**	**7.4**	**270**	**$ 673.58**	**—**	**—**	**—**
2023 Time-based	**$ 673.58**	**299,686**	**7.4**	**105**	**$ 673.58**	**—**	**—**	**—**
Total		**1,692,481**	**5.4**	**$ 695**		**625,825**	**1.9**	**$ 320**

At December 31, 2024, total unrecognized stock-based compensation expense related to unvested performance-based and time-based stock options was $113 million. The unrecognized compensation cost is expected to be recognized over the remaining weighted-average period of 3.7 years.

Performance-Based Stock Options

In 2017, pursuant to the Award Plan, the Company awarded performance-based stock option grants to certain employees ("2017 Performance-based Options"). Vesting of 2017 Performance-based Options was contingent upon the achievement of obtaining 125% of BlackRock's grant-date stock price within five years from the grant date and the attainment of Company performance measures during the four-year performance period. Both hurdles have been achieved, and each of the three tranches of the awards vested in equal installments at the end of 2022, 2023 and 2024, respectively. Vested 2017 Performance-based Options are exercisable for up to nine years following the grant date. The expense for each tranche is amortized over the respective requisite service period. The total fair value of 2017 Performance-based Options vested during 2024 was $52 million. The aggregate intrinsic value of 2017 Performance-based Options exercised during 2024 was $373 million.

The options have a strike price of $513.50, which was the closing price of the shares on the grant date. The grant-date fair value of the awards issued in 2017 was $208 million and was estimated using a Monte Carlo simulation with an embedded lattice model using the assumptions included in the following table:

Grant Year	Expected Term (Years)(1)	Expected Stock Volatility(2)	Expected Dividend Yield(3)	Risk-Free Interest Rate(4)
2017	6.56	22.23%	2.16%	2.33%

(1) The expected term was derived using a Monte Carlo simulation with the embedded lattice model and represents the period of time that options granted are expected to be outstanding.
(2) The expected stock volatility was based upon an average of historical stock price fluctuations of BlackRock's common stock and an implied volatility at the grant date.
(3) The expected dividend yield was calculated as the most recent quarterly dividend divided by the average three-month stock price as of the grant date.
(4) The risk-free interest rate is based on the US Treasury Constant Maturities yield curve at grant date.

On May 30, 2023, pursuant to the Award Plan, the Company awarded performance-based options to purchase 814,482 shares of BlackRock common stock to certain employees as long-term incentive compensation ("2023 Performance-based Options"). Vesting of 2023 Performance-based Options is contingent upon the achievement of obtaining 130% of grant-date stock price over 60 calendar days within four years from the grant date and attainment of a predetermined Company performance measure during the three-year performance period. As of December 31, 2024, the price hurdle was achieved and the Company assumes that the performance measure will be achieved. Accordingly, the awards are expected to vest in three tranches of 25%, 25% and 50% in May of 2027, 2028 and 2029, respectively. Vested 2023 Performance-based Options are exercisable for up to nine years following the grant date, and the awards are forfeited if the employee resigns before the respective vesting date. The expense for each tranche is amortized over the respective requisite service period.

The 2023 Performance-based Options have a strike price of $673.58 which was the closing price of the shares on the grant date. The grant-date fair value of the 2023 Performance-based Options was $120 million and was estimated using a Monte Carlo simulation with an embedded lattice model using the assumptions included in the following table:

Grant Year	Expected Term (Years)(1)	Expected Stock Volatility(2)	Expected Dividend Yield(3)	Risk-Free Interest Rate(4)
2023	6.02	27.73%	3.02%	3.61%

(1) The expected term was derived using a Monte Carlo simulation with the embedded lattice model and represents the period of time that options granted are expected to be outstanding.
(2) The expected stock volatility was based upon an average of historical stock price fluctuations of BlackRock's common stock and an implied volatility at the grant date.
(3) The expected dividend yield was calculated as the most recent quarterly dividend divided by the average three-month stock price as of the grant date.
(4) The risk-free interest rate is based on the US Treasury Constant Maturities yield curve at grant date.

Time-Based Stock Options

On May 30, 2023, pursuant to the Award Plan, the Company awarded time-based stock options to purchase 326,391 shares of BlackRock common stock to certain employees as long-term incentive compensation ("2023 Time-based Options"). These awards will vest in three tranches of 25%, 25% and 50% in May 2027, 2028 and 2029, respectively. Vested 2023 Time-based Options can be exercised up to nine years following the grant date, and the awards are forfeited if the employee resigns before the respective vesting date.

The 2023 Time-based Options have a strike price of $673.58 which was the closing price of the shares on the grant date. The grant-date fair value of the 2023 Time-based Options was $55 million and was estimated using a Black-Scholes-Merton model using the assumptions included in the following table:

Grant Year	Expected Term (Years)(1)	Expected Stock Volatility(2)	Expected Dividend Yield(3)	Risk-Free Interest Rate(4)
2023	7.13	28.29%	3.02%	3.65%

(1) The expected term represents the period of time that options granted are expected to be outstanding, and was calculated as the midpoint between the weighted average time to vest and expiration.
(2) The expected stock volatility was based upon an average of historical stock price fluctuations of BlackRock's common stock and an implied volatility at the grant date.
(3) The expected dividend yield was calculated as the most recent quarterly dividend divided by the average three-month stock price as of the grant date.
(4) The risk-free interest rate is based on the US Treasury Constant Maturities yield curve at grant date.

Employee Stock Purchase Plan ("ESPP"). The ESPP allows eligible employees to purchase the Company's common stock at 95% of the fair market value on the last day of each three-month offering period; therefore, the Company does not record compensation expense related to employees purchasing shares under the ESPP.

19. Deferred Cash Compensation and Employee Benefit Plans

Deferred Cash Compensation Plans

The components of deferred cash compensation expense are as follows:

(in millions)	**2024**	2023	2022
Deferred cash compensation expense:			
IPDCP	**$ 155**	$ 195	$ 228
VDCP	**26**	17	(18)
Other[1]	**31**	14	14
Total deferred cash compensation expense	**$ 212**	$ 226	$ 224

(1) Amounts primarily relate to deferred cash compensation in connection with certain acquisitions.

Investment Professional Deferred Compensation Program ("IPDCP"). The Company adopted IPDCP for the purpose of providing deferred compensation and retention incentives to certain employees. For this plan, the final value of the deferred amount to be distributed in cash upon vesting is associated with investment returns of certain investment funds. In January 2024, 2023 and 2022, the Company granted approximately $114 million, $90 million, and $257 million of deferred compensation that will fluctuate with investment returns and will vest ratably over three years from the date of grant. The liabilities for this plan were $220 million and $313 million at December 31, 2024 and 2023, respectively, and are reflected in the consolidated statements of financial condition as accrued compensation and benefits. In January 2025, the Company granted approximately $264 million of additional deferred compensation that will fluctuate with investment returns and will vest ratably over three years from the date of grant.

Voluntary Deferred Compensation Plan. The Company adopted a Voluntary Deferred Compensation Plan ("VDCP") that allows eligible employees in the US to elect to defer between 1% and 100% of their annual cash incentive compensation. The participants must specify a deferral period of up to 10 years from the year of deferral and additionally elect to receive distributions in the form of a lump sum or in up to 10 annual installments. VDCP deferred cash compensation expense includes the mark-to-market impact of investment returns. The liability balance of $170 million and $144 million at December 31, 2024 and 2023, respectively, is reflected on the consolidated statements of financial condition as accrued compensation and benefits.

Other Deferred Cash Plans. The liabilities related to other deferred cash plans were $34 million and $82 million at December 31, 2024 and 2023, respectively, primarily related to deferred cash plans granted in connection with certain acquisitions.

In 2019, the Company adopted a carried interest retention incentive program referred to as the BlackRock Leadership Retention Carry Plan, pursuant to which senior-level employees (but not including the Chief Executive Officer), as may be determined by the Company from time to time, will be eligible to receive a portion of the cash payments, based on their percentage points, in the total carried interest distributions paid to the Company from participating carry funds. Cash payments, if any, with respect to these percentage points will be made over time following the recipient's termination of employment due to qualified retirement, death or disability, subject to his or her execution of a release of claims and continued compliance with his or her restrictive covenant obligations following termination. There was no material impact to the consolidated financial statements.

Defined Contribution Plans

The Company has several defined contribution plans primarily in the US and UK.

Certain of the Company's US employees participate in a defined contribution plan. Employee contributions of up to 8% of eligible compensation, as defined by the plan and subject to Internal Revenue Code limitations, are matched by the Company at 50% up to a maximum of $5,000 annually. In addition, the Company makes an annual retirement contribution to eligible participants generally equal to 3-5% of eligible compensation. The Company's contribution expense related to this plan was $149 million in 2024, $86 million in 2023, and $83 million in 2022.

Certain UK wholly owned subsidiaries of the Company contribute to defined contribution plans for their employees. The contributions range between 9% and 15% of each employee's eligible compensation as of December 31, 2024. The Company's contribution expense related to these plans was $66 million in 2024, $64 million in 2023, and $60 million in 2022.

In addition, the contribution expense related to defined contribution plans in other regions was $50 million in 2024, $42 million in 2023 and $41 million in 2022.

Defined Benefit Plans. The Company has several defined benefit pension plans with plan assets of approximately $27 million and $28 million at December 31, 2024 and 2023, respectively. The underfunded obligations at December 31, 2024 and 2023 were not material. Benefit payments for the next five years and in aggregate for the five years thereafter are not expected to be material.

20. Related Party Transactions

Determination of Related Parties

Registered Investment Companies and Equity Method Investments. The Company considers the registered investment companies that it manages, which include mutual funds and ETFs, to be related parties as a result of the Company's advisory relationship. In addition, equity method investments are considered related parties, due to the Company's influence over the financial and operating policies of the investee.

Revenue from Related Parties

Revenue for services provided by the Company to these and other related parties are as follows:

(in millions)	2024	2023	2022
Investment advisory, administration fees and securities lending revenue(1)	**$ 12,050**	$ 10,757	$ 10,848
Investment advisory performance fees(1)	**728**	286	244
Other	**16**	(31)	(31)
Total revenue from related parties	**$ 12,794**	$ 11,012	$ 11,061

(1) Amounts primarily include revenue from registered investment companies and equity method investees.

The Company provides investment advisory and administration services to its open- and closed-end funds and other commingled or pooled funds and separate accounts in which related parties invest.

Receivables and Payables with Related Parties. Due from related parties, which is included within other assets on the consolidated statements of financial condition, was $245 million and $203 million at December 31, 2024 and 2023, respectively, and primarily represented receivables from certain investment products managed by BlackRock. Accounts receivable at December 31, 2024 and 2023 included $1.3 billion and $1.1 billion, respectively, related to receivables from BlackRock mutual funds and ETFs, for investment advisory and administration services.

Due to related parties, which is included within other liabilities on the consolidated statements of financial condition, was $11 million and $21 million at December 31, 2024 and 2023, respectively, and primarily represented payables to certain investment products managed by BlackRock.

21. Net Capital Requirements

The Company is required to maintain net capital in certain regulated subsidiaries within a number of jurisdictions, which is partially maintained by retaining cash and cash equivalent investments in those subsidiaries or jurisdictions. As a result, such subsidiaries of the Company may be restricted in their ability to transfer cash between different jurisdictions and to their parents. Additionally, transfers of cash between international jurisdictions may have adverse tax consequences that could discourage such transfers.

Banking Regulatory Requirements. BlackRock Institutional Trust Company, N.A. ("BTC"), a wholly owned subsidiary of the Company, which is chartered as a national bank whose powers are limited to trust and other fiduciary activities and which is subject to regulatory capital requirements administered by the US Office of the Comptroller of the Currency. Federal banking regulators would be required to take certain actions and permitted to take other actions in the event of BTC's failure to meet minimum capital requirements that, if undertaken, could have a direct material effect on the Company's consolidated financial statements.

Quantitative measures established by regulators to ensure capital adequacy require BTC to maintain a minimum Common Equity Tier 1 capital and Tier 1 leverage ratio, as well as Tier 1 and total risk-based capital ratios. Based on BTC's calculations as of December 31, 2024 and 2023, it exceeded the applicable capital adequacy requirements.

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
(in millions)	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2024						
Total capital (to risk weighted assets)	**$ 961**	**153.2 %**	**$ 50**	**8.0 %**	**$ 63**	**10.0 %**
Common Equity Tier 1 capital (to risk weighted assets)	**$ 953**	**151.9 %**	**$ 28**	**4.5 %**	**$ 41**	**6.5 %**
Tier 1 capital (to risk weighted assets)	**$ 953**	**151.9 %**	**$ 38**	**6.0 %**	**$ 50**	**8.0 %**
Tier 1 capital (to average assets)	**$ 953**	**71.3 %**	**$ 53**	**4.0 %**	**$ 67**	**5.0 %**
December 31, 2023						
Total capital (to risk weighted assets)	$ 775	145.8 %	$ 43	8.0 %	$ 53	10.0 %
Common Equity Tier 1 capital (to risk weighted assets)	$ 771	145.1 %	$ 24	4.5 %	$ 35	6.5 %
Tier 1 capital (to risk weighted assets)	$ 771	145.1 %	$ 32	6.0 %	$ 43	8.0 %
Tier 1 capital (to average assets)	$ 771	65.9 %	$ 47	4.0 %	$ 59	5.0 %

Broker-dealers. BlackRock Investments, LLC and BlackRock Execution Services are registered broker-dealers and wholly owned subsidiaries of BlackRock that are subject to the Uniform Net Capital requirements under the Securities Exchange Act of 1934, which requires maintenance of certain minimum net capital levels.

Capital Requirements. At both December 31, 2024 and 2023, the Company was required to maintain approximately $1.8 billion in net capital in certain regulated subsidiaries, including BTC, entities regulated by the Financial Conduct Authority and Prudential Regulation Authority in the UK, and the Company's broker-dealers. The Company was in compliance with all applicable regulatory net capital requirements.

22. Accumulated Other Comprehensive Income (Loss)

The following table presents changes in AOCI for 2024, 2023 and 2022:

(in millions)	2024	2023	2022
Beginning balance	**$ (840)**	$ (1,101)	$ (550)
Foreign currency translation adjustments(1)	**(338)**	261	(551)
Ending balance	**$ (1,178)**	$ (840)	$ (1,101)

(1) Amount for 2024 includes a gain from a net investment hedge of $37 million (net of tax expense of $12 million). Amount for 2023 includes a loss from a net investment hedge of $20 million (net of tax benefit of $6 million). Amount for 2022 includes a gain from a net investment hedge of $37 million (net of tax expense of $12 million).

23. Capital Stock

Cash Dividends for Common Shares / RSUs. During 2024, 2023 and 2022, the Company paid cash dividends of $20.40 per share (or $3.1 billion), $20.00 per share (or $3.0 billion) and $19.52 per share (or $3.0 billion), respectively.

The GIP Transaction. On October 1, 2024, as part of the closing of the GIP Transaction, (1) BlackRock issued 6,908,416 shares of common stock as part of the total consideration paid, (2) each share of common stock, $0.01 par value, of Old BlackRock issued and outstanding, other than common stock held in treasury, immediately prior to the closing of the GIP Transaction was converted automatically into one share of common stock, $0.01 par value, of New BlackRock and (3) shares of Old BlackRock common stock held in treasury were cancelled. See Note 3, *Acquisitions*, and Note 1*, Business Overview*, for additional information.

Share Repurchases. During 2024, the Company repurchased 1.9 million common shares under the Company's existing share repurchase program for approximately $1.6 billion. At December 31, 2024, there were approximately 3.8 million shares still authorized to be repurchased under the program. The timing and actual number of shares repurchased will depend on a variety of factors, including legal limitations, price and market conditions.

The Company's common shares issued and outstanding and related activity consist of the following:

	Shares Issued		Shares Outstanding
	Common Shares	**Treasury Common Shares**	**Common Shares**
December 31, 2021	172,075,373	(20,390,882)	151,684,491
Shares repurchased	—	(2,710,821)	(2,710,821)
Net issuance of common shares related to employee stock transactions	—	782,822	782,822
December 31, 2022	172,075,373	(22,318,881)	149,756,492
Shares repurchased	—	(2,176,538)	(2,176,538)
Net issuance of common shares related to employee stock transactions	—	920,120	920,120
December 31, 2023	172,075,373	(23,575,299)	148,500,074
Shares repurchased	—	(1,909,964)	(1,909,964)
Net issuance of common shares related to employee stock transactions	456,182	993,105	1,449,287
Issuance of common shares in connection with the GIP Transaction	6,908,416	—	6,908,416
Cancellation of treasury stock, common in connection with the GIP Transaction	(24,121,801)	24,121,801	—
December 31, 2024	**155,318,170**	**(370,357)**	**154,947,813**

24. Restructuring Charge

In the fourth quarter of 2023, a restructuring charge of $61 million ($46 million after-tax), comprised of $47 million of severance and $14 million of compensation expense for accelerated vesting of previously granted deferred compensation awards, was recorded in connection with initiatives to reorganize specific platforms, primarily Aladdin and private markets.

The table below presents a rollforward of the Company's restructuring liability for 2024 and 2023, which is included in other liabilities on the consolidated statements of financial condition:

(in millions)		
Liability as of December 31, 2022	$	58
Cash payments		(58)
Additions		61
Accelerated vesting expense of deferred compensation awards		(14)
Liability as of December 31, 2023	$	47
Cash payments		(47)
Liability as of December 31, 2024	**$**	**—**

25. Income Taxes

The components of income tax expense for 2024, 2023 and 2022, are as follows:

(in millions)	2024	2023	2022
Current income tax expense:			
Federal	**$ 960**	$ 641	$ 255
State and local	**142**	176	(9)
Foreign	**787**	538	448
Total net current income tax expense	**1,889**	1,355	694
Deferred income tax expense (benefit):			
Federal	**(105)**	101	562
State and local	**—**	11	64
Foreign	**(1)**	12	(24)
Total net deferred income tax expense (benefit)	**(106)**	124	602
Total income tax expense	**$ 1,783**	$ 1,479	$ 1,296

Income tax expense has been based on the following components of income before taxes, less net income (loss) attributable to NCI:

(in millions)	2024	2023	2022
Domestic	**$ 5,139**	$ 4,565	$ 4,604
Foreign	**3,013**	2,416	1,870
Total	**$ 8,152**	$ 6,981	$ 6,474

The foreign income before taxes includes countries that have statutory tax rates that are different than the US federal statutory tax rate of 21%, such as the UK, Germany, Canada and Ireland.

A reconciliation of income tax expense with expected federal income tax expense computed at the applicable federal income tax rate of 21% for 2024, 2023 and 2022 is as follows:

(in millions)	2024		2023		2022	
Statutory income tax expense	**$ 1,712**	**21%**	$ 1,466	21%	$ 1,360	21%
Increase (decrease) in income taxes resulting from:						
State and local taxes (net of federal benefit)	**130**	**2**	110	2	115	2
Impact of federal, foreign, state, and local tax rate changes on deferred taxes	**12**	**—**	—	—	(25)	—
Stock-based compensation awards	**(37)**	**—**	(41)	(1)	(87)	(1)
Resolution of outstanding tax matters	**—**	**—**	(204)	(3)	(143)	(2)
Intellectual property reorganization	**(137)**	**(2)**	—	—	—	—
Effect of foreign tax rates	**84**	**1**	112	2	23	—
Other	**19**	**—**	36	—	53	—
Income tax expense	**$ 1,783**	**22%**	$ 1,479	21%	$ 1,296	20%

Deferred income taxes are provided for the effects of temporary differences between the tax basis of an asset or liability and its reported amount in the consolidated financial statements. These temporary differences result in taxable or deductible amounts in future years.

The components of deferred income tax assets and liabilities are shown below:

	December 31,	
(in millions)	2024	2023
Deferred income tax assets:		
Compensation and benefits	**$ 354**	$ 375
Loss carryforwards	**103**	95
Foreign tax credit carryforward	**39**	—
Capitalized costs	**276**	216
Other	**795**	825
Gross deferred tax assets	**1,567**	1,511
Less: Deferred tax valuation allowances	**(69)**	(59)
Deferred tax assets net of valuation allowances	**1,498**	1,452
Deferred income tax liabilities:		
Goodwill and acquired indefinite-lived intangibles	**4,199**	4,299
Acquired finite-lived intangibles	**53**	86
Unrealized investment gains	**58**	25
Other	**341**	340
Gross deferred tax liabilities	**4,651**	4,750
Net deferred tax (liabilities)	**$ (3,153)**	$ (3,298)

Deferred income tax assets and liabilities are recorded net when related to the same tax jurisdiction. At December 31, 2024, the Company recorded on the consolidated statement of financial condition deferred income tax assets, within other assets, and deferred income tax liabilities of $181 million and $3.3 billion, respectively. At December 31, 2023, the Company recorded on the consolidated statement of financial condition deferred income tax assets, within other assets, and deferred income tax liabilities of $208 million and $3.5 billion, respectively.

Income tax expense for 2024 included discrete tax benefits of $137 million, recognized in connection with the reorganization and establishment of a more efficient global intellectual property and technology platform and corporate structure, $63 million related to the realization of capital losses from changes in the Company's organizational tax structure, $37 million related to vested stock-based compensation awards, and a net noncash discrete tax expense of $14 million related to the revaluation of deferred income tax liabilities. Income tax expense for 2023 included $242 million of net discrete tax net benefits related to the resolution of certain outstanding tax matters and stock-based compensation awards that vested in 2023.

At December 31, 2024 and 2023, the Company had available state net operating loss carryforwards of $2.9 billion and $2.7 billion, respectively, which will begin to expire in 2032. At December 31, 2024 and 2023, the Company had foreign net operating loss carryforwards of $193 million and $164 million, respectively, of which $10 million will begin to expire in 2025. At December 31, 2024, the Company had foreign tax credit carryforwards for income tax purposes of $39 million which will begin to expire in 2034.

At December 31, 2024 and 2023, the Company had $69 million and $59 million of valuation allowances for deferred income tax assets, respectively, recorded on the consolidated statements of financial condition.

Current income taxes are recorded net on the consolidated statements of financial condition when related to the same tax jurisdiction. At December 31, 2024, the Company had current income taxes receivable and payable of $215 million and $134 million, respectively, recorded in other assets and accounts payable and accrued liabilities, respectively. At December 31, 2023, the Company had current income taxes receivable and payable of $252 million and $85 million, respectively, recorded in other assets and accounts payable and accrued liabilities, respectively.

The following tabular reconciliation presents the total amounts of gross unrecognized tax benefits:

(in millions)	**2024**	2023	2022
Balance at January 1	**$ 749**	$ 912	$ 1,022
Additions for tax positions of prior years	**30**	25	13
Reductions for tax positions of prior years	**(10)**	(22)	(75)
Additions based on tax positions related to current year	**51**	49	55
Additions related to business combinations	**—**	16	—
Settlements	**(303)**	(231)	(103)
Balance at December 31	**$ 517**	$ 749	$ 912

Included in the balance of unrecognized tax benefits at December 31, 2024, 2023 and 2022, respectively, are $431 million, $505 million and $497 million of tax benefits that, if recognized, would affect the effective tax rate.

The Company recognizes interest and penalties related to income tax matters as a component of income tax expense. Related to the unrecognized tax benefits noted above, the Company accrued interest and penalties of $63 million during 2024 and in total, as of December 31, 2024, had recognized a liability for interest and penalties of $203 million. The Company accrued interest and penalties of $(20) million during 2023 and in total, as of December 31, 2023, had recognized a liability for interest and penalties of $140 million. The Company accrued interest and penalties of $(40) million during 2022 and in total, as of December 31, 2022, had recognized a liability for interest and penalties of $160 million.

BlackRock is subject to US federal income tax, state and local income tax, and foreign income tax in multiple jurisdictions. Tax years after 2015 remain open to US federal income tax examination.

During 2020 and 2021, the Internal Revenue Service commenced its examination of BlackRock's 2017 through 2018 tax years and 2019 tax year, respectively. During 2023, the Internal Revenue Service commenced its examination of BlackRock's 2016 tax year.

The Company is currently under audit in several state and local jurisdictions. The significant state and local income tax examinations are in New York State for tax years 2015 through 2020, and New York City for tax years 2012 through 2014. No open state and local tax examinations cover years earlier than 2012.

Upon conclusion of its examination, Her Majesty's Revenue and Customs ("HMRC") issued a closure notice during 2017 for various UK BlackRock subsidiaries for tax years 2009 and years after. At that time, the Company decided to pursue litigation for the tax matters included on such notice. During 2020, the Company received a favorable decision from the First Tier Tribunal ("FTT"), however, HMRC appealed to the Upper Tribunal ("UT") and the UT ruled in HMRC's favor, overturning the FTT's decision in July 2022. BlackRock appealed the UT's decision to the UK Court of Appeal, who dismissed the Company's appeal. The Company applied for permission to appeal to the UK Supreme Court, who refused permission to appeal in October 2024. The resolution did not result in a material impact to the consolidated financial statements.

From time to time, BlackRock may receive or be subject to tax authorities' assessments and challenges related to income taxes. BlackRock does not currently expect the ultimate resolution of any other existing matters to be material to the consolidated financial statements.

At December 31, 2024, it is reasonably possible the total amounts of unrecognized tax benefits will change within the next twelve months due to completion of tax authorities' exams or the expiration of statues of limitations. Management estimates that the existing liability for uncertain tax positions could decrease by approximately $160 million to $220 million within the next twelve months.

26. Earnings Per Share

The following table sets forth the computation of basic and diluted EPS for 2024, 2023 and 2022 under the treasury stock method:

(in millions, except shares and per share data)	**2024**	2023	2022
Net income attributable to BlackRock, Inc.	**$ 6,369**	$ 5,502	$ 5,178
Basic weighted-average shares outstanding	**150,042,269**	149,327,558	150,921,161
Dilutive effect of:			
Nonparticipating RSUs	**1,034,323**	969,089	1,119,829
Stock options	**538,493**	409,804	399,481
Total diluted weighted-average shares outstanding	**151,615,085**	150,706,451	152,440,471
Basic earnings per share	**$ 42.45**	$ 36.85	$ 34.31
Diluted earnings per share	**$ 42.01**	$ 36.51	$ 33.97

The amount of anti-dilutive RSUs and stock options were immaterial for 2024 and 2022. For 2023, 194,240 shares primarily related to stock options were excluded from the calculation of diluted EPS because to include them would have an anti-dilutive effect. Certain performance-based RSUs for 2024, 2023, and 2022, and certain performance-based stock options for 2023 were excluded from the diluted EPS calculation because the designated contingencies were not met.

27. Segment Information

The Company's management directs BlackRock's operations as one business, the asset management business. As such, the Company operates in one asset management operating segment. The Company's CODM is its Chairman and Chief Executive Officer, who reviews financial information presented, including significant expenses on a consolidated basis, as presented in the consolidated statements of income. The CODM utilizes a consolidated approach to assess performance and allocates resources using key financial metrics including total revenue, operating income and net income attributable to BlackRock, Inc. These financial metrics are used by the CODM to make key operating decisions, including capital allocation, determining annual and long-term compensation and managing costs in relation to revenue. Furthermore, these financial metrics are used to evaluate financial performance based on consolidated specific business objectives, contributions to the total firm operating margin and to evaluate the Company's relative performance against industry peers. See the consolidated financial statements for key financial metrics used by CODM and for more financial information regarding the Company's operating segment. The measure of segment assets is reported on the balance sheet as total consolidated assets.

The following table illustrates total revenue for 2024, 2023 and 2022 by geographic region. These amounts are aggregated on a legal entity basis and do not necessarily reflect where the customer resides, or affiliated services are provided.

(in millions)	2024	2023	2022
Revenue			
Americas	**$ 13,411**	$ 11,899	$ 11,931
Europe	**6,137**	5,209	5,164
Asia-Pacific	**859**	751	778
Total revenue	**$ 20,407**	$ 17,859	$ 17,873

See Note 17, *Revenue*, for further information on the Company's sources of revenue.

The following table illustrates long-lived assets that consist of goodwill and property and equipment at December 31, 2024 and 2023 by geographic region. These amounts are aggregated on a legal entity basis and do not necessarily reflect where the asset is physically located.

(in millions)	2024	2023
Long-lived Assets		
Americas	**$ 25,515**	$ 15,017
Europe	**1,437**	1,521
Asia-Pacific	**100**	98
Total long-lived assets	**$ 27,052**	$ 16,636

Americas is primarily comprised of the US, and also includes Latin America and Canada. Europe is primarily comprised of the UK, Luxembourg and the Netherlands, and also includes Switzerland, Ireland and France. Asia-Pacific is primarily comprised of Hong Kong, Japan, Singapore and Australia.

28. Subsequent Events
